The result of the above entries is to reduce the value of "Assets Capitalized," (Account 3211.2) by the amount of the depreciation expense recognized on real property assets that period. The net effect of the entries to "Net Results of Operations - DBOF," (Account 3321) is zero as the closing entries offset each other.

3. Addendum 1 to chapter 58, "Capital Assets," of this Volume provides an explanation of general ledger account 5790, "Invested Capital Used."

E. MANAGEMENT IMPROVEMENT INITIATIVES

1. Prior to Fiscal Year 1994, management improvement initiatives meeting specified criteria were capitalized and the capitalized amount was amortized over the benefiting periods. Management improvement initiatives were defined as those efforts that:

- a. Met the DoD capitalization criteria;
- b. Were expected to have a long-lived benefit to the management and/or administration of the activity but that had only incidental benefit to direct mission work performed by the activity;
- c. Were independently established and authorized by Defense Business Operations Fund management as an individual activity project or a joint project among multiple Defense Business Operations Fund activities; and
- d. Were necessary for reasonable operation and management of the Defense Business Operations Fund activity(ies). Requirements for preliminary planning, exploration, or research before final approval of a project shall be financed from Defense Business Operations Fund operating resources.

2. Commencing in Fiscal year 1994, in accordance with congressional guidance, management improvement initiatives shall be expensed unless specifically directed otherwise by the Under Secretary of Defense (Comptroller).

F. REAL PROPERTY MAINTENANCE AND REPAIR

1. Previous Policy. From the commencement of the Defense Business Operations Fund-in FY 1992, each Defense Business Operations activity included in its annual budget an amount sufficient to finance major real property maintenance and repair (MRPM&R) projects costing more than \$15,000. The policy permitted two possibilities--the amount budgeted could be used to (1) replace funds used for major maintenance and repair costs previously incurred or (2) finance major maintenance and repair costs that had not yet been incurred. To avoid significant fluctuations in recorded MRPM&R expenses and, as a result, fluctuations in annual budgets, the amount specified in the budget was allocated on a monthly basis over a 10-year period. The following subparagraphs to this paragraph explain the accounting that was necessary under the previous policy. The following subparagraphs are necessary to fully explain the conversion of the previous policy to the current policy to expense real property maintenance and repair.

a. Prepayment of Expenses. In those cases in which a MRPM&R project was completed in the current period and for which an accrual had not created a reserve, the amount of the outlay (disbursement) was recorded as a prepayment. The prepayment was recognized on a monthly basis over a 10-year period. The accounting entries were:

Dr 1450 Prepayments
Cr 1012 Funds Disbursed

Entry to record a current period disbursement for MRPM&R for which the expense was to be recognized in subsequent periods.

Dr 6120 Other Services
Cr 1450 Prepayments

Entry to recognize monthly current period expense of MRPM&R previously performed and paid.

b. Creation of Reserve Funding. In those cases in which a MRPM&R project was anticipated, a reserve to finance its costs was permitted to be created. The expense accruals created the funding reserve necessary to finance performance of major real property maintenance and repair. Payment for performance reduced the reserve. The accounting entries were:

Dr 6120 Other Services
Cr 3311.2 Reserve-Major Real Property Maintenance-DBOF

Monthly entry to accrue $1/120$ (10 years x 12 months = 120) of the expected expense for major real property maintenance and repair for which the actual outlay will be made in a future accounting period.

An outlay for the major real property maintenance and repair resulted in the following accounting entry:

Dr 3311.2 Reserve-Major Real Property Maintenance-DBOF,
Cr 1012 Funds Disbursed

Entry to record a current period disbursement for major real property maintenance and repair for which the expense has been previously accrued.

c. Deficiencies of Previous Policy. Although the policy was designed to provide a stable funding source for MRPM&R without creating wide fluctuations in annual budgets, some implementation and accounting problems were encountered. A primary problem was that the policy was not consistent with generally accepted accounting principles and. departed from other policies specifically designed to associate costs with the accounting period in which they were incurred.

2. Current Policy. Commencing in FY 1995, major real property maintenance and repair shall be expensed in the period in which the maintenance and repair occurs. Major real property maintenance and repair is defined as recurring maintenance costs and repair projects, real property renovation costs, planning and design costs associated with repair and renovation projects, for the maintenance and repair of buildings, structures, warehouses, and other real. Property owned or operated by DBOF business activities. Costs that will be expensed from operating budgets include real property maintenance, major maintenance and repair, and repair projects in any amount undertaken to preserve the physical structure or its support systems. Major real property maintenance and repair requirements are normally budgeted and executed as a level of effort necessary to support the maintenance and repair of business area real property.

3. Conversion of Previous Policy to Current Policy. The previous policy was not in accord with generally accepted accounting principle. A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of an error and is treated as a prior period adjustment. The following accounting entries eliminate the accounting affects of the previous MRPM&R policy:

a. Prepayment of Maintenance and Repair - Correction of Error

Dr 7400 Prior Period Adjustments
Cr 1450 Prepayments

Entry to correct, as a prior period adjustment, an error in an accounting practice and thereby eliminate the prepayment balance of previously paid amounts for major real property and maintenance that have not yet been expensed.

b. Reserve for Maintenance and Repair - Correction of Error

Dr 3311.2 Reserve-Major Real Property Maintenance-DBOF
Cr 7400 Prior Period Adjustments

Entry to correct, as a prior period adjustment, an error in an accounting practice and thereby eliminate the balance of previously accumulated capital reserves for major real property and maintenance.

c. Closing of Prior Period Adjustments Account

Dr 7400 Prior Period Adjustments
Cr 3311 Cumulative Results of Operations-DBOF

Entry to close, at fiscal year end, a credit balance in the prior period adjustment account to accumulated operating results.

Dr 3311 Cumulative Results of Operations-DBOF
Cr 7400 Prior Period Adjustments

Entry to close, at fiscal year end, a debit balance in the prior period adjustment account to accumulated operating results.

G. MANAGEMENT HEADQUARTERS COSTS

1. General. Each Defense Business Operations Fund activity, or group of activities is under the management control of a designated DoD Component. The DBOF headquarters management is related to specific DBOF activity operations, and is separate from the general policy direction for the Department or a DoD Component. Management headquarters to be funded from the DBOF must be identified in the supplemental provisions of the DBOF Charter (Management Command) for each applicable business area.

2. Identification and Payment for Headquarters Costs. Costs for discrete DBOF management headquarters organizations, and parts of organizations that perform DBOF management headquarters functions, should be directly funded by DBOF if feasible or, if not feasible, reimbursed by DBOF on a pro rata basis. Significant costs for common support (e.g., counsel and personnel) at organizations partially funded or reimbursed by DBOF (i.e., that have direct DBOF management responsibilities) also should be allocated, if feasible. Only significant costs should be reimbursed. Significant headquarters costs are costs that exceed 1 percent of the total business area costs, or \$1 million, whichever is greater.

H. OTHER EXPENSES

1. Centrally Controlled Assets. Defense Business Operations Fund activities that finance and centrally control a Defense Business Operations Fund management system for the benefit of other Defense Business Operations Fund users of that management system shall assign all allocable expenses to the benefiting users. The benefiting users shall reimburse the financing activity for their allocated share of expenses.

2. Unutilized and Underutilized Plant and Equipment. Costs of maintaining unutilized plant and equipment shall be determined and, when significant, shall be reimbursed by appropriated funds provided by the DoD Component having management responsibility for the DBOF activity. Costs applicable to unutilized plant and equipment such as depreciation, or maintenance shall not be charged to customers of the DBOF activity. However, costs applicable to underutilized plant and equipment shall be included in stabilized rates and charged to customers of the DBOF activity. Additional information is contained in section 0., chapter 63 of this volume.

3. Disposal/Demolition of Assets. The costs incurred in removing, packing, crating, handling, and shipping of fixed assets for disposal or demolition of buildings and structures shall be accumulated within a separate job order. The costs incurred shall be charged to the appropriate fixed asset account. At the time the asset is made available to the Defense Reutilization and Marketing Service for disposal, the accumulated depreciation shall be closed into the applicable fixed asset account balance. The resulting net balance in the fixed asset account shall be recorded in general ledger account 7210, "Losses on Disposition of Assets." Proceeds, if any, from the sale of the asset by the Reutilization and Marketing facility shall be recorded in general ledger account 7110, "Gains on Disposition of Assets."

CHAPTER 63

COST ACCOUNTING REQUIREMENTS FOR DEPOT MAINTENANCE

A. GENERAL

1. Purpose

a. The purpose of this chapter is to prescribe cost accounting requirements for DoD depot maintenance performed by Defense Business Operations Fund activities.

b. The objective of these depot maintenance cost accounting requirements is to uniformly record, accumulate, and report the cost-of performing depot maintenance functions.

c. Cost reporting requirements and procedures are contained in Chapter 14, "Depot Maintenance Reporting," of Volume 6, "Reporting policy and Procedures," of this Regulation.

2. Overview

a. The formal cost accounting requirements in this chapter are required for all Defense Business Operations Fund activities that perform depot maintenance work.

b. The requirements of this chapter apply to depot maintenance performed on all material, whether owned by the Department of Defense, other Federal agencies, State or local governments, foreign governments or private parties.

c. The uniform recordation, accumulation, and reporting of costs incurred in depot maintenance operations is required to assist management in the: measurement of productivity and efficiency; the development and use of performance measurement and cost standards; and highlight areas in need of increased management emphasis. Also, the data will assist in the identification of total maintenance capability, duplication of capacity, and areas of interservice support of maintenance workload.

d. Specifically, management should have depot maintenance information available from the cost accounting and reporting module to assist in the:

(1) Comparison of historical unit cost trends with replacement cost trends.

(2) Oversight in the utilization of depot maintenance resources.

(3) Evaluation of budgets for depot maintenance work programs.

(4) Comparison of cost trends among organic depots or between organic and contract sources.

(5) Managerial direction and guidance for depot maintenance programs.

(6) Evaluation of depot maintenance activities for efficient use of resources.

(7) Estimation of depot maintenance requirements.

(8) Monitoring of DoD Component compliance with various Congressionally mandated reporting requirements, including Contract/Organic shares.

(9) Examination of the behavior of cost drivers over time.

B. INTEGRATION WITHIN GENERAL ACCOUNTING SYSTEM

1. The depot maintenance cost accounting module should be subsidiary to, and integrated within, the general accounting system defined in the other chapters of this Regulation. That cost module should be integrated with the depot payroll, fund control, and operating materials and supplies modules.

2. The principal general ledger accounts for depot maintenance activities are Operating Materials and Supplies, Work In Process-In-House, and Cost of Goods Sold. Typical general ledger account entries are:

a. Dr	1581 Work In Process-In-House	\$ 5,000	
	Cr 2211 Accrued Payroll-Civilian (Direct)		\$ 5,000

To record direct labor cost incurred on job orders.

b. Dr	1581 Work In Process-In-House	\$10,000	
	Cr 1511 Operating Materials and Supplies Held for Use (Direct)		\$10,000

To record direct material and supplies on job orders.

c. Dr	1581 Work In Process-In-House	\$ 4,500	
	Cr 6600 Applied Overhead		\$ 4,500

To record overhead applied to job orders.

d. Dr	6600 Applied Overhead	\$ 4,000	
	Cr 1511 Operating Materials and Supplies Held for Use (Indirect)		\$ 1,000
	Cr 2211 Accrued Payroll-Civilian (Indirect)	\$ 3,000	

To record the cost of Labor and materials incurred in overhead applications where overhead is applied at predetermined rates. (Note that indirect costs are closed to account 6600 but that direct costs and account 6600 are closed directly to Work In Process.)

e. Dr	6500 Cost of Goods Sold	\$19,500	
	Cr. 1581 Work In Process-In-Hlouse		\$19,500

To record the relief of work in process and transfer of completed items to customers.

f. Dr	6600 Applied Overhead	\$ 500	
	Cr 6500 Cost of Goods Sold		\$ 500

To adjust overapplied overhead.

C. SCOPE OF DEPOT MAINTENANCE

Depot maintenance is material maintenance requiring major overhaul or a complete rebuilding of parts, assemblies, subassemblies, and end items, including the manufacture of parts, modifications, upgrades, testing and reclamation as required. Depot maintenance serves to support lower categories of maintenance by providing technical assistance and performing that maintenance beyond their responsibility. Depot maintenance provides stocks of serviceable equipment by using more extensive facilities for repair than are available in lower maintenance activities. Depot maintenance includes all aspects of software maintenance.

D. MODIFICATIONS AND UPGRADES

As defined in DoD Instruction 5000.2, "Defense Acquisition Management Policies and Procedures," a "modification" is a change to a system (whether for safety, to correct a deficiency, or to improve program performance) that is still being produced. An "upgrade" is a change to a system (whether for safety, to correct a deficiency, or to improve program performance) to a system that is out of production. A "major modification" to a program is defined as a modification that is and of itself meets the criteria of Acquisition Category I or II or is designated as such by the milestone decision authority. Major modifications require a Milestone IV-decision unless the decision to modify results from one of the alternatives considered as part of the Milestone I decision process. Upgrades are part of the milestone 0 decision process. DoD Instruction 5000.2 defines and explains the Acquisition Category Programs and the various acquisition milestones and phases.

E. FUNDING ENVIRONMENT

Depot maintenance may be performed in Government-Owned, Government-Operated (GOGO) activities, Government-Owned, Contractor-Operated (GOCO) activities, or contracted out. The primary funding source for depot maintenance operations is DoD operations and maintenance appropriations made available to customers of depot maintenance. Certain specific programs such as weapon system upgrades and similar modernization and/or modification programs may be funded with centrally managed procurement appropriations. An order for maintenance work may be placed with a depot maintenance activity by any appropriation or fund legally authorized to do so, as well as by customers outside of the Department of Defense such as the Coast Guard and Foreign Military Sales (FMS).

F. ESTABLISHING THE COST ACCOUNTING MODULE FOR DEPOT MAINTENANCE ACTIVITIES

1. The cost accounting module described in this chapter shall be established for all, but not limited to, Defense Business Operations Fund depot maintenance activities.

2. The following guidance further explains the use of the DoD general ledger chart of accounts by a depot maintenance activity:

a. Account 1510, "Operating Materials and Supplies," is the control account and shall be used to record all operating materials and supplies regardless of the method acquired; for example, acquisition, donation, or transfer without reimbursement. The account shall not be charged to the work in process (WIP) account until supplies are issued for use. Material issues shall then be charged to appropriate job orders or cost centers. Unneeded material shall be returned to the account when a determination is made that the material is available for other uses.

b. Operating materials and supplies shall be valued at acquisition cost .

c. Records of operating materials and supplies shall be verified by, and adjusted to, physical counts. Any adjustments needed to reconcile the physical count with the recorded (book) value of operating materials and supplies on hand shall be charged to the appropriate cost center or to a miscellaneous gain or loss account as described in subsection N.8, below.

d. Account 1581, "Work in Process - In House," is the control account for all unbilled job orders. The amount of work in process consists of all costs applied to unbilled job orders including direct labor, direct materials, and applied indirect overhead and general and administrative (G&A) expenses. The balance in this account shall be reconciled to the total charges on unbilled job orders as of the end of each quarter. In addition, the validity and reasonableness of the charges recorded on the unbilled job orders shall be verified on a random sample basis at least annually. This validation shall be performed by personnel not assigned to the accounting or maintenance function. For example, personnel from the DoD Component Audit Agency or a local internal review staff may be assigned to perform this function. Any adjustments required as a result of the verification shall be recorded as a gain or loss of the applicable cost center to, for gains, Account 7193, "Other Miscellaneous Gains," or, for losses, Account. 7293, "Other Miscellaneous Losses."

e. Account 1451, "Prepaid Expenses," shall be used to record the payment for expenses that properly apply to future accounting periods. This account shall not be used solely to level out significant expenses but must, in fact, represent an equitable distribution to the appropriate time period commensurate with the benefits that will accrue to that future period from the current payment.

f. Account 2994, "Progress Billings to Others," shall be used to record the liability resulting from progress payments billed to federal agencies for goods or services that have been ordered by those activities, but that have not yet been completed or delivered by the depot maintenance activity. Progress billings to non-federal agencies should not be necessary as

an advance is ordinarily required prior to start of work. The progress billing to federal agencies is recorded as a liability since it represents something-- goods and/or service -- that is owed to the entity that was billed. In no case shall a progress billing be processed that would result in the total progress payment against an order exceeding the amount of the order. A progress billing to others is recorded as follows:

Dr 1311 Accounts Receivable-Government-Current
Cr 2994 Progress Billings to Others

To record a progress billing to others for costs incurred by the performing activity on goods and/or services requested by the entity that is billed.

g. Accrued expenses that are significant (material) in relation to the recording of costs for the depot maintenance activity shall be recorded in the appropriate general ledger expense account, budgetary account (4900, "Expended Appropriations"), and the applicable liability account during the accounting period that the benefit was received rather than at the time of the payment for the expense. For example, accruals shall be recorded for accrued salaries, annual and sick leave, employee benefits, estimates for utilities, major real property maintenance and repair, and other significant services received and not yet paid.

h. Occasions may arise when, due to missing or erroneous data, costs incurred cannot be identified for charge to the appropriate job order. Such costs shall be temporarily recorded in the applicable expense account under suspense control until the correct data is available to make the proper distribution to the correct job order. Any unadjusted amount at the end of a fiscal year shall be charged to the applicable cost center to Account 7293, "Other Miscellaneous Losses."

G. ESTABLISHING JOB ORDERS

1. Job orders shall be established by the performing activity in accordance with the following criteria:

2. Units subject to "preshop analysis" or "examination and evaluation."

a. As a minimum, a job order is required for each unit when the estimated unit maintenance cost is in excess of \$150,000.

b. As a minimum, a job order is required for each month's induction of units having the same identification number (Type Model Series (TMS) or National Stock Number (NSN)) and the estimated unit maintenance cost is from \$25,000 to \$150,000 per unit.

c. As a minimum, a job order is required for each quarter's induction of units having the same identification number (Type Model Series (TMS) or National Stock Number (NSN)) and the estimated unit maintenance cost is less than \$25,000 per unit.

3. Units not subject to "preshop analysis" or "examination and evaluation."

a. As a minimum, a job order is required for each month's induction of units having the same identification number (Type Model Series (TMS) or National Stock Number (NSN)) and the estimated unit maintenance cost is \$25,000 or more.

b. As a minimum, a job order is required for each quarter's induction of units having the same identification number (Type Model Series (TMS) or National Stock Number (NSN)) and the estimated unit maintenance cost is less than \$25,000 and the planned work on all the items scheduled for induction during the quarter is \$500,000 or more,

c. As a minimum, a job order is required for each quarter's induction of homogeneous grouping of items by stock classification, subclassification, repair category, or other appropriate criteria and the estimated unit maintenance cost is less than \$25,000 and the planned work on any one identification number (Type Model Series (TMS) or National Stock Number (NSN)) is less than \$500,000. The dollar limit for the quarterly group job order is \$1,000,000.

H. JOB ORDER REQUIREMENTS

1. Under no circumstances shall direct material, labor, or other direct costs be charged to job orders based upon planned, programed, or reserved amounts. Costs may be charged to job orders based upon standard costs when those costs are properly adjusted for variances to arrive at actual cost. Costs, including standard costs, shall be recorded based upon accrual concepts. Costs shall be assigned to individual job orders at the time the job order receives a benefit from the incurrence of an expenditure. The benefit may occur at any time but usually occurs subsequent to the time the obligation is incurred and before the disbursement occurs.

2. Job order opening and closing requirements.

a. A job order shall be opened when a new job order is required under section G., above.

b. A job order shall be closed as soon as all direct, indirect, general and administrative costs are determined and assigned to the job order. Normally, all such costs should be determined and posted to the job order within 30 days of the completion of all direct labor chargeable to the job order. The job order shall be closed with the use of predetermined overhead rates, when authorized. Such overhead rates shall be consistently applied to all job orders. At the end of the fiscal year, any under and/or over absorbed overhead (variance) shall be closed to account 6500, "Cost of Goods Sold."

3. Costs associated with cancellation or reduction of partially completed maintenance work shall be identified and reported separately from the costs of normally completed work. Specific instructions to account for and report these costs are described in subsection 0.20., below, of this chapter.

4. Customer orders, either project orders or Economy Act orders, from the activity responsible for the financing appropriation, are required to support each job order. A customer order, however, may be issued to cover multiple job orders when agreed to in writing by the customer and the depot maintenance activity.

I. PROCESS COST CENTERS FOR PROCESSING ACTIVITIES

1. A depot maintenance activity may perform certain unique operations that lend themselves to process cost center procedures. For example, direct labor and material costs incurred in plating and painting operations may be more readily accumulated in a process cost pool and allocated on at least a monthly basis to the total number of units produced during the allocation period and the related costs assigned to each applicable job order.

2. The allocation shall be to the job orders for the units processed through the cost center during the allocation period. The basis for the allocation of costs by the process cost center to the job orders shall be the number of equivalent units processed on the job orders completed by the center during the allocation period plus the number of job orders in process at the end of the allocation period.

3. If such an approach is adopted, it should be done so deliberately after consideration of alternative methods. The method used to accumulate and allocate the costs for such operations should be consistently applied from accounting period to accounting period to ensure consistency in the assignment of costs.

J. USE OF WORK MEASUREMENT STANDARDS

1. Work measurement standards shall be established for labor, material, and indirect costs. Using these standards, cost estimates shall be developed for each job order. Incurred costs shall be compared against estimated costs to determine if corrective actions are required to control significant variances.

2. The work measurement standards shall be based on generally accepted industrial engineering techniques where high-value, high-volume work is involved. The work measurement standards may be established by in-house or other DoD personnel or they may be established by original equipment manufacturer's (OEM) specifications of maintenance tasks and frequencies (product reliability engineered standards). A work measurement standard, once established, should be continuously reviewed to verify the accuracy of the standard in light of advanced processing equipment, higher level of skills, etc. For low-value, low-volume work, the work measurement standards may involve less sophisticated engineering techniques but work measurement standards or estimated resources required shall be developed for all work accepted.

3. Work measurement standards shall be established and reevaluated to comply with the applicable Cost Accounting Standards Board (CASB) standards, and as required by DoD Instruction 5010.34, "Productivity Enhancement, Measurement, and Evaluation - Operating Guidelines and Reporting

Instructions." and DoD Instruction 5010.37, "Efficiency Review, Position Management, and Resources Requirements Determination."

K. LABOR COSTS

1. All civilian labor hours worked in a cost center shall be recorded on a job order as either a direct cost or as an indirect cost. Civilian labor hours shall be charged at the current payroll rate to include DoD paid personnel benefits.

2. Actual civilian payroll hourly rates shall be used as a basis to record labor costs. Average labor rates may only be used to record labor costs for cost centers when the range of actual hourly pay rates within that center is limited and significant distortions of recorded costs would not result from their use. Stabilized rates approved for billing purposes shall not be used as a basis to record labor or other costs incurred.

3. A labor distribution system shall be used to charge all direct labor hours and costs to applicable job orders. Differences between labor hours recorded for payroll purposes, payroll costs incurred and the labor hours and costs distributed to job orders and indirect cost centers through the labor distribution system shall be reconciled and corrected each pay period. For discrepancies that cannot be reconciled between job order records and payroll records without a major expenditure of resources, the job order records shall be corrected to equal the payroll records. Differences due to the use of average cost center labor rates shall be charged to general and administrative expenses.

4. All military hours worked shall be recorded as either a direct cost on a job order or as an indirect cost of a cost center. Military labor hours shall be charged to the job order at the current civilian equivalent rate applicable to the rank and military service of each military member.

5. All military labor performed by a "ship's force" (Navy crew members) loaned to and working under the supervision or direction of the depot maintenance activity when a ship is undergoing depot maintenance in a shipyard shall be considered an unfunded depot maintenance cost and shall not be billed to, or reimbursed by, the customer. When a ship's force is not working under the supervision or direction of the depot maintenance activity, any maintenance work it performs shall not be considered depot maintenance.

6. A time keeping system shall be maintained to provide data necessary to distribute both military and civilian labor to applicable job orders or cost centers. A timekeeping system should provide the following information:

a. Source of Hours Available:

- (1) Normal duty hours available by cost center.
- (2) Premium time, overtime, and holiday time by cost center.
- (3) Loaned labor hours by gaining and losing cost center.

b. Application of Hours Available:

- (1) Direct hours worked by cost center on each job order.
- (2) Indirect hours worked by cost center.
- (3) Nonproductive (annual, sick, etc.) hours by cost center.

7. The allocation of hours worked to benefiting job orders may be based on industrially engineered earned hour - actual hour efficiency of a cost center if the employees in the cost center are of a homogeneous type and the allocation of labor hours are properly adjusted for variances to arrive at actual hours worked. Such a method of allocation is not appropriate for a cost center with a diverse workforce or different types of workload.

8. Supervisors are responsible for the validity of timekeeping records. Employees are responsible for certifying that the time charged to job orders is correct. The source documents used to record the hours worked by each employee on each job order shall be reconciled to the total payroll hours.

9. Direct labor is work that can be identified, without undue cost or difficulty, to a single, specific job order. Direct labor generally includes the hands-on maintenance, repair, overhaul, test, and related direct production effort that follow the established sequence and content of work necessary to accomplish the billable job. Direct labor does not include the support work identified as either indirect or general and administrative in nature.

10. First line supervision is that level immediately over non-supervisory workers. First line supervisors and above are an official supervisory position and, when acting in a supervisory capacity, their labor costs shall always be charged as an indirect cost of the cost center supervised. "Crew chiefs," "snappers," "team leaders," and other subordinate job leaders are not first line supervisors. First line supervisors may be borrowed and used as direct labor. When this occurs, the time of the first line supervisor shall be classified as direct labor and charged as such to the applicable job order rather than as an indirect cost.

11. Special emphasis shall be placed on accurately recording the use of loaned labor. Loaned labor occurs when an employee is temporarily transferred (loaned) from one cost center to another within a depot maintenance activity. When an employee is loaned, the labor hours of the employee shall be recorded by the gaining cost center. Care must be exercised to assure that the costs of loaned employees are not charged by both, or by neither, the loaning and gaining cost centers. First line supervisors at both the loaning and gaining cost centers may be tasked to validate that such costs are accurately recorded.

12. If employees are temporarily assigned to a depot maintenance activity from an organizational entity other than the depot maintenance activity and the depot maintenance activity does not pay the individual directly nor make payment or reimbursement to the activity loaning the employee, the labor costs shall be recorded as unfunded labor.

13. The following requirements apply to accounting for civilian leave:

a. Account 2215, "Accrued Payroll - Funded Annual Leave - Civilian," shall be established to account for accrued annual leave of DBOF civilian employees. A factor for annual leave accrual should be included within the stabilized rate or price charged by a, DBOF activity. The stabilized rates or prices, therefore, provide funding for annual leave. The following accounting entry is appropriate for accrued funded annual leave.

Dr 6130 Annual Leave

Cr 2215 Accrued Payroll - Funded Annual Leave - Civilian

b. Subaccounts to account 2213, "Accrued Payroll - Civilian - Employer Share of Fringe Benefits," shall be established to account for accrued sick leave, accrued holiday, and other miscellaneous leave in addition to other employee fringe benefits such as life and health insurance, retirement contributions, etc. The following accounting entry is appropriate for accrued civilian fringe benefits.

Dr 6113 Personnel Benefits - Civilian

Cr 2213 Accrued Payroll - Civilian -

Employer Share of Fringe Benefits
(Subaccounts for sick leave, holiday leave,
health insurance, life insurance,
retirement contributions, etc.)

c. Leave shall be costed to job orders on the basis of an allocation factor for all time worked except when a holiday is involved. When an employee works on a holiday, the regular pay for the holiday shall be charged against the holiday leave accrual liability, the same as all employees who do not work on the holiday. Only the additional pay for working on the holiday along with the leave accrual at the prescribed allocation factor shall be costed to the job order as stated in subsection K.16., below.

d. Leave actually taken shall be relieved from the appropriate accrued leave account on the basis of payroll labor distributions and shall not be charged to current job orders. The following accounting entry is appropriate for leave actually taken.

Dr 2213 Accrued Payroll - Civilian -

Employer Share of Fringe Benefits
(Subaccounts for sick leave, holiday leave,
other leave except annual leave.)

Dr 2215 Accrued Payroll - Funded Annual Leave - Civilian

Cr 1012.1 Funds Disbursed - Operating Program - DBOF

e. Account 2215, "Accrued Payroll - Funded Annual Leave - Civilian," shall be reconciled at the end of the leave year with individual employee leave records. Adjustments to reconcile the balance in the account to the individual leave records shall be costed to account 6130, "Annual Leave," as a general and administrative (G&A) expense adjustment. After reconciliation, the balance of

the accrued annual leave account shall be carried forward into the following fiscal year. However, as stated in the following paragraph, accrued sick, holiday, and other leave balance not be carried forward into the following fiscal year.

f. Accruals for sick leave, holiday leave, and other leave accounts subsidiary to account 2213, "Accrued Payroll - Civilian - Employer Share of Fringe Benefits," are based on estimates of leave to be taken -- not the amount of leave earned. At fiscal year end, the estimates of leave to be taken will likely not-agree with the actual leave taken. Adjustments necessary to result in a \$-0- balance in the sick leave, holiday leave, and other leave subsidiary accounts shall be costed to account 6113, "Personnel Benefits - Civilian" as a general and administrative (G&A) expense adjustment.

14. The use of allocation factors for calculating leave accruals and applying them to the proper cost centers on labor cost distributions is normally the simplest, most economical, and most accurate method of accruing and costing leave. The allocation factors should be updated periodically to limit the adjustments to the accrued leave accounts at the end of the fiscal year to a minor amount.

a. Each depot maintenance activity may determine its own allocation leave accrual factors because of variances caused by average length of service, climate, turnover, and local leave usage experience.

b. When establishing the allocation factors, it is necessary to estimate the average annual work days for the activity to which the factor shall be applied. The following is an illustration:

c. Total days in year	365.0
Less time off	
Average annual leave taken	20.0
Average sick leave taken	9.0
Holidays and other events	11.0
Saturdays and Sundays	<u>104.0</u>
Normal time off	<u>144.0</u>
Normal work days	221.0
Estimated overtime work	3.5
Estimated holiday time work	.5
Average work days	225.0
d. The annual leave accrual factor may be calculated as follows:	
(1) Average days net accrual of annual leave	21
(2) Average work days (computed above)	÷ 225
(3) Preliminary accrual factor (excluding pay adjustments) [(1) ÷ (2)]	= .093

(4)	Estimated regular pay for regular time and overtime worked and premium pay for holiday time worked	x \$10,000,000
(5)	Total amount accrued for annual leave using preliminary factor	= \$ 930,000
(6)	Estimated increase in accrual of annual leave due to pay increase	÷ \$ 30,000
(7)	Total leave accrual requirements	= \$ 960,000
(8)	Amount to which leave accrual factor is to be applied (K.13.d., above)	÷ \$10,000,000
(9)	Annual leave accrual factor	= .096

e. The composite Leave accrual factor may be calculated as follows:

<u>Type of Leave</u>	<u>Average Days Annually</u>	<u>Average Work Days</u>	<u>Accrual Factor</u>
Annual	(see paragraph (K.14.d., above)	=	.096
Sick	8	÷ 225	= .036
Holiday and Other	11	÷ 225	= <u>.049</u>
Composite Accrual Factor			181

15. In addition to the factor to be added for leave, a factor shall be added to cover the employer's share of other employee fringe benefits such as retirement, life insurance, health, and other benefits. The factor to be applied may be developed by each activity. As an alternative, the factor developed annually by the Office of the Deputy Comptroller (Financial Systems) may be used. Standard accrual factors for leave, retirement, insurance, health, and other benefits shall be applied against all payroll costs.

16. The costs of overtime premium pay (that is, the amount paid for working overtime that is above the normal labor hour rate) shall not be charged directly to the applicable job order except when the overtime is clearly caused by the unique conditions of the job order. A clear relationship for the incurrence of overtime costs may be established when a depot maintenance activity agrees with a customer to meet an expedited completion date or to accept additional work within the same time frame on the same order. Otherwise, the overtime premium shall be recorded as an indirect cost.

17. Other premium pay includes those for extra shift, hazardous duty, and night duty. Consistent with the policy for overtime premium, other premium pay shall only be classified as a direct labor charge when the incurrence of the premium pay is clearly the result of unique conditions of the job order. Unless the peculiar conditions of the job order require the incurrence of the premium pay, premium pay shall be charged as indirect labor costs.

L. COSTING MATERIAL

1. All material and supplies received in a depot maintenance activity shall be accounted for in general ledger account 1511, "Operating Materials and Supplies Held for Use." This account shall be debited based upon receipt of material and supplies. The accounts for operating materials and supplies shall be credited with an offsetting debit (charge) to accounts 1581, "Work In Process - In-House," or 1582, "Work in Process - Contractor," upon issue of the material or supplies for use in the performance of depot maintenance work.

2. Direct material and supplies shall be charged directly to the applicable job order. Indirect material shall be charged to the using cost center upon issue.

3. Materials and supplies shall be valued at its acquisition cost.

4. Material furnished by a customer shall be used in the performance of depot maintenance work requested by the customer. Cost of the furnished material shall be recorded as an unfunded direct material cost in the amount determined by the customer. The depot maintenance activity shall use the same methods to maintain accountability over customer provided material as the depot maintenance activity uses for its own material.

5. Upon completion of a job order, any remaining customer furnished material shall be returned at the customer's request. Material abandoned by the customer shall be added to materials and supplies and credited to general ledger account 3220, "Transfers-In from Others Without Reimbursement."

6. Direct material is that material and supplies that can be identified, without undue cost or difficulty, in the performance of work specified by a work authorization document or job order. A small amount of material may be treated as indirect material even though the material is incorporated as a part of the final product, if this practice is consistently applied to all job order. Direct material may either be incorporated as a part of the final product or consumed in the maintenance process.

7. Indirect material is that material that cannot be identified, without undue cost or difficulty, in the performance of work as specified by a work authorization document or job order. The determination of what constitutes "without undue cost or difficulty," is, although not defined, subject to reasonable interpretation. If questioned, it is the responsibility of the DBOF activity to demonstrate that identification of material (or labor) as direct would be unduly costly or difficult in relation to the benefit received.

8. The material and supplies on hand in a cost center should be reviewed at least annually to determine if excesses exist. Those items that are excess and are not needed shall be returned to the materials and supply stock account. Unused material returned to the materials and supplies stock account shall be recorded as follows:

a. Credit shall be granted to the job order originally charged for unused direct material and that material shall be recorded as an increase to account 1511, "Operating Materials and Supplies Held for Use," unless there is no foreseen use for the material. If the job order to which the material was

originally charged has been closed, and a decision is made not to reopen the order to post the credit, the credit shall be applied to account 7193, "Other Miscellaneous Gains." If there is no foreseen use, the material shall be recorded as an increase to account 1513, "Operating Materials and Supplies - Excess, Obsolete, and Unserviceable." The loss, if any, shall be recorded to account 7293, "Other Miscellaneous Losses," and charged as an indirect cost to the returning cost center.

b. Credit shall be granted for the return of usable indirect material to the materials and supplies stock account. The credit shall be applied to the indirect material expense account of the applicable cost center.

c. Items excess to the needs of the depot maintenance activity shall be returned to the supply system. Items returned to the supply system for which credit is not granted, or credit in a lesser amount than the cost of the material returned, shall be recorded to account 7293, "Other Miscellaneous Losses." The value of the credits received for returns shall be recorded to account 7193, "Other Miscellaneous Gains."

9. When an item such as an assembly, subassembly, or an end item is designated as an "exchange" Item, the depot can issue a repaired item to the customer upon receipt of a repairable carcass from the customer. The customer shall be charged an average cost to repair the carcass. To facilitate this process, an average cost to repair shall be established for a fiscal year. The average cost to repair shall be determined by dividing historical cost to repair a type of carcass incurred each year by the number of units repaired and adjusting the result to the current year. The average cost to repair should be recomputed each fiscal year. For non-DoD carcasses including those owned by foreign governments refer to the requirements in Volume 15, "Security Assistance Policy and Procedures," of this Regulation.

10. If an exchange carcass is not repairable or an exchange item is missing and the depot maintenance activity is required to pay for a new item, the cost of the new item shall be charged to the job order as direct material cost.

M. OTHER DIRECT COSTS

1. Purchased services shall be charged as direct costs to the job order that benefits from the services. If only one job order benefits from a contract or purchase, the cost of the contract shall be charged to that job order. If more than one job order benefits from a contract, the costs of the contract shall be prorated to the benefiting job orders based upon estimates or calculations of the benefits received by each job order.

2. Purchased services that benefit indirect cost centers or the activity as a whole (general and administrative) shall be recorded as indirect costs.

3. The costs of contracts that supplement the maintenance capacity or capability of the depot shall be charged to the job orders that use the additional maintenance services.

4. The costs of material procured from contractors shall be recorded in the applicable operating materials and supplies account and charged to job orders under normal procedures. If, however, material is procured for a specific job order, the acquisition cost of the material shall be a direct charge to the applicable job order.

5. Travel and per diem expenses (including regular labor hours spent in travel) shall be charged as direct costs only if the labor hours worked while traveling are charged as direct labor. If more than a single job order is worked on, the travel and per diem expenses shall be prorated on the basis of the related direct labor. Otherwise, all travel and per diem expenses shall be charged as an indirect expense of the employees' cost center.

6. The costs of Permanent Change of Station (PCS) movements for transferred civilian employees that are the responsibility of the depot maintenance activity shall not be charged as a direct cost but as a G&A expense and recorded in accounts 6116, "Travel and Transportation of Persons," and 6117, "Transportation of Things."

N. INDIRECT COSTS

1. The overhead rates and standard costs discussed in this chapter should not be confused with stabilized billing rates. Stabilized billing rates or stabilized prices are used solely to price work to DoD-funded customers and may only be changed upon approval of the Office of the Comptroller of the Department of Defense.

2. All depot maintenance costs incurred that are not chargeable as direct costs, shall be recorded as indirect costs unless specifically designated otherwise in this Regulation. Indirect costs shall be recorded by object class as specified in OMB Circular A-n, and by general ledger account as specified in Volume 1, chapter 7 of this Regulation. Indirect costs shall be recorded by activity, department, cost center, or other organizational element responsible for incurring the cost. The number and type of indirect cost centers to be established is a function of the diversity of the indirect activities at the depot and the level of management information required. The minimum number of cost centers required to separately identify and record homogeneous groupings of cost is a function of the number of different types of facilities, equipment, and/or skills required in the indirect area. The number of additional cost centers is a management prerogative in terms of the number and type of cost centers needed to ensure efficient and effective operations.

3. Costs of departments, service, and processing centers that provide support directly to direct cost centers shall be classified as operating support indirect cost pools. The costs assigned to these cost pools shall be allocated in full to the benefiting direct cost centers (see subsection N.5., below) and not included in the G&A expense rate described in subsection N.6., below. Costs assigned to operating support indirect cost pools shall be allocated to the benefiting direct cost centers by the use of a base that results in the distribution of costs incurred in proportion to the benefits received.

4. Indirect costs shall be allocated to job orders by the use of an operations overhead rate and a G&A rate as described in subsections N.5. and N.6., respectively, below. Neither of these rates should be confused with the stabilized billing rates to be used to price billings to DoD customers.

5. An operations overhead rate shall be developed for each direct cost center in which direct labor is utilized in the performance of maintenance activities. The operations overhead cost pool shall consist of all indirect costs incurred by the cost center plus the allocated share of operating support costs of departments or service cost centers, if any (see subsection N.3. above). The base to be used to allocate the operations overhead cost pool to the direct cost centers is direct labor hours. Direct labor hours shall include both military and civilian direct labor. This base is appropriate because operations overhead in a maintenance activity is normally a function of direct labor hours. When the use of direct labor hours as an allocation base will not result in an equitable allocation of indirect costs (that is, charges are not commensurate with benefits received), a more appropriate allocation base may be selected providing:

a. An organizational authority, including the Office of the DoD Comptroller, that is above the level of the local performing depot maintenance activity has not directed that particular depot maintenance activity to use a specific allocation base.

b. The alternate allocation base preferred for use is approved by the comptroller of the local performing depot maintenance activity. (If a higher organizational authority has not previously directed a specific allocation base for use, then approval of the alternate preferred base need not be obtained by the local performing depot maintenance activity.)

c. Justification for the decision is documented and retained in the office of the local comptroller for review.

6. G&A expenses shall be allocated to job orders through the use of an overhead rate separate from the operations overhead rate. The G&A expense pool shall include all G&A expenses incurred by the maintenance activity. The base used to allocate G&A expenses to a job order is total incurred costs - both direct and indirect. When the use of total incurred costs as an allocation base will not result in an equitable allocation of G&A expenses (that is, charges are not commensurate with benefits received), a more appropriate allocation base may be selected providing:

a. An organizational authority, including the Office of the Under Secretary of Defense (Comptroller), that is above the level of the local performing depot maintenance activity has not directed that particular depot maintenance activity to use a specific allocation base.

b. The alternate allocation base preferred for use is approved by the comptroller of the local performing depot maintenance activity. (If a higher organizational authority has not previously directed a specific allocation base for use, then approval of the alternate preferred base need not be obtained by the local performing depot maintenance activity.)

c. Justification for the decision is documented and retained in the office of the local comptroller for review.

7. Overhead costs and G&A expenses shall be allocated to job orders through the use of, respectively, the operations overhead rate and G&A rates. These rates are not to be confused with the stabilized billing rates used to price the sale of services to DoD-funded customers. The rates shall be developed based upon estimated costs with an anticipated level of activity (base). The applied overhead account shall be used to record over and/or under absorbed overhead. This difference is a variance. A variance between actual overhead costs and applied overhead may require a change in the overhead rate. The development of a new overhead rate shall include plans to absorb the amount of the realized variance during the period of time the new overhead rate is in effect. A change in the overhead rate maybe approved by the performing depot maintenance comptroller when it is apparent that

a. The variance is not due to seasonal fluctuations such as summer vacations;

b. The variance will continue to exist at fiscal year end; and

c. The expected variance is significant. (The determination of what is "significant" shall be made by, or in consultation with, the local depot maintenance comptroller.)

8. When a job order is complete, it shall be closed (moved from work in process to account 6500, "Cost of Goods Sold") including overhead costs allocated. based upon overhead rates in effect during the life of the order. Adjustments in overhead rates made after a job order is closed shall not be posted to a completed job order unless the effect of the adjustment would have a significant impact on the total cost assigned to the job order. Adjustments applicable to the current fiscal year that are significant shall be posted to completed job orders and adjusted to account 6500, "Cost of Goods Sold." Other adjustments shall be recorded in a G&A account subsidiary to account 6900, "Other Expenses."

O. COSTS REQUIRING SPECIAL ATTENTION

1. Quality Assurance. The depot maintenance quality assurance function; that is, test design and analysis, performance of tests necessary to independently assure the quality of the work accomplished and related supervision and support, shall be charged as a direct cost to the applicable job order. Quality assurance costs that are not identifiable to specific job orders shall be charged to an operating support indirect cost center as described in subsection N.3., above, and allocated to the benefiting direct cost centers. Quality Assurance cost incurred in support of workload for other than depot maintenance or other activities shall, be directly charged to those activities.

2. Inspections and Tests. Inspections and tests made to determine work requirements; that is, preshop analysis, initial evaluation and inspection, and pre-inspection or shakedown inspection, shall be recorded as "direct labor" on the applicable job order. Also, final inspection and tests performed after the maintenance process is complete to assure operational or functional adequacy

are recorded as "direct labor - production. " Operational inspections and tests performed during the maintenance process to determine the condition of the item and make adjustments (calibrate) are inherent in the maintenance process and shall be recorded as "direct labor - production."

3. Reparables. Reclamation of unserviceable depot level reparable (DLRs) is performed at the direction of the National Inventory Control Point (NICP) item manager. Items produced as a byproduct of the reclamation process shall be returned to the DoD supply system. A separate job order shall be established for each reclamation project.

4. Borrowed Assemblies, Subassemblies, Components, or Parts.

a. "Backrobbing" (also called "robback") is defined as the taking of an assembly, subassembly, component, or part from an item that has been inducted for maintenance for use on another item inducted for maintenance with the intention of replacement at a latter time. It is the temporary borrowing of the required part. Generally, this practice is authorized only to prevent a work stoppage. The current acquisition cost of the assembly, subassembly, component, or part that was "borrowed" and the cost of installing the borrowed item shall be charged to the benefiting job order. All costs incurred in removing the "borrowed" item and reinstalling the replacement item shall be charged to the operations overhead of the cost center requiring the part. , These costs shall not be separately identified for reporting purposes.

b "Cannibalization" is defined as the taking of an assembly, subassembly, component, or part from an item (serviceable or unserviceable) that has not been inducted for maintenance (without regard to its location or ownership) by a maintenance activity for use on an item which has been inducted for maintenance. Generally, cannibalization is authorized only to prevent a work stoppage. The current acquisition cost of the assembly, subassembly, component, or part that was cannibalized and the cost of installing it shall be charged to the benefiting job order. All costs incurred in removing the cannibalized item and reinstalling the replacement item shall be charged to the operations overhead of the cost center requiring the part. These costs shall not be separately identified for reporting purposes.

5. Calibration. Calibration of an assembly, subassembly, component, part, or other equipment from an item that has been inducted for maintenance shall be charged to the benefiting job order. Calibration of equipment used by a depot maintenance cost center in the performance of its work shall be charged as an indirect expense of the cost center that uses the item being calibrated.

6. Modifications and Upgrades

a. Establishment of Job Orders. A separate job order shall be established for each modification or upgrade of a major end item such as an aircraft. Separate job orders shall only be established for other than major end item modifications or upgrades when the work is easily identifiable; such as when the modification or upgrade is the primary purpose of inducting the item. The cost of material used in the modification or upgrade process, such as a modification kit, and the cost of direct labor incurred to install the modification shall be charged to the modification job order.

b. Modification/Uprade vs Overhaul Costs. When a modification or upgrade is performed concurrently with depot maintenance work on the same major end item, direct modification or upgrade material (modification kits) used shall be charged to the modification or upgrade job order. However, direct labor shall be charged as modification or upgrade work only when it is peculiar to the modification or upgrade process. For example, when modification or upgrade is performed concurrently with overhaul, labor costs incurred in disassembly, test, inspection, repair, rebuild, replacement and servicing, etc., that are performed as a normal part of the overhaul shall be charged to depot maintenance overhaul and not prorated between overhaul and modification or upgrade. Labor costs incurred installing a modification or upgrade concurrently with depot maintenance overhaul work may be charged to the job order for the depot maintenance overhaul if the amount of the modification or upgrade labor is so small that no significant or material distortion in either the modification or upgrade or the depot maintenance cost shall occur." When this practice is followed, there shall be no adjustments to the depot maintenance overhaul job order on the basis of labor or material standards or other estimates of modification or upgrade labor in order to support reimbursement from fund citations for modification or upgrade work.

7. Automated Data Processing Costs

a. Software Development Costs. The costs of computer programing efforts for depot maintenance equipment (that is, the costs of software development efforts for use on depot maintenance activity assets) shall be capitalized when they meet the DoD capitalization criteria. Programing efforts that do not meet prescribed capitalization criteria shall be treated as operations overhead expense of the performing cost center. If the programming effort consumes significant amounts of resources, a separate indirect department or service center shall be established and the capitalized and other costs of the service center allocated to the benefiting direct cost centers on the basis of the program use. Costs of programing effort for non-depot maintenance functions or other activities shall be charged to those activities before the remaining costs are allocated to the benefiting direct cost centers. When the programming costs are not appropriately chargeable as an operations overhead cost, the costs shall be charged to a G&A expense account.

b. Software Support. Software support is performed by depot maintenance activities to ensure that fielded software systems continue to support original missions as updated by modification and improvement efforts. All depot maintenance costs for software support shall be charged to specific job orders established for this purpose. Costs charged to the orders shall include all applicable direct labor, direct material, all other direct costs, operations overhead and G&A costs.

8. Machine Set-Up Costs

a. The cost of programing effort for automatic test and numerically controlled machines shall be charged to the benefiting job order(s). However, if a significant effort is expended for programming that shall benefit more than one job order, then the programming cost should be allocated to all benefiting job orders. The nonproductive labor hours of employees waiting for programming to be completed is an indirect expense of the worker's cost center.

b. Machine tool set-up time shall be charged to the benefiting job order(s). Set-up time is normally recorded as direct labor on a job order and should not be separately recorded from the job order. However, if a significant effort is expended for a set-up that shall benefit more than one job order, then the set-up should be allocated to all benefiting job orders. The nonproductive labor hours of employees waiting for a set-up to be completed is an indirect expense of the worker's cost center.

9. Defective Work and Spoilage Costs

a. Charging as Direct Costs. Efforts undertaken to correct work defects and spoilage when quality control standards are not met shall be charged to the applicable job order. Examples of corrective work that should be directly charged to a job order include:

(1) Acceptable reject rates for castings, welds, and brazing.

(2) Minor realignment or refitting of units that are improperly finished or aligned.

(3) Resoldering of connections broken in transit.

b. Charging as Indirect Costs. When unusual defects or excessive spoilage occurs, the responsible cost center's indirect material and labor costs shall be charged with the costs of the corrective work. When the responsible cost center cannot be determined, the applicable material and labor cost shall be charged to an indirect expense account subsidiary to account 6900, "Other Expenses." Defective work and spoilage that is chargeable to indirect costs includes the following:

(1) Cost of additional material and labor necessary to remedy or rework end products when defects beyond acceptable levels are detected during the normal production and inspection processes. Such costs do not add value to the work performed but are necessary to bring the work up to stated specifications.

(2) Costs related to work on items with defects so severe that the item must be removed from the production process and sold as scrap or returned in part to operating materials and supplies. When this happens, the applicable job order should be relieved of the costs and the indirect costs of the responsible cost center charged. If a responsible cost center cannot be determined, a G&A account for "Defective Work and Spoilage," shall be charged for the costs of the rejected item.

10. Proceeds From Scrap Sales. Proceeds from sale of scrap generated by depot maintenance activities that are not Defense Business Operations Fund activities are credited to a miscellaneous receipts account with the Treasury and not credited to the account of the depot maintenance activity. However, net proceeds from the sale of scrap generated, collected, or otherwise obtained by Defense Business Operations Fund activities as a part of normal business operations shall be credited to the Defense Business Operations Fund and accounted for as follows:

a. Estimated net proceeds from the sale of material removed during work on vessels, aircraft, vehicles, and weapons that can be feasibly and economically related to a specific job order may be credited to that job order. When actual net proceeds are known, the job order amount shall be adjusted if the job order is still open. Otherwise, the net difference between the estimated amount and the actual amount of net proceeds shall be adjusted to account 7110, "Gains on Disposition of Assets."

b. Carcasses received from customers that are later condemned or deemed unserviceable are considered a normal part of Defense Business Operations Fund operations. Therefore, the proceeds from the sale of carcasses received from customers shall be credited to account 7110, "Gains on Disposition of Assets."

c. All other proceeds from the sale of Defense Business Operations Fund items shall be credited to account 7110, "Gains on Disposition of Assets."

11. Mobilization Capability Costs. Mobilization capability costs include the costs to maintain a surge capacity and/or maintain other assets, functions, or capabilities required to meet an operational contingency as documented in Defense Planning Guidance or operational plans. Surge capacity most often manifests itself in facilities and equipment that are unutilized or under utilized during normal peacetime operations.

a. Underutilized Capacity. Underutilized plant and equipment results when the volume of workload is less than full capacity of an operating facility. The cost of maintaining underutilized capacity (except for the DBOF Transportation Business Area) is not considered a mobilization requirement eligible for separate billing to, and reimbursement from the Operations and Maintenance (O&M) appropriation of the DoD Component having management responsibility for the activity at which the unutilized capacity resides appropriation' funding.

b. Unutilized Capacity Unutilized (reserve) plant and equipment capacity is that part of a DBOF activity's assets including plant and equipment that is held in a standby, idle, or lay-away status.

(1) Unutilized capacity associated with the ability to satisfy a projected surge capacity is considered a mobilization requirement eligible for separate appropriation funding when it is, or is expected to be, unutilized for six consecutive months or more. Such amounts shall not be funded in an appropriated or DBOF fund different from that in which funds for this purpose were budgeted unless approved by the Under Secretary of Defense (Comptroller).

(2) Unutilized capacity associated with the ability to provide capability in excess of any known or projected requirement is not a mobilization requirement.

c. Accounting for Unutilized and Underutilized Capacity. If feasible, a separate cost center shall be established to account for unutilized capacity costs applicable to the continuance of a mobilization requirement. Where necessary, such costs shall be identified to the function or task level to segregate costs between normal operating costs and mobilization costs.

d. Funding of Unutilized and Underutilized Capacity

(1) Unutilized Capacity. All elements of cost required to maintain unutilized plant and equipment capacity shall be DBOF funded costs. A separate job order shall be established to accumulate the direct, indirect, and GM costs supporting the maintenance of. unutilized plant and equipment capacity. Reimbursement from the operations and Maintenance (O&M) appropriation of the DoD Component having management responsibility for the activity at which the unutilized capacity resides shall be requested to pay for those costs except for depreciation of unutilized assets held to satisfy a mobilization requirement which shall be unfunded, The percentage of G&A costs allocated to the unutilized plant capacity job order. shall be the same as the percentage of G&A costs allocated to other activity job orders.

(2) Underutilized Capacity. The costs required to maintain underutilized plant and equipment shall be DBOF funded costs, and shall be a cost of the cost center in which the underutilized plant and equipment resides. The costs of underutilized plant, and equipment shall be included in the stabilized rates and prices charged to customers of a DBOF activity.

12. Job Order Cancellations or Reductions in Scope. When a job order is canceled or reduced in scope-after a DBOF activity has commenced work or incurred costs on the order, the costs incurred, plus the applied overhead (that is, indirect and other normally allocated overhead (G&A) costs) plus costs associated with the cancellation or reduction shall be charged to the customer. Examples of directly- associated .cancellation or reduction costs to be charged to customers are advance planning costs, noncreditable direct material,. special test equipment, necessary preservation and/or shipment effort, and any additional effort. necessitated by the cancellation and/or reduction; for example, salvaging of material. In addition, costs charged to customers should include the costs of salaries payable to employees hired specifically to work on the canceled order until the employees are, or could have been, separated through a reduction in force or other appropriate action (taking into account appropriate administrative lead time), or reassigned to other direct jobs. Costs which are indirectly associated with cancellation or reduction actions shall not be charged to the customer. Although normally allocated G&A costs shall be charged to cancelled or reduced customer orders, underapplied overhead costs that may result in the DBOF "activity as a whole from a reduced workload base shall not be charged to the customer canceling or reducing their order but shall be recorded against the net operating results of the performing DBOF activity. The following accounting entry illustrates the recordation of underapplied overhead costs directly against net operating results:

Dr 3321 Net Results of Operations - DBOF
Cr 6600 Applied Overhead

To record underapplied cost of overhead directly to net operating results.

13. Employee Training Costs. The cost of training performed for the depot maintenance activity's benefit shall be recorded as an indirect expense of the employees' cost center.

a. Training costs shall include all applicable elements of cost; that is, labor hours of trainees, travel, transportation, per diem costs, labor hours of instructors, tuition, books, and materials. Training costs shall include the cost of planning the course of instructions conducting the course, and any related support effort.

b. The development and qualification of employees requested by activities outside of the performing maintenance activity shall be charged to a specific job order.

c. The hours of on-the-job training in the form of actual productive effort (as opposed to observation or other noncontributory effort) is chargeable as direct labor to the related job order. Noncontributory effort, including time spent observing others, should be charged to the indirect costs of the cost center of the employee.

14. Technical Assistance. Depot maintenance technical assistance is a specialized service provided by qualified depot maintenance technicians that is performed in many different ways depending upon the requirement. Technical assistance may include instruction on maintenance repair or support processes for military equipment, special programs for military reserve units, training foreign nationals using uniquely qualified personnel to provide technical assistance, performing specific work requiring special skills for operational activities, other maintenance organizations, or foreign governments. All depot maintenance activity costs for technical assistance shall be charged to specific job orders established for that purpose. The costs charged to these job orders shall include direct labor, direct material, all other direct costs, and operations overhead and G&A costs including variances for applied overhead.

15. Assets Manufactured by a Depot Maintenance Activity for Itself. Normally, the material requirements of a depot maintenance activity are met by the supply system or commercial procurement. However, in some cases, material requirements may be fulfilled by a manufacturing process at the depot maintenance activity. The manufacturing process includes several phases:

a. A work authorization document (in-house job order) to replace the normal funded customer order.

b. The costing of direct labor, material, and applied overhead to the manufacturing job order as work in process.

c. The posting of the completed job order to operating materials and supplies, an asset account, or, if the transaction is reimbursable, to cost of goods sold.

16. Special Non-Maintenance Functions. Occasionally, some uniquely qualified depot maintenance personnel are asked to perform various types of special functions that are not maintenance activities or functions. Such work is chargeable to other separately budgeted functions such as supply operations, property disposal, or family housing.

17. Concurrent Maintenance. Concurrent maintenance occurs when the component parts of an end-item are inducted into the maintenance process at the same time as the end-item is inducted for maintenance. This approach is used instead of an exchange. The approach selected is usually a function of the desired outcome and the availability of exchanges. Concurrent maintenance and exchange do not normally result in the same costs being incurred, and no attempts should be made to balance the costs incurred for work performed in the two separate modes. All concurrent maintenance costs shall be charged to the weapon system order and not allocated to component repair job orders.

18. Host/Tenant Support Services. Depot maintenance activities give and receive different types and levels of support services to and from the host installation depending upon location and mission assignments.

a. Uniform costing requires that support services that benefit the performance of the depot maintenance function be recognized as part of the indirect expenses of the benefiting cost center or the entire depot maintenance activity as appropriate regardless of the funding source for the support services.

b. Within the Defense Business Operations Fund, depot maintenance activities shall not provide or receive goods or services on a nonreimbursable basis. In addition, offset or barter arrangements shall not be made with other activities for goods or services. Special arrangements to avoid normal funding requirements may result in apparent violations of the Anti Deficiency Act.

19. Employee Bonuses and Awards. Employee monetary awards paid to employees for suggestions, and one time bonuses, such as special act awards performance bonuses, and productivity gain sharing program payouts, shall be charged to indirect operations overhead of the cost center of the employee receiving the award. Performance appraisals that result in annual pay increases such as sustained superior performance, outstanding, exceptional, and fully successful pay ratings are simply increases in base pay that affect regular payroll cost.

CHAPTER 64

ARMY INDUSTRIAL ACTIVITIES

SALE OF MANUFACTURED ARTICLES OR SERVICES

OUTSIDE OF THE DEPARTMENT OF DEFENSE

A. AUTHORIZATION. Section 158 of the Fiscal Year 1994 DoD Authorization Act amended Chapter 433 of title 10, United States Code to authorize particular sales of certain working-capital funded industrial activities of the Army. Its provisions allowed for:

1. Authority Sell Outside DoD. A working-capital funded Army industrial facility (including a Department of the Army arsenal) that manufactures large caliber cannons, gun mounts, recoil mechanisms, ammunition, munitions, or components thereof may sell manufactured nondefense-related commercial articles or services to a person outside the Department of Defense if --

(a) in the case of an article, the article is sold to a United States manufacturer, assembler, developer, or other concern --

(1) for use in developing new products;

(2) for incorporation into items to be sold to, or to be used in a contract with, an agency of the United States;

(3) for incorporation into items to be sold to, or to be used in a contract with, or to be used for purposes of soliciting a contract with, a friendly foreign government; or

(4) for use in commercial products;

(b) in the case of an article, the purchaser is determined by the Department of Defense to be qualified to carry out the proposed work involving the article to be purchased;

(c) the sale is to be made on a basis that does not interfere with performance of work by the facility for the Department of Defense or for a contractor of the Department of Defense; and

(d) in the case of services, the services are related to an article authorized to be sold under 10 USC 4543 and are to be performed in the United States for the purchaser.

B. ADDITIONAL REQUIREMENTS. The following additional requirements also apply to sales under 10 USC 4543.

1. The authority to sell articles or services shall be exercised at the level of the commander of the major subordinate command of the Army with responsibility over the facility concerned.

2. A purchaser of articles or services shall use advance incremental funding to pay for the articles and services.

3. In the case of a sale of commercial articles or commercial services in accordance with paragraph A. above, by a facility that manufactures large caliber cannons, gun mounts, or recoil mechanisms, or components thereof, that facility shall --

(a) Charge the buyer the fixed and variable costs (that is, the full cost that is charged to buyers within the DoD that are associated with the commercial articles or commercial services sold.

(b) Enter into

(1) a firm, fixed-price contract for which the firm, fixed-price is, in good faith, established to recover the full cost that would be charged to a buyer within the DoD, or

(2) a cost reimbursement contract for the sale.

C. DEFINITIONS. In this chapter, and as related to 10 USC 4543, the following definitions apply.

1. Commercial Article. An article that is usable for a nondefense purpose.

2. Commercial Service. A service that is usable for a nondefense purpose.

3. Advance Incremental Funding. With respect to a sale of articles or services, means a series of partial payments for the articles or services that includes:

(a) one or more partial payments before the commencement of work or the incurring of costs in connection with the production of the articles or the performance of the services, as the case may be, and:

(b) subsequent progress payments that result in full payment being completed as the required work is being completed.

4. Variable Costs. With respect to sales of articles or services under 10 USC 4543, means the costs that are expected to fluctuate directly with the volume of sales and --

(a) in the case of articles, the volume of production necessary to satisfy the sales orders; or

(b) in the case of services, the extent of the services sold.

D. RELATIONSHIP TO ARMS EXPORT CONTROL ACT. Nothing in 10 USC 4543 shall be construed to affect the application of the export controls provided in section 38 of the Arms Export Control Act (22 USC 2778) to items which incorporate or are produced through the use of an article sold under this section.

CHAPTER 65

MOBILIZATION COSTS

A. APPLICABILITY

The policy contained herein applies to all DBOF activity business areas and covers the requirement for a separate appropriation for peacetime costs to maintain a mobilization capability. This requirement shall hereafter be referred to as mobilization requirement.

B. SCOPE

Each DBOF business area must plan for and maintain the capability to expand or alter operations, or to provide extraordinary supply or other functional area support necessary, to satisfy mobilization conditions when required. The nature and extent of the costs to be paid by a separate appropriation rather than charged to other business customers through the rates shall be in accordance with policy and procedures outlined below.

C. DEFINITIONS

Mobilization capability costs include the costs to maintain a surge capacity, to procure and maintain approved war reserve material levels, and/or to maintain other assets, functions, or capabilities required to meet an operational contingency as documented in Defense Planning Guidance or operational plans.

1. Surge Capacity

a. A business's total surge capacity most often manifests itself in facilities and equipment that are unutilized or underutilized during normal peacetime operations.

(1) Unutilized (Reserve) Plant and Equipment
Capacity is that part of a DBOF activity's assets including plant and, equipment that is held in a standby, idle, or lay-away status or for War Reserve Storage.

(2) Underutilized Plant and Equipment results when the volume of workload is less than full capacity of an operating facility. The cost of maintaining underutilized capacity, except as defined below for the Transportation Business Area, is not considered a mobilization requirement eligible for separate appropriation funding under this policy.

b. Unutilized capacity associated with the ability to satisfy a projected surge capability is considered a mobilization requirement eligible for separate appropriation funding when it is, or is expected to be, unutilized for six consecutive months or more. Such amounts shall not be funded in an appropriated or DBOF fund different from that in which funds for this purpose were budgeted unless approved by the Under Secretary of Defense (Comptroller).

c. Unutilized capacity associated with the ability to provide capability in excess of any known or projected requirement is not a mobilization requirement.

2. War Reserve Material. War reserve materiel includes secondary items procured and/or stored in support of wartime scenarios established in Defense Planning Guidance or contingency operations identified in specific Operational Plans.

D. FUNDING

1. Operations. All elements of cost required to maintain unutilized plant and equipment capacity shall be DBOF funded costs. The portions of direct, indirect, and G&A costs supporting the maintenance of this capacity shall be separately accumulated. When a portion of a DBOF activity's plant is purposely set aside as idle capacity, a direct appropriation to the Component O&M shall be requested to pay for the cost of essential operation and maintenance for that portion of the plant and idle equipment as well as an allocated portion of G&A costs. The percentage of G&A costs allocated to the cost center for the unutilized plant capacity shall be the same as the percentage of G&A costs allocated to other cost elements of the activity. Separate cost centers shall be maintained for all such costs.

2. War Reserve Material. The purchase of secondary items of supply as War Reserve Materiel shall be funded from a direct appropriation. Such appropriated amounts shall be reflected as a separate goal within the applicable Supply Management or Commissary Resale business area Annual operating Budget. Items such as ammunition and/or principal and major end items procured for war reserve shall not be DBOF-funded, but shall be funded through amounts available to Component/Defense Agency procurement appropriations.

3. Capital Investment. New capital asset investments at DBOF activities necessary to satisfy a mobilization requirement shall be funded from component procurement appropriations. DBOF activity business areas shall assume ownership of such assets. Depreciation expense for new capital assets to satisfy a mobilization requirement (as well as other, older capital assets laid away for use in mobilization) shall be recorded as unfunded depreciation.

4. United States Transportation Command (USTRANSCOM). Because a capability must be maintained by the USTRANSCOM DBOF Transportation business area to expeditiously respond to requirements to transport personnel, materials, or other elements required to satisfy a mobilization condition, direct appropriation funding will be provided for:

a. Air Mobility Command(AMC). Airlift flying hours and associated costs are based on the requirement to maintain the capability of the airlift system, including crew training (and concurrent mobilization) requirement. The airlift system training generated capacity is used by DoD to move air eligible cargo and passengers. In order to extend air eligibility and increase capacity utilization rates are generally established to be competitive with commercial carriers. However, resulting contributed revenue

does not cover the costs of operations due to the mobilization requirement. This requirement will be-recorded/budgeted as follows:

(1) The costs for military personnel will be recorded (at the civilian equivalency rate) in accordance with the policy on Military Personnel Expense in Chapter 63, "Expenses," of this Volume, Military personnel within the Air Mobility Command will be direct funded by a Military Personnel appropriation. Although the cost shall be recorded as a DBOF cost, it shall be recorded so that it is not required to be recovered in customer rates.

(2) The balance of the mobilization requirement costs will be funded through a direct appropriation to the Air Force and will be placed as an order with the DBOF. This will assure that revenue is reflected to offset the costs.

b. Military Traffic Management Command (MTMC). The MTMC shall plan for and maintain a Reserve Industrial Capacity (RIC) to transport personnel resources, material and other elements required to satisfy a mobilization requirement. The costs of RIC will be funded by Army Operation and Maintenance.

E. ACCOUNTING

A cost center capability shall be established to separately account for all costs applicable to the continuance of a mobilization requirement. Where necessary, such costs shall be maintained to the function or task level, as necessary to segregate costs between normal operating costs and mobilization costs.

Purchases of DBOF-funded War Reserve items shall be accounted for at the same level of detail as items procured for peacetime requirements. Amounts shall be recorded in separate general ledger accounts, or appropriate subaccounts, to retain separate visibility of such assets. Inventory levels funded by such amounts are not available for sale; therefore, cost shall be separately maintained and reported to ensure that the unit cost targets for the Supply Management business are not affected.

F. REPORTING

DBOF business area activities shall record and report financial information on the maintenance of a mobilization capability in accordance with the DoD accounting and reporting requirements specified for the DBOF. The Monthly Report of Operations (AR. 1307) shall be prepared to include a footnote which identifies the amount of the mobilization requirement costs which are funded through direct appropriations or reimbursable orders accepted specifically for mobilization requirements.

CHAPTER 70

DEFENSE BUSINESS OPERATIONS FUND ACCOUNTING REPORT [ACCOUNTING REPORT (M) 1307]

SECTION I

GENERAL PREPARATION INSTRUCTIONS

A. GENERAL

1. The Defense Business Operations Fund Accounting Report consists of three principal statements:

a. Statement of Financial Position which discloses the reporting entity's assets, liabilities, and net position;

b. Statement of Cash Flows which discloses the reporting entity's gross cash receipts and disbursements with an explanation of the changes in cash for the reporting period;

c. Statement of Operations (and Changes in Net Position) which discloses the results of the reporting entity's operations for the reporting period, including the changes in the entity's net position from the end of the prior reporting period.

2. An identification of the hierarchy of accounting standards to be followed in preparing Fund financial statements is contained in Chapter 50, "Defense Business Operations Fund General Policies and Requirements," of this Regulation and is summarized below.

a. Individual standards agreed to and published by the Joint Financial Management Improvement Program (JFMIP) principals. (The JFMIP principals are the Secretary of the Treasury, the Director of the Office of Management and Budget, and the Comptroller General of the United States.)

b. Form and content requirements included in OMB Bulletin 93-02, dated October 22, 1992 and subsequent issuances.

c. Accounting standards contained in agency (i.e., DoD) accounting policy, procedures manuals, and/or related guidance as of March 29, 1991, so long as they are prevalent practices.

d. Accounting principles published by authoritative standard setting bodies and other authoritative sources (1) in the absence of other guidance in the first three parts of this hierarchy, and (2) if the use of such accounting standards improves the meaningfulness of the financial statements.

3. Notes to the principal sections, which are an integral part of the principal statements, Shall provide additional disclosures necessary to make the principal statements fully informative and not misleading.

4. The Defense Business Operations Fund Accounting Report contained herein was designed based on Fiscal Year 1994 form and content reporting guidance. Annually the Office of the Under Secretary of Defense (Comptroller) publishes DoD guidance on the form and content of financial statements. Accordingly, the Defense Business Operations Fund Accounting Report may be revised to maintain comparability.

5. The Statement of Operations consists of six parts:

a. Part I identifies, in summary fashion, the cumulative year-to-date results of operations.

b. Part II identifies the net changes in equity.

c. Part III identifies the components of costs of goods sold.

d. Part IV identifies detail expense information.

e. Part V reconciles Net Operating Results to the operating results used for rate-setting purposes.

f. Part VI identifies the obligations and outlays for the capital investment program.

g. Part VII reports inventory management data for the Supply Management and Commissary Resale business areas.

B. REPORTING REQUIREMENT

1. Applicability. The provisions of this section apply to all DoD Components operating a Defense Business Operations Fund activity. A listing of DBOF financial reporting entities is attached to this section. Within the attached listing, the lowest level for which individual AR 1307 reports are required are indicated by an asterisk (*) symbol. The levels for which a consolidated AR 1307 report are required are indicated in the attached listing by a pound (#) symbol. Consolidated statements are required for each DoD Component business area.

2. Report Forms. The financial statement formats contained herein show the report formats that must be used. The reports shall be prepared or reproduced on letter size paper (8 1/2" x 11"). Reports produced by automatic data processing equipment may be substituted for the formats illustrated. The following are the reports to be submitted:

Statement of Financial Position

Statement of Cash Flows

Report on Operations

Part I - Statement of Operations

Part II - Changes in Net Position

Part III - Cost of Goods Sold and Services Provided

Part IV - Expenses

Part V - Recoverable Operating Results

Part VI - Capital Investment Program
Part VII - Inventory Management Report - Supply Management
Business Area

3. Reporting Responsibilities. DoD Components are responsible for the information included in the AR 1307 report and for arranging for the preparation and submission of the report.

4. Frequency of Reports. Unless otherwise specified by the DoD Comptroller, the AR 1307 reports shall be prepared and submitted monthly, no later than the 18th workday of the month immediately following the end of the reporting period.

5. Distribution

a. Consolidated DoD Component and Business Area Reports. A copy of consolidated DBOF business area reports shall be submitted to:

(1) Director for Revolving Funds, Office of the Deputy Comptroller (Program/Budget), Office of the Under Secretary of Defense (Comptroller), the Pentagon, Room 3B866.

(2) Director for Financial Review and Analysis, Office of the Deputy Under Secretary of Defense (Comptroller/Financial Management), Office of the Under Secretary of Defense (Comptroller), the Pentagon, Room 1A658.

(3) Office of the Assistant Secretary of the Army (Financial Management), Office of the Assistant Secretary of the Navy (Financial Management and Comptroller), and Office of the Assistant Secretary of the Air Force (Financial Management and Comptroller), and Comptrollers of the Defense Agencies for business areas for which they are responsible.

(4) Management Command responsible for the oversight of a business area, if requested by a DoD Component.

b. Activity Level Reports. A copy of DBOF activity level reports shall be submitted to:

(1) Office of the Assistant Secretary of the Army, Navy, and Air Force (Financial Management), and Comptrollers of the Defense Agencies, for activities for which they are responsible, if requested by that DoD Component.

(2) Management Command responsible for the oversight of a business area, if requested by a DoD Component.

(3) The DBOF activity, whose operations are being reported. The report provided to a DBOF activity shall disclose any adjustments made to the financial data submitted by that activity.

C. DETAIL INSTRUCTIONS

1. The control accounts specified in Addendum 1 to Chapter 7, Volume 1 of DoD 7000.14-R, DoD Financial Management Regulation, as well as accounts referred herein, are authorized for use by DBOF activities. These accounts are

supported by such subsidiary accounts as may be necessary, together with the accounting policy guidance contained in DoD 7000.14-R, shall be used to accumulate the financial information being reported.

2. The instructions to the AR 1307 identify the specific data, and appropriate source of that data, for amounts to be entered into each line of each report. Newly established DoD Uniform Chart of Accounts general ledger accounts are indicated by an asterisk.

3. If existing accounting systems do not utilize the DoD Uniform Chart of Accounts, the balance for accounts within those systems which correlate to the listed DoD Uniform Chart of Accounts will be used in accordance with crosswalks developed by the Defense Finance and Accounting Service.

4. Amounts will be reported in thousands of dollars (\$000) for all parts of the report (that is, \$1,000 = \$1; \$10,000 = \$10; \$100,000 = \$100; etc.).

5. Report lines that require the identification of the nature of specific amounts will be footnoted, and such footnotes will be provided with each report.

6. Adjustments for amounts otherwise accounted for or reported at the DoD Component level should be allocated or assigned to the applicable business areas. Similarly, adjustments for amounts otherwise submitted for or reported at the business area level should be allocated, or assigned to the applicable individual activities. Such allocations shall be made, by the DFAS, in accordance with direction received from the DoD Components. However, as a general rule and where reasonable, all such adjustments should be allocated to individual activities. Adjustments made at the business area level shall be shown separately as a business area adjustment. Adjustments allocated to the individual activity level shall be entered into the activities' installation level accounting records.

7. Policies that, if implemented retroactively, could have a significant adverse impact on the accuracy and integrity of financial reports will not be retroactively implemented without a clearly offsetting benefit or unless directed by an external authority such as Congress.

DEFENSE BUSINESS OPERATIONS FUND ACCOUNTING REPORT
[ACCOUNTING REPORT (M) 1307]

SECTION II

INSTRUCTIONS FOR THE PREPARATION OF THE
STATEMENT OF FINANCIAL POSITION

A. General. The Statement of Financial Position discloses the reporting entity's assets, liabilities, and net position.

B. Heading. Complete the heading on the form to indicate; (a) the reporting DoD Component, (b) the reporting DBOF business area or activity, (c) the reporting period (month), and (d) the calendar year.

C. Line Item Instructions. Instructions for the content of each line are:

1. Line 1 - Fund Balance with Treasury. This item represents the aggregate amount of the entity's accounts with Treasury for which the entity is authorized to make expenditures and pay liabilities. (This line should not include account balances, such as those in deposit, suspense, and clearing accounts, that are not available to finance the entity's activities.) Accounts have been established to separately identify collections applicable to the operating program and capital program to comply with section 342 of the National Defense Authorization Act For Fiscal Year 1993, which requires DoD to establish a capital asset subaccount. Disclosure should be made in note 1 to distinguish between (a) the obligated balance not yet disbursed, and (b) the unobligated balance. Report the balance by the specified applicable categories:

2. Line 1.a. - Funds Collected-Operating Program. Report the balance of the following account:

1011.1 Funds Collected - Operating Program - DBOF

NOTE: All cash inflows shall be initially recorded to the above account. Periodically, but at least monthly prior to financial statement preparation, the applicable amount (see below) shall be transferred from general ledger account 1011.1, "Funds Collected - Operating Program," to general ledger account 1011.2, "Funds Collected - Capital Program."

3. Line 1.b.-Funds Collected-Capital Program. Report the balance of the following accounts:

1011.2 Funds Collected - Capital Program - DBOF

NOTE: All cash inflows shall be initially recorded to account 1011.1, "Funds Collected - Operating Program." Periodically, but at least monthly prior to financial statement preparation, the applicable amount shall be transferred from general ledger

account 1011.1, "Funds Collected - Operating Program, " to general Ledger account 1011.2, "Funds Collected - Capital Program."

The preferred method to transfer collections to account 1011.2 is on a transaction basis. The transfer, however, may be made on a time basis (daily, weekly, etc.). The transfer must, however, be made at least monthly prior to financial statement preparation. The amount to be transferred to account 1011.2 shall be computed by first determining, at each DBOF activity, the percentage of the stabilized billing rate that is added to fund the Capital Investment Program within that activity's business area. (Stabilized billing rates should, in addition to recovering operating costs, also include a factor to fund the Capital Investment Program. That factor is composed of the expected depreciation expense and, if applicable, any additional capital surcharge. Since stabilized billing rates should not change during the fiscal year, the percentage allocation between the operating and capital program cash collection accounts should not change during the fiscal year.) The resulting ratio is then applied to the monthly change in funds collected at that activity. The percentage is applied to all collections received that fiscal year, even though, for some collections, the revenue was generated in the prior fiscal year. For example, assume that at Activity X the stabilized billing rate is \$100 of which \$5 is to fund the Capital Investment Program. The resulting percentage is therefore 5 percent (\$5 divided by \$100 = 5%). Each dollar of collections results in a \$0.95 (95¢) increase to account 1011.1, "Funds Collected - Operating Program," and a \$0.05 (5¢) increase to account 1011.2, "Funds Collected - Capital Program."

At our illustrative Activity X, the cash collections for this month were \$3.5 million. The usual entry to record a cash collection is as follows:

Dr	1011.1 Funds Collected -	
	Operating Program	\$3,500,000
Cr	1311 Accounts Receivable -	
	Government - Current	\$3,500,000

Computation of 5 percent of the cash collections for the month yields \$175,000. The entry to transfer \$175,000 between the cash accounts is:

Dr	1011.2 Funds Collected -	
	Capital Program	\$175,000
Cr	1011.1 Funds Collected -	
	Operating Program	\$175,000

4. Line 1.c. - Funds Disbursed-Operating Program. Report the balance of the following account:

1012.1 Funds Disbursed - Operating Program - DBOF

NOTE: Account 1012.1, "Funds Disbursed - Operating Program, DBOF," is used to record cash outflows that occurred due to activity attributable to the DBOF operating program (vice capital program).

5. Line 1.d. - Funds Disbursed-Capital Program. Report the balance of the following account:

1012.2 Funds Disbursed - Capital Program - DBOF

NOTE: Account 1012.2, "Funds Disbursed - Capital Program - DBOF," is used to record cash outflows that occurred due to activity attributable to the DBOF capital program (vice operating program).

The amount recorded to account 1011.2 shall be equal to capital program outlay amounts reported in Part VI, "Capital Investment Program," of the Statement of Operations.

6. Line 1.e. - Funds With Treasury-Operating Program. Report the balance of the following account:

1013.1 Funds With Treasury - Operating Program - DBOF

7. Line 1.f. - Funds With Treasury-Capital Program. Report the balance of the following account:

1013.2 Funds With Treasury - Capital Program - DBOF

Account series 1014, "Undistributed Collections," and Account series 1015, "Undistributed Disbursements," are not included in the above listing as these two accounts should have a \$0 balance for financial report preparation.

8. Line 2 - Cash on Hand and Other Monetary Assets. Consists of
(a) coins, paper currency and readily negotiable instruments such as money orders, checks and bank drafts on hand or in transit for deposit,
(b) amounts on demand deposit with banks or other financial institutions, and
(c) cash held in imprest funds. Report the balance of the following accounts:

1110 Undeposited Collections
1120 Imprest Funds
1191 Disbursing Officers' Cash
1195 Other Monetary Assets

9. Line 3. - Accounts Receivable, Net. Accounts receivable are amounts that a federal entity claims for payment from other entities. Report the balance of the following accounts:

- 1311 Accounts Receivable - Government - Current
- 1312 Accounts Receivable - Government - Noncurrent
- 1313 Accounts Receivable - Public - Current
- 1314 Accounts Receivable - Public - Noncurrent
- 1315 Refunds Receivable - Government
- 1316 Refunds Receivable - Public
- 1319.1 Allowance for Loss on Accounts Receivable - Government
- 1319.2 Allowance for Loss on Accounts Receivable - Public
- 1320 Claims Receivable - Public

10. Line 4. - Advance and Prepayments. Report the balance of the following accounts:

- 1411 Travel Advances
- 1412 Advances to Contractors and Suppliers
- 1414 Advances - All Others - Public
- 1415 Advances to Government Agencies and Funds
- 1451 Prepaid Expenses (Non-Federal)
- 1452 Progress payments Made to Others (Non-Federal)

11. Line 5. - Inventories Held for Sale, Net. Inventory is tangible personal property that is (i) held for sale, (ii) in the process of production for sale, or (iii) to be consumed in the production of goods for sale or in the provision of services for a fee. This line applies only to the Supply Management business area and the Defense Commissary Agency.

12. Line 5.a. - Inventory Items. Report the balance of the following accounts:

- 1521 Inventory Held for Sale
- 1521.1 Inventory in Transit from Procurement
- 1521.2 Inventory in Transit from DoD Activities
- 1522 Inventory Held in Reserve for Future Sale
- 1523 Inventory Held for Repair
- 1523.1 Exchange (DLR) Inventory in Transit
- 1524 Inventory - Excess, Obsolete, and Unserviceable

13. Line 5.b. - Allowance for Unrealized (Gain)/Loss on Inventories. Report the balance of the following accounts (a net credit balance will be reported as a negative [deduct] amount: a net debit balance will be reported as a positive [add] amount):

- 1529.1 Allowance for Unrealized Holding Gain/Loss -
Inventory Held for Sale (Including Subaccounts)
- 1529.2 Allowance for Unrealized Molding Gain/Loss -
Inventory Held in Reserve for Future Sale
- 1529.3 Allowance for Repairs

14. Line 6. - Work In Process. Work in process is, for the DBOF, the amount of direct, indirect, and general and administrative (G&A) costs assigned or otherwise properly allocated to a final cost objective (generally, a job order) prior to completion of that final cost objective in its entirety or in discrete elements. When revenue is recognized on a percent of completion basis, the work in process associated with the revenue recognized should be relieved

from work in process and recorded as cost of goods sold. This line applies only to DBOF activities, such as those within the Depot Maintenance business area, that accumulate costs to a final cost objective (generally, a job order). This line does not ordinarily apply to activities that do not accumulate costs to a final cost objective such as, for example, the Supply Management business area or the Defense Commissary Agency. The balances in the following accounts shall be reported:

- 1581 Work in Process - In House
- 1582 Work in Process - Contractor
- 1583 Work in Process - Other Government Activities
- 1584 Work in Process - Government-Furnished Material

15. Line 7. - Operating Materials and Supplies. Operating materials and supplies consist of tangible personal property to be consumed in normal operations. This line applies to all DBOF activities since all DBOF activities, including those in the Supply Management business area and the Defense Commissary Agency can have operating materials and supplies. Report the balance of the following accounts:

- 1511 Operating Materials and Supplies Held for Use
- 1512 Operating Materials and Supplies Held in Reserve for Future Use
- 1513 Operating Materials and Supplies - Excess, Obsolete,
and Unserviceable
- 1514 Operating Materials and Supplies in Transit

16. Line 8. - Stockpile Materials, Net. Stockpile materials are strategic and critical materials held due to statutory requirements for use in national defense, conservation or national emergencies. They are not held with the intent of selling in the ordinary course of business. Report the balance in the following accounts:

- 1573 War Reserve/Mobilization Stock
- 1579.2 Allowance For Holding Gain/Loss - War Reserve/Mobilization
Stock

17. Line 9. - Property and Equipment. The amount of real and personal property, i.e., land, structures and facilities, construction in progress, purchased and self-developed software, equipment and related improvements that has been capitalized, net of accumulated depreciation, if any. Also includes assets acquired by capital leases and leasehold improvements; and property owned by the reporting entity in the hands of the reporting entity or contractors.

18. Line 9.a. - Structures, Facilities & Leasehold Improvements, Net. Report the balance of the following accounts:

- 1730 Buildings
- 1739 Accumulated Depreciation on Buildings
- 1740 Other Structures and Facilities
- 1749 Accumulated Depreciation on Other Structures and Facilities
- 1820 Leasehold Improvements
- 1829 Accumulated Amortization on Leasehold Improvements

19. Line 9.b. - Equipment, Net. Report the balance of the following accounts:

- 1750 Equipment
- 1759 Accumulated Depreciation on Equipment
- 1761 Industrial Property in Layaway
- 1762 Equipment in Use
- 1763 Equipment with Contractors, Testing Agencies,
Defense Industrial Facilities, and Others
- 1764 Equipment on Loan
- 1765 Property Awaiting Disposal
- 1769 Accumulated Depreciation on Military Equipment
- 1770 Equipment in Transit

20. Line 9.c. - ADP Software, Net. Report the balance of the following accounts:

- 1830 Automated Data Processing Software
- 1839 Accumulated Amortization on Automated Data Processing Software

21. Line 9.d. - Assets Under Capital Lease, Net. Report the balance of the following accounts:

- 1810 Assets Under Capital Lease
- 1819 Accumulated Depreciation on Assets under Capital Lease

22. Line 9.e. - Construction in Process. Report the balance of the following accounts:

- 1721 Construction in Progress - In-House
- 1722 Construction in Progress - Contractor
- 1723 Construction in Progress - Other Government Activities
- 1724 Construction in Progress - Government-Furnished Material

23. Line 9.f. - Other Property. Report the balance of the following accounts:

- 1840 Other Natural Resources
- 1849 Allowance for Depletion
- 1850 Property Held for Sale
- 1991 Intangible Assets
- 1992 Accumulated Amortization on Intangible Assets

24. Line 10. - Other DBOF Assets. Report the balance of the following account:

- 1766 Equipment Not in Use

25. Line 11. - Total DBOF Assets. Report the net total of line 1. through line 10.

26. Line 12 - Liabilities Covered by Budgetary Resources. Liabilities incurred which are covered by available budgetary resources. Available budgetary resources include (1) new budget authority, (2) reimbursements and

other income, (3) recoveries of unexpired budget authority, and (4) remaining unobligated balances of amounts available at the beginning of the year or transferred in during the year.

27. Line 12.a. - Accounts Payable. The amounts owed by a DBOF activity for goods and services received from, progress in contract performance made by, and rents due to DoD and other federal and non-federal entities. Report the balance of the following accounts:

- 2111 Accounts Payable - Government - Current
- 2112 Accounts Payable - Government - Noncurrent
- 2113 Accounts Payable - Public - Current
- 2114 Accounts Payable - Public - Noncurrent
- 2115 Claims Payable
- 2120 Disbursements in Transit
- 2190 Other Accrued Liabilities

28. Line 12.b. - Accrued Payroll and Benefits. Report the total balance by specified category of the following accounts:

(1) Salaries and Wages

- 2211 Accrued Payroll - Civilian
- 2213 Accrued Payroll - Civilian - Employer Share of Fringe Benefits

(2) Accrued Annual Leave

- 2215 Accrued Payroll - Funded Annual Leave - Civilian

(3) Severance Pay and Separation Allowance

- 2993 Accrued Civilian Severance Pay

29. Line 12.c. - Less: Progress Billings. Report the balance of the following account:

- 2994 Progress Billings to Others

30. Line 12.d. - Debt. This item represents the amount of borrowings from the Treasury, the Federal Financing Bank, or other federal agencies. [This line applies only to the Military Sealift Command.]

31. Line 12.e. - Interest Payable. This item represents the amount of interest expense incurred but unpaid on debt owed to nonfederal entities. Report the balance of the following account as it applies to amounts owed to nonfederal entities:

- 2140 Accrued Interest Payable

32. Line 12.f. - Lease Liabilities. This item represents the portion of the liability for capital leases which is covered by budgetary authority. (Capital leases and lease purchases entered into during FY 1992 and thereafter

must be fully funded in the first year of the lease, see Appendix B of OMB Circular A-11). Report the balance of the following account:

2940 Capital Lease Liability

33. Line 12.g. - Other Liabilities. This item represents other liabilities that are not recognized in specific categories. Include in this line the total amount due the federal entities for other liabilities covered by budgetary authority that are not included on other lines above. This includes advances and prepayments received from other federal entities for goods to be delivered or services to be performed. Report the balance of the following accounts as they apply to transactions with other federal and non-federal entities:

2130 Contract Holdbacks
2190 Other Accrued Liabilities
2311 Unearned Revenues - Advances from Government Agencies and Funds
2312 Unearned Revenue - Advances from the Public
2410 Treasury Cash Advances to Disbursing Officers
2411 Deposit Fund Liabilities
2920 Contingent Liabilities
2992 Liability for Property Furnished by Others

34. Line 12.h. - Total Liabilities Covered by Budgetary Resources. of lines 12.a. through 12.g.

35. Line 13. - Liabilities Not Covered by Budgetary Resources. Liabilities incurred which are not covered by available budgetary resources result from the receipt of goods or services or the occurrence of other eligible events for which revenues or other sources of funds necessary to pay the liabilities have not been made available through Congressional appropriations or current earnings of the reporting entity. Notwithstanding an expectation that the appropriations will be made, whether they in fact will be made is completely at the discretion of the Congress. This line should not ordinarily apply to the Defense Business Operations Fund. If, however, liabilities exist that are not covered by available budgetary resources, then report only the amount of the liability for which an available budgetary resource does not exist. If any such liabilities exist, report the amount and disclose its nature by footnote.

36. Line 14 - Total Liabilities. Report the total of lines 3.h. and 4.

37. Line 15 - Balances. The components of net position are classified as follows:

38. Line 15.a. - Unexpended Appropriations. This amount includes the portion of the entity's appropriations represented by undelivered orders and unobligated balances. Report the balance of the following accounts:

3100 Appropriated Capital
3211.1 Appropriations Available

39. Line 15.b. - Invested Capital. Represents the net investment of the federal government in the reporting entity. Includes the acquisition cost of capitalized assets, additional investment in a revolving fund to commence

operations or begin a new activity; fund (cash) transfers to other DBOF entities; less the reduction in investment due to depreciation and amortization. Report the balance by the specified category of the following accounts:

(1) Assets Capitalized:

3211.2 Assets Capitalized

(2) Liabilities Assumed:

3211.3 Liabilities Assumed

(3) Fund (Cash) Transfers:

3211.4 Net Treasury Balance- DBOF

(4) Transfers In Of Property:

3220 Transfers In from Others Without Reimbursement

(5) Transfers Out Of Property:

3231 Transfers Out to Government Agencies Without Reimbursement

3232 Transfers Out to All Others Without Reimbursement

40. Line 15.c.- Cumulative Results of Operations. The net difference between (1) expenses and losses and (2) financing sources, including appropriated capital used, revenues, and gains, since the inception of the activity. Report the balance of the following account.

3311 Cumulative Results of Operations - DBOF

41. Line 15.d. - Other. Report the balance of any other equity account in use by the reporting entity.

42. Line 15.e. - Future Funding Requirements. The amount reported on this line should be equal to the amount of liabilities incurred which are not covered by available budgetary resources (line 3.c.). Liabilities not covered by budgetary resources result from the receipt of goods or services or the occurrence of other eligible events for which revenues or other sources of funds necessary to pay the liabilities have not been made available through Congressional appropriations or current earnings of the reporting entity. If an amount is reported, disclose its nature by footnote.

43. Line 15.f. - Total Net Position. Report the sum of line 15.a. through line 15.e.

44. Line 16. - Total Liabilities and Net Position. Report the sum of line 14 and line 15.f.

45. INSTRUCTIONS FOR PREPARATION OF REQUIRED NOTES. Instructions for required notes are presented below. Additional notes may be included as deemed beneficial by the reporting entity. In any instance where the instructions for

line items shown on the Statement of Financial Position would preclude significant financial data from being reported, include the amounts in the most closely related line item and disclose the information by a footnote. The following information must be disclosed:

Note 1 - Fund Balances With Treasury:

The sum of the balances should agree with the amount reported on line 1 of the Statement of Financial Position. For Defense Business Operations Fund activities, the amounts reported will reflect the net amount of (1) collections in excess of disbursements for the fiscal year or (2) disbursements in excess of collections for the fiscal year added to [if collections exceed disbursements] or subtracted from [if disbursements exceed collections] (3) Funds With Treasury carried over from the previous fiscal year. If the reporting entity does not maintain an account representing "Funds With Treasury," then "that entity need not report an amount for that line. The DBOF entity that does, however, maintain an account representing "Funds With Treasury," must report that balance. If one DBOF entity maintains the "Funds With Treasury" for two or more other DBOF activities, that balance may be distributed for reporting purposes to those individual DBOF activities.

The amount to be reported consists of all (1) obligated but not yet disbursed and (2) unobligated undisbursed account balances with the U.S. Treasury, as reflected in the entity's records and summarized by fund type. Unobligated amounts shall be further classified as amounts available and restricted. Restricted unobligated fund balances include appropriated fund amounts related to expired authority, and holdings which have not been transferred into the general fund as of the report date, which are not available for agency use. Line (3), Other Funds, should include trust funds and balances in deposit, suspense, clearing and related non-spending accounts, such as for collections pending litigation, awaiting determination of the proper accounting disposition, or being held by the entity in the capacity of a banker or agent for others.

Note 2. Preparer Information.

The preparer's and supervisor's name and business telephone numbers shall be provided along with the official mailing address of their location. The purpose of the requested information is to provide a point of contact in case of questions. If a point of contact other than the preparer, or preparer's supervisor, is desired, also include the name, title, business telephone, and (if different) the location of the desired point of contact.

DEFENSE BUSINESS OPERATIONS FUND ACCOUNTING REPORT
[ACCOUNTING REPORT (M) 1307]

SECTION III

INSTRUCTIONS FOR THE PREPARATION OF THE
STATEMENT OF CASE FLOWS
(INDIRECT METHOD)

- A. General. The statement of cash flows discloses the DBOF cash receipts and disbursements with an explanation of the changes in cash or cash equivalents for the reporting period.
- B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area or activity, and (c) the reporting period (month and calendar year).
- C. Line Item Instructions. Instructions for the content of each line item are as follows:

CASH FLOWS FROM OPERATIONS:

1. Line 1 - Excess (Shortage) of Revenues and Financing Sources Over Total Expenses. The amount reported on line 13. of the monthly Statement of Operations (and changes in net position). As of September 30 each year, this line should agree with Line 1 on the annual Chief Financial Officers, Statement of Cash Flows (Indirect Method).

ADJUSTMENTS AFFECTING CASH FLOW:

2. Line 2 - Appropriated Capital Used. The amount reported on line 1 of the Statement of Operations (and changes in net position) should be reported as a negative adjustment to the net cash flow from operations.

5700 - Appropriated Capital Used

3. Line 3 - Decrease (Increase) in Accounts Receivable. A decrease in accounts receivable adds to, and an increase in accounts receivable reduces, the DBOF cash balance. (Do not include decreases due to bad debt writeoffs.)

1300 - Receivables, Net

4. Line 4 - Decrease (Increase) in Other Assets. The change in other assets categories which affect cash flow. A decrease adds to, and an increase reduces, the DBOF cash balance.

1410 - Advances to Others

1450 - Prepayments

1990 - Other Assets, as applicable.

5. Line 5 - Increase (Decrease) in Accounts Payable. An increase in accounts payable adds to, and a decrease in accounts payable reduces the DBOF cash balance.

2100 - Accrued Liabilities - Other

6. Line 6 - Increase (Decrease) in Other Liabilities. The change in other liabilities which effect cash flow. An increase adds to, and a decrease reduces the DBOF cash balance.

2200 - Accrued Liabilities - Payroll and Benefits

2300 - Unearned Revenue - Advances

2400 - Liabilities for Deposit Funds and Suspense Accounts

2900 - Other Liabilities

7. Line 7 - Depreciation and Amortization. The depreciation and amortization for the period which are not paid in cash, and therefore require a positive adjustment to the net cash flow from operations.

6125 - Depreciation of Equipment

6126 - Depreciation of Real Property

6128 - Amortization of Leasehold Improvements and Other
Tangible Assets

8. Line 8 - Other Unfunded Expenses. Other unfunded expenses which are not paid in cash and therefore require a positive adjustment to the net cash flow from operations. Identify the nature of each unfunded amount.

9. Line 9 - Other Adjustments. The net of the period's cash transfer transactions not shown on the Statement of Operation. These are Treasury Withdrawals, Transfers-In and Transfers-Out. This line should not include transfers in or out of non-cash assets such as property, operating supplies and Materials, or inventory. The DBOF cash balance is not affected by transfers in or transfers out of non-cash assets to other federal entities.

10. Line 10 - Total Adjustments. The sum of lines 2. through 9.

11. Line 11 - Net Cash Provided (Used) by Operations. The total of lines 1. and 10.

CASH FLOWS FROM INVESTMENTS: Acquiring and disposing of property, plant and equipment and other assets used in the production of goods and services. Most sales within the DBOF are recorded as revenue and thereby included in line 1 of this statement. However, if an incoming cash flow is not as a result of revenue, that cash flow should be identified within this section as either a result of a sale of property, plant and equipment or other cause.

12. Line 12 - Sale of Property, Plant and Equipment. The cash proceeds received from sales of surplus real and personal property (e.g., buildings, docks and piers, and equipment) adds to the DBOF cash balance.

13. Line 13 - Purchase of Property, Plant and Equipment. The amounts disbursed for acquisitions of plant, property, and equipment reduces the DBOF cash balance. Include amounts disbursed for minor construction projects.

1012.2 - Funds Disbursed - Capital Program - DBOF

14. Line 14 - Other Investment Cash Provided (Used). The net amounts of other collections or disbursements associated with the purchase and sale of other investments. Identify the nature of each investment purchased and sold. (Not Applicable to DBOF)

15. Line 15 - Net Cash Provided (Used) by Investments. The sum of lines 12. through 14.

CASH FLOWS FROM APPROPRIATIONS: Resources obtained in the form of appropriations from the Congress, or by transferring from or to other reporting entities. Appropriations may not, in all cases, be distributed to the individual Activity level. If appropriations are not distributed, then they may be reported by the DBOF level that is holding those balances or allocated by that DBOF level, for reporting purposes, to the appropriate activity(ies).

16. Line 16 - Appropriations (Current Warrants). The amount of appropriations received (consistent with above), net of rescissions.

17a. Line 17a - Restorations. DBOF cash balances withdrawn by the Treasury in prior years which were restored. As a rule, this does not apply to the DBOF.

17b. Line 17b - Transfers of Cash from Others. The amounts of cash transferred from all Federal sources, except the Treasury. Report cash transfers in from other DBOF activities as a plus. The amounts to be reported are those solely to transfer cash balances. A transfer of cash as a result of work performed (reimbursable sales) shall not be reported on this line. The following equity account shall be used:

3211.4 Net Treasury Balance-DBOF

18a. Line 18a - Withdrawals. The amounts of unobligated appropriations withdrawn by the Treasury. As a rule, this does not apply to the DBOF.

18b. Line 18b - Transfers of Cash to Others. The amounts of cash transferred to Federal agencies, except the Treasury. Report cash transfers out to other DBOF activities as a negative. The amounts to be reported are those solely to transfer cash balances. A transfer of cash as a result of work performed (reimbursable sales) shall not be reported on this line. The following equity account shall be used:

3211.4 Net Treasury Balance-DBOF

19. Line 19 - Net Appropriations. Net of lines 16, 17, and 18.

20. Line 20 - Repayments on Loans from the Treasury and the Federal Financing Bank. The amounts disbursed to liquidate loans obtained from the Treasury or Federal Financing Bank. (Applicable only to the Military Sealift Command.)

21. Line 21 - Net Cash Provided (Used) by Appropriations. Net of lines 16. through 20.

22. Line 22 - Net Cash Provided (Used) Operations, Investments, and Appropriations. The amounts reported on lines 11., 15. and 21.

23. Line 23 - Fund Balances, Beginning. The sum of account balances at the beginning of the fiscal year. Undistributed amounts will be reported at the lowest organizational level to which they can be identified.

24. Line 24 - Fund Balances, Ending. The net of lines 22. and 23. The amounts should agree with the amounts reported for line 1, "Fund Balance with Treasury," and line 2, "Cash on Hand and Other Monetary Assets," on the current month's DBOF statement of financial position.

SUPPLEMENTAL INFORMATION:

SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION: then the indirect method is used to prepare the cash flow statement, the amount of interest paid (net of amounts capitalized) during the period shall be provided in this section of the statement.

25. Line 25 - Total Interest Paid. The amount of interest paid during the period net of amounts capitalized.

SUPPLEMENTAL SCHEDULE OF APPROPRIATIONS AND INVESTMENTS: Information about all appropriations and investments of a reporting entity during a period that affect recognized liabilities but that do not result in cash receipts or payments in the period shall be reported in this section.

26. Line 26 - Property and Equipment Acquired under Capital Lease Obligations. Property and equipment acquired under such leases that did not result in cash payments.

27. Line 27 - Property Acquired Under Long-term Financing Arrangements. Property acquired under these arrangements that did not result in cash payments.

28. Line 28 - Other Exchanges of Noncash Assets or Liabilities. Any other exchange of noncash assets or liabilities not specifically identified above.

SUPPLEMENTAL DISCLOSURE OF CASH INFORMATION: Report the preclosing balances in the following General Ledger Account Codes. Additionally, of the amounts reported as undistributed collections and undistributed disbursements, disclose the amount of each that was closed, for financial reporting purposes, to Accounts Receivable and Accounts Payable. Volume 1, Chapter 7, of this Regulation provides a definition of each account. The amounts should agree

with the total amount reported on Line 31. Undistributed amounts will be reported at the lowest organizational level to which they can be identified.

29. Line 29 - Funds Collected

- 29a. GLAC 1011.1 - Funds Collected - Operating Program - DBOF
- 29b. GLAC 1011.2 - Funds Collected - Capital Program - DBOF
- 29c. GLAC 1011.3 - Funds Collected - Undistributed - DBOF

30. Line 30 - Funds Disbursed

- 30a. GLAC 1012.1 - Funds Disbursed - Operating Program - DBOF
- 30b. GLAC 1012.2 - Funds Disbursed - Capital Program - DBOF
- 30c. GLAC 1012.3 - Funds Disbursed - Undistributed - DBOF

31. Line 31 - Cash on Hand and Other Monetary Assets

- 31.a GLAC 1110 - Undeposited Collections
- 31.b GLAC 1191 - Disbursing Officers' Cash
- 31c GLAC 1195 - Other Monetary Assets

32. Line 32 - Funds with Treasury

- 32a. GLAC 1013.1 - Funds with Treasury - Operating Program - DBOF
- 32b. GLAC 1013.2 - Funds with Treasury - Capital Program - DBOF

33. Line 33 - Undistributed Collections (As appropriate)

- 33a. GLAC 1014.1 - Undistributed Collections - DBOF Component Level
- 33b. GLAC 1014.2 - Undistributed Collections - DBOF Business Area Level
- 33c. GLAC 1014.3 - Undistributed Collections - DBOF Installation Level

34. Line 34 - Undistributed Disbursements (As appropriate)

- 34a. GLAC 1015.1 - Undistributed Disbursements - DBOF Component Level
- 34b. GLAC 1015.2 - Undistributed Disbursements - DBOF Business Area Level
- 34c. GLAC 1015.3 - Undistributed Disbursements - DBOF Installation Level

5. NET RECOVERABLE OPERATING RESULTS FROM CURRENT YEAR OPERATIONS		\$ _____

NOTE: As a matter of policy, any amounts that a DoD Component requests be excluded from its DBOF rates--whether identified in DoD Comptroller guidance as permissible, or requested by the DoD Component--must be adequately documented and quantified. Further, all such amounts must be approved by the Office of the DoD Comptroller (Program/Budget). Amounts not explicitly approved by the Office of the DoD Comptroller for exclusion from customer rates shall be excluded from this report.

Data for the completion of all "Nonrecoverable/Deferred Amounts" may not be available readily to a reporting entity from accounting records. Nevertheless, each amount reported shall be supported either by accounting or other adequate documentation provided by the activity, management command or departmental level command of the reporting entity. If applicable amounts are captured at the business area level, they shall be allocated or assigned to activities in accordance with guidance provided by the DoD Component. Care should be taken to ensure that amounts so allocated or assigned are equal to the total. As the amounts reported may be used in the development of subsequent year stabilized billing rates, it is important that the categories and amounts reported are consistent with guidance provided or approved by the Director for Revolving Funds, Office of the DoD Comptroller (Program/Budget).

DEFENSE BUSINESS OPERATIONS FUND ACCOUNTING REPORT
[ACCOUNTING REPORT (M) 1307]

SECTION IV

INSTRUCTIONS FOR THE PREPARATION OF THE STATEMENT OF OPERATIONS

A. General. Part I provides data on current operating results by Defense Business Operations Fund business area.

B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area and (c) the reporting period (month and calendar year).

C. Line Item Instructions. Instructions for the content of each line item are as follows:

1. Line 1 - Appropriated Capital Used. Appropriations, primarily for War Reserve Material and Commissary Operations, may be provided directly to the DBOF. General ledger account (GLA) 5700, "Appropriated Capital Used," is used to record accrued expenses (versus outlays) of appropriated funds provided directly to the Fund. The purpose of the account is to match current period expenses against the use of appropriated funds used to finance those expenses. The amounts to be recorded in Account 5700 shall be equal to the amount of program expenses recorded in the 6100 series of accounts but shall not include any expenses applicable to revenue accounts other than GLA 5700--in other words, expenses incurred against an appropriation made directly available to the DBOF should be recorded separately from expenses incurred against ordinary DBOF reimbursable financing. Addendum 1 to Chapter 52 of this Regulation contains additional information on GLA 5700. Report the balance in the following account:

5700 Appropriated Capital Used

2. Line 2. - Revenues from Sale of Goods and Services. The amount reported shall ordinarily agree with the amount reported on line 3.A., "Reimbursements Earned," of the DD Form 1176, "Report on Budget Execution." If it does not agree with line 3.A. of the DD Form 1176, include a note explaining the difference (for example, line 3.A. of the DD Form 1176 may include some of the amounts reported in line 6 below.) Report the balance in the following accounts:

5100 Revenue from Goods Sold
5200 Revenue from Services Provided

NOTE: The Supply Management Business Area shall report revenue net of amounts allowed for returns of material for credit. The dollar amount of materiel returns with credit shall be reported on line 2.b.

3. Line 2.a. - Gross Revenue from Sales. This line applies to the Supply Management business area only. Reporting activities within the Supply Management business area shall report gross revenue on this line. Gross revenue is revenue before deduction of amounts allowed for returns of material for credit and credits allowed on Depot Level Repairable Exchanges (DLRs). The

dollar amount of materiel returns with credit shall be reported on line 2.b.(2). Report the following accounts on this line:

5100 Revenue from Goods Sold
5200 Revenue from Services Provided

4. Line 2.b. - Credits Allowed on Sales. This line applies to the Supply Management business area only. Reporting activities within the Supply Management business area shall report the dollar amount of credits allowed on amounts due it (accounts receivable) as a result of sales or DLR exchanges. Report the following accounts on this line:

1529.1E Materiel Returns - Credit Given
1529.3A Estimated Repair Costs
1529.3B Estimated Exchange Costs

5. Line 3 - Other Revenue & Financing Sources. Report revenues and financing sources not reported on lines 1 or 2. Include cash donations and an amount equal to any depreciation recorded against donated assets. Invested capital used is the depreciation expense of capital assets provided to Fund activities for its use but which were paid for by funds other than the Defense Business Operations Fund. Identify the nature of each miscellaneous gain. Report the total recorded in the following accounts:

5600 Donated Revenue
5790 Invested Capital Used
5910 Miscellaneous Reimbursements
7110 Gains on Disposition of Assets
7193 Other Miscellaneous Gains

(a) General ledger account (GLA) 5790, "Invested Capital Used," is used to record, as a financing source, the value of assets (ordinarily buildings and other assets financed by a Military Construction appropriation) used by, and in custody of, a DBOF activity but which were not acquired, nor will be replaced, through use of Defense Business Operations Fund resources.

(b) The amounts to be recorded in this account shall be equal to the amount of depreciation expense recorded in general ledger account 6125, "Depreciation of Equipment," general ledger account 6126 "Depreciation of Real Property," and general ledger account 6127, "Depletion of Natural Resources," but only if the depreciated asset(s) were not acquired nor will be replaced through use of Defense Business Operations Fund resources. No other amounts shall be recorded to general ledger account 5790.

(c) Addendum 1 to Chapter 58, "Capital Assets," of this Regulation contains additional information on GLA 5790.

6. Line 4 - Total Revenues and Financing Sources. Report the total of lines 1 through 3 above. Revenue should equal net sales plus any other reimbursable revenue and financing source.

7. Line 5 - Program or Operating Expenses. This line is a summary of appropriations expensed during the current period. Do not include (1) cost of goods sold [reported on line 6 below], (2) expenditures for assets that were

capitalized [those capital assets should be reported on the Statement of Financial Condition] or (3) any expense reported on other lines. Appropriations expensed to be reported are all direct appropriation expenses incurred by Fund activities which received a direct appropriation (for example, war reserve materials and commissaries) and should be equal to the "Appropriated Capital Used" reported on line 1. The total of the amount reported for this line should be equal to the balance in the following account:

5700 Appropriated Capital Used

8. Line 6 - Cost of Goods Sold and Services Provided. Report the total shown on Part III, Cost of Goods Sold and Services Provided. (Form and Content Guidance, published by the Office of Management and Budget, asks that this line be subdivided between (a) costs of goods sold to the public and (b) costs of goods sold to DoD and other Federal entities. That subdivision is not necessary for AR 1307 reporting. For the annual Chief Financial Officer's Act report, the subdivision could be reported in the same proportion as revenue is reported from the public and from DoD and other Federal entities.)

9. Line 7 - Depreciation and Amortization. This line is a summary of depreciation/depletion/amortization expense associated with capital assets used by the Defense Business Operations Fund. Report depreciation expense incurred during the reporting period which was posted to applicable accounts (or sub-accounts) in the 6000 Series (expense) accounts within the DoD Chart of Accounts. The total reported in line H of Part IV will be reflected on this line.

10. Line 8 - Bad Debts and Writeoffs. This line is a summary of bad debt and other writeoff expense incurred during the reporting period which was posted to applicable accounts (or sub-accounts) in the 6000 Series (expense) accounts within the DoD Chart of Accounts. The total reported in line I of Part IV will be reflected on this line.

11. Line 9 - Other Expenses. The total reported in line J of Part IV will be reflected on this line.

12. Line 10 - Total Expenses. Sum of lines 5 through 9.

13. Line 11 - Revenue Less Cost Incurred Before Extraordinary Items
Report the net amount of line 4 less line 10.

14. Line 12 - Plus (Minus) Extraordinary Items. Report the net balance in the following account. Extraordinary gains are unusual, unrelated to the activity's ordinary activities and occur infrequently. Identify, as a footnote, the nature of each extraordinary gain or loss. Report the balance in the following account:

7300 Extraordinary Items

15. Line 13 - Net Operating Results. Line 11 plus (or less) line 12.

16. Line 14 - Plus (Minus) Nonrecoverable Costs. Report the amount shown on line 3 of Part V, Recoverable Operating Results.

17. Line 15 - Recoverable Operating Results. Line 13 plus (or less)
line 14.

18. Line 16 - Obligations for Capital Assets. Report the amount of obligations shown on Part VI, Capital Investment Program.

19. Line 17 - Outlays for Capital Assets. Report the amount of outlays shown on Part VI, Capital Investment Program.

20. FOOTNOTE: DBOF business area activities shall record and report financial information on the maintenance of a mobilization capability in accordance with the DoD accounting and reporting requirements specified for the DBOF. The Monthly Report of Operations (AR 1307) shall be prepared to include a footnote which identifies the amount of the mobilization requirement costs which are funded through direct appropriations or reimbursable orders accepted specifically for mobilization requirements.

PART II - CHANGES IN NET POSITION

A. General. This part, Part II, provides data on the current equity position of the Defense Business Operations Fund.

B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area/activity, (c) the reporting period (month), and (d) the year.

C. Line Item Instructions. Instructions for the content of each line item are as follows:

1. Line 1.A.(1). - Appropriations Available - Beginning of Year. Report the balance of appropriations available at the end of the preceding fiscal year. This amount should be the same as reported on line 1.A.(4) on September 30 of the preceding fiscal year. The amount reported will not change during the fiscal year.

2. Line 1.A.(2) - Plus or Less: Changes in Appropriation Balance. This is equal to the difference between the beginning of the fiscal year balance and the balance as of the end of the reporting period. The amount should be equal to:

a. Increases to GLA 3211.1, "Appropriations Available," occurring as a result of direct appropriations made available by the Congress to the DBOF. For example, direct appropriations received for the acquisition of war reserve materials and direct appropriations made available to the Commissary business area and U.S. Transportation Command.

b. Increases to GLA 3211.1, "Appropriations Available," occurring as a result of nonexpenditure transfers from other current appropriations and funds.

c. Decreases as a result of the use of appropriations. These decreases should be equal to the amount reported on Part I, line 1, "Appropriated Capital Used. "

d. Decreases to GLA 3211.1, "Appropriations Available," occurring as a result of nonexpenditure transfers to other appropriations and funds.

3. Line 1.A. (3) - Plus or Less: Cash Transfers. Report cash transfers in from other DBOF activities as a plus and cash transfers out to other DBOF activities as a negative. The amounts to be reported are those solely to transfer cash balances. A transfer of cash as a result of work performed (reimbursable sale) shall not be reported on this line. The following equity account shall be used:

3211.4 Net Treasury Balance-DBOF

4. Line 1.A.(4) - Equals: Appropriations Available - End of Period. Report the net total of line 1.A.(1) through line 1.A.(3). The amount reported should agree with the amount reported on line 14.a. of the Statement of Financial Condition.

5. Line 1.B.(1) - Accumulated Operating Results - Beginning of Fiscal Year (Unadjusted). Report the balance of accumulated operating results available at the end of the preceding fiscal year. This amount should be the same as the amount reported on line 1.B.(5) on September 30 of the preceding fiscal year. This amount will not change during the fiscal year.

6. Line 1.B.(2) - Plus or (Minus): Prior Period Adjustments to Accumulated Operating Results. A credit balance is reported as a plus; a debit balance is reported as as negative. Report prior period adjustments recorded in the following account:

7400 Prior Period Adjustments

7. Line 1.B.(3) - Accumulated Operating Results - Beginning of Fiscal Year (Adjusted). Report the net total of line 1.B.(1) plus or minus, as applicable, line 1.B.(2).

8. Line 1.B.(4) - Plus: Net Operating Results - End of Period. Report the amount shown on line 13, Net Operating Results, of Part I, Statement of operations.

9. Line 1.B.(5) - Equals: Operating Results - End of Period. Report the net total of lines 1.B.(3) and (4). The amount reported should be equal to the amount reported on line 14.c. of the Statement of Financial Condition.

10. Line 1.C. - Net Equity Position - End of Period. Report the net total of line 1.A.(4) and line 1.B.(5).

11. Line 1.D.(1) - Capital Investments - Beginning of Fiscal Year. Report the balance of capital investments available at the end of the preceding fiscal year. The amount reported should be equal to the amount reported on line 14.b. of the Statement of Financial Condition at the end of the preceding fiscal year. This amount will not change during the fiscal year.

12. Line 1.D.(2) - Plus: Transfers-In of Property. Report the value of capital assets received without reimbursement. The amount reported should be equal to the amount reported on line 14.b.(4) of the Statement of Financial Condition. Report the amount in the following account:

3220 Transfers-In from Others Without Reimbursement

NOTE: GLA 3220 is closed to GLA 3211.2, "Assets Capitalized," at fiscal year end.

13. Line 1.D.(3) - Less: Transfers-Out of Property. Report the value of capital assets transferred out without reimbursement. The amount reported should be equal to the amount reported on line 14.b.(5) of the Statement of Financial Condition. Report the amount in the following accounts:

3231 Transfers Out to Government Agencies Without Reimbursement

3232 Transfers Out to All Others Without Reimbursement

NOTE: GLAs 3231 and 3232 are closed to GLA 3211.2, "Assets Capitalized," at fiscal year end.

14. Line 1.D.(4) - Less Invested Capital Used. Report the amount recorded in the following account:

5790 Invested Capital Used

15. Line 1.D.(5) - Plus (Less): Changes in Liabilities Assumed. Report net changes during the fiscal year to date in the following account:

3211.3 Liabilities Assumed

16. Line 1.D.(6) - Equals: Capital Investments - End of Period. Report the net total of lines 1.D.(1) through (5). The amount reported should be equal to the amount reported on line 14.b. of the Statement of Financial Condition.

17. Line 2 - Total Equity - End of Period. Report the total of the above lines. The amount reported should be equal, prior to year-end closing, to the balance in the following accounts:

3211 Capital Investment-DBOF
3220 Transfers In from Others Without Reimbursement
3230 Transfers Out to Others Without Reimbursement
3311.1 Cumulative Results of Operations-DBOF
3311.2 Cumulative Results of Operations-DBOF-Deferred
3321 Net Results of Operations-DBOF

PART III - COST OF GOODS SOLD AND SERVICES PROVIDED

A. General. All costs, including gains and losses, applicable to the product of goods and services sold to customers during the reporting period must be reflected on this part (Part III) of the report. The total included in line 3 of Part III of the Statement of Operations must agree with the amount shown on line 6, Part I of the Statement of Operations.

B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area and activity (c) the reporting period (month), and (d) the year.

C. Line Item Instructions. Instructions for the content of each line item are as follows.

1. Line 1 - Cost of Goods and Services Sold. This line is to be used by all business areas other than the Supply Management and Commissary Resale business areas -- the Supply Management and Commissary Resale business areas shall use line 2 of this part to compute its cost of goods sold. Fund business areas that do not use a job-order or process cost accounting system may not have data to complete all parts of line 1. In those cases, the expenses incurred, as reported on line 1.b., "Operating Expenses," of this part shall be the cost of goods and services sold for those business areas.

2. Line 1.a. - Beginning Work-in-Process. Enter the total of the balances in the following accounts as of the end of the preceding reporting period:

1581 Work in Process - In House
1582 Work in Process- Contractor
1583 Work in Process - Other Government Activities
1584 Work in Process - Government-Furnished Material

3. Line 1.b - Operating Expenses. Enter the total of the amounts reported on Part IV, "Expenses" on lines A through G.

4. Line 1.c. - Minus: Ending Work-in-Process. Enter the total of the balances in the following accounts as of the end of the current reporting period. The amount reported should agree with the amount reported on line 6 of the Statement of Financial Condition.

1581 Work in Process - In House
1582 Work in Process - Contractor
1583 Work in Process - Other Government Activities
1584 Work in Process - Government-Furnished Material

5. Line 1.d. - Minus: Work for Activity Retention. Report the value of assets developed or manufactured for use and retention by the performing business area activity. Enter the balance in the following accounts:

1720 Construction in Progress
1725 Assets Under Development - DBOF

6. Line 1.e. - Equals: Costs of Goods and Services Sold. Report the net total of lines 1a. through line 1.d.

7. Line 2 - Cost of Goods Sold from Inventory. This category of costs is reported only by the Supply Management and Commissary Resale Business Areas.

NOTE: The Statement of Federal Financial Accounting Standard Number 3, "Accounting for Inventory and Related Property," sets forth the accounting principles that shall be followed by federal government entities when accounting for and reporting inventory and related property. An illustration of the DoD implementation of those principles is contained in Addendum 2 to Chapter 55, "Supply Management Operations," (for DoD Components recording inventory at its standard [selling] price) and Addendum 3 to Chapter 55 (for DoD Components recording inventory at its latest invoice price). The referenced illustrations demonstrate the application of the accounts indicated below and must be read for a fuller understanding of the reporting requirements contained in section 2 of this Part III.

8. Line 2.a. - Operating Expenses. Enter the total of the amounts reported on Part IV, "Expenses," on lines A through G.

9. Line 2.b. - Beginning Inventory - L.A.C. Report the balance as shown on line 2.h. "Ending Inventory" as of the close of the prior reporting period. (L.A.C. is "Latest Acquisition Cost.")

10. Line 2.c. - Less: Beginning Allowance for Unrealized Holding Gains/Losses. Report the balance as shown on line 2.i. "Ending Allowance for Unrealized Holding Gains/Losses," as of the close of the prior reporting period. Holding gains (or losses) are recognized in the valuation of inventory. Holding gains or losses may be unrealized or realized. "Unrealized" refers to any gain or loss associated with inventory still held by the entity. "Realization" of the holding gain or loss occurs only when an item of inventory is sold or otherwise leaves the supply management stocking point.

11. Line 2.d. - Plus: Purchases At Cost. Report amounts paid or payable for all inventory purchases during the reporting period. Increases during the month in the following account shall be reported:

1529.10 Purchases at Cost

12. Line 2.e. - Plus: Customer Returns - Credit Given. Report amounts of credit given during the month on materiel returns. Increases during the month in the following account shall be reported:

1529.1E Materiel Returns - Credit Given

13. Line 2.f. - Plus: DLR Exchange Credits. Report amounts of credit given during the month on Depot Level Repairable (DLR) exchanges. Increases during the month in the following account shall be reported:

1529.3 Allowance for Repairs

14. Line 2.g. - Inventory Losses Realized. The realization of most inventory gains (and losses) are recognized through reduction of the unrealized holding gains/losses accounts as a result of sales; that is, those gains and losses are realized when inventory items are sold and are recognized in the cost of goods sold. However, decreases in inventory occurring as a result of disposal and other events other than sale also result in a reduction of the unrealized holding gains/losses accounts. As those inventory decreases are not the result of sales, they should not affect the cost of goods sold. Therefore, the value of those losses shall be removed from the cost of goods sold and reported on line J of Part IV, "Expenses," Statement of Operations. The following accounts are reported on this line:

- 7291.1 Excess/Obsolescence/Spoilage Loss
- 7291.2 Shrinkage/Deterioration Losses
- 7291.3 Other Inventory Losses

15. Line 2.h. - Ending Inventory - LAC. Report the end of the period inventory value of the following accounts. Ensure that amounts reported have been adjusted to Latest Acquisition Cost (LAC) in accordance with DoD directions (see Addendum 2 to Chapter 55, "Supply Management Operations."). The amount reported should be the same amount that is reported on line 5.a., "Inventory Items," on the Statement of Financial Condition.

- 1521 Inventory Held for Sale
- 1521.1 Inventory in Transit from Procurement
- 1521.2 Inventory in Transit from DoD Entities
- 1522 Inventory Held in Reserve for Future Sale
- 1523 Inventory Held for Repair
- 1523.1 Exchange (DLR) Inventory in Transit
- 1524 Inventory - Excess, Obsolete and Unserviceable

16. Line 2.i. - Plus: Ending Allowance for Holding Gains/Losses. Report the total of the balances in the following accounts. The amount reported should be the same amount that is reported on line 5.b., "Allowance for Unrealized Gain/Loss on Inventories," on the Statement of Financial Condition.

- 1529.1 Allowance for holding Gain/Loss - Inventory Held for Sale
- 1529.2 Allowance for Holding Gain/Loss - Inventory Held in Reserve for Future Sale
- 1529.3 Allowance for Repairs

17. Line 2.i. - Equals: Cost of Goods Sold from Inventory. Report the net total of lines 2.b. through line 2.i.

PART IV - EXPENSES

A. General. All expenses incurred during the reporting period must be reflected on this part of the report. The total of lines A - I, Part IV must agree with the amount shown on line 6, Part I.

B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area/activity (c) the reporting period (month), and (d) the year.

C. Line Item Instructions. Instructions for the content of each line item are as follows.

1. Line A - Personal Services and Benefits. Report the balance in following accounts.

- 6111 Personnel Compensation - Civilian
- 6130 Annual Leave
- 6113 Personnel Benefits - Civilian
- 6115 Benefits for Former Personnel

2. Line B - Travel and Transportation. Report the balance in the following accounts.

- 6116 Travel and Transportation of Persons
- 6117 Transportation of Things

3. Line C - Rents, Communications & Utilities. Report the balance in the following accounts.

- 6118 Rent, Communication and Utilities
- 6119 Printing and Reproduction

4. Line D - Contractual Services and Supplies. Report the balance in the following accounts.

- 6120.1 Military Personnel Services (Except for Air Mobility Command)
- 6120.2 Purchased Services-Other

5. Line E - Supplies, Materials and Other Non-Capitalized Assets. Report the balance in the following accounts.

- 6121 Supplies and Materials
- 6122 Equipment (Not Capitalized)

6. Line F - Grants and Fixed Charges. This line should not apply to activities of the Defense Business Operations Fund. The following accounts are applicable.

- 6123 Grants, Subsidies and Contributions
- 6124 Insurance Claims and Indemnifications
- 6310 Interest Expenses on Borrowing From Treasury
- 6320 Interest Expenses on Securities

6330 Other Interest Expenses

7. Line G - Other Expenses. Report amounts which do not coincide to the description of the other elements of expense and identify the type of expense reported in this-line. Report the balance in the following account:

6900 Other Expenses

8. Line E - Depreciation - Total. Report the balance in the following accounts.

6125 Depreciation of Equipment
6126 Depreciation of Real Property
6127 Depletion of Natural Resources
6128 Amortization of Leasehold Improvements and Other
Intangible Assets

9. Line I - Bad Debts and Other Writeoffs. Report the balance in the following account.

6129 Bad Debts

10. Line J - Other Losses. Report the balances in the following accounts.

7210 Losses on Disposition of Assets
7291.1 Shrinkage/Deterioration Losses
7291.2 Excess/Obsolescence/Spoilage Loss
7291.3 Other Inventory Losses
7293 Other Miscellaneous Losses

11. Line K - Non-DBOF Financed Expenses. Report unfunded costs financed by other appropriations and funds. Further information on the purpose and use of general ledger account 5700 is at the Addendum to Chapter 52, "Budgetary Resources." Further information on the purpose and use of general ledger account 5790 is at Addendum 1 to Chapter 58, "Capital Assets." Record the balances in the following accounts:

5700 Appropriated Capital Used
5790 Invested Capital Used
6120.1 Military Personnel Services (Air Mobility Command ONLY)

PART V - RECOVERABLE OPERATING RESULTS

A. General. This part is intended to disclose differences, if any, between net operating results reported on Part I, "Statement of Operations," and the operating results used in the budget formulation of stabilized billing rates. As a matter of policy, any amounts that a DoD Component requests be excluded from its DBOF rates--whether identified in Under Secretary of Defense (Comptroller) guidance as permissible or requested by the DoD Component--must be adequately documented and quantified. Further, all such amounts must be approved by the Office of the Under Secretary of Defense (Comptroller). Amounts not explicitly approved by the Office of the Under Secretary of Defense (Comptroller) for exclusion from customer rates shall be excluded from this report.

B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area (c) the reporting period (month), and (d) the year.

C. Line Item Instructions. Instructions for the content of each line item are as follows.

1. Line 1 - Net Operating Results. Enter the amount reported on Part I of the Statement of Operations line 13, "Net Operating Results."

2. Line 2 - Nonrecoverable/Deferred Amounts. Data reported on this line and its sublines, unless otherwise specified below, are restricted to specific exclusions approved by the Office of the Deputy Comptroller (Program/Budget). Amounts to be reported on monthly activity reports should be obtained from, or approved by, the activity, management command of the reporting business area or the DoD Component departmental level. This section is composed of the following lines.

3. Line 2.a. - Losses on Disposal of Excess Inventory. This line applies to the supply management business area only. Report those losses on potential excess/actual excess inventory for which an exclusion has been approved by the Office of the DoD Comptroller (Program/Budget).

4. Line 2.b. - Disposal of Equipment/Capital Assets. Report losses (or gains, if applicable) realized upon the disposal of excess equipment and other capital assets when the Office of the Deputy Comptroller (Program/Budget) has approved the exclusion. [Note: Losses on excess equipment and other capital assets disposed of as a result of base closure shall not be reported on this line but shall, instead, be reported on line 2.c.]

5. Line 2.c. - Non-Reimbursable Base Closure (BRAC) Costs. Report losses (or gains, if applicable) in excess of reimbursement directly resulting from a base closure when the Office of the Deputy Comptroller (Program/Budget) has approved the exclusion.

6. Line 2.d. - Military Personnel Cost Variance. The purpose of this lines is to eliminate any variance between the cost of applied military labor and the amount paid to a military personnel appropriation for that labor.

The cost of military labor applied to work performed at a DBOF activity and the amount paid by the DBOF to the military personnel appropriations are generally not equal. The reason they are not equal is that the amount paid to the military personnel appropriations is the amount estimated in the budget; however, the cost of military labor applied to work performed is a function of the actual number and grade of military personnel at an activity. The difference, gain or loss, between the amount paid and the cost applied to work is not recoverable in stabilized billing rates. Therefore, this line shall show an adjustment of Net Operating Results to arrive at the amount that is to be used for stabilized rate development. The adjustment shall be equal to the amount to the account 1451.1, "Prepaid Expenses - Military Personnel - DBOF," adjustment amount recorded to Account 3311.1, "Cumulative Results of Operations-DBOF." When the military personnel expense is more than the amount paid to military personnel appropriations, the adjustment shall be shown as a positive amount. When the military personnel expense is less than the amount paid to military personnel appropriations, the adjustment shall be shown as a negative amount.

7. Line 2.e - Capital Asset Surcharge. Capital surcharge amounts included in revenue should be deducted to avoid the return of an apparent gain in the development of the subsequent year rate structure. This line is left blank when there is no capital surcharge revenue. A capital surcharge shall be included in customer rates only if approved by the Office of the Deputy Comptroller (Program/Budget). A capital surcharge might be approved when the amount of depreciation expense of existing capital assets included in stabilized rates is less than the budgeted Capital Investment Program. As the capital surcharge does not have an offsetting expense, in isolation from other transactions, it would be anticipated to result in a gain to net operating results. That gain must be deducted from Net Operating Results to prevent its return to customers in subsequent years through stabilized rates that are lower than they would be otherwise.) Capital surcharge amounts may be reported without the prior approval of the Office of the Deputy Comptroller (Program/Budget).

8. Line 2.f. - Other Applicable Gains and Losses. Report any other nonrecoverable or deferred gains or losses not reportable on lines 2.a. through 2.e. above when approved by the Office of the Deputy Comptroller (Program/Budget).

9. Line 2.g. - Total - Nonrecoverable/Deferred Amounts. Report the total of lines 2.a. through 2.f.

10. Line 3. Net Operating Results that are Comparable to Budgeted Amounts. Report the net difference between line 1 less line 2.g. This amount should be comparable to the amount of Net Operating Results provided or otherwise approved by the Office of the Deputy Comptroller (Program/Budget) in the applicable DoD Component's current budget.

11. Line 4. Amount Budgeted for the Return/Recovery of Prior Year(s) Gain/Loss. This includes the gain or loss occurring in the reporting period that were deliberately included in stabilized rates for the current year to correct (offset) over- or underpricing in a prior fiscal year(s). (For example, if accumulated operating results were a loss for the prior fiscal year(s), the stabilized rate for the current year normally would recover, in

addition to current year operating costs, those losses realized in the prior fiscal year(s). The recovery of the prior year(s) loss does not have a current year expense to offset it; therefore, financial reports will indicate a gain. As this gain was planned to offset the prior loss(es), that gain should not be returned in subsequent year rates. To be reported, the applicable gain or loss must be approved by the Office of the Deputy Comptroller (Program/Budget) and should have been reflected in the applicable DoD Component's approved budget.

12. Line 50. Net Recoverable Operating Results From Current Year Operations. Report the net total between line 3 and line 4.

NOTE: At fiscal year end, the Net Operating Results is closed to Accumulated Operating Results. Since part of that amount is a nonrecoverable/deferred amount, that part should be separately identified in financial records. To provide a means to accomplish that objective, the account for Accumulated Operating Results has been subdivided into two subaccounts. They are:

3311.1 Cumulative Results of Operations-DBOF

3311.2 Cumulative Results of Operations-DBOF-Deferred

Therefore, annually, as part of the fiscal year closing process, the amount reposted on line 2.g., "Total - Nonrecoverable/Deferred Amounts," shall be recorded to GLA 3311.2; the amount reported on line 5, "Net Recoverable Operating Results From Current Year Operations," shall be recorded to GLA 3311.1. The total of the amounts recorded to those two accounts for a fiscal year shall equal the net operating results of that fiscal year.

PART VI - CAPITAL INVESTMENT PROGRAM

A. General

1. Both obligations and outlays for capital assets costing \$25,000 (\$15,000 in FY 1993) or more and have a useful life of 2 years or greater, must be accounted for, and reported according to the initial program year of authorization.

2. For reporting these amounts, the reporting period is defined as the year to date amounts, i.e., amounts reported since the end of the prior fiscal year to the end of the reporting month shown in the heading of Part V.

B. Heading. Complete the heading of the form to show (a) the reporting DoD Component, (b) the reporting business area/activity (c) the reporting period (month), and (d) the year.

C. Columnar Instructions. The contents of the columns should be as follows:

1. Program Year (Column 1). Separate fiscal year program identification is required. All prior fiscal years must be separately identified until all obligations and outlays for the approved program have been fully concluded. The fiscal year programs will be arranged in consecutive order, starting with the least current fiscal year program.

2. Original Program (Column 2). Amounts included in this column shall be the approved program amounts provided in the annual operating budgets of the initial program year. The amount reported should not change in subsequent years. Changes in the Capital Investment Program amounts are shown in column 3.

3. Program Adjustments (Column 3). Amounts included in this column shall be adjustments (generally, deductions) to the initial approved Capital Investment Program amounts. Adjustments to the initial approved program amounts are disclosed in the annual operating budgets for a subsequent program year. The amount reported in this column may change annually as of the beginning of a fiscal year but should not change during a fiscal year.

4. Current Program (Column 4). This is the sum of the original program (column 2) and program adjustments (column 3). These amounts will be subject to the provisions of 31 U.S.C., Section 1517(a).

5. Obligations - This Fiscal Year (Column 5). Amounts included in this column shall be the total amount of obligations incurred in the current fiscal year.

6. Obligations - Prior Fiscal Year(s) (Column 6). Amounts included in this column shall be the cumulative amount of obligations incurred in fiscal years prior to the current fiscal year. The amount reported should not change during the reporting fiscal year.

7. Obligations - Total (Column 7). This is the sum of current fiscal year obligations (column 5) and cumulative prior year obligations (column 6).

8. Outlays - This Fiscal Year (Column 8). Amounts included in this column shall be the total amount of outlays incurred in the current fiscal year.

9. Outlays - Prior Fiscal Years (Column 9). Amounts included in this column shall be the cumulative amount of outlays in fiscal years prior to the current fiscal year. The amount reported should not change during the reporting fiscal year.

10. Outlays - Total (Column 10). This is the sum of current fiscal year outlays (column 8) and cumulative prior year outlays (column 9).

PART VII - INVENTORY MANAGEMENT REPORT
SUPPLY MANAGEMENT BUSINESS AREA

NOTE: The following entry descriptions are intended to be consistent those previously described in DoD 7420.13-R, "Stock Fund Operations," for the Accounting Report (AR) 1302.

A. Purpose. The Inventory Management Report is prescribed to compare fiscal data from the supply management business area general ledger with the approved operating program for the purpose of monitoring the execution of the current year budget.

B. General Reporting Requirements

1. Frequency. The Inventory Management Report shall be prepared at the end of each month and submitted in triplicate to the Deputy Comptroller (Program/Budget), Office of the Under Secretary of Defense (Comptroller) by the end of the month after the report period.

2. Rounding. Amounts reported shall be rounded to the nearest thousand dollars.

3. Form. Each DoD Component shall submit a Inventory Management Report for each supply management business area division on forms consistent with the example provided. Division reports shall show entries only for column one.

C. Specific Reporting Requirements

1. Description of Line Entries. Specific descriptions of entries for each line on the Inventory Management Report are provided in paragraph E. below.

2. Planned to Date. Column 2, "Planned To Date," shall reflect the cumulative programmed amount, at the total DoD Component level, for the month being reported.

3. Variance. On only the total DoD Component supply management business area summarized report Column 3, "Variance," shall reflect the difference between column 1 and column 2 in terms of both the dollar amount and the percentage.

D. Relationship to Report on Budget Execution. The cumulative fiscal year to date amount in accounts 4252, "Reimbursements Earned-Uncollected-Specific Apportionment," and 4254, "Reimbursements Earned-Collected-Specific Apportionment" shall be reported on the DD Form 1176, "Report on Budget Execution," RCS DD-COMP(M)1125, line 3A, as "Earned" (reimbursements and other income). The cumulative fiscal year to date net change in account 4232, "Unfilled Customer Orders-Specific Apportionment," shall be reported on the DD Form 1176, line 3B, as "Change in Unfilled Customer Orders." The cumulative fiscal year to date amount in account 4131, "Contract Authority-Without Liquidating Appropriation," shall be reported on line 1B of the DD form 1176 as "Other New Authority Realized," except that a negative amount shall not be reported. At the end of the fiscal year the cumulative from

inception amount of account 4131 shall be adjusted and reported as required by paragraph Q.2.d.(2) of chapter 55, "Inventory and Supply Management Requirements," of this Regulation. That adjustment process is:

1. Add the year-end balances in accounts 4800, "Undelivered Orders," 4910, "Accrued Expenditures - Unpaid - Direct Program," and 4920, "Accrued Expenditures - Unpaid - Reimbursable Program."

2. From this sum subtract the sum of the year-end balances in accounts 4230, "Unfilled Customer Orders," 4251, "Reimbursements Earned-Uncollected-Automatic Apportionment," 4252, "Reimbursements Earned - Uncollected - Specific Apportionment," and 1010, "Fund Balance With Treasury."

3. The cumulative from inception balance in account 4131, "Contract Authority - Without Liquidating Appropriation," should equal the results of this computation. If not equal, the 4131 account shall be adjusted to equal the result.

The Amount in account 4211, "Anticipated Reimbursement-Specific Apportionment," after adjustment by the net change in operating obligations incurred during the month as recorded in account 4820, "Undelivered Orders - Reimbursable Program," account 4920, "Accrued Expenditures - Unpaid - Reimbursable Program," and account 4940, "Accrued Expenditures - Paid - Reimbursable Program," as indicated in paragraph Q.2.d.(2) of chapter 55, "Inventory and Supply Management Requirements," of this Regulation less the amounts reported on lines 3A and 3B of the DD Form 1176, shall be reported on line 3C as anticipated reimbursements.

E. Description of Entries

1. Line A - Customer Orders Accepted - Cumulative. Enter the total amount of customer orders received for the Fiscal Year to date. Report the balance of the following general ledger account:

4220 Reimbursable Orders Accepted

2. Line B- Gross Reimbursable Sales of Property - Cumulative. Enter the total sales for this Fiscal Year to date. The amount reported shall equal the amount reported on line 2.a. of Part I of the Statement of Operations. Report the balance of the following general ledger account:

5100 Revenue From Goods Sold

3. Line C - Unfilled Customer Orders. Enter the amount of requisitions or orders outstanding from customers. Report the balance of the following general ledger account:

4230 Unfilled Customer Orders - Unobligated

4. Line D - Customer Returns - Credits Granted - Cumulative. Enter the amount of credit granted to customers for material returns for the Fiscal Year to date. The amount reported shall equal the amount reported on line 2.b. of Part I of the Statement of Operations. Report the total amount of

credit granted to customers for material returns from the following general ledger account:

1529.1E Customer Returns - Credit Given

5. Line E - Net Reimbursable Sales of Property - Cumulative. Enter net sales for this Fiscal Year to date. The amount reported shall equal the amount reported on line 2. of Part I of the Statement of Operations. Report the result of line B. less line B. above.

6. Line F - Purchases at Cost - Cumulative. Enter the amount of purchases at cost for this Fiscal Year to date. The amount reported shall equal the amount reported on line 2.d. of Part III, "Cost of Goods Sold and Services Provided," of the Statement of Operations. Report the balance of the following general ledger account:

1529.1C Purchases at Cost

7. Line G - Obligations - Cumulative. Enter the total obligations incurred this Fiscal Year to date. (The sum of report lines H., I., and J., below.)

8. Line H - Obligations Operating - Cumulative. Enter the amount of operating obligations incurred this Fiscal Year to date. The amount reported should not include obligations reported on lines I. and J. Report balances from subsidiary accounts to the following general ledger accounts:

4800 Undelivered Orders
4900 Expended Appropriations

9. Line I - Obligations Augmentation - Cumulative. Enter the amount of obligations incurred this Fiscal Year to date for inventory augmentation, initial issue, etc. (Inventory augmentation purposes are defined in Volume 2, Chapter 9, of this Financial Management Regulation.) The amount reported should not include obligations reported on lines H. and J. Report balances of subsidiary accounts to the following general ledger accounts:

4800 Undelivered Orders
4900 Expended Appropriations

10. Line J - Obligations Mobilization - Cumulative. Enter the total amount of obligations for war reserve purposes. (War reserve purposes are defined in Volume 2, Chapter 9, of this Financial Management Regulation.) The amount reported should not include obligations reported on lines H. and I. Report balances of subsidiary accounts to the following general ledger accounts:

4800 Undelivered Orders
4900 Expended Appropriations

11. Line K - Outstanding Commitments. Enter the amount of commitments outstanding that has not resulted in obligations. Report the balance of the following general ledger account:

4700 Commitments Available for Obligation

12. Line L - Inventories - Stock On Hand. Enter the total amount of inventory on hand at the end of the report period after adjustment to latest acquisition cost. The amount reported shall equal the amount reported on Line 4. of the Statement of Financial Position less the amount reported on line N of this Inventory Management Report. Report the net total balance of the following general ledger accounts after adjustment to estimated cost:

- 1521 Inventory Held for Sale
- 1522 Inventory Held in Reserve for Future Sale
- 1523 Inventory Held for Repair
- 1524 Inventory - Excess, Obsolete, and Unserviceable
- 1529 Inventory - Allowance
- 1573 War Reserve/Mobilization Stock
- 1579.2 Allowance for Holding Gain/Loss - War Reserve/Mobilization

13. Line M - Other Inventories. Enter the total amount of other inventories (except inventories in transit reported on line N) consisting of Work in Progress, On Loan to Others for Use, and With Agents. Report the net total balance of the following general ledger accounts:

- 1581 Work in Process - In House
- 1582 Work in Process - Contractor
- 1583 Work in Process - Other Government Activities
- 1584 Work in Process - Government Furnished Material
- 1590 Other Related Property

14. Line N - Inventories in Transit. Enter the amount of material in transit. Report the balance of the following general ledger accounts:

- 1521.1 Inventory in Transit from Procurement
- 1521.2 Inventory in Transit from DoD Entities
- 1523.1 Exchange (DLR) Inventory in Transit

15. Line P - Total Inventories. Enter the sum of the amounts reported on lines L., M., and N., above.

16. Line Q - Customer Returns Without Credit - Cumulative. Enter the amount of returns from customers without credit. The amount reported should equal the net of the total amount of returns from customers less the amount reported on line D., above. Report the balance of the following general ledger account:

- 1529.1F Customer Returns Without Credit Given

17. Line R - Transfers to Reutilization and Marketing Offices - Cumulative. Enter the net amount transferred to DMROs for the Fiscal Year to date. Report the amount from the following general ledger account that applies to transfers to reutilization and marketing offices:

- 3231 Transfers Out to Government Agencies - Without Reimbursement

18. Line S - Material Returns to Suppliers - Cumulative. Enter the total amount of returns to public suppliers and contractors from a subsidiary account to the following general ledger account:

1316 Refunds Receivable - Public

and the total amount of returns to federal government suppliers from a subsidiary account to the following general ledger account:

7291 Inventory Losses or Adjustments

19. Line T - Undelivered Orders. Enter the total amount of undelivered orders outstanding. Report the balance of the following general ledger account:

4800 Undelivered Orders

20. Line U - Fund Balance With Treasury. Enter the total amount of funds with Treasury balance. The amount reported shall equal the amount reported on line 1.e. and 1.f. of the Statement of Financial Position. Report the balance of the following general ledger account:

1010 Fund Balance with Treasury

21. Line V - Funds Collected - Cumulative. Enter the amount of collections for the Fiscal Year to date. The amount reported shall equal the amount reported on line 1a. and 1b. of the Statement of Financial Position. Report the balance of the following general ledger account:

1011 Funds Collected

22. Line W - Funds Disbursed - Cumulative. Enter the amount of, disbursements for the Fiscal Year to date. The amount reported shall equal the amount reported on line 1.c. and 1.d. of the Statement of Financial Position. Report the balance of the following general ledger account:

1012 Funds Disbursed

23. Line X - Receivables Government. Enter the amount of receivables outstanding that are due from other federal government entities. Report the balance of the following general ledger accounts:

1311 Accounts Receivable - Government - Current

1312 Accounts Receivable - Government - Noncurrent

1315 Refunds Receivable - Government

24. Line Y - Receivables - Public. Enter the net amount of receivables outstanding that are due from non-federal government entities. Report the net balance of the following general ledger accounts:

1313 Accounts Receivable - Public - Current

1314 Accounts Receivable - Public - Noncurrent

1316 Refunds Receivable - Public

1319 Allowance for Loss on Accounts Receivable
1320 Claims Receivable - Public

25. Line Z - Payables. Enter the total amount of payables outstanding. Report the net total balance of the following Appendix B general ledger account:

2100 Accrued Liabilities - Other

26. Footnotes. Include in a footnote, the estimated balance of line U, above, that is the result of appropriations by type of appropriation, i.e., inventory augmentation or War Reserves and the estimated amount from operations. Include in a footnote, the amount of line L, above, at standard price.

FOREWORD

This Volume of the "Department of Defense Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

Volume 12 of the "DoD Financial Management Regulation" establishes policies and procedures for "Special Accounts Funds and Programs."

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

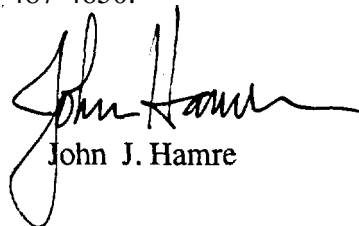

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume of the Regulation through its normal publication channels. Other Federal Agencies and the public may obtain copies of this Volume from the National Technical Information Service, 5285 Port Royal Road, Springfield VA 22161; telephone (703) 487-4650.

John J. Hamre

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller)(USD(C)). The Regulation consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Presentation and Formulation
3. Budget Execution - Availability and Use of Budgetary Resources
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursable Operations Policy and Procedures
12. Special Accounts, Funds and Programs
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Funds and Antideficiency Act Violations
15. Security Assistance Policy and Procedures

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense Instruction 7000.14 “DoD Financial Management Policy and Procedures,” dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The six digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A.1.a.(1)(a)
SUBPARAGRAPHS

PUBLICATIONS INCORPORATED

This Volume of the “DoD Financial Management Regulation” incorporates the policy and procedures contained in the following publications:

DoDI 1338.17 “Funding Military Academy Dining Hall Operations”

DoDI 7200.10 “Guidance for Accounting and Reporting of Government Property Lost, Damaged, or Destroyed”

DoD 7200.10-M “Department of Defense Accounting and Reporting for Government Property
Lost, Damaged, or Destroyed”

DoDD 7200.11 “Liability for Government Property Lost, Damaged, or Destroyed”

DoD 7220.9-M “DoD Finance and Accounting Manual” (Chapters: 28, 47, 65, and 81)

DoDI 7460.2 “Regulations Governing the Use of Management Funds”

CHAPTER 1**FUNDS****0101 OVERVIEW**

010101. Purpose. This Chapter establishes the accounting requirements for various DoD funds (as opposed to appropriations). Reporting requirements for funds are prescribed in Volume 6 of this Regulation.

010102. General. As described in Volume 3 of this Regulation, appropriations normally are made available to the Department of Defense as general fund expenditure accounts. This chapter includes a broad description of the remaining types of funds and their operation. The use of the term “accounts” in the context of this chapter should not be confused with “accounts” as in general ledger “accounts.” The “Treasury Financial Manual” describes the various categories of Federal Government funds that use the term “accounts.” These accounts have been assigned Treasury federal account symbols as described in this chapter.

010103. Fund Groups. All accounts are identified by fund group through assignment of numeric and/or alphanumeric account symbols. The symbol assigned to an account is determined after consideration of the governmental effect of the account and the source of the receipt, and the availability of the fund for expenditure. Some of these accounts have a significant impact on the operations of the Department of Defense. The Federal Account Symbols and Titles (FAST) book which is a supplement to the “Treasury Financial Manual” contains all of the fund groups, account symbols and titles assigned by the Department of the Treasury. Table 1-1 lists the fund groups and the federal account symbols assigned by the Department of the Treasury.

0102 ACCOUNTING STANDARDS

010201. General Standards. The accounting principles and standards prescribed in this Regulation apply to the budgetary and proprietary accounts, and to those reports required for the various fund types discussed in this part except when otherwise stated. Managers of funds that have budgetary resources available shall use the budgetary accounts and budget execution reports shall be submitted as prescribed in this Regulation.

010202. Special Standards. As applicable, special standards are identified in this chapter for certain funds discussed herein.

FUND GROUPS

General Funds	0000-3799
Clearing Accounts	3800-3899
Consolidated Working Funds	3900-3959
Management Funds	3960-3999
Revolving Funds:	
Public Enterprise	4000-4499
Intragovernmental	4500-4999
Special Funds	5000-5999
Deposit Funds	6000-6999
Trust Funds:	
Departments and Agencies	8000-8399 and 8500-8999
Trust Revolving Funds	8400-8499

Table 1-1**0103 ACCOUNTING FOR FUNDS**

010301. General Fund Receipt Accounts. General fund receipt accounts have been established to account for receipts of the Federal Government that have not been earmarked by law for a specific purpose. For internal control purposes, none of the receipts credited to these accounts are available for obligation and expenditure. Therefore, general fund receipt account collections do not affect budgetary resources. General fund receipt account collections do provide resources to the Congress to fund appropriations. However, a Congressional appropriation action requires a separate accounting process.

A. Unless there is specific statutory authority that authorizes a reimbursement to an appropriation account or fund (including special funds), all collections shall be credited to the appropriate general fund receipt account. However, obligations incurred that result in, or as a result of a general fund receipt account collection or receivable shall be recorded in the budgetary accounts of a direct appropriation or fund. Such obligations may be recorded as reimbursable obligations only when authorized to be reimbursed independent of the general fund receipt collection.

B. Accounts receivable for the general fund receipt accounts shall be recorded whenever an event results in the determination that money is owed to the U.S. Government. General fund receipt account receivables may be recorded at a summary level. Examples include:

1. A receivable shall be recorded for general fund receipt account 2651, "Sale of Scrap and Salvage Materials, Defense," based upon the recording of an issue or

the transfer of ownership of scrap or salvage material to a buyer. (Normally, however, a cash payment is required.)

2. A receivable shall be recorded for general fund receipt account 3019, "Recoveries for Government Property Lost or Damaged, not Otherwise Classified, Army, Navy, Air Force," based upon the receipt of an approved DD Form 200, "Report of Survey."

3. The accounting for receivables and collection of those receivables in general fund receipt accounts is described in Volume 4 of this Regulation.

010302. Clearing Accounts. These accounts are solely established for the temporary holding of general, special or trust collections, or unidentified disbursements pending clearance to the applicable receipt or expenditure account. These clearing accounts are to be used only when there is a reasonable basis or evidence that the collections or disbursements belong to the U.S. Government and therefore properly affect the budgetary resources of the DoD activity. Unidentified disbursements or collections not meeting this criteria shall be recorded in the deposit fund accounts discussed in paragraph 010307, below. None of the collections recorded in clearing accounts are available for obligation or expenditure while in a clearing account. If unidentified disbursements recorded in a clearing account exceed collections at the end of a fiscal year, the DoD Component shall establish an obligation in its major support appropriation account for the net difference. DoD activities shall, before the end of the fiscal year, obligate estimated amounts to preclude an Antideficiency Act Violation (see Volume 14 of this Regulation) as a result of this requirement. These entries shall be reversed at the beginning of the next fiscal year. Management action should be taken to minimize the balances in these accounts and the impact of these fiscal year end entries. Clearing accounts are identifiable by an "F" preceding the last four digits that classify an account by fund group.

A. The Budget Clearing Account (suspense), F3875, shall be used for unidentified remittances presumed to be applicable to budget accounts in general but required to be held in suspense because the specific account to be credited is not yet known. The use of this account gives immediate budget effect with respect to all items for which ultimate credit to a budget account is a reasonable presumption. However, DoD Components shall make every effort to maintain a minimum balance in this account by expeditiously transferring all monies initially classified in this account to the proper account. Clearing accounts are distinguished from deposit fund accounts in that deposit fund accounts do not affect the Component budgetary resources, whereas clearing accounts do affect the balance of Funds with Treasury and budgetary resources available as described in the introductory paragraph, above.

B. The "Deposits in Transit Differences (suspense)" clearing account, F3878, is used by the Department of the Treasury to adjust for discrepancies relating to deposit tickets and/or debit vouchers that have aged 6 months or more. DoD Components shall make every effort to clear balances in this account by expeditiously transferring all moneys out of this account to the proper account.

C. Table 1-2 illustrates the most common entries used for clearing accounts. The documentation supporting such entries includes cash collection vouchers and disbursement records.

ACCOUNTING ENTRIES USED FOR CLEARING ACCOUNT

a.	Dr	1011	Funds Collected
	Cr	1014	Undistributed Collections
b.	Dr	1015	Undistributed Disbursements
	Cr	1012	Funds Disbursed

Table 1-2

D. Any net balance of disbursements exceeding collections remaining in a clearing account at the end of a fiscal year shall be obligated. Table 1-3 illustrates this obligation. The documentation supporting such entries is a journal voucher prepared at the end of the fiscal year.

Cr	4930	Accrued Expenditures-Paid-Direct Program

Table 1-3

010303. Consolidated Working Fund Accounts. These are accounts established to hold funds transferred from other Federal Agencies or DoD activities pending transfer to an appropriate expenditure account as authorized by provisions of law. Consolidated working funds are credited with funds transferred from more than one appropriation or fund from within or outside the Department. Consolidated working funds are not available for obligation and expenditure. Their purpose is solely to hold the funds until transferred to an appropriation or fund account that will finance the work to be performed. Transfers into and out of the account are nonexpenditure transfers. Amounts in consolidated working fund accounts are available for transfer for the same periods as the accounts from which the funds were transferred.

A. Unless a specific provision of law provides otherwise, a consolidated working fund carries the fiscal characteristics and limitations of the appropriations or funds from which the transfer was made. Thus, funds transferred to a consolidated working fund must have similar purposes, fiscal characteristics, and limitations. For example, no-year, multiple-year, and single-year accounts shall not be commingled in the same consolidated working fund. Fund availability in a consolidated working fund expires when the accounts that advanced the funds expire. Likewise, appropriations designated by the Congress for dissimilar purposes, that is, operations and maintenance or procurement, shall not be commingled in the same consolidated working fund.

B. Consolidated working funds shall be accounted for by fiscal year on the same basis as the appropriations or funds that advanced funds to the working fund. Therefore, nonexpenditure transfers must be made to other appropriations or funds before the original funds expire for obligation purposes. In effect, the consolidated working fund is simply a holding account into which available funds are transferred. Then, based upon appropriate analysis and justification, funds are transferred to other accounts in amounts needed for execution purposes.

C. Since no execution or performance is permitted to occur in a consolidated working fund, accounting and reporting requirements are limited to the accounting and reporting of available budgetary resources, related equity, and funds with Treasury. Figure 1-1 shows an overview of the operation of a consolidated working fund.

D. Balances in consolidated working fund accounts shall be recorded as any other appropriated balance. Table 1-4 illustrates those entries.

E. The documentation supporting this entry includes approved SF 1151, “Nonexpenditure Transfers.”

010304. Management Fund Accounts. Currently management funds are not authorized for use within the DoD.

Table 1-4

010305. Revolving Funds. Revolving funds are established to finance a continuing cycle of business-type operations. Revolving fund accounts are authorized to be credited with receipts, incur obligations, and make expenditures. Revolving fund collections are normally available for obligation and expenditure without further action by the Congress. However, DoD revolving funds (except for some business areas within the Defense Business Operations Fund) are subject to apportionment by the OMB. Apportionment by the OMB precludes obligation or expenditure of funds in excess of the apportioned balance during a fiscal period. Figure 1-2 is an overview of the operation of revolving funds. The following concepts normally apply to revolving funds:

A. There are two types of revolving funds. Public enterprise revolving funds are distinguished from intragovernmental revolving funds by the source of revenues. Public enterprise revolving fund revenues come primarily from outside the Federal Government. Intragovernmental revolving fund revenues come primarily from other federal appropriations or funds.

B. Appropriations and/or reappropriations are usually provided to start, increase the size, or replace significant losses of a revolving fund. Also, existing resources in other accounts may be transferred to a revolving fund as capitalized assets to serve the same purposes in lieu of an appropriation. The resources used to commence or increase the size of a revolving fund commonly are referred to as “the corpus of the revolving fund.” The corpus forms the nucleus of resources used to acquire the resources needed to perform the mission of the revolving fund.

C. Revenues are generated in DoD revolving funds from reimbursable actions on behalf of authorized beneficiaries. Those revenues result in collections of funds. The funds collected are used to pay for the acquisition of resources needed to operate the revolving fund. In revolving funds that are apportioned by the OMB, the use of the budgetary resources associated with those collections to incur obligations is limited to the amount of obligation authority available for the fiscal period.

D. Revolving funds subject to apportionment are apportioned on an obligation basis. An SF 132, “Apportionment and Reapportionment Schedule,” must be submitted to the OMB for approval of the amount of obligational authority needed for the operation of the revolving fund for a fiscal period. A fiscal period may be a quarter of a fiscal year or a full fiscal year.

E. Budgetary resources available for apportionment action include:

1. New budget authority (appropriations)
2. Available unobligated balances at the beginning of the fiscal period.

3. Reimbursements and other income (also known as offsetting collections credited to the appropriation or fund account).

4. Recoveries of prior year obligations.

5. Restorations.

6. Contract authority.

F. The apportionment of anticipated reimbursements as obligational authority in no way authorizes a revolving fund to obligate in excess of the contract authority, borrowing authority, or reimbursable orders received from within the Federal Government and advances received for orders outside the Federal Government. Orders from state, local, and foreign governments are considered to be orders from the public.

G. In the case of loan programs, budgetary resources available for obligation from loan repayments and interest on loans are comprised of actual collections when authorized to be used. Loan repayments in the form of loans receivable and interest receivable are amounts due but not collected. These amounts are not available for obligation until collected.

H. Other assets, whether of a working capital nature such as inventories of stock or of a fixed asset nature, are not considered as a budgetary resource. Such assets, therefore, do not enter into the determination of unobligated balances. However, claims against budgetary resources, such as accounts payable and undelivered orders, are obligations of a revolving fund and must be subtracted from unobligated balances when incurred. Obligations for the procurement of inventories, as well as for the acquisition of other revolving fund assets, must be recognized, recorded, and reported along with other obligations.

I. Some revolving funds, particularly public enterprise funds, have budget authority exclusively for the fund that is technically outside the fund as long as it remains “undrawn.” This concept may apply to the authority to borrow from the public, authority to borrow from the Department of the Treasury, and sometimes contract authority.

J. The amount of obligational authority apportioned or the available balance of obligational authority may be less than the total budgetary resources available in a revolving fund. The difference, which cannot be obligated unless it is apportioned, may be characterized as either an unapportioned balance of a revolving fund or a restrictive withholding. The concept of an unapportioned balance is one of preserving a portion of the fund’s capital so it may continue to revolve.

K. Incurring obligations or authorizing the incurrence of obligations in excess of apportioned budgetary resources shall be reported as an apparent violation of the administrative control of funds provisions contained in Volume 14 of this Regulation. This

reporting requirement applies whether or not a revolving fund has unapportioned budgetary resources or nonbudgetary assets greater than the amount of the deficiency.

L. Each revolving fund is required to submit a separate set of reports to the Department of the Treasury as described in Volume 6 of this Regulation. Therefore, the data required for each revolving fund to prepare these reports shall be identified within the DoD Component's accounting system.

M. DoD public enterprise revolving funds include but are not limited to the Special Defense Acquisition Fund, Defense Production Guarantees Fund, and the Homeowners Assistance Fund. DoD intragovernmental revolving funds are the Defense Business Operations Fund, the Pentagon Reservation Maintenance Fund, Washington Headquarters Services Building Maintenance Fund, and the Army Conventional Ammunition Working Capital Fund.

1. The Special Defense Acquisition Fund is funded by the use of a limited amount of certain foreign military sales collections as authorized by Congress. The fund is used to acquire items needed in anticipation of sales to foreign governments. The proceeds from the sales of the fund are used to acquire items in anticipation of future sales. Budgetary resources provided from sales to customers are not available for use until collections have occurred and OMB has approved apportionment of funds by category of item. The apportionment of funds by the OMB provides control over the obligations for the acquisition of approved categories of items. The Special Defense Acquisition Fund has been assigned the symbol 11X4116 by the Department of the Treasury. Figure 1-3 is an overview of the operation of the Special Defense Acquisition Fund.

2. The Defense Production Guarantees Fund was funded by borrowing authority and interest collections. This fund is used to repay loans defaulted by defense contractors that have been guaranteed by the U.S. Government. Obligations and liabilities shall be recorded based upon documentary evidence that a qualifying loan has been defaulted and the DoD Component is required to repay the loan. An accounts receivable from the defense contractor shall be recorded in the amount of funds paid to satisfy the defaulted loan at the time of disbursement. Budgetary resources associated with collections from the defense contractor are not available until after the funds are collected and apportioned by the OMB. The Defense Production Guarantee Fund has been assigned the symbol X4080 by the Department of the Treasury. Figure 1-4 is an overview of the operation of the Defense Production Guarantee Fund.

3. The Homeowners Assistance Fund, Defense is funded by borrowing authority and appropriations. The fund is used to acquire homes under certain criteria when a DoD installation is closed. The fund acquires homes as assets and assumes the related liabilities. All properties acquired by the Homeowners Assistance Fund are managed and disposed of by the U.S. Army Corps of Engineers. At the time of sale of a property, revenues are recorded and gains and losses on the disposition of the asset are determined. Costs incurred related to a property

shall be capitalized as an increase in the amount of the asset whenever value is added to the property. Under certain conditions, losses incurred on private sales of qualified property may be reimbursed as operating expenses of the fund. Certain other operating expenses may be authorized. The budgetary resources provided from sales or lease of property are only available for obligation after collection and when apportioned by the OMB. The Homeowners Assistance Fund has been assigned the symbol X4090 by the Department of the Treasury. Figure 1-5 is an overview of the operation of the Homeowners Assistance Fund.

4. The Defense Business Operations Fund has been established to fund the operation of certain support functions within the Department of Defense. This Fund was formed from five previously existing industrial funds, four previously existing stock funds, and selected Defense Agency support functions that were previously funded through direct appropriations. The Defense Business Operations Fund provides support functions such as inventory, maintenance, communications, depot maintenance, shipyards, military airlift and sealift. Services are provided on a reimbursable basis to authorized customers. The accounting requirements for the Defense Business Operations Fund are contained in Volume 11B of this Regulation. Figure 1-6 is an overview of the operation of this Fund.

5. The Army Conventional Ammunition Working Capital Fund was chartered to finance the loading, assembly, and packing operations for the manufacturing of conventional ammunition for the Department of Defense. This revolving fund was not provided with a corpus but instead performs work with funds from advances received associated with customer orders for ammunition. Apportioned budgetary resources for the fund include reimbursements from customers, unobligated balances brought forward, and recoveries of prior year obligations. Budgetary resources associated with customer orders received are available for obligation within the apportioned amount during a fiscal period. The Army Conventional Ammunition Working Capital Fund has been assigned the symbol X4528 by the Department of the Treasury. Figure 1-7 is an overview of the operation of the Army Conventional Ammunition Working Capital Fund.

010306. Special Funds.

A. There are two types of special fund accounts.

1. Receipt Accounts. Special fund receipt accounts are credited with receipts from specific sources that are earmarked by law for a specific purpose, but which are not generated from a continuing cycle of operations. At the point of collection, these receipts are either available for transfer to a special fund expenditure account or are not available for transfer depending upon statutory authority. Obligations and expenditures shall not be recorded in a special fund receipt account.

2. Expenditure Accounts. Special fund expenditure accounts are established to record amounts appropriated or otherwise made available by transfers from a

special fund receipt account to be obligated and expended for special programs in accordance with specific provisions of law.

B. Special fund receipts shall be accounted for in the special fund receipt account until made available for obligation and expenditure in a special fund expenditure account. Special fund receipts fall into two categories:

1. Receipts that are not available for use in a special fund expenditure account. Some special fund receipts are not available until appropriated to an expenditure account by the Congress. Receipts credited to some other special fund receipt accounts are required by the authorizing legislation to be transferred in whole or in part to other accounts before an appropriation warrant can be issued by the Department of the Treasury. Still other special fund receipts may not be available for use because a congressional limitation has been established on the amount that would normally be otherwise available for obligation and expenditure.

2. Receipts that are authorized by legislation to be immediately available for transfer to an expenditure account. These receipts are immediately available in their entirety to a single agency for transfer to a special fund expenditure account for obligation and expenditure without further action by the Congress. An available receipt account carries the same symbolization as its corresponding expenditure account in that an alphanumeric character (usually an "X") is inserted to indicate the period of availability of the funds for obligation.

C. Table 1-5 illustrates the accounting entries for special fund receipts that are not available for use. The documentation supporting this entry is a cash collection voucher.

D. The accounting for special fund expenditure accounts shall be in accordance with the provisions of this Regulation. However, each special fund must be viewed as a unique fund in light of any special provisions in the enabling legislation. An example of a Department of Defense special fund account is the Wildlife Conservation account.

010307. Deposit Fund Accounts. These are accounts established to account for collections that are either held temporarily and later refunded or paid upon administrative or legal determination as to the proper disposition thereof, or held by the Government as banker or agent for others and paid out at the direction of the depositor. Deposit funds are liabilities of the Federal Government. The accounts are not included in the budget totals because the amounts are not available for government purposes. Deposit funds are not available for the incurrence of any Federal Government obligations or payment of any Federal Government obligations. Various types of deposit funds include:

A. Moneys withheld by the Government from payments for goods and services received. This type of transaction may be treated as a deposit fund liability only when a budgetary account has been charged and the funds are being held by the Government pending payment; for example, payroll deductions for savings bonds or State and local income taxes.

B. Deposits received from outside sources for which the U.S. Government is acting solely as a banker, fiscal agent, or custodian.

C. Moneys held by the U.S. Government awaiting distribution on the basis of a legal determination or investigation. This category includes moneys in dispute (between the Government and outside parties) when ownership is in doubt and there is no present basis for estimating ultimate distribution.

D. Unidentified remittances shall be credited as suspense items outside the budget (deposit fund suspense account X6875) unless there is a reasonable presumption that they will be credited ultimately to a receipt, appropriation (expenditure), or fund account within the budget, in which case amounts shall be credited to the receipt clearing accounts.

E. Table 1-6 illustrates the most common entries used for recording deposit fund receipts. The documentation supporting this entry includes cash collection vouchers, and journal vouchers.

Table 1-6							

010308. Trust Funds.

A. There are three types of trust fund accounts.

1. Trust fund receipt account. Trust fund receipt accounts are credited with receipts generated by the terms of a trust agreement or statute. At the point of collection, these receipts are available for transfer to a trust fund expenditure account or are not available for transfer depending upon the terms of the trust agreement or statutory authority.

2. Trust fund expenditure account. Trust fund expenditure accounts are established to record amounts appropriated or otherwise made available by transfer from a trust fund receipt account to be obligated and expended in carrying out the specific purposes or programs in accordance with the terms of the trust agreement or statute. Funds transferred or appropriated to a trust fund expenditure account are normally available for obligation and expenditure within the limits imposed by the trust agreement or authorizing statute.

3. Trust revolving fund. A trust revolving fund is a single account that is authorized to be credited with receipts and incur obligations and expenditures in support of a continuing cycle of business-type operations in accordance with the provisions of the trust agreement or statute. Trust revolving fund receipts are available for obligation and expenditure without further action by the Congress. Figure 1-8 provides an overview of the operation of a trust revolving fund.

B. In general, DoD trust funds authorized to incur obligations and expend receipts have been exempted from apportionment by the OMB. However, the Defense Commissary Agency Surcharge Collections, Sales of Commissary Stores trust revolving fund is subject to apportionment by the OMB. Accounting for trust fund expenditure accounts and trust revolving funds shall be in accordance with the provisions of this Regulation. However, each trust fund must be viewed as a unique fund in light of any special provisions in the trust agreement or the enabling legislation. Because of the unique nature and the magnitude of impact of the Deposits, Advances, Foreign Military Sales, Executive trust fund, special accounting requirements have been established in Volume 15 of this Regulation.

CHAPTER 2**PRODUCTIVITY GAIN SHARING****0201 OVERVIEW**

020101. Purpose. This Chapter establishes the financial procedures to manage productivity gain sharing (PGS). This policy applies to organization-wide gain sharing applications in Defense Business Operations Fund and unit cost activities.

020102. General. Defense Business Operations Fund activities, and those activities operating under unit cost resourcing, are encouraged to implement organization-wide PGS plans, in accordance with DoD Instruction 5010.34, "Productivity Enhancement, Measurement and Evaluation - Operating Guidelines and Reporting Instructions." An "organization-wide PGS plan" refers to a single plan in which (a) the focus is the overall productivity of the entire activity and (b) all employees of the activity participate. (An example of an "activity" is a Naval aviation depot; "organization-wide" means all directorates and offices of the depot.)

0202 POLICY AND PROCEDURES

Productivity gain sharing will be based on activity achievement of reduced total cost per output for products or services over the current fiscal year while, at the same time, reaching specified levels of output quality, timeliness, quantity, and customer satisfaction. Stated another way, savings from PGS will be shared with eligible civilian employees when an activity achieves increased efficiency while maintaining or improving effectiveness. Increased efficiency, for PGS purposes, results when the actual unit cost is less than the budgeted unit cost for that activity. Increased efficiency at the expense of decreased effectiveness, however, will not be rewarded. Therefore, predetermined effectiveness measures (such as output quality, timeliness, quantity, and customer satisfaction) must be maintained. While it often is beneficial to determine the cause(s) for productivity increases, employees will share those gains regardless of whether the gain could be attributed to a cause other than directly to employees. The concept is that employee participation is essential to realize productivity gains from new processes and equipment.

0203 PLANS

Activities will develop individual organization-wide PGS plans based on their mission functions. When applicable, the development of PGS plans shall include representation by employees' union(s). The PGS plan will be approved by the activity's higher headquarters (i.e., major command level), and encompass, but not be limited to, the following criteria:

020301. Measurement. Organization-wide gain sharing designs must include predetermined and measurable efficiency and effectiveness measures consistent with Defense Business Operations Fund and unit cost policies. The primary consideration in gain sharing measurement is the occurrence of increased efficiency without decreased effectiveness. Net operating results will not be used to measure productivity gains since annual operating cost budgets may forecast activities to incur an annual net operating loss.

A. Efficiency Measures. Efficiency measures will be in terms of total cost per output goals consistent with annual operating budgets. Costs paid directly from appropriated funds, such as mobilization and base closure costs, are not included in unit cost goals and, therefore, will not be included in total cost per unit of output calculations.

B. Effectiveness Measures

1. Effectiveness measures will reflect attributes of the final product or service produced by the activity and received by the customer. (Effectiveness measures should be consistent with, but not necessarily identical to, activity measures developed for DoD performance budgeting.) These include:

- Quality
- Timeliness
- Quantity
- Customer Satisfaction

2. In some cases, measures of a subprocess effectiveness will be included when these indicators have a predictable major impact on a final product or service. For example, inventory accuracy in distribution depots is a measure of a subprocess that has an impact on the output (lines received/issued).

C. Costs. All costs included in the unit cost goals also will be included in PGS determinations. These costs include:

- Direct/Indirect Labor
- Military Personnel
- Direct/Indirect Material
- Capital Depreciation
- General and Administrative (Overhead)

D. Performance Leveling Factor. Performance evaluation indicators will be used to ensure that quality is not sacrificed for increased production. Performance goals and the performance leveling factor will be stated in PGS plans. Performance above the established goals will increase the award while performance below those goals will decrease the award.

020302. Payout

A. The PGS payout will be based on the extent to which savings exceed the budgeted unit cost goals for the current fiscal year while maintaining predetermined performance effectiveness. Unit cost goals are issued by the USD(C) to DoD Components, which are responsible for reallocating unit cost goals to subordinate activities.

B. Under unit cost, budgets authorize activities to incur costs to produce an output. Budgets are subject to continuing adjustment as changes affecting cost occur. However, in PGS plans, a budget and unit cost goals must be firmly established and agreed upon by the activity and its headquarters prior to the execution fiscal year. An activity that implements PGS may negotiate with its headquarters fixed annual unit cost goals for a period up to 3 years. The agreed upon budget and unit cost goals will be the basis upon which productivity gains are measured during the execution fiscal year and payouts calculated. The DoD Component still will be required to meet the overall unit cost goals established by the USD(C).

C. Activities may share up to a maximum of 50 percent of achieved savings with their eligible employees. To ensure that performance goals are achieved, the employees' share may be adjusted by the performance leveling factor(s) stated in the PGS plan. The remaining percent of the activity's savings will remain in the Fund or operating budget and will be reflected in unit cost goals and price reductions to the customers in the next fiscal year.

1. Although not mandatory, it is recommended that shares be of equal payment for all eligible employees regardless of an individual's pay grade, position within the activity, or hourly wage.

2. Plans will include a specified period of time that an employee must contribute to the work effort (or be assigned at the activity) for eligibility to receive a share of the payout. Plans also will specify as to whether the employee is eligible or forfeits his/her share if the employee leaves the organization prior to the payout.

3. Contribution to the work effort shall be defined as hours worked. Individual activity plans may address the issue of including or excluding overtime hours. Absences (annual, sick, traumatic, administrative leave, or other work absences) will not be included.

4. Employees may elect to receive a time off award in lieu of cash payment, or a combination of a time off award and pay. The time off award option will be granted at the discretion of the activity commander based upon workload requirements at the time. The amount of time off granted will be derived by dividing the value of the employee's gain share award by his/her hourly rate plus an average factor for benefits.

D. Payout must be made on an annual basis. Net operating results, positive or negative, will not be a basis or limitation on gain share payouts.

E. It is possible for an activity to earn a gain share payout and not have the funds to pay the gain share at the local level. If that occurs, the activity will obtain approval and funds for the payout from its higher headquarters.

0204 ACCOUNTING

020401. All costs associated with gain sharing programs (e.g., cash payouts, time off awards and related administrative costs) will be recorded as an operating expense in the year the expense for the payout is incurred and included in the total cost per output computation for that fiscal year.

020402. Payouts to employees, whether in the form of cash or time off awards, shall be classified as a personnel compensation expense in accordance with Volume 4 of this Regulation. A liability shall be recorded for that portion of a payout which is due, but not yet paid, in accordance with Volume 4 of this Regulation.

0205 AUDIT

Activity PGS plans and payouts will be subject to audit in accordance with prescribed audit policies.

CHAPTER 3**CONTRIBUTIONS FOR DEFENSE PROGRAMS, PROJECTS, AND ACTIVITIES****0301 INTRODUCTION**

030101. Purpose. This Chapter prescribes the overall policy and assigns responsibilities for the acceptance, receipt, use, and reporting of monetary and non-monetary contributions (real and personal property and services) to the Department of Defense (DoD) under Title 10, United States Code, section 2608. Authorities to accept contributions under Title 10, United States Code, section 2350j and Public Law 103-335, section 8053, are not included in this chapter.

030102. Defense Cooperation Account. A special account is established in the Treasury of the United States for receipt of monetary contributions and proceeds from the sale of real or personal property contributions accepted by the Secretary of Defense, or designee under Title 10, United States Code, section 2608.

0302 AUTHORITY

030201. Secretary of Defense. Title 10, United States Code, section 2608 provides authority for the Secretary of Defense (SECDEF) to accept from any person, business, foreign government, or international organization, any contribution of money or real or personal property made by such person, business, foreign government, or international organization for use by the Department.

030202. Under Secretary of Defense (Comptroller) (USD(C)). Authority to accept such contributions has been delegated to the USD(C), who also serves as the single point of contact in the Department for the Departments of State and the Treasury with respect to all matters involving the receipt, administration and distribution of contributions of funds from foreign countries for defense programs.

030203. DoD Components. The DoD Components, have authority to accept non-monetary contributions from friendly persons, businesses or international organizations.

0303 CONTRIBUTIONS**030301. Non-Monetary Contributions**

A. Offers of non-monetary contributions from friendly persons, business, foreign governments or international organizations may be accepted by the DoD Component.

Prior to acceptance of non-monetary contributions the accepting DoD Component shall document the following details and maintain such documents for reporting identified in this chapter.

1. A description of the contribution.
2. Estimated value of the contribution.
3. The name of the organization, individual or business contributing the item.
4. The operational requirement for the contribution, if any requirement exists.
5. Justification that acceptance of the contribution is preferable to obtaining the item through existing DoD supply channels, if a like requirement of the Department exists.

B. Valuation methods that generally should be used to determine the value of non-monetary contributions are as follows:

1. The value of the contributed item as reported by the contributor.
2. The recent DoD acquisition price for a similar item, if normally acquired by the Department.
3. The current DoD standard price for a similar item, if normally acquired by the Department.

C. If requested, the DFAS Deputy Director for Accounting (DFAS-HQ/A) will assist the accepting DoD Component in establishing the value of non-monetary items accepted.

030302. Monetary Contributions. The DoD Components shall notify the USD(C) or designee of all monetary contributions prior to acceptance of such contributions. As a rule, monetary contributions should be accepted without restrictions, i.e., without designations for specific programs or purposes. Offers of monetary contributions with restrictions require written approval from the USD(C) prior to acceptance. Copies of all notifications shall be sent to the DFAS (Attention: DFAS-HQ/AE).

A. Contributions in Cash

1. The DoD Component shall deposit all cash contributions, including proceeds from the sale of any contributed property, to the Defense Cooperation Account as soon as practical.

2. Consistent with sound cash management practices, any cash received by the DoD Components shall be either converted into a check and forwarded to the DFAS using overnight delivery service, or deposited into a Treasury General Account with funds transferred to the Defense Cooperation Account via electronic funds transfer--whichever process results in the earliest deposit of funds into the Defense Cooperation Account.

3. The DoD Component shall ensure that any funds forwarded by electronic funds transfer are deposited within 24 hours into the Defense Cooperation Account under ALC 9720010 and Account Number 97X5187.1. Additionally, the DoD Component shall notify the DFAS (DFAS-HQ/AE) prior to forwarding any funds electronically.

4. Documentation associated with cash contributions, including copies of deposit tickets, and the original of correspondence from contributors shall be forwarded by the DoD Component within 24 hours of the deposit using overnight delivery service, to the DFAS, ATTN: DFAS-HQ/AE.

B. Contributions by Check

1. Checks received by DoD officials shall be made payable to the "United States Treasury." The reference line on the check should indicate the "Defense Cooperation Account."

2. Checks received by DoD officials shall be forwarded to the DFAS ATTN: DFAS-HQ/AE, Investment Trust Directorate, Room 200, 1931 Jefferson-Davis Hwy, Arlington, VA 22240-5291, or electronically transferred to the Defense Cooperation Account in accordance with paragraph 100302A4 above as applicable. The DFAS shall deposit such funds within 24 hours of receipt into the Defense Cooperation Account under ALC 9720010 and Account Number 97X5187.1.

3. Documentation associated with check contributions, including copies of checks, deposit tickets, and the original of any correspondence from contributors shall be forwarded by the DoD Component within 24 hours of the deposit using overnight delivery service, to the DFAS, ATTN: DFAS-HQ/AE.

C. Contributions by Wire Transfer

1. Contributions by wire transfer eliminates delays in receiving deposits and provide the most efficient preliminary accounting information for investment purposes.

2. Donors may make contributions to the Defense Cooperation Account via electronic funds transfer from commercial banks to “Account Number 1” in the Federal Reserve Bank of New York (as Fiscal Agent of the United States). The Federal Reserve Bank of New York shall credit the Department accordingly, using the format in Figure 3-1.

3. Documentation associated with wire transfer contributions, including the original of any correspondence from contributors shall be forwarded within 24 hours of the deposit using overnight delivery service, to the DFAS ATTN: DFAS-HQ/AE.

D. Contributions in Foreign Currencies (Cash or Check). When a DoD Component becomes aware of a planned, large contribution (\$1 million or more) to be made in foreign currency, the DoD Component shall:

1. Request the donor to provide as much lead time as possible regarding the amount of the contribution and the estimated date the contribution will be made.

2. Advise the DFAS ATTN: DFAS-HQ/AE of any planned contributions and continue to keep that office advised of the status until the currency transfer is made by the donor.

3. Request the donor to credit the foreign currency contribution to the Federal Reserve Bank of New York “Account Number 1” via the donor’s central bank. If the Federal Reserve Bank does not maintain an account with a particular donor, the DoD Component should seek guidance from the DFAS-HQ-A, for appropriate alternative arrangements.

4. Foreign checks received by DoD officials shall be converted to a check denominated in U.S. dollars prior to being forwarded to the DFAS or transferred electronically into the Defense Cooperation Account.

5. Cash and checks received by DoD officials in countries not served by a DoD disbursing officer shall be delivered to the nearest U.S. Embassy within 24 hours of receipt for deposit in the Defense Cooperation Account, under ALC 97200010 and Account Number 97X5187.1.

0304 REPORTING REQUIREMENTS

030401. Not later than 10 days after the end of each quarter, each DoD Component shall submit a report, including negative reports, to the DFAS ATTN: DFAS-HQ/AE, Room 200, 1931 Jefferson- Davis Hwy, Arlington, VA 22240-5291, that identifies the following:

A. Non-Monetary Contributions Received

1. A description of each item received.
2. The value of each item received, including the valuation method used.
3. The name of the contributor for each item received.
4. The date each item was received.
5. Details of any restrictions, conditions or other relevant information regarding each contribution.
6. If two more like items are received from different sources the items are to be accounted for separately to permit identification of items received.

B. Non-monetary Contributions Sold

1. A description of each item sold.
2. The proceeds of each item sold.
3. The name of the contributor for each item sold.
4. The date each item was sold.
5. The name of the purchaser for each item sold.
6. If two or more like items are received from different sources the items are to be accounted for separately to permit identification of items when sold.
7. Details of any other relevant information regarding each item sold.

C. Monetary Contributions Received

1. The dollar amount of each contribution.
2. Name of the donor for each contribution received.
3. The date each item was received.

4. Details of any restrictions or conditions or other relevant information regarding each contribution.

030402. Not later than 15 days after the end of each quarter, the DFAS shall prepare and forward to the USD(C) a report to be submitted to the Congress that provides the following information.

A. Summary values of monetary and non-monetary contributions accepted during the month.

B. A description of all property valued at more than \$1 million. In determining whether the \$1 million threshold has been met, the following procedures shall be used:

1. The value of similar items accepted during the quarter shall be added together.

2. The value of components which, if assembled, would comprise all or a substantial portion of an item or facility shall be added together.

0305 INVESTMENT PROCEDURES

030501. General. Consistent with good cash management practices, funds in the Defense Cooperation Account shall be invested in Government securities until distribution is authorized. Generally, investments are limited to U.S. Treasury bills maturing in 90 days or less.

030502. Purchasing Government Securities. The DFAS ATTN: DFAS-HQ/AE shall follow the procedures below for purchasing Government securities.

A. Daily, after all contributions and other transactions have been entered into the Defense Cooperation Account, generate a Preclosing Trial Balance.

1. Verify the amount in account 1010, Fund Balance with Treasury, with the amount entered in the Cash Book for the same day.

2. Research and correct any differences between account 1010 and the Cash Book immediately.

B. A security investment can be purchased if account 1010 has a balance sufficient to purchase a \$10,000 Treasury bill or a \$1,000 U.S. Treasury note or bond. Information on prices, maturities, and yields of U.S. Treasury securities generally can be found in the financial section of major newspapers.

- C. Select a U.S. Treasury security from those available.
- D. Complete the applicable sections in the Memorandum for Purchase or Sale of Investments.
- E. Telephone the Finance Management Branch, Financial Management Service (FMS), U.S. Department of the Treasury before 11:00 a.m. on the day of the investment at (202) 208-1450.
 - 1. The following information shall be provided to the Treasury representative.
 - a. Account: Defense Cooperation Account
 - b. Transaction Type: Purchase
 - c. Transaction Date: (Date the security will be purchased)
 - d. Type of Security: (Specify)
 - e. Date of maturity: (Specify)
 - f. Amount: (Amount available in account 1010, Fund Balance with Treasury)
 - 2. Complete the coordination section of the Memorandum for Purchase or Sale of Investments.
 - 3. Prepare a confirmation memorandum supporting the telephone call and fax a copy of the memorandum to the FMS Finance Management Branch normally on the same day as the transaction (Fax Number (202) 377-9597).
 - 4. The day after the transaction, call the Finance Management Branch to obtain the face amount, discount or premium, interest purchase (if any), and the price of the security purchased. Record this information on the Memorandum for Purchase or Sale of Investments. The Finance Management Branch should provide written confirmation of the information received by phone.
 - 5. Complete the Purchases Input Worksheet and update the Defense Cooperation Account system. Once this has been accomplished, a person other than the one

making input must sign the Purchase Input Worksheet confirming that the Defense Cooperation Account was updated for the Purchase.

030503. Selling Securities. The DFAS ATTN: DFAS-HQ/AE shall follow the procedures below to sell Government securities.

A. The Office of the Deputy Comptroller (Program/Budget) will determine the amount needed for payment or transfer. The Fund Manager, DFAS ATTN: DFAS-HQ/AE, normally shall sell securities to cover the amount needed if no securities mature on that day or contributions are not received. The decision as to which securities will be sold will depend on current economic conditions.

B. Select a security or securities for sale.

C. Complete the appropriate data elements on the Memorandum for Purchase or Sale of Investments.

D. Telephone the Finance Management Branch, Financial Management Service, U.S. Department of the Treasury before 11:00 a.m. on the day of the sale.

1. Provide the Treasury representative the following information:

- a. Account: Defense Cooperation Account
- b. Transaction Type: Sale
- c. Transaction Date: (Date security will be sold)
- d. Type of security: (Specify)
- e. Interest Rate: (Enter applicable rate only if Notes or Bonds are sold)
- f. Date of maturity: (Specify)
- g. Amount: (Minimum amount of proceeds from the sale required to cover any projected negative amount in account 1010)

2. Complete the coordination section of the Memorandum for Purchase or Sale of Investments.

3. Send a confirmation letter to the FMS Finance Management Branch via fax, normally on the same day as the transaction.

4. The day after the transaction date, call the FMS Finance Management Branch to obtain the principal amount and the interest earned. Record this information on the Memorandum for Purchase or Sale of Investments. The Finance Management Branch should provide written confirmation of the information received by phone.

5. Prepare Sale Input Worksheet and update the Defense Cooperation Account system. Once this has been accomplished, a person other than the one making the input must verify the input as soon as possible to ensure that the system has the correct data.

030504. Maturing Securities. The DFAS shall maintain a tracking system that identifies impending maturities and collections of securities for the Defense Cooperation Account and ensure appropriate reinvestment action is taken upon maturity of a security.

030505. Payments or Transfers. Payments or transfers from the Defense Cooperation Account must be authorized by the Congress. The USD(C) will provide withdrawal notification to the DFAS which shall ensure appropriate action is taken.

030506. Annual Reviews. The DFAS-HQ will conduct an annual review of the Defense Cooperation Account operations and transactions, including the purchase and sale of investments. The objective of the review will include compliance with the DoD and the Treasury policies and procedures, and adequacy of internal controls.

SAMPLE FORMAT
WIRE TRANSFERS TO THE U.S. TREASURY

The sample format for wire transfers for credit to U.S. Treasury Defense Cooperation Account (remaining blocks to be filled by the sender or the sending bank, in accordance with the attached wire transfer instructions) is as follows:

```

I _____ I
  (1)      (2)
I 021030004 I _____ I
  (3)      (4)      (5)

FIGURE 3-1

**MONETARY CONTRIBUTIONS BY WIRE TRANSFER
INSTRUCTIONS**

The following is a guide for filling out the funds transfer form (Figure 3-1) which should be available at the sending financial institution.

1. RECEIVER DEPOSITARY FINANCIAL INSTITUTION (DFI) No. The Treasury Department's American Bankers Association (ABA) number for deposit messages is 021030004. This number shall be entered by the sending bank for all deposit messages sent to Treasury for credit to the Defense Cooperation Account.
2. TYPE-SUBTYPE CODE. The type and subtype code is provided by the sending bank.
3. SENDER DFI NO. This number is provided by the sending bank.

4. SENDER REFERENCE No. The sixteen (16) character reference number is inserted by the sending bank at its option.
5. AMOUNT. The transfer amount shall be in U.S. dollars and must be punctuated with commas and a decimal point; use of the dollar sign is optional.
6. SENDER DFI NAME. This information is automatically inserted by the Federal Reserve Bank.
7. RECEIVER DFI NAME. The Treasury Department's name for deposit messages is "TREAS NYC." The name should be entered by the sending bank.
8. PRODUCT CODE. A product code of "CTR" for customer transfer should be the first data in the RECEIVER - TEXT field. Other values may be entered, if appropriate, using the ABA's options. A slash must be entered after the product code.
9. AGENCY LOCATION CODE (ALC). The agency location code is of critical importance and must appear in the precise manner stated to allow for automated processing and classification to the ALC of the Department of Defense. The sequence includes the beneficiary code tag (BNF) and indicator code (/AC) followed by the Defense Department's eight (8) digit ALC (97200010) for this account. The ALC identification sequence can, if necessary, begin on one line and end on the next line. However, the field beneficiary code tag (BNF) must be one line and cannot contain any spaces.
10. THIRD PARTY INFORMATION. The reason for the funds transfer should appear in this field. The originator-to-beneficiary information field tag (OBI=) is used to signify the beginning of free-form text. An example follows: BNF=/AC-97200010 OBI=to the Defense Cooperation Account(97X5187) for defense programs, projects, and activities from (Name of Donor).

(This page intentionally left blank.)

CHAPTER 4**CREDIT MANAGEMENT****0401 OVERVIEW**

040101. Purpose. This chapter establishes the policy and procedures for credit management within the Department of Defense. The policies and procedures for credit programs reflect the requirements of the Federal Credit Reform Act of 1990. The Federal Credit Reform Act of 1990 is found at Title V of the Congressional Budget Act of 1974, as amended by section 13201 of the Omnibus Budget Reconciliation Act of 1990. The major purposes of the Act are to:

- measure more accurately the costs of credit programs;
- place the cost of credit programs on a budgetary basis equivalent to other Federal spending;
- encourage the delivery of benefits in the form most appropriate to the needs of beneficiaries; and
- improve the allocation of resources among credit programs and between credit and other spending programs.

040102. General. The policies set forth in this chapter apply to direct loan obligations and loan guarantee programs. The chapter provides implementing guidance for “Credit Apportionment and Budget Execution,” found within the Office of Management and Budget (OMB) Circular No. A-34. It also implements “Accounting for Direct Loans and Loan Guarantees,” Statement of Federal Financial Accounting Standards Number 2.

0402 STANDARDS

040201. Explanation. The specific accounting standards for each category type of loans, are discussed in the subsequent sections of this Volume. These standards concern the recognition and measurement of direct loans, the liability associated with loan guarantees, and the cost of direct loans and loan guarantees. (Figure 4-1 and 4-2 provides examples the credit reform cash flows for direct and guaranteed loans) The standards apply to direct loans and loan guarantees on a group basis, such as a cohort or a risk category, Section 0410 Credit Reform Accounts and Definitions, provides definitions for these categories. Present value accounting does not apply to direct loans or loan guarantees on an individual basis, except for a direct loan or loan guarantee that constitutes a cohort or a risk category.

040202. Accounting Standards

A. Post-1991 Direct Loans. Refers to direct loan obligations or made after the beginning of the fiscal year 1992, i.e., after October 1, 1991, and the resulting direct loans. Direct loans disbursed and outstanding are recognized as assets at the present value of their estimated net cash inflows. The difference between the outstanding principal of the loans and the present value of their net cash inflows is recognized as a subsidy cost allowance.

B. Post-1991 Guarantees. Refers to loan guarantee commitments made after the beginning of the fiscal year 1992, i.e., after October 1, 1991, and the resulting loan guarantees. For guaranteed loans outstanding, the present value of estimated net cash outflows of the loan guarantees is recognized as a liability. Disclosure is made of the face value of guaranteed loans outstanding and the amount guaranteed.

C. Subsidy Costs of Post-1991 Direct Loans and Loan Guarantees. For direct or guaranteed loans disbursed during a fiscal year, a subsidy expense is recognized. The amount of the subsidy expense equals the present value of estimated cash outflows over the life of the loans minus the present value of estimated cash inflows, discounted at the interest rate of marketable Treasury securities with a similar maturity term, applicable to the period during which the loans are disbursed (hereinafter referred to as the applicable Treasury interest rate).

1. For the fiscal year during which new direct or guaranteed loans are disbursed, the components of the subsidy expense of those new direct loans and loan guarantees are recognized separately among interest subsidy costs, default costs, fees and other collections, and other subsidy costs.

2. The interest subsidy cost of direct loans is the excess of the amount of the loans disbursed over the present value of the interest and principal payments required by the loan contracts discounted at the applicable Treasury rate. The interest subsidy cost of loan guarantees is the present value of estimated interest supplement payments.

3. The default cost of direct loans or loan guarantees results from any anticipated deviation, other than prepayments by the borrowers, from the payments schedule in the loan contracts. The deviations include delinquencies and omissions in interest and principal payments. The default cost is measured at the present value of the projected payment delinquencies and omissions minus net recoveries. Projected net recoveries include the amounts that would be collected from the borrowers at a later date, or the proceeds from the sale of acquired assets, minus the costs of foreclosing, managing, and selling those assets.

4. The present value of fees and other collections is recognized as a deduction from subsidy costs.

5. Other subsidy costs consist of cash flows that are not included in calculating the interest or default subsidy costs, or in fees and other collections. They include the effect of prepayments within contract terms.

D. Subsidy Amortization and Reestimation. The subsidy cost allowance for direct loans is amortized by the interest method using the interest rate that was originally used to calculate the present value of the direct loans when the direct loans were disbursed. The amortized amount is recognized as an increase (effective interest exceeds nominal interest) or decrease (nominal interest exceeds effective interest) in interest income. Nominal interest equals the nominal (face amount) of the loan times the stated interest rate. Effective interest equals the book value of the loan times the applicable Treasury interest rate.

1. Interest is accrued and compounded on the liability of loan guarantees at the interest rate that was originally used to calculate the present value of the loan guarantee liabilities when the guaranteed loans were disbursed. The accrued interest is recognized as interest expense.

2. The subsidy cost allowance for direct loans and the liability for loan guarantees are reestimated at the beginning of the fiscal year after the year of disbursements. Since the allowance or the liability represents the present value of the net cash outflows of the underlying direct loans or loan guarantees, the reestimation takes into account all factors that may have affected the estimate of each component of the cash flows, including prepayments, defaults, delinquencies, and recoveries. Any increase or decrease in the subsidy cost allowance or the loan guarantee liability resulting from the reestimates is recognized as a subsidy expense (or a reduction in subsidy expense). Reporting the subsidy cost allowance of direct loans (or the liability of loan guarantees) and reestimates by component is not required.

E. Criteria for Default Cost Estimates. The criteria for default cost estimates provided in this and the following paragraphs apply to both initial estimates and subsequent reestimates. Default costs are estimated and reestimated for each program on the basis of separate cohorts and risk categories. The reestimates take into account the differences in past cash flows between the projected and realized amounts and changes in other factors that can be used to predict the future cash flows of each risk category.

1. In estimating default costs, the following risk factors are considered: (1) loan performance experience; (2) current and forecasted international, national, or regional economic conditions that may affect the performance of the loans; (3) financial and other relevant characteristics of borrowers; (4) the value of collateral to loan balance; (5) changes in recoverable value of collateral; and (6) newly developed events that would affect the loan's performance. Improvements in methods to reestimate defaults are also considered.

2. Each credit program should use a systematic methodology, such as an econometric model, to project default costs of each risk category. If individual accounts with

significant amounts carry a high weight in risk exposure, an analysis of the individual accounts is warranted in making the default cost estimate for that category.

3. Actual historical experience of the performance of a risk category is a primary factor upon which an estimation of default cost is based. To document actual experience, a data base should be maintained to provide historical information on actual payments, prepayments, late payments, defaults, recoveries, and amounts written off.

F. Revenues and Expenses. Interest accrued on direct loans, including amortized interest, is recognized as interest income. Interest accrued on the liability of loan guarantees is recognized as interest expense. Interest due from the Treasury Department on uninvested funds is recognized as interest income. Interest accrued on debt to the Treasury Department is recognized as interest expense.

1. Costs for administering credit activities, such as salaries, legal fees, and office costs, that are incurred for credit policy evaluation, loan and loan guarantee origination, closing, servicing, monitoring, maintaining accounting and computer systems, and other credit administrative purposes, are recognized as administrative expense. Administrative expenses are not included in calculating the subsidy costs of direct loans and loan guarantees.

G. Pre-1992 Direct Loans and Loan Guarantees. The losses and liabilities of direct loans obligated and loan guarantees committed before October 1, 1991, are recognized when it is more likely than not that the direct loans will not be collected totally or that the loan guarantees will require a future cash outflow to pay default claims.

1. The allowance of the uncollectible amounts and the liability of loan guarantees should be reestimated each year as of the date of the financial statements. In estimating losses and liabilities, the risk factors discussed in the previous section should be considered. Disclosure is made of the face value of guaranteed loans outstanding and the amount guaranteed.

2. Restatement of pre-1992 direct loans and loan guarantees on a present value basis is permitted but not required.

H. Modification of Direct Loans and Loan Guarantees. The term modification means a Federal Government action, including new legislation or administrative action, that directly or indirectly alters the estimated subsidy cost and the present value of outstanding direct loans, or the liability of loan guarantees.

1. Direct modifications are actions that change the subsidy cost by altering the terms of existing contracts or by selling loan assets. Existing contracts may be altered through such means as forbearance, forgiveness, reductions in interest rates, extensions of maturity, and prepayments without penalty. Such actions are modifications unless they are

considered reestimates, or workouts as defined below, or are permitted under the terms of existing contracts.

2. Indirect modifications are actions that change the subsidy cost by legislation that alters the way in which an outstanding portfolio of direct loans or loan guarantees is administered. Examples include a new method of debt collection prescribed by law or a statutory restriction on debt collection.

3. The term modification does not include subsidy cost reestimates, the routine administrative workouts of troubled loans, and actions that are permitted within the existing contract terms. Workouts are actions taken to maximize repayments of existing direct loans or minimize claims under existing loan guarantees. The expected effects of work-outs on cash flows are included in the original estimate of subsidy costs and subsequent reestimates.

I. Modification of Direct Loans. With respect to a direct or indirect modification of pre-1992 or post-1991 direct loans, the cost of modification is the excess of the pre-modification value of the loans over their post modification value. The amount of the modification cost is recognized as a modification expense when the loans are modified.

1. When a post-1991 direct loan is modified, its existing book value is changed to an amount equal to the present value of the loan's net cash inflows projected under the modified terms from the time of modification to the loan's maturity. It is discounted at the original discount rate (the rate that is originally used to calculate the present value of the direct loans, when the direct loans were disbursed).

2. When a pre-1992 direct loan is directly modified, it is transferred to a financing account and its book value is changed to an amount equal to its post-modification value. Any subsequent modification is treated as a modification of post-1991 loans. When a pre-1992 direct loan is indirectly modified, it is kept in a liquidating account. Its bad debt allowance is reassessed and adjusted to reflect amounts that would not be collected due to the modification.

3. The changes in the book value of both pre-1992 and post-1991 direct loans, resulting from a direct or indirect modifications, normally have cost differences attributable to the use of different discount rates or different measurement methods. Reference Office of Management and Budget Circular A-34 dated December, 1995. Any difference between the change in book value and the cost of modification is recognized as a gain or loss. For post-1991 direct loans, the modification adjustment transfer paid or received to offset the gain or loss is recognized as a financing source (or a reduction in financing source).

J. Modification of Loan Guarantees. With respect to a direct or indirect modification of pre-1992 or post-1991 loan guarantees, the cost of modification is the excess of the post-modification liability of the loan guarantees over their pre-modification liability. The modification cost is recognized as modification expense when the loan guarantees are modified.

1. The existing book value of the liability of modified post-1991 loan guarantees is changed to an amount equal to the present value of net cash outflows projected under the modified terms from the time of modification to the loans' maturity. It is discounted at the original discount rate (the rate that is originally used to calculate the present value of the liability when the guaranteed loans were disbursed).

2. When a pre-1992 loan guarantee is directly modified, it is transferred to a financing account and the existing book value of the liability of the modified loan guarantees is changed to an amount equal to its post-modification liability. Any subsequent modification is treated as a modification of post-1991 loan guarantees. When a pre-1992 loan guarantee is indirectly modified, it is kept in a liquidating account. The liability of such loan guarantees is reassessed and adjusted to reflect any change in the liability resulting from the modification.

3. The change in the amount of liability of both pre-1992 and post-1991 loan guarantees resulting from a direct or indirect modification and the cost of modification will normally differ, due to the use of different discount rates or the use of different measurement methods. Any difference between the change in liability and the cost of modification is recognized as a gain or loss. For post-1991 loan guarantees, the modification adjustment transfer paid or received to offset the gain or loss is recognized as a financing source (or a reduction in financing source).

K. Disclosure. Disclosure is made in notes to financial statements to explain the nature of the modification of direct loans or loan guarantees, the discount rate used in calculating the modification expense, and the basis for recognizing a gain or loss related to the modification.

L. Foreclosure of Post-1991 Direct Loans and Guaranteed Loans. When property is transferred from borrowers to a federal credit program, through foreclosure or other means, in partial or full settlement of post-1991 direct loans or as a compensation for losses that the government sustained under post-1991 loan guarantees, the foreclosed property is recognized as an asset. The asset is recorded at the present value of its estimated future net cash inflows discounted at the original discount rate.

1. If a legitimate claim exists by a third party or by the borrower to a part of the recognized value of the foreclosed assets, the present value of the estimated claim is recognized as a special contra valuation allowance.

2. Upon the foreclosure of a guaranteed loan, a federal guarantor may acquire the loan involved. The acquired loan is recognized at the present value of its estimated net cash inflows from selling the loan or from collecting payments from the borrower, discounted at the original discount rate.

3. When assets are acquired in full or partial settlement of post-1991 direct loans or guaranteed loans, the present value of the government's claim against the borrowers is reduced by the amount settled as a result of the foreclosure.

M. Write-off of Direct Loans. When post-1991 direct loans are Written off, the unpaid principal of the loans is removed from the gross amount of loans receivable. Concurrently, the same amount is charged to the allowance for subsidy costs. Prior to the write-off, the uncollectible amounts should have been fully provided for in the subsidy cost allowance through the subsidy cost estimate or reestimates. Therefore, the write-off would have no effect on expenses.

0403 CREDIT REFORM FUND CONTROLS

040301. Fund Control. For credit programs, systems for administrative control of funds are required to:

A. Restrict both obligations and expenditures from each program account, financing account, and liquidating account to the lesser of:

1. The amounts available for administrative expenses, direct loan subsidies, direct loan levels, guaranteed loan levels, and any limitations specified in law; or

2. The amounts apportioned for the amounts specified above.

B. Enable the fixing of responsibility for an obligation or expenditure exceeding the categories specified above.

C. Simultaneously determine, at the obligation stage for direct loans and at the commitment stage for guaranteed loans, whether sufficient budget authority for the subsidy exists in the program account and whether a sufficient unused loan level limit exists in the financing account. The system for calculating obligations also must be capable of changing the subsidy calculation when the Treasury interest rate changes. (Rate changes do not affect obligated but undisbursed loans in the case of direct loans and committed but undisbursed loans in the case of guaranteed loans.)

040302. Antideficiency Act Violations. For direct loan, guaranteed loan, and financing accounts, Antideficiency Act violations, reportable to the President, through the Director of OMB, and to the Congress, include the following:

A. Overobligation or Overexpenditure of the Subsidy. This is any case where an officer or employee of the United States makes or authorizes an expenditure or creates or authorizes an obligation, including a commitment, that is in excess of (1) the direct loan subsidy or (2) the guaranteed loan subsidy.

Violations include modifications of direct loans or loan guarantees, such as forgiveness, forbearance, reductions in interest rate, prepayments without penalty, and extensions of maturity, that result in obligations in excess of apportioned unobligated balances or subsidy amounts.

B. Overobligation or Overexpenditure of the Credit Level Supportable by the Enacted Subsidy. This is any case where an officer or employee of the United States makes or authorizes an expenditure or creates or authorizes an obligation, including a commitment, that is in excess of the credit program level supportable by the enacted subsidy, regardless of whether the subsidy is positive or negative. This includes obligations or expenditures that are in excess of (1) the direct loan level, (2) the guaranteed loan level or (3) any limitations on the loan level or the Federal share of guaranteed loan levels.

C. Overobligation or Overexpenditure of the Amount Appropriated for Administrative Expenses. This is any case where an officer or employee of the United States makes or authorizes an expenditure or creates or authorizes an obligation, including a commitment, that is in excess of the amount appropriated for administrative expenses.

D. Obligation or Expenditure of the Lapsed Unobligated Balance of the Subsidy, Except to Correct Mathematical or Data Input Errors in Calculating Subsidy Amounts. This is any case where an officer or employee of the United States makes or authorizes an expenditure or creates or authorizes an obligation, including a commitment, against unobligated subsidy balances after the period of obligational authority has expired. Correction of mathematical or data input errors up to the amount of the lapsed unobligated balance of the subsidy are specifically exempted. Corrections of these errors in excess of the amount of the lapsed unobligated balance of the subsidy are violations.

0404 CREDIT APPORTIONMENT AND REAPPORTIONMENT

040401. Basis for Apportionment. Unless specifically exempted by the OMB, all program, financing, and liquidating accounts will be apportioned. The apportionment document signed by the responsible OMB officials and all attachments transmitted to the agency are a part of the apportionment, unless otherwise specified on the apportionment document.

040402. Timing of Requests. Initial apportionment requests for direct loans and guaranteed loans will be submitted to the OMB within 10 calendar days after the enactment of the appropriations act.

A. Requests for reapportionment will be submitted to the OMB as soon as a change in the previous apportionment becomes necessary due to changes in amounts provide current data on each available, program requirements, or other factors.

B. Reapportionment requests made specifically for reestimates due to a change in the Treasury rate (yield) between the time of obligation and the time of disbursement will be submitted to the OMB in the year following disbursement.

C. Reapportionment requests will be required for subsidy reestimates and modifications.

040403. Types of Apportionment. Credit accounts will be apportioned in the same manner as non-credit accounts. This means that the credit accounts may be apportioned by time periods or by categories, or by a combination of time periods and categories, as determined by the OMB.

040404. Reporting Format and Procedures. Unless otherwise specified by the OMB, an original and one copy of an apportionment form will be submitted to the OMB. The original will be signed by an officer duly authorized by the head of the agency.

A. Figure 4-3 provides an illustration of Standard Form 132. This form will be used for program accounts that contain credit administrative expenses for both direct loans and guaranteed loans:

0405 REPORTS ON BUDGET EXECUTION (SF133)

040501. Coverage. Unless otherwise specified by the OMB, reports on budget execution will be prepared by all agencies to provide current data on each credit account, whether or not apportioned. Expired accounts will be included on the same form as the unexpired account (or accounts) of the same title.

040502. Timing of Reports. Reports on credit execution will be submitted electronically through the Department of Treasury GOALS system, each quarter beginning with the second quarter of FY 1994, or such other time period specified by the OMB.

040503. Supporting Data. The execution reports will be accompanied by data supporting the various lines, including data on risk categories or financing tranches, whenever such data are required by OMB.

040504. Reporting Format and Procedures. For all liquidating accounts, continue to use Standard Form 133 (Figure 4-4).

040505. Number of Copies and Signature. An original and one copy of the appropriate version of the SF 133 or an approved substitute will be submitted directly to the OMB program division that has primary responsibility for reviewing the agency's budget. The original will be signed by an officer duly authorized by the head of the agency. Responsible agencies will also submit a copy of the reports to addresses that receive the Report on Budget Execution (Acct Rpt (M) 1176).

040506. Refunds. Refunds of obligations that were incurred erroneously in the current fiscal year will be netted against line 8, Obligations Incurred. Refunds of obligations incurred in prior fiscal years will be placed on line 4, Recoveries of Prior Year Obligations. These must be reapportioned before they can be used.

0406 DIRECT LOANS

040601. Direct Loan Apportionment and Reapportionment Schedule (SF132). This schedule (Figure 4-3) simultaneously apportions the direct loan program account and financing account.

040602. Recording Obligations, Disbursing Loans, and Reestimating Subsidies. Note that the subsidy is not recalculated at the time of loan disbursement. Rather, any change in estimated subsidy caused by an interest rate change is made at the beginning of the fiscal year after the fiscal year in which the loan is disbursed. If, at that time, the subsidy amount increases, a reapportionment request is needed to fund the increase. The permanent indefinite appropriation will be used to fund the increase. If the subsidy amount decreases, a payment will be made to a special fund receipt account.

040603. Reports on Execution--Direct Loans. Reports on Execution for direct loans will be reported on the SF133.

0407 GUARANTEED LOANS

040701. Guaranteed Loan Apportionment and Reapportionment Schedule (SF 133). This schedule (Figure 4-4) simultaneously apportions the guaranteed loan program account and financing account.

040702. Reports on Budget Execution--Guaranteed Loans. For the program account and for the financing account the Credit Execution reporting for guaranteed loans will be reported on the SF 133.

0408 COMPUTATION OF INTEREST EXPENSE AND INTEREST INCOME

040801. Procedures for Computing Interest Expense and Interest Income for Credit Financing Accounts. A simplified set of procedures has been developed to compute interest for direct loan and guaranteed loan financing accounts under credit reform. The procedures describe computations for: (1) interest expenses on borrowing from Treasury by financing accounts and (2) interest income on uninvested funds in financing accounts. The detailed computational processes have been divided into one set of modules for direct loans and a separate set of modules for guaranteed loans.

A. These computations may be used in lieu of the tranche accounting requirements prescribed by the OMB. If these procedures are used, the credit data base need only provide subdivisions for cohort and risk category. The modules have been designed to simplify these computations and enhance user understanding of the objectives of each major computation. These modules may be physically designed in any suitable configuration, as long as the principles which underlie the interest computations are not compromised.

B. In many instances, categories of disbursements and collections shown as line items in the modules are not critical to the computations as separate items or may not be applicable to all programs. Separate categories have been included to clarify the content of a collections or disbursements total. Consequently, the modules may be redesigned to summarize these categories, if the summary does not compromise the principles which underlie the computational requirements.

C. As a minimum, these new procedures must be applied to fiscal year 1994 transactions and year end balances for all credit reform cohorts. DoD Components may request Treasury Department approval to retroactively adjust FY 1992 and 1993 interest expense and income using these procedures.

D. The frequency of interest computations has been changed to require only annual computations of interest expense and income related to Treasury Department transactions.

040802. Instructions for Computations of Interest Expense and Interest Income for Direct and Guaranteed Loan Programs.

A. Background. Interest expense in a direct loan program results from borrowing from the Treasury Department. As each loan is disbursed by the financing account to the individual borrower, subsidy funds are transferred from the program account to the financing account. Consequently, each loan disbursement is financed by two sources--subsidy transfer and borrowing from the Treasury Department.

B. A single borrowing from the Treasury Department is made at the beginning of each fiscal year, separately for each cohort on the basis of the estimated net loan disbursements for the cohort. Interest expense accrues on the borrowing, and interest income accrues on the undisbursed balance of the Treasury Department borrowing. (The undisbursed balance of Treasury Department borrowing is held as uninvested funds and earns interest.) The interest rate earned on the uninvested funds equals the interest rate paid on borrowing from the Treasury Department.

040803. Frequency of Interest Computations. The OMB has determined that most credit programs do not have a seasonal bias in their loan disbursement patterns. Consequently, interest expense and income calculations for cohorts which are currently disbursing will be based on an assumption that the actual loan amounts disbursed during the year were disbursed equally throughout the four quarters. The assumption allows agencies to compute interest expenses and

interest income annually, at the end of each fiscal year, using the average annual interest rate provided by the OMB and the Treasury Department. Quarterly or monthly computations are no longer required. In those few programs that have a strong seasonal pattern, the OMB will calculate special weighted average interest rates appropriate to these patterns and will provide them to the agencies.

040804. Weighted Average Interest Rate. The Credit Reform Act provides that the interest rate for borrowing will be assigned on the basis of the Treasury rate in effect during the period of loan disbursement. Many individual loans are disbursed in segments over several quarters or even years. Consequently, several interest rates can be applicable to an individual loan. To simplify the recordkeeping, a single weighted average interest rate is maintained for each cohort and is adjusted each year, until all the disbursements from the cohort have been made. Each year the current year average annual interest rate is weighted by current year disbursements and merged with the prior year's weighted average to calculate a new weighted average. Details of these computations are provided in the examples following.

040805. Procedure for Computing Interest Expenses and Income Related to Borrowing for Direct Loan Programs. The interest income and expenses for a direct loan financing account are computed in a series of modules. The modules which follow have been logically divided to compute interest income and expense for identical bases, such as undisbursed borrowing. Disbursement or non-disbursement of amounts borrowed does not affect interest expense since all borrowing is dated October 1. However, disbursement status does affect the amount of borrowed cash retained in the financing account and consequently the computation of interest income. Components of interest income and expense are calculated separately in each module and then added in module 6. The modules are subdivided on the basis of the following characteristics:

- A. Interest expense for borrowing disbursed throughout the current year is partially offset by interest income on the delayed disbursement of cash borrowed (module 1).
- B. Interest expense for undisbursed borrowing is wholly offset by interest income on the undisbursed cash borrowed (module 2).
- C. Interest expense for borrowing disbursed in prior years is not offset by any interest income (module 3).
- D. Collections during the year accrue interest income as they are deposited into the financing account (module 5).

040806. Procedures for Guaranteed Loans. The basic purpose of a financing account for guaranteed loans is to accumulate funds to finance future defaults. Consequently, the

modules for guaranteed loans emphasize cash collections (mostly subsidy and fees) and the related interest Income on accumulated balances. Unlike the direct loan programs, subsidy transfers for guarantees are retained in the financing account for lengthy periods and earn interest income.

A. The methods of calculating the weighted average interest rate and interest income are not as exact as the methods for direct loans. The interest rate for cash accumulations related to each loan guarantee is determined by the date that the commercial lender (not the Federal agency) disburses the loan being guaranteed. Since this process can cause a variety of interest rates in each cohort, averages are used similar to direct loans.

B. Program agencies must rely on lender reporting for this information. Consequently, the interest income settlements with the Treasury Department, at the end of the fiscal year, will include an estimate of fourth quarter lender disbursements and collections because of delayed reporting. The estimate will be adjusted as actual lender data is accumulated.

C. While guaranteed loan financing cohorts are oriented toward cash accumulation, it is possible (although rare) for temporary net borrowing from the Treasury Department to become necessary. Under these circumstances, the guaranteed loan modules still should be used, but negative signs in modules 3 and 4 would indicate borrowing in lieu of cash balance and interest expense in lieu of interest income.

**DIRECT LOAN PROGRAM INTEREST COMPUTATION
MODULE 1**

Determine interest expense on disbursed borrowing for the current year and interest income earned, on the amount borrowed, prior to disbursement of the borrowing.

EXAMPLE

1. Total loans disbursed in current year	1,050,000
2. Subsidy payments received during current year for new direct loan disbursements	50,000
3. Net loan disbursements for current year	1,000,000
4. Working capital disbursements for current year	10,000
5. Borrowing from Treasury related to reestimates and modifications - current year	-0-
6. Total borrowing from Treasury for disbursements made during current year	1,010,000
7. Average annual interest rate, current year	.0700
8. Time factor for income	.5
9. Interest income - current year uninvested funds	35,350
10. Interest expense - current year disbursed borrowing	70,700

INSTRUCTIONS

ITEM 1: Total loans disbursed during current fiscal year from the cohort.

ITEM 2: Enter the total subsidy payments for new direct loan disbursements that were or should have been paid by the program account to the financing account for the cohort during the current fiscal year. (Payments related to reestimates and modifications are recorded in item 5.)

ITEM 3: Net loan disbursements, difference between item 1 and item 2.

ITEM 4: Any disbursements from the cohort during the current fiscal year for working capital disbursements.

ITEM 5: Enter the sum of gross payments made by the financing account during the current fiscal year, to: (1) the special fund receipt account, (2) the liquidating account, or (3) the general fund. These payments are related to downward subsidy cost reestimates or to modifications. (Note that gross collections are recorded in module 5.) This sum includes negative subsidy cost payments, modification adjustment transfers, and payments to acquire loans from the liquidating account or to compensate the liquidating account for losses.

ITEM 6: The sum of item 3 plus item 4 plus item 5.

ITEM 7: Average annual rate, current year.

ITEM 8: Time factor. Use .5 as a constant. This factor assumes that disbursements were made in an equal amount throughout the year.

ITEM 9: Interest income. (Item 6 x item 7 x item 8.)

ITEM 10: Interest expense for disbursed funds. Item 6 times item 7. Since funds were borrowed on October 1, the assumed time period is one year.

**DIRECT LOAN PROGRAM INTEREST COMPUTATIONS
MODULE 2**

Determine interest income and interest expense on unused borrowing.

EXAMPLE

1. Undisbursed borrowing balance, end of prior year	90,000
2. Borrowing during current year (retroactive to Oct. 1)	1,120,000
3. Total adjusted gross borrowing balance, current year	1,210,000
4. Net loan disbursements, current year (module 1)	1,000,000
5. Non-loan disbursements, current year (module 1)	10,000
6. Preliminary undisbursed borrowing balances, end of year	200,000
7. Average annual interest rate, current year	.0700
8. Interest income-unused borrowing balance	14,000
9. Interest expense-unused borrowing balance	14,000

INSTRUCTIONS

ITEM 1: Final undisbursed borrowing balance from Treasury, at end of prior fiscal year for the cohort. See module 7, item 9 from prior year.

ITEM 2: New borrowing during current fiscal year for the cohort. All borrowing during the year is dated retroactively to October 1.

ITEM 3: Sum of items 1 plus 2.

ITEM 4: Net loan disbursements, current year from module 1, item 3.

ITEM 5: Non-loan disbursements, current year (item 4 plus item 5 from module 1).

ITEM 6: Item 3 less item 4 less item 5. This balance is preliminary, as explained in module 7.

ITEM 7: Average annual interest rate, current year.

ITEM 8: Interest income from unused borrowing. Item 6 x item 7 (x 1 year).

ITEM 9: Interest expense from unused borrowing. Item 6 x item 7 (x 1 year).

**DIRECT LOAN PROGRAM INTEREST COMPUTATIONS
MODULE 3**

Determine interest expense on prior year borrowing that was disbursed in prior years.

EXAMPLE

1. Debt with Treasury, end of prior year	990,000
2. Undisbursed debt, end of prior year (module 2)	90,000
3. Adjusted debt, prior year disbursements	900,000
4. Weighted average interest rate, end of prior year (module 4)	.0500
5. Annual interest expense, prior year debt	45,000

INSTRUCTIONS

ITEM 1: Debt with Treasury at the end of the prior fiscal year (see module 8).

ITEM 2: Portion of debt at the end of the prior year that did not finance disbursements, nor was repaid to Treasury.

ITEM 3: Item 1 minus item 2.

ITEM 4: Weighted average interest rate as of the end of the prior year as computed in prior year's module 4.

ITEM 5: Annual interest expense for prior year borrowing, item 3 x item 4 (x 1 year).

**DIRECT LOAN PROGRAM
MODULE 4**

Compute new weighted average interest rate as of the end of the current year.

EXAMPLE

	Cumulative to End of Prior Year	Current Year	Total
1. Net loan disbursements	11,000,000	1,000,000	12,000,000
2. Interest rate	.0500	.0700	N/A
3. Annual Interest amount	550,000	70,000	620,000
4. Revised weighted average interest rate, end of current year			.0517

INSTRUCTIONS

ITEM 1: Enter in column 1 the cumulative net loan disbursements from the inception of the cohort to the end of the prior fiscal year. Enter net loan disbursements for the current fiscal year per module 1 in column 2, and the total in column 3.

ITEM 2: Enter in column 1 the weighted average interest rate from module 4 of prior year. Enter In column 2 the average annual Interest rate for the current year.

ITEM 3: Product of item 1 x item 2 to obtain a nominal annual interest. Add products in first two columns and post result to third column (total).

ITEM 4: New weighted average rate. In total column, item 3 divided by item 1, computed to four decimal places.

DIRECT LOAN PROGRAM MODULE 5

Determine current year collections (unrelated to new borrowing) and compute the related interest income.

EXAMPLE

1. Collections of loan principal--current year	100,000
2. Collections of interest from borrowers--current year	187,500
3. Collections of fees--current year	10,000
4. Other collections from the public--current year	2,500
5. Collections from budgetary accounts for reestimates and modifications--current year	-0-
6. Total collections--current year	300,000
7. Weighted average interest rate, end of current year	.0517
8. Time factor	05
9. Interest Income--current year collections	7,755

INSTRUCTIONS

ITEM 1: Collections of loan principal--current year. Summary of collections deposited during the year which derive from principal repayments by borrowers.

ITEM 2: Collections of Interest from borrowers--current year. Summary of collections deposited during the year which derive from Interest payments by borrowers.

ITEM 3: Collection of fees--current year. Summary of collections deposited during the year which derive from fees paid by the borrower at any time during the loan process.

ITEM 4: Other collections from public--current year. Summary of collections deposited during the year from the public other than items 1 through 3. Do not include subsidies in these collections.

ITEM 5: Enter the sum of gross collections received by the financing account, during the current fiscal year (unrelated to new borrowing), from: (1) the program account, (2) the liquidating account or (3) the general fund. These collections are related to upward subsidy cost reestimates or modifications. They include subsidy cost, modification adjustment transfers, and collections from the liquidating account to offset cost savings. (Gross payments are recorded in Module 1).

ITEM 6: Total collections. Sum of items 1 through 5.

ITEM 7: Revised weighted average interest rate--end of current year (see module 4).

ITEM 8: Use .5, which assumes equal collection throughout the year.

ITEM 9: Interest Income--current year collections. Product of Item 6 x item 7 x item 8.

**DIRECT LOAN PROGRAM INTEREST COMPUTATIONS
MODULE 6**

Determine total interest Income due from Treasury and Interest expenses payable to Treasury.

EXAMPLE**Interest Income Summary**

1. Interest income module 1	35,350
2. Interest income module 2	14,000
3. Interest income module 5	<u>7,755</u>
Total interest income from Treasury	57,105

Interest Expense Summary

1. Interest expense module 1	70,700
2. Interest expense module 2	14,000
3. Interest expense module 3	<u>45,000</u>
Total interest expense to Treasury	129,700

INSTRUCTIONS

Obtain income and expense items from each module and sum the results.

**DIRECT LOAN PROGRAM INTEREST COMPUTATION
MODULE 7**

Determine amount of annual principal repayment to Treasury.

EXAMPLE

1. Total collections current year (module 5)	300,000
2. Interest income from Treasury (module 6)	57,105
3. Total collections available for transfer	357,105
4. Transfers to working capital funds, current year	10,000
5. Interest expense to Treasury (module 6)	9,700
6. New borrowing for Interest shortfall	-0-
7. Net funds available for principal repayment	217,405
8. Preliminary undisbursed borrowing balance at end of current year	200,000
9. Final undisbursed borrowing balance (amounts to be carried forward for future year disbursements)	100,000
10. Annual principal repayment to Treasury	317,405

INSTRUCTIONS

ITEMS 1, 2, AND 5: Obtain amounts from other modules as indicated.

ITEM 3: Sum of items 1 and 2.

ITEM 4: Total transfers to working capital funds during current year.

ITEM 6: If items 4 plus 5 are less in absolute value than item 3, enter a zero. If items 4 plus 5 are greater in absolute value than item 3, enter the exact amount of the difference as a positive number. Scheduled interest must be paid to the Treasury Department even if from new borrowing.

ITEM 7: Item 3 plus item 6 minus items 4 and 5.

ITEM 8: Enter any borrowing which remains undisbursed as of the end of the current year (from module 2).

ITEM 9: Enter any amounts which agency decides should be carried forward to the next fiscal year for future loan disbursements. This amount will be used in the next year's module 2, item 1. In the example, the agency decided to retain half of the preliminary balance.

ITEM 10: Item 7 plus item 8 minus item 9. This amount will be transferred on an SF-1151.

**DIRECT LOAN PROGRAM INTEREST COMPUTATIONS
MODULE 8**

Determine debt to Treasury at end of current fiscal year.

EXAMPLE

1. Debt to Treasury, end of prior year (module 8--prior year)	990,000
2. New borrowing for interest shortfall (module 7)	-0-
3. Borrowing during current year (module 2)	1,120,000
4. Annual principal repayment to Treasury (module 7)	317,405
5. Debt to Treasury end of year	1,792,595

INSTRUCTIONS

ITEMS 1-4: Enter amounts from other modules as indicated.

ITEM 5: Sum of Items 1+2+3 minus item 4.

**GUARANTEED LOAN PROGRAM INTEREST INCOME AND EXPENSE
COMPUTATIONS
MODULE 1**

Compute revised weighted average interest rate as of end of current year.

EXAMPLE

	Cumulative to End of Prior Year	Current Year	Total
1. Lender disbursements	900,000	100,000	1,000,000
2. Interest rate	.06	.07	--
3. Annual Interest amount	54,000	7,000	61,000
4. Revised weighted average interest rate		.0610	

INSTRUCTIONS

ITEM 1: Enter cumulative lender disbursements from the inception of the cohort to the end of the current year in column 1; lender disbursements during the current year in column 2; and their total in column 3.

ITEM 2: Enter the weighted average Interest rate as of the end of the previous year In column 1 (from module 1 of previous year) and enter the current year average annual interest rate in column 2.

ITEM 3: Multiply items 1 x 2 in the first two columns to compute nominal annual Interest. Add these amounts and post results to column 3.

ITEM 4: Divide item 3 (total column) by item 1 (total column) to compute revised weighted average interest rate. Show to four decimal places.

**GUARANTEED LOAN PROGRAM INTEREST INCOME AND EXPENSE
COMPUTATIONS
MODULE 2**

Compute Interest Income on current year transactions.

EXAMPLE

1. Net transfers from budgetary accounts to financing account during current year	4,000
2. Other deposits to financing account during current year	1,000
3. Total deposits during current year	5,000
4. Disbursements from financing account to the public during current year	2,000
5. Working capital disbursements during current year	0
6. Net collections during current year, or	3,000
7. Net disbursements during current year	0
8. Current year average Interest rate	.07
9. Time factor	.5
10. Interest income for current year transactions, or	105
11. Reduction in interest income for current year transactions	0

INSTRUCTIONS

ITEM 1: Enter the total net amount that was or should have been paid by budgetary accounts to the financing account for the cohort during the current fiscal year (except interest and debt transactions). This should include initial subsidy payments, reestimates, modifications, modification adjustment transfers and transactions with the liquidating account to acquire loan guarantees or to offset losses or savings. The total is the amount collected, net of payments by the financing account to budgetary accounts. It should include transactions with the program account, the special fund receipt account, the liquidating account and the general fund.

ITEM 2: Enter other deposits to the financing account during the current year from fees, etc., but exclusive of interest income earned on uninvested funds.

ITEM 3: Sum of items 1 and 2.

ITEM 4: Enter total disbursements from the financing account during the current year, to the public for default payments, interest supplements, etc.

ITEM 5: Enter any disbursements from the cohort during the fiscal year for working capital purposes.

ITEM 6: Enter net of item 3 minus sum of Items 4 and 5 (if Item 3 Is greater than items 4 and 5), otherwise enter 0.

ITEM 7: Enter net of Items 4 plus 5 minus Item 3 (if items 4 plus 5 Is greater than item 3), otherwise enter 0.

ITEM 8: Enter current year average annual interest rate.

ITEM 9: Enter time factor of .5.

ITEM 10: Enter product of items 6 x 8 x 9.

ITEM 11: Enter product of Items 7 x 8 x 9.

**GUARANTEED LOAN PROGRAM INTEREST INCOME AND EXPENSE
COMPUTATIONS
MODULE 3**

Compute Interest income on prior year balances.

EXAMPLE

1. Adjusted cash balance in financing account, beginning of current year	100,000
2. Weighted average interest rate, beginning of current year	.0600
3. Time factor	1.0
4. Interest income on prior year balance	6,000

INSTRUCTIONS

ITEM 1: Enter adjusted cash balance in financing account as of the beginning of the current year (see module 4 of previous year for original computation).

ITEM 2: Enter weighted average Interest rate as of the beginning of current year.

ITEM 3: Item factor of 1.0 years.

ITEM 4: Product of Item 1 x 2 x 3.

**GUARANTEED LOAN PROGRAM INTEREST INCOME AND EXPENSE
COMPUTATIONS
MODULE 4**

Compute year end cash balance.

EXAMPLE

1. Adjusted cash balance In financing account, beginning of year	100,000
2. Interest Income on prior year balance (module 3)	6,000
3. Interest Income (+) or reduction in interest income (-) for current year transactions (module 2)	105
4. Total Interest Income	6,105
5. Net collections (+) or disbursements (-) for current year (module 2)	3,000
6. Adjusted cash balance in financing account end of year	109,105

INSTRUCTIONS

ITEM 1: Enter adjusted cash balance in financing account at beginning of current year (item 6 of previous year).

ITEM 2: Enter interest income on prior year balance from module 3.

ITEM 3: Enter interest income on current year transactions as a positive value or reduction In interest Income as a negative value (module 2).

ITEM 4: Enter the sum of item 2 and the plus or minus value in item 3.

ITEM 5: Enter net collections or disbursements for current year from module 2.

ITEM 6: Enter sum of items 1, 4 and 5.

0409 STANDARD GENERAL LEDGER (SGL) ACCOUNTS**040901. Credit Reform Accounts and Definitions.**

The following accounts were established by the Treasury Department to implement requirements of the Federal Credit Reform Act of 1990 and are intended to account for direct and guaranteed loans. These accounts will be included with those general ledger accounts currently in Volume 1, “General Financial Management Information, Systems, and Requirements,” Chapter 7, “Department of Defense Standard General Ledger,” Addendum 2, “Department of Defense Accounting/Sub-Account Descriptions.”

1399 Allowance for Subsidy. Credit Balance. This amount reflects the unamortized credit reform subsidy for direct loans and for defaulted guaranteed loans assumed for collection by the government. It appears in the financing fund of the direct loan, or loan guarantee, program involved and is subtracted from loans receivable (account 1350) on the statement of financial position. All transactions that affect the subsidy will be recorded in this account.

1921 Receivable from Appropriations. Debit Balance. The amount to be received from appropriations to fund current or future expenses for which the appropriations are already authorized by law.

1922 Borrowings Receivable from Treasury. Debit Balance. The amount of cash to be received for loan programs through borrowing from the Treasury.

2180 Loan Guarantee Liability. Credit Balance. This account is in the financing fund for loan guarantee programs. All transactions that affect the subsidy for loan guarantees will be recorded in this account. It represents the expected present value of cash flows to, and from, the government from loan guarantees.

2930 Liability for Borrowings to be Received. Credit Balance. The estimated amount of funds that an agency can borrow from Treasury to cover the cost of loans to be disbursed.

2950 Liability for Subsidy Related to Undisbursed Loans. Credit Balance. The amount of subsidy owed by the financing fund for direct and guaranteed loans which have not been disbursed. This liability will be liquidated when the loan is disbursed. If the loan is not disbursed, the accrued subsidy must be removed from the financing fund.

2970 Resources Payable to Treasury. Credit Balance. Liquidating Fund assets in excess of liabilities that are being held as working capital. After liquidating all liabilities, these funds will be returned to Treasury.

4001 Anticipated Total Resources. Debit Balance. The account used (for year-end closing) to consolidate the total amount of resources expected to be received by the financing fund from all

sources (program fund receipts, borrowing from Treasury, collections of principal, and collections of loan interest).

4042 Anticipated Borrowing Authority. Debit Balance. The anticipated authority that permits a federal agency to incur obligations, and make payments, for specific purposes out of monies borrowed from Treasury.

4044 Anticipated Reductions to Borrowing Authority. The estimated amounts of reductions during the fiscal year to borrowing authority.

4047 Anticipated Payments to Treasury. Credit Balance. The anticipated amounts to be paid to Treasury to transfer pre-1992 resources or to repay borrowing under credit reform.

4060 Anticipated Collections from Non-Federal Sources. Debit Balance. The amount anticipated to be collected from non-Federal sources in the current fiscal year for loan programs (fees, loan principal, loan interest, rent, and proceeds from the sale of collateral).

4070 Anticipated Collections from Federal Sources. Debit Balance. The amount anticipated to be collected from Federal sources in the current fiscal year for loan programs (actual program fund subsidy-current, actual program fund subsidy - permanent, and interest from Treasury).

4115 Loan Subsidy Appropriation-Definite-Current. Debit Balance. The amount of definite current budget authority appropriated by law for loan subsidies in direct loan and loan guarantee programs.

4116 Entitlement Loan Subsidies Appropriation-Indefinite. Debit Balance. The amount of indefinite budget authority appropriated for subsidies in loan entitlement programs.

4117 Loan Administrative Expense Appropriation-Definite- Current. Debit Balance. The amount of definite current budget authority appropriated by law for administrative expenses in direct loan and loan guarantee programs.

4118 Re-estimated Discretionary Loan Subsidy Appropriation- Indefinite - Permanent. Debit Balance. The amount of indefinite permanent budget authority appropriated for direct loan and loan guarantee subsidies based upon reestimates.

4121 Loan Subsidy Appropriation-Indefinite-Current. Debit Balance. The amount of current indefinite budget authority appropriated to the program fund for loan subsidies in direct loan and loan guarantee programs.

4147 Actual Payments to Treasury. Credit Balance. The amounts paid to the Treasury Department to transfer pre-1992 resources, or to repay borrowings, under credit reform.

4201 Total Actual Resources. Debit Balance. The account is used to consolidate the total amount of actual resources received from all sources.

4261 Actual Collection of Fees. Debit Balance. The total amount of fees received from non-Federal sources during the year for loan programs.

4262 Actual Collection of Loan Principal. Debit Balance. The total amount of loan principal received from non-Federal sources during the year for loan programs.

4263 Actual Collection of Loan Interest. Debit Balance. The total amount of loan interest received from non-Federal sources during the year for loan programs.

4264 Actual Collection of Rent. Debit Balance. The total amount of rent received from non-Federal sources during the year for loan programs.

4265 Proceeds from Collateral. Debit Balance. The amount received from the sale of collateral.

4266 Other Actual Collections. Debit Balance. The total amount of collections from non-Federal sources received during the year by direct loan programs for which a specific SGL account is not otherwise required.

4271 Actual Program Fund Subsidy-Definite-Current. Debit Balance. The amount of current definite subsidy received during the year by the financing fund from the program fund for loan programs.

4272 Actual Program Fund Subsidy-Indefinite-Permanent. Debit Balance. The amount of permanent indefinite subsidy received during the year by the financing fund from the program fund for the loan program.

4273 Interest from Treasury. Debit Balance. The amount of interest received during the year by the financing fund from Treasury for loan programs.

4274 Actual Program Fund Subsidy-Indefinite-Current. Debit Balance. The amount of current indefinite subsidy received during the year by the financing fund from the program fund for direct loan and loan guarantee programs.

4275 Actual Receipts from Liquidating Accounting. Debit Balance. The amount the financing fund receives during the year from the liquidating account for assuming pre-credit reform loan guarantees for which the terms have been modified.

4276 Actual Collections from Financing Fund. Debit Balance. The amount the liquidating fund receives from the financing fund during the year for transfers of modified direct loans to the financing fund.

5799 Adjustment of Appropriated Capital Used. Debit Balance. The amount of adjustment to financing sources in the program fund to reflect the amount of excess subsidy funds returned to Treasury by the financing fund.

6199 Excess Subsidy Returned. Credit Balance. The amount of adjustment to subsidy expense in the program fund to reflect the amount of excess subsidy funds returned to Treasury by the financing fund as a result of a reestimate.

8010 Guaranteed Loan Level. Debit Balance. The amount of guaranteed loan commitments; supportable by the subsidy budget authority of new commitments, or in the case of negative subsidies, the amount authorized by appropriation acts.

8015 Guaranteed Loan Level-Unapportioned. Credit Balance. The amount of guaranteed loan level not yet apportioned by OMB.

8020 Guaranteed Loan Level-Appportioned. Credit Balance. The amount of category A and B guaranteed loan level that is available for allotment.

8025 Guaranteed Loan Level-Allotted and Available to Lenders. Credit Balance. The amount of category A and B guaranteed loan level allotted to program managers for which commitments may be made this period to lenders.

8030 Guaranteed Loan Level-Administrative Commitments Prior to Signing Contracts. Credit Balance. The amount of category A and B guaranteed loan level committed in anticipation of signing a contract.

8035 Guaranteed Loan Level-Contract Signed-Undisbursed by Lenders. Credit Balance. The amount of category A and B contracts for guaranteed loans that will be disbursed by a lender.

8040 Guaranteed Loan Level-Disbursed by Lenders. Credit Balance. The amount of category A and B guaranteed loan principal disbursed by the lender.

8045 Guaranteed Loan Level-Unused Authority. Credit Balance. The amount of category A and B guaranteed loan level for which contracts have not been signed.

8050 Guaranteed Loan Principal Outstanding. Credit Balance. The amount of guaranteed loan principal outstanding with the lender. At the end of the year accounts 8053 through 8068 are closed to this account.

8053 Guaranteed Loan New Disbursements by Lender. Credit Balance. The amount of guaranteed loan principal disbursed during the current year by lenders.

8056 Guaranteed Loan Repayments and Prepayments. Debit Balance. The amount paid during the current year by the borrower to the lender as principal repayment and prepayment of guaranteed loans.

8059 Guaranteed Loan Default-Loan Acquired. Debit Balance. The amount of guaranteed loan principal reduced by termination for default this current year that leads to the acquisition of a loan receivable by the agency.

8062 Guaranteed Loan Default-Property Acquired. Debit Balance. The amount of guaranteed loan principal reduced by terminations for default this current year that leads to the acquisition of property by the Agency.

8065 Guaranteed Loan Default-Claim Payment Only. Debit Balance. The amount of guaranteed loan principal reduced by termination for default this current year that leads to claim payments by the agency that does not result in the acquisition of a loan receivable or property.

8068 Guaranteed Loan Adjustments. Debit or Credit Balance. The amount of guaranteed loan principal reduced, or increased, this current year by reasons other than repayment or default, i.e., outstanding principal balances of guaranteed loans transferred to or received from other accounts.

8070 Guaranteed Loan Principal to be Collected. Debit Balance. The amount of guaranteed loan principal outstanding with the lender.

0410 Credit Reform Definitions04101. Credit Reform Accounts and Definitions.

Cohort. Direct loans obligated or loan guarantees committed by a program in the same year, even if disbursements occur in subsequent years or the loans are modified. Modified pre-1992 direct loans will constitute a single cohort; modified pre-1992 loan guarantees will constitute a single cohort. For loans subsidized by no-year or mullet-year appropriations, the cohort may be defined by the year of obligation.

Direct Loan. A disbursement of funds by the Government to a non-Federal borrower under a contract requiring repayment of such funds with or without interest. The term includes the purchase of, or participation in, a loan made by a non-Federal lender. It also includes the sale of a Government asset on credit terms of more than 90 days duration.

Financing Account. The non budget account or accounts associated with each credit program account for post-1991 direct loans or loan guarantees. It holds balances, receives the subsidy cost payment from the credit program account, and includes all other cash flows to and from the Government. All credit programs require financing accounts. Separate financing accounts are required for direct loans and loan guarantees even if the subsidy costs for both are provided in the same appropriation. For new credit programs, a written request must be sent to the Department of the Treasury Financial Management Service before account symbols are established for the loan financing accounts. Financing accounts are usually established as revolving funds in the public enterprise fund group series 4000-4499. As part of the loan guarantee contract, a agency may be required to provide an interest differential to the non-Federal lender. These interest supplement payments are recorded in the financing account and disbursed to non-Federal lenders.

Financing Tranche. All direct or guaranteed loans with a cohort, separately identified by risk category, that are disbursed in the same quarter and have the same maturity interval. All borrowing from Treasury and all interest earned on uninvested funds from Treasury for a given financing tranche will be at the same interest rate (yield). The use of financing tranches is optional.

Liquidating Account. The budget account that includes all cash flows to and from the Government resulting from pre-1992 direct loans or loan guarantees. Cash flows associated with modified direct loans and loan guarantees are treated as exceptions. The liquidating accounts are the “old” credit accounts, whose transactions are counted on a cash basis in calculating budget outlays and the deficit. Liquidating accounts are not subject to credit reform accounting except for the effect of modifications. If the liquidating account receives collections in excess of the account liability, the collections are returned to Treasury via an SF 1151: Non-Expenditure Transfer Authorization as a capital transfer. The excess collections are returned to the miscellaneous receipt account “2814” preceded by the agency’s two-digit department code.

Loan Guarantee. Any guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender. It does not, however, include the insurance of deposits, shares, or other withdrawable accounts in financial institutions. When a pre-1992 loan guarantee is modified it becomes subject to credit reform accounting. The guarantee liability is transferred from the liquidating account to the financing account. A one-time adjusting payment is made from the liquidating account to the financing account. Subsequent cash flows will be recorded directly to the financing account. When a loan guarantee is in default, the defaulted loan claim of the non-Federal lender is paid from the financing account.

Modifications. Any Government action that alters the estimated subsidy cost, compared to the estimate contained in the most recent budget submitted to Congress, of an outstanding direct loan (or direct loan obligation) or an outstanding loan guarantee (or loan guarantee commitment). Action permitted within the terms of an existing contract are the only exception. Modifications to pre-1992 direct loans and loan guarantees are included in this definition, as well as modifications to post-1991 direct loans and loan guarantees. For pre-1992 direct loans and loan guarantees, the loan asset or guarantee liability will be transferred from the liquidating account the appropriate financing account. A one-time adjusting payment will be made between the liquidating and financing accounts. The subsequent cash flows will be recorded in the financing account.

Post-1991. Direct loan obligations or loan guarantee commitments made on or after October 1, 1991, and the resulting direct loans or loan guarantees.

Pre-1992. Direct loan obligations or loan guarantee commitments made prior to October 1, 1991, and the resulting direct loans or loan guarantees.

Program Account. The budget account into which an appropriation to cover the subsidy cost of a direct loan or loan guarantee program is made and from which such cost is disbursed to the financing account. Usually, a separate amount for administrative expenses is also appropriated to the program account. Each program account is associated with one or two financing accounts, depending on whether the program account makes both direct loans and loan guarantees. The program account pays subsidies to the financing account for post-1991 direct loans and loans guarantees, for modifications, and for reestimates. These subsidy payments are counted in calculating budget outlays and the deficit

Reestimates. The recalculation of the subsidy cost of each risk category within a cohort of direct loans or guaranteed loans. Reestimates must be made at the beginning of each fiscal year following the year in which the initial disbursement was made and as long as the loans are outstanding, unless a different plan is approved by OMB.

Subsidy. The estimated long-term cost to the Government of a direct loan or loan guarantee, calculated on a net present value basis, excluding administrative costs. In net present value terms it is the portion of the direct loan disbursement that the Government does not expect to recover, or the portion of expected payments for loan guarantees that will not be offset by collections. The subsidy may be for post-1991 direct loan obligations or loan guarantee commitments, for reestimates of post-1991 loans or guarantees or for modifications of any direct loan or loan guarantees. When the estimated subsidy is negative, an amount equal to the negative subsidy will be paid from the financing account to a special fund receipt account for that program when the loan guarantee is disbursed. If a subsidy reestimate for a cohort is negative, the amount of that reestimate is recorded in the same way.

Uninvested balance. The fund balance with Treasury that is held by the financing account, including undisbursed borrowings and offsetting collections. This balance earns interest from Treasury as determined by the weighted-average interest rate for each specific maturity range within the financing account.

Special Fund Receipt Accounts. Treasury requires written request prior to establishing account symbols for special fund receipt accounts, which will collect negative subsidies and downward reestimates. These unavailable receipt symbols are classified in special fund receipt series.

Miscellaneous Receipts Accounts. This account is automatically established by Treasury for interest payments. Detailed reporting instruction applicable to this account can be found in the “Treasury Reporting Instructions for Credit Reform Legislation, paragraph 4620.40 preceded by the agency 2-digit department code.

Subclassed Accounts. Subclassed Accounts are existing fund symbols preceded by a 2-digit prefix, used to distinguish certain transactions (for instance, [95]99X4200, [85]99X4200, and [65]99X4200). Subclassed are used when repaying or borrowing funds to/from the Treasury on an SF 1151: Nonexpenditure Transfer Authorization. Subclassed accounts are also used to record payment of subsidy appropriations from the program account to the financing account on an SF 224: Statement of Transactions. The subclasses are:

1. Principal Borrowing - 95
2. Principal Repayment - 85
3. Subsidy Payment - 65

Interest Rates. Interest rates for Credit Reform subsidy calculations, budget execution, borrowing, uninvested funds and working capital balances can be obtained from the Department of Commerce Economic Bulletin Board (EEB). New interest rates are posted to the EEB each quarter by Treasury and are used for agency computations during the quarter. These rates remain fixed for one quarter and are categorized with the following maturity intervals:

1. 0 years, up to and including 1 year.
2. Over 1 year, up to but not including 5 years.
3. 10 years, up to but, not including 20 years
4. 20 years and longer.

The rate used for subsidy calculations, borrowing and interest on uninvested funds must be for a maturity comparable to the maturity of the direct or guaranteed loan being made. However, working capital balances will earn interest on the rate specified for “0 years, up to and including 1 year”.

Borrowings and Repayments from Treasury. The Credit Reform Act of 1990 provides financing accounts with indefinite authority to borrow from Treasury. To streamline agency activity, agencies will borrow from Treasury, once a year, an amount that reflect estimated yearly requirements (based on figures used to calculate the subsidy appropriation, unless better estimates are available). The borrowing will be dated the first day of the fiscal year, October 1. If necessary, agencies may initiate another borrowing (during the fiscal year) for an additional amount, which will also be dated October 1.

If an agency has insufficient funds to make an annual interest payment to Treasury at year end, an additional borrowing should be initiated. This borrowing will be dated September 30 and will carry the same maturity date as the original borrowing. Using the September 30 date will alleviate the recalculation of the interest payment due to the Treasury and the amount of interest to be paid on uninvested funds.

Certification. When requesting a borrowing, each SF 1151 must contain an agency certification stating that the borrowing is necessary to meet the estimated annual cash requirements and is based upon the most reliable data available. This statement must be included within the body of the SF 151 document.

Authority. In this block, the legislative authorization for the borrowing transaction should be cited. For borrowings subject to Part 2, Chapter 4600, of the Treasury Reporting Instruction for Credit Reform Legislation, reference Public Law 101-508, 104 Stat. 1388-613.

Signature. Borrowing transaction will be approved and signed by the Financial Management Branch. Repayments will be approved and signed by the authorized agency representative.

Pre-Modification Value. is the present value of the net cash inflows of direct loans. It is estimated at the time of modification under pre-modification terms. It is discounted at the interest rate applicable to the time when the modification occurs on marketable Treasury securities that have a comparable maturity to the remaining maturity of the direct loans under pre-modification terms (simply stated, the pre-modification terms at the current rate).

Post-Modification Value. is the present value of the net cash inflows of direct loans. It is estimated at the time of modification under post-modification terms. It is discounted at the interest rate applicable to the time when the modification occurs on marketable Treasury securities that have a comparable maturity to the remaining maturity of the direct loans under post-modification terms (simply stated, the post-modification terms at the current rate).

OMB instructions provide that if the decrease in book value exceeds the cost of modification, the reporting entity will receive from the Treasury Department an amount of “modification adjustment transfer” equal to the excess. Conversely, if the cost of modification exceeds the decrease in book value, the reporting entity will pay to the Treasury Department an amount of “modification adjustment transfer” to offset the excess.

Post-Modification Liability. is the present value of the net cash outflows of the loan guarantees. It is estimated at the time of modification under the post-modification terms. It is discounted at the interest rate applicable to the time when the modification occurs on marketable Treasury securities that have a comparable maturity to the remaining maturity of the guaranteed loans under post-modification terms (simply stated, the post-modification terms at the current rate).

Pre-Modification Liability. is the present value of the net cash outflows of loan guarantees. It is estimated at the time of modification under the pre-modification terms. It is discounted at the interest rate applicable to the time when the modification occurs on marketable Treasury Securities that have a comparable maturity to the remaining maturity of the guaranteed loans under pre-modification terms (simply stated, the pre-modification terms at the current rate).

OMB instructions provide that if the increase in liability exceeds the cost of modification, the reporting entity receives from the Treasury Department an amount of “modification adjustment transfer” equal to the excess. If the cost of modification exceeds the increase in liability, the reporting entity pays to the Treasury Department an amount of “modification adjustment transfer” to offset the excess.

Credit Reform: Cash Flows for Direct Loans

EXAMPLE: \$100 loan, 20%
subsidy, disbursed in one year.

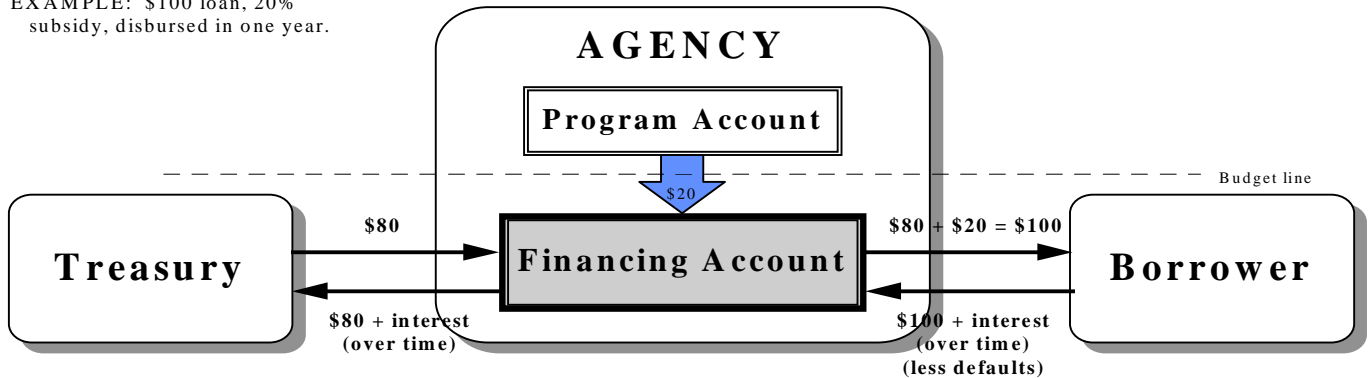

Figure 4-1.

1. Congress appropriates \$20 in subsidy budget authority (BA) to the **program account**.
2. The \$20 subsidy is obligated when the \$100 loan is obligated.
3. The \$20 subsidy is outlayed to the **financing account** at the time the \$100 loan is disbursed to borrower. Simultaneously, the **financing account** borrows the additional \$80 from **Treasury** need to make the \$100 loan.
4. The **borrower** pays fees, interest, and principal to the **financing account** under the terms of the contract.
5. The **financing account** makes payments to **Treasury** over time on the \$80 of borrowing. If the subsidy rate is accurate, the loan repayments (and other payments) to the **financing account** will be exactly the amount necessary to repay the original **Treasury** borrowing (\$80) plus interest.
6. If the subsidy is not accurate, a reestimate will be made and, as necessary, either (1) an additional subsidy will be disbursed from the **program account** to the **financing account** to cover the amount of the reestimate or (2) excess funds will be moved from the **financing account** to a **negative receipt account**, where these funds are unavailable until appropriated.

Credit Reform: Cash Flows for Loan Guarantees

EXAMPLE: \$100 loan with 75% Federal guarantee, 20% subsidy rate, disbursed in one year, upfront fee of 2%, and 40% default rate, no recoveries.

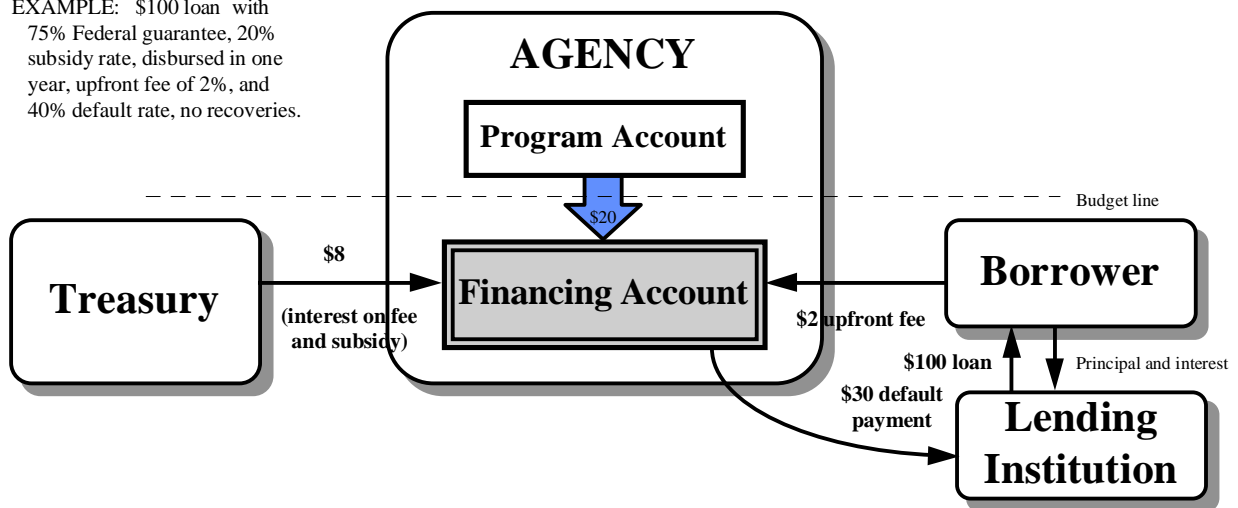

Figure 4-2.

1. Congress appropriates \$20 in subsidy budget authority (BA) to the **program account**.
2. The \$20 subsidy is obligated when the \$100 loan is obligated.
3. The **lending institution** lends a 75% Government guaranteed \$100 loan to the **borrower**. When the loan is disbursed, \$20 in subsidy BA is outlayed to the **financing account**. The **borrower** pays a 2% upfront fee to the **agency**, which is deposited into the **financing account**.
4. Reserves (uninvested funds) are held in the **financing account** and earn interest.
5. The **borrower** pays principal and interest to the **lending institution**.
6. If the **borrower** defaults, the reserves held in the **financing account** are used to make claim payments to the **lending institution**. If the subsidy rate is accurate, the **financing account** will have exactly the reserves needed to cover all defaults and other subsidies for that cohort of loans.
7. If the subsidy is not accurate, a reestimate will be made and, as necessary, either (1) additional subsidy will be disbursed from the **program account** to the **financing account** to cover the amount of the reestimate or (2) excess funds will be moved from the **financing account** to a **negative receipt account**, where these funds are unavailable until appropriated.

CHAPTER 5**GRANTS AND COOPERATIVE AGREEMENTS****0501 OVERVIEW**

050101. Purpose. This chapter prescribes the guidance to be followed by DoD Components to account for and control grants and cooperative agreements. Other guidance on grants and cooperative agreements is contained in DoD 3210.6-R, “DoD Grant and Agreement Regulations.”

050102. General

A. DoD grants and cooperative agreements are federal assistance agreements under which payments in cash and/or in kind are made for specified purposes. The major difference between grants and cooperative agreements is that grants are assistance awards for which no substantial involvement is anticipated between the Department of Defense and the recipient during performance of the contemplated activity, whereas cooperative agreements may require substantial involvement. However, the accounting treatment for the two types of agreements is similar. Recipients of DoD grants and cooperative agreements include individuals, nonprofit organizations, local and state governments, U.S. territories, and federally recognized tribal governments.

B. DoD grants and cooperative agreements include formula grants to states and project grants for (1) construction of armories and other major projects, (2) military base reuse studies and community planning, (3) impact assistance for areas affected by the East Coast Trident Program, and (4) cooperative agreements placed under the DoD Procurement Technical Assistance Program. Grants and cooperative agreements do not include (1) technical assistance programs that provide services instead of money; (2) contracts that are entered into and administered under procurement laws and regulations; and (3) agreements under which only direct cash assistance to individuals, a subsidy, a loan, a loan guarantee, or insurance is provided. Under the Foreign Military Financing program the DoD accounts for grants made to foreign nations allied to the United States. These grants provide the financing to U.S. allies for acquisition of U.S. military articles, services and training. Financial policies for these grants are described in Volume 15 of this regulation.

C. The acceptance of an assistance award from the Department of Defense creates a legal duty on the part of the recipient to use the available funds or property in accordance with the terms and conditions of the assistance agreement. Payments may be made in advance or as reimbursement for either work performed or costs incurred by awardees. This Chapter provides guidance for issuing advances to grantees. Recipients are required to return to the Department of Defense (1) the unused balances of advance payment awards (plus earned interest, unless recovery is prohibited by statute), (2) any funds improperly applied, and (3)

property or facilities purchased or otherwise made available under the conditions of the awards, unless legal title thereto is vested unconditionally in the recipient by the terms of the award.

D. Authoritative requirements for the uniform administration of grants and cooperative agreements are contained in DoD 3210.6-R, “DoD Grant and Agreement Regulation,” the Office of Management and Budget (OMB) Circular No. A-102, “Uniform Administrative Requirements for Grants-in-aid to State and Local Governments” and OMB Circular No. A-110, “Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.” The “Catalog of Federal Domestic Assistance,” updated annually by the OMB and the U.S. General Services Administration, is the basic reference source for DoD assistance programs.

0502 ACCOUNTING STANDARDS FOR GRANTS AND COOPERATIVE AGREEMENTS

050201. Accounting for a DoD grant or cooperative award begins with the execution of an agreement or the approval of an application or similar document which sets out the amount and purpose of the award, the performance period, the obligations of the parties to the award, and other terms. A legal obligation to disburse the assistance funds, in accordance with the terms of the agreement, occurs upon execution of an agreement or an approval of an application or similar document.

050202. Advance payments to award recipients shall be accounted for as advances by the DoD Component until the recipient has performed under the award or contract.

050203. When the recipient has performed under the grant or cooperative agreement, the DoD Component shall record an expense in an amount equal to the cost of the services performed or cost incurred and reduce the advance account by a like amount.

050204. Payments to award recipients as reimbursement for work performed or costs incurred shall be accounted for as expenditures and as expenses incurred, or as reductions of liabilities if the expenses were recorded previously.

050205. When title to assets acquired by award recipients vests with the U.S. Government, the DoD Component shall establish appropriate general ledger accounting control and property records, and include the assets in its financial statements. The assets shall be recorded at acquisition cost to the award recipient and depreciated in accordance with the guidance stated in chapters 1 and 6 of Volume 4.

050206. A refund receivable shall be established by the DoD Component to recover all expenses upon a determination that a recipient has failed to meet the requirements of the grant.

050207. At the termination of a grant or cooperative agreement, funds unused or improperly applied by the recipient shall be established as an account receivable by the DoD Component.

050208. Guidance to record the related obligations, advances to grantees, and expensing of grants is provided in Chapter 16 of Volume 3, and Chapters 5 and 7 of Volume 4 of this Regulation.

0503 ACCOUNTING FOR GRANTS

050301. Table 5-1 illustrates the most common entries associated with grants awarded by DoD Components.

0504 FINANCIAL MANAGEMENT FOR GRANTS AND COOPERATIVE AGREEMENTS

050401. The Defense Finance and Accounting Service shall ensure the availability of a financial management information system capable of recording and monitoring grant and cooperative agreement transactions and providing, by transaction, a delineation of federal and awardee shares of program costs. The system shall enable the DoD Component to identify quickly the basic categories of funds involved, along with the related obligation and expenditure rates, and provide for ensuring fund availability prior to awarding financial assistance and obligating funds.

050402. Projected cash requirements shall be obtained from major awardees no later than the receipt of the initial request for funds. The projections shall identify the times, amounts, and purposes for which cash is needed; be reviewed and approved by program officials; and be recorded in the financial management information system.

050403. Requests for cash advances shall be compared to the projected cash requirements before disbursements are made. Reasons for significant variations between requests for advances and projected cash requirements shall be determined and, if necessary, adjustments made. Advances may be made covering many awards to facilitate cash management and to simplify accounting for both the recipient and the Federal Government. The advances shall be liquidated based upon reports of expenditures and the return of funds

050404. Expenditure reports, by award, shall be prepared as a means for comparing planned with actual expenditures. DoD Component program and financial management staffs shall determine the causes of any significant variances and adjust planned and actual expenditures as needed. The reports shall be reviewed for evidence of performance and reconciled with requests for advance payment and reimbursement. Awardees shall be notified of potential overdrafts and, unless additional funds are made available, the approximate date on which federal funds will expire.

ACCOUNTING ENTRIES FOR GRANTS

1. Dr 1413 Advances to Grantees
Cr 1012 Funds Disbursed
To record authorized advance payments to award recipients.

Cr 1413 Advances to Grantees
Cr 1710 Land
Cr 1730 Buildings
Cr 1740 Other Structures and Facilities
Cr 6123 Grants, Subsidies, or Contributions
To record at the termination of a grant or cooperative agreement unused funds or funds that were improperly applied by the recipient.

TABLE 5-1

050405. Disbursements, whether by check or electronic funds transfer, shall be timed to minimize Treasury's financing costs and the time elapsing between the transfer of funds from the U.S. Treasury and subsequent disbursement by the recipient for program purposes. DoD Component systems shall ensure that disbursements are controlled in accordance with guidance contained in chapter 2 of Volume 4.

050406. DoD Components are responsible for ensuring that cash is not disbursed to and/or maintained by awardees in excess of their immediate disbursement needs. DoD Components shall take remedial steps such as switching to the reimbursement method of financing, reducing the size of payments, or denying payment requests until recipients exhaust excess funds if a lack of performance dictates, if the recipient persistently maintains excessive balances of Federal cash, or if the recipient does not establish adequate cash control procedures. Systems, procedures, and reports shall be designed to ensure that excess balances are readily identified and promptly turned over to the Department of the Treasury. Interest charges on excess balances shall be levied and collected as authorized by law.

050407. When the reimbursement method of financing is used, payment to the recipient should be made within 30 days after receipt of the billing.

050408. DoD Components shall maintain appropriate records of property acquired by recipients for which title rests or may rest with the U.S. Government.

050409. Financial and compliance audits of recipients of assistance awards shall be conducted in accordance with OMB guidance. Appropriate actions, such as withholding new awards and/or delaying payments, shall be considered when awardees fail to comply with applicable requirements.

050410. Amounts due as a result of a sustained audit finding shall be recorded promptly upon entitlement as an account receivable. The transaction occurs, for example, when an audit report is issued for matters for which the auditor is authorized to make the final determination. The receivable shall be recorded even though the decision to collect is subject to administrative appeal or litigation by persons outside the agency. Interest, at the rate prescribed in the "Treasury Financial Manual," shall begin to accrue no later than 30 days after the date the auditee was notified of the debt and continue to accrue while an appeal is underway.

(This page intentionally left blank.)

CHAPTER 6**DEFENSE EMERGENCY RESPONSE FUND****0601 OVERVIEW**

060101. Purpose. The purpose of this Chapter is to establish the policy and procedures governing the Defense Emergency Response Fund.

060102. General. The Defense Emergency Response Fund was established to provide obligational authority to appropriations of the DoD Components:

- Upon a determination by the Secretary of Defense that immediate action is necessary in response to natural or manmade disasters; and
- In anticipation of reimbursable orders from other Federal Departments and agencies and from state and local governments.

A. The Treasury index symbol of the Emergency Response Fund is 97X4965. The purpose of this Fund is to prevent an adverse impact on DoD mission accomplishment that otherwise could result from the use of mission funds to finance disaster relief efforts. The Fund initially was capitalized at \$100 million. Reimbursements received for the cost of DoD support provided shall be deposited to the Emergency Response Fund. Assistance provided for disasters or emergencies shall be as prescribed in DoD Directive 3025.1, "Military Support to Civil Authorities."

B. The Secretary of Defense; or his designated representative, the Secretary of the Army; may direct utilization of DoD resources in response to a major disaster or emergency. The DoD resources may be committed within the United States, its territories, possessions, and administrative and commonwealth areas.

C. Requests for assistance from the governor of a state, or an acting governor in the absence of a governor, should be submitted to the Associate Director of the Federal Emergency Management Agency (FEMA) through the appropriate FEMA regional director. Upon receipt of the request, the FEMA regional director shall gather adequate information to support a recommendation and forward it to the Associate FEMA Director. If the Associate FEMA Director determines that such work is essential to save lives and protect property, he/she will issue a mission statement to the Department of Defense authorizing federal assistance to the extent deemed appropriate.

D. The Department shall ensure that support is provided in accordance with the approved scope of work, costs, and time limitations in the mission assignment. The

Department also shall keep the FEMA regional director and officials of the affected state advised of work progress and other project developments. It is DoD's responsibility to ensure compliance with applicable federal, state and local legal requirements. A final report will be submitted to the FEMA regional director upon termination of all direct federal assistance work. Final reports shall be signed by representatives of the Department and the state. Once the final eligible cost is determined, DoD will request reimbursement from the FEMA.

E. The DoD Executive Agent may direct DoD Components to respond to any emergency, based on authority provided by DoD Directive 3025.1 or obtained from the Secretary or Deputy Secretary of Defense. If an emergency of any kind or size requires a response on behalf of the Department but, where there has not been any declaration of a major disaster or emergency by the President, or if reimbursement of funds to the Department of Defense is uncertain, the DoD Executive Agent will determine the authority prior to any commitment of DoD resources:

1. Authorizations by the DoD Executive Agent under the provisions of DoD Directive 3025.1, subsection D.7., shall include (but are not limited to) commitment of funds from the Defense Emergency Response Fund in anticipation of reimbursement to that Fund.

2. Authorizations shall be obtained from the Secretary or Deputy Secretary of Defense, through their Special Assistant, if DoD response is not clearly required by federal law, by this Regulation or under departmental plans approved by the DoD Executive Agent.

0602 POLICY AND PROCEDURES

060201. Appropriation Receipt and Apportionment. The Defense Finance and Accounting Service (DFAS) shall be responsible for recording the appropriation warrant (TFS Form 6200), when received, on applicable accountable records. The Office of the Deputy Comptroller (Program/Budget) is responsible for preparation of the Apportionment/Reapportionment Schedule (SF 132) and the issuance of funding authorizations.

060202. The Secretary of Defense shall, in response to an undeclared civil emergency and/or formal or informal request by the FEMA, or other appropriate party, and in anticipation of reimbursable orders, direct the DoD Executive Agent to authorize necessary action in response to a natural or manmade disaster occurring within a state, territory, possession, administrative, or commonwealth area of the United States.

060203. Initiation of DoD Response

A. The absence of a formal reimbursement agreement need not delay a DoD response; however, every effort should be made to insure that the agreement is executed as soon

as possible after the inception of DoD support. The agreement shall specify that reimbursement shall be in accordance with the provisions of paragraph B.4.

B. As the designated DoD Executive Agent, the Secretary of the Army shall fulfill those responsibilities specified in DoD Directive 3025.1. The Executive Agent, through his/her designee, the Director of Military Support, shall estimate the amount of funds required for each DoD response to an emergency condition, and request an allotment of program authority from the Deputy Comptroller (Program/Budget).

C. The Office of the Deputy Comptroller (Program/Budget) shall issue a fund authorization release letter to the Executive Agent in the lesser of (a) the amount requested, or (b) the unallocated funds within the Defense Emergency Response Fund. Amounts appropriated to the Fund are direct program authority. Amounts reimbursed to the Fund are reimbursable program authority. Allotments of the fund authorization shall be provided from reimbursable program amounts, to the extent that such amounts are available, prior to utilization of direct program authority.

D. The DFAS shall record fund availability and provide accounting support to the Executive Agent. Reimbursable task orders, issued by the Executive Agent or his/her authorized representatives, to the DoD Components requested to provide assistance (performing activities) shall be obligated against the authorized fund allotment for that emergency. The DFAS shall record the issuance of the reimbursable orders to the performing activities.

E. The performing activity shall record receipt of the reimbursable order and provide assistance in accordance with the direction received from the Executive Agent.

F. After the DoD begins its initial response operations, it is necessary to estimate the total funding needs for the duration of that emergency. Within about ten days after the disaster, estimates of total costs to date and resources required to finish the job should be developed by major object class (as described in OMB Circular A11) and furnished to the on-site Federal Coordinating Officer (FCO) and the DFAS.

060204. Reimbursable Costs. Generally, only incremental costs in providing assistance are reimbursable. Specifically, the following costs are eligible for reimbursement:

A. Overtime, travel, and per diem of permanent DoD civilian personnel.

B. Wages, travel, and per diem of temporary DoD civilian personnel assigned solely to performance of services directed by the Executive Agent.

C. Travel and per diem of active duty military personnel, and costs of reserve component personnel called to active duty by a federal official who are assigned solely to the performance of services directed by the Executive Agent.

D. Cost of work, services, and material procured under contract for the purposes of providing assistance directed by the Executive Agent.

E. Cost of materials, equipment and supplies (including transportation, repair and maintenance) from regular stocks used in providing directed assistance.

F. All costs incurred which are paid from trust, revolving, or other funds, and whose reimbursement is required by law.

G. Other costs submitted with written justification or otherwise agreed to in writing by the Executive Agent.

060205 Requests for Reimbursement

A. Performing DoD Activities. Reimbursement may be requested through use of the SF 1080, "Voucher for Transfers Between Appropriations/Or Funds," for reimbursement by Treasury check or by SF 1081, "Voucher and Schedule of Withdrawals and Credits." Requests for reimbursement shall be documented with specific details on personnel services, travel, costs of contracts for services, materials, supplies, and miscellaneous expenses and all other expenses by object class as specified in OMB Circular A-11 and by any subobject class used in the performing activity's accounting system. The Fund shall reimburse performing activities for the duration of relief operations or to the extent that reimbursement to the Fund for that effort by others is known or reasonably probable. DoD activities requesting reimbursement from the Fund shall maintain all financial records, supporting documents, statistical records and other records pertinent to the provision of services or use of resources by those activities. These materials must be accessible to duly authorized officials for the purpose of making audits, excerpts, and transcripts, for a period of 6 years 3 months from the date of submission of the final billing.

B. DFAS and FEMA. The DFAS shall receive and consolidate requests for FEMA reimbursement of Fund expenditures. Requests for reimbursement to FEMA may be submitted at any time; however, a final billing should be submitted within 90 days after completion or termination of the mission. Requests for reimbursement for FEMA directed domestic emergencies shall be submitted via an SF 1080 or SF 1081 to the applicable FEMA Regional Director, FEMA Region #, Attention: Program Support Officer. The SF 1080 or 1081 prepared for FEMA reimbursement should include, in addition to normally provided information, an identifier as to why reimbursement is requested. The identifier should read "Federal Response Plan" and be followed by the FEMA assigned disaster number and state (each state is assigned a specific disaster number). Work performed based on a mission assignment letter from the FEMA shall cite the specific mission assignment under which the work was performed as well as the disaster number. Requests for reimbursement for foreign disasters shall be submitted as directed in the authorizing reimbursable agreement. The SF 1080 or SF 1081 should be accompanied by an attachment which explains the following:

1. Amount previously billed;
2. Current billing amount;
3. Cumulative amount billed to date; and
4. An explanation of charges broken down by:
 - a. Personal services including regular time and overtime with the number of hours and total cost.
 - b. Travel and transportation separating per diem and other travel expenses.
 - c. Materials, supplies, and miscellaneous expenses including separate identification of any single item costing \$1,000 or more. Items of expendable property or supplies costing less than \$1,000 need not be identified. Costs for rental space should be listed separately.
 - d. Costs of contracts for services listed by title and costs.
 - e. Other eligible costs.

060206. Reimbursement of Identified Costs

A. The DFAS shall, in providing accounting support to the Executive Agent, reimburse from the funds allotted for that emergency, performing activities for costs incurred, as specified in paragraph B.4., by those activities and billed to the Defense Emergency Response Fund (97X4965).

B. Collections of funded costs recovered for disaster assistance provided shall be deposited to the credit of the Defense Emergency Response Fund (97X4965) through use of DD Form 1131, "Cash Collection Voucher" or equivalent document. The DFAS, acting as the representative of the Executive Agent, will be responsible for follow up of uncollected reimbursement requests made to the FEMA as prescribed in paragraph 060205, above.

0603 RESPONSIBILITIES

060301. Financial Reporting. The DFAS shall prepare the appropriation and fund status reports for the Defense Emergency Response Fund required by Volume 6 of this Regulation. The reports required for the Defense Emergency Response Fund are:

- A. Year-End Closing Statement, TFS 2108
- B. Report on Budget Execution, SF 133
- C. Flash Report on Obligation Status, Acct Rpt(M)1445
- D. Report on Obligations, SF-225, IRCN 1183-TD-QU
- E. Report on Reimbursements, Acct Rpt(M)725
- F. Financial Statements prescribed by the DoD as required by the Chief Financial Officers Act of 1990.

060302. The Executive Agent/Director of Military Support (DOMS) shall inform the Office of the Deputy Comptroller (Program/Budget) of the need for an additional appropriation, if necessary, to maintain the Defense Emergency Response Fund at its authorized level.

OVERVIEW - DEFENSE EMERGENCY RESPONSE FUND

(This page intentionally left blank.)

CHAPTER 7

**FINANCIAL LIABILITY FOR
GOVERNMENT PROPERTY LOST, DAMAGED OR DESTROYED**0701 OVERVIEW

★ 070101. Purpose. This Chapter provides for the implementation of policies and responsibilities relating to the Financial liability for government property lost, damaged, or destroyed. This Chapter prescribes how to:

A. Account for loss, damage, or destruction of Government property, determine the amount of financial liability of those found to be responsible for such financial losses, provide relief from accountability, and establish debts resulting from the assessment of financial liability.

B. Inquire, research, and investigate the causes of the loss, damage, or destruction of Government property.

C. Assess financial liability with respect to lost, damaged, and destroyed Government property.

D. Initiate DD Form 200, "Financial Liability Investigation of Property Loss."

070102. Responsibilities

A. Under Secretary of Defense (Comptroller). The Under Secretary of Defense (Comptroller) is responsible for financial policies regarding financial liability for government property lost, damaged or destroyed.

B. DoD Components. The DoD Components shall ensure that the policies and procedures of this Chapter are implemented and are responsible for the following:

1. Determining and assessing the amount of financial liability of those responsible for such losses;

2. Mitigation or reduction of, or relief from, financial liability in appropriate cases;

3. Establishing debts resulting from the assessment of financial liability and refer them for appropriate collection action.

0702 GENERAL REQUIREMENTS

070201. Purpose. This section prescribes general requirements regarding accounting for lost, damaged, or destroyed Government property.

★ 070202. Minimum Requirements. The following minimum requirements must be addressed:

A. Investigation. Investigate to ascertain the cause of the loss, damage, or destruction.

B. Proximate Cause. Determination of whether the loss, damage, or destruction was proximately caused by an individual's negligence or abuse.

C. Adjustment. Adjustment of accountable records.

D. Administration. Administration of a system to determine whether a responsible party should be held financially liable for a loss.

070203. INITIATION OF INQUIRIES

A. General. An inquiry shall be initiated immediately after discovery of the loss, damage, or destruction. This inquiry shall be an informal proceeding designed to determine the facts and circumstances leading to the loss, damage, or destruction. The approving authority is responsible for establishing procedures and designating a person to initiate and conduct the inquiry. The person conducting the inquiry shall be responsible for completing blocks 1. through 11. of the DD Form 200, as described in section 0706. At a minimum, this inquiry should identify:

1. What happened.
2. How it happened.
3. Where it happened.
4. Who was involved.
5. When it happened.

6. Any evidence of negligence, willful misconduct, or deliberate unauthorized use or disposition of the property.

B. Evidence of Negligence

1. When inquiring into the loss, damage, or destruction of government property, the first consideration is whether there is evidence of negligence. Some questions to be asked are: “Would a reasonably prudent individual have acted in this manner?” “Were there procedures governing the use of the property, and were they followed?” “What were the circumstances that existed when the loss actually occurred?” “Was the individual on the job?” For example, if a dump truck is parked on an incline, a reasonable person would be expected to set the hand brake and leave the vehicle in park. Using blocks under the wheels might or might not be required. If the individual failed to set the brake and/or use blocks under the wheels and the truck rolled down the incline and was damaged, this could be considered evidence of negligence. A reasonably prudent person would be expected to take precautions.

2. With respect to loss, damage, or destruction of government quarters by military personnel, a distinction between simple and gross negligence is needed. Evidence of simple or gross negligence depends on the conduct of the individual. If the individual failed to exercise precautions or good judgment, then simple negligence applies. If the individual’s conduct was characterized by a reckless, deliberate, or wanton disregard of foreseeable consequences, then gross negligence applies. Evidence of whether simple or gross negligence was the proximate cause of the loss or damage is based on the facts and circumstances and shall be documented during the inquiry process.

C. Unrecorded Property. The requirements of this chapter apply whether or not the Government property is recorded on an accountable record.

D. Losses Involving a Shortage of Public Funds. Proceeds of sales of property or services not yet deposited with a DoD disbursing officer are considered accountable property and are subject to the policies and procedures in this chapter.

E. Exceptions

1. Motor vehicle accident investigation reports may be used to document an inquiry. However, when the documentation clearly indicates that negligence or abuse is involved, or if a claim against the Government is possible, a DD Form 200 shall be prepared.

2. Item discrepancies attributed to shippers and transportation discrepancies attributed to carriers are processed and reported according to “Reporting of Item and Packaging Discrepancies,” (Non-FMS) and “Processing Discrepancy Reports Against Foreign Military Sales Shipments” (FMS), and “Reporting of Transportation Discrepancies in Shipments.” However, item discrepancy reports should be reviewed and evaluated to determine if the circumstances of the loss or damage appear to have been caused by negligence or abuse by DoD personnel. If so, a DD Form 200 shall be prepared.

F. DD Form 200. A DD Form 200 is used to document the facts and circumstances of the loss. (A DD Form 200 is not required when an individual voluntarily makes restitution to the government for the full amount of the loss and a controlled item is not involved.)

070204. Voluntary Payments. Individuals may voluntarily choose to pay the government for lost, damaged, or destroyed government property any time prior to involuntary collection from their pay. Individuals offering the payment do so on their own volition. The government does not seek any advantage or forego any right by accepting a voluntary payment. An individual cannot be coerced or threatened with adverse action if payment is not voluntarily made. Individuals must be made aware of the effect of making a voluntary payment. That is, it may not be later withdrawn, avenues for relief will no longer be available, and voluntary payment does not preclude other administrative or disciplinary action contemplated by an individual's commander. Individuals offering to pay in excess of basic pay for one month by military members or one twelfth of annual pay by civilian employees must be made aware that their liability may be a lesser assessment as a result of an investigation. Voluntary payments may be made in cash or by payroll deduction.

070205. Review. After accountable and/or responsible officers have completed their inquiry, the DD Form 200 shall be sent to the appointing authority for review. The appointing authority shall determine if a financial liability officer or financial liability board is needed to conduct an investigation. The general criteria for appointing a financial liability officer is in paragraph 070402.A. The criteria for appointing a financial liability officer for inventory losses is in paragraph 070807. Legal officials and the member's commander must be consulted before statements are taken from anyone if there is a suspected violation of the Uniform Code of Military Justice (10 U.S.C. Chapter 47).

070206. Financial Liability Officer Investigations. The appointing authority may appoint a financial liability officer to determine whether the facts and circumstances support the findings and recommendations of the individual completing blocks 9. and 10. on the DD Form 200. Qualifications, duties, and responsibilities of financial liability officers are discussed in section 0704.

070207. Financial Liability Board. The appointing authority may appoint a financial liability board in lieu of an officer. The reasons for appointment of a board include the complexity, size, or unique type of loss due to negligence or abuse. The composition, objectives, and functions of the board are discussed in section 0705.

070208. Determination of Financial Loss

A. Computation of Financial Loss. A documented computation of the financial loss to the government shall be made when there is evidence to indicate that the loss was proximately caused by negligence or abuse.

1. When damaged property or items can be repaired economically or restored in condition to that immediately prior to the loss, the loss to the government shall be based on the cost of repair or restoration. If the cost to repair or restore the property exceeds the cost to replace the property, the loss to the government shall be as determined in paragraph, 070208.A.2, below.

2. When property is lost, damaged, or destroyed beyond economical repair, and the property is not replaceable, the amount of the loss shall be the fair market value of the property immediately before the loss. When a fair market value cannot readily be determined, the amount shall be the acquisition cost or standard price, adjusted for depreciation based on the specified depreciation period for such item or if such a period has not been specified, based on its estimated useful life. Depreciation shall be computed using the straight line method of depreciation. In no case should property be depreciated below its scrap value. For property that is damaged beyond economical repair, the scrap or salvage value of the property shall be used to reduce the loss to the government.

★ B. Liability. Financial liability of individuals is based on the actual loss to the government, as computed in paragraph 070208.A, above. When liability is limited by the individual's rate of pay, the amount of the actual loss to the government still is computed. However, in such cases, the financial liability of the individual either is the actual amount of the loss or the limitation based upon the rate of pay, whichever is less.

★ C. Collective Liability. If more than one individual is found liable financially for the loss, damage, or destruction of government property, the individuals shall be collectively liable for the loss to the government. Because the government cannot collect more than the total amount of assessed liability, the approving authority who assessed financial liability will decide how much to collect from each individual. Among the factors to be considered in taking collection action from each liable individual are the degree of each individual's responsibility for the loss, damage, or destruction and the ability to collect for the loss from the responsible individual.

070209. Notification and Examination. When financial liability is recommended, the individual shall be notified and given the opportunity to examine the findings and recommendations, obtain representation, make a rebuttal statement, and present any mitigating factors that may have contributed to the negligence or abuse. If damage to government housing is involved, an individual also shall be given the opportunity to request a waiver of the financial liability, as stated in DoD 4165.63-M, "DoD Housing Management."

0703 APPROVING AND APPOINTING AUTHORITY

070301. Duties and Responsibilities

A. Approving Authority. DoD Component regulations shall designate who may be an approving authority. The approving authority's responsibilities may be delegated; however, the delegations must be in writing. The approving authority also may act as the appointing authority or designate an appointing authority in writing. The approving authority shall:

1. Designate an appointing authority, when needed.

2. Disqualify himself or herself when a conflict of interest is possible because the loss relates to property for which he or she is responsible and/or accountable.

3. Establish procedures and designate a person to initiate and conduct an inquiry immediately after the loss, damage, or destruction is discovered (see paragraph 070203.A).

4. Ensure that all DD Forms 200 received are accurate and complete. Evaluate each DD Form 200 and either approve recommendations to assess financial liability or relieve those involved from liability, responsibility or accountability. The approving authority approves or disapproves all DD Forms 200, regardless of dollar value, unless otherwise delegated in writing.

5. Ensure that all gains and losses which require a formal investigation are promptly and thoroughly investigated. The system used to process DD Forms 200 must be frequently reviewed to evaluate the accuracy and timeliness of the investigations.

6. Ensure that DD Forms 200 are initiated, processed and adjudicated within the time limits that may be established by the DoD Components.

7. Require, if delays occur in the initiating or processing of a DD Form 200, a written explanation of the reason for the delay and take appropriate corrective actions.

8. Ensure that persons held financially liable are so notified, informed of their rights (including waiver rights if Government housing is involved), and given the opportunity to inspect and copy the DD Form 200.

9. Personally evaluate each DD Form 200 when there is evidence of negligence or abuse.

10. Determine whether to delegate to the appointing authority the authority to approve or disapprove a DD Form 200 when there is no evidence of negligence or abuse.

11. Ensure, when financial liability is recommended, or when recommendations appear to be inconsistent with findings, that a judge advocate or civilian attorney has reviewed the findings and provided an opinion on the adequacy of evidence and its relationship to the findings and recommendations. This legal review shall be included as part of the record with the DD Form 200 and completed before final action is taken by the approving authority.

12. Ensure that corrections of any attested entries are properly initialed and documented.

13. Overrule, when appropriate, the recommendations of the appointing authority and the financial liability officer. When this action results in the assessment of financial liability, the individuals not previously recommended for liability shall be advised of their rights and afforded an opportunity to exercise their rights.

14. Formally notify individuals against whom he or she has approved financial liability.

B. Appointing Authority. The appointing authority is designated in writing by the approving authority. The approving authority also may act as appointing authority. The appointing authority is responsible for the following tasks:

1. Appoint a financial liability officer, if needed.
2. Appoint a board in lieu of a financial liability officer to conduct the investigation, if warranted. Reasons for considering appointment of a board include complexity, size, or unique type of loss due to negligence or abuse. (See section 0705.)
3. Provide administrative guidance to the financial liability officer or the board.
4. Review DD Forms 200 for accuracy and compliance with this Regulation.
5. Approve or disapprove the recommendations of the financial liability officer or the board, and forward personal recommendations to the approving authority.
6. Approve or disapprove DD Forms 200 when there is no evidence of negligence or abuse and authorization has been delegated in writing by the approving authority.
7. Approve or disapprove DD Forms 200 when the gain or loss of inventory items is less than \$100,000 and authorization has been delegated in writing by the approving authority.

070302. Summary. The appointing and approving authorities must act on the DD Form 200 once an individual has been properly notified and given the opportunity to respond to the findings. Failure of involved individuals to respond to recommendations of financial liability is not a sufficient reason to delay the approval process if the individuals were given a reasonable opportunity to reply, as discussed in paragraph 070404.B.10.

0704 FINANCIAL LIABILITY OFFICER QUALIFICATION AND RESPONSIBILITIES

070401. Purpose. This section contains policies regarding the qualifications, duties, and responsibilities of individuals appointed to conduct an investigation and determine responsibility for lost, damaged or destroyed property listed on DD Forms 200. This section is

concerned with criteria to determine whether a financial liability officer is required to be appointed, who may be appointed as a financial liability officer, and the duties and responsibilities of that individual. A financial liability officer's findings and recommendations are administrative, not judicial; therefore, the reports are purely advisory; the opinions do not constitute final determinations or legal judgments; and the recommendations are not binding upon appointing and approving authorities.

070402. Criteria

A. Appointment of Financial Liability Officer. The appointing authority should appoint a financial liability officer to conduct a formal investigation when:

1. Recommended by an accountable officer.
2. Directed by higher authority.
3. Deemed appropriate by the appointing authority (e.g., repetitive losses, evidence of negligence or abuse or large dollar losses).

B. Financial Liability Officer Duty. Unless operational requirements clearly dictate otherwise, a financial liability officer shall perform this function as a primary duty until the investigation has been completed.

070403. Financial Liability Officer Qualifications

A. Selection Criteria. A financial liability officer is selected based on training, experience, competence, and ability to conduct independent and objective investigations.

B. Persons Eligible. The financial liability officer shall be a commissioned officer; warrant officer; enlisted member in the grade of E-7, E-8, or E-9; or a civilian employee GS-07, or above. The financial liability officer shall normally be senior to the individuals directly involved in the discrepancy.

C. Use of Reserve Component Personnel. Reserve Component commissioned officers, warrant officers, and noncommissioned officers in grades E-7, E-8, or E-9 not on active duty may serve as financial liability officers during Reserve training sessions.

D. Relationship to Property. Any person who is accountable or responsible for, or in any way directly interested in, the property being investigated shall not be appointed as a financial liability officer.

070404. FINANCIAL LIABILITY OFFICER RESPONSIBILITIES AND DUTIES

A. General

1. The primary purpose of the DD Form 200 is to determine responsibility for lost, damaged or destroyed property. To determine such responsibility, the facts contributing to the loss, damage or destruction must be developed by investigation.

a. The investigation may establish the fact that some other individual is at fault. The financial liability officer shall not limit the investigation to verifying statements of interested parties. Rather, the financial liability officer shall perform an investigation as thoroughly as is needed, in his or her opinion, to ensure that all facts are fully developed, the interests of the government are fully served, and the rights of the involved individuals are fully protected.

b. An investigation is required to determine where responsibility and/or liability belongs without regard to the relationship of the responsible individual to the property. As an example, actions by the accountable officer, responsible officer, or property receipt holder should be investigated as well as actions of the users of the property.

2. The investigation conducted by the financial liability officer is the critical phase of the process. The financial liability officer should determine the actual facts, not as alleged but as they actually occurred. The financial liability officer's recommendations shall be evaluated in succeeding reviews; therefore, the recommendations must be supported by the findings and conclusions.

3. The financial liability officer should be able to make a determination from the findings and conclusions as to how the loss or damage occurred and whether negligence or abuse was involved.

4. After recording the findings and conclusions, the financial liability officer should make recommendations based on policies set forth in this Regulation. The financial liability officer shall recommend whether to assess financial liability.

5. A function of the financial liability officer is to afford to any person whose conduct or performance of duty may be subject to inquiry or who has a direct interest in the inquiry an opportunity to have their position considered, as described in paragraph 070404.B.10, below.

B. Conducting an Investigation. Financial liability officers shall conduct investigations promptly. They shall inform the appointing authority immediately of all delays experienced. In conducting the investigation, the financial liability officer shall personally:

1. Scrutinize all available evidence.
2. Interview witnesses and secure statements from individuals concerning:

- a. The cause of the loss or damage.
 - b. The responsibility for the loss or damage.
3. Compile evidence substantiating or refuting any statement in block 9. of the DD Form 200.
4. Physically examine the damaged property, when available, and then release it for repair or disposal. This should be done on the first day of his or her appointment.
5. Consult the appointing authority for guidance, when needed.
6. Determine the amount of damage as described in paragraph 070208.A., if the property has been damaged. This value may be the cost of repairs or an estimate of the repairs obtained from technical manuals or other reliable sources. Determine the value of the property immediately before its damage if the property is not economically repairable. The accountable officer may be asked to assist if he or she has not been directly involved.
7. Ensure that action is taken to exercise control over the property if the property is recovered during the investigation.
8. Ensure that the total loss to the Government is computed correctly.
9. Coordinate actions with the claims investigating officer when the investigation may cover loss, damage or destruction of government property that is being, has been, or shall be investigated because of attendant events by a claims investigating officer. This includes cases where military personnel or civilian employees, while driving a private vehicle, damage government property and have insurance to pay for part of the loss.
10. Adhere to the following requirements:
 - a. Give any individual against whom the financial liability officer makes a finding of financial liability a chance to examine the report of investigation after the findings and recommendations have been recorded.
 - b. Give the individual being recommended for financial liability the opportunity to make a statement.
 - c. Inform the individual that his or her statement may be used against him or her with regard to financial liability and other administrative and disciplinary actions.
 - d. Fully consider and attach as an exhibit to the DD Form 200 any statement made by the individual(s).

e. Ensure that the individual being recommended for possible financial liability is aware of his or her rights under chapter 30, “Debt Collection by Involuntary Salary and Administrative Offset,” of Volume 5 of this Regulation.

f. Request the individual to acknowledge his or her understanding of these rights by completing block 16. of the DD Form 200.

g. If appropriate, prepare a statement that the individual recommended for liability refused to sign block 17. of the DD Form 200 after being given the opportunity.

h. Mail a copy of the findings, recommendations, and evidence to the person against whom financial liability is recommended by certified mail with a return receipt requested when the person is not readily available. For example, the person may have been transferred or separated from one of the Military Services.

(1) A full explanation of the person’s rights shall be included and a reply shall be requested.

(2) If the reply is not received within 30 days after the date of mailing, the financial liability officer shall record this fact and take action to complete the DD Form 200. The record shall be included in, or appended to, the DD Form 200.

(3) Any reply received subsequent to the expiration of 30 days shall be forwarded through the same channels as the DD Form 200 for attachment to the original DD Form 200.

i. Consider any new evidence received after a recommendation has been made. If the financial recommendations remain unchanged, the financial liability officer shall note that the added evidence was considered and shall provide a rationale for not changing the decision (e.g., no new evidence or the matters do not overcome the evidence supporting the original recommendations. The notation shall be on all copies of the report immediately following the original recommendation. If the financial liability officer makes a change in the original recommendations because of the new evidence, the officer shall record such change as “Amended Recommendations.” These recommendations should be recorded immediately after the original recommendations.

0705 PURPOSE, APPOINTMENT, COMPOSITION, AND FUNCTIONS OF A FINANCIAL LIABILITY BOARD

070501. Purpose. A financial liability board may be appointed by the appointing authority for the specific purpose of conducting the investigation. The primary purpose of a financial liability board is to provide the appointing and approving authorities with adequate information upon which to assess liability or relieve the involved individual from liability for the loss, damage or destruction of government property. A board provides more resources that an

officer to investigate losses that are large, complex, or unique. Financial liability boards are administrative, not judicial. Therefore, their reports are purely advisory, their opinions do not constitute final determinations or legal judgments, and their recommendations are not binding upon appointing and approving authorities. The board members will establish appropriate board procedures, such as voting, work priorities, and etc.

070502. Appointment and Composition

A. Selection. The members of a financial liability board are selected based on training, experience, competence, and ability to conduct independent and objective investigations. The senior member normally shall be designated as the Chair. The appointing authority shall not appoint an individual who was or is accountable or responsible, or has direct interest in the property, including a financial liability officer who may have previously investigated the loss of the property.

B. Composition. The financial liability board members shall be commissioned officers; warrant officers; enlisted members in grades E-7, E-8, or E-9; or civilian employees GS-07, or above. The board Chair and a majority of the board shall normally be senior in rank to the persons directly involved.

C. Use of Reserve Component Personnel. A source of financial liability board members is Reserve Component commissioned officers; warrant officers; and enlisted members in grades E-7, E-8, or E-9 during their Reserve training sessions.

070503. Functions. The following are specific functions of a financial liability board:

A. Primary Function. The primary function of a financial liability board is to research, develop, assemble, record and analyze all available information relative to the loss. The board is required to formulate and clearly express consistent findings of facts, conclusions, and recommendations.

B. Collateral Function. A collateral function of the financial liability board, especially when requested by the appointing authority, is to afford a hearing to any person whose conduct or performance of duty may be subject to inquiry or who has direct interest in the inquiry.

070504. Final Action by the Financial Liability Board. The board Chair completes his or her action on the DD Form 200 as the financial liability officer and recommends relief from, responsibility, or assessment of financial liability.

0706 PREPARATION OF DD FORM 200

070601. Purpose. The purpose of this section is to provide instructions for the preparation of the DD Form 200 "Financial Liability Investigation of Property Loss." Table 7-1 provides an example of a completed DD Form 200. The DD Form 200 is used to document the

financial liability process for lost, damaged or destroyed Government property. When completed, the DD Form 200 is the official document to support the establishment of debts, relief from accountability, and adjustment of property records, supply system stock and financial records.

070602. Instructions for Preparation

- A. Date Initiated. Self-explanatory.
- B. Inquiry and/or Investigation Number. Number assigned to the inquiry and/or investigation in accordance with DoD Component instructions.
- C. Date Loss Discovered. Self-explanatory.
- D. National Stock Number (NSN). Enter the NSN(s), manufacturer's part number, or other identification number(s), in numerical sequence. If not applicable, enter the word "none."
- E. Item Description. Enter the nomenclature of the item(s) including any serial number(s), model number(s), controlled inventory item, etc. If the item is nonstandard, give a brief description sufficient for identification. If only a portion of an end item is damaged, describe the end item, fully, then describe the damaged parts. If additional space is needed, a continuation sheet may be used.
- F. Quantity. Enter the number of units and unit of issue (e.g., 1 each, 2 dozen, 5 pair, etc.).
- G. Unit Cost. Enter the cost per unit shown in official catalogs, supply bulletins, or item records. The specific reference should be indicated for audit trail purposes.
- H. Total Cost. Enter the total cost of all units of each article listed (block 6. x block 7.).
- I. Circumstances Under Which Property Was Lost, Damaged, or Destroyed. Enter a complete statement of the facts, including the date and place of the incident. Include the name, grade, and social security number (SSN) of all persons directly involved. The statement must answer five basic questions of who, what, when, where and how. Identify any appropriate contract number(s), transaction number(s), control number(s), etc. Add as exhibits and identify alphabetically within the block, as needed.
- J. Actions Taken to Correct Circumstances Reported in Block 9. and Prevent Future Occurrences. Include recommended actions by the accountable and/or responsible officer, and if appropriate by the financial liability officer, to the appointing and approving authorities.
- K. Individual Completing Blocks 1. Through 10. Person conducting the inquiry.

L. Responsible Officer and/or Reviewing Authority. See definitions for “Responsible Officer” and “Reviewing Authority.”

M. Appointing Authority. See section 0703 and definition for “Appointing Authority.”

N. Approving Authority. See section 0703 and definition for “Approving Authority.”

O. Findings and Recommendations of the Financial Liability Officer. Enter findings of the financial liability officer along with a recommendation regarding liability of the involved parties.

1. An indication that negligence on the part of the individual has not been determined.

2. A recommendation that the investigation be continued at some future time because of extenuating circumstances.

3. Recommendation for corrective actions.

4. Recommendation that the individuals involved in the loss, damage, or destruction be relieved of responsibility for the property when negligence cannot be established. State the facts on which the recommendations are based. Proper conclusions shall be drawn from available facts, not opinions or suspicions. The financial liability officer must sustain or refute the statements made in block 9. of the DD Form 200 and any other statements that are part of the inquiry and/or investigation. Do not use stereotyped phrases such as “loss or damaged in manner stated.” The financial liability officer shall state in his or her own words how the loss or damage occurred based on the evidence obtained by the investigation.

5. Include a computation of charges, as prescribed paragraph 070208.A. when recommending financial liability. The computation should show how depreciation was calculated and other factors used in determining the loss, or reference should be made to the exhibit on which the computation is recorded. The results of the computation shall be entered in block 15.b.

6. Describe the disposition of the property. Items that have been classified as “uneconomically repairable” shall be turned in to the designated person (e.g.; property custodian, accountable officer, or Defense Reutilization and Marketing Service) when released by the financial liability officer or the appointing authority when a financial liability officer is not appointed.

7. Recommendations shall be entered immediately after the findings. The recommendation shall include:

a. Financial liability to be assessed or relief from responsibility and accountability. Also, enter this information in block 15.d. For a military member enter monthly basic pay and for a civilian enter one-twelfth of the yearly salary.

b. Disposition instructions for any unserviceable property not previously sent to the Defense Reutilization and Marketing Service.

c. State clearly the full name, grade, SSN, and the amount of the charge, when recommending financial liability.

d. State if the DD Form 200 may cover the loss, damage, or destruction of property for which a claim is also being processed.

8. The recommendations must represent a logical and equitable decision developed from the facts cited in the evidence and findings.

9. Sign the DD Form 200 in block 15.j., at the end of the recommendations. (See sections 0704 and 0705, and definition for “Financial Liability Officer.”)

P. Individual Charged. See paragraph 070404.B.10. Enter in block 16.d., the individual’s name and rank or grade when financial liability is assessed. Enter in block 16.e., that individual’s SSN. Initiate collection action by forwarding a copy of the approved DD Form 200 by transmittal document to the servicing disbursing officer. All continuation sheets are to be included and the attachments and exhibits excluded. The approved DD Form 200 is sufficient to hold a person financially liable and establish a debt.

Q. Accountable Officer. See definition. Record document numbers used to adjust property and financial records. All other blocks are self-explanatory.

0707 GOVERNMENT HOUSING LIABILITY

070701. Purpose. This section describes the liability of military personnel for the loss, damage, or destruction of government housing (family housing or unaccompanied personnel housing). It describes minimum requirements for assessing financial liability when government housing, including equipment or furnishings therein, is lost, damaged or destroyed. Government housing within the scope of this Chapter includes both permanent and temporary quarters either owned by, or controlled by, the U.S. Government.

070702. Policy

A. Determination of Proximate Cause. A member of a Military Service shall be held liable to the United States for the loss, damage or destruction of family housing or an unaccompanied personnel housing unit assigned to such member, including equipment and furnishings therein, when a determination is made that the loss, damage or destruction was

proximately caused by the abuse or negligence of the member, a dependent of the member, or a guest either of the member or the member's dependent.

B. Financial Liability of Military Members. Financial liability against military personnel for loss, damage or destruction of Government housing, including equipment and furnishings therein, is assessed for the full amount of the loss if the loss, damage or destruction was proximately caused by gross negligence or abuse. Liability of military members for damage to government housing and related equipment and furnishings is prescribed in 10 U.S.C. 2775 and DoD 4165.63-M, "DoD Housing Management."

C. Notification and Examination. Occupants who are assessed financial liability for loss of, or damage to, assigned government housing shall be notified in accordance with paragraph 070209. A member's failure to respond shall not preclude the government from completing a DD Form 200.

D. Determination of Negligence. Determinations must be made on whether the loss or damage to Government housing was proximately caused by simple or gross negligence or abuse of the member, the member's dependents, or guests of either. Such a determination leads to the following considerations:

1. When the proximate cause of the loss or damage is determined to be gross negligence or abuse, the financial liability of the member is the total amount of the loss to the government. Where a member's dependent or guest causes a loss or damage through gross negligence or abuse, the member is fully liable for the loss or damage if the member was "on notice" of the particular risk involved and failed to exercise reasonable, available opportunities to prevent or limit the loss or damage. In the absence of evidence to the contrary, the member is presumed to have been "on notice" of any risks attending the activities of family members and guests on the premises.

2. Where simple negligence is determined to be the proximate cause of the loss or damage, the financial liability of the member is limited to an amount equal to basic pay for one month at the rate in effect at the time of the loss, or the amount of the loss, whichever is less.

0708 SUPPLY SYSTEM MATERIEL

070801. Purpose. This section applies to personal property defined as "supply system materiel" and contains procedures to be followed when inventory losses are discovered. The provisions of this chapter are applicable to all activities accountable for supply system materiel including stock fund and other inventories (e.g., appropriated fund, industrial fund, etc.).

★ 070802. Inventory. Physical inventories shall be taken in accordance with the provisions contained in this Regulation and DoD Instruction 4140.1, "Materiel Management Policy."

A. Discrepancies. Despite the safeguards established by DoD Components in the care and maintenance of supply system stocks, discrepancies may occur between stock record balances and materiel in storage. These discrepancies are subject to postcount validation, preadjustment research, and causative research, as prescribed in chapter 7 of DoD 4000.25-2-M “Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP).”

B. Adjustments. An adjustment shall be made to the inventory and financial records to bring those records into balance after appropriate research. Care should be taken to process the transactions correctly (e.g., an issue posted twice should be corrected by a reversal (credit transaction), not as a loss of inventory). These types of corrected discrepancies are referred to as resolved discrepancies. For unresolved inventory losses, an inventory adjustment document or a DD Form 200 shall be used to substantiate adjusting the inventory and accounting records to the stock on hand and to provide relief from property accountability or responsibility.

C. Causative Research

1. Causative research shall be conducted for all inventory discrepancies that meet any of the criteria specified in DoD 4000.25-2-M, “Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP).” For inventory discrepancies which do not meet the criteria for performing causative research, a justification for adjusting the inventory and accounting records and relief from property accountability shall be provided by means of an inventory adjustment document in accordance with section D., below.

2. One of the purposes of this research is to either establish liability or provide relief from accountability for the accountable and/or responsible officer(s) for the loss, damage or destruction of supply system materiel.

3. Another purpose of the research is to determine if the loss to the government was proximately caused by the negligence or abuse of individuals. If an individual accepts responsibility for the loss, damage or destruction of supply system materiel and voluntarily reimburses the government, a DD Form 200 is not required. The collection voucher may be used to adjust the financial and property records.

D. DD Form 200 Used in Substantiating Inventory Loss Adjustments. When authorized, the reviewing authority may approve physical inventory adjustments equal to or less than \$50,000, when negligence or abuse is not evident or suspected. When negligence or abuse is evident or suspected, the reviewing authority initiates and forwards the DD Form 200 to the appointing authority for action. The financial liability investigation shall be used to substantiate adjusting the stock record, and providing relief from property accountability.

070803. Resolved Inventory Losses

A. Accountability. The data developed by postcount validation, preadjustment research, and causative research shall be utilized to prepare correcting

documentation so that the inventory accounting systems may be updated. These adjustments shall be processed in accordance with this Regulation and DoD 4000.25-2-M.

B. Statistics. This type of data shall be classified in accordance with Chapter 7 of DoD 4000.25-2-M and the data accumulated to identify trends and problem areas.

070804. Unresolved Inventory Losses that Do Not Meet the Criteria for an Investigation

A. Accountability. Relief from property accountability and justification for the adjustment of the inventory and accounting records to the inventory on hand shall be provided by means of an inventory adjustment document. The detail data requirements and procedures for preparing and processing the inventory adjustment document shall be as prescribed in appropriate DoD Component implementing documents.

B. Authority for Adjustment. If the cause or probable cause of the discrepancy has not been determined, and the discrepancy does not qualify for causative research, this paragraph shall be cited as authority for relieving the accountable officer of accountability.

C. Statistics. See paragraph 070803.B., above.

070805. Unresolved Inventory Losses - Causative Research Indicates No Personal Responsibility

A. Accountability. See paragraph 070804.A., above.

B. Statistics. The type of inventory losses shall be categorized and accumulated by category to identify trends and/or problem areas in accounting or supply system procedures in accordance with Chapter 7 of DoD 4000.25-2-M.

070806. Unresolved Inventory Losses - Causative Research Indicates Evidence of Personal Responsibility

A. Method of Adjustment. A financial liability investigation shall be used to support adjustment of the inventory and accounting records to the actual inventory on hand and to relieve the accountable officer of accountability.

B. Statistics. See paragraph 070805.B., above.

070807. Criteria for an Investigation. A financial liability investigation shall be initiated on all unresolved inventory discrepancies for each stock number that meets any of the following criteria:

A. Gains and losses of sensitive items (e.g., drugs designated as controlled substances and assigned to one of five schedules by the Drug Enforcement Agency, Department

of Justice, under the Comprehensive Drug Abuse, Prevention, and Control Act of 1970 and any other drugs designated for local control by the Medical Treatment Facility Commander, precious metals, hazardous materiel, small arms, ammunition, explosives) regardless of dollar value.

B. Gains and losses of classified items, regardless of dollar value.

C. Gains and losses of pilferable items when the unit price times the quantity is equal to or greater than \$2,500.00 for each stock number.

D. Any inventory loss when there is an indication or suspicion of fraud, theft or negligence.

E. Repetitive losses when the cumulative dollar value of the inventory losses equals or exceeds the projected cost of the financial liability investigation.

F. Bulk petroleum when the loss exceeds the stated allowance.

070808. Procedures for an Investigation

A. Accountability and Responsibility. For unresolved inventory losses which meet the criteria set forth in paragraphs 070806 and 070807, above, a DD Form 200 is required to relieve accountable or responsible officers from responsibility, to substantiate adjustment of the inventory and accounting records to the inventory on hand, and to identify problem areas or trends for corrective actions. A financial liability investigation should be conducted by a person who is not directly supervised by the accountable or responsible officer. It shall include, as a minimum, the following actions:

1. Review and evaluate existing procedures for their adequacy in protecting property.

2. Determine compliance with prescribed regulations and procedures.

3. Determine who is involved and what responsibilities they have been assigned.

4. Determine whether simple or gross negligence or abuse is evident.

5. Review of causative research conducted.

6. Determine the cause or the probable cause of the inventory loss.

7. Recommend actions to minimize recurrence of the inventory loss.

B. Review the Adequacy of Procedures in Protecting Property

1. Physical Security Review. Determine if storage facilities are adequate to ensure proper safeguarding of all items, especially those items that are sensitive, classified, or subject to pilferage. The review should include an evaluation of compliance with regulatory requirements, procedures to determine degree of susceptibility of items to theft or pilferage, and lessons to be learned from losses that have been experienced.

2. Receipt, Storage, and Shipment Procedures Review. Determine if adequate procedures exist to prevent loss from theft or pilferage during receipt, storage, or shipment. The degree of protection should be commensurate with statutory and regulatory requirements, the degree of susceptibility to theft or pilferage, and experienced losses.

C. Determine Procedural Compliance. Determine if the responsible persons have complied with existing procedures to protect Government property. If they have not complied with the procedures, determine if they failed to comply or were instructed not to comply.

0709 PETROLEUM PRODUCT/LOSSES

070901. Loss Expectancy. Some losses are unavoidable in the handling and storage of volatile products. These losses can be controlled by management actions to limit the rates of loss for such products so that standards are not exceeded. For this reason, Volume II, chapter 9, of DoD 4140.25-M, "Management of Bulk Petroleum Products, Storage and Distribution Facilities." provides authorized loss allowances to accommodate product losses normally expected. Losses are categorized as in-transit, operating, and determinable. These categories are defined in Volume II, chapter 9, of DoD 4140.25-M. However, any trends, such as a pattern of losses within the allowable percentage, shall require further research and investigation.

070902. In-Transit Losses. Losses of product received at DoD activities are allowable only when the actual loss is within the authorized allowance. When a loss exceeds the allowance, a portion of the loss is not allowable, and the entire loss will be reported as prescribed in Volume II, chapter 9, of DoD 4140.25-M. Causative research, as described in paragraph 070803.C, shall be performed if there is any suspicion of negligence or abuse on the part of U.S. Government personnel who contributed to the loss.

070903. Operating Losses. Terminal operating loss allowances for various types of petroleum products are prescribed in Volume II, chapter 9, of DoD 4140.25-M. When the loss exceeds the stated allowance, a portion of the loss is not allowable; and the entire loss must be researched and reported in accordance with the provisions in section 0708.

070904. Determinable Losses. Losses which occur from determinable causes (such as tank overflows, spills, pipeline breaks, fire or unrecoverable tank bottom) can normally be precluded or greatly minimized by effective management. These losses shall be researched and reported in accordance with section 0708 of this volume.

DD FORM 200, FEB 91 (BACK)

Table 7-1 (CONT)

DEFINITIONS

1. Abuse. Willful misconduct or deliberate unauthorized use.
2. Accountability. The obligation imposed by law, lawful order, or regulation on an officer or other person for keeping an accurate record of property documents, or funds. The person having this obligation may or may not have actual possession of the property, documents, or funds.
3. Accountable Officer. An individual appointed by proper authority who maintains item and/or financial records in connection with Government property, irrespective of whether the property is in his or her possession for use or storage, or is in the possession of others to whom it has been officially entrusted for use or for care and safekeeping.
4. Acquisition Cost. Consists of the amount paid for the property, less both trade and cash discounts, plus the transportation costs.
5. Appointing Authority. An individual designated in writing by the approving authority. The approving authority may act as the appointing authority. The appointing authority appoints financial liability officers, if required; approves or disapproves the recommendations of the responsible officer, reviewing authority, or financial liability officer; and recommends actions to the approving authority. The appointing authority is normally senior to the responsible officer, reviewing authority, accountable officer, and financial liability officer.
6. Approving Authority. The approving authority makes determinations to either relieve involved individuals from responsibility and/or accountability or approve assessment of financial liability. The approving authority may act as the appointing authority or designate an appointing authority in writing. DoD Component regulations shall designate who may serve as the appointing authority. The approving authority is normally senior to the appointing authority.
7. Collective Liability. Where more than one individual may be liable for a debt, both collectively or individually.
8. Commander. An individual vested with command authority in a DoD Component.
9. Controlled Inventors Items. Those items designated as having characteristics which require that they be identified, accounted for, secured, segregated, or handled in a special manner to ensure their safekeeping and integrity. Controlled inventory items in descending order of the degree of control normally exercised are:
 - a. Classified Items. Material which requires protection in the interest of national security.
 - b. Sensitive Items. Material which requires a high degree of protection and control due to statutory requirement or regulations, such as narcotics and drug abuse items; precious metals;

items which are of a high value, highly technical, or a hazardous nature; and small arms, ammunition, explosives, and demolition material.

c. Pilferable Items. Materials having a ready resale value or application to personal possession and which is, therefore, especially subject to theft.

10. Culpability. Determination of fault.

11. Deliberate Unauthorized Use. Willful or intentional use without right, permit, or authority.

12. Discrepancies. The loss, gain, damage, or destruction of Government property.

13. Financial Liability. The statutory obligation of an individual to reimburse the Government for lost, damaged, or destroyed Government property as a result of negligence or abuse.

14. Financial Liability Officer. An individual who is appointed in writing by the appointing authority to conduct an investigation to determine responsibility for loss, damage, or destruction of Government property. Individuals so appointed shall not be the accountable or responsible officer or have any direct interest in the property being investigated. The individual shall be a commissioned officer; warrant officer; enlisted member in grades E-7, E-8, or E-9; or a civilian employee GS-07, or above. However, the financial liability officer is normally senior to the person(s) directly involved with the discrepancy. The appointing authority may act as the financial liability officer.

15. Government Property. See “property” (definition 25).

16. Gross Negligence. An extreme departure from the course of action to be expected of a reasonably prudent person, all circumstances being considered. The act is characterized by a reckless, deliberate, or wanton disregard of foreseeable consequences.

17. Industrial Property. As distinguished from military property, means any contractor-acquired or Government property, including materials, special tooling, and industrial facilities, furnished or acquired in the performance of a contract or subcontract.

18. Investigation. Means of determining the facts related to loss, damage, or destruction of Government property; determining the present condition of such property; receiving recommendations as to disposition, retention, and further accountability for such property; or determining the responsibility for loss, gain, damage, or destruction of Government property.

19. Item. A generic term meaning any article of material which is produced, stocked, stored, issued, or used.

20. Liability. The state of being responsible or answerable for the loss, gain, damage, or destruction of Government property.

21. Negligence. The failure to act as a reasonable prudent person would have acted under similar circumstances. An act or omission that a reasonably prudent person would not have committed or omitted under similar circumstances and which is the proximate cause of the loss of, damage to, or destruction of Government property. Failure to comply with existing laws, regulations, or procedures may be considered as evidence of negligence.
22. Personal Arms or Equipment. Equipment or clothing issued to individuals for their sole use and care, such as weapons, personal retention items mobility kit bags, flight jackets, parkas, and similar items. In defining personal arms or equipment, determine how the property is used by the member, and whether it is turned in at the end of the work shift. This is especially true when dealing with portable radios and hand tools. A portable radio, for example, is personal equipment when an individual uses it constantly, carries it wherever he or she goes, and has it for an indefinite period of time. However, it is not personal equipment when the individual has it for a specified time while on duty, and turns it in to be used by others at the end of a shift.
23. Personal Property. Property of any kind or any interest therein, except real property, records of the Federal Government, and Naval vessels of the following categories: aircraft carriers, battleships, cruisers, destroyers, and submarines.
24. Probable Cause. Reasonable grounds for belief.
25. Property. Anything that may be owned. As used in the military establishment, this term is usually confined to “tangible property,” including real estate and material. For special purposes and as used in certain statutes, this term may exclude such items as the public domain, certain lands, certain categories of naval vessels and records of the Federal Government.
26. Property Record. General term referring to any record of property. It is inclusive not only of stock record accounts, but also of organization and installation property books, clothing and equipment records, hand receipt records, or any system of files for property records. Also called, “property account.”
27. Proximate Cause. The cause which, in a natural and continuous sequence of events unbroken by a new cause, produced the loss or damage. Without this cause the loss, gain, or damage would not have occurred. It is further defined as the primary moving cause, or the predominate cause, from which the loss, gain, or damage followed as a natural, direct, and immediate consequence.
28. Record. All forms of information (e.g., narrative, graphic data, and computer memory) registered in either temporary or permanent form so that it can be retrieved, reproduced, or preserved.
29. Research. An investigation of potential or actual discrepancies between physical count and recorded balances. The purpose of the research is to determine the correct balance and determine the cause of discrepancies. There are three types of research.

a. Postcount Validation. A comparison of physical count with potential recorded balances or another count, with consideration of transactions that have occurred recently. The purpose of postcount validation is to determine the validity of the count. Postcount validation research ends when the accuracy of the count has been verified or when any necessary recounts have been taken.

b. Preadjustment Research. A review of potential discrepancies, which involves the consideration of recent transactions and verification of catalog data. The purpose of preadjustment research is to determine the correct balance. Preadjustment research ends when the balance has been verified or the adjustment quantity determined.

c. Causative Research. An investigation of discrepancies (i.e., gains and losses) consisting of (as a minimum) a complete review of all transactions to include supporting documentation: catalog change actions, shipment discrepancies, and unposted or rejected documentation occurring since the last completed inventory; the last location reconciliation which included quantity; or back one year whichever is sooner. The purpose of causative research is to identify, analyze, and evaluate the cause of inventory discrepancies with the aim of eliminating repetitive errors. Causative research ends when the cause of the discrepancy has been discovered or when, after review of the transactions, no conclusive findings are possible.

30. Responsibility. An obligation for the proper custody, care, and safekeeping of property or funds entrusted to the possession or supervision of an individual.

31. Responsible Officer. An individual appointed by proper authority to exercise custody, care, and safekeeping over property entrusted to his or her possession or under his or her supervision.

32. Responsible Person. An individual issued Government property on the basis of a property receipt.

33. Reviewing Authority. An individual designated in writing by the approving authority to review and analyze the results of supply system stock research.

34. Simple Negligence. see “negligence” (definition 21).

35. Standard Price. The unit price of an item, as it is recorded in the Standard Catalog for use in financial and accountable records of the holding Service of Agency. (An item not included in the appropriate Service or agency pricing catalog shall be priced at original cost, if available, or if not known, at fair market value, as stated in paragraph 070208.A.2, of this chapter.)

36. Stock Record. A perpetual inventory form of record which shows by nomenclature, the quantities received, issued, and the balance on hand. The stock record shall show by item the receipt, issue, and transfer of accountability of property; the balances on hand; and such other identifying or stock control data as required.

37. Supply System Material. Supply system material refers to those inventories, wholesale and below wholesale, where a stock record account is required to be maintained.

38. Willful Misconduct. Intentional damage, destruction, misappropriation, or loss of Government property.

CHAPTER 8**FOREIGN NATIONAL EMPLOYEES SEPARATION PAY ACCOUNT, DEFENSE****0801 OVERVIEW**

080101. Purpose. This chapter provides policy and procedures applicable to the Foreign National Employees Separation Pay Account, Defense.

080102. Background

A. The National Defense Authorization Act for Fiscal Years 1992 and 1993 authorized a trust fund account to accumulate obligations for separation payments to foreign national employees of the Department of Defense. Title 10, U.S.C., section 1581 provides for establishment and operation of the account.

B. Except as provided herein, all separation payments for DoD foreign national employees shall be made from this account. All amounts that were obligated for such separation payments, but not expended before enactment, shall be transferred to this account. Similar amounts obligated after enactment shall also be transferred into this account on a quarterly basis. Amounts in the account shall remain available until expended.

C. This guidance applies to all Department of Defense appropriations. This guidance does not apply to activities under the Defense Business Operations Fund. Business Operations Fund activities shall continue to make necessary foreign national employee severance payments under established Business Operations Fund procedures. This guidance also does not apply to the Foreign Military Sales Trust Fund. FMS Trust Fund activities will continue to accrue and disburse separation pay to their foreign national employees from the FMS Trust Fund.

0802 POLICY AND PROCEDURES

080201. Amounts to be obligated for foreign national employees separation pay shall be determined and calculated at the installation level in accordance with applicable host country agreements. These amounts shall be obligated in the full amount of the liability that accrues during the fiscal year, without regard to whether the amount currently is payable. Disbursement of these amounts shall be made from the Foreign National Employees Separation Pay Account, Defense.

080202. Foreign national employee separation pay accruals (obligations) shall be transferred quarterly to the Foreign National Employees Separation Pay Account, Defense. Such amounts are to be transferred via an SF 1081, "Voucher and Schedule of Withdrawals and Credits."

080203. The Director, Defense Finance and Accounting Service, shall administer the Account as well as perform related accounting functions.

080204. Administrative subdivisions shall be established within the Account for each DoD Component that budgets for foreign national employee separation pay. Deposits into and payments from the Account shall be recorded in the applicable DoD Component's subdivision.

080205. Except for those organizations operating within the Defense Business Operations Fund, all separation payments for foreign national employees from DoD appropriations shall be disbursed from the Foreign National Employees Separation Pay Account. Requests for authorization to disburse from this Account shall be forwarded to the servicing DFAS Center.

080206. The appropriation symbol for the Foreign National Employees Separation Pay Account, Defense is 97X8165. The applicable receipt account is 97X8165.1.

080207. Transfers. Transfers into the Account shall be made as follows:

A. All amounts accrued (obligated) for foreign national employee separation pay liability during each fiscal year by any DoD Component shall be transferred into the Account on a quarterly basis. The SF 1081 will be used to effect such transfers.

B. When required payments from a DoD Component's subdivision of the Account exceed the balance in that Component's subdivision, additional amounts must be obligated, from funds otherwise available to a DoD Component, and subsequently transferred into the Account under authority provided in the National Defense Authorization Act for Fiscal Years 1992 and 1993. Such transfers shall equal the amount of the payment in excess of the balance of the Component's subdivision of the account, plus any amounts that are accrued but not currently payable.

C. Each DoD Component, in conjunction with the Director, Defense Finance and Accounting Service, shall perform at least an annual review of the amounts in its respective Account subdivision and compare such amounts to its foreign national separation pay liabilities. The purpose of this review is to ensure that sufficient funds have been obligated for future payments. If required, additional amounts must be obligated, from funds otherwise available to a DoD Component, and subsequently transferred into the Account under authority provided in the National Defense Authorization Act for Fiscal Years 1992 and 1993. Both parties shall certify to the accuracy of the information. This annual review shall occur each April. The DFAS and the DoD Components also shall maintain an audit trail of accountable records and assure the establishment of an effective internal control system for the entire account.

080208. Deobligations. Each DoD Component shall notify its servicing DFAS Center of all deobligation transactions, adjustments and corrections, in a timely and accurate manner. The respective Center will record adjustments and corrections in the accounting records.

080209. Availability of Deobligated Amounts. Amounts deobligated by the DoD Components shall remain in the Account for a period of two years from the date of deobligation. During that time, the deobligated amounts are to be available for recording, adjusting, and liquidating amounts properly chargeable to the liability of the respective DoD Component. Any such deobligated amount remaining in the Account after the two year period shall be canceled.

0803 SUBSEQUENT DISBURSEMENTS

080301. Validation of Funds Availability. When approved by the Defense Finance and Accounting Service, disbursements for foreign national employee separation payments may continue to be made by local disbursing offices, including the Department of State, using DoD cross-disbursement procedures as applicable. Each DoD Component and non-DoD office, e.g., State Department, must coordinate its disbursement/cross-disbursement actions with the servicing DFAS Center to validate the availability of funds prior to disbursement. A positive balance in the Account is necessary prior to payment; therefore, both DoD and non-DoD activities will verify from the servicing DFAS Center that sufficient funds are available prior to submitting vouchers to servicing disbursing offices for employee payments.

080302. Cross-Disbursements. When cross-disbursement procedures are used, the Defense Finance and Accounting Service shall be advised prior to each actual disbursement.

0804 RESPONSIBILITIES

080401. DFAS-Indianapolis Center. The DFAS Indianapolis Center:

A. Oversees the recording and reporting of all required accounting information. Performs the consolidation of the feeder reports for submission to the DFAS ATTN: DFAS-HQ/G. Performs the required Treasury cash reporting and reconciliation.

B. Maintains a general ledger account structure with necessary subsidiary ledgers to support the various accounts. The detail subsidiary ledgers may remain at the DFAS Center or DoD Component field level activities. However, subsidiary ledgers and an audit trail must be accurately maintained.

C. Processes all accounting transactions through the accounting network in a timely and accurate manner.

D. Provides accurate and timely accounting service to customers, e.g., DoD Components, upon request. Coordinates the accounting process with other DFAS Centers.

E. Based on available information, performs a positive funds control function and alerts the DoD Component when necessary to assure a timely transfer.

F. Provides a point of contact with telephone/fax numbers to the DoD Components.

080402. DoD Components. The DoD Components:

A. Determine the obligation amount and notify the servicing DFAS Center in a timely manner to accomplish the quarterly transfer. This information will be the basis for future SF 1081 processing and for updating the accounting records.

B. Process the SF 1081 and return a copy to the servicing DFAS Center in a timely manner.

C. Manage all pertinent agreements regarding foreign national employees. A copy of all agreements and/or arrangements, including changes and amendments shall be forwarded to the servicing DFAS Center.

D. Notify the servicing DFAS Center of all changes, adjustments, or cancellations of previously reported information at least monthly.

E. Provide the servicing DFAS Center with a Point of Contact, with telephone/fax numbers, and the current mailing address.

CHAPTER 9**INTERNATIONAL AGREEMENTS****0901 OVERVIEW**

090101. **Purpose.** This chapter establishes the financial procedures that shall be followed when DoD Components initiate, develop, and request formal review of international agreements and any annexes, appendices, amendments, or modifications thereto.

0902 GENERAL

090201. DoD Directive 5530.3, “International Agreements,” provides the DoD policies for the approval of international agreements and establishes various categories of international agreements. The term “international agreement” includes any agreement with one or more foreign governments (including their agencies, instrumentalities, or political subdivisions) or with an international organization. It includes any document identified as an international agreement, memorandum of understanding, memorandum of agreement (MOA), memorandum of arrangements, exchange of notes, exchange of letters, technical arrangement, etc. It does not include Foreign Military Sales (FMS) transactions and contracts entered into under the provisions of the Federal Acquisition Regulation or agreements financed with security assistance funds. The latter agreements are implemented under provisions identified in Volume 15 of this Regulation.

090202. Pending a revision to DoD Directive 5503.3, the DEPSECDEF signed a memorandum, on September 14, 1994, implementing streamlined procedures for the development of International Cooperative Research and Development Agreements. In that memorandum, the DEPSECDEF designated the Principal Deputy Assistant Secretary of Defense for Dual Use Technology Policy and International Programs (PDASD(DUTP&IP)) as the DoD manager for the development of International Research and Development Agreements. Accordingly, the PDASD(DUTP&IP) issued procedures for streamlining the development and coordination of international agreements. Those procedures include instructions for the preparation of a Summary Statement of Intent (SSOI). The SSOI provides to international agreement reviewers basic information pertaining to proposed agreements. Instructions for the preparation of a SSOI are contained in Appendix A at the end of this chapter.

090203. There are various types of international agreements with different financial implications. Regardless, such international agreements must be consistent with established DoD issuances, unless approval to deviate from such guidance is obtained from the proponent of that applicable guidance.

090204. Each international agreement package submitted for coordination must contain information including legal authority, fiscal information, and either an overview of the

proposed agreement, a Summary Statement of Intent (SSOI), or the proposed agreement. The fiscal information should identify all financial implications of the agreement and provide all information required for a complete understanding and analysis of those implications. The legal information should identify the statutory authority for any obligation or expenditure of U.S. appropriated or nonappropriated funds involved in the agreement, as well as the legal basis for any use of U.S. Government property by or on behalf of a foreign government or international organization contemplated by the agreement.

090205. DoD Directive 5530.3 stipulates that no international agreement shall be negotiated or entered into without the concurrence of the Office of the Under Secretary of Defense (Comptroller). In the case of a proposed international agreement within the approval authority of a DoD Component outside the Office of the Secretary of Defense, concurrence shall be obtained from the DoD Component senior financial manager. A checklist has been developed and shall be used to ensure that all financial and pricing requirements have been taken into consideration. The checklist is illustrated at the end of this chapter in Appendix B.

0903 LEGAL CONSIDERATIONS

090301. General. Legal authority information is critical to the preparation of an agreement and is the basis for determining the legal authority for entering into the agreement and subsequent financial requirements. The legal information is used by financial management officials to review applicable international agreements and determine the existence of any special pricing or funding requirements. The legal information normally provides the following information:

A. Special Legal Pricing Requirements. The legislative authority to enter into an agreement also may mandate special pricing requirements on the United States. Thus, the legal authority information should identify any peculiar pricing that must be reflected in the agreement. In the absence of specific legal authority to price on other than a full cost basis, DoD services and materials shall be priced on a full cost basis.

B. Legal Requirement for the Disposition of Monies Collected by the Department of Defense. This is especially important because amounts collected as reimbursements for DoD material or services or new procurements must be deposited into the miscellaneous receipts of the U.S. Treasury, unless there is specific legal authority to credit collections to a DoD appropriation or fund. The legal citation for the disposition of monies clearly should be stated. Special care must be taken with respect to the cooperative development or production agreements described in paragraphs 090510.B. and 090510.C. Options available for deposit of collections include deposit to an appropriation account, a commercial bank account approved by the Treasury Department, or a U.S. Treasury deposit account.

C. Legal Requirement for Recognition of Obligational Authority in DoD Appropriations. Obligational authority can be created only to the extent that cash is collected and

deposited into the U.S. Treasury, unless there is legal authority to create obligational authority on a dependable undertaking (contract authority) basis.

D. Special Prohibitions or Requirements on the Use of Appropriated Funds.

The legal information section should identify any special prohibitions or requirements on the use of appropriated funds in support of the agreement. These special prohibitions are in addition to the standing prohibitions discussed in paragraph. An example of a special requirement is when FMS credit funds are to be used to finance co-production or licensed production in a foreign country. The approval of such use requires the Secretary of State first to advise the Congress. (See Section 42(b) of the Arms Export Control Act (AECA).)

0904 FISCAL CONSIDERATIONS

The fiscal information section documents the various financial considerations involved in implementing an international agreement. Specific considerations to be included in the fiscal information section are as follows:

090401. Financing Sources for U.S. Costs

A. The fiscal information section shall include a schedule of proposed financing sources to be used by the sponsoring DoD Component to implement the agreement. Financing sources may be current appropriations or funds, provision for inclusion in the Future Years Defense Program (FYDP), or a statement of an intent to include in future program and/or budget requests or FYDPs. This information may be either in narrative or schedule form. A schedule form is preferred and is illustrated in Table 9-1. When current appropriations or funds are to be used as a financing source, the fiscal information section should identify the specific appropriation(s) or fund(s), the FYDP Program Element, the amount(s) available therein, and the respective amounts to be used. If the source of financing in current appropriations is in two accounts, the applicable sources of financing should be supported by details showing the specific financing appropriation account symbols.

B. If the proposed international agreement is, in fact, a firm order for goods or services, a formal certification of fund availability shall be included. Applicable funds shall be committed in accordance with Volume 3 of this Regulation.

TABLE 9-1 EXAMPLE INTERNATIONAL AGREEMENT FINANCING SCHEDULE
(\$ in Millions)

Financing Sources	FY 1996	FY 1997	FY 1998	Totals
U.S./PE 0603456	1.5	1.0	0.0	2.5
U.S./PE 0603567	0.0	0.5	1.0	1.5
France	1.5	1.5	1.0	4.0
Germany	1.5	1.5	1.0	4.0
Totals	4.5	4.5	3.0	12.0

090402. Provisions for the Disposition of Funds Collected. The fiscal information section should describe the planned disposition of any funds collected from the foreign country or international organization. The four possible alternatives for disposition of amounts collected are as follows:

A. Reimbursement to Financing DoD Appropriations or Funds. If reimbursements are to be returned to the financing DoD appropriation accounts, the fiscal memorandum or SSOI should identify the accounts to be reimbursed. This identification need not specify the fiscal year of the appropriations. Normal reimbursable accounting procedures shall apply.

B. Deposit in the U.S. Treasury as Miscellaneous Receipts. Without statutory authority to reimburse DoD appropriations or funds or to make other disposition, collections shall be deposited into the U.S. Treasury as miscellaneous receipts. The miscellaneous receipt account to be credited with such collections shall be specified by the depositor. DoD accounting systems should accumulate costs incurred on behalf of the other participant(s), establish an accounts receivable identified to the applicable miscellaneous receipts account and bill such amounts.

C. Deposit in a U.S. Treasury Deposit Account. If a Treasury deposit account has been established for the agreement, the fiscal memorandum shall identify the appropriate U.S. Treasury account symbol.

D. Deposit in a Commercial Bank Account.

1. If execution of a proposed agreement contemplates use of a commercial bank account for a foreign country's funds, such a provision shall be included in the fiscal memorandum or SSOI with a description of intended bank account operation. Preference shall be given to commercial banks which are designated depositories of the U.S. Treasury Department. When approved, such accounts may be used for the deposit of monies from participating nations or international organizations and for payments made in accordance with direction from an authorized official. To determine whether a proposed institution is a Treasury

designated depository, contact the International Funds Branch, Department of Treasury, 3700 East West Highway, Room 6005, Hyattsville, Maryland 20782. The telephone number is (202) 874-8915.

2. For contracts administered by the Department of Defense, two funding accounts must be cited: the DoD appropriation account for the U.S. share and the commercial bank account for the share of the other participant(s). The fund citation on the contract shall indicate the commercial bank account rather than the normal accounting classification code. In this case, only the Department can draw down on the commercial bank account.

090403. Use of Amounts Credited. Foreign contributions collected by a DoD Component under terms of a cooperative project on a cost sharing basis from a foreign country or North Atlantic Treaty Organization (NATO) may be credited to a financing DoD appropriation or fund. Such contributions, however, are available only for the payment of the share of project expenses allocated to the foreign country or NATO making the contribution. The fiscal memorandum or SSOI should certify that such collections are to be used for purposes as prescribed herein. Payments for which such amounts are available include the following:

A. Payments to contractors and other suppliers (including the Department of Defense) and other participants acting as suppliers) for necessary articles and services.

B. Payments for any damages and costs resulting from the performance or cancellation of any contract or other obligation.

C. Payments or reimbursements of other program expenses, including program office overhead and administrative costs.

D. Refunds to other participants.

090404. Availability of Financing Sources. There are two general prohibitions on the use of appropriated funds for international agreements. In addition, the legal section may identify other prohibitions. It is implicit in the identification of the financing sources set forth in paragraph 090401, that funds are available. It is desirable, however, to include in the fiscal information section a certification that all legal and policy prohibitions on the use of funds have been complied with. The general prohibitions are as follows:

A. No funds designated by the Congress for NATO or major non-NATO cooperative research and development under 10 U.S.C. 2350a may be used to procure equipment or services from any foreign government, foreign research organization, or other foreign entity (including NATO participants) to the agreement.

B. U.S. Government military assistance funds (i.e. Military Assistance Program (MAP), FMS loans, or FMS credits) are not available to finance a foreign participant's share of the cost of a cooperative project authorized by section 27 of the Arms Export Control Act or a cooperative development project with a major non-NATO ally under 10 U.S.C. 2350a.

090405. Foreign Currency, Services, and Materials Provided. A contribution to an international agreement may be in the form of currency, material, or services. In the event that a foreign country or international organization is to provide services or material as part of its equitable share, a price analysis must be made to ensure the valuation assigned to such services and materials is fair and reasonable. The fiscal information section shall summarize the results of such an analysis. The price analysis shall be based on prior cost experience for the item or service to be provided, a comparison with DoD cost for the item or services for similar services; and shall consider all applicable circumstances in the price analysis. When a foreign contribution is in the form of foreign currency or the awarding of a contract in a foreign country, the foreign currency contribution generally shall be valued at the exchange rate current at the time that the agreement is prepared. There shall be no subsequent modification of the valuation because of changes in the currency exchange rate. Exceptions to this general rule require advance consultation with the Treasury Department working through the OUSD(C). The fiscal memorandum or SSOI shall display the value of the currency in terms of U.S. dollars. Also, the use of foreign currency requires approval by the Department of the Treasury. Such approval should be documented in the fiscal information section. Chapter 12, Volume 5, of this Regulation, provides guidance for the use of foreign currency.

090406. Valuation of DoD Services and Material. The value of all non-financial (articles, materiel, background data/information, software, or services) contributions to an agreement by the Department of Defense is to be determined and considered for the evaluation of equitableness of the proposed project. The fiscal memorandum or financial section of the SSOI shall describe the non-financial contributions, indicate their value, and state the method used in determining the valuation. The alternatives for determining the value of non-financial contributions are as follows:

A. Full Costs. It is important not to confuse the act of accumulating full costs with the necessity to bill cost. Chapter 1 of Volume 11A of this Regulation provides guidance on the specific cost elements and identification methods for pricing sales to private parties. These same methods shall be followed in valuing non-financial contributions to an international agreement.

B. Other Than Full Costs. An agreement that requires the identification or use of less than full cost is normally authorized only when a reciprocal pricing agreement has been entered into by the Department and the other party (parties) to the agreement. The agreement should demonstrate that costs to be excluded mutually have not been considered by the other party in a determination of equitableness.

C. Cost Recoupment Waivers. In the event that less than full cost is being identified on the basis of a cost waiver, the date of the waiver and its approving authority must be provided in the SSOI. Copies of such waivers shall be made available on request.

090407. Reasonable and Necessary Expense. Any obligation of DoD appropriations under an international agreement must be supported by a showing that it is a reasonable and necessary expense required for the accomplishment of DoD missions, unless the use of DoD funds for other than a DoD mission specifically is authorized by statute.

0905 PROPOSED AGREEMENT

090501. An agreement must contain language that implements the requirements established by U.S. law or regulation. This section discusses the financial policies that must be followed and provides appropriate cross references to other parts of this Regulation that provide more specific guidance.

090502. Fund Availability Qualification

A. As a general rule, there is no intent to create a DoD financial obligation upon signature of an agreement. The major exception to this rule occurs when an agreement is entered into in lieu of a contract awarded under the provisions of the Federal Acquisition Regulation. However, if the agreement does not contain an appropriate qualification statement, it may be deemed an “obligating document.” In this event, the dollar value of the DoD contribution shall be recorded immediately as an obligation of currently available appropriation or fund accounts. If the recording of such an obligation results in exceeding the fund availability in an appropriation or fund account or in an administrative subdivision thereof, an apparent violation of the Antideficiency Act (31 U.S.C. 1341 or 1517(a)) shall have occurred. Guidance on the investigation and reporting of such violations is contained in Volume 14 of this Regulation. Normally, the signatory of a contract or agreement is named as the individual responsible for such a violation. The major exception would be when finance and accounting officials improperly have certified the availability of funds.

B. Examples of typical fund availability qualification clauses inserted in an international agreement follow:

1. “All undertakings of the U.S. Government under this MOA and any annexes, appendices, amendments, or modifications thereto, are expressly subject to the availability of U.S. funds for such purpose.”

2. “The obligations of each participant under this MOA are subject to the availability of funds for those purposes.”

090503. Reconciliation of Agreement Dollar Value to Financing Sources. An international agreement must set forth the dollar value of the agreement and portions of the dollar value that must be borne by each participant. This cost sharing may be in the form of monies, services, or material. A preliminary requirement is to ensure that any obligations that the Department may be required to incur in implementation of the agreement have been identified in the fiscal information section.

090504. Adherence to Prescribed Pricing Rules.

A. In the event that an international agreement provides for DoD services or material to be rendered, there must be assurance that proper pricing procedures have been followed. Paragraphs 090405 and 090406 discuss special requirements that may be applicable to certain agreements. The text of an agreement must be reviewed carefully to ensure compliance with these paragraphs. An area of special pricing attention is charges for existing DoD technical data and computer software, or such data developed outside the agreement.

B. When the Department provides pre-existing technical data and computer software or such data developed outside the scope of an agreement, it normally is referred to as background data. Generally, when Department developed background data is a non-financial contribution, its value for determining equitability is its full (total) cost of development, adjusted for any special modifications, shipping, installation, etc.

C. Background data may be provided for use in furtherance of the purpose of an international agreement as long as it is used solely in connection with the purpose of the agreement. However, an agreement must specify that if the background information is used for any other purpose, approval of the originating participant must be obtained. The following specifics apply:

1. If the data are to be used for cooperative production purposes, the Department must receive appropriate financial credit as part of the DoD share of project cost, unless a cost recoupment waiver has been approved. Any provision for waiver should be identified in the fiscal information section.

2. If the data is to be used for development and production purposes, a technology transfer fee may be applicable for the development phase. This fee may be offset by a nonrecurring cost recoupment charge when production occurs.

3. All background information exchanged shall be used only for the purposes of the agreement, and is not to be transferred to any third party without the approval of the originating participant.

090505. Determination of Program Equitableness.

A. DoD policy requires all international agreements to be equitable to the United States. The Summary Statement of Intent (SSOI) or accompanying documentation to a proposed international agreement must clearly explain why the agreement is considered equitable to the United States. Prior to approval of all proposed international agreements, a determination of agreement equitability must be made by the approving DoD officials. It is critical that sufficient detail and information be provided to clearly demonstrate to those DoD officials that the proposed international agreement is equitable to the United States.

B. Every proposed international agreement that requires the United States to provide more than an equal share of the resources, or results in the United States receiving less than an equal share of the benefits, must be explicitly explained and justified in the SSOI or supporting documentation accompanying the proposed agreement. For these purposes, an equal share means a contribution or benefit of exactly the same value as the shares of all other participating nations. Equal share of the resource requirements contributed to an international agreement includes nonfinancial contributions (i.e., background information, manpower, facilities, equipment, hardware, software, etc.), as well as funds. Nonfinancial contributions shall be valued at the DoD's full cost. Section 090406 provides information on the valuation of DoD services and material.

C. Calculation of Expected U.S. Funding Share. In support of an equitability determination by DoD approving officials, the expected U.S. funding share should be calculated and presented in the SSOI or supporting documentation using one of the methods below:

1. Number of Participants Method. This is the preferred method of calculating the expected U.S. funding share for cooperative feasibility studies, research and development (R&D) efforts, and test and evaluation (T&E) programs and for agreements that establish management or oversight program offices. It is the method that should be employed when estimated unit production quantities are not known. Under the number of participants method, the expected U.S. funding share is determined by dividing the agreement costs by the number of participating nations. A favorable U.S. funding share is where all participating nations equally share the total cost and the benefits. Equal funding of an international agreement by all participating nations, when the benefits are shared equally, does not require an equitability justification. An example of this method is provided in Table 9-2.

2. Estimated Unit Production Method. This is the preferred method of calculating the U.S. funding share for an agreement that cooperatively establishes a program for the production of defense articles or weapon systems. It is used when specific unit production quantities are known or can be estimated. Under the unit production method, the U.S. funding share is considered to be equitable when the DoD funding is proportionately equal to the share of the program production to be received by the United States. An example of this method is provided in Table 9-3. An equitability statement is required in the SSOI or accompanying documentation, and it must clearly present the calculation showing production estimates in relation to the total cost of the international agreement or production program.

3. Other Methods of Calculation. There may be situations when neither of the above two methods apply, and another calculation is possible. For example, an agreement under the auspices of NATO, between the United States and other NATO nations, may require the United States to contribute an amount equal to the usual percentage of U.S. contributions to NATO. An equitability statement is required in the SSOI or accompanying documentation. The calculation and justification for use of that calculation must be clearly presented.

D. U.S. Funding Share Determined by Negotiation. Occasionally, contributions to an agreement, by participating nations, may be determined by negotiation and are not based on one of the above methods. For example, an agreement may call for participating nations to unequally share the benefits or rights to the benefits, and share the cost of the agreement in the same proportions as they share the benefits, or an agreement may require equal sharing of the benefits, but require the United States to contribute more than other participating nations. In such agreements, an equitability statement is required in the SSOI or accompanying documentation and must provide a compelling explanation that justifies the proposed sharing of costs and benefits. Detail and very explicit information must be provided. Without a compelling justification, the agreement will not be approved. Negotiation that results in the United States paying more than an equal share for serving as the contracting nation, serving as the program manager, using a U.S. prime contractor, or receiving other similar privileges do not make an agreement equitable and, generally, will not be approved.

**CALCULATION OF EXPECTED U.S. FUNDING SHARE USING THE
NUMBER OF PARTICIPANTS METHOD
(Dollars in Millions)**

Step 1: Determine the total program cost to the U.S. and other participants.

U.S. Share	\$150
Other Participants	200
Total Cost	\$350

Step 2: Determine the percentage of the U.S. share of the total costs under the agreement.

U.S. Share	\$150 = 43% share
Total Cost	350

Step 3: Determine the total number of participants and calculate the U.S. share on a percentage basis.

Total Participants	3
U.S.	1 = 33 1/3% U.S. as a percentage of Participants

Step 4: Compare the results of step two to step three. If the result of step two is equal to or less than the result of step three, the U.S. appears to be paying a favorable expected funding share.

Step 5: If the result of step two is greater than the result of step three, the U.S. appears to be paying more than its mathematically expected funding share. This situation should be specifically explained and justified in the SSOI or other accompanying justification.

TABLE 9-2

**CALCULATION OF EXPECTED U.S. FUNDING SHARE USING THE
ESTIMATED UNIT PRODUCTION METHOD
(Dollars in Millions)**

Step 1: Determine the total program cost to the U.S. and other participants.

U.S. Share	\$150
Other Participants	<u>200</u>
Total Cost	\$350

Step 2: Determine the percentage of the U.S. share of the total costs under the agreement.

U.S. Share	\$150
Total Cost	350 = 43% share

Step 3: Determine the total number of production units to be produced under the agreement.

U.S. Units	20,000
Other Participants	<u>40,000</u>
Total Production	60,000

Step 4: Determine the percentage of the U.S. share of the total number of units to be produced under the agreement.

U.S. Units	20,000
Total Units	60,000 = 33% share

Step 5: Compare the results of step two to step four. If the result of step two is equal to or less than that of step four, the U.S. appears to be paying a favorable funding share.

Step 6: If the result of step two is greater than the result of step four, the U.S. appears to be paying more than its mathematically expected funding share. This situation should be specifically explained in the narrative determination of program equitableness.

TABLE 9-3

090506. Sales and Transfers of Technical Data Developed Under an Agreement. An agreement should provide that, in the event technical data developed under the agreement is sold or transferred to third parties, a charge may be made to recoup a pro-rata share of each participant's investment. The agreement also must provide that background information and data developed outside the program not be retransferred without the prior approval of the owner of the information or data, and contain provisions for any applicable charges. For third party sales and transfers, or the addition of new participants, any recoupment charge for the information or data developed under the program must be shared on the basis of the participants' financial contribution to the development of the item or technology. The amount of the charge and the procedures for assessing and distributing it shall be determined mutually by the participants prior to the approval of any such third party sale consistent with the policies and laws of each participant. The agreement also should provide that any participant may reduce or waive the assessment of its share of the levy in accordance with its laws and policies. Furthermore, the agreement should provide for rights of use of information developed under the agreement for defense purposes of a participant without payment to the other participant(s).

090507. Taxes, Duties, and Similar Charges. Agreements may provide that, insofar as existing laws and regulations permit, the participants shall use their best efforts to ensure that readily identifiable taxes, customs duties, and similar charges on the program components and services shall not be levied in connection with the project. If an agreement obligates the U.S. Government to bear the cost of any U.S. taxes, duties, or similar charges levied in connection with the program, the legal memorandum or SSOI must identify the legal authority for such U.S. obligation.

090508. Advance of DoD Funds

A. An advance constitutes a disbursement of DoD funds before an authorized DoD official has certified that materials have been delivered or ordered services performed. An agreement shall not provide for DoD advance payments, unless the conditions for such advances, as set forth in Chapter 5, Volume 4, of this Regulation are met. Basically, advances to foreign countries are authorized when required for compliance with the laws and ministerial regulations of the foreign country and is further required by the agreement.

B. When possible, advances shall be made for no more than the amount necessary to fulfill the DoD share of project expenses for one month. Advances and prepayments shall not exceed the amount necessary to fulfill the DoD share of project expenses for a current fiscal quarter. If monies are paid in advance and deposited into commercial banks, provision must be made to ensure that the agreement requires:

1. payment of interest at competitive rates,
2. timely identification of interest earned by each party, and

3. interest disposition in accordance with the participants' instructions.

C. The DoD share of funding required to support an international project shall be obtained in full by appropriation, and no part of such funding shall be derived from interest earnings on U.S. contributions. In view of this policy, the U.S. Government share of interest earned on U.S. advance payments must be returned to the U.S. Treasury Miscellaneous Receipts Account 3210, "General Fund Proprietary Receipts, Defense Military, Not Otherwise Classified." The interest shall not be used to reduce a future call for funds, nor used for any project cost that would result in funding derived outside the appropriation process.

D. Advances of DoD funds in excess of 90 days or \$5 million require consultation with the Department of the Treasury. Contact with the Department of the Treasury shall be through the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)).

090509. Billing Requirements. When payments are to be made, the agreement or subsequent financial arrangements must include the following information:

A. Billing Cycle. Bills for incurred costs are to be rendered on a 30-day cycle. This is a U.S. Treasury requirement and must be adhered to by the Department of Defense. However, in the negotiation process and at the initiation of other participants, agreement may be reached on up to a 90-day billing cycle.

B. Collecting Office. The agreement or subsequent financial arrangements shall provide the name and address of the organization to which payments shall be made. It also is desirable to set forth a position title and a telephone number to which questions may be addressed.

C. Paying Office or Offices. The agreement or subsequent financial arrangements shall provide the name and address of the organization that is responsible for making payments under the agreement. It also is desirable to set forth a telephone number and a position title to which questions may be addressed.

D. Payment Terms. The payment due date shall not be more than 30 days from the date of the invoice, unless otherwise specified in the agreement.

E. Documentation in Support of Billings. The agreement or subsequent financial arrangements must identify the form of the bill and the specific supporting details.

F. Currency of Payment. Normally, payment shall be in the currency of the supplying nation or the lead country if joint financing is provided for in the agreement. The invoice shall identify the amount paid in foreign currency at the current exchange rate and the equivalent conversion rate in U.S. dollars.

090510. Special Types of Agreements

A. Agreements for Reciprocal Exchange of Materials or Services. These agreements must set forth the time period allowed for exchange of materials and services. They also must set forth financial settlements that must be made if the exchange does not take place. DoD services or materials provided are priced in accordance with chapter 1 of Volume 11A of this Regulation,

B. Cooperative Research, Development, Test and Evaluation, Technical Data Exchange, Co-production, Licensed Production, and Related Standardization Agreements That Are Not Implemented through the Security Assistance Program. Full costs must be identified and shared equitably. Cost sharing may be accomplished through the following:

1. Pooling of monies and designation of a lead country to manage the program, collect cash, and award contracts. Specific shares of program cost are set forth in the agreement.

2. No pooling of monies or designation of a lead country. Specific efforts to be accomplished by each participating country and estimated costs of such efforts are set forth in the agreement.

APPENDIX A
GUIDELINES FOR THE PREPARATION OF
SUMMARY STATEMENT OF INTENT (SSOI)

Header Information:

- Short Title of Proposed Project
- DoD Proponent
- Country/ies Involved

1. Overview of International Agreement

- Briefly describe the project. Be specific as to what the project will deliver. Is this a new or existing U.S. project? Is there currently a Memorandum of Understanding or other international agreement in effect that is applicable to this effort?
- Is this proposed for Nunn funding? If so, what technological development is to be pursued which is necessary to develop new defense equipment or munitions, or what existing military equipment would be modified to meet U.S. requirements?

2. Operational Requirement

- What U.S. operational requirement would this project satisfy and/or what critical deficiency or shortfall would this project address? If known, cite applicable documents.
- Briefly describe the project's objectives.
- Provide an estimated schedule for the project, and Initial Operational Capability (IOC), if applicable.

3. Partner Nation(s)

- Which nations are proposed partners? Which nations have agreed to be partners? What is the assessment (and your basis for it) of foreign interest/commitment?
- Briefly describe the proposed negotiation strategy and negotiation schedule.

- Describe any planned variations from the policy guidance contained in the latest approved version of the International Agreements Generator (“IA Generator”), and any resulting variations to the required International Agreement text that are known.
4. Legal Authority
 - State the statutory legal authority for the proposed agreement. If section 27 of the AECA is not being used, explain why not.
 5. Project Management
 - Briefly describe how the project will be structured and managed.
 6. Benefits/Risks to the United States
 - List the advantages and disadvantages of this cooperative project. Address project timing, developmental and life cycle costs, technology to be shared and obtained, impact on U.S. and foreign military capability, and rationalization, standardization and interoperability (RSI) considerations. Indicate whether there are any risks associated with conducting this project as an international cooperative program, and briefly describe how these risks are to be managed. Is a similar project currently in development or production in the U.S. or an allied nation? If so, could that project satisfy or be modified in scope to satisfy the U.S. requirement?
 7. Potential Industrial Base Impact
 - Briefly describe the potential industrial base impact. Do you anticipate workshare arrangements, requests for offsets, or offshore production of items restricted to procurement in the United States? Are you aware of any key parts or components with single source of production? What U.S. Government facilities and/or contractors would be likely to participate in this cooperative effort? Will there be any significant effects (pro or con) on any U.S. companies or U.S. industrial sector(s)?
 8. Funding Availability and Requirements
 - List the total estimated cost (in U.S. dollars) of the International Agreement. The total cost should include all U.S. and foreign government financial and non-financial costs.
 - List the cost shares (in U.S. dollars) of each participant. Also list any non-financial contributions, their value (in U.S. dollars), and describe how the value was determined.

- If not equitable financially, justify on a program basis (show the relative benefit to the DoD). An equitable agreement is defined as one which a participant's share is commensurate with that participant's share of the anticipated benefits from the agreement.
- List the Department's estimated costs (in U.S. dollars) by fiscal year, appropriation, and program element. Indicate if the funds required to pay these costs have been, or will be, approved in the budget and are available for use.
- List other participant's estimated costs (in U.S. dollars) by fiscal year. If applicable, outline the likelihood of follow-on research or acquisition and the proponent's commitment to fund such follow-on action.

9. Procurement

- Will the Department of Defense participation in the project involve contracting? If so, what agency will perform the contracting, and for what part of the project work?
- Will a participant other than DoD perform contracting? If so, which participants and for what part of the work?
- Will contracting be done on a competitive basis? If not, what justification will be used?

10. Information Security and Technology Transfer Issues

- Briefly identify the products and/or technologies involved in the program and their NDPC category and classification. The Militarily Critical Technologies List (MCTL) may be used as a guide.
- Is an exception required to the National Disclosure Policy? If so, provide date of approval or date that a request will be submitted to the National Disclosure Policy Committee (NDPC).
- If known, describe the foreign availability of comparable systems and technologies and whether the U.S. technology has been shared through other programs, e.g., FMS, DEA, etc.
- Briefly describe the risk of compromise of classified and export controlled technology and/or products and the technology advantages in the event of such compromise (e.g., negating primary U.S. technological advantage(s), revealing U.S. system weaknesses, development of countermeasures, susceptibility to reverse engineering).

- Identify any measures proposed to minimize the potential risks and/or minimize any damage that might occur due to loss, diversions, or compromise of sensitive classified or unclassified controlled data or hardware. Specify NDPC categories involved, where applicable. Include any phased release of information designed to ensure that information is disseminated only when and to the extent required to conduct the program; restrictions on release of specific information (including classification, description, and disclosure methods); release of components, software or information in modified form (e.g., export versions, exclusion of design rationale and deletion of data on weapons not sold to the participant); and special security procedures (both government and industrial) to control access to restricted material and information.

11. Proponent's Points of Contact

- Include organization, name, telephone, fax, and Internet address. Assure that this POC or an alternate is available to answer any questions from reviewing offices during the RAD review period.

APPENDIX B
CHECKLIST FOR INTERNATIONAL AGREEMENTS

1. OSD/JCS Sponsor: _____
2. Implementing DoD Component: _____
3. Subject: _____

A. LEGAL AUTHORITY:

<u>Requirement</u>	<u>Remarks</u>
4. Legal Basis for Agreement:	
5. Special Pricing Requirements:	
6. Instructions for Disposition of Monies Collected by DoD:	
7. Special Instructions for Recognition of Budget Authority in DoD Appropriations or Funds:	
8. Special Prohibitions on the Use of Appropriated Funds:	

B. FISCAL INFORMATION:

<u>Requirement</u>	<u>Acceptable</u>
	No Yes
9. Financing Sources Identified for DoD Share:	
10. Proper Disposition of Funds Collected:	
11. Certification that Restrictions on the Use of Appropriated Funds Have Been Adhered to:	

12. Proper Valuation of Foreign Services and Material:
13. Proper Valuation of DoD Services and Material:
14. If commercial bank is used, it is a Treasury-designated depository:

Requirement

Acceptable
Yes No

C. PROPOSED AGREEMENT:

15. Agreement Provision on Fund Availability:
16. Total Dollar Value of Agreement Identified:
17. DoD share of Agreement Reconciled to Financing Sources:
18. Agreement Reflects Prescribed Pricing Rules:
 - (a) For DoD Provided Services or Material:
 - (b) For DoD Developed Technical Data:
19. Agreement Reflects Equitableness:
20. Agreement Provision for Third Party Sales:
21. Taxes, Duties and Similar Charges Excluded:
22. Agreement Provisions for Advance of DoD Funds:
23. (a) Agreement Provisions for Disposition of Interest Earned:
23. (b) Advance exceeds paragraph 090508.C. thresholds:
24. Billing Instructions in Agreement:

APPENDIX B
INSTRUCTIONS FOR COMPLETION OF CHECKLIST FOR INTERNATIONAL
AGREEMENTS

<u>Item Number</u>	<u>Description of Effort Performed</u>
--------------------	--

GENERAL INFORMATION

1. Identify OSD/JCS sponsor.
2. Identify the DoD Component that is responsible for implementing the international agreement if signed, e.g., Department of the Navy.
3. Set forth full subject of agreement.

LEGAL AUTHORITY

4. Determine if the legal basis for entering into the agreement is clearly set forth in the legal authority section.
5. Identify if the legal authority section sets forth any special pricing requirements. Summarize any special pricing requirements in the “remarks” section.
6. Identify if the legal authority section sets forth any special instructions for the disposition of amounts collected by the Department of Defense. Summarize requirements in the “remarks” section.
7. Identify if the legal authority section sets forth special rules for recognition of budget authority. Summarize any special rules in the “remarks” section.
8. Identify if the legal authority section identifies any prohibitions on the use of appropriated funds. Summarize requirements in the “remarks” section.

FISCAL INFORMATION

9. Identify paragraph OR SCHEDULE that identifies financing sources to be used to implement the international agreement. Check acceptable if financial sources have been identified.
10. Identify paragraph that provides instructions for disposition of any funds collected.

11. If the legal authority cites restrictions on the use of appropriated funds, identify paragraph that certifies that these restrictions are adhered to, otherwise annotate with “N/A.”
12. To validate equitable financing when the foreign contribution is in other than currency, identify paragraph that summarizes the results of a price analysis of the foreign contribution, otherwise annotate with “N/A.”
13. To validate equitable financing, identify paragraph that describes the valuation method for DoD provided services and material, otherwise annotate with “N/A.” If full costing is used, check “yes” in the acceptable column if all chapter 1 of Volume 11A of this Regulation pricing elements were considered. If other than full cost pricing is used, cite the legal authority.
14. If a commercial bank is used, the bank should be a U.S. Treasury-designated depository. Identify if there is a description of how the bank account is to operate.

PROPOSED AGREEMENT

15. Identify the paragraph of the proposed agreement that contains the fund availability qualification clause.
16. Identify the paragraph of the proposed agreement that sets forth the total dollar value of the agreement. Check acceptable if this amount reconciles to the value identified in the fiscal information section.
17. Identify the paragraph of the proposed agreement that sets forth the dollar value of the DoD share of the agreement. Check acceptable if this amount reconciles to the financing sources identified in the fiscal information section.
- 18.a. Identify the paragraph that provides for the provision of services, materials, or financial contribution.
- 18.b. Identify the paragraph that provides for the provision of DoD technical data developed prior to implementation of the agreement. Check acceptable if priced in accordance with this chapter.
- 19.a. If the agreement is equitable basis from a financial viewpoint, identify the agreement paragraph and attach the worksheet prepared in accordance with this chapter. Indicate in the acceptable column if the worksheet reflects equitability.
- 19.b. If the agreement is not financially equitable and is justified on a program basis, attach a copy of the program or equitability justification.

20. Identify the paragraph that sets forth procedures for third party sales and transfers of technical data developed under the agreement. Check acceptable if there is compliance with this chapter.
21. If applicable, identify the paragraph that excludes taxes, duties, and similar charges. Check acceptable if there is compliance with this chapter.
22. If applicable, identify agreement paragraph that provides for advance of DoD funds. Assure that advances meet requirements of this chapter.
- 23.a. If advances are made, ensure the agreement contains necessary provisions on the disposition of interest earned.
- 23.b. If advance exceeds thresholds, Department of the Treasury concurrence must be obtained. Check acceptable if the Directorate for Accounting Policy, Office of the Under Secretary of Defense (Comptroller) has obtained coordination.
24. If billing is applicable, identify agreement provisions for billing. Check acceptable if there is compliance with this chapter.

CHAPTER 10**FUNDING CIVILIAN SEPARATION INCENTIVES
AND CIVILIAN PERSONNEL TRANSITION INITIATIVES****1001 Definitions**

For the purpose of this guidance, the term “civilian separation incentives” means resignation and retirement incentives authorized by Title 5, United States Code, section 5597, and outplacement subsidies authorized under Chapter 16 of the “DoD Civilian Personnel Manual” that are offered to an employee, in order to induce the voluntary separation of that employee and/or create a vacancy for an employee of the same or another DoD Component.

1002 General Funding Policy

100201. DoD activities may pay up to \$25,000 for separation incentives or up to \$20,000 for outplacement subsidies from appropriations, funds, or accounts available for such purposes to an employee and/or to create a vacancy for another employee.

100202. Funding by a DoD central account is not provided.

1003 Procedures. Funds for separation incentives and outplacement subsidies shall be obligated when an employee accepts the offer of an incentive payment. The obligations shall be recorded in general ledger account 6113, “Personnel Benefits-Civilian,” and reported as object class 13.0, “Civilian Personnel Benefits.” The following guidance applies to the Separation Incentives Program:

100301. Appropriated Fund Employees. A DoD Component that offers civilian separation incentives to an employee, in order to induce the voluntary separation of that employee and/or to create a vacancy for another employee of the same DoD Component, shall fund the resulting separation payments from the applicable appropriation, fund or account that otherwise is available to pay for salaries and expenses of that DoD Component.

100302. Business Operations Fund Employees. Beginning in FY 1995 the Defense Business Operations Fund is authorized to pay for separation incentives.

100303. Base Realignment and Closure (BRAC) Act. Beginning in FY 1995, the Defense Base Closure Account is available for payment of separation incentives. The departmental policy contained in this regulation, Volume 2B, section 070201.B.5 provides the general criterion to apply costs to the DoD Base Realignment and Closure Account.

100304. Employees Paid from or Reimbursed by Foreign Military Sales Trust Fund. For employees paid from, or whose salaries are fully reimbursed by, the Foreign Military Sales (FMS) Trust Fund, an offer of separation incentives or civilian personnel transition initiatives

(either to an FMS Fund civilian employee or a non-FMS Fund civilian employee to benefit an FMS Fund civilian employee) shall be funded as follows:

A. Separation incentives offered to an FMS civilian employee, in order to induce a voluntary separation of the FMS civilian employee, with the elimination of that FMS civilian employee position, shall be paid by the FMS Fund.

B. Separation incentives offered to an FMS civilian employee, in order to create a vacancy within the same DoD Component for another FMS civilian employee who otherwise would be separated, shall be paid by the FMS Fund.

C. Separation incentives offered to a non-FMS civilian employee, in order to create a vacancy for an FMS civilian employee who otherwise would have been separated, where the FMS civilian employee continues fully to support the FMS program, shall be paid by the FMS Fund.

D. Any costs of outplacement subsidy described in subsection 260305., below, for a FMS civilian employee shall be funded by the FMS Fund.

E. No other separation payments are chargeable to the FMS Fund.

100305. Placements Outside the Department. DoD activities may pay up to \$20,000 in Permanent Change of Station (PCS) costs associated with placement of a surplus DoD employee with another Federal Agency. When a DoD Component-offered outplacement subsidy is accepted, the DoD activity shall notify the gaining Federal Agency regarding outplacement services. The notification shall state that DoD funds may be billed up to \$20,000 per employee or for the actual PCS costs, whichever is less. The notification shall include the DoD fund citation to be billed and the address of the fiscal station paying the subsidy. Payment shall be made by the applicable DoD activity based upon documentation of the amounts paid or to be paid to the employee by the gaining Federal Agency.

100306. Controls over Available Funds. Controls shall be established to ensure that sufficient funds are available to cover projected requirements for employee acceptance of incentive offers and outplacement subsidies each quarter. Normal Antideficiency Act provisions apply to the DoD Component appropriations, funds and accounts. Therefore, if available funds are projected to be inadequate to cover anticipated incentive program acceptances and outplacement subsidies, appropriate action shall be taken. In this regard, the DoD Components either shall cancel or withdraw incentive offers prior to employee acceptance, or obtain additional funds.

1004 Reporting

100401. Each DoD Component shall maintain records of all offers made, acceptances, and payments. Records also shall be maintained of all orders for outplacement

subsidies issued and disbursed by a DoD Component. In addition to the information requested in Chapter 16 of the “Civilian Personnel Manual” on Civilian Separation Pay Implementing Instructions, the following information shall be submitted by each DoD Component.

100402. On a monthly basis, both the Civilian Personnel Management Service and the Director for Operations and Personnel, Office of the Under Secretary of Defense (Comptroller), shall be advised of the cumulative fiscal year to date amounts of:

A. Total number and amount of orders for outplacement subsidies issued by the DoD Component.

B. Total amount and quantity of civilian personnel transition incentives paid to employees to create vacancies for the benefit of employees of other DoD Components.

C. Total amount and quantity of civilian personnel transition incentives paid to employees from DoD Component funds.

RESERVED FOR FUTURE USE

(This page intentionally left blank.)

CHAPTER 12

**IDENTIFICATION, RETENTION, AND USE OF
ENERGY AND WATER CONSERVATION SAVINGS**1201 OVERVIEW

120101. Purpose. This chapter prescribes financial management policy and procedures for the identification, retention, and use of energy cost savings as specified in Title 10, United States Code (U.S.C.), sections 2865, 2866 and 2867, and Section 736 of the National Defense Authorization Act for Fiscal Year 1989, as amended (42 U.S.C. 8287 note).

★120102. General. The Congress has enacted several measures to encourage efficient energy production and energy conservation. 10 U.S.C. 2865 and 2866 concern energy savings and water conservation, respectively, at military installations. 10 U.S.C. 2867 concerns electricity sales to a public or private company and authorizes revenues from certain sales of electricity to be used for purposes specified in that section. Section 736 of the National Defense Authorization Act for Fiscal Year 1989, as amended, (42 U.S.C. 8287 note) provides incentives with respect to Energy Savings Performance Contracts (ESPC) entered into under the provisions of 42 U.S.C. 8287. Each of the foregoing statutes provides for the utilization of part or all of the amounts realized as the result of covered activities. In addition, 10 U.S.C. 2865 and 10 U.S.C. 2866 authorize the acceptance and use of incentive payments from utility companies.

★120103. Following are summaries of the statutory provisions relating to funding.

★A. 10 U.S.C. 2865 provides that two thirds of the appropriated funds that remain available at the end of a fiscal year as a result of energy cost savings remain available for obligation through the end of the fiscal year following the fiscal year for which the funds were appropriated. In accordance with the restriction contained in the annual appropriations acts for the Department of Defense (DoD) that no part of any appropriation provided by those acts may remain available for obligation beyond a current fiscal year unless expressly so provided in those acts, an annual recurring provision in the DoD appropriations acts provides that appropriations that remain available at the end of a current fiscal year as the result of such energy cost savings realized by the Department are available for obligation for the next fiscal year to the extent, and for the purposes, provided in 10 U.S.C. 2865. Under 10 U.S.C. 2865, such funds may be used as follows:

★1. Under regulations to be prescribed by the Secretary of Defense, one third may be used for additional energy conservation measures and for water conservation activities at such buildings, facilities, or installations of the DoD as designated by the head of the department, agency or instrumentality that realized such savings.

★2. One third of such savings shall be used at the installation where the savings were realized, as determined by the commanding officer of such installation, for (i) improvements to existing family housing units; (ii) any unspecified minor construction project

that will enhance the quality of life of personnel; or (iii) any morale, welfare, or recreation facility or service.

★B. Title 10 U.S.C. 2866 provides that funds attributable to water cost savings realized under the provisions of that section shall be used as prescribed in paragraph 120103. A. 1 and 2, above. Neither 10 U.S.C. 2866 nor any provisions in the Department's appropriations acts, however, provide for the extended availability of such funds. Accordingly, such funds are available only for the time period for which they were originally appropriated.

★C. Both 10 U.S.C. 2865 and 10 U.S.C. 2866 authorize the acceptance of financial incentives from utilities related to energy and water conservation measures as specified by 10 U.S.C. 2865 (d)(2) or 10 U.S.C. 2866 (a)(2). Such incentives are to be credited to appropriations designated for such purposes and are to be merged with, and be available for, the same purposes and time period as the appropriation to which they are credited. Detailed procedures are in Section 1203 of this chapter.

★D. Title 10 U.S.C. 2867 provides that proceeds from sales of electricity, generated by alternate energy or cogeneration type production facilities, to a public or private utility company shall be credited to the appropriation account currently available to the Military Department concerned for the supply of electrical energy. Such proceeds may be used to fund military construction projects under energy performance plans developed pursuant to the provisions of 10 U.S.C. 2865(a), including minor construction projects authorized under 10 U.S.C. 2805 that are designed to increase energy conservation. Detailed procedures are in Section 1204 of this chapter.

★E. Section 736 of the National Defense Authorization Act for Fiscal Year 1989, as amended, (42 U.S.C. 8287 note), provides that energy cost savings realized by the Military Departments during each of the first 5 years of an ESPC shall remain available until expended. Unlike the case with respect to savings covered by 10 U.S.C. 2865, however, no provision of an appropriations act provides for such an extended period of availability. Accordingly, such funds are available only for the time period for which they were originally appropriated. They may be used as follows:

★1. One-half of the amount of such energy cost savings may be used for the acquisition of any appropriate energy conserving measure for military installations. Such measures may be in addition to energy conserving measures acquired under ESPCs.

★2. One-half of the amount of such energy cost savings may be used for any morale, welfare, or recreation facility or service that normally is provided with appropriated funds, or for any minor military construction project (as defined in 10 U.S.C. 2805(a)) that will enhance the quality of life of members of the Armed Forces at the military installation at which the energy cost savings were realized. Detailed procedures are in Section 1205 of this chapter.

1202 DEFINITIONS

The following definitions apply with respect to the identification, retention, and use of energy conservation cost savings:

★120201. Energy Cost Savings. There are two definitions of energy cost savings:

★A. Energy or water cost savings for the purposes of 10 U.S.C. 2865 and 2866, are those savings realized as the result of a reduction in the cost of energy or water from a baseline cost, determined by metering, if available, or by professionally acceptable engineering models and estimates.

★B. Energy cost savings for the purposes of Section 736 of the National Defense Authorization Act for Fiscal Year 1989, as amended, (42 U.S.C. 8287 note), are those savings realized as the result of a reduction in the cost of energy from a base cost established through a methodology set forth in an ESPC, utilized in an existing DoD-owned building or facility as a result of (1) the lease or purchase of operating equipment, improvements, altered operation and maintenance, or technical services; or (2) the increased efficient use of existing energy sources by cogeneration or heat recovery.

★120202. Energy Savings Performance Contract. An ESPC is a contract entered into under the provisions of 42 U.S.C. 8287. It is a contracting procedure under which a private contractor evaluates, designs, finances, acquires, installs and maintains energy saving equipment for a DoD Component, and receives as partial compensation a share of any energy savings resulting from implementation during the term of the contract (not to exceed 25 years, including options). The contract terms shall establish a guaranteed savings amount and determine the level of compensation to be paid the contractor, with the remainder of the savings retained by the DoD.

★120203. Guaranteed Savings. The minimum energy savings amount, established by the terms of an ESPC, realized by the performance of contractor-installed, energy saving equipment over an extended period of time. Guaranteed savings are divided between an amount to be paid the contractor, and an amount to be retained by the government, in accordance with the contract terms.

★120204. Extended Availability. The additional period of availability for obligation, through the end of the fiscal year following the fiscal year for which the funds were appropriated, of unobligated balances at the end of a fiscal year for funds realized as a result of energy cost savings as provided for by 10 U.S.C. 2865 and an annual recurring provision in the DoD appropriations acts.

★120205. Extended Availability Account. An account established at the installation level for each appropriation for which energy cost savings have been identified, and to which unobligated balances resulting from such energy cost savings or a portion thereof, are transferred.

★120206. Component Head or designee. The Secretary of a military department or the Director of a Defense Agency or an individual designated to act for the Secretary of a military department or the Director of a Defense Agency for the purposes of executing the duties, functions, and responsibilities set forth in this chapter. When a provision is applicable only to the military departments, reference is made to the Secretary concerned, or designee.

★1203 PROCEDURES CONCERNING ENERGY OR WATER COST-SAVINGS AMOUNTS AND INCENTIVES RECEIVED FROM UTILITIES UNDER 10 U.S.C. 2865 AND 2866

★120301. Energy savings amounts having an extended availability shall be transferred to extended availability accounts for execution.

★A. An extended availability account shall be established for each appropriation for which energy cost savings have been identified and for which a period of extended availability is to be established.

★B. Transfers to the extended availability accounts shall be made by a SF 1151. Reprogramming actions will not be required in the case of such transfers.

★C. Accounting, appropriate controls, and oversight for amounts in extended availability accounts shall be established at the level of the facilities that use the accounts. Normally this will be at the installation level.

★120302. The cognizant Component Head or designee shall determine the appropriation which shall be credited with any financial incentives received from utilities under 10 U.S.C. 2865 (d)(2) or 10 U.S.C. 2866 (a)(2). The amounts so credited shall be merged with, and be available for, the same purposes and time period as the appropriation to which they are credited.

★120303. One-third of the amount of energy or water cost savings resulting from conservation measures (i.e., one-half of the two-thirds amount available to the Department) under 10 U.S.C. 2865 and 2866 will be used only to implement additional energy conservation measures and water conservation activities at DoD buildings, facilities, or installations. Such energy conservation measures will be determined by the appropriate Component Head or designee in accordance with conservation project suitability guidance issued by the Office of the Deputy Under Secretary of Defense (Industrial Affairs and Installations).

★120304. As determined by the commanders of military installations, at which energy or water cost savings were realized, the remaining one-third of the amount of energy or water cost savings resulting from conservation measures shall be used only for the purposes specified in paragraph 120103. A. 2 of this chapter.

★1204 PROCEDURES CONCERNING REVENUES FROM THE SALE OF ELECTRICITY UNDER 10 U.S.C. 2867

★120401. Proceeds from the sale of electricity under 10 U.S.C. 2867 shall be credited to the appropriation account currently available to the military department concerned for the supply of electrical energy. The Secretary concerned or designee shall determine the accounts to which such proceeds shall be credited.

★120402. Amounts so credited may be used for:

★A. Military construction projects under energy performance plans developed pursuant to the provisions of 10 U.S.C. 2865(a); and

B. Minor military construction projects authorized under 10 U.S.C. 2805 that are designed to increase energy conservation.

★120403. Before utilization of the amounts credited under paragraph 120401 for projects specified in paragraph 120402, not later than 21 days before such projects are to be carried out, the Secretary concerned or designee shall notify the Congress in writing of the project along with:

★A. The justification for the project; and

★B. The estimated cost of the project.

★1205 PROCEDURES CONCERNING ENERGY COST SAVINGS UNDER SECTION 736 OF THE NATIONAL DEFENSE AUTHORIZATION ACT FOR FISCAL YEAR 1989, AS AMENDED (42 U.S.C. 8287 note)

★120501. The portion of the guaranteed savings due to the contractor for payment under ESPCs shall be included in each military department's utility requirements submitted as part of budget requests for the length of the ESPCs entered into by that military department. The entire amount of guaranteed savings provided for in ESPCs (including amounts for contract payments and amounts to be retained by installations) shall be included in total utility requirements submitted as part of budget requests for the first 5 years of ESPCs. Under no circumstances shall the total of the amounts requested exceed those that would have been requested in the absence of ESPCs. The Secretary concerned, or designee, shall specify the procedures for identification of such amounts by installations, facilities, or operating locations at which ESPCs for that military department are in existence.

★120502. Not more than 90 days after the end of each of the first 5 years during which energy savings measures have been in operation under an ESPCs, the Secretary concerned, or designee, shall determine the amount of energy cost savings attributed to, and realized under, energy savings measures acquired and installed under ESPCs at installations under the

Secretary's jurisdiction. These savings shall be reported in accordance with guidance issued by the Office of the Deputy Under Secretary of Defense (Industrial Affairs and Installations).

★120503. Energy cost savings realized under ESPCs and identified as indicated in the preceding paragraph may be utilized as described in paragraph 120103. E of this chapter.

★1206 CARRYOVER OF UNOBLIGATED BALANCES UNDER 10 U.S.C. 2865 RESULTING FROM ENERGY CONSERVATION MEASURES

★120601. Installation Commanders. Installation commanders or their designees shall ensure that energy cost savings amounts that are carried over to the year following the fiscal year for which they were originally appropriated are authorized to be used only for funding energy conservation initiatives approved by the Component Head or designee or for the purposes specified in paragraph 120304, above. Installation commanders also shall:

★A. Ensure that unobligated fund balances available at the end of the normal period of appropriation availability that are the direct result of energy conservation measures are identified. Such funds to be carried forward to the following fiscal year shall be based on the most current available consumption data and represent actual unobligated funds and not based on estimates.

★B. Ensure that the unobligated energy cost savings balances at year-end are carried forward into the following fiscal year, and designate the original appropriation as an extended availability account.

★C. Submit to the Component Head or designee proposed energy savings projects for a given fiscal year that are projected to cost more than the amount of funds available to the Commander for that purpose.

★D. Implement additional energy conservation initiatives approved by the Component Head, or designee and other projects as specified in paragraph 120304, above.

★120602. Component Head or Designee. The Component Head or designee shall receive and evaluate savings measures submitted by installation commanders, and authorize funding for those other energy savings measures as the Component Head or designee deems appropriate. The Component Head or designee shall also ensure that procedures are established to provide sufficient time to compute the energy cost savings, and identify the unobligated amounts to carry over to the following fiscal year.

1207 ACCOUNTING FOR ENERGY COST SAVINGS

★120701. Energy cost savings amounts. The energy cost savings amounts realized in accordance with 10 U.S.C. 2865 shall be either the lesser of (1) two-thirds of identified energy cost savings, or (2) the unobligated balances of such cost savings remaining available for obligation at the end of a fiscal year.

★120702. Extended availability accounts. Amounts covered by the preceding paragraph shall be identified in, and transferred to, extended availability accounts. Transfers shall be made on an SF 1151, and properly labeled (e.g., FY 1998/1999 for a FY 1998 account). The authority to be cited for the transfer is 10 U.S.C. 2865. No further adjustments shall be made to the amounts carried forward once the balance is established in the extended availability account.

★120703. Refunds or Rebates. Refunds or rebates paid by a utility company as a result of completion of a utility-approved conservation action (typically a facility project) shall be credited to the same account from which the conservation action originally was funded. Such amounts may be extended for obligation, in accordance with the procedures specified in the preceding paragraph.

★120704. Cancellation of Appropriation.

★A. Amounts contained in extended availability accounts established in accordance with paragraph 120702 above, shall remain available for expenditure (i.e., liquidation of obligations) for 5 years following the year in which the funds expired for obligation at the end of the year of extended availability.

★B. Under no circumstances shall funds, extended under 10 U.S.C. 2865 remain available for expenditure beyond the end of the sixth year following the year in which the funds would have expired, had the period of availability not been extended. (For example, if an O&M appropriation normally would expire at the end of FY 1998, the extended availability account would expire at the end of FY 1999. The extended availability account would be available for expenditures until the end of FY 2004, at which time any remaining obligated and unobligated balances would be canceled.)

1208 REPORTING REQUIREMENTS

The following reporting requirements shall be used to report the status of extended availability accounts:

120801. Acct Rpt (M) 1002. Special procedures have been established for reporting extended availability obligated and unobligated balances on the Acct Rpt (M) 1002 (Appropriation Status by Fiscal Year Program and Subaccounts).

These procedures are as follows:

A. Normal Availability Obligated and Unobligated Balances. Identify and report as normal.

B. Extended Availability Unobligated Balance. Identify, in column i. (Total Unobligated Balance), unobligated extended availability amounts resulting from energy cost

savings at the end of the normal availability period (e.g., FY 199X/199X+1 or FY 199X/199X+2, +3, and so on) available unobligated amounts (that is, FY 1996/1997, FY 1996/1998, etc., for the FY 1996 account). The stub entry shall identify the unobligated extended availability amount as “Extended Availability - Energy Cost Savings.” The amount reported shall agree with the amount reported on line 9.A.1. of the SF 133 (formerly DD Form 1176), “Report on Budget Execution” (see subsection 120702, below).

★C. Extended Availability Obligated Balance. Identify, in column e, obligations incurred against the extended availability account. The stub entry shall identify those obligations as to the purpose for which the obligations were incurred. Those purposes are “Energy Conservation Measures” (covered by paragraph 120303 of this Chapter) and “Other Purposes” (covered by paragraph 120304 of this Chapter). The reporting categories for the extended availability accounts are to be continued for all applicable fiscal years.

120802. SF 133 (Report on Budget Execution). At the end of the first fiscal year, use line 9.A.1, “Balance Currently Available” on the SF 133, to identify the amount of available unobligated funds that are available for energy savings investments (or other authorized purposes) in the following fiscal year(s)

120803. Acct Rpt (TFM) 2108. Transactions reported on the Acct Rpt (TFM) 2108 (Year-End Closing Statement) will be treated in the same manner as a multi-year appropriation.

CHAPTER 13

FISCAL POLICY FOR BASE CLOSURE AND REALIGNMENT

1301. OVERVIEW

130101. Purpose. This Chapter provides the financial policy and procedures for base closure and realignment.

130102. General

A. Since 1988, the Congress has enacted legislation that created four separate accounts on the books of the Treasury to finance base closure and military installation realignment.

1. Section 207 of the Defense Authorization Amendments and Base Closure and Realignment Act (Public Law (P.L.) 100-526), October 24, 1988, established the “DoD Base Closure Account.”

2. Section 2906 of the Defense Base Closure and Realignment Act of 1990 (P.L. 101-510), November 5, 1990, created the “DoD Base Closure Account 1990.”

3. Section 2921 of the 1990 Act established the “DoD Overseas Military Facility Investment Recovery Account.”

4. Section 344 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (P.L. 102-190), established the “Reserve Account.”

B. This guidance supersedes and rescinds the financial management policy and procedures for the “DoD Base Closure Account” previously issued as follows:

1. Principal Deputy Comptroller memorandum, dated January 3, 1990, subject: DoD Base Closure Account, and subsequently modified by a Deputy Comptroller (Management Systems) memorandum, dated January 24, 1990, same subject.

2. Deputy Comptroller (Management Systems) memorandum, dated May 4, 1991, subject: Disposition of Proceeds from the Sale of Assets Resulting from DoD Base Closures.

C. Additionally, this guidance supersedes and rescinds the Office of the Deputy Comptroller (Management System) memorandum of June 17, 1991, subject: Guidance

for DoD Overseas Military Facility Investment Recovery Account, that previously established financial management guidance for the subject Account.

D. Also, this guidance establishes funds distribution, accounting and reporting policy and procedures for the “DoD Base Closure Account 1990” and the “Reserve Account.”

1302. POLICY AND PROCEDURES

130201. General

A. DoD Components are responsible for implementing all base closure and realignment actions, and administering allocations of base closure funds.

B. Care should be exercised to ensure that proceeds are deposited in the appropriate account authorized by law. Funds erroneously deposited into an account, or deposited to a suspense account or other interim accounts, shall be transferred to the appropriate account. An SF 1080, “Voucher for Transfers Between Appropriations and/or Funds” may be used to transfer funds to the proper account.

130202. DoD Base Closure Account

A. The Treasury symbol for this Account is 97_0103. This Account is identified as the “Base Realignment and Closure Account, Part I, Defense” in the Treasury’s Federal Account Symbols and Titles (FAST) publication.

B. Except as provided for in paragraph 130202.D., below, funds deposited into this Account shall be:

1. Funds authorized for, and appropriated to, the Account with respect to Fiscal Year (FY) 1990 and fiscal years beginning thereafter.

2. Proceeds from any Military Department or other instrumentality (including a nonappropriated fund instrumentality) within the Department that agrees to pay fair market value for the property or facility, or portion thereof. Fair market value shall be determined on the basis of the use of the property or facility on December 31, 1988.

3. Proceeds from the transfer or disposal of any other property or facility made as a result of a closure or realignment under the provisions of P.L. 100-526.

C. Proceeds resulting from the sale or disposal of property or facilities (including buildings and structures) due to the base closure process shall be deposited as reimbursements into the DoD Base Closure Account. These reimbursements shall be treated as a collection and an earned reimbursement, and credited to the appropriation as a budget source.

D. A portion of the proceeds resulting from the transfer or disposal of any real property or facility acquired, constructed, or improved (in whole or in part) with commissary store funds or nonappropriated funds shall be deposited in the “Reserve Account.” The amount so deposited shall be equal to the depreciated value of the investment made with such funds in the acquisition, construction, or improvement of that particular real property or facility. The depreciated value of the investment shall be computed in accordance with Chapter 6 of Volume 4 of this Regulation. The “Reserve Account” is discussed in paragraph 130205, below.

E. Subject to availability, funds in the Account may be used to:

1. Carry out actions as may be necessary to close or realign any military installation. Such actions include acquisition of such land, construction of such replacement facilities, performance of such activities, and conduct of such advance planning and design as may be required to transfer functions from an installation being closed or realigned to another military installation.

2. Provide economic adjustment assistance to any community located near an installation being closed or realigned.

3. Provide community planning assistance to any community located near an installation to which functions will be transferred as a result of such closure or realignment.

4. Carry out activities for the purposes of environmental restoration at an installation being closed or realigned. This includes reducing, removing and recycling hazardous waste, and removing unsafe buildings and debris.

130203. DoD Base Closure Account 1990

A. The Treasury symbol for this Account is 97X0510. This account is identified as the “Base Realignment and Closure Account, Part II, Defense,” in the Treasury’s Federal Account Symbols and Titles (FAST) publication.

B. Except as provided for in paragraph 130203.D., below, funds deposited into this Account shall be:

1. Funds authorized for, and appropriated to, the Account.

2. Proceeds received from the sale or disposal of any property at an installation closed or realigned under the provisions of P.L. 101-510.

C. Proceeds resulting from the sale or disposal of property or facilities (including buildings and structures) due to the base closure process shall be deposited as reimbursements into the DoD Base Closure Account 1990. These reimbursements shall be treated as a collection and an earned reimbursement, and credited to the appropriation as a budget source.

D. Proceeds received after September 30, 1995, from the transfer or disposal of any property at a military installation closed or realigned under title II of the Defense Authorization Amendments and Base Closure and Realignment Act (PL 100-526; 10 USC 2687) shall be deposited as reimbursements into the DoD Base Closure Account 1990.

E. A portion of the proceeds resulting from the transfer or disposal of any real property or facility acquired, constructed, or improved (in whole or in part) with commissary store funds or nonappropriated funds shall be deposited in the "Reserve Account." The amount so deposited shall be equal to the depreciated value of the investment made with such funds in the acquisition, construction, or improvement of that particular real property or facility. The depreciated value of the investment shall be computed in accordance with Chapter 6, Volume 4, of this Regulation. The "Reserve Account" is discussed in paragraph 130205, below.

F. Subject to their availability, funds in the Account may be used to:

1. Carry out actions as may be necessary to close or realign any military installation. Such actions include acquisition of such land, construction of such replacement facilities, performance of such activities, and conduct of such advance planning and design as may be required to transfer functions from an installation being closed or realigned to another military installation.

2. Provide economic adjustment assistance to any community located near an installation being closed or realigned. Additionally, provide community planning assistance to any community located near a military installation to which functions will be transferred as a result of such closure or realignment.

3. Carry out activities for the purposes of environmental restoration and mitigation at an installation being closed or realigned. This includes reducing, removing and recycling hazardous waste, and removing unsafe buildings and debris.

4. Provide outplacement assistance to civilian employees employed by the Department at installations being closed or realigned.

5. Reimburse other Federal agencies for actions performed at the request of the Secretary with respect to any such closure or realignment.

130204. DoD Overseas Military Facility Investment Recovery Account

A. The Treasury symbol for the receipt account (funds deposited in the DoD Overseas Military Facility Investment Recovery Account Deposits, DoD) are 97x5193.017, .057, .021, and .097, as applicable. The Treasury symbol for the special fund account (expenditure of funds from the Account) is 97X5193.

B. Except as provided for in paragraph 130204.C., below, funds deposited into this Account shall be amounts paid to the United States, pursuant to any treaty, status of forces agreement, or other international agreement to which the United States is a party, for the residual value of real property or improvements to real property used by civilian or military personnel of the Department.

1. Steps must be taken to ensure that the United States receives, through direct payment or otherwise, consideration equal to the fair market value of the improvements made by the United States at facilities that will be released to host countries. Determination of the fair market value of such improvements should be conducted on a facility-by-facility basis.

2. The term “fair market value of the improvements” means the value of improvements on the basis of their highest use.

3. The term “improvements” includes new construction of facilities and all additions, improvements, modifications, or renovations made to existing facilities or to real property, without regard to whether they were carried out with appropriated or nonappropriated funds.

C. In the case of a payment for the residual value of real property or improvements at an overseas military facility, the portion of the payment that is equal to the depreciated value of the investment made with nonappropriated funds shall be deposited in the “Reserve Account”--not in the “DoD Overseas Military Facility Investment Recovery Account.”

D. Subject to availability, funds in the Account may be used by the Department for payment, as provided for in appropriations acts, of costs incurred by the Department in connection with (1) facility maintenance and repair and environmental restoration at military installations in the United States, and (2) facility maintenance and repair and compliance with environmental laws at military installations outside the United States that the Secretary anticipates will be occupied by the U.S. Forces for an extended period of time.

130205. Reserve Account

A. The Treasury symbol for the receipt account (funds deposited into the Reserve Account) is 97X5195.1. The Treasury symbol for the special account (expenditure of

funds from the Reserve Account) is 97X5195. This account is identified as “Use of Proceeds from the Transfer or Disposition of Commissary Facilities.”

B. The transfer or disposal of a commissary or nonappropriated fund (NAF) facility must be connected with the closure or realignment of a military installation. A portion of the proceeds equal to the depreciated value of the investment made in any real property or facility acquired, constructed or improved (in whole or in part) with commissary store funds or nonappropriated funds shall be deposited into this Account.

C. If the proceeds from the transfer or disposal of any real property or facility acquired, constructed or improved (in whole or in part) with commissary store funds or nonappropriated funds are greater than the depreciated value, then the excess amount shall be deposited into the appropriate base closure account, not the Reserve Account.

1. The term “commissary store funds” means funds received from the adjustment of, or surcharge on, selling prices at commissary stores fixed under 10 U.S.C. 2685.

2. The term “nonappropriated funds” means funds received from a NAF instrumentality. (See the “Definitions” section of Volume 13, “Nonappropriated Funds Policy and Procedures,” of this Regulation.)

3. The term “nonappropriated fund instrumentality” means an instrumentality of the United States under the jurisdiction of the Armed Forces (including the Military Exchange Services) which is conducted for comfort, pleasure, contentment, or physical or mental improvement of members of the Armed Forces. (See the “Definitions” section of Volume 13 of this Regulation.)

4. The depreciated value of the investment made by nonappropriated funds shall be computed in accordance with Chapter 3, Volume 13 of this Regulation.

C. Subject to availability, funds in the Account may be used, if appropriated in advance by the Congress, for the purpose of acquiring, constructing, or improving commissary stores, and real property and facilities for NAF instrumentalities.

D. DoD Components are responsible for ensuring that budgeting and accounting procedures can separately identify the (1) commissary, (2) exchange system, and (3) all other nonappropriated fund instrumentalities balances in the Reserve Account.

1303 BUDGET AND ACCOUNTING RESPONSIBILITIES

130301. Requests for Funds

A. DoD Components. The Military Departments and Defense Agencies, in cooperation with and at the direction of the Under Secretary of Defense (Acquisition and Technology) or designee, the Director for Base Closure and Utilization, shall:

1. Submit a financial plan to the Directorate for Military Construction, ODC(P/B), OUSD(C), supported by a “DoD Base Closure Account Financial Plan,” (Format 460-BC) (Attachment 1), to request allocations of base closure funds. For planned military construction and family housing construction requirements, each project to be executed using requested base closure funds will be individually listed on the financial plan. Also, a separate narrative explanation for other planned expenditures will also be submitted to the Directorate for Military Construction, ODC(P/B), in sufficient detail on the Format 460-BC to support the DoD Component financial plan. Host DoD Components are responsible for coordination with all affected tenant activities, including Defense Agencies, Defense Medical Facilities Office, Reserve Components, and nonappropriated fund activities. Tenant activities will identify specific base closure program requirements to their host DoD Component.

2. Notify the Office of the Under Secretary of Defense (Acquisition and Technology) and the Directorate for Military Construction, ODC(P/B), of any deviations of 5 percent per quarter from, or rephasing of, the OUSD(C)-approved planned execution of allocated base closure funds. When a military construction or family housing project is to be executed, but does not appear on the approved financial plan of a DoD Component, the prior approval of the Directorate of Military Construction, ODC(P/B), is required.

B. Directorate for Military Construction, ODC(P/B). This office shall initiate the Apportionment and Reapportionment Schedule (DD Form 1105) for the appropriate base closure account for submission to the Office of Management and Budget (OMB) for its approval.

130302. Funds Distribution

A. Directorate for Military Construction, ODC(P/B). This office shall, upon approval by the OMB of the Apportionment and Reapportionment Schedule (DD Form 1105) for the base closure account, provide a Fund Authorization Document to the Director for Budget and Finance, Washington Headquarters Services (WHS), for recording in the agency level accounting records.

B. Director, Defense Finance and Accounting Service. The Director, Defense Finance and Accounting Service shall obtain and record, in the departmental-level accounting records, an appropriation warrant (TFS Form 6200) for the base closure accounts. Table 13-1 illustrates the most common entries used for this account.

C. Director for Budget and Finance, WHS. The Director for Budget and Finance, WHS shall:

1. Record, in the agency-level accounting records, the Fund Authorization for the base closure accounts received from the Directorate for Construction, ODC(P/B). Table 13-2 illustrates the most common entries used to accomplish this action.

2. Suballocate, in response to a request from the Directorate for Military Construction, ODC(P/B), a suballocation of base closure funds to the Military Departments and the Defense Agencies on Fund Authorization (attachment 2). Table 13-3 illustrates the most common entries used to accomplish this action.

D. DoD Components. The Military Departments and Defense Agencies shall:

1. Receive and record the suballocations of base closure funds received from the WHS and allot that suballocation to respective installations. The DoD Components shall subdivide their allocations of the base closure accounts by subaccount, and distribute the base closure funds to the installations responsible for base closure actions. Each DoD Component shall distribute the base closure funds to its installations in accordance with its normal fund distribution procedures. This distribution process shall include allotment, or suballotment, as appropriate, of the suballocation from the WHS. The applicable subaccounts are as follows:

Military Construction

Construction

- Civilian Permanent Change of Station (PCS)
- Transportation of Things
- Real Property Maintenance
- Program Management (civilian workyears, travel, and related support dedicated to implementation efforts)

Environmental:

Includes environmental restoration, including reducing, removing, and recycling hazardous wastes, and removing unsafe buildings and debris; Memoranda of Agreements between Defense and States (DSMOA), and reimbursements to the Agency for Toxic Substance and Disease Registry (ATSDR); and mitigation efforts associated with a military installation closure or realignment. Mitigation efforts do not apply to the DoD Base Closure Account.

Community Programs:

Community Planning Assistance: For communities located near a military installation to which functions will be transferred as a result of a closure or realignment of a military installation.

Economic Adjustment Assistance: For communities located near a military installation being closed or realigned.

Federal Agencies Reimbursement:

Includes reimbursements to other Federal agencies for actions, other than for environmental activity discussed above, performed with respect to any closure or realignment.

Military Personnel:

Limited to PCS and TDY expenses dedicated to implementation efforts.

Procurement-type Items:

The procurement account should be limited to investment items in accordance with the expense/investment criteria.

Other Costs:

Expenses, other than those above, associated with base closure and realignment efforts.

2. Account for the receipt and allotment of the allocations using the entries in Table 13-4.

130303. Plan Execution

A. The DoD Components shall:

1. Record the allotment of base closure funds provided to installations. Table 13-5 illustrates the entries to record the allotment.

2. Implement base closure and realignment actions and administer their allocation of base closure funds in accordance with their approved financial plan.

a. Table 13-6 illustrates the entries for recording expenses that result in a fund outlay and that are incurred as a result of a DoD base closure.

b. Losses that do not result in a fund outlay and that are incurred as a result of a DoD base closure shall be accounted for as an extraordinary loss. Table 13-7 illustrates these entries.

3. Submit a Format 460-BC and supporting documentation to the Director for Base Closure and Utilization and the Directorate for Military Construction, ODC(P/B), on a quarterly basis to reflect the status of the approved official financial plan being executed.

4. Rephase planned execution of the financial plan as the situation dictates, and with the prior approval of the Under Secretary of Defense (Acquisition and Technology) or designee, the Director for Base Closure and Utilization, and in coordination with the Directorate for Construction, ODC(P/B). A revised Format 460-BC and supporting documentation shall be prepared that reflects the changes in the financial plan.

1304 REPORTING RESPONSIBILITIES

130401. Military Departments. The Military Departments shall prepare and submit reports to the Defense Finance and Accounting Service (DFAS) Centers on the status of its allotments. At a minimum, these reports will provide detail for each subaccount specified in a Fund Authorization document provided by the WHS (see paragraph 130302.C., above). These reports will be submitted in accordance with a schedule of due dates to be provided by the DFAS.

130402. Defense Agencies and the DFAS Centers. The Defense Agencies and the DFAS Centers shall submit feeder reports to the WHS on the status of its suballocations. At a minimum, these reports will provide detail for each subaccount specified in a Fund Authorization

document provided by the WHS (see paragraph 130302.C., above). These reports will be submitted in accordance with a schedule of due dates to be provided by the WHS.

130403. WHS. The WHS shall:

A. Provide a schedule of due dates, in correlation with DFAS due dates, to accounting support organizations, e.g., the Defense Agencies, DFAS Centers to submit feeder reports.

B. Perform agency-level accounting for the base closure accounts suballocated to the Defense Agencies and Military Services in accordance with this Regulation.

C. Prepare agency-level appropriation and fund status reports at the allocation level (for those reports referenced in paragraph 130404.E., for the base closure accounts allocated to the Defense Agencies and Military Services as required by Chapter 4, Volume 6, of this Regulation.

D. Review and validate Report on Appropriation Status by Fiscal Year Program and Subaccounts (Acct Rpt(M)1002) and submit data to the Office of the Under Secretary of Defense (Acquisition and Technology).

E. Provide the DFAS with copies of appropriate financial reports submitted by DoD Components, to be included with other Treasury Index 97 financial reports.

130404. DFAS. The DFAS shall:

A. Establish base closure accounts with the Treasury.

B. Post Nonexpenditure Transfer Authorizations (SF 1151) transactions, as necessary, for the base closure accounts.

C. Provide a schedule of due dates to the WHS to submit feeder reports.

D. Perform departmental-level appropriation accounting for the base closure accounts allocated to the WHS in accordance with this Regulation.

E. Prepare departmental-level appropriation and fund status reports as required by Chapter 4, Volume 6 of this Regulation for the base closure accounts administered by the Military Departments and Defense Agencies. These reports include:

1. Year-end Closing Statement (FMS Form 2108).

2. Statement of Transactions (SOT).

3. Statement of Differences (TFS Form 6652). (DFAS will download this report from Treasury.)
4. Undisbursed Appropriation Account Ledger (TFS Form 6653). (DFAS will download this report from Treasury.)
5. Undisbursed Appropriation Accounts - Trial Balance (TFS Form 6654). (DFAS will download this report from Treasury.)
6. Receipt Account Trial Balance (TFS Form 6655). (DFAS will download this report from Treasury.)
7. Report on Budget Execution (Acct Rpt(M)1176).
8. Flash Report on Obligation Status (Acct Rpt(M)1445).
9. Report on Obligation Status (SF 225).
10. Report on Reimbursements (Acct Rpt(M)725).
11. Report on Appropriation Status by Fiscal Year Program and Subaccounts (Acct Rpt(M)1002). A separate report will be prepared for each base closure account. Each report will indicate, by Military Department, the subaccounts identified in paragraph 130302.C., above, or as prescribed by the Office of the Deputy Comptroller (Program/Budget). For example, for Treasury symbol 97X0510, "DoD Base Closure Account 1990," the WHS will prepare a Report on Appropriation Status by Fiscal Year Program and Subaccounts that may include the following subaccounts for each Military Department (a) military construction, (b) family housing, (c) environmental, (d) operations and maintenance, (e) military personnel-PCS, and (f) other.
12. Prepare Chief Financial Officer reports for all base closure accounts.
13. Provide consolidation of appropriate financial reports to produce Treasury Index 97 financial reports on a pass-through basis.
14. Subject to the approval of the Office of the USD (Comptroller), supplement this guidance with additional procedures, as may be required.

1305 ADMINISTRATION OF BASE CLOSURE FUNDS

130501. Appropriated and Non-appropriated Fund Activities. Expenses, losses, or other events occurring at an appropriated activity as a direct result of a DoD base closure action and that result in a cash outlay are eligible for reimbursement from the applicable DoD Base Closure Account. Expenses, losses, or other events not resulting in a cash outlay by an appropriated activity are not eligible for reimbursement. Expenses, losses, or other events that result in a cash outlay vice expenses, losses, or other events that do not result in a cash outlay are largely dependent upon the unique circumstances in existence at a particular activity subject to closure. However, general guidance on those two categories of expenses and losses are:

A. Expenses that Ordinarily Result in a Cash Outlay

1. Military Construction projects, including planning and design efforts, for which base closure funds are requested.
2. Family Housing projects, including construction, planning and design, and operations for which base closure funds are requested.
3. Operations and Maintenance-type efforts including civilian severance pay, civilian permanent change of station (PCS), outplacement assistance transportation of things, real property maintenance, and program management (civilian workyears, travel, and related support dedicated to implementation efforts).
4. Environmental projects including environmental restoration (reducing, removing, and recycling hazardous wastes, and removing unsafe buildings and debris), Memoranda of Agreements between DoD and States, and reimbursements to the Agency for Toxic Substance and Disease Registry (ATSDR).
5. Community Programs including economic adjustment assistance to a community in which the closed base is located, or community planning assistance to the community to which functions will be transferred as a result of a closure or realignment of a military installation.
6. Federal Agencies including reimbursements to other Federal agencies for actions, other than for environmental activity discussed in subparagraph (d) above, performed with respect to any closure or realignment.
7. Military Personnel, limited to PCS and TDY expenses dedicated to implementation efforts.
8. Procurement-type Items for those items normally purchased with procurement appropriations.

9. Other expenses associated with base closure and realignment efforts.

B. Losses that Do Not Ordinarily Result in a Cash Outlay. Losses on real property or facilities sold, leased, transferred, or disposed of in connection with the closure or realignment of a military installation.

130502. Disposition of DoD Base Closure Assets. The loss (or gain) from the sale, lease, or other disposal of assets shall be recorded by the activity having financial custody of those assets. The sale, lease, or other disposal action will only be recorded in proprietary accounts of that installation. Any proceed generated from the sale, lease, or other disposal action of assets does not add to, or otherwise affect, the budgetary accounts of that activity. Table 13-8 illustrates these entries.

CHAPTER 14

**★TRANSFERRING, DISPOSING, AND LEASING OF
REAL PROPERTY AND PERSONAL PROPERTY**1401 OVERVIEW

★ 140101. Purpose. This chapter provides financial procedures for the disposal, transfer or leasing out of real and personal property. The disposition of proceeds from the sale of surplus personal property is covered by Chapter 5 of Volume 11A.

★ 140102. General. Section 485 of Title 40, United States Code, and sections 2667 and 2667a of Title 10, United States Code, each require that a special fund be established for the deposit of proceeds received from the transfer or lease of real and personal property under the control of a Military Department (other than property at a military installation designated for closure or realignment) and from the lease of personal property under the control of a Defense Agency.

1402 POLICY AND PROCEDURES140201. General.

★ A. Real property, and improvements thereon, under the control of a Military Department (other than property at a military installation designated for closure or realignment) that are determined by the Secretary concerned to be excess to the needs of that Military Department shall be made available for transfer without reimbursement to other Military Departments. If the property is not so transferred, the Secretary of Defense (SECDEF) shall request the Administrator of the General Services Administration (GSA) to transfer or dispose of such property in accordance with applicable laws. Any proceeds generated from such transfer or disposal shall be deposited into a special fund Treasury receipt account. Funds deposited into the special fund Treasury receipt account will be distributed to the Military Department by the Under Secretary of Defense (Comptroller) (USD(C)) consistent with applicable appropriations acts.

★ B. Section 2667 of Title 10, United States Code, allows the Secretary of a Military Department to lease nonexcess real and personal property under its control that is not needed for a public use for the time that it is leased. All fees received from such leases (other than from leases of property at a military installation designated for closure or realignment) shall be deposited into a special fund Treasury receipt account. Funds deposited into the special fund Treasury receipt account will be distributed to the Military Department by the USD(C) consistent with applicable appropriations acts.

★ C. Section 2667a of Title 10, United States Code, allows the SECDEF to lease nonexcess personal property under the control of a Defense Agency that is not needed for a public use for the time that it is leased. All fees received from such leases shall be deposited into

a special fund Treasury receipt account. Funds deposited into the special fund Treasury receipt account will be distributed to the Defense Agency by the USD(C) consistent with applicable appropriations acts.

★ 140202. Special Fund Requirements. The special fund is to be established and operated under the provisions of Chapter 1 of this Volume. The special funds designated by the Treasury for use in connection with section 485 of Title 40, United States Code, and sections 2667 and 2667a of Title 10, United States Code, are account 5188, “Disposal of DoD Real Property,” and account 5189, “Lease of DoD Real Property” have been established as no year accounts.

140203. Special Fund Purposes.

★ A. Section 485 of Title 40, United States Code. Any net proceeds (gross proceeds less expenses of transferring or disposing of the property) received from the transfer or disposal of real property under section 485 of Title 40, United States Code, shall be deposited into special fund Treasury receipt account 5188 (.017, .021 or .057 for Navy, Army and Air Force, respectively) “Disposal of DoD Real Property.” See paragraph 140205, below, for the appropriate accounting treatment.

★ B. Section 2667 of Title 10, United States Code. Funds received from leases entered into pursuant to section 2667 of Title 10, United States Code, shall be deposited into the special fund Treasury receipt account 5189 (.017, .021 or .057 for Navy, Army and Air Force, respectively) “Lease of DoD Real Property.” See paragraph 140206.A for the appropriate accounting treatment.

★ C. Section 2667a of Title 10. Funds received from leases of personal property pursuant to section 2667a of Title 10, United States Code, shall be deposited into the special fund Treasury receipt account 5189 (subaccount .097), “Lease of DoD Real Property.” See paragraph 140206.B for the appropriate accounting treatment.

★ D. Funds deposited in account 5188 and 5189 shall be available to the Military Department concerned for expenditures, to the extent provided for in appropriation acts, as follows:

1. Fifty percent of the funds deposited shall be available for facility maintenance and repair or environmental restoration at the military installation where the property is located, and

2. Fifty percent of the funds deposited shall be available for facility maintenance and repair and environmental restoration by the Military Department concerned.

★ E. Funds deposited in account 5189.097, “Lease of DoD Real Property,” for the lease of Defense Agency personal property, shall be available to the Defense Agency concerned, to the extent provided in appropriations acts, for the maintenance, repair, restoration, or replacement of the leased property.

140204. Reporting Requirements.

★ A. Section 485 of Title 40, United States Code. As part of the annual request for authorization of appropriations by the Armed Services Committee of the Senate and National Security Committee of the House of Representatives, the Department shall include an accounting of each transfer and disposal of real property made during the fiscal year preceding the fiscal year in which the request is made. This summary shall include a detailed explanation of such disposal and the use of the proceeds received.

★ B. Section 2667 of Title 10, United States Code. As part of the request for authorization of appropriations for fiscal years after 1992, the lessor shall provide the following reports:

1. An accounting of all funds received and the use of all money rentals that were deposited and expended during the fiscal year preceding the fiscal year in which the request is made, and

2. A detailed explanation of each lease entered into, and each amendment made to existing leases during the preceding year.

★ C. Section 2667a of Title 10, United States Code. No later than 45 days prior to entering into a lease of personal property for a term that exceeds 1 year and the fair market value of which exceeds \$100,000, the Department shall submit to Congress a written notice describing the terms of the proposed lease and the competitive procedures used to select the lessee.

★ D. The Secretaries of the Military Departments shall submit the data required by subparagraphs A., B.1 and B.2 above, as part of their annual requests for appropriations.

140205. Accounting Procedures.A. Transfers of Department of Defense (DoD) Real Property.

★ 1. If a Military Department determines that real property and improvements thereon, under its control (other than property at a military installation designated for closure or realignment), are excess to its needs and are available for transfer to another Military Department, such transfers will be on a nonreimbursable basis.

★ 2. Real property under the control of a Military Department that is transferred to another Military Department requires accounting entries at the losing activity and corresponding entries at the gaining activity. The accounting entries shall include the acquisition cost of the real property, the cost of any improvements and accumulated depreciation. If the acquisition cost of the property is not known or cannot be determined, the fair market value at the time of the transfer may be used. Detailed explanations for property and fiscal accountability are required as supporting footnotes to the accounting entries.

★ 3. Accounting Entries. Table 14-1 shows the most common entries used for transferring assets. For illustrative purposes, it is assumed that the Army transfers an asset to the Navy.

B. Disposal of Real Property.

★ 1. If real property is not transferred to another Military Department, the SECDEF shall request that the GSA Administrator dispose of such real property in accordance with the provisions of applicable laws. Table 14-2 illustrates the most common accounting entries used to record the removal of real property and improvements from the accounting records when the real property and improvements are to be transferred to the GSA.

2. Any consideration (money), when received, shall be deposited directly into the special fund Treasury receipt account. The explanation for this transaction is as follows:

★ To record the disposition of real property located at (Full Description). Monies received were deposited into the special fund account 5188.xxx "Disposal of DoD Real Property" under cash voucher #_____ in accordance with section 485 of Title 40, United States Code.

3. Funds generated prior to the issuance of this chapter, should have been deposited into "F3875 Budget Clearing Account (Suspense)." Such funds shall be transferred to the applicable special fund Treasury receipt account prior to the end of fiscal year 2000. A no-check SF 1080 may be used to transfer money from F3875 to the special fund receipt account.

ACCOUNTING ENTRIES FOR TRANSFERRING ASSETS**1. Army Entry (Transfer Out)**

basis.

Table 14-1

140206. Leasing Out DoD Assets.

★ A. Funds received from the lease of real and personal property under section 2667 of Title 10, United States Code, (other than from leases of property at a military installation designated for closure or realignment) shall be deposited into the special fund Treasury receipt account, except for amounts paid for utilities and services furnished lessees. Payments for utilities and services furnished lessees pursuant to leases shall be treated as a normal reimbursable transaction with funds credited to the appropriation account from which the cost of furnishing the utilities and services was paid. Funds deposited shall be available to the Military Department concerned for expenditures, to the extent provided for in appropriation acts, as follows:

1. Fifty percent of the funds deposited shall be available for facility maintenance and repair or environmental restoration at the military installation where the property is located, and

2. Fifty percent of such amount shall be available for facility maintenance and repair and for environmental restoration by the Military Department concerned.

★ B. Funds received from the lease of personal property under the control of a Defense Agency, pursuant to section 2667a of Title 10, United States Code, shall be deposited into the special fund Treasury receipt account. Funds deposited shall be available to the Defense Agency concerned, to the extent provided in appropriation acts, for the maintenance, repair, restoration, or replacement of the leased property.

★ 140207. Acceptance of Funds to Cover Administrative Expenses.

★ A. In connection with a real property transaction with a nonfederal person or entity, Section 2695 of Title 10, United States Code, states: "...the Secretary of a Military Department may accept amounts provided by the person or entity to cover administrative expenses incurred by the Secretary in entering into the transaction." Acceptance of funds applies to the following transactions:

★ 1. The exchange of real property;

★ 2. The grant of an easement over, in or upon real property of the United States; or

★ 3. The lease or license of real property of the United States.

★ B. Amounts collected under Section 2695 of Title 10, United States Code, for administrative expenses shall be credited to the appropriation, fund or account from which the expenses were paid. Amounts so credited shall be merged with funds of an identical appropriation, fund or account and shall be available for the same purposes and subject to the same limitations as the funds in the afore-mentioned identical account.

CHAPTER 15

EDUCATIONAL ASSISTANCE PROGRAMS1501 OVERVIEW

150101. Purpose. This chapter provides guidance relative to recording transactions for the Educational Assistance Programs and establishes the accounting principles and standards relative to those requirements.

150102. General.

A. Entitlements under the Educational Assistance Programs are established by law and are available to any person meeting eligibility requirements. Authorizations for entitlements constitute a binding obligation on the part of the Federal Government, and eligible recipients may have legal recourse if the obligation is not fulfilled. Legislation authorizing entitlements does not necessarily include a corresponding appropriation of funds; thus, the subsequent enactment of appropriations may be necessary.

B. Entitlements for veteran educational assistance shall be established in accordance with DoD Directive 1322.16, “Montgomery GI Bill (MGIB) Program” and DoD Instruction 1322.17, “Montgomery GI Bill for the Selected Reserve.”

1502 EDUCATIONAL ASSISTANCE PROGRAMS

150201. Background. The Veteran’s Educational Assistance Act of 1984 (P.L. 98-525) referred to as the Montgomery GI Bill (MGIB), provides for an educational assistance program to aid in the recruitment and retention of members of the Armed Forces and the readjustment of members to civilian life after their separation from military service. The Act also provides a program of educational assistance to the Selected Reserve.

150202. Accounting Treatment. The accounting treatment to be followed for entitlement programs depends on the program and the nature and other circumstances surrounding the requirements to pay benefits. Generally, the unexpended appropriation shall be reduced by the amount of the liability and recorded as a financing source when the liability and expense are recognized.

150203. Eligibility Requirements

A. Active Duty (Chapter 30, Title 38 USC). Eligibility is obtained when an individual:

1. Becomes a member of the Armed Forces.

2. First enters on active duty.
3. Does not opt out of the basic program.
4. Meets the initial Service-defined criteria for additional or supplemental benefits of any type.

★ B. Selected Reserve (Chapter 1606, Title 10, USC). Members of the Selected Reserve who meet all of the following criteria are entitled to educational assistance:

1. On or after July 1, 1985, enlisted, reenlisted or extended an enlistment in a Reserve component for service in the Selected Reserve for a period of not less than 6 years or, in the case of officers, agree to serve in the Selected Reserve for 6 years beyond any existing Selected Reserve obligation.
2. Completed the requirements for award of a high school diploma or equivalency certificate before completing initial active duty training (IADT) or, in the case of an individual reenlisting or extending an enlistment, completed this educational requirement before such reenlistment or extension.
3. Entitlement may not be provided to a member until the member has completed the initial period of active duty for training required of the member.
4. Each person who becomes entitled to educational assistance shall be given a written Notice of Basic Eligibility (DD Form 2384-1) summarizing the provisions of Chapter 1606, Title 10, USC. This notice provides a date of basic eligibility contingent on meeting initial eligibility criteria established in 150203.B.1, 2, and 3 above.

1503 TYPES OF PROGRAMS

150301. Education benefits are comprised of two major categories--contributory programs and noncontributory programs.

150302 . Contributory Programs. Enrollees in these programs, Sec. 3011 and Sec. 3012, Chapter 30, Title 38 USC, have \$100 deducted from their pay each month for the first 12 months of active duty. All participating service members are required to have completed the requirements for a high school diploma or an equivalency certificate, or have successfully completed the equivalent of 12 semester hours in a program of education leading to a standard college degree before completion of their initial active tour of duty. Some exceptions exist for early discharge for service connected disability.

A. Educational Assistance Program for Service on Active Duty. Participation in this program is limited to persons who:

1. After June 30, 1985, first becomes a member of the Armed Forces or first enters on active duty as a member of the Armed Forces.

2. Serves at least three years of continuous active duty in the Armed Forces.

3. Serves at least two years of continuous active duty in the case of an individual whose initial period of active duty is less than three years, (see further stipulations in paragraph 150302.B below).

4. After completion of the service described above:

a. Continues on active duty;

b. Is discharged from active duty with an honorable discharge;

c. Is placed on the retired list or temporary disability retired list, or is transferred to the Fleet Reserve or Fleet Marine Corps Reserve;

d. Is released from the Armed Services under honorable conditions by the Secretary of Defense for further service in a reserve component of the Armed Forces.

B. Educational Assistance Program for Less than Three Years Service on Active Duty. Participation in this program is limited to persons who:

1. After June 30, 1985, first becomes a member of the Armed Forces or first enters on active duty as a member of the Armed Forces.

2. Serves at least two years of continuous active duty.

3. Beginning within one year after completion of the service on active duty, serves at least four years of continuous duty in the Selected Reserve during which the individual participates satisfactorily in the training as required by the Reserve Unit or the Department of Defense.

150303. Noncontributory Programs

A. Educational Assistance Program for Service in the Selected Reserve. Enrollees in this program, Chapter 1606, Title 10 USC, are required to have completed the requirements for a high school diploma or an equivalency certificate before completion of their initial active duty for training. In the case where an individual reenlists or extends an enlistment in the Selected Reserve for a period of not less than six years, is required to have completed the requirements for a high school diploma or an equivalency certificate before such reenlistment or

extension. Individuals may not receive credit for service in both this program and the programs under paragraph 150302. Participation in this program is limited to persons who:

1. After June 30, 1985, enlist, reenlists, or extends an enlistment as a Reserve for service in the Selected Reserve for a period of not less than six years.

2. Are appointed as, or are serving as, a Reserve Officer and agrees to serve in the Selected Reserve for a period of not less than six years in addition to any other period of obligated service.

3. After completion of the requirements above:

- a. Has completed the initial period of active duty training required of the member by the Reserve Unit.

- b. Has been given a statement in writing summarizing the provisions of Sec. 16134 and 16135, Chapter 1606, Title 10 USC, which prohibits educational assistance under this program to members receiving financial assistance as a member of the Senior Reserve Officers' Training Corps Program, or to a member who fails to participate satisfactorily in the required training as a member of the Selected Reserve.

B. Vietnam Era GI Bill Service. This program required service during the period February 1, 1955, through December 31, 1976.

C. Inservice Enrollment in a Program of Education. Participation in this program is limited to individuals who are a member of the Armed Forces who did not elect to participate in the contributory programs in 150302 above, and:

1. After June 30, 1985, has completed at least two years of service on active duty.

2. Continues on active duty or in the Selected Reserve without a break in service. Some exceptions apply for not being able to find a vacancy in, or locate a unit of the Selected Reserve within stipulated timeframes.

D. Supplemental Educational Assistance for Additional Service. Benefits payable under this program are prescribed by the Secretary of Defense, and may provide for the payment of supplemental educational assistance to individuals eligible for educational assistance under paragraph 150302 above. Eligible persons for this program:

1. Must have served five or more consecutive years of active duty in the Armed Forces beyond the years of active duty counted under paragraph 150302 without a break in service.

2. Must have been discharged from service with an honorable discharge, or is placed on the retired list, or is transferred to the Fleet Reserve or Fleet Marine Corps Reserve, or is placed on the temporary disability retire list without a break in service after completion of five or more consecutive years of active duty beyond the years of active duty as specified in the above.

3. Must have completed two or more consecutive years of active duty in the Armed Forces beyond the years of active duty counted under paragraph 150302 without a break in service, and four or more consecutive years of duty in the Selected Reserve.

E. Educational Program for Tutorial Assistance. Benefits for participation in this program is in addition to other educational benefits received, but is limited in benefit amount and number of months.

F. Additional Educational Assistance for Qualified Individuals with Critical Skills or Specialties. The Secretary of Defense, without regard to application, may authorize educational assistance to individuals in specialized categories such as physicians and registered nurses in critical specialties, students in the nursing program, and other health professions.

1504 BENEFITS UNDER CONTRIBUTORY PROGRAMS

150401. Veterans entitled to basic educational assistance with regard to paragraph 150302.A who are pursuing an approved program of education are entitled to receive benefits at the monthly rate of \$350, beginning October 1, 1991, for an approved program of education pursued on a full-time basis. Veterans will received an appropriately reduced rate, as determined under prescribed regulations, for an approved program of education pursued on less than a full-time basis.

150402. With regard to paragraph 150302.B, veterans entitled to basic educational assistance who are pursuing an approved program of education are entitled to receive benefits at the monthly rate of \$250 beginning October 1, 1993, for an approved program of education pursued on a full-time basis. Veterans in this category also will received an appropriately reduced rate, as determined under prescribed regulations, for an approved program of education pursued on less than a full-time basis.

150403. With respect to the fiscal year beginning on October 1, 1993, and each fiscal year thereafter, the monthly rates for each previous fiscal year may provide for a percentage increase in such rates equal to the percentage by which the Consumer Price Index for the 12-month period ending on the June 30 preceding the beginning of the fiscal year for which the increase is made.

150404. In the case of an individual who has a skill or specialty designated by the Secretary of Defense as a skill or specialty in which there is a critical shortage of personnel or for which it is difficult to recruit, individuals who first became a member of the Armed Forces before

November 29, 1989 are entitled to receive a basic monthly rate of up to \$400 in excess of the prescribed monthly rate; and individuals who first became a member of the Armed Forces after this date, are entitled to received a basic monthly rate of up to \$700 in excess of the prescribed monthly rate.

1505 BENEFITS FOR THE NONCONTRIBUTORY PROGRAMS IN THE SELECTED RESERVE

150501. Veterans entitled to basic educational assistance with regard to paragraph 150303.A who are pursuing an approved program of education are entitled to receive benefits, beginning April 1, 1993, at the monthly rate of \$190 for a full-time pursuit of a program of education; \$143 per month for three-quarter-time; and \$95 per month for half-time. Individuals will received an appropriately reduced rate, as determined under prescribed regulations, for an approved program of education pursued on less than a full-time basis if tuition assistance is not available to the person from the respective military department.

150502. With respect to the fiscal year beginning on October 1, 1994, and each fiscal year thereafter, the monthly rates for each previous fiscal year may provide for a percentage increase in such rates equal to the percentage by which the Consumer Price Index for the 12-month period ending on the June 30 preceding the beginning of the fiscal year for which the increase is made.

150503. Educational assistance is available for veterans pursuing a program of education consisting of a program of apprenticeship, other on-the-job training, a cooperative program, a correspondence program of education, flight training program, or a program of approved individualized tutorial assistance. The amount of monthly educational assistance allowance for each program varies and is a predetermined percentage of the monthly allowance otherwise payable to a veteran entitled to receipt of assistance, or a percentage of the cost of the program. With regard to an approved program of individualized tutorial assistance, individuals may receive an amount of up to \$100 per month in addition to the amount of educational assistance allowance otherwise payable to an individual. However, after \$600 is paid, an individual's period of entitlement is reduced at the rate of one month for each dollar amount paid that is equal to the amount of the monthly educational allowance a person is eligible to receive.

1506 FUNDING FOR EDUCATIONAL ASSISTANCE PROGRAMS.

150601. The Veteran's Educational Assistance Act of 1984 established a trust fund to finance DoD education liabilities on an actuarially sound basis. The DoD Education Benefits Fund is a trust fund used to accumulate funds for transfer to the Department of Veterans Affairs (DVA) to cover the DoD share of benefits. The Fund, 97X8098 - Department of Defense Education Benefits Fund (Education Fund), contains the following assets:

A. Amounts paid into the Education Fund from the active duty and reserve personnel appropriations.

B. Any amount that may be appropriated by the Congress to the Education Fund.

C. Interest earned as a result of the investment of available Education Fund cash balance in U.S. Government securities. This method of funding the educational assistance program became effective July 1, 1985.

150602. Amounts payable to the Education Fund shall be based on determinations by a board of actuaries as to the amounts necessary to finance DoD educational liabilities on an actuarially sound basis. The accounting principles contained in Chapter 16 of this Volume also apply to the education benefits programs.

150603. Amounts to be transferred to the Education Fund shall be obligated by Components at the same time military pay is obligated as required in Volume 3, Chapter 8, of this Regulation and further explained in Chapter 16 of this Volume.

150604. The Act provides for withholding a total of \$1,200 (in 12 equal monthly installments) from the basic pay of active duty military members who elect to participate in the new educational program. The Military Departments shall deposit the withheld funds to the general fund of the Treasury as miscellaneous receipts. The miscellaneous receipts subaccounts are identified in paragraph 150606.B, below.

150605. The DVA pays all claims for benefits under the educational program. The DVA also funds the basic educational benefits for active duty military members from a general fund appropriation. An additional basic benefit may be paid at the discretion of the Secretary of Defense. However, this is funded in the military personnel appropriations by the Department of Defense as are all supplemental benefits. These funds shall be paid into the Education Fund for subsequent transfer to the DVA.

150606. The Education Fund is used to accumulate funds for transfer to the DVA to cover the DoD share of benefits. The Director, DFAS, shall account and report for the DoD Education Benefits Fund since it is an Office of the Secretary of Defense account. In addition, the Director, DFAS, shall invest the cash balances of the Education Fund not actually needed to cover transfers to the DVA for payment of benefits.

A. For amounts withheld from active duty members, a general fund proprietary receipt account has been established to which collections of military personnel contributions are deposited. However, the funds collected are treated as proprietary receipts of the DVA, rather than of the Department of Defense, with the appropriate offset against budget subfunction 702 (Veterans' Education, Training, and Rehabilitation).

B. Even though the Department of Defense does not receive credit for the offsetting receipts, it is responsible for collecting the contributions from individuals participating in the program. To ensure proper crediting of the collected funds, all contributions shall be deposited monthly to miscellaneous receipt account 362473 - Contributions from Military

Personnel, Veteran's Educational Assistance Act of 1984. At the DVA's request, actual deposits shall be made to the following subaccounts:

- 362473.1 - Army
- 362473.2 - Air Force
- 362473.3 - Navy
- 362473.4 - Marine Corps

It is essential that the funds be deposited to Treasury index number "36" (DVA) rather than the index numbers for each Military Department.

150607. Each Military Department shall provide the DVA a monthly letter report of funds deposited to Miscellaneous Receipt account 362473. The report shall show only the net amount deposited with no detail.

A. Submit the report in time to reach the DVA no later than the close of business on the seventh workday after the close of the reported month. The following address shall be used for sending the reports:

Department of Veterans Affairs (047H1)
810 Vermont Avenue, NW
Washington, DC 20420
ATTN: C.O. Finance (047H1)

B. If the report cannot be submitted in time to reach the DVA by the seventh workday after the reported month, the Military Department shall report by facsimile (FAX) machine the amount deposited. The report should be "faxed" to the Department of Veterans Affairs Central Office, Field Finance Division.

1507 FUND TRANSFERS OF MILITARY PERSONNEL APPROPRIATIONS

Transfers from the military personnel appropriations to the DoD Education Benefits Fund shall be processed as indicated below. (The determination of the amounts to be transferred and the accounting for these amounts shall follow the accounting requirements contained in Chapter 14, Volume 4, of this Regulation.)

150701. Receipt and Expenditure Accounts. The DoD Education Benefits Fund is classified as a trust fund and uses both receipt and expenditure accounts since it is not designated a trust revolving fund. Receipts are available immediately for expenditure; therefore, the Treasury Department requires deposits to be made using "X" symbolization for the receipt account. Deposits are made to the following trust fund receipt accounts as applicable.

A. 97X8098.1 - Employing Agency Contribution, Department of Defense, Education Benefits Fund. Payments from DoD military personnel appropriations.

B. 97X8098.2 - Earnings on Investments, Department of Defense, Education Benefits Fund. Payments of interest by Treasury on Education Fund investments in U.S. securities.

C. (62) 97X8098 - Disbursements-Unamortized Premium and Discount, Department of Defense Military Retirement and Education Benefits Funds. Purchase of premium, interest, and discount.

D. (72) 97X8098 - Receipts-Unamortized Premium and Discount, Department of Defense Military Retirement and Education Benefits Fund. Write-off and amortization of premium and discount and collection of interest purchased.

E. 20X6825.01 - Unamortized Discount, Department of Defense Military Retirement and Education Benefits Funds. Purchase of discount, write-off, and amortization of discount.

F. 20X6825.02 - Unamortized Premium, Department of Defense Military Retirement and Education Benefits Funds. Purchase of premium, write-off, and amortization of premium.

G. 20X6825.03 - Accrued Interest Purchased, Department of Defense Military Retirement and Education Benefits Funds. Purchase of interest and collection of interest purchased.

150702. Calculation of Transfers. Transfers to the Education Fund from the active duty and reserve component personnel appropriations shall be accomplished monthly. The amounts to be transferred shall be calculated using the formulas provided in paragraphs 150702.A and 150702.B, below, which are based on existing legislation and, therefore, subject to change upon any enacted amendments. The per capita normal costs to be used in the calculations shall be determined by the DoD Education Benefits Board of Actuaries. This information shall be provided to the Military Departments when it becomes available.

A. Active Duty Appropriations. The per capita normal cost multiplied by the number of new entrants who become eligible during the month. Eligibility is defined in paragraph 150203.A, above.

B. Reserve and National Guard Appropriations. The per capita normal cost multiplied by the number of Reserve Component members who become eligible during the month. Eligibility is defined in paragraph 150203.B, above. A contribution is made for an eligible member only one time. Eligibility date is established in the Notice of Basic Eligibility also described in paragraph 150203.B. This eligibility date never changes.

150703. Timing. Transfers of funds for a given month shall be accomplished on or before the last day of that month. If the transfers are accomplished on an estimated basis, they shall be adjusted in the subsequent month when actual figures become available.

150704. Method for Transfer of Funds.

A. Transfers are made on an expenditure basis. Funds shall be disbursed from the military personnel appropriations and collected into the Education Fund. The disbursement and collection transactions are accomplished using the Online Payment and Collection System (OPEC). However, the disbursement and collection transactions also can be made on an SF 1081, "Voucher and Schedule of Withdrawals and Credits." The disbursing officer making the payment shall forward a copy of the completed SF 1081 to the DFAS, and also report both the disbursement and collection transactions on the monthly DD 1329, Statement of Transactions. Completed forms shall be forwarded to the following address:

Director
Defense Finance and Accounting Service
Trust Fund Investment Office
ATTN: DFAS-HQ/GC
1931 Jefferson Davis Highway
Arlington, VA 22240-5291

B. The total amount transferred from the military personnel appropriation to the Education Fund shall be detailed by the Military Service obligation program and reported on the face of the SF 1081 or on a separate attachment.

1508 FUND TRANSFERS TO DVA

Transfers from the DoD Education Benefits Fund to the DVA shall be processed as follows:

150801. The DFAS shall transfer funds to the DVA on an expenditure basis. This is required because VA pays the benefits from general fund appropriation account 36X0137 - Readjustment Benefits, Veterans Administration.

150802. The actual transaction is accomplished by using OPEC which is preferred; however, it also can be accomplished using an SF 1081. The DFAS shall report the payment from the Education Fund account 97X8089 and the collection to general fund appropriation account 36X0137 on its DD 1329. A copy of any completed SF 1081s shall be forwarded to the DVA immediately at the following address:

VADPC (201/35)
Lock Box 66303
AMF O'Hare, Illinois 60666

1509 PAYROLL DEDUCTIONS

150901. Deductions from pay for the education benefits program are governed by the order of precedence for deductions from gross pay established by the Treasury Department in TFM 3-7040. The order of precedence shall be used when the gross entitlement payment is not sufficient to permit all deductions to be made. The order of precedence is in Volume 7 of this Regulation.

150902. When an individual enters on active duty as a member of the Armed Forces, participation in the education benefits program is automatic, unless the service member makes an election not to enroll for education benefits using DD Form 2366. Once enrolled in the program, a deduction from the service member's pay becomes mandatory. The deduction is considered an "Indebtedness Due the United States" and, therefore, ranks ahead of state income taxes and all other deductions of lower precedence. Within the "Indebtedness" category, it takes precedence below any debts due to the Department of Defense since the deduction is deposited to a civil agency account.

1510 REFUNDS OR ERRONEOUS DEDUCTIONS

Refunds or erroneous deductions from active duty members shall be processed as follows:

151001. Current Year Deductions. If the refund takes place within the same fiscal year as the erroneous deduction was made, the payment to an active duty member shall be charged to miscellaneous receipt account 362473. Such transactions will reduce the monthly deduction deposited to miscellaneous receipt account 362473 and reported to the DVA.

151002. Prior Year Deductions. If the refund takes place after the close of the fiscal year in which the erroneous deduction was made, the payment to an active duty member shall be made from Treasury appropriation 20X1807 - Refund of Monies Erroneously Received and Covered. Such payments shall be reported routinely on the Military Department's monthly Statement of Transactions. The Treasury Department shall be contacted by telephone if payments from 20X1807 in excess of \$100,000 are to be made in a given month. The report shall be provided to the Credit and Debt Management Branch, Financial Management Service.

1511 COLLECTION OF EDUCATIONAL DEBTS OWED TO THE GOVERNMENT

Collection of educational debts owed to the government by members of the Selected Reserve shall be processed as follows.

★ 151101. Members of the Selected Reserve receiving educational assistance benefits under Title 10, United States Code, Chapter 1606, and who fail to participate satisfactorily in required reserve training, may be required to refund an amount to the United States. This amount is calculated in accordance with the formula established in Title 10, United States Code, Section 16135(b)(1).

151102. The refund shall equal the product of the following:

A. The number of months of obligated service remaining under the agreement entered into by the reservist divided by the original number of months of the original obligation.

B. The total amount of educational assistance provided to the reservist increased by interest equal to the highest rate being paid by the Treasury on securities having maturity of 90 days or less on the day on which the refund is determined to be due. The interest shall accrue from the day on which the reservist first is notified of the amount due to the U.S. Government as a refund.

151103. Each Military Department shall maintain data on Selected Reserve members who are:

A. Eligible for educational assistance.

★ B. Fail to participate satisfactorily.

C. Not excused from the responsibility to refund overpayments received under the Selected Reserve educational assistance program.

151104 . Responsibility for administering the collection of debts owed to the program has not been established. This matter will be addressed in the memorandum of understanding with the DVA covering financial matters. The Military Departments shall be advised of the determination when the memorandum of understanding is ratified.

151105. The reporting requirements and related standards contained in chapter 14, Volume 4, of this regulation, also apply to the education benefits programs.

CHAPTER 16**MILITARY PERSONNEL ENTITLEMENT PROGRAMS****1601 GENERAL**

160101. Purpose. This chapter prescribes the accounting principles, policy and related requirements to record transactions for entitlement programs established for DoD military personnel.

160102. Overview. Entitlements are legally established benefits available to any person or unit of government meeting eligibility requirements established by law. Authorizations for entitlements constitute a binding obligation on the part of the Federal Government, and eligible recipients may have legal recourse if the obligation is not fulfilled. Legislation authorizing entitlements does not necessarily include a corresponding appropriation of funds, and thus the subsequent enactment of appropriations may be necessary.

1602 GENERAL ACCOUNTING POLICY FOR ENTITLEMENT PROGRAMS

160201. Categories. Entitlement programs are divided into three categories according to the events that give rise to benefit payments. The accounting for these categories, identified as payments based on individual eligibility, payments required by law, and reimbursable events, are discussed in subparagraphs 160201.A through 160201.C, below.

A. When the program is administered by a Federal agency, entitlement benefits based on individuals meeting eligibility requirements of a program shall be recorded as a liability and as an expense when the eligibility requirements are met (as determined by program officials). The liability and expense shall cover all payments expected to be made during the current period of eligibility. Payments made to recipients shall reduce the recorded liability.

B. When payments are authorized (through appropriation and allotment of funds) for disbursement pursuant to legal requirements with no specific action required of the recipients, a liability and expense shall be recorded when the funds are appropriated and allotted to the applicable program managed. The liability and expense shall cover the amount to be disbursed. As payments are made, the liability shall be reduced.

C. When payments are based on the occurrence of a specific event for which costs are reimbursable under an entitlement program, a liability shall be recorded when the event occurs. If the reimbursement is based on end-of-period reports from program administrators, an estimated amount shall be accrued at the end of a reporting period.

160202. When the expense for payments made under an entitlement program exceeds the appropriation (which is permissible for certain programs under special statutory authority), the source of the related funds shall be clearly identified. If the funds were borrowed, the appropriate liability account shall be established.

160203. When there exists substantiated doubt on the continued entitlement of a military retiree or annuitant to benefit payments, and payments on an account are suspended, the Defense Finance and Accounting Service (DFAS) shall cease obligating on the subject account for retired pay, retainer pay, or annuitant benefits. Previously obligated amounts shall be deobligated to the extent of recoveries on previous payments or amounts held in a suspense account. Although this procedure is directed primarily at suspected death status accounts, it applies equally to other situations that may terminate entitlement. Examples of other situations include (but are not limited to) employment by a foreign government, renounced U.S. citizenship, remarriage of a surviving spouse, and certain student annuitants who drop out of school.

1603 ACCOUNTING POLICY FOR THE ACCRUAL AND INVESTMENT OF RETIRED MILITARY PAY

160301. Retired military pay is a pension program established for the payment of annuities or pensions to retired military personnel. As such, it fits under the broad category of entitlement programs as defined by the General Accounting Office (GAO).

160302. The FY 1984 Defense Authorization Act, Public Law 98-94, changed the method of financing military retired pay effective October 1, 1984. Under the former method, the Department estimated retired pay requirements for the forthcoming fiscal year, obtained an appropriation from the Congress, and made periodic payments of retired pay, retainer pay, and survivor benefits. Under Public Law 98-94, such payments are made to the DoD Military Retirement Fund (Retirement Fund), which contains the following assets:

A. Amounts paid into the Retirement Fund from the Military Personnel, Reserve Personnel and National Guard Personnel appropriations representing future retirement and survivor benefits being accrued by members performing current service.

B. Amounts paid into the Retirement Fund from a permanent, indefinite general fund appropriation representing a portion of retirement and survivor benefits already accrued by members due to past service.

C. Interest earned as a result of the investment of available Retirement Fund cash balances in U.S. securities.

160303. Determinations of the current portion of retired military benefits and amounts required to liquidate the unfunded portion of the Retirement Fund are discussed in the remainder of this section.

A. Amounts payable to the Retirement Fund shall be based on determinations by the board of actuaries as to the amounts necessary to fund present and future benefits payable to military retirees and their survivors. DoD Components shall include in their Military Personnel Appropriation budgets the funds to be transferred to the Retirement Fund to meet the amounts determined necessary by the DoD Board of Actuaries.

1. Accumulated benefits for a given program shall be comprised of benefits expected to be paid to the following:

a. Persons who have met the conditions of the program and will receive benefits in the future.

b. Persons who have met enough of the conditions of the program to be considered probable recipients of future benefits.

c. The survivors of both groups, as applicable.

2. Accumulated benefits shall be based on participants' history of earnings, work or service, and other appropriate factors as of the benefit information date. The benefit information date is the date when benefit information is presented. Projected years of work or service shall be a factor only in determining a person's expected eligibility for particular program benefits.

3. Automatic benefit increases, specified by the provisions of the program that are expected to occur after the benefit information date, shall be recognized when computing program benefits. The long-term inflation rate assumed shall be the future average long-term inflation rate determined by the Office of Management and Budget (OMB) to be most appropriate for Federal pension plans that report under 31 U.S.C. 9503. Other economic actuarial assumptions regarding future rates of interest and salaries shall be consistent with the assumed inflation rate.

B. Calculation of the annual amount required to liquidate the unfunded liability of the Retirement Fund shall be performed by the DoD Board of Actuaries.

C. Amounts to be transferred to the Retirement Fund for retired pay accrual shall be obligated by the DoD Components at the same time military pay is obligated as required in Volume 3 of this Regulation and further explained in paragraphs 160307 and 160308, below, of this chapter.

D. Entitlements for military retired pay and surviving annuities are described in Volume 7B, of this Regulation. Payments of authorized and accrued benefits shall be made from the Retirement Fund, a trust fund established under Public Law 98-94.

E. Calculations of the amount of the current portion of retired military benefits shall be performed centrally by the Military Departments for active, Reserve, and National Guard military personnel. The calculations shall employ a retired military pay accrual percentage published annually by the Office of the Secretary of Defense and shall be applied to the total base pay amount calculated. The term "base pay" means outlays for basic pay. The Military Departments also shall obligate and disburse amounts calculated for the retired pay accrual in the applicable military pay active duty, reserve, and national guard accounts and deposit the funds to the Retirement Fund receipt account 97X8097.1 - Employing Agency Contribution, DoD Military Retirement Fund.

160304. The Director of Investment Office, DFAS-HQ, shall be responsible for investing cash balances of the Retirement Fund not actually needed to cover payment of current retirement payments. Investments are limited to U.S. Government securities issued by the Department of the Treasury.

160305. Retired pay benefits shall be calculated and paid by the Defense Finance and Accounting Service.

160306. All reimbursements made to DoD Components in accordance with the guidance contained in Volume 11A of this Regulation for retired military pay shall be credited to the applicable military personnel appropriation account.

160307. Accounting for military pay active duty accounts shall be as follows:

A. Amounts equating to an actuarially determined percentage of basic pay shall be obligated each month for subsequent payment to the Retirement Fund.

B. Accounting for the direct program shall be at the budget subactivity level presently prescribed in Volume 2, Chapter 2, of this Regulation. Accounting for the reimbursable program may use a simplified structure to include basic pay, retired pay accrual, and other.

C. The amount accrued for retired pay shall be obligated each month. At the end of the month, amounts obligated for retired pay accrual shall be disbursed. If information on the total entitlement and total expenditures is not available at the end of the month, estimates (see subparagraph 160307.E, below) may be used and appropriate adjustments made when the actual amounts become known.

D. Release of funds shall be consistent with budgetary authority. An undelivered order entry shall be made at the beginning of each month in the amount of the estimated obligation accrual to the member for the Retirement Fund. Before the end of each month, the actual obligations shall be recorded and an accrued expenditure (paid or unpaid, as

applicable) established. The corresponding disbursement of funds shall agree with the reported outlay and amount obligated.

E. All military pay accounting systems shall provide for the recording of obligations for basic pay separate from other kinds of pay and allowances. However, the liquidation of obligations for pay and allowances may be on a gross basis. If the actual amount of basic pay paid is not known at the end of the month, the following formula, or an equivalent, can be used to calculate the amount of the retired pay obligation to be liquidated and disbursed to the Retirement Fund:

$$A * \text{x Retired Pay Accrual} = \text{Payment}$$

* “A” is a percentage determined by dividing the total reported expenditures for pay and allowances (other than retired pay accrual) by the total entitlement (other than retired pay accrual).

F. Disbursements for retired pay benefits shall be deposited at the end of each month to trust fund receipt account 97X8097.1 - Employing Agency Contribution, Department of Defense Military Retirement Fund. Disbursement and collection transactions shall be accomplished by use of an SF 1081, “Voucher and Schedule of Withdrawals and Credits.” The disbursing officer making the payment also shall process the collection, forward a copy of the completed SF 1081 to DFAS, and report both the disbursement and collection transactions on the monthly Statement of Transactions. The DFAS copy of the SF 1081 shall be transmitted by electronic means immediately upon completion of the transactions so that the deposit may be recorded in the Retirement Fund as soon as possible and the funds invested.

160308. Accounting for Reserve and National Guard personnel accounts shall be as follows:

A. Amounts equating to an actuarially determined percentage of basic pay shall be obligated each month for subsequent payment to the Retirement Fund.

B. Accounting for the direct program shall be at the budget sub-activity level prescribed in section Volume 2, Chapter 2, of this Regulation. A simplified structure which includes basic pay, retired pay accrual, and other may be used in accounting for the reimbursable program.

C. The amount accrued for retired pay shall be obligated monthly. At the end of the month, amounts obligated for retired pay accrual shall be disbursed. If information on the total entitlement and total expenditures is not available at the end of the month, estimates (see subparagraph 160307.E, above) may be used and appropriate adjustments made when the actual amounts become known.

D. Disbursements for retired pay benefits shall be deposited at the end of each month to trust fund receipt account 97X8097.1 - Employing Agency Contribution, Department of Defense Military Retirement Fund. Disbursement and collection transactions shall be accomplished by use of an SF 1081, "Voucher and Schedule of Withdrawals and Credits." The disbursing officer making the payment also shall process the collection, forward a copy of the accomplished SF 1081 to the DFAS, and report both the disbursement and collection transactions on the monthly Statement of Transactions. The DFAS copy of the SF 1081 shall be transmitted by electronic means immediately upon accomplishment of the transactions so that the deposit may be recorded in the Retirement Fund as soon as possible and the funds invested.

160309. Accounting for the permanent indefinite appropriation, 97_0040, "Payments to Military Retirement Fund, Defense" shall be as follows:

A. At least 1 week before the end of the fiscal year, the Director of Investment Office, DFAS-HQ, shall provide the Secretary of the Treasury with a certification of the amount that should be appropriated to this account for the ensuing fiscal year. The certification shall include the amount needed to fund the amortization of the original unfunded liability for military retirement and any other unfunded liability resulting from benefit structure changes and actuarial gains or losses. A copy of the certification shall be sent directly to:

Department of the Treasury
Funds Management Division
Finance Management Branch
3700 East-West Highway
Room 6F06-PGCII
Hyattsville, MD 20782

B. Upon receipt of the certification, the Treasury Department will issue a TFS Form 6200, "Appropriation Warrant," for the amount certified and forward it to the DFAS. The TFS Form 6200 shall be dated October 1 and shall be provided to the Department of Defense on or before that date so that the funds are available for investment as soon as the new fiscal year begins.

C. On October 1, the DFAS shall record the TFS Form 6200, disburse the entire amount from 97_0040, and deposit it to trust fund receipt account 97X8097.3 - Federal Contribution, DoD Military Retirement Fund.

D. The DoD Military Retirement Fund is classified as a trust fund and makes use of both receipt and expenditure accounts since it is not designated as a trust revolving fund.

1. Deposits are made to the following trust fund receipt accounts as applicable:

a. 97X8097.1 - Employing Agency Contribution, Department of Defense Military Retirement Fund. Payments from DoD Military Departments for accrual of future retired pay benefits and transfers of deposits made by Judges of the U.S. Court of Military Appeals, including interest, from the Civil Service Retirement and Disability Fund (24X8135).

b. 97X8097.2 - Earnings on Investments, Department of Defense Military Retirement Fund. Payment of interest by Treasury on Fund investments in U.S. securities.

c. 97X8097.3 - Federal Contribution, Department of Defense Military Retirement Fund. Payments from the permanent indefinite appropriation for the unfunded liability - 97_0040.

d. (62) 97X8097 - Disbursements-Unamortized Premium and Discount, Department of Defense Military Retirement Fund. Purchase of premium, interest, and discount.

e. (72) 97X8097 - Receipts-Unamortized Premium and Discount, Department of Defense Military Retirement Fund. Write-off and amortization of premium and discount and collection of interest purchased.

f. 20X6825.01 - Unamortized Discount, Department of Defense Military Retirement and Education Benefits Funds. Purchase of discount, write-off, and amortization of discount.

g. 20X6825.02 - Unamortized Premium, Department of Defense Military Retirement and Education Benefits Funds. Purchase of premium, write-off, and amortization of premium.

h. 20X6825.03 - Accrued Interest Purchased, Department of Defense Military Retirement and Education Benefits Funds. Purchase of interest and collection of interest purchased.

2. The symbol for the trust fund expenditure account is 97X8097. Amounts deposited to the above receipt accounts are available immediately to the trust fund expenditure account for investment or payment of retired pay benefits.

a. Account 97X8097 shall incorporate the same budget activity structure as the account "Retired Pay, Defense." Accounting shall be at least at the budget activity level. Lower level accounts shall be established as necessary to meet reporting requirements.

b. Since 97X8097 is an Office of the Secretary of Defense account, the DFAS shall be responsible for its overall accounting and reporting.

c. The DFAS, acting for the Secretary of Defense, shall allocate a portion of 97X8097 to each Military Department in order to fund payments of retirement benefits.

d. Annuity payments to retired Judges of the U.S. Court of Military Appeals shall be charged to 97X8097.

160310. Reporting requirements for the Retirement Fund and payments to the Fund are as follows:

A. DoD Components shall report in their Statement of Operations the amount of Federal contributions (including accrued amounts), if any, made to the pension plans(s) on behalf of their employees. The agency contribution shall not include amounts withheld from employee's compensation for submission to the plan(s).

B. DoD Components which administer programs that provide annuity benefits to eligible participants shall recognize, for reporting purposes, a liability for the actuarial present value of accumulated benefits. These are benefits earned or accrued as of the benefit information date (see subparagraph 160303.A.2., above), but will not be paid until a later date.

1. The actuarial present value of accumulated benefits is that amount, as of the benefit information date, that results from applying actuarial assumptions to the benefit amounts determined pursuant to subparagraphs 160303.A. of this chapter. The actuarial assumptions are used to adjust the amounts to reflect the time value of money (through discounts for interest) and the probability of retirement between the benefit information date and the date of retirement.

2. The significant assumptions used in determining actuarial present values shall, in the aggregate, be reasonable and reflect the best estimate of each program's anticipated experience.

3. The benefit information date shall be the end of the fiscal year being reported on. Changes in benefit rules during a year shall be reflected in that year's computation of accumulated benefits.

4. For the year in which the liability for the present value of accumulated benefits is first recorded, the initial amount of the liability shall be reported as an accounting change, i.e., a charge to equity and an accrued liability. Thereafter, changes in the liability each year shall be charged or credited to expense.

5. Footnotes to the financial statements shall disclose the nature and amount of required agency contributions, if any. The footnotes also shall disclose the agency responsible for the pension plan and, thus, responsible for reporting the unfunded liability.

6. Components that administer pension plans shall comply with requirements established by 31 U.S.C. 9501, and the accounting guidance issued pursuant to that law. Financial information for pension plans shall be reported in the annual financial statements of administering agencies.

7. The notes to the financial statements shall include a description of the methods and significant assumptions used in computing the actuarial present value of future program benefits. Additionally, if the actuarial liability computed in accordance with these standards is different from the actuarial liability computed for funding purposes, the liability used for funding purposes shall be disclosed in the footnotes along with an adequate explanation of any significant differences between the two liabilities.

C. Permanent Indefinite Appropriation 97 0040 - Payments to the Department of Defense Military Retirement Fund. The DFAS is responsible for the preparation of the reports for this account in accordance with Volume 6 of this Regulation.

D. Department of Defense Military Retirement Fund

1. Report on Budget Execution, DD Form 1176. The DFAS shall submit a DD Form 1176 for all of the Retirement Fund receipt and expenditure accounts. The report on the Retirement Fund receipt account shall be footnoted to indicate the source of deposits to account 97X8097.1 - Employing Agency Contribution, Department of Defense Military Retirement Fund.

2. Appropriation Status by Fiscal Year Program and Subaccounts, RCS DD-Comp(M)1002. The DFAS shall submit this report for the Retirement Fund expenditure account prepared in accordance with Volume 6 of this Regulation.

3. Other Reports. The DFAS shall follow the instruction in Volume 6 of this Regulation, as applicable. In addition, the Military Departments shall comply with the monthly reporting requirements contained in Volume 6 of this Regulation.

(This page intentionally left blank.)

CHAPTER 18**MILITARY TEMPORARY EARLY RETIREMENT AUTHORITY PROGRAM****1801 OVERVIEW**

180101. **Purpose.** This chapter provides procedures for funding, accounting for, disbursing, and reporting retirement payments for those members chosen for early retirement under the provisions of section 4403, Public Law 102-484, National Defense Authorization Act for FY 1993.

180102. **General.** Public Law 102-484, National Defense Authorization Act for FY 1993, provided the Secretary of Defense a temporary additional force management tool with which to effect the drawdown of military forces. Subsection 4403(f) of the Act directs the use of a subaccount within the budget activities in the Active, Reserve and Guard Military Personnel Appropriations for retirement payments to members participating in the Temporary Early Retirement Authority (TERA) Program. The use of the TERA Program was extended through the end of FY 1999 by the National Defense Authorization Act for 1994, Public Law 103-160.

1802 POLICY AND PROCEDURES

180201. Subject to the availability of appropriations for purposes set forth in section 4403, the Secretary of each Military Department shall provide for the payment of retired pay amounts, beginning in FY 1993, to active service military members who retire up to 5 years before the completion of a 20-year period of service.

180202. When a military member retires early under authority of section 4403, an amount that is sufficient to cover the retired pay (with appropriate reductions if the Survivor Benefit Plan is elected) and cost of living adjustments (COLAs) until the member would have reached 20 years of service shall be obligated in the subaccount established in the applicable Active, Reserve or National Guard Military Personnel Appropriation. After that time, the member's retirement pay shall be funded from the Department of Defense Military Retirement Fund (97X8097). The funds included in the subaccount shall be provided in the fiscal year in which the applicable member retires. For example, assume that a TERA retiree's monthly gross retirement pay is \$1000 with an Survivor Benefit Plan (SBP) amount of \$100. Based on the computation referenced above, the amount to be obligated would be \$900 for each month plus cost of living adjustments (COLA) until the member would reach 20 years.

180203. Deductions from retired pay of TERA retirees who elect SBP are treated no differently than similar deductions in the case of retirees who retire after 20 years or more of service. There is no provision in the law for transferring amounts into the DoD Military Retirement Trust Fund equaling such reductions.

180204. There is no provision in the law that would require contributions to the Department of Defense Military Retirement Trust fund to be calculated any differently as a result of TERA. If the Board of Actuaries determines that an unfunded liability exists as a result of a change in member benefits, it would establish a proper amortization schedule pursuant to 10 U.S.C. Section 1465(c)(2), and payments into the fund would be adjusted accordingly (10 U.S.C. Section 1466 (b)(2)(B)).

180205. The required subaccounts, within the Active, Reserve and National Guard Military Personnel Appropriations, will be established for each Military Department, for each fiscal year. Amounts included in this subaccount shall be for those members that were chosen for early retirement under the provisions of section 4403. Such amounts shall be sufficient, and made available, to pay the retired members for their entire “initial period” of entitlement up to the time that responsibility for their retired pay payments is funded by the Department of Defense Military Retirement Fund (97X8097). The “initial period” is the number of years (and any fraction of a year) equal to the difference between 20 years and the number of years of service for retirement eligibility completed by the member at the time the member retired under the authority of section 4403.

180206. The Secretary of each Military Department shall provide funding for a member’s initial period from amounts included in the subaccounts. The amounts included in the subaccounts shall remain available for payment in accordance with section 4403(f) of Public Law 102-484 and Title 31, United States Code, section 1553(a).

1803 RESPONSIBILITIES

180301. Secretary of each Military Department. The Secretary of each Military Department, or designee, shall:

A. In conjunction with the Office of the Deputy Comptroller (Program/Budget) (ODC(P/B)), OUSD(C), establish a subaccount entitled “Temporary Early Retirement Pay” within (1) the Pay and Allowances of Officers or Pay and Allowances of Enlisted budget activity, as applicable, for the Active Personnel Appropriations, and (2) Other Training and Support budget activities for the Reserve and National Guard Personnel Appropriations.

B. In conjunction with the ODC(P/B), establish separate subaccounts in the Active, Reserve and National Guard Personnel Appropriations for FY 1993, FY 1994, FY 1995, and October 1, 1995 (one day of FY 1996).

C. Provide for funding in the Active, Reserve and National Guard Personnel Appropriations to pay members who were approved for “early retirement” under the provisions of section 4403, Public Law 102-484.

D. As appropriate, identify to the ODC(P/B), the number of military personnel entitled under the TERA Program.

E. Identify, in budget submissions to the ODC(P/B), the number of military personnel and the appropriate funding source to pay retired personnel selected for early retirement.

F. In conjunction with the ODC(P/B), prepare appropriate funding guidance, as needed, to operate the TERA Program.

180302. Under Secretary of Defense (Personnel and Readiness) (USD(P&R)). The Under Secretary of Defense (Personnel and Readiness) shall provide, as a minimum, annual reports to ODC(P/B) Operations Directorate identifying the number of military members scheduled to retire in the forthcoming fiscal year under provisions of the TERA Program. The first report shall be provided in sufficient time to ensure that funding is available to establish the subaccount during the last quarter of FY 1993.

180303. Office of the Deputy Comptroller (Program/Budget). The ODC (P/B) shall:

A. Review the Military Departments' budget submissions for reasonableness and accuracy.

B. Ensure that the various budget submissions include the appropriate numbers/costs for the TERA Program.

180304. Defense Finance and Accounting Service. The Defense Finance and Accounting Service (DFAS) shall:

A. In conjunction with the Military Departments, ensure that obligations are established in the accounting systems when funds for the "early retirees" are transferred to the appropriate subaccounts.

B. Establish appropriate controls within the accounting systems to perform normal accounting and reporting functions for the TERA Program.

C. Ensure that the subaccount(s) and the appropriate line(s) of accounting for each Military Department are provided to the appropriate DFAS Center.

D. Ensure that fiduciary, fund status and financial management reports are prepared to coincide with reporting for the Active, Reserve and National Guard Personnel Appropriations.

E. Modify military pay systems to compute pay, benefits and withholdings for the TERA Program participants.

F. Establish methods to distinguish personnel participating in the TERA Program from regular active military members. Such action is necessary so that the monthly pay entitlements for the TERA Program participants are transferred from the appropriate Active, Reserve or National Personnel Appropriation to the Department of Defense Military Retirement Fund (97X8097) at the appropriate time.

G. Establish procedures to assist early retirees with actions affecting their pay accounts.

CHAPTER 19**FOOD SERVICE PROGRAM**

(This Chapter is effective on October 1, 1996.)

1901 OVERVIEW

190101. Purpose. This chapter prescribes financial management policy and procedures formerly contained in Chapter 6, “Financial Management” of the DoD 1338.10-M, Manual for the Department of Defense Food Service Program.

190102. General

A. Title 37, United States Code, section 1011, generally requires the Department to collect the full cost of meals eaten in an appropriated fund dining facility. The provisions of this chapter shall be used to determine specific meal charges for all classes of diners, to include individuals, groups and units.

B. This chapter also prescribes that the Under Secretary of Defense (Comptroller) (USD(C)) annually shall establish rates for the meals to be consumed at appropriated fund dining facilities.

C. The format and reporting requirements for the DD-COMP(A)1736, “DoD Food Service Operating Expense Report” now are contained in Volume 11A, “Reimbursable Operations, Policy and Procedures,” Chapter 6, “Chief Financial Officer’s Annual Reimbursable Rates,” Appendix F, of this Regulation.

190103. Applicability. This chapter is applicable to all DoD activities and shall be used on a DoD-wide basis. The Office of the USD(C) is responsible for the financial management policies herein. The Defense Finance and Accounting Service is responsible for applicable procedures necessary to assist the DoD Components in implementing these policies. The financial management policies and procedures herein shall not be supplemented by DoD Component issuances without the prior written approval of the USD(C).

1902 REIMBURSABLE MEAL AND MEAL SERVICE (OPERATING) CHARGES

190201. Meal Rates. The provisions of this chapter shall be used to determine use of the DoD discount meal rate (the cost of the food only) or the DoD standard meal rate (the cost of both the food and the non-training/readiness food service operating expenses).

190202. Meal Services Available. There are two types of meal service available to personnel authorized to use an appropriated fund dining facility on a reimbursable basis--traditional and a la carte.

A. Traditional Meal Service. Under the traditional meal service system, diners shall pay either the DoD standard meal rate or the DoD discount meal rate (as prescribed by paragraph 1903), without regard to the menu items taken.

B. A la carte Meal Service. Under the a la carte meal service system, diners shall pay either the DoD standard meal rate or the DoD discount meal rate (as prescribed by paragraph 1903), for the food items selected.

1. The Military Departments shall ensure that a consistent and fair a la carte pricing policy is applied uniformly and consistent with guidance provided by the USD(C).

2. Generally, each food item shall be priced at actual cost (or rounded to the nearest five cents). However, price averaging of certain salads, vegetables, and other food categories is authorized (e.g., a salad bar with different types of salads or vegetables).

3. When the cost of food changes, the a la carte items shall be repriced accordingly.

190203. Rates prescribed herein are applicable to meals furnished by a Military Department to military active duty personnel, personnel of the Reserve Components who are paid from Reserve or National Guard appropriations, federal civilian employees, military retirees, dependents of military personnel, and any other authorized diners.

190204. Title 37, United States Code, section 1011, generally requires the Department to charge the standard meal rate for meals eaten in an appropriated fund dining facility. There are some exceptions, however, as indicated in paragraph 1903 of this chapter.

1903 MEAL CHARGES

Reimbursement charges for persons authorized to eat in an appropriated fund dining facility vary depending on the status of each person. The five major categories of personnel are officers, enlisted personnel, military dependents, Federal civilian employees and others.

190301. Officers

A. Charge Required. DoD military officers are not authorized to eat in appropriated fund dining facilities without charge.

B. Discount Meal Rate. Officers, when not receiving the meal portion of per diem, shall be charged the discount meal rate when they are:

1. Performing duty on a U.S. Government vessel,
2. On field duty,

3. In a group travel status,
 4. Included in essential unit messing (EUM) as defined in the JFTR, Volume 1,
 5. On a U.S. Government aircraft on official duty either as a passenger or as a crew member engaged in flight operations, or
 6. On Joint Task Force (JTF) operations other than training at temporary U.S. installations, or using temporary dining facilities.
- C. Standard Meal Rate. Officers shall be charged the standard meal rate when in any status other than that set forth in paragraph 190301.B., above.

190302. Enlisted Personnel

A. Conditions for Charge. Enlisted personnel may eat in an appropriated fund dining facility without charge when not receiving either an allowance for subsistence or the meal portion of per diem. Enlisted personnel entitled to meals at government expense shall be furnished such meals on a nonreimbursable basis without regard to unit or DoD Component affiliation. Reimbursement between the Military Departments for such meals is not authorized for active duty personnel and members of the Reserve Components.

B. Discount Meal Rate. Enlisted personnel when not receiving the meal portion of per diem, shall be charged the discount meal rate when they are:

1. On a U.S. Government aircraft on official duty either as a passenger or as a crew member engaged in flight operations, or
2. On Joint Task Force (JTF) operations other than training at temporary U.S. installations, or using temporary dining facilities.

Note: Enlisted members are not entitled to the meal portion of per diem, nor a monetary allowance for subsistence, when on field duty, sea duty, group travel, or essential unit messing. Therefore, meals should be furnished at no cost to those enlisted members and, as a result, there is no reimbursable rate for enlisted members when on field duty, sea duty, group travel, or essential unit messing. (Title 37, U.S.C., sections 402 and 404, and E.O. 11157)

C. Standard Meal Rate. Enlisted personnel shall be charged the standard meal rate when they are receiving the meal portion of per diem or when they are receiving an allowance for subsistence. Enlisted personnel on recruiting duty, who receive an allowance for subsistence based on the nonavailability of subsistence-in-kind (i.e., rations not available), as authorized in Volume 7A of this Regulation, shall be authorized to receive, and to pay the standard meal rate for, a meal furnished by an appropriated fund dining facility.

190303. Military Dependents

A. Charge Required. Military dependents are not authorized to eat in appropriated fund dining facilities without charge.

B. Discount Meal Rate. Military dependents shall be charged the discount meal rate when they are dependents of enlisted members in pay grades E-1 through E-4.

C. Standard Meal Rate. All military dependents, other than military dependents of enlisted members in pay grades E-1 through E-4, shall be charged the standard meal rate.

190304. Federal Civilian Employees

A. Charge Required. Federal civilian employees are not authorized to eat in appropriated fund dining facilities without charge.

B. Discount Meal Rate. Federal civilian employees, not receiving the meal portion of per diem, shall be charged the discount meal rate when they are:

1. Performing duty on a U.S. Government vessel,
2. On field duty,
3. In a group travel status,
4. Included in essential unit messing (EUM) as defined in the JFTR,
Volume 1,
5. On a U.S. Government aircraft on official duty either as a passenger or as a crew member engaged in flight operations, or
6. On Joint Task Force (JTF) operations other than training at temporary U.S. installations, or using temporary dining facilities.

C. Standard Meal Rate. Federal civilian employees shall be charged the standard meal rate when in any status other than those set forth in subparagraph 190304.B., above.

190305. Members of Youth Groups. This category consists of members of organized nonprofit youth groups sponsored at the national or local level and ad hoc groups of youths. The distinction between the two groups is that an organized youth group has continuity over time, and a structure (such as officers, advisors, organization rules), and an ad hoc group does not. For example: A local high school Key Club, which may be sponsored by the Kiwanis

★ Change – September 1997

Club, would qualify as an organized nonprofit youth group. On the other hand, if the children of a local Kiwanis Club's members visited an installation, they would be considered to be an ad hoc group because they are not a formally organized and structured youth group.

A. Charge Required. These individuals are not authorized to eat in appropriated fund dining facilities without charge.

B. Discount Meal Rate. Members of an organized nonprofit youth group sponsored at either the national or local level shall be charged the discount meal rate, when extended the privilege of visiting a military installation, or when residing at a military installation pursuant to an agreement in effect on June 30, 1986, and permitted to eat in the general mess by the commanding officer of the installation (37, USC 1011(b)).

C. Standard Meal Rate. All other youth group individuals (members of ad hoc youth groups) shall be charged the standard meal rate.

190306. Others. This category includes military retirees and their dependents and all other individuals not included in paragraphs 190301, 190302, 190303, 190304, or 190305, above.

A. Charge Required. These individuals are not authorized to eat in appropriated fund dining facilities without charge.

B. Standard Meal Rate. These (all other) individuals shall be charged the standard meal rate.

1904 GENERAL PROVISIONS

190401. Personnel, other than enlisted personnel, may receive a meal from an appropriated fund dining facility, provided no increase in direct resources results from feeding such personnel and appropriate meal charges are collected consistent with paragraph 190305., above.

190402. The commanding officer of the DoD installation, at which an appropriated fund dining facility is located, is responsible for assuring that meals are provided only to authorized personnel within the capabilities and availability of existing appropriated fund dining facilities.

190403. Temporary duty orders shall indicate the food allowance/per diem status of travelers to assist in determining the appropriate meal charge to be assessed.

190404. Service Academies (i.e., Army, Navy, and Air Force) are to use the food service operating expenses published annually by the USD(C). See Chapter 20 of this Volume.

190405. Civilian and military personnel of a foreign government shall be furnished meals in accordance with specific arrangements made between the U.S. Government and the foreign government. Charges for food costs and related food service operating expenses shall be made on the same basis as they would be for U.S. Government personnel of equal rank.

1905 DISPOSITION OF FUNDS

190501. Each Military Service shall budget and account for all meals furnished by its appropriated fund activities.

190502. Program obligations and expenditures, as well as revenues and food service operating expenses, shall be recorded, accumulated, and controlled in accordance with Chapter 1, “General Reimbursement Procedures and Supporting Documentation,” of Volume 11A of this Regulation.

190503. Collections

A. Except when deductions from pay are authorized and have been provided for, or prior arrangements for payment have been established with an official of an authorized group, diners shall pay for a meal in cash prior to the meal being served. In any event, all meal charges must be determined and posted not later than the last day of the month incurred with payment being made not later than the 15th of the following month.

B. Any losses that might be incurred from uncollectible accounts must be absorbed by the subsistence account funding the facility.

190504. Collections shall be distributed as follows:

A. Discount Meal Rate. Collections received from patrons paying the discount meal rate (food costs only) shall be credited to the applicable financing subsistence account of the Military Service.

★ B. Standard Meal Rate. Collections received from patrons paying the standard meal rate shall be credited to the financing appropriation(s). The food cost portion shall be credited to the subsistence account and the operating expense portion (difference between discount and standard meal rates) to the operations and maintenance or other financing account(s).

1906 ACCOUNTING FOR FOOD ALLOWANCES

190601. Information Requirements

A. Information requirements have been established to ensure that data are maintained and that information is reported for use in determining and administering food

allowances. These requirements prescribe procedures for counting meals furnished to personnel in appropriated fund dining facilities under the daily food allowance and authorized reimbursable programs. They are designed to assist in monitoring food costs and allowances and making the accumulation of data more consistent throughout the Department under the programs established by DoD Directive 1338.10, “DoD Food Service Program.”

B. The requirements in subparagraph 190601.A., above, do not cover food service operating expenses incurred in preparing and serving food in an appropriated fund dining facility (see Volume 11A, Chapter 6, Appendix F, of this Regulation), or the recording and reporting of obligations/expenditures against the daily food allowance portion of the operations and maintenance appropriations as set forth in Volume 2, “Budget Formulation,” and Volume 3, “Budget Execution,” of this Regulation.

C. Data elements and codes shall be established consistent with DoD Instruction 5000.12, “Data Elements and Data Codes Standardization Procedures.”

D. The data reported must support budget requests based on furnishing meals to entitled enlisted personnel by each Military Service, after consideration of the absentee rate, without regard to the member’s parent Military Service.

190602. Counting the Number of Persons Furnished Meals

A. Except for mass feeding situations as set forth in subparagraphs B.1. and 2., below, all personnel authorized to eat in appropriated fund dining facilities shall identify themselves with a meal card, United States Uniformed Services identification card, or travel orders issued by a DoD Component before receiving a meal from a dining facility. Enlisted personnel on BAS or receiving the meal portion of per diem, as well as all officers, civilian employees, official visitors, dependents, and guests authorized to eat on a reimbursable basis, shall be required to identify themselves as to the category of entitlement (authorized to eat on a reimbursable basis) and status (per diem or non-per diem) and reimburse DoD at the appropriate meal rate before receiving a meal from an appropriated fund dining facility.

B. The following procedures shall be used to account for meals served to authorized subsistence-in-kind entitled or cross Service reimbursable personnel.

1. Each dining facility shall maintain a log in which each diner’s unit of assignment and identification, travel order number, or other authorizing document are recorded. The applicable identification number may include, for example, the diner’s meal card or social security number. When reimbursement is required, the rate category shall be recorded in the log. A person independent of the dining facility operation shall complete the log. When mass feeding within a specified time period is required, such as at recruit (basic) training centers and special schools, a single person responsible for the group may certify the entitlement classification and/or the reimbursement rate for all diners in the group.

a. The daily log shall be used by the dining facility in preparing necessary reports.

b. The meal card control officer or the personnel manager of the installation shall use the logs to conduct local management reviews and perform periodic tests of meal card usage, entitlement and reimbursement rates. The responsible official shall retain all records and test results in accordance with approved disposition schedules.

2. As an alternative to the procedures in subparagraphs 190602.A. and B., above, each diner shall sign an appropriate signature record, including authorization category, for each meal received. These records shall be reviewed at the local command level and retained until verified independently against the reports submitted for the dining facility.

3. Installation commanders are authorized to impose more stringent requirements at their discretion.

4. Multi-Technology Automated Reader Card (MARC), other SMART card technology, or other headcount procedures approved by the Secretary of a Military Department may be utilized for diner identification/authorization, as long as the integrity of the count is maintained.

C. The total count of each meal shall be classified and recorded by the diner's category of entitlement and by type of food allowance, i.e., basic daily food allowance (BDFA), special food allowance, and supplemental food allowance.

D. During combat or other operational conditions (e.g., mass troop movements, maneuvers or field exercises when actually subsisted under field conditions, forces afloat, and emergency conditions resulting from catastrophes or civil disorders), when maintenance of a meal log or signature record is not practicable, an internal control system shall be established to maintain the integrity of the headcount.

E. Each appropriated fund dining facility shall number, serially, the daily log forms and signature records, which shall include the following minimum requirements:

1. Identification of the dining facility and date.

2. Identification of the number of meals.

3. Signatures of the person maintaining the log, and of the officer in charge.

4. Diner's unit of assignment, identification number, or travel order number or other authorizing document identification, and category of entitlement which authorizes the diner to eat on a reimbursable basis.

5. Diner's signature and rank or grade.

190603. Meal Conversion Meals served (counted) shall be converted to an equivalent meal-days fed for the Chief Financial Officer's Annual Reimbursable Rate, "Food Service" report, in Volume 11A, Chapter 6, Appendix F, of this Regulation, by multiplying the meals served by the following factors:

<u>Meal</u>	<u>Factor</u>	
Breakfast	.20	
Brunch	.45	
Lunch	.40	
Dinner	.40	
Supper	.55	
Night Meal	.20 or .40	(depending on whether a breakfast or dinner menu is served)
Holiday	.65	(.40 lunch plus .25 percent of BDFA)
Snack	.25	

NOTE: These factors represent the estimated portion of the BDFA for each service member for each type of meal. The factors are used to allocate the estimated total food costs to the types of meals served.

1907 FOOD SERVICE OPERATING EXPENSE REPORTING REQUIREMENTS

The USD(C) establishes meal rates annually for personnel authorized meals on a reimbursable basis. To meet this requirement, an annual report of food service operating expenses was initiated in April 1986. This annual report is entitled the "DoD Food Service Operating Expense Report" (DD-COMP(A)1736). The format and guidance for this report are contained in Volume 11A, "Reimbursable Operations, Policy and Procedures," Chapter 6, "Chief Financial Officer's Annual Reimbursable Rates," Appendix F, of this Regulation.

(This page intentionally left blank.)

CHAPTER 20

MILITARY ACADEMY DINING HALL OPERATIONS

2001 OVERVIEW

200101. Purpose. This Chapter establishes the policy for funding the operation of cadet and midshipmen dining halls at the Military Academies and prescribes associated reporting requirements.

200102. Authority. Cadets and midshipmen are authorized an allowance in lieu of subsistence furnished in kind by Title 37, United States Code, Section 422, as interpreted by the Comptroller General Decision B-151360.

2002 POLICY AND PROCEDURES

200201. General

A. Each Military Department operates an Academy dining hall to provide complete food service support to the cadets or midshipmen as an integral part of the activities of its Academy.

B. The amount of the subsistence allowance for cadets and midshipmen is prescribed by the Secretary of Defense. The amount so prescribed will be allocated by the Military Departments from the current Military Personnel Appropriation to a nonappropriated fund at each Academy based on the number of cadets and midshipmen present. Each such nonappropriated fund will be used to procure the food and food products necessary to provide subsistence for the cadets and midshipmen. The nonappropriated fund shall not be used for any purpose other than subsistence procurement; all other charges associated with dining service shall be charged against appropriated funds.

C. The Superintendent of each Academy is authorized to determine who may be authorized to eat in the Academy dining hall and the regulations incident thereto within guidelines issued by the Secretary of the cognizant Military Department. Charges for meals furnished to other than cadets and midshipmen will be established in accordance with guidance contained in Chapter 19 of this Volume, and the Chief Financial Officer's Reimbursable Rate for "Food Service" issued annually. All collections for food costs shall be deposited into the nonappropriated fund. The charge for operating expenses will be collected and deposited under the same rules that are applicable to appropriated fund food service activities as prescribed by Chapter 19 of this volume.

D. The subsistence allowance that is not earned for any cadet or midshipman on leave or otherwise away from the Academy, and not subsisted at Government expense, will be credited to his or her pay account.

E. The subsistence allowance that is not earned for any cadet or midshipman on temporary duty, and subsistence-in-kind that is furnished at the temporary duty location, will not be collected by the nonappropriated fund.

2003 RESPONSIBILITIES

200301. Internal Control and Procurement. Under overall policy supervision by the Secretary of the cognizant Military Department, the Superintendent of each Academy shall be responsible for:

A. Assuring the efficient and effective management of the Academy dining hall and its nonappropriated fund for the purchase of subsistence items. In connection with this responsibility the Superintendent shall install an accrual accounting system that permits an objective, constructive evaluation of the dining hall operation.

B. Assuring that the procurement procedures maintain the same degree of integrity as those procurement actions taken in accordance with the Federal Acquisition Regulation (FAR). In the event any question arises in regard to the proper procurement procedure, the FAR will be used as a guide.

200302. Reporting Requirements. An annual report on meal operating expenses in the Military Academy Dining Halls should be submitted in accordance with the guidance contained in Volume 11A, "Reimbursable Operations, Policy and Procedures," Chapter 6, "Chief Financial Officer's Annual Reimbursable Rates," Appendix F, of this Regulation.

CHAPTER 21

ACCOUNTING FOR DEFENSE MILITARY HEALTH PROGRAM RESOURCES

2101 OVERVIEW

210101 Purpose. This chapter establishes the policies and procedures necessary to execute the Defense Health Program (DHP).

2102 POLICY AND PROCEDURES

The following policies are to be used for the Defense Health Program:

210201. For FY 1992. Obligations and expenditures incurred at the DoD Component installation level, for execution of the Defense Health Program, shall be recorded within the applicable O&M appropriation at least monthly.

A. These obligations and expenditures shall be consolidated and transmitted to the DFAS where they will be recorded in the Defense O&M appropriation (9720100) by the DFAS. While DoD Component procedures are to be followed, the performing activity need not modify detailed level installation accounting records and roll-ups to reflect the 9720100 appropriation account as long as reporting requirements are met.

B. Detailed accounting records and data integrity, including the capability to provide data to the standard DoD Medical Expense and Performance Reporting System (MEPRS), shall continue to be maintained by the performing installations.

210202. For FY 1993 and Subsequent Years.

A. A new DHP appropriation, 97X0130, was enacted by the Congress for use in FY 1993 and beyond to fund all elements of the DHP. However, because a separate DHP agency was not established, the DHP will be executed by each of the applicable DoD Components.

B. Execution of the DHP will be executed by a direct allotment to each performing installation for all DHP costs except for medical personnel costs. Applicable military personnel costs will continue to be paid centrally from the applicable Military Personnel appropriation.

C. Civilian medical personnel end strengths shall be retained by the applicable DoD Components. To ensure proper accountability for civilian end strength utilization, it is necessary for each DoD installation to pay medical civilian personnel using its own operating

appropriation and receive reimbursement from the DHP operating appropriation. To this end, each medical facility employing civilian personnel shall issue applicable reimbursable orders. Such reimbursable orders may be issued on a pay period basis, monthly basis, or on a quarterly basis. However, such reimbursable orders may not be issued more than 100 days prior to the applicable pay period.

2103 RESPONSIBILITIES

An allocation of the DHP appropriation shall be provided to the performing DoD Components for execution as follows.

210301. The OASD (Health Affairs) Program Manager shall authorize the Washington Headquarters Services (WHS) to allocate total obligational authority to the headquarters level of each of the performing DoD Components to fund the DHP at respective installations. Effective October 1, 1993, (FY 1994) the following activities shall be funded on a direct basis from the Operations and maintenance portion of the Defense Health Program:

- A. Office of Civilian Health and Medical Programs of the Uniformed Services.
- B. Uniformed Services University of the Health Sciences.
- C. Defense Medical Program Activity.

210302. The Director of Budget and Finance, WHS, shall issue total obligational authority to the headquarters level of each performing DoD Component to fund the DHP at respective installations.

210303. The Head of each performing DoD Component, or designee shall:

- A. Provide DHP allotments to performing installations within that Component.
- B. Receive installation level monthly execution reports and summarize those reports for submission to the WHS.
- C. Provide a summarized monthly execution report to the WHS. Monthly DHP civilian end strength utilization data shall be transmitted with the monthly execution reports.
- D. Take appropriate actions to ensure the adequate availability of apportioned reimbursement authority where automatic (i.e., non-apportioned) reimbursement authority does not exist to cover the civilian payroll costs of the DHP and issue such reimbursement authority to the performing installation to enable payment of DHP civilian payroll costs.

E. Maintain full responsibility for the operation and execution of appropriate Centrally Managed Allotments (CMA) or open allotments to provide for emergency care of active duty military personnel and shall fund the CMAs from the DHP authority made available to them.

210304. The performing installation shall:

A. Cite the DHP allotment received from its Component Headquarters to fund all transactions in support of the DHP except civilian medical labor costs directly in support of the DHP.

B. Pay medical civilian personnel costs on a reimbursable basis. Reimbursement for these costs shall be provided from the allotment of the DHP at the installation level. The DHP at installation level shall issue a reimbursable order to the applicable installation operating appropriation (i.e., O&M or RDT&E) for payment of medical civilian labor costs. Such reimbursable orders may be issued on a pay period basis, monthly basis, or on a quarterly basis. However, such reimbursable orders may not be issued more than 100 days prior to the applicable pay period.

C. Continue to provide personnel and other support for civilian personnel supporting the DHP.

D. Maintain monthly and year-to-date DHP civilian end strength utilization data and transmit such data, by memorandum, to the Component headquarters and DFAS as appropriate, in conjunction with monthly execution reports.

E. Report monthly execution data as prescribed in Chapter 4, Volume 6 of this Regulation.

F. Maintain detailed accounting records and data integrity, including the capability to provide data to the standard DoD MEPRS.

(This page intentionally left blank.)

CHAPTER 22

NATIONAL DEFENSE STOCKPILE TRANSACTION FUND2201 GENERAL

220101. Purpose. To prescribe the policies and procedures, certain special accounting requirements, and those unique subsidiary accounts to the DoD standard general ledger accounts, to be used in accounting and reporting for the National Defense Stockpile Transaction Fund.

220102. Scope. The accounting requirements, policies and procedures detailed in applicable volumes and chapters of this regulation, and in following sections and paragraphs are mandatory in accounting for, and accomplishing the information and reporting requirements applicable to the National Defense Stockpile Transaction Fund. Only accounting requirements and procedures for transactions particular to this fund are included in this chapter.

220103. Description. The National Defense Stockpile Transaction Fund is a continuing fund dedicated to financing the National Defense Stockpile operations. While it has some aspects of a revolving fund, it is not strictly such a fund as resources are received from diverse sources including direct appropriations, transfers from other appropriations, transfers of physical assets, and disposal proceeds. However, disposal proceeds are not dedicated to or specifically intended to provide for acquisition of additional stockpile material. Criteria and directions are in the National Defense Stockpile Act, Executive Orders, and various legislative enactments through amendments of the Stockpile Act or Appropriation Acts. The fund has been assigned Treasury account symbol, 97X4555.

2202 ACCOUNTING POLICY

220201. Basic Policies and Concepts. Accounting for the National Defense Stockpile Transaction Fund will be in accordance with accounting standards for Federal Government accounting as published by the General Accounting Office (GAO), special requirements of this chapter, the DoD standard general, and any other provisions applicable to accounting, paying, disbursing, and financial reporting as provided elsewhere in the DoD Financial Management Regulation.

220202. Responsibilities. Headquarters Defense Finance and Accounting Service (DFAS-HQ) will establish accounting requirements and procedures for the National Defense Stockpile Transaction Fund. All transactions obligating funds of the National Defense Stockpile Transaction Fund will be initiated by the Defense National Stockpile Center (DNSC). Inventory accounting for the National Defense Stockpile Transaction Fund is performed by the DNSC. Financial and general ledger accounting for the National Defense Stockpile Transaction Fund will

be performed by the designated DFAS Center, Operating Location, or Accounting and Finance Office (currently DFAS-CO/S). External accounting reports of the National Defense Stockpile Transaction Fund are prepared by the DFAS - Indianapolis Center, Departmental Accounting (DFAS-IN/AAR). Accounting reports and additional supporting supplemental financial information is provided by DFAS to the DNSC for preparation of the Department of Defense, "Strategic and Critical Materials Report to the President and Congress."

2203 ACCOUNTING REQUIREMENTS AND PROCEDURES

220301. General. Accounting systems and records for the National Defense Stockpile Transaction Fund will be based on the DoD standard general ledger chart of accounts.

220302. General Ledger Accounts. Because of some unique transactions used in National Defense Stockpile material acquisitions and sales, some special accounts subsidiary to several standard general ledger primary accounts are used. When information is required because of necessity for separate identification and inclusion in financial statements, it is needed for combining with other account in the several financial statements, or visibility is necessary for preparation of notes to the financial statements, subsidiary accounts having two positions beyond the four position primary account number will be used. Two position subsidiary accounts are included in the DoD Standard General Ledger chart of accounts, and are included in trial balances submitted for report preparation. The special subsidiary general ledger accounts prescribed for certain unique accounting requirements, or the unique use of a general ledger account for transactions of the National Defense Stockpile Transaction Fund are included in the discussion of each particular accounting area. Descriptions of accounts and transactions are generally only presented at the primary account level.

220303. Inventory Accounting. The financial inventory balance of the National Defense Stockpile is maintained on a laid-in cost basis, and shown in general ledger account 1570, Stockpile Materials, and as classified in several subsidiaries to that account, and which transaction entries are made. Subsidiary accounts used for the National Defense Stockpile inventory are:

1571.01	Stockpile Materials Held in Reserve-National Defense Stockpile-Strategic and Critical Materials
1571.02	Stockpile Materials Held in Reserve-National Defense Stockpile-Custodial Transfer or Pending Survey
1571.03	Stockpile Materials Held in Reserve-National Defense Stockpile-In Process Government Facility
1571.04	Stockpile Materials Held in Reserve-National Defense Stockpile-In Process Contractor Facility

1572.01 Stockpile Materials Held for Sale-National Defense Stockpile-Strategic and Critical Materials

The Master Inventory Record maintained by the DNSC supports the value of inventory as shown in these accounts. The DNSC and DFAS are jointly responsible for reconciling the inventory records.

220304. Material Acquisition. All intended acquisitions of material for the National Defense Stockpile are proposed in the Annual Materials Plan that is subject to approval by Congress and the subsequent authorization of funding. Funding authorization may be in the form of new appropriations, an authorization to spend from the available balance of the Transaction Fund, or from sales proceeds from authorized disposals. Material purchase contracts are recorded as obligations against the current year acquisition program on the date of the contract. When material is received it is recorded in the Master Inventory Record and the general ledger inventory account, accounts payable and a decrease in undelivered orders. Any other costs, such as initial testing, increases the cost of the material for inventory valuation. Each month the Master Inventory Record must be reconciled to the general ledger inventory account.

220305. Material Upgrade. Also included in the Annual Material Plan is the program for upgrading existing material of the National Defense Stockpile. This work is accomplished by contracts for the value of the upgrading services. These amounts are obligated against the current year program. When material is delivered to the contractor for upgrading it is transferred on the records from the stockpile inventory to material in the hands of a contractor, account 1571.04. When upgraded material is returned, a new unit cost is determined by adding the upgrading costs to the original inventory value. The amount of the upgrading cost and original cost of the material are transferred to the on hand stockpile inventory account from the material in the hands of a contractor account.

220306. Material Disposals. Various materials in the National Defense Stockpile may become obsolete or excess to current stockpiling needs. The National Defense Stockpile Act authorizes the disposal of such material. These materials can be disposed of when included in the Annual Material Plan and authorized in the budget program for the Transaction Fund. Material disposals are accounted for as sales and the original cost value of the material removed from inventory and recorded as cost of sales.

220307. Exchange Transactions. Materials can also be disposed of by offering like material as payment in kind or other material in exchange as settlement of amounts due for material upgraded or acquired. These are accounted for as exchange disposals and the original cost of the material is removed from inventory and recorded as cost of exchange disposals. Exchange settlements liquidate an obligation for material upgrade and acquisition as would payment in cash, and is accounted for through the budgetary accounts to effect the liquidation of the original contractual obligation in the accounting records.

220308. High Value Material. Disposal sales of high value and marketable commodities are offered on a bid auction or negotiated basis. Bid deposits received are held as advances until returned or recorded to sales proceeds upon delivery of material to successful buyers. Bid deposits are held and applied to the final release of material.

220309. Billing and Collection. All sales and disposals are billed shortly after the sales agreement is made or as of the scheduled time for delivery or pickup of the material. The purchaser of the material is allowed a specified number of days in which the material is to be picked up after which time storage charges are assessed. Any such storage charges are additional billings to the purchaser. When material is disposed of by exchange settlements, credits earned for material received and accepted by DNSC are used as payment for material shipped. Additional billings for delayed pickup of material are also applicable to the exchange settlement disposals. Disposal sale collections are received by the DNSC, and deposited to a local banking facility and the SF 1131, Collection Voucher, and confirmed deposit, is sent to the DFAS Accounting and Finance Office (currently DFAS-CO/S) for recording in the accounting records and financial reporting.

220310. Inventory Adjustments. Inventory adjustments are made whenever there is evidence that an adjustment is required. Such instances include periodic count or measurement of countable or measurable material, movement of material, and complete disposal of material from a storage location. All adjustments are documented and approved before recording in the master inventory record and general ledger inventory account. Depending on the nature and size of the adjustment, approval is granted by the head of the DNSC, delegated inventory officials, or board of survey.

220311. U.S. Treasury Silver Program. In previous years the U.S. Treasury provided \$180 million of silver for the stockpile. At that time the silver had a cost basis of \$1.29+ per oz. The purchase cost to the stockpile for the silver was recorded as a customer advance against an unfilled customer order. Some of this silver is being resold to the U.S. Treasury for minting in commemorative coin programs. The sales price is the world market price at the time the coins are sold by the U.S. Treasury. Deducted from these sales proceeds is the original cost basis of the silver. At the time silver is allocated to the coinage program, the silver is removed from the stockpile inventory at its original cost basis and recorded as consigned to the Treasury. General ledger account 1415, Advances to Government Agencies and Funds, is used for this consignment advance. When the report of coinage consumption is received from the Treasury with payment at the market price, the consignment amount is charged to cost of disposal sales. Total proceeds of the sale are recorded as disposal sales, and the amount of the cost basis of the silver is charged against the U.S. Treasury advance and customer order amount.

2204 RESEARCH GRANTS

220401. General. Appropriations made into the National Defense Stockpile Transaction Fund are for the award of grants to universities, colleges, and research institutions.

Included in the appropriation act is the designated recipient of the grant. The Administrator, DNSC, is the grant administering official.

220402. Grant Accounting. Grant funds appropriated to the Transaction Fund are apportioned to DoD/DLA and allotted by DLA-FO to the DNSC. Grant awards are processed by DNSC and funds are obligated by the Notice of Financial Assistance Award and SF 424, Application for Federal Assistance. Grant funds periodically disbursed are based on requests by the grant recipient and approval by the grant administrator. Disbursed funds are recorded in the accounting records as accrued expenditures, and obligation liquidations, in the budgetary accounts, and as costs and expenditures against the grant appropriated funds in the proprietary accounts.

ACCOUNT NO. 1570	
STOCKPILE MATERIALS	
DESCRIPTION: Summary account. Represents the sum of all subsidiary accounts in the 1570 series.	
DEBIT	CREDIT

DEFENSE MODERNIZATION ACCOUNT

2601 GENERAL260101. Purpose

This chapter implements section 2216 of Title 10, United States Code, which establishes the Defense Modernization Account.

260102. Overview

A. The Defense Modernization Account is a transfer account which provides the Military Departments and Defense Agencies (hereafter referred to as the DoD Components), flexibility in addressing acquisition funding issues.

B. The Defense Modernization Account is a transfer account against which no obligations may be incurred.

C. The Defense Modernization Account allows savings, earned through the efficient management of production and procurement programs, to be applied against programs and projects funded with appropriated funds.

D. Funds transferred into, and from, the Defense Modernization Account shall retain their fiscal year identity for expenditure purposes, and the period they are available for expenditure shall not be extended as a result of transfer into, or from, the Defense Modernization Account. Accordingly, funds transferred into the Defense Modernization Account shall not be available for expenditure beyond the end of the 5th fiscal year following the date that the appropriation, from which they were transferred, expires for new obligation.

E. Funds transferred into (credited to) the Defense Modernization Account only remain available for transfer until the end of the third fiscal year that follows the fiscal year in which the amounts are credited to the Defense Modernization Account.

2602 RESPONSIBILITIES

260201. The Secretary of Defense (SECDEF) has overall responsibility for the management of the Account. In this role, the SECDEF may transfer funds into or out of the Account upon notification of the Congressional Defense Committees.

260202. Secretaries of the Military Departments and Directors of Defense Agencies shall:

A. Determine the availability of funds for transfer to the Account.

- B. Propose the transfer of funds into the Account.
- C. Propose the transfer of funds from the Account.
- D. Prepare and submit required congressional notifications.

*Note: Congressional notifications must be approved by USD(C) prior to submission to the Congressional Defense Committees.

260203. The Under Secretary of Defense (Comptroller) (USD(C)) shall:

- A. Exercise a fiduciary responsibility for the Account, as delegated by the Secretary of Defense.
- B. In consultation with the General Counsel and the Inspector General of the Department of Defense, implement regulations, policies, and procedures for the administrative control of funds transferred into, and out of, the Account.

260204. The Director, Defense Finance and Accounting Service shall:

- A. Ensure the preparation of such reports, on the status of the Account, specified in Section 2608 of this chapter, and such other reports as may be requested by the Under Secretary of Defense (Comptroller).
- B. Aggregate amounts in the Account in such a manner that they maintain the identity of the DoD Component that transferred the funds into, or out of, the Account.
- C. Provide for the applicable Defense Finance and Accounting Service (DFAS) activities to be designated as being responsible for accounting for, reporting on and promoting such other financial services as may be required to support the Account.
- D. Ensure that funds transferred into the Account, as well as amounts transferred from the Account, retain the identity of both the appropriation from which the funds were transferred, as well as the cancellation date of the original appropriation (in accordance with sections 1551 and 1552 of Title 31).

2603 DEFINITIONS The following definitions apply with respect to the Defense Modernization Account:

260301. The term “unexpired funds” means funds appropriated for a definite period that remains available for new obligation.

260302. The term “Congressional Defense Committees” means the Senate Committee on Armed Services, the Senate Committee on Appropriations, the House of

Representatives Committee on National Security, and the House of Representatives Committee on Appropriations, and their successor committees, if any.

260303. The term “modernization” means:

A. Improving operational capability or technical performance or procuring an upgrade of an existing system for either procurement or research, development, test, or evaluation purposes;

B. Reducing life-cycle costs of new or existing systems; or

C. Achieving a more efficient production or delivery rate, by increasing quantities through a procurement action.

260304. The term “savings” means funds that are excess to program requirements in a particular fiscal year.

260305. The term “Secretary concerned” means the Secretary of Defense, with respect to defense-wide appropriations, and the Secretary of a Military Department; “Director” means the head of a Defense agency.

260306. The term “Account” means the Defense Modernization Account.

2604 TRANSFERS INTO THE DEFENSE MODERNIZATION ACCOUNT

260401. General: Unexpired funds which, as a result of economies, efficiencies or other savings, are excess to the requirements for which initially appropriated, and which otherwise meet the criteria for transfer to the Account, may be transferred to the Account from:

A. Appropriations available for Procurement, to the extent that the amounts are excess to applicable procurement requirements; and

B. Appropriations available for the support of installations and facilities when, during the final 30 days of a fiscal year, such funds are excess to the requirements for the support of such installations and facilities.

260402. Restrictions

A. Transfers into the Account may be made only from appropriations provided by the Congress after fiscal year 1995.

B. Transfers into the Account may not be made after September 30, 2003. (The authority to transfer funds into the Account expires on September 30, 2003.)

C. Funds may not be transferred to the Account if:

1. The funds have expired for purposes of incurring new obligations.
2. The funds are necessary for programs, projects, or activities that, as determined by the Secretary or Director concerned, or the Secretary of Defense, have a higher priority than the purposes for which the funds would be used if transferred to the Account.
3. The funds, once transferred, would result in a balance in the Account that would be in excess of \$1,000,000,000. (The Defense Finance and Accounting Service will notify the Secretaries and Directors concerned if the balance is approaching the funding ceiling. Additionally, the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)) will make a determination as to the appropriateness of subsequent transfers to the account, until such time as the balance of funds within the Account no longer represent a risk with respect to balance limitations.)
4. For expenditure purposes, funds transferred into the Account shall retain the fiscal year identity of the original appropriation from which they are being transferred, and the period that they are available for expenditure shall not be extended as a result of transfer into the Account. Accordingly, funds transferred into the Account shall not be available for expenditure beyond the end of the 5th fiscal year following the date that the original appropriation from which they were transferred expires for new obligation.

2605 PROCEDURES CONCERNING TRANSFERS INTO THE DEFENSE MODERNIZATION ACCOUNT

260501. Notification Actions

A. Upon a determination, by the Secretary or Director concerned, that funds are available, and meet the criteria, for transfer to the Account, the Secretary or Director concerned shall prepare a written notification, for submission to the Congressional Defense Committees, of the proposed transfer.

B. Proposed notification letters to the Congressional Defense Committees must be coordinated with, and approved by, the OUSD(C) prior to being submitted to the Congressional Defense Committees. Such notification letters must identify both the amount and the source of the proposed transfer.

260502. Actions to Effect Transfers

A. Funds transferred into the Account may be transferred only after the Secretary or Director concerned has received prior approval from the USD(C) and has notified the Congressional Defense Committees in writing as to the amount and source of funds being transferred into the Account.

B. Upon receiving notification from the Secretary that the Congressional Defense Committees have been notified in writing of the amount and source, followed by a 30-day waiting period, the OUSD(C) shall prepare appropriate documentation necessary to accomplish a transfer of funds to the Account and provide documentation, of such transfers, to the DoD Component concerned.

260503. Retention of Source Fund Identity Following Transfers

A. Funds transferred into the Account retain the identity of the DoD Component that transferred the funds into the Account.

B. Funds transferred into the Account also must retain the identity of both the appropriation from which the funds were transferred, as well as the cancellation date of that appropriation (in accordance with sections 1551 and 1552 of title 31).

2606 TRANSFERS FROM THE DEFENSE MODERNIZATION ACCOUNT AND USE OF AMOUNTS TRANSFERRED

260601. Funds Available for Transfer from the Account. Except as provided for elsewhere in this chapter, amounts transferred into the Account shall remain available for transfer from the Account until the end of the third fiscal year following the fiscal year in which the amounts are transferred into the Account.

260602. Purposes for Which Transfers May be Used. Funds may be transferred from the Account for:

A. The purpose of increasing the quantity of items and services in order to achieve a more efficient production or delivery rate for a program funded in a DoD procurement program.

B. Research, development, test, evaluation or procurement efforts necessary for the modernization (as defined in paragraph 260303) of an existing system, or a system being procured under an ongoing program funded from a DoD procurement program.

260603. Restrictions

A. Funds may not be transferred from the Account for:

1. A purpose or program for which the Congress has not authorized appropriations; or

2. The purpose of making an expenditure for which there is no corresponding obligation; or

3. The purpose of making an expenditure which would result in an obligation adjustment, in excess of statutory limitations or an unliquidated or unrecorded obligation arising in a prior fiscal year.

B. In the case of funds transferred for the purpose of increasing the quantity of items or services for a program funded in a DoD procurement appropriation, funds may not be transferred if the transfer would result either in:

1. An obligation or expenditure of funds in excess of a specific limitation provided by law on the amount that may be obligated or expended, respectively, for the applicable procurement program; or

2. The procurement of a total quantity of items or services in excess of:

a. A specific limitation provided by law on the quantity of items or services that may be procured; or

b. The requirement for the items or services as approved by the Joint Requirements Oversight Council and reported to the Congress by the Secretary of Defense.

C. Funds may not be transferred to a DoD Component different from that which originally transferred such funds into the Account.

D. Funds may not be transferred to a DoD Component in an amount in excess of amounts originally transferred into the Account by the DoD Component, less such amounts previously transferred out of the Account to that same DoD Component.

E. Except as provided for below, funds retained in the Account, as well as those transferred from the Account, retain their original statutory limitations with respect to the life of the original appropriation for purposes of making expenditures.

1. Funds may be transferred from the Account, and obligated in the appropriation to which the funds are transferred, even though the period of availability for new obligations has expired for the original appropriation from which the funds were transferred.

2. Funds transferred from the Account may neither be obligated nor expended (disbursed) after the period of availability, as specified in sections 1551 and 1552 of Title 31, U.S.C., has elapsed for making expenditures from the original appropriation from which the funds were transferred into the Account.

F. The total amount of funds transferred from the Account during any fiscal year may not exceed \$500,000,000.

2607 PROCEDURES CONCERNING TRANSFERS FROM THE DEFENSE MODERNIZATION ACCOUNT260701. Notification Actions

A. Upon a determination, by the Secretary or Director concerned, that funds are available, and meet the criteria, for transfer from the Account; the Secretary or Director concerned shall prepare a written notification, for submission to the Congressional Defense Committees, of the proposed transfer.

B. Notification letters to the Congressional Defense Committees must be coordinated with, and approved by, the OUSD(C) prior to being submitted to the Congressional Defense Committees. Notification letters must identify the amount of the proposed transfer, the appropriation to which the amount is proposed to be transferred, the purpose for which the funds will be used, and the total costs of the effort/program to which the amounts are proposed to be transferred.

260702. Actions to Effect Transfers

A. Funds may not be transferred from the Account until 30 days has elapsed following the date on which the Secretary concerned notifies the Congressional Defense Committees, in writing, of the proposed transfer.

B. Following the expiration of the 30 day period addressed in paragraph 260702 A., above, and absence a specific objection from the Congress, the OUSD(C) shall prepare appropriate documentation necessary to accomplish the proposed transfer of funds from the Account.

2608 REPORTING REQUIREMENTS

A. Requirement to Report to Congressional Committees. Not later than 15 days after the end of each calendar quarter, the USD(C) shall submit a report on the status of the Account to the Congressional Defense Committees, as well as to the Committee on Governmental Affairs of the Senate and the Committee on Government Reform and Oversight of the House of Representatives, or successor committees.

B. Contents of Reports to Congressional Committees. Each quarterly report to the congressional Committees shall include:

1. The balance of funds in the Account at the beginning of the quarter;
2. The amount and source of each transfer into the Account during the quarter;

3. The amount and purpose of each transfer from the Account during the quarter; and

4. The balance in the Account at the end of the quarter.

C. Amounts reported in response to paragraph B. above shall be shown by DoD Component, and in total for the Account.

2609 CLOSING OF THE DEFENSE MODERNIZATION ACCOUNT

A. The Account shall be closed on September 30, 2006.

B. Any balance in the account on the date that the Account is closed shall be canceled; and the funds shall not be available for any purpose after that date.

FOREWORD

This Volume of the DoD Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. This volume directs financial management requirements, systems, and functions for all nonappropriated fund (NAF) activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume prescribes standard accounting principles and practices for all DoD nonappropriated fund instrumentalities (NAFIs) except the Military Exchanges. NAF accounting principles and practices are similar to generally accepted accounting principles used in the private sector. Standard principles and practices will ensure that financial statements and reports are complete and accurate, and that the results of operations can be analyzed. This Volume has four parts-a core section consisting of 10 chapters and 3 appendices. The core contains general accounting principles and procedures applicable to all NAFIs. The appendices contain specific policies and procedures applicable to the particular Military Service. In the future, through implementation of standard systems, the appendices will be eliminated.

This Volume of the Regulation applies to the Office of the Secretary of Defense; the Military Departments; the Defense Finance and Accounting Service; the Chairman of the Joint Chiefs of Staff; the Unified Commands; the Inspector General of the Department of Defense; the Defense Agencies; and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

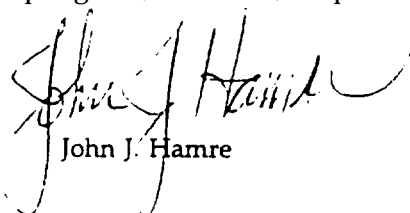

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Comptroller of the Department of Defense.

The internal reporting requirements in this regulation are exempt from licensing in accordance with paragraph E.4.f of DoD 7750.5-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Comptroller of the Department of Defense
1100 Defense Pentagon
Washington, DC 20301-1100

DoD Components may obtain copies of this Volume of the Regulation through their own publication channels. Approved for public release; distribution unlimited. Authorized registered users may obtain copies of this publication from the Defense Technical Information Center, Cameron Station, Alexandria, VA 22304-6145. Other Federal agencies and the public may obtain copies from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; telephone (703) 487-4650.

John J. Hamre

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD components with the policy, regulation, and procedures within the area of responsibility of the Comptroller, Department of Defense. The Regulation consists of the following 15 volumes:

- | | |
|--|---|
| <p>1. General Financial Management Information, Systems, and Requirements</p> <p>2. Budget Formulation and Presentation</p> <p>3. Budget Execution - Availability and use of Budgetary Resources</p> <p>4. Accounting Policy and Procedures</p> <p>5. Disbursing Policy and Procedures</p> <p>6. Reporting Policy and Procedures</p> | <p>7. Military Pay Policy and Procedures</p> <p>8. Civilian Pay Policy and Procedures</p> <p>9. Travel Policy and Procedures</p> <p>10. Contract Payment Policy and Procedures</p> <p>11. Reimbursable Operations, Policy and Procedures</p> <p>12. Special Accounts, Funds and Programs</p> <p>13. Nonappropriated Funds Policy and Procedures</p> <p>14. Financial Management Education and Training</p> <p>15. Security Assistance Policy and Procedures</p> |
|--|---|

AUTHORIZATION

This Regulation is issued by the Comptroller, Department of Defense under authority of Department of Defense Instruction

7000.14 "DoD Financial Management Policy and Procedures."

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The 6 digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A. 1. a. (1) (a)
SUBPARAGRAPHS

PUBLICATIONS INCORPORATED

This Volume of the Regulation incorporates the accounting policies and procedures contained in the following publications:

DoD Instruction 7000.12 "Financial Management Of Morale, Welfare, and Recreational Activities"

Air Force Regulation 176-10 "Financial Operations and Accounting Procedures"

This Volume of the Regulation replaces and supersedes the following publications:

Army Regulation 215-5 "Non-Appropriated Fund Accounting Policy and Reporting Procedures"

Navy Comptroller Manual, NAVSO P-3520
"Financial Management Policies and Procedures for Morale, Welfare, and Recreation Programs"

Air Force Regulation 176-24 "Accounting Policy for Non-Appropriated Funds"

REFERENCES

All references used in this Volume are specifically cited in the text. The following listing is a summary of those references.

CHAPTER 1

NONAPPROPRIATED FUND ACCOUNTING0101 FUNDS010101 Nonappropriated Funds.

Nonappropriated funds (NAF) are monies which are not appropriated by the Congress of the United States. NAF come primarily from the sale of goods and services to Department of Defense (DoD) military and civilian personnel and their family members, and are used to support Morale, Welfare, and Recreation (MWR), and billeting, certain religious and educational programs. NAFs are government funds; they are used for the collective benefit of military personnel, their family members, and authorized civilians. These funds are separate and apart from funds that are recorded in the books of the US Treasury.

010102 Appropriated Funds. Appropriated funds (APF) are monies made available to DoD by Congress. Appropriations are generally of two types: annual and multi-year. The appropriation acts approved by Congress specify the purpose for which the APFs can be used. Accounting for APFs is significantly different than accounting for NAFs. Specific accounting policies and procedures for APFs are described in other volumes of the DoD Financial Management Regulation.

0102 ACCOUNTING

010201 Definition. Accounting is the art of recording, classifying, and summarizing in a significant manner and in terms of money, transactions and events which are, in part at least, of a financial nature, and interpreting the results thereof. The primary use of accounting information is to aid decision-makers.

A. Recording. Recording of business transactions in an accurate and prompt manner is an essential requirement of both manual and automated accounting systems.

B. Classifying. Classifying relates to the process of sorting or grouping like things together rather than merely keeping a simple, diary-like narrative record of numerous and varied transactions and events. Ledgers are used to classify the journal entries according to like events.

1. General Ledger. The general ledger is the core of the NAF accounting system and provides a list of all accounting entries for the current period. A separate general ledger is established for each NAFI. All NAF accounting systems will use the chart of accounts in the appropriate Service supplement. At the end of each month, prepare a trial balance listing the balances in the general ledger accounts. Annually close the income and expense accounts to Fund Equity.

2. Subsidiary Records. NAF accounting systems have subsidiary records. If the number of transactions for a particular general ledger account is small or if balances are reversed at the beginning of each month or if the required data is maintained on a computer, a formal subsidiary ledger is not required. In some cases, a simple file system or the equivalent will be adequate provided it substantiates the general ledger account balance. Some typical subsidiary ledgers are:

a. Accounts Payable. Under a voucher system, a tickler or suspense file of unpaid vouchers can serve as the accounts payable subsidiary file. At the end of each month reconcile the total of all unpaid vouchers in this file to the general ledger control account.

b. Prepaid Accounts. Maintain a subsidiary record to aid proration of expenses for prepaid supplies, maintenance, insurance, etc. Reconcile any unexpired or unused amounts to the applicable general ledger control account.

c. Accounts Receivable.

Subsidiary records for receivables are of vital importance in the accounting system. Maintain detailed records so that it is possible to accurately identify the debtor and the amount of the debt. For example, the same subsidiary record may be used to maintain accounts receivable for a member and unamortized advance dues.

C. Summarizing. Summarizing is the process of bringing together financial information to develop financial statements or reports. The balance sheet, income statement and statement of cash flows are the most commonly used financial statements. The balance sheet provides information about the financial condition of a business at a certain point in time. The income statement provides information about the results of operation (i.e., profit or loss) for the accounting period. The statement of cash flows reflects the amount of net cash provided or used by a business during the period from (a) operating activities, (b) investing activities, and (c) financing activities.

D. Interpreting. Interpreting refers to the steps taken to direct attention to the significance of various matters and relationships. Percentage analyses and ratios are often used to help explain the meaning of related information.

010202 Accounting Information. Accounting information is useful when it is timely, relevant, reliable, cost beneficial, material, comparable, and consistent. These qualities are described as follows:

A. Timeliness. Timeliness refers to the prompt reporting of financial information to its users when it will be of maximum benefit. Financial data should be recorded as soon as practical after the occurrence of a transaction.

B. Relevance. Relevance is the capacity of information to make a difference in a decision by helping users to form predictions about the outcome of past, present, and future events or to confirm or correct prior expectations.

C. Reliability. Reliability is the quality of information that assures that is reasonably free from error and bias and faithfully represents what it purports to represent.

D. Cost Beneficial. Cost beneficial refers to measuring the expense of obtaining certain information against the benefits of having the information. Information should not be provided if the cost exceeds the benefits derived, unless it is required to meet legal or other specific purposes.

E. Materiality. Materiality refers to whether the information is significant enough to make a difference to a reasonable person relying on the information. A decision not to disclose information in the financial statements may be made because the amounts involved are too small to make a difference or to affect the reliability of the information. In addition to magnitude, the nature of the item must be considered when making a materiality judgement. Any information which is material will be reported in financial statements.

F. Comparable. Comparability relates to the similarity and consistency of information produced by an entity from period to period and by others operating in similar circumstances. The value and usefulness of information depends greatly on the degree to which it is comparable to information from prior periods and to similar information reported by others.

G. Consistent. Consistency pertains primarily to information produced by one accounting entity using essentially the same methods over a period of time.

010203 Generally Accepted Accounting Principles. The phrase "generally accepted accounting principles" (GAAP) is a technical accounting term which encompasses the conventions, rules, and procedures necessary to define accepted accounting practice at a particular time. It includes not only broad guidelines of general application, but also detailed practices and procedures. Those

conventions, rules, and procedures provide a standard by which to measure financial presentations.

A. Judgement. Although there are numerous sources of GAAP, some judgement may be necessary to determine whether:

1. The accounting principles selected and applied have general acceptance.

2. The accounting principles are appropriate in the circumstances.

3. The financial statements, including the related notes, are informative of matters that may affect their use, understanding and interpretation.

4. The information presented in the financial statements is classified and summarized in a reasonable manner, that is, it is neither too detailed nor too condensed.

5. The financial statements reflect the underlying transactions and events in a manner that presents the financial position, results of operations, and cash flows stated within a range of acceptable limits, that is, limits that are reasonable and practicable to attain in financial statements.

B. GAAP Hierarchy. A GAAP hierarchy has been established which identifies five categories or sources of GAAP (in descending order of importance):

1. Officially established accounting principles which consist of Financial Accounting Standards Board (FASB) Statements of Financial Accounting Standards and Interpretations, Accounting Principles Board (APB) Opinions, and American Institute of Certified Public Accountants (AICPA) Accounting Research Bulletins.

2. FASB Technical Bulletins and, if cleared by the FASB, AICPA Industry Audit and Accounting Guides and AICPA Statements of Position.

3. AICPA Accounting Standards Executive Committee (AcSEC) that have been cleared by the FASB and consensus positions of the FASB Emerging Issues Task Force.

4. AICPA accounting interpretations and implementation guides ("Qs and As") published by the FASB staff, and practices that are widely recognized and prevalent either generally or in the industry.

5. Other accounting literature, including FASB Concepts Statements; AICPA Issues Papers; International Accounting Standards Committee Statements; Government Accounting Standards Board (GASB) Statements, Interpretations, and Technical Bulletins; pronouncements of other professional associations or regulatory agencies; AICPA Technical Practice Aids; and accounting textbooks, handbooks, and articles.

C. Other Considerations. An important aspect of GAAP as applied to Government entities is the recognition of the variety of legal and contractual considerations typical of the Government environment. These considerations underlie and are reflected in the fund structure, bases of accounting, and other principles, and are a major factor distinguishing governmental accounting from commercial accounting. The following are some of the types of laws and regulations that may have a direct and material effect on the determination of amounts in a NAF activity's financial statements:

1. Requirements for reporting to DoD, Congress, and others.

2. Restrictions on use of appropriated funds.

3. Restrictions on expenditures, including expenditures for construction.

4. Restrictions on investments.

5. Laws and regulations for

NAF, Civil Service, and military personnel.

0103 ACCOUNTING METHODS.

010301 Accrual Basis. Most NAF organizations will use the double-entry accrual basis of accounting. This system is widely used in the commercial or private sector. The general theory of the double entry accounting system is that whenever any financial transaction or value change takes place, there are two accounting actions involved. These two actions are expressed as debits and credits. In accordance with established principles of double entry accounting, equilibrium must be maintained. Every recording of an entry must consist of a debit and an offsetting credit and the total dollar amount of debits must always equal the total dollar amount of credits. Under accrual accounting, transactions and other economic events are recorded when they occur. Revenues are recognized and reported when they are earned. Expenses are recognized and reported when they occur and are deducted from revenue to determine income. Accrual accounting emphasizes matching revenues and expenses associated with each other in the period in which they occur. Generally, accrual accounting contributes to effective financial control over resources, cost of operations and is essential in developing adequate revenue and cost information.

010302 Cash Basis of Accounting. Under the cash basis, revenue is recognized when cash is received from the customer or client, and expenses are recognized when cash is actually paid for the item or service received. Chapter 10 contains the specific policies and procedures for small NAF organizations authorized by their DoD Component to use the cash basis of accounting.

0104 ACCOUNTING PERIOD. The accounting period for DoD NAF organizations (except the Exchange Services) as set by DoD instruction 7000.12 begins October 1 of each year and ends September 30 of the next year. Exceptions must be approved in writing by the DoD Comptroller.

0105 THE ACCOUNTING CYCLE. The interim accounting period will be monthly.

0106 ACCOUNTING OFFICE (AO). The NAF AO provides centralized professional accounting services to NAF organizations. All DAOs will follow certain basic standards:

A. Maintain all books of original entry, the general ledger, and related subsidiary ledgers.

B. Maintain fixed asset records.

C. Prepare all disbursement vouchers and checks after assuring availability of funds and pays liabilities of all serviced NAF organizations.

D. Maintain payroll records when needed.

E. Prepare required periodic financial reports. The AO provides the NAF manager ratios and percentages as requested. The AO also provides variances in relation to established standards or approved budget goals upon request.

F. Prepare other information when requested by NAF management or higher authority. For example, the AO may provide technical advice on preparation of NAF budgets.

G. Prepare and distribute financial reports to all serviced NAF organizations.

H. Prepare an annual operating budget for the AO. If more than one NAF organization is serviced by the AO, then a schedule will be prepared that shows the estimated amounts to be assessed each serviced NAF organization.

I. Where applicable reconcile the bank accounts of serviced NAF organizations. Review daily account balances shown on monthly bank statements to ensure that insurance and collateral are sufficient. Notify NAF managers of missing or delayed deposit or check documentation.

J. Compute and bill the cost of operating the AO for each NAF organization serviced.

K. Review documentation for completeness and accuracy.

L. As required, provide documentation to independent auditors.

0107 ACCOUNTING OFFICE FUNDING. The AO will charge a service fee to all NAF organizations serviced to recover its operating costs.

0108 EXTERNAL ORGANIZATIONAL RELATIONSHIPS. AO personnel should be alert for changes in NAF organization cost centers and other changes so that proper accountability can be maintained.

0109 MORALE, WELFARE, AND RECREATION (MWR) CATEGORIES. In accordance with DoD Instruction 1015.1, MWR programs within the DoD have been classified into three basic categories for funding, financial reporting and program management. Each category has specific restrictions and requirements concerning funding. APF and NAF resources may be used only where permitted by DoD Directives 1015.4 and 1015.6.

0110 ACCOUNTING CHANGES. The term "accounting change" means a change in an accounting principle or a change in an accounting estimate. The correction of an error in previously issued financial statements is not an accounting change.

011001 Change in Accounting Principle. A change in accounting principle results from adoption of a generally accepted accounting principle different from the one used previously for reporting purposes. The term accounting principle includes not only accounting principles and practices but also the methods for applying them. A characteristic of a change in accounting principle is that it concerns a choice from among two or more generally accepted accounting principles. They include, for example, a change in the method of inventory pricing and a change in the depreciation method for previously

recorded assets. In the preparation of financial statements, there is a presumption that an accounting principle once adopted should not be changed in accounting for events and transactions of a similar type. Consistent use of accounting principles from one accounting period to another enhances the utility of financial statements to users by facilitating analysis and understanding of comparative accounting data.

011002 Change in Accounting Estimate. Changes in estimates used in accounting are necessary consequences of periodic presentations of financial statements. Preparing financial statements requires estimating the effects of future events. Examples of items for which estimates are necessary are uncollectible receivables, inventory obsolescence, and service lives and salvage values of fixed assets. Future events and their effects cannot be predicted with certainty; estimating, therefore, requires the exercise of judgement. Thus, accounting estimates change as new events occur, as more experience is acquired, or as additional information is obtained.

0111 ACCOUNTING ERRORS. Errors in financial statements result from mathematical mistakes, mistakes in the application of accounting principles, or oversight or misuse of facts that existed at the time the financial statements were prepared. In contrast, a change in accounting estimate results from new information or subsequent developments and accordingly from better insight or improved judgement. A change from an accounting principle that is not generally accepted to one that is generally accepted is a correction of an error.

0112 FUND EQUITY. Fund Equity consists of capital invested in the NAFI plus the profit or minus the loss resulting from operations since its inception. Transactions into and out of equity are limited to net income, net losses, and entries associated with the establishment, disestablishment, certain accounting principle changes, approved prior year error adjustments and distribution of capital. Fund equity adjustments should be very infrequent. When an item has been thoroughly

reviewed and it is determined the only appropriate treatment is to be recorded as an Equity Fund adjustment, a letter requesting approval to make a fund equity adjustment with all the facts surrounding the circumstances will be forwarded to DFAS via the appropriate program manager. Any request for Equity Fund Adjustment will be carefully reviewed by the program manager and DFAS prior to approval.

A. When a new NAF organization, with pre-existing capital, is authorized, that capital is recorded as equity, e.g., a private association that becomes a membership association. Equity is disestablished when a NAF organization is dissolved.

B. Equity may be distributed by declaring dividends to other NAF organizations. An example is dividends paid by base restaurants. Special grants for new construction and facility improvements are another method of distributing equity. Equity may be transferred in the form of cash or other assets.

0113 EXTRAORDINARY ITEMS. Extraordinary items are events and transactions that are distinguished by their unusual nature and by the infrequency of their occurrence. Both of the following criteria must be met to classify an event or transaction as an extraordinary item.

011301 Unusual Nature. The underlying event or transaction possesses a high degree of abnormality and is of a type clearly unrelated to, or only incidentally related to, the ordinary and typical operations of the NAFI, taking into account the environment in which the NAFI operates.

011302 Infrequency of Occurrence. The underlying event or transaction is of a type that would not reasonably be expected to recur in the foreseeable future, taking into account the environment in which the activity operates.

011303 Disclosure. Show extraordinary items separately as an item affecting net income after operating income.

0114 ETHICS To ensure that every

citizen can have complete confidence in the integrity of the Federal Government, each Federal employee (appropriated fund and nonappropriated fund) shall respect and adhere to the fundamental principles of ethical service. The provisions of DoD Directive 5500.7 and DoD Regulation 5500.7-R apply.

A. Public service is a public trust, requiring employees to place loyalty to the Constitution, the laws, and ethical principles above private gain.

B. Employees shall not hold financial interests that conflict with the conscientious performance of duty.

C. Employees shall not engage in financial transactions using nonpublic Government information or allow the improper use of such information to further any private interest.

D. An employee shall not, except pursuant to such reasonable exceptions as provided by regulation, solicit or accept any gift or other item of monetary value from any person or entity seeking official action from, doing business with, or conducting activities regulated by the employee's agency, or whose interests may be substantially affected by the performance or nonperformance of the employee's duties.

E. Employees shall put forth honest effort in the performance of their duties.

F. Employees shall make no unauthorized commitments or promises of any kind purporting to bind the Government.

G. Employees shall not use public office for private gain.

H. Employees shall act impartially and not give preferential treatment to any private organization or individual.

I. Employees shall protect and conserve Federal property and shall not use it for other than authorized activities.

J. Employees shall not engage in outside employment or activities, including seeking or negotiating for employment, that conflict with official Government duties and responsibilities.

K. Employees shall disclose waste, fraud, abuse, and corruption to appropriate authorities.

L. Employees shall satisfy in good faith their obligations as citizens, including all just financial obligations, especially those--such as Federal, State or local taxes--that are imposed by law.

M. Employees shall adhere to all laws and regulations that provide equal opportunity for all Americans regardless of race, color, religion, sex, national origin, age, or handicap.

N. Employees shall endeavor to avoid any actions creating the appearance that they are violating the law or these ethical standards.

CHAPTER 2**GENERAL LEDGER AND CODING STRUCTURE**

0201 NONAPPROPRIATED FUND
ACCOUNTING CLASSIFICATION CODES. The Defense Finance and Accounting Service is developing a uniform system for coding transactions to insure consistency in financial management procedures as well as flexibility in application to either manual or mechanized accounting records in the NAF area. When the standard general ledger account code structure is completed and approved it will be incorporated in this chapter. In the meantime, accounting offices will continue to use their current account code structure until further notice.

CHAPTER 3

ASSETS

0301 GENERAL. Assets are economic resources obtained or controlled by NAF Instrumentalities (NAFI) as a result of past transactions or events. They are classified on financial statements as either current or non-current.

0302 CURRENT ASSETS. Current assets are those items of cash and other assets or resources that can be reasonably expected to be converted to cash or consumed during the normal operating cycle (12 months). These include cash and cash equivalents, short-term investments, accounts receivable, inventories, and prepaid expenses.

030201 Cash. Almost all accounting transactions affect the cash account at one time or another and these transactions occur most frequently. Cash includes coin and paper currency of all kinds including amounts on deposit in a banking institution.

A. Reconciliation of Bank Accounts. All bank statements or reports will be reconciled at a minimum monthly. Any discrepancies found shall be reported immediately to NAFI management.

B. Cash in Imprest Funds.

1. Change funds use these funds to make change and cash checks. Cash received from operations may be used to replenish the fund at the end of the day as long as daily receipts are deposited in total and all checks cashed from these funds are deposited daily. In no case will the custodian exchange dollars for foreign currency, except as provided in paragraph 3 below.

2. Petty Cash Funds. These funds are established by the NAFI to handle minor disbursements. The AO advances to an individual from the NAFI or activity that is

designated as petty cash custodian a fixed amount of funds. Disbursements are made by the appointed individual and a petty cash voucher is completed to support each transaction. When needed, requests to reimburse the petty cash fund are sent to the AO from the NAFI with petty cash vouchers and cash register receipts (or equivalent) attached. At the minimum, a request to reimburse petty cash is sent to the AO by the NAFI as of the last day of the month. The AO issues a check payable to the petty cash fund custodian by name to reimburse the petty cash fund and the vouchers are charged to the appropriate expense accounts.

a. Each manager within a NAFI appoints individuals to act as petty cash custodians in writing.

b. The amount of a petty cash fund will not exceed one month's requirements.

c. Any one transaction will not exceed \$500 or a lower amount if prescribed by the Military Services. Transactions will not be fragmented to circumvent this limitation.

d. If cash is given as bingo prizes, use a separate petty cash fund.

e. In foreign locations, an NAFI may have one petty cash fund in the local foreign currency as well as one in dollars. If an NAFI gives cash bingo prizes both in dollars and foreign currency, two bingo petty cash funds should be established.

f. NAFIs will not use petty cash funds for cashing checks or paying salaries and wages.

3. Foreign Currency Cash Funds. These funds are used to buy and sell foreign currency as a service to members and

customers.

4. Other Imprest Funds. The NAFI requests establishment of an imprest fund for designated purposes. The NAFI custodian forwards an approved request to establish an imprest fund, the dollar amount authorized, and the purpose of the fund to the AO. The AO retains all documents authorizing the fund. The AO establishes the imprest fund by issuing a check. When needed the NAFI requests reimbursement of the change fund and forwards supporting documentation pertaining to the disbursements to the AO. These funds are reimbursed as of the last day of each month.

5. Accounting for Imprest Funds. Upon initial issuance of the change fund, the NAFI's cash account is reduced and the appropriate asset account (change funds issued) is increased. Disbursements to the petty cash fund are recorded to the applicable expense accounts in the month petty cash was disbursed by the petty cash custodian. Increases to these funds should be requested from the NAFI custodian in writing. The AO issues a check for the approved amount and increases the asset account accordingly.

C. Blank Check Stock

1. The AO may designate someone to perform the duties of keeping the records and controlling the blank check stock, but it cannot be one of the check writers.

2. Checks will be sequentially prenumbered and stored in a locked container.

D. Check Signing Equipment. There are three components to check-signing equipment: a signature plate, a key to the machine, and the machine itself. The signatory maintains the signature plate and a person other than the signatory maintains the key to the machine. Maintain a log to record machine usage. Whenever the machine is operated, the authorized operator enters the beginning and ending readings, date, and initials the log.

E. Change of Signatory. When a

change of signatory occurs destroy the signature plates. A certificate of destruction is prepared and signed by the two witnesses and the successor signatory.

030202 Investments. Investment policy is found in DoD Instruction 7000.12.

030203 Accounts Receivable. Detailed records will be maintained so that it is possible to accurately identify the debtor and the amount of the debt. Accounts receivable subsidiary records will be, on a monthly basis, reconciled to the general ledger control accounts.

A. Customer Accounts Receivable. Amounts recorded in accounts receivable that result from in house credit (charge) sales of merchandise and services, and dues are considered customer type accounts receivable. For this type receivable, the following applies:

1. A subsidiary ledger is maintained for each individual account.

2. Charge monthly dues as applicable. In many operations it is possible to pay dues and fees in advance. If advance dues or fees are received, record the amounts received as unearned income. When the amount is earned, record an entry that debits unearned income and credits the applicable revenue account.

3. Monthly statements are sent to members or participants of the NAFIs that permit charge sales, charge dues, or deferred payments.

4. An aged accounts receivable report will be prepared for all NAFIs with internal credit systems. Account balances are normally due and payable on the first day after the statement date of the month in which credit was extended. Current month dues will be treated the same as current month charge sales and normally become payable the first day after the statement date. The aging of accounts receivable shall be accomplished immediately following a successful billing statement generation. The aging report, at a minimum, will

be broken down as follows:

a. Over 30 days delinquent on the current statement is the second billing the patron has received.

b. Over 60 days delinquent on the current statement is the third billing the patron has received.

c. Over 90 days delinquent on the current statement is the fourth billing the patron has received.

5. If delinquent fees are authorized by the DoD Component, they are charged to the delinquent account each month. Establish that amount as a customer receivable.

B. Returned Checks. A subsidiary is maintained, by individual, for returned checks receivable. The NAFI is responsible for collection actions and maintains records for returned checks received from the bank and deposits made for returned checks.

C. Other Accounts Receivable. Items in this category include amounts due from other NAFIs, amounts due from higher headquarters for grants and other payments, and amounts due from outsiders.

D. Allowance for Bad Debts. If using the allowance method for bad debts, at the end of each reporting period determine and records the amount of accounts receivable estimated to be uncollectible. The amount to be recorded as estimated is based on a review of the average writeoffs of accounts receivable based on historical data. Adjust the allowance for bad debts to cover those accounts expected to become uncollectible during the next reporting period.

030204 Inventory.

A. Resale. Goods held for sale in the normal course of a business are designated as resale inventory items. A value is assigned to these goods which represents the cost of acquisition. When the goods are sold, the value

assigned is used to determine profit for the accounting period as shown on the income statement, and to properly report assets on the balance sheet at the end of the accounting period.

B. Inventory Subsidiary. All items are recorded at cost. Cost is the purchase price less trade and cash discounts. If cash discounts are not material to warrant changing individual prices, the amount of the discount is credited to the purchases account and not to individual items. Discounts lost and excise taxes paid will not be included in the cost of merchandise but will be recorded in the applicable operating expense account. Include freight, insurance, and handling charges in the cost of merchandise if they can be identified to specific items. If they cannot be identified to specific items, record directly against the appropriate expense account.

C. Stock Record. The stock record is used to record resale merchandise and supplies in a warehouse or storeroom. It requires a complete description of the merchandise and all pertinent information regarding receipt and issue.

D. Spoilage, Breakage, Obsolete Material, Customer Complaint or Reject Items. Immaterial losses of inventory resulting from spoilage, breakage, becoming obsolete, rejected, or a constant customer complaint item are absorbed in cost of goods. Material losses are recorded in a Spoilage and Breakage expense account to the applicable operation.

E. Consigned Merchandise and Tickets. Merchandise held on consignment is maintained and accounted for by consignor. Inventory of consigned merchandise is for accountability purposes only. These items are physically inventoried monthly, or at the end of an event for tickets (or whichever comes first). The inventory is not recorded in the general ledger.

F. Inventory in Transit. Inventory in transit consists of inventory where title has passed to the NAFI, but the inventory has not been received at a NAFI warehouse. Appropriate

entries should be made to account for these items at the balance sheet date.

F. Physical Counts of Inventory.

Inventories are required to be physically counted. Following are the policies and procedures related to physical inventories of merchandise.

1. The inventory lists should be printed in the same sequence in which the merchandise is stored or arranged for display, or in stock record number sequence.

2. A cutoff date is to be established for sales, issues, returns, adjustments, and transfers so inventory quantities and related accounting entries can be recorded.

3. Merchandise received during the inventory will not be counted unless the payable or payment will be recorded in the general ledger as of the inventory cutoff date.

4. Merchandise sold during the inventory will be included in the inventory count, unless the related sale and receivable or cash received will be recorded in the general ledger as of the inventory cutoff date.

5. Physical inventories will be conducted separately for each department.

6. Inventories of merchandise held on consignment and returnable containers, will be separate from NAFI-owned merchandise. Inventory lists will be prepared for each owner of the goods.

7. At the conclusion of the inventory, any discrepancies are provided to the NAFI custodian for resolution. The general ledger is adjusted to match the physical count that was observed by the observation team.

G. Physical Inventory Observation.

At least annually, the physical inventories will be observed by at least one person who is clearly independent of the activity conducting the inventory. The objective is to observe the inventory to determine the accuracy of the

accounting records. Since it is frequently impractical to observe all physical inventories at one time, the observations may be staggered throughout the year.

030205 Prepaid Expenses. Payments made for expenses that apply to a specific period of time are amortized over that period. Any unexpired portion is shown as a prepaid asset. Many NAFI supply-type expenses are paid before the items purchased are actually used. Examples of supply-type items include tableware, kitchenware, glassware, linens, uniforms and prepaid bingo prizes. Advance payments for maintenance, rent, insurance are examples of expenses that span numerous months. The accounting principle of materiality should be considered before employing the prepaid concept. An advance or prepayment is never amortized for more than its expected usage. Monthly expenses will be computed and prorated over each month of the period covered by the advance payment. Supplies will be expensed based on expected usage provided by the NAFI custodian. The unexpired prepaid expense subsidiary will be reconciled to the related control account.

0303 NON-CURRENT ASSETS. Long-term, tangible assets that will not be converted to cash or consumed during the next 12 months are classified as non-current. These assets are expected to benefit the NAFI for more than one accounting period. Non-current assets include fixed assets, land, leases, long-term investments, long-term loans, long-term receivables, and long-term prepaid expenses.

030301 Fixed Assets. Fixed assets are also commonly referred to as property, plant and equipment. It includes capital assets such as buildings, equipment, furniture, fixtures, tools, machinery and livestock. Intangibles are excluded from this category. Fixed assets are defined as property, plant and equipment purchased, donated, or transferred to a NAFI that have an expected life of two or more years and a cost of \$1000 or more.

A. Acquisition Cost. Unless otherwise stated below, fixed assets are recorded

at cost plus any expenditures necessary to place those assets into use as intended, e.g., installation, freight, testing, legal fees to establish title, and any other costs of putting the asset in the condition and location for use. Purchase discounts should be applied to reduce the costs, however, interest charges should not be capitalized.

1. Assets Purchased in Quantity. Like items purchased in a quantity in excess of one are capitalized in accordance with the appropriate Service appendix even if the per unit cost is not at the level required for capitalization. All other criteria for fixed assets must be met.

2. Self-Constructed Assets. If fixed assets are built or manufactured by the NAFI, all costs incurred, materials, permits, taxes, insurance and overhead costs should be capitalized in accordance with the appropriate appendice.

3. Assets Traded-In. When an asset is traded-in at time of purchase, the new asset will be recorded at the amount of the monetary consideration paid plus the trade-in allowance for the old asset. The acquisition cost and accumulated depreciation of the traded-in asset are removed from the accounting records. If the trade-in allowance is less than the book value of the old asset, then a loss will result. These losses should be recorded as "other expenses" in the records of the NAFI. If the trade-in allowance is more than the book value of the old asset, the difference is subtracted from the acquisition cost of the new asset. No gain is recognized.

4. Construction in Progress. Construction in progress includes all cost attributable to a construction project (i.e., building and improvement). This includes, but is not limited to, costs of new buildings, renovation of existing buildings, and fixed assets which are purchased as part of the project. Record amounts based on documentation supporting the contract completion. When progress payments to contractors are based on a percentage completion clause, record amount of

payments due or paid. In addition to costs related to a construction project, fixed assets received but not billed may be recorded. Transfer the cost of construction in progress to the appropriate fixed asset account and commence depreciation when the project begins producing revenue or project is utilized or the final payment is disbursed. NAFI management establishes the facility depreciation periods according to depreciation tables in the appropriate Service appendix.

5. Donated or Transferred Assets. Assets donated or transferred without the expenditure of funds should be recorded at the fair market value on the date the asset is donated or transferred. If the fair market value cannot be determined, the amount recorded should be the book value of the donated asset in the donor's accounting records.

6. Non-Monetary Exchanges. When assets are exchanged between NAFIs without monetary consideration, it is called a non-monetary exchange. The assets received in such exchanges should be recorded on the books of the gaining NAFI at the net book value on the books of the losing NAFI. The offsetting entry is to Equity on both the gaining and the losing NAFI.

7. Appropriated Fund (APF) Property Obtained for Free. These assets should be recorded separately from other fixed assets because title and control of these assets remains with APFs. For APF fixed assets expected to benefit more than one accounting period, any acquisition costs such as repairs, transportation, and installation (and any subsequent outlays that extend the useful life of the asset) should be recorded and depreciated over the useful life of the asset. For APF fixed assets held one year or less, all costs are an expense for the period the asset is held.

8. Leases. Leases may be used for equipment or for real property and are categorized as either a capital lease or an operating lease.

a. Capital Leases. A

capital lease is based on the concept that a lease transfers substantially all of the benefits and risk as to the ownership of equipment to the lessee. The lease is recorded as an asset by the lessee and is amortized in a manner similar to depreciating assets if one of the following conditions are met:

(1) The lease transfers ownership of the asset to the lessee at the end of the lease term.

(2) The lease contains a purchase option.

(3) The lease term is equal to 75% or more of the estimated economic life of the leased property. However, if the beginning of the lease term falls within the last 25% of the total estimated economic life of the leased property, including earlier years of use, this criterion shall not be used for purposes of classifying the lease.

(4) The present value at the beginning of the lease term of the minimum lease payments, excluding that portion of payments representing executory costs such as insurance, maintenance, and taxes to be paid by the lessor, including profit thereon, equals or exceeds 90% of the excess of the fair value of the leased property to the lessor at the inception of the lease over any related investment tax credit retained by the lessor and expected to be realized by the lessor.

b. Operating Leases. If none of the above conditions is met, the lease is an operating lease. Payments on an operating lease shall be charged to expense over the lease term as it becomes payable. If payments are not made on a straight-line basis, the expense nevertheless shall be recognized on a straight-line basis unless another systematic and rational basis is more representative of the time pattern in which benefits are derived from the leased property, in which case that basis shall be used.

c. Disclosures. If either capital or operating leases are material, then information concerning the leases should be

disclosed in the NAFI financial statements or the footnotes.

B. Subsequent Expenditures.

1. Subsequent expenditures for fixed assets fall into three categories: maintenance and repair; improvements; and additions.

a. Maintenance and Repair. Expenditures in this category are designed to prevent an asset from deteriorating (e.g., painting the interior of the enlisted club) or to return the asset to its original level of performance (e.g., a tune-up on a motor vehicle). These expenditures do not improve the performance of the asset or extend the life of the asset. Maintenance and repair expenditures are expensed in the period incurred.

b. Improvements. Improvements are expenditures which extend the useful life of an asset (e.g., an engine overhaul on a motor vehicle) or improve original asset performance. Improvements should be capitalized and depreciated.

c. Additions. Expenditures which increase the size of an asset (e.g., adding a new section to the club) are called additions. Additions should be capitalized and depreciated.

2. The objective is to match the expenditures with the period benefited. Thus, expenditures which benefit only the current period should be expensed and expenditures which benefit future periods should be capitalized. As a rule, any expenditure of \$1000 or less should be expensed.

C. Government Title Fixed Assets. An aspect of NAF accounting is that some assets, particularly buildings, are purchased using NAF and the NAFI has exclusive use, but title rests with the government. NAF procured property or facilities may be transferred to APF for maintenance when allowed by the Service regulations. Upon receipt of approved documentation from NAFI management, record

these items in the NAF property records and general ledger as Fixed Assets-APF titled (signifies government title) and commence depreciation.

D. Fixed Assets in Transit. On occasion, title to fixed assets may pass to the NAFI and payment may be made before the NAFI has physical possession of the property. Typically, this happens when property destined for a NAFI overseas is delivered to a state-side port for over water transportation by government means. Payment is made based on the receipt at the port and is recorded to the appropriate Fixed Asset account. Depreciation begins when the asset is placed in service.

E. Disposition of Property. Disposal means that the NAFI activity manager has physical control of the item and disposes of it. Documents are prepared and approved by the appropriate official for the disposition of fixed assets. When property is transferred to APFs, it will be evidenced on the form required by APFs.

F. Physical Inventories. A physical inventory of all fixed assets will be conducted at least annually. Since it is frequently impractical to perform a physical inventory of all of the fixed assets of a NAFI at one time, physical inventories may be scheduled and conducted by area.

G. Property Subsidiary. Property subsidiaries serve as property control records. As a minimum the property subsidiary should list each piece of property, acquisition date, acquisition value, useful life, depreciation to date, and current book value. This subsidiary can be either mechanized or manual. If mechanized is available, it should be used. Documentation is prepared by the NAFI whenever any data on the subsidiary records is changed even though no general ledger entries are required, e.g., fixed assets are transferred from one location to another.

H. Claims. When an insured asset is destroyed or damaged, and the claim is settled, the affected accounts are adjusted. Usually claim settlements do not exceed the

acquisition value less accumulated depreciation of the property destroyed (book value).

I. Depreciation. Depreciation accounting distributes the cost or other basic value of tangible capital assets over the estimated useful life of such assets in a systematic and rational manner. Accounting for depreciation as an expense is an integral part of the accrual basis of accounting. Accordingly, all NAF activities will recognize depreciation of their fixed assets. For NAF capital assets whose title is transferred to APFs, but is still used by the NAFI, continue to depreciate these fixed assets on the NAFI's book until the items are fully depreciated.

1. Several steps are involved in computing depreciation:

a. Calculate Asset Cost or Value.

b. Estimate the Useful Life of the Asset. A reliable source for determining the useful life of the asset is the experience with similar assets.

c. Estimate the Salvage Value for the Asset. The value, if any, remaining at the end of an asset's useful life may, if allowed by the appropriate appendice, be subtracted from the acquisition cost of the asset before computing depreciation.

d. Divide the Net Cost or Value of the Asset Over the Useful Life. The straight line method of depreciation is used for determining the monthly depreciation expense.

2. Once a method of depreciation has been selected for a particular asset, it should generally never change.

030302 Land. The value of any land is always recorded separately from buildings or other structures built on the land. The primary reason is that land, unlike other fixed assets, has an indefinite life span and therefore is never depreciated. As a general rule, NAFIs are located on Government-owned land and do not record the value of land.

CHAPTER 4

LIABILITIES0401 GENERAL.

040101 Definition. Liabilities represent obligations resulting from past transactions to pay sums of money, convey other assets, or perform certain services. Liabilities must be fully recognized and properly measured on the balance sheet to accurately portray amounts owed. Liabilities may be current or long-term. Current liabilities are obligations whose liquidation is reasonably expected to require use of existing resources properly classified as current assets or the creation of other current liabilities. Long-term liabilities represent probable future sacrifices of economic benefits arising from present obligations that are not due or payable within the next 12 months.

040102 Accountability for NAF Resources. Accountability for NAF resources rests with the NAFI manager. Therefore, disbursement of NAF resources can only take place with the specific approval of the Program Manager, NAFI Manager or as authorized in this regulation.

040103 Documentation Required for Payment.

A. The following documents, properly prepared and authenticated, is authority for payment.

1. A procurement instrument such as a purchase order, a contract, a blanket purchase agreement, or other similar documents.

2. A receiving report or other signed documentary evidence that the goods or services have been received by the NAFI.

3. An invoice or claim from the vendor requesting payment. This may be an invoice issued for a specific delivery or a statement showing deliveries over a month, week, or other period.

B. Overseas Shipments. Vendor invoice and proof of shipment must be received before payment can be made on overseas shipments prior to receipt of goods.

C. Partial Shipments. Partial shipments are paid for using a DD Form 250, Material Inspection and Receiving Report, or locally devised form as a receiving report. Ensure "Partial Shipment" is written on the top of the form. Establish as an accounts payable open item. On receipt of an invoice, process for payment. Annotate the check as partial shipment received.

040104 Purchases From Other NAFIs. Purchase of goods or services from other NAFI will be supported by a request for the goods or services and a signed document showing receipt. DD Form 1149 or similar form will suffice.

040105 Purchases From the Government. Purchase of goods or services from the Government (e.g., bills from appropriated funds) will not normally be supported by a procurement instrument, however, a receiving report or other signed evidence of receipt must be present to support the payment.

0402 PURCHASE ORDERS AND VENDOR INVOICES.

040201 Purchase Orders. A purchase order is a document forwarded to a supplier by an activity specifying unit size and price, as well as delivery terms for desired products to be delivered at a specified time and place. The supplier can then accept and act on the offer or refuse it. A purchase order log is maintained in numerical sequence and all purchase order numbers must be accounted for.

040202 Vendor Invoices. A vendor invoice represents a claim against NAF. All invoices should be date stamped at time of receipt.

0403 RECEIVING REPORTS. Receiving reports must be prepared for all merchandise received or services performed.

0404 DISCOUNTS. Accounts payable will be recorded net of discounts. Discounts are to be taken on the gross amount of the invoice if goods are supplied FOB destination. If the goods are supplied FOB other and a separate freight charge is shown, the discount will be taken on the cost of goods only. The FOB delivery terms are shown on the purchase order. Discounts lost will be recorded in the appropriate general ledger account.

0405 PROMPT PAYMENT ACT. The Prompt Payment Act (PPA) of May 21, 1982 (Public Law 97-177), amended on October 17, 1988 (Public Law 100-496), requires Federal agencies (including NAF activities) to make payments in a timely manner. If a payment to a contractor is late, an interest payment also is due to the contractor and should be made without a contractor having to request the interest payment. Specific policy and procedures, record keeping, computation of interest payments and reporting requirements are contained in Volume 10 of the DoD Financial Management Regulation, DoD 7000.14-R.

0406 CONTINGENT LIABILITIES. Contingencies are existing conditions, situations, or circumstances involving uncertainty as to possible gain or loss that will ultimately be resolved when one or more future events occur or fail to occur. Accrue loss contingencies where the outcome is probable and the amount is reasonably estimable, however, do not record gain contingencies. When a contingency is identified, attach a footnote to the year end service level consolidated financial statements explaining the contingency and the potential for gain or loss.

CHAPTER 5**REVENUE**

0501 **GENERAL.** Revenue consists of cash or credit sales of goods and services as a result of operations by the NAFI. Under the accrual method of accounting, revenue is recorded on a consistent basis in the appropriate cost center in the accounting period in which the revenue is earned. Revenue will be recorded in accordance with the appropriate Service appendix.

050101 Revenue shall be recognized when it becomes realizable with reasonable practical certainty; that is, when the receiving accounting entity acknowledges a claim against its resources or the performing accounting entity has an enforceable claim.

050102 Revenue shall be recorded in the financial records, collected promptly, and deposited in the appropriate bank account. Amounts received in advance of performance, however, shall be accounted for as unearned revenues until performance is accomplished.

CHAPTER 6**EXPENSES**

0601 **GENERAL** Expenses consist of the costs related to the sales of goods and services as a result of the operation of the NAFI. Under the accrual method of accounting, expenses are recorded on a consistent basis in the appropriate cost center in the accounting period in which the expense is incurred. Until further notice, expenses will be recorded in accordance with the appropriate Service appendix.

CHAPTER 7

FINANCIAL REPORTING

0701 GENERAL Financial statements are a key feature in financial reporting. They are a principal means of communicating accounting information to those outside an activity. Although financial statements may also contain information from sources other than accounting records, accounting systems are generally organized on the basis of the elements of financial statements (assets, liabilities, revenues, expenses, etc.) and provide the bulk of the information for financial statements. Financial reporting is not an end in itself but is intended to provide information that is useful in making business and economic decisions--for making reasoned choices among alternative uses of scarce resources in the conduct of business and economic activities.

070101 Objectives. Financial reporting should provide information about:

A. The activity's economic resources, obligations, and owner's equity;

B. The activity's financial performance during a period;

C. How the activity obtains and spends cash;

D. How the activity discharged its stewardship responsibility.

070102 Other Requirements. In addition to providing explanations and interpretations to assist users of financial reports, financial reports contain program and personnel information required by DoD, Congress, and other users.

070103 Financial Statements. The principal financial statements used to convey information to users are the statement of financial position or balance sheet, statement of operations or income and expense statement, and the statement of cash flows. These reports provide information on the

financial performance and condition of the NAFI as follows:

1. The statement of financial position (or balance sheet) provides information about an activity's economic resources, obligations, and equity. That information helps users identify the activity's financial strengths and weaknesses and assess its liquidity and solvency.

2. The statement of financial position (or income and expense statement) provides information about the activity's financial performance during a specified period of time.

3. The statement of cash flows details the amount of cash received and cash dispersed for the accounting period. The beginning balance is the beginning of the period cash and the ending balance is the end of period cash.

070104 Responsibilities.

A. DoD Components. The DoD Components are responsible for the fair presentation in the financial statements of financial position, results of operation, and the program and personnel information included. In addition, the DoD Components are responsible for compliance with NAF program laws and regulations.

B. DFAS. DFAS is responsible for compiling all the necessary information from the nonappropriated and appropriated fund accounting and payroll systems, and preparation of financial statements and reports. The integrity of those systems and the accuracy of the data produced are also DFAS responsibilities. When requested, DFAS will provide other management information as needed to satisfy management or

regulatory requirements.

070105 Cash Basis of Accounting. Financial statements, reports, and other information from activities authorized to use the cash basis of accounting shall be prepared in accordance with generally accepted accounting principles. The statements differ from those described above.

070106 Footnotes to financial statements. Footnotes are an integral part of the financial statements and should be used when more information is needed. Footnotes normally are not required other than on the year-end service-level consolidated statements. Accountants are required to disclose in the financial statements all relevant economic information pertaining to the business entity. When the actual dollar amounts on the financial statements do not provide sufficient information for decision makers, accountants supplement the financial statements with more detailed data in the form of footnotes. An example of a footnote is a special event that dramatically effects the financial statements. The footnote will help managers compare the operating results of the current business period with the operating results of previous periods. Fund equity adjustments and significant business closures are other prime examples of occurrences which require footnotes.

0702 REPORTING TO THE IRS.

070201 General. All records relating to payments to individuals and firms must be retained for at least four years and be available for IRS review if required. CONUS offices should consult their local IRS office when forms, publications, or assistance are needed. Overseas offices should contact the Internal Revenue Service, Assistant Commissioner (International), 950 L'Enfant Plaza South S.W., Washington, DC 20024, to get the address and telephone number of the nearest IRS representative. IRS representatives, in CONUS and overseas, are available to provide instructions concerning IRS procedures for return preparation and filing, and depositing employment tax payments. Overseas offices should use the following to request forms and publications: Forms

Distribution Center, PO Box 25866, Richmond, VA 23289, or Forms Distribution Center, Rancho Corboda, CA 95743-0001.

070202 Contract Payments. Cumulative payments made under service contracts of \$600 or more to anyone other than a corporation during a calendar year will be reported. The items to be reported are the total amount paid and the name, address, and social security number of the individual. For businesses, report the amount paid, the business name, business address, and business tax identification number. NAFI contracts with entertainers are considered service contracts. If a single payment to an individual is less than \$600 but total payments made during the calendar year to the same individual reach \$600, the report must be filed. The report (the return) will be provided to the individual or firm and to the IRS on IRS Form 1099 MISC. The individual or firm should receive a copy of the Form 1099 MISC by January 31 of the year following the calendar year of payment. This requirement also applies to individuals who, in addition to being NAFI employees, have contracts with the NAFI for non-personal services. A separate Form 1099 MISC will be prepared for each individual or firm to whom total payments of \$600 or more are made. An IRS Form 1096 is used to transmit the IRS copy of the Form 1099s to the IRS. These forms must be forwarded to the IRS by February 28 each year. Refer to IRS publications for preparation instructions and filing requirements.

070203 Gambling/Bingo Winnings. IRS reporting requirements for gambling and bingo winnings are tied to individual games. Winnings are not accumulated from game to game as contract payments are. Each game stands alone for IRS reporting requirements. Whenever cash, merchandise, or a combination thereof with a total value of \$1200 or more is awarded to a person for winning a single bingo game or other gambling activity, an IRS Form W-2G (Statement for Certain Gambling Winnings) is prepared. Individuals should receive their copies of the W-2G either at the time payment is made or not later than January 31 of the following year. An IRS Form 1096 is used to transmit the IRS copy of the W-2Gs to the IRS. These forms must be

forwarded to the IRS by February 28 of the following year. Refer to IRS publications for preparation instructions and filing requirements.

0703 RATIOS. If requested, DFAS can provide as an example the following ratios.

070301 Working Capital Ratios. The ratio analysis or working capital can be used by management as a means of checking upon the efficiency with which working capital is being applied. Important ratios for working capital management analysis are the working capital and inventory turnover ratios and the turnover or average collection period for accounts receivable. The behavior of ratios, over a series of accounting periods, is indicative of trends which may signal the need for adjustments in the future. Some of the working capital ratios which may be computed are described below.

070302 Current Ratio. The relationship between current assets and current liabilities is called the current ratio. This ratio measures the ability to pay short term debts and is computed by dividing the total of current assets by the total of current liabilities. Marketable securities, receivables, and inventories may decline in value and there is no certainty as to when they will be converted into cash. On the other hand, current liabilities must be paid at their face value and at specific dates. It is desirable, therefore, that current assets always be materially in excess of current liabilities. The excess of current assets over current liabilities is also frequently used as an index of current financial condition. It is referred to as working capital or net current assets. There is general rule that a current ratio of 1.5:1 is satisfactory. Like most generalities this one is subject to modification in certain specific cases. A ratio that is smaller would indicate that debts may be too high. On the other hand, if the current ratio is too large this means more current assets should be converted to other useful purposes.

070303 Acid-Test Ratio. This ratio is the sum of cash, receivables, and marketable securities (called quick assets) divided by current liabilities. The acid-test ratio is a supplemental measure of liquidity. A ratio of 1:1 indicates that

for every dollar of current debt there is available one dollar of quick assets to meet current liabilities. As a general rule, the acid-test ratio should be no less than 1:1. While it is generally desirable that the acid-test be high and improving, it is possible for it to be too high for the good of the business. Cash and most receivables are not earning interest and the return on most temporary investments is not large. Neither too little nor too much working capital is desirable. One of the arts of business management is the ability to determine and maintain the optimum amount of each type of asset.

070304 Ratio of Net Sales to Assets. The ratio of net sales to assets is a measure of the effectiveness of the utilization of assets. Assume that two similar activities have equal amounts of assets but that the sales of one are double the amount of the sales of the other. Obviously, the former is making better use of its assets. In computing the ratio, any long-term investments should be excluded from total assets as they make no contribution to sales. The units of product sold may also be used in place of the dollar amount of sales, if sales can be stated in a common unit. Assets used in determining the ratio may be the total at the end of the year, the average at the beginning and end of the year, or the average of monthly totals.

070305 Accounts Receivable Turnover. The relationship between credit charge sales and accounts receivable is stated as the accounts receivable turnover. It is calculated by dividing net charge sales by the average accounts receivable. The average of the monthly balances of accounts receivable should be used in the computation, as it gives recognition to seasonal fluctuations. When such data are not available it is necessary to use the average of the balances at the beginning and end of the year. Accounts receivable yield no revenue hence it is desirable to keep the amount invested in them at a minimum and the number of turnovers as high as possible. Prompt collection reduces the amount of loss from bad debts. The composition of accounts receivable changes continually during the business cycle. Accounts receivable are increased when charge sales are made and

decreased when collections are received. Increases or decreases in the volume of sales will also affect the amount of outstanding accounts. Another method of expressing the result is to divide 365 (days) by the receivable turnover figure to get the average number of days that the receivables were on the books.

070306 Merchandise Inventory Turnover. Most of the observations about receivables discussed in the preceding subsection are also applicable to merchandise inventory. Inventory in excess of the needs of the business ties up funds that could be used in other ways to better advantage and may increase the amount of insurance, storage, and other related expenses. There is also added risk of loss through price declines and deterioration or obsolescence of the merchandise. The merchandise inventory turnover rate is computed by dividing the cost of goods sold by the average cost price value of the inventory. If monthly data are not available, it is necessary to use the average of the inventories at the beginning and end of the year. This measures the efficiency of inventory control. A ratio of 1 to 1 is generally acceptable for food and bar operations. For all other sales operations, however NAFI management may establish other goals.

070307 Turnover of Working Capital. A close relationship exists between sales and working capital. As sales volume increases, the investment in inventories and receivables increases and therefore, a larger amount of working capital is necessary. The turnover of working capital reflects the extent to which the business is operating on a small or large amount of working capital in relation to sales. This turnover or ratio is composite of number of relationships (inventories, receivables, current liabilities, etc.). These various component elements should be analyzed individually to account for changes from period to period. The turnover of working capital is computed by dividing the net sales for the year by the average working capital.

070308 Net Income Ratio. This measures the rate of return on revenue. A percentage of 5-10 percent is generally acceptable.

070309 Return on Assets Ratio. This measures the NAFI's ability to generate revenue with its existing assets. The ratio is computed by dividing net income by the average total assets. Average total assets are beginning total assets plus ending total assets divided by 2.

070310 Return on Fund Equity. This measures the NAFI's ability to use leverage by earning a higher rate of return than is paid for the funds used to operate. The ratio is computed by dividing net income by the average fund equity.

070311 Other Ratios.

- A. Fixed Asset Turnover.
- B. Accounts Receivable Aging.
- C. Working Capital to Total Assets.
- D. Return on Tangible Assets.

0704 COMPARATIVE ANALYSIS OF FINANCIAL STATEMENTS.

070401 General. Comparative analysis consists of a study of relationships and trends to determine whether or not the financial position and results of operations and the financial progress of the business are satisfactory or unsatisfactory. The objective of any analytical method used to analyze a financial statement is to simplify or reduce the data under review to more understandable terms. The analyst first computes and organizes data and then analyzes and interprets them. Analytical data are not ends in themselves, they must be assimilated intelligently to aid in decision making by management. The frequency with which analytical data are furnished is of the utmost importance. It is not enough for management to know at the end of a year, or even a quarter, that costs are increasing more rapidly than revenues. The accountant must often use interim cost standards, ratios, or other devices, in presenting income statement data. Moreover, they must devise adequate methods of accruing items which may not be finally determined until

the end of the fiscal year or later, but which are of vital importance in their effect on income.

070402 Analytical Methods and Techniques. Analytical methods and techniques used in analyzing financial statements include the following:

A. Comparative balance sheets, income statements, and statements of retained earnings or net worth showing:

1. Absolute data (dollar amounts).

2. Increases and decreases in absolute data in terms of dollar amounts.

3. Increases and decreases in absolute data in terms of percentages.

4. Comparisons expressed in ratios.

5. Percentages of total.

B. Statement of sources and uses of working capital.

C. Trend ratios of selected and/or related financial and operating data. A trend analysis should be made for each NAFT's financial statement. The analysis of the balance sheet should compare actual to actual and the percentage of increase or decrease be shown. The analysis of the income statement for each activity should compare actual to actual and actual to the budgeted amounts. As with the balance sheet analysis, differences will be shown as a percentage. The analysis should be made by each activity for items such as; sales, cost of goods sold, labor expenses, net income, and all other revenue and expense items with a material financial effect on the activity.

D. Common-size percentages - balance sheets, income statements and individual sections of these statements.

E. Ratios expressing the relationships of items selected from the balance sheet, the income statement or both statements.

F. Statement of variation in net income or gross margin.

070403 Comparative Statements

A. General. Any fact, by itself has limited significance. There must be other related facts to give the first one increased meaning. The validity of this observation is easily demonstrated in the case of information about a business. For example, learning that last year's net income of a certain activity was \$68,514 is to learn very little. Does that amount of net income indicate a successful year or a poor one? Does the amount present an improvement over or a decline from the year before? Is the amount large or small in relation to sales? - to assets? - to equity? How does it compare with similar activities? Other facts must be known if the information about last year's income is to have any real meaning. The same can be said of any other single bit of information about a business.

B. Types of Comparison. The financial statements can be much more informative and meaningful if they are analyzed on a comparative basis. Four types of comparison may be possible:

1. Comparison of the latest financial statements and relationships between various elements with the statements and relationships of one or more previous periods.

2. Comparison of the statements and financial relationships of the fund with data for other similar activities.

3. Comparison of statements and financial relationships of two or more divisions or branches of the same activity.

4. Comparison of information in the statements with pre-set plans or goals (normally in the form of budgets).

C. Horizontal Analysis. A comparison of the amounts for the same item in the financial statements of two or more periods is called horizontal analysis. The term is applied because the analysis, which suggests

probabilities, weaknesses, or strengths, includes data from year to year rather than as of one date or period of time as a whole. The comparison is facilitated if the amount of any change and its relative size are shown. In computing the percent of change, the amount for the earlier year serves as the base. In general, the percentage of change is of greater interest than the actual amounts.

D. Vertical Analysis. The amount of each item in a statement can be expressed as a percentage of the total. This is termed vertical analysis. A maximum of information is provided if statements relating to two or more periods are vertically analyzed and the results compared or contrasted.

CHAPTER 8

PAYROLL

0801 GENERAL The Defense Finance and Accounting Service (DFAS) is responsible for developing a standard nonappropriated fund (NAF) payroll system which will provide NAF customers with quality service at low cost. On March 16, 1992, the Department of Defense (DoD) approved the selection of the Nonappropriated Fund Central Payroll System (NAFCPS) as the standard DoD payroll system for all NAF employees. Until NAFCPS is implemented, all NAF payroll offices should follow the procedures in the appropriate Service appendix. For policies and procedures not covered in this chapter, the basic policies in the DoD personnel rules and regulations should be followed.

080101 Standards. Comptroller General standards developed under the authority of 31 U.S.C. 3511 require that all Government organizations establish, evaluate, and maintain adequate systems of accounting and internal control. This requirement includes the responsibility to ensure that contractor (Government or private) operating a payroll system on behalf of an agency maintains adequate systems of accounting and internal controls.

080102 Payroll Objectives. In carrying out the responsibilities set forth in 080101, organizations must minimize the number of payroll systems in use, automate and standardize them to the extent feasible, and ensure that they meet the following objectives to facilitate adequate control over all phases of pay, leave, and allowances.

A. Prompt payment in the proper amount to all persons entitled to be paid, in compliance with applicable laws, regulations, and legal decisions.

B. Prompt accounting for and disposition of all authorized deductions from

gross pay.

C. Adequate control over retention and disposition of all payroll-related documents.

D. Prompt preparation of adequate

and reliable payroll records. Individual pay records for all civilian and military personnel must be maintained to show gross compensation (including allowances) by type and amount, deductions (including allotments), by type and amount, and net pay for each pay period. As a part of the overall financial management system, these records must be maintained by calendar year, leave year, or fiscal year, as appropriate, to support:

1. Management purposes.

2. Planning, preparation, execution, and review of the budget.

3. Internal and external reporting requirements.

E. Effective communication between organizations and organization personnel on payroll matters.

F. Adequate control over all phases of pay, leave, and allowances.

G. Effective interaction of the payroll function with the general ledger, personnel, and cost accounting functions, with provision for reconciling common data elements among separate systems.

080103 Internal Control Standards. A key to effective payroll operations is the maintenance of internal controls over those operations. Internal control standards to be followed are in Chapter 9 of this volume. All DoD NAF organizations must ensure that these standards

are followed through the plan of organization relating to payroll operations as well as through the methods and procedures adopted for processing and auditing their payrolls.

0802 EMPLOYMENT CLASSIFICATION OF PERSONS PROVIDING SERVICES.

Although workers may be called contractors for personal services, for tax purposes they are employees and should have Federal income tax and Social Security taxes withheld from their wages. Even though an individual or position may not be classified as an employee under other DoD regulations, the position incumbent is still an employee for whom the NAFI has a responsibility to withhold Federal income tax and FICA taxes.

080201 Personal Services Contracts. After giving full consideration to the common law factors and when it is determined that the contemplated service contract establishes an employer-employee relationship with the worker, then a personal services contract (PSC) could be used; and, it should include the following or similar statement:

"As an employee for purposes of the Internal Revenue Code [26 USC 3121(d)(2) and 26 USC 3401(c)], the Contractor is subject to withholding for both FICA and Federal income tax."

080202 Each NAFI or MWR activity should be directed to administer, pay, and report for payroll purposes all amounts paid consistent with the provisions of the PSC agreement or arrangement.

080203 Definitions.

A. Employee. The term "employee" means any individual who, under the usual common law rules or factors applicable in determining the employer/employee relationship has the status of employee. A worker is an employee under the usual common law rules if the relationship between him and the person for whom he performs services is the legal relationship exists when the person for whom services are performed has the right to

direct and control the person who performs the services, not only as to the result to be accomplished by the work but also as to the details and means by which the result is accomplished. That is, an employee is subject to the will and control of the employer not only as to what shall be done but how it shall be done. In this connection, it is not necessary that the employer actually direct or control the manner in which the services are performed; it is sufficient if he has the right to do so. The right to discharge is also an important factor indicating that the person possessing that right is an employer.

B. Employment. IRC Section 3121(b) defines "employment" as any service, of whatever nature, performed by an employee for the person employing him, irrespective of the citizenship or residence of either. In addition to service within the United States, this definition also applies to service outside the United States by a citizen or resident of the United States as an employee of an American employer. An American employer as defined in IRC Section 3121(h) and includes, among others, the United States or any instrumentality thereof.

1. Prior to January 1, 1984, service performed in the employment of the United States that was covered by a retirement system established by a law of the United States was excepted from the definition of employment and therefore was not subject to the tax under the Federal Old Age, Survivors and Disability Insurance System. Section 101.(a)(1) of the Social Security Amendments of 1983 amended IRC Section 3121(b) to remove this exception. Therefore, service performed in the employ of the United States by individuals hired after December 31, 1983, is not exempt from the Federal Old Age, Survivors Disability Insurance System. The exemption was not removed for employees engaged in employment before that date and for employees who had left such employment and after being separated therefrom, regardless of whether the period of separation began before, on, or after December 31, 1983, if the period of such separation does not exceed 365 consecutive days. Those employees are subject only to the hospital insurance portion of FICA taxes [See IRC Section

3121(u)].

2. Subsection (6) of Section 3306(c) excepts from the definition of employment, service performed in the employ of the United States Government or of an instrumentality of the United States which is wholly or partially owned by the United States. This exception was not affected by the Social Security Amendments of 1983. Therefore, wages of employees of the United States Government or instrumentalities of the United States are not subject to the FUTA tax.

C. Wages. According to Treasury Regulations, the name by which the remuneration is designated is immaterial. Thus, salaries, fees, bonuses, and commissions on sales or on insurance premiums, are wages paid as compensation for employment. The basis upon which the remuneration is paid is also immaterial in determining whether the remuneration constitutes wages. Thus, wages may be paid on the basis of piecework, or a percentage of profit and may be paid hourly, daily, weekly, bi-weekly, monthly, or annually. Wages, under IRC Section 3401(A) relating to withholding of income tax at the source of payment, means all remuneration for services performed by an employee for his employer, including the cash value of all remuneration paid in any other than cash form.

1. There are no provisions in the Collection of Income Tax at Source on Wages that are analogous to Section 3122 of the FICA. Therefore, a determination under Section 3122 of the FICA does not have any effect with respect to the application of the income tax withholding provisions.

2. Renumeration of a civilian employee in the employ of the United States or an instrumentality of the United States is wages subject to the Collection of Income Tax at Source on Wages.

080204 Other Factors. Other factors characteristic of an employer, but not necessarily present in every case, are the furnishing of tools and the furnishing of a place to work, to the

individual who performs the services. In general, if an individual is subject to the control or direction of another merely as the result to be accomplished by the work and not as to the means and methods for accomplishing the result, he is an independent contractor. An individual performing services as an independent contractor is not, as to such services, an employee under the usual common law rules. Whether the relationship of employer and employee exists under the usual common law rules will, in doubtful cases, be determined upon an examination of the particular facts of each case.

080205 The employment tax regulations provide, "If the relationship of employer and employee exists, the designation or description of the relationship by the parties as anything other than that of employer and employee is immaterial. Thus, if such relationship exists, it is of no consequence that the employee is designated as a partner, agent, independent contractor or the like." In summary, when determining the existence of a common law employer/employee relationship, the crucial test lies in the right of control, or lack of it, which the employer may exercise respecting the manner in which the service is to be performed and the means to be employed in its accomplishment, as well as the result to be obtained.

0803 IRS REQUIREMENTS. Accounting technicians, contracting officials, and responsible activity operating managers should be aware of the requirements under IRC Section 6041 and the importance of preparing and issuing the Forms 1096 and 1099-MISC correctly and filing them timely. [Note: The Form 1096 is required to transmit the Forms 1099 which must be issued to individuals who received payments of \$600 or more.]

080301 Form W-4. Periodic instruction should be given by DoD components to paying offices about the requirements for Forms W-4. NAF instrumentalities should be instructed as to the provisions for employment tax reporting. Treasury Publication 15, the Employer's Tax Guide, is a reliable source of information about this and other requirements for reporting to the

IRS.

080302 Overseas Requirements. Overseas activities should consider requesting an IRS Revenue Service Representative (see appendix for the nearest, applicable office) to conduct workshops for operating personnel.

080303 Desk Procedures. The use of desk procedures and checklists may be helpful to new employees--especially to the payroll clerks. High turnover rate experienced in many job categories (especially the clerical positions) contributes to poor or irregular compliance with the myriad of compliance rules and procedures.

080304 Form W-2G. NAF accounting personnel should be aware of IRS regulations and proper reporting procedures for reporting winnings from gambling activities on Form W-2G.

080305 Form 1099-MISC. Each DoD accounting office will adopt and use a consistent, standardized accounting method for tabulating, recording, and reporting of bingo and slot machine winnings at military units or on military posts/bases. Each accounting office will develop and promulgate a usable accounting sub-system for its activities for the collection and recording of payments to contractors and the preparation of Form 1099-MISC.

080306 IRS Resource. Accounting offices, in particular, and any other activity should be aware of the assistance available and offered by Revenue Service Representative; and, accounting offices are encouraged to use this IRS resource.

080307 Retaining and Storing Records. Accounting and payroll offices will retain records for a period of 4 years so as to be consistent with section 31.6001-19d (2) of the Treasury Regulations; and each accounting office should to adhere to a systematic storage method to facilitate retrieval of tax-related documents. After 4 years, individual payroll records are to be transferred to the National Personnel Records Center, St. Louis, MO for retention for an additional 56 years.

080308 Employee Status. Although NAF

employees are not employees of the Federal Government for some purposes, they are employees of a federal instrumentality and therefore are considered employees of the federal government for tax purposes.

080309 Depositing Payroll Taxes. Irrespective of the current IRS policy regarding the assertion of penalties, U.S. Government agencies are not exempt from the requirements for making Federal tax deposits. All DoD NAF payroll activities must adhere to the IRS employment tax deposit and reporting requirements. These procedures should then be emphasized to each financial officer to inform and provide specific, applicable instructions (especially in overseas areas) for withholding the tax and making the deposits. IRS Publication 15, Employer's Tax Guide (Circular E) is also recommended for review by financial officers annually. DFAS will periodically review payroll office operations to determine if Federal Tax deposits are timely and in accordance with IRS procedures and guidelines.

080310 Employer Identification Numbers. Each DoD NAF payroll activity will use only one Employer Identification Number (EIN).

0804 COMMON LAW FACTORS. Listed below are the twenty common law factors that have been developed for use by DoD NAF payroll offices (and other organizations that pay contractor wages) in the determination of the employer/employee relationship as required by IRC Section 3121(d)(2), and identified in 0803 and 0804. All factors are not always present in every case, and the degree of importance of each factor may vary depending on the occupation and the reason for its existence. These factors were published by the IRS in Revenue Ruling 87-41, 1987-1, C.B. 296.

080401 Instructions. A worker who is required to comply with other persons' instructions about when, where, and how he/she is to work is ordinarily an employee. This control factor is present if the person or persons for whom the services are performed have the right to require compliance with instructions.

080402 Training. Training the worker by requiring an experienced employee to work with the worker, by corresponding with the worker, by requiring the worker to attend meetings, or by using other methods, indicates that the person or persons for whom the services are performed want the services performed in a particular method or manner.

080403 Integration. Integration of the worker's services into the overall business operations generally shows that the worker is subject to direction and control. When the success or continuation of a business depends to an appreciable degree upon the performance of certain services, the workers who perform those services must necessarily be subject to a certain amount of control by the owner of the business.

080404 Services Rendered Personally. If the services must be rendered personally, presumably the person or persons for whom the services are performed are interested in the methods used to accomplish the work, as well as in the results, and the control factor is satisfied.

080405 Continuing Relationship. A continuing and regular relationship between the worker and the person or persons for whom the services are performed indicates that an employer-employee relationship exists. A continuing and regular basis may exist where work is performed at frequently recurring although irregular intervals.

080406 Set Hours of Work. The establishment of set hours of work by the person or persons for whom the services are performed is a factor indicating and showing necessary control.

080407 Doing Work on Employer's Premises. If the work is performed on the premises of the person or persons for whom the services are being performed, that factor suggests control over the worker, especially if the work could be done elsewhere. Work done off the premises of the person or persons receiving the services, such as at the office of the worker, indicates some freedom from control. However, this fact by itself does not mean that the worker

is not an employee. The importance of this factor depends on the nature of the service involved and the extent to which an employer generally would require that employees perform such services on the employer's premises. Control over the place of work is indicated when the person or persons for whom the services are performed have the right to compel the worker to travel a designated route, to canvass a territory within a certain time, or to work at specific places as required.

080408 Order or Sequence Set. If a worker must perform services in the order or sequence set by the person or persons for whom the services are performed, that factor shows that the worker is not free to follow the worker's own pattern of work but must follow the established routines and schedules of the person or persons for whom the services are performed. Often, because of the nature of the occupation, the person or persons for whom the services are performed do not set the order of the services or set the order infrequently. It is sufficient to show control, however, if such person or persons retain the right to do so.

080409 Oral or Written Reports. A requirement that the worker submit regular or written reports to the person or persons for whom the services are performed indicates a degree of control appropriate for an employee.

080410 Payment of Business and/or Traveling Expenses. If the person or persons for whom the services are performed ordinarily pay the worker's business and/or traveling expenses, the worker is ordinarily an employee. An employer, to be able to control expense, generally retains the right to regulate and direct the worker's business activities.

080411 Furnishing of Tools and Materials. The fact that the person or persons for whom the services are performed furnish significant tools, materials, and other equipment tends to show the existence of an employer/employee relationship.

080412 Right to Discharge. The right to discharge a worker is a factor indicating that the

worker is an employee and the person possessing the right is an employer. An employer exercises control through the threat of dismissal, which causes the worker to obey the employer's instructions. An independent contractor, on the other hand, cannot be fired so long as the independent contractor produces a result that meets the contract specifications.

080413 Right to Terminate. If the worker has the right to end his or her relationship with the person for whom the services are performed at any time he or she wishes, without incurring liability, that factor indicates an employer/employee relationship.

080414 Significant Investment. If the worker invests in facilities that are used by the worker in performing services and are not typically maintained by employees (such as the maintenance of an office rented at fair value from an unrelated party), that factor tends to indicate that the worker is an independent contractor. On the other hand, lack of investment in facilities indicates dependence on the person or persons for whom the services are performed for such facilities and accordingly, the existence of an employer/employee relationship. Special scrutiny is required with respect to certain types of facilities such as home offices.

080415 Realization of Profit or Loss. A worker who can realize a profit or suffer a loss as a result of the worker's services (in addition to the profit or loss ordinarily realized by employees) is generally an independent contractor, but the worker who cannot is an employee. For example, if the worker is subject to a real risk of economic loss due to significant investments or a bona fide liability for expenses, such as salary payments to unrelated employees, that factor indicates that the worker is an independent contractor. The risk that the worker will not receive payment for his or her services, however, is common to both independent contractors and employees and thus does not constitute a sufficient economic risk to support treatment as an independent contractor.

080416 Working for More Than One Firm at a Time. If a worker performs more than de

minimis services for a multiple of unrelated persons or firms at the same time, that factor generally indicates that the worker is an independent contractor. However, a worker who performs services for more than one person may be an employee of each of the persons, especially where such persons are part of the same service arrangement.

080417 Making Services Available to General Public. The fact that a worker makes his or her services available to general public on a regular and consistent basis indicates an independent contractor relationship.

080418 Hiring, Supervising, and Paying Assistants. If the person or persons for whom the services are performed hire, supervise, and pay assistants, that factor generally shows control over the workers on the job. However, if one worker hires, supervises, and pays the other assistants pursuant to a contract under which the worker agrees to provide materials and labor and under which the worker is responsible only for the attainment of a result, this factor indicates an independent contractor status.

080419 Full Time Required. If the worker must devote substantially full time to the business of the person or persons for whom the services are performed, such person or persons have control over the amount of the time the worker spends working and thereby restricts the worker from doing other gainful work. An independent contractor, on the other hand, is free to work when and for whom he or she chooses.

080420 Payment by Hour, Week, Month. Payment by the hour, week, or month generally points to an employer-employee relationship, provided that this method or payment is not just a convenient way of paying a lump sum agreed upon as the cost of a job. Payment made by the job or on a straight commission generally indicates that the worker is an independent contractor.

0805 DoD EMPLOYEE BENEFIT PORTABILITY

080501 Purpose. This section prescribes retirement accounting procedures for all nonappropriated fund (NAF) payroll offices having responsibility for employees who, under the Portability of Benefits for Nonappropriated Fund Employees Act of 1990, P.L. 101-508, have elected to retain their Civil Service Retirement coverage. Election to retain Civil Service Retirement coverage may be made only if the employee is vested in the plan of the losing employment system, i.e., five years of creditable service for the Civil Service Retirement System (CSRS) or the Federal Employees Retirement System (FERS). The Federal Personnel Manual (FPM), chapters 831 and 832 contain policies and instructions for administering the retirement system. FPM Supplement 831-1 contains the basic instructions for maintenance and disposition of retirement records.

080502 Employee Retirement System. The Nonappropriated Fund Notification of Personnel Action Form will reflect the appropriate retirement system to which the employee is subject.

080503 Responsibilities. Nonappropriated fund payroll offices must fulfill the following general responsibilities relating to the Civil Service retirement systems.

A. Prepare and maintain an SF 2806/SF 3100, Individual Retirement Record, for each employee subject to either CSRS or FERS.

B. Maintain adequate control over retirement records and associated monetary balances.

C. Requisition and maintain stocks of all retirement forms.

D. Promptly send claims and records to OPM. OPM requires all Federal agencies to get at least 80 percent of all claims for benefits to OPM within 30 days of the retirement or separation date.

E. Withhold retirement deductions from employees' salaries, make agency contributions, and send these to OPM for deposit. Deductions begin on the day employee

acquires coverage under the retirement system and must be prorated for partial pay periods.

080504 Routing Records of Separated Employees. Forward records of separated employees directly to the Employees Service and Records Center, Boyers, PA, as follows:

A. CSRS Retirement Records

OPM/CSRS
P.O. Box 45
Boyers, PA 16020

B. FERS Retirement Records

OPM/FERS
P.O. Box 200
Boyers, PA 16020

080505 Preparation and Maintenance of Individual Retirement Records.

A. Forms. An SF 2806/3100 is maintained for each employee subject to CSRS/FERS. These forms are used by OPM to adjudicate the retirement rights of a separated employee or survivors. It is important each SF 2806/3100 be correct, complete, clear in every detail, and properly certified. Timely and accurate maintenance of SF 2806/3100 expedites close-out procedures when an employee is separated or transferred to the paying jurisdiction of another agency.

B. Preparation of Form. The NAF payroll office will prepare an SF 2806/SF 3100 for each employee subject to CSRS/FERS.

C. Method of Posting.

1. The SF 2806/3100 may be posted by automated data processing system, typewriter, or by handwriting in ink. All entries must remain within the ruled lines. If necessary, use a second line to complete an entry, but do not post in the margin.

2. Corrections to manually maintained SF 2806/3100 will be made by lining through the incorrect item, entering the correct

data, and initialing the correction.

3. If the Service History or Fiscal Record becomes filled on one side of the record for a manually maintained record, continue posting on the reverse side by bringing the cumulative salary deductions forward with the annotation "Balance Forward".

D. Payroll Office Number (PON).
Each nonappropriated fund payroll office has been assigned a payroll office number which has been forwarded to OPM. This number is used by OPM to control records and identify the payroll office making and remitting deductions and contributions. This number must be reflected on each retirement record.

E. Maintenance of Service History.

1. Post service history entries as they occur. Obtain the data from the nonappropriated fund notification of personnel action. FPM Supplement 292-1 contains the standard abbreviations which shall be used.

2. Include additional pay to which an employee is regularly entitled and that is a part of basic salary for CSRS/FERS deductions. Omit postings for additional pay which is received on an irregular or unscheduled basis. Also omit additional pay not subject to CSRS/FERS deductions.

F. Fiscal Record Posting.

1. Post the total of retirement deductions withheld during the year in column 6 of the SF 2806/3100 at the end of the calendar year. If no deductions were made because of a non-pay status, enter a zero in column 6. If an employee had more than one retirement deduction rate during the year, enter separate yearly totals for each retirement deduction rate and note the deduction percentage rate, for each entry in column 8.

2. Include repayments in the current year of prior year deductions allowed under the retroactive provisions of the Portability of Benefits for Non-Appropriated

Fund Employees Act of 1990 in column 6. Column 8 shall carry the annotation "Includes repayment of \$xx.xx in prior year deductions per P.L. 101-508.

3. If calendar year deductions entered in column 6 include deductions from additional pay not included in the base pay posted in the Service History, place an asterisk after the amount in column 6. Place an asterisk and foot-note additional pay status "APS" in the lower left corner of the form. If calendar year deductions are annotated APS, show in column 8 the number of hours Leave Without Pay (LWOP) for each hourly rate during the year. If none, show "No LWOP". All LWOP must be shown.

G. Entries in Remarks Columns.
In addition to the service history and fiscal data, record the following information on the SF 2806/3100 under Remarks, column 4 and 8, as appropriate:

1. Enter periods of LWOP of more than 6 months in a calendar year.

2. Enter the number of days in a pay status during each calendar year or, if paid at an hourly rate and the number of days on which work was performed cannot be determined, enter the number of hours in a pay status during each calendar year for employees serving on an intermittent basis without a regular tour of duty,

3. Enter the tour of duty (4 hours a day, 5 days a week, etc.) for employees serving on a part-time basis with a regular tour of duty administratively determined in advance,

4. Enter the last date on which the employee was in a pay status, unused sick leave, and the Service Computation Date annotated as "SCD (month, day, year)." when an employee retires.

H. Health Benefits Data.
Nonappropriated fund employees electing to retain civil service retirement coverage are ineligible for federal employee health benefit

enrollment. These employees, however, may elect to participate in the respective NAF health insurance program. Nonetheless the individual retirement record must be annotated concerning status of health benefits enrollment. Individual retirement records forwarded to OPM for regular retirement, disability retirement, or deceased employees must be annotated "Employee Ineligible for Enrollment - P.L. 101-508" in column 4 of the record.

I. Sick Leave. If an employee dies or separates and appears eligible for an immediate annuity, enter the amount of unused sick leave in column 4 of the individual retirement record as follows:

1. If there is a minus or zero sick leave balance, enter "No unused sick leave balance."

2. If the employee has unused sick leave at the time of separation, enter the number of hours and cite "P.L. 101-508."

3. For employees with uncommon tours of duty, enter the number of hours of unused sick leave, with notation showing there was an uncommon tour of duty, and the date the sick leave, if used, would have expired. Cite "P.L. 101-508."

4. If the individual retirement record is for an application of disability retirement, post "Will use (or has used) all sick leave." When the application for disability retirement has been approved, post "No unused sick leave balance" on the final individual retirement record to be forwarded to OPM.

J. Federal Employees Group Life Insurance. Nonappropriated fund employees electing to retain civil service retirement coverage are ineligible for federal employees group life insurance. These employees, however, may elect to participate in the respective NAF life insurance program. Nonetheless the individual retirement record must be annotated concerning status of life insurance enrollment. Individual retirement records forwarded to OPM for regular retirement, disability retirement, or

deceased employees must be annotated "Employee Ineligible for Enrollment - P.L. 101-508" in column 4 of the record.

K. Disposition of the Individual Retirement Record.

1. Transfers between payroll offices in the same Military Service or Defense Agency, e.g., from one Air Force payroll office to another Air Force payroll office:

a. If the employee is covered by CSRS complete the SF 2806 and transmit it to the new servicing payroll office via the SF 2807 (Register of Separations and Transfers-Civil Service Retirement System). This type of transfer is commonly referred to as an "Interagency Transfer."

b. If the employee is covered by FERS complete the SF 3100 record and transmit it to OPM at the address in paragraph 080504 via the SF 3103 (FERS Register of Separations and Transfers).

2. Transfers between payroll offices not in the same Military Service or Defense Agency, e.g., from an Air Force payroll office to a Navy payroll office:

a. If the employee is covered by CSRS complete the SF 2806 and transmit it to OPM at the address in paragraph 080504 via the SF 2807 (Register of Separations and Transfers-Civil Service Retirement System).

b. If the employee is covered by FERS complete the SF 3100 record and transmit it to OPM at the address in paragraph 080504 via the SF 3103 (FERS Register of Separations and Transfers).

3. Employee Death. Send the SF 2806/3100 via the SF 2807/3103 to OPM within 5 days of the date of the computation of final pay. Enter in column 4 of the SF 2806/3100 the service computation date: "SCD (month, day, year)" and unused sick leave data.

4. Application for Refund of Retirement.

a. Upon leaving federal employment, an employee may request refund of retirement deductions by submitting SF 2802, Application for Refund of Retirement Deductions.

b. If the request for refund is received at the same time as the notification of the separation, attach the SF 2802 to the SF 2806/3100 and submit to OPM within 10 calendar days after the ending date of the pay period in which the employee was separated from the service. Refer to the SF 2802 in column 4 of the SF 2807/3103.

c. If the employee completes the SF 2802 within 30 days after the separation date, and the SF 2802 is received in the payroll office after the SF 2806/3100 is transmitted to OPM, send the SF 2802 to OPM. Annotate the SF 2807/3203 showing the date and number of the SF 2807/3103 on which the SF 2806/3100 was transmitted.

d. If the employee has been separated more than 30 days, he or she should file the SF 2802 directly with OPM.

5. Disability Retirement Separations. Advance close-out of the SF 2806/3100 is required when an application for disability retirement is received from a current employee.

a. Annotate the SF 2806/3100 as follows:

(1) Add the words "Preliminary-Disability Retirement" in the top margin of the SF 2806/3100.

(2) Post retirement deduction to the close of the previous calendar year.

(3) Enter the date application for disability retirement was made in the service history.

(4) Show the pay status of the employee, as applicable: "Employee

in duty status", "Leave with pay will end (date)", or "Pay stopped (date)." Also, enter in column 4 of the SF 2806/3100 the service computation date as follows: "SCD" (month, day, year).

(5) On each preliminary SF 2806/3100 submitted with an application for disability retirement, enter in column 4 "Employee Ineligible for Enrollment in Health Benefits or Federal Employees Government Life Insurance."

(6) Show the unused sick leave data in column 4 of the SF 2806/3100 and enter "Will use all sick leave" or "No unused sick leave". In addition enter projected date pay will terminate, i.e. when sick leave terminates.

(7) Prepare a new SF 2806/3100 to record retirement deductions withheld after sending the preliminary SF 2806/3100. Add the words "Final-Disability Retirement" above the date of birth. Enter "APP FOR DIS RET EXEC" and annotate the date application for Disability Retirement (SF 2801) was executed on the Service History of the SF 2806/3100. Post all actions that occur after submission of the application for preliminary disability retirement to this record.

(8) Prepare the SF 2807/3103 and send the preliminary SF 2806/3100 with the application for disability retirement as follows: for CSRS employees, OPM/CSRS, P.O. Box 45, Boyers, PA 16020; for FERS employees, OPM/FERS P.O. Box 200, Boyers, PA 16020, within 5 calendar days after receipt of the application. Annotate column 4 of the SF 2807/3103 with "Preliminary Disability" and the date established by the civilian personnel office.

(9) On approval of the application, complete the final SF 2806/3100. Post retirement deductions withheld after the preliminary SF 2806/3100 was sent. Show the effective date of disability retirement and the date that pay ceased on SF 2806/3100. Send the final SF 2806/3100 to OPM within 5 calendar days after the date of the employee's final pay check.

(10) If the employee's application is denied, continue using the final SF 2806/3100. OPM will not return the preliminary SF 2806/3100.

6. Non-Disability Retirement Separations. Send the SF 2806/3100 with the SF 2801, Application for Immediate Retirement, with attached CSC Form 1084, Information in Support of Civil Service Retirement Application, as follows: CSRS employees, OPM/CSRS, P.O. Box 45, Boyers, PA 16020; for FERS employees, OPM/FERS, P.O. Box 200, Boyers, PA 16020 within 10 calendar days after the ending date of the pay period in which the employee retired.

a. Use OPM developed checklists to ensure complete and accurate processing. Submit completed and signed checklist to OPM with the retirement package.

b. Post retirement deductions through the date of retirement on the Fiscal Record of the SF 2806/3100.

c. Enter the type of non-disability retirement in the service history, e.g. optional, mandatory, or discontinued service.

d. Enter the date pay stopped in column 4 of the SF 2806/3100. This will normally be the date of retirement; however, if pay status ends before the retirement date, enter the earlier date. Enter the service computation date "SCD (month, day, year)."

7. Service Credit Deposits for Post-1956 Military Service. Any individual employed in a position subject to the CSRS on or after October 1, 1982, will receive credit for Post-1956 military service only if he or she deposits a sum equal to seven percent of the military basic pay received for such post-1956 military service. Individuals who were first employed under CSRS before October 1, 1982, will have the option of making deposits for post-1956 military service and avoid a possible annuity reduction. These same provisions apply to FERS employees, except that the amount to be deposited will be equal to three percent of the military basic pay

received for post-1956 military service.

a. Payment of service credit deposits may be made either by cash payment or biweekly payroll deductions. Installment payments must be in whole dollar amounts not less than \$25 per pay period, except for the last payment which may be in any amount to complete repayment. Unpaid balances are subject to interest calculations, and OPM will issue annual guidance concerning the rate of interest to be used.

b. Record payments on the OPM Form 1514, Military Deposit Worksheet. In addition, a separate SF 2806/3100 will also be maintained for Post-1956 military deposits. The SF 2806/3100 Service History should carry the annotation "Military Service History and Deposit Record."

c. Close out the SF 2806 when military service credit deposits are complete and annotate in the Remarks column "Deposit paid in full." Submit the 2806 along with the OPM Form 1514 and the SF 2803 to OPM via a regular SF 2807/3103.

d. Close out and submit the SF 2806/3100 to OPM via a regular SF 2807/3103 in the event an employee resigns, retires, or dies prior to completing military service deposits. Annotate the SF 2806/3100 in the Remarks column with either "Paid in full" or "Partially paid", depending upon action taken by the employee or survivor. Notify the employee or survivor of the intended close out and provide the opportunity to complete payment prior to submitting to OPM. Advise the employee or survivor that refunds of military service deposits may be made only by OPM.

e. Close out and send the SF 2806 for military deposits to the new payroll office when an employee transfers to another payroll office within the same Military Service or Defense Agency. When the transfer is to another payroll office not in the same Military Service or Defense Agency, close out the SF 2806 and submit to OPM. A FERS Post-1956 retirement record is sent to OPM together with

the regular retirement record for all transfers to another payroll office including transfers within the same military service.

080506 Safeguarding Individual Retirement Records. Individual retirement records not maintained in a mechanized manner must be stored in secured fireproof containers. It is recommended that manually maintained individual retirement records be microfilmed/microfiched after the annual posting, and that these be stored separately from the record itself.

080507 Registers of Separations and Transfers.

A. The SF 2807 (Register of Separation and Transfers) is used to control and transmit SFs 2806 to other payroll offices and OPM. The SF 3103 (Register of Separation and Transfers) is used to control and transmit SFs 3100 to OPM.

B. Series Designations. Maintain two separate series of SFs 2807 transmittal numbers depending on whether the SF 2807 is transmitted to another payroll office or to OPM. Each series is consecutively numbered throughout the calendar year, and the first SF 2807 prepared in a new calendar year will begin with the number 1. SFs 2807 transmitted to another payroll office will be designated "IA" (Intra-Agency). Those transmitted to OPM will be designated "OPM." For example, the first SF 2807 transmitted to OPM for calendar year 1992 will be designated "OPM-92-1", while the first SF 2807 submitted to another payroll office will be designated "IA-92-1."

C. As all SFs 3100 are transmitted to OPM, it is necessary to maintain only one series of transmittal numbers for SFs 3103. These must also be consecutively numbered throughout the calendar year, and the first SF 3103 transmitted to OPM in a calendar year will begin with the number 1. All SFs 3103 will be designated "FERS." For example the first SF 3103 submitted to OPM for calendar year 1992 will be designated "FERS-92-1."

D. More than one SF 2806/3100 may be submitted with each SF 2807/3103. However, do not delay sending completed retirement records while other records are being prepared for submission.

E. Copies required.

1. OPM series. Prepare and submit the original to OPM. Retain one copy in payroll office files. An additional copy may be required according to your DFAS Center departmental instructions.

2. IA series. Prepare and submit the original and one copy to the gaining payroll office. Retain one copy in payroll office files. An additional copy may be required according to your Center departmental instructions.

3. FERS series. Prepare and submit the original to OPM. Retain one copy in payroll office files. An additional copy may be required according to your DFAS Center departmental instructions.

F. Filing the SF 2807/3103. File SFs 2807 received from other payroll offices in a separate file in order of receipt by calendar year. Maintain a separate file for each "IA" series of SFs 2807 received. These files will be in numerical order for each calendar year. Maintain a separate file for SFs 3103 in numerical order for each calendar year.

080508 Adjustments.

A. Current Employees

1. Erroneous Deductions. If an erroneous amount was deducted for retirement from the pay of a current employee, make an adjustment on the next payroll. Increase or decrease current retirement deductions from the employee's current pay period earnings, and make a corresponding adjustment in the employer's contributions. Include the adjustment in the SF 2812L prepared for the current pay period.

2. Deductions Not Withheld When Required. If deductions were not made for a period when the employee should have been covered by the CSRS/FERS retirement acts, compute the correct amount and make the withholding the next pay period. If deductions were made for a NAF retirement plan when deductions were required for CSRS/FERS, adjust the NAF retirement deductions and contributions, and FICA contributions and deductions, in the next pay period submission to these retirement plans. These amounts should then be offset against the amounts that should have been submitted for CSRS/FERS to determine the net amount that must be withheld from the employee's current period pay.

B. Separated Employees.

1. Overdeductions:

a. When an excess amount has been deducted from a former employee's pay, and the SF 2806/3100 has not yet been forwarded to OPM, the amount is included in the current calendar year and total accumulative deduction postings in columns 6 and 7 respectively on the SF 2806/2807. In addition, the amount of excess deductions is shown in column 8, Remarks.

b. If the overdeduction is found after the SF 2806/3100 was sent to OPM, an SF 2806-1, Notice of Correction of Individual Retirement Record for CSRS employees, or an SF 3101, Notice of Correction of Individual Retirement Record (FERS), must be prepared and submitted to OPM.

c. When an overdeduction from a former employee's pay results in excess employer contributions, the amount of the excess should be deducted from the next pay period's SF 2812L.

2. Underdeductions

a. When an insufficient amount has been deducted from a former employee's pay, and the SF 2806/3100 has not yet been submitted to OPM, note the amount of

the deficiency in column 8 of the SF 2806/3100. If the SF 2806/3100 has been submitted, another SF 2806/3100 must be prepared and annotated "Supplemental" in the upper left margin.

b. When an underdeduction from a former employee's pay results in insufficient employer contributions, the amount of the shortfall should be included in the next pay period's SF 2812L.

3. Other Corrections. Corrections to the Service History or Name History portions of the SF 2806/3100 should be made on the retirement record if the error is detected before the record is submitted to OPM. If the error is detected after the record is submitted to OPM, prepare an SF 2806-1 or SF 3101.

C. Transferred Employees

1. Overdeductions

a. When an excess amount has been deducted from a transferred employee's pay, and the SF 2806 has not yet been forwarded to another payroll office within the same Military Service, the amount is included in the current calendar year and total accumulative deduction postings in columns 6 and 7 respectively on the SF 2806/2807. In addition, the amount of excess deductions is shown in column 8, Remarks.

b. Prepare and submit an SF 2806-1, Notice of Correction of Individual Retirement Record for CSRS employees, or an SF 3101, Notice of Correction of Individual Retirement Record, to the new payroll office if the overdeduction is found after the SF 2806/3100 was forwarded to another payroll office within the same Military Service.

c. Deduct the amount of excess employer contributions from the next pay period's SF 2812L when an overdeduction from a transferred employee's pay results in excess employer contributions.

2. Underdeductions. Note

the amount of underdeductions in column 8 of the SF 2806 when an insufficient amount has been deducted from a former employee's pay, and the SF 2806 has not yet been forwarded to another payroll office within the same Military Service. Prepare and forward an SF 2806-1 to the new payroll office if the SF 2806 has been submitted.

3. Other Corrections. Correct the Service History or Name portion of the SF 2806 on the retirement record if the error is detected before the record is submitted to another payroll office within the same Military Service. Prepare and submit an SF 2806-1 to the new payroll office if the error is detected after the record is submitted.

4. Retroactive Payments

a. Report CSRS/FERS deductions withheld from a retroactive salary payment for a separated employee by preparing a supplemental SF 2806/3100, and forwarding it to OPM by SF 2807/3103.

b. Include CSRS/FERS deductions withheld from a retroactive salary payment for a current employee in the current year salary deduction on the SF 2806/3100 being maintained for the employee.

c. Report CSRS/FERS deductions withheld from a retroactive salary payment for an employee transferred to another payroll office within the same Military Service by preparing a supplemental SF 2806/3100, and forwarding it to the new payroll office by SF 2807/3103.

080509 Availability of Retirement Funds for Loan and Setoffs.

A. Loans and Private Debt.

1. An employee may not borrow from the Civil Service retirement funds or assign money credited to his or her account as security for a loan for any other purpose. Generally, lump-sum credit or annuity is not subject to execution, levy, attachment,

garnishment, or other legal process.

2. However, OPM will comply with a garnishment or attachment order issued to enforce a child support or alimony obligation. In addition OPM will comply with the assignment of retirement benefits in a State court order, decree, or community property settlement agreement in connection with the divorce, annulment of marriage, or legal separation of a Federal employee or retiree.

B. Setoff.

1. Conditions governing collection by setoff.

a. An employee's contributions to the Civil Service retirement fund may be setoff to recover any valid debt to the United States if all of the conditions below are met.

(1) The employee has been separated.

(2) The payroll office has exhausted all other means of recovery.

(3) The employee has filed an application for refund or for a monthly civil service annuity benefit.

(4) The creditor agency has given the employee an opportunity to request reconsideration of the collection including an oral hearing, waiver, or compromise.

b. An employee's contributions to the Thrift Savings Plan may not be setoff to recover any valid debt to the United States.

2. Setoff Procedure

a. Before a payroll office can ask OPM to recover a debt of a former employee from the retirement fund, the employee must be notified in writing of the following:

(1) The reason for the debt.

(2) The date repayment must be made (normally not more than 30 days after date of the notice).

(3) The intention to collect the debt by setoff from the retirement fund.

(4) The opportunity to request reconsideration of the decision to collect the indebtedness, including waiver or compromise.

(5) An explanation of the right to an oral hearing.

b. Only one written demand containing the above notice is required to be sent to the employee. If there is no reason to believe that the employee has not received the demand notice, the payroll office has the right to judge the claim based on evidence in its possession.

c. An SF 2805, Request for Recovery of Debt Due the United States, will be prepared, and the payroll office will send Parts 1, 2, and 4 of the SF 2805 to OPM. Part 3 will be retained in the payroll office.

d. If a debt has been pursued to judgement, written demand need not be made. A copy of the court order must be attached to SF 2805.

e. Do not retain the SF 2806/3100 pending completion of action necessary to prepare and submit an SF 2805. If an SF 2805 will be submitted at a later date, the SF 2806 should be annotated in column 8, Remarks, with the existence of the debt, the amount (if known), and the reason for the debt. If the exact amount of the debt is unknown, note in the SF 2806, column 8, that the employee is indebted in an unknown amount.

080510 Annual Summary of Retirement Fund Transactions. OPM requires an annual

summary and reconciliation of amounts reported throughout the calendar year for CSRS and FERS. These summaries and reconciliations are performed at the departmental level at each DFAS Center. Each Center has different procedures concerning how this annual summary and reconciliation is performed; therefore you should contact the Center which has responsibility for your payroll office to obtain their instructions.

080511 Thrift Savings Plan Retroactive Contributions.

A. The Federal Retirement Thrift Investment Board has developed a form to be used in capturing information concerning retroactive contributions for employees who have transferred from a civil service position to a NAF position, and who are eligible to make retroactive contributions in accordance with the Portability of Benefits for Nonappropriated Fund Employees Act of 1990. The form to be used is the TSP-1-NAF, Election Form for Retroactive Contributions - NAF Employees. This form will not be contained in any Thrift Savings Plan (TSP) Bulletin.

B. It is recommended that you only use this form to capture elections concerning retroactive contributions allowable by the Portability of Benefits for Nonappropriated Fund Employees Act of 1990. The TSP-1, TSP Election Form, should be used to document information concerning current contributions to TSP.

080512 Retroactive Adjustments Allowed by P.L. 101-508. OPM has issued guidance concerning adjustments required when an employee elects to be retroactively covered by his or her former retirement plan. The guidance differs depending on whether the employee was previously covered by the Civil Service Retirement System or the Federal Employees Retirement System. This guidance is outlined below.

A. Employees Electing to Retain Full CSRS Coverage

1. Employee Deductions.

CSRS employees have certain options concerning the payment of employee deductions when deductions have not been taken from basic pay to cover the required deduction. The employee should have these options explained, and a written election should be obtained which includes a statement concerning the option elected and whether the employee has received a direct refund from the nonappropriated fund (NAF) retirement plan for previously withheld deductions. The options are as follows:

a. Agency Correction of

Records. Election of this option by the employee requests the employing agency to collect the employee deduction, if necessary, and make the required adjustments to the Individual Retirement Record. If the employee selects this option, he or she will not have to go through normal OPM service credit procedures, and interest will not be charged.

(1) If the employee is retroactively placed in CSRS, both the agency and the employee have overpaid FICA taxes and Nonappropriated Fund retirement (unless the employee received a direct refund for his NAF retirement deductions). Instructions for making the proper adjustments in this situation are contained in Comptroller General Decision B-202201.

(2) After the adjustments required by Comptroller General Decision B-202201 have been completed, the employees' salary may not have been reduced by an amount equal to that necessary for the full CSRS employee deduction. If this is the case, the employee has received a salary overpayment that may be considered for waiver. If the request for waiver is denied, the employee must repay the amount. Repayment may be made in either in a single lump-sum amount or in installments. If the request for waiver is approved, the NAF instrumentality must pay the employee's share from its funds and report the payment via the SF 2812L no later than the second pay period after the decision. In either case, such repayments must be included as calendar year salary deductions on the employee's SF 2806.

b. Payment of Deposit to

OPM. If the employee elects not to have his or her records corrected, there will still be an option to file Standard Form 2803, Application for Deposit or Redeposit, with OPM and make payments directly to OPM through normal service credit channels. This deposit must be completed before the annuity is finally adjudicated at the time of the employee's retirement. In this case, the employee's SF 2806 must be documented to reflect the period for which deductions were not withheld, the amount of deductions that should have been taken, and that the employee did not elect correction. If the employee chooses this option, interest on the deposit will be charged as required by law.

c. Nondeduction service.

If the employee elects this option, the retroactive period will be considered as nondeduction service. Service performed after October 1, 1982, will not be used in the computation of the annuity, if the deposit is not made. In this case, the employee's SF 2806 must be documented to reflect the period for which deductions were not withheld, the amount of deductions that should have been taken, and that the employee elected nondeduction service.

2. Agency Contributions.

Regardless of the option selected by the employee, the NAF instrumentality must send OPM its share of CSRS retirement contributions for each employee. The NAF instrumentality should compute and send to OPM, in accordance with their instructions for adjusting retirement, an amount equal to that which would have been contributed had the employee been covered by CSRS rather than NAF during the period in question. This payment must include an amount retroactive to the effective date of the CSRS coverage. These contributions should be submitted to OPM no later than the second pay period after the amount of the agency contribution is established for each employee.

B. Employees Electing to Retain FERS Coverage

1. Unlike employees who elect to retain CSRS coverage, those employees

who elect to retain FERS coverage do not have an option concerning whether to repay for periods of retroactive deductions. All periods subject to retroactive deductions must be repaid. The NAF instrumentality is responsible for repaying the full normal cost, which includes the employee and employer share. The amount that should have been deducted from the employee's basic pay to cover FERS retirement deduction constitutes an overpayment of pay to the employee. Any overpayment of pay is subject to collection unless it is waived.

2. If the employee is retroactively placed in FERS, both the agency and the employee have overpaid Nonappropriated Fund retirement (unless the employee received a direct refund for his NAF retirement deductions). Action should be taken to recover both employee deductions and employer contributions for periods of retroactive FERS coverage. Prior to requesting a refund from the NAF retirement plan, a written statement should be obtained from the employee concerning whether he or she has received a direct refund from the Nonappropriated Fund (NAF) retirement plan for previously withheld deductions. This statement then will become the basis to apply for a refund of previously withheld NAF retirement employee deductions. Refunds of employee deductions received from NAF retirement plans should be offset against the amount owed to OPM for FERS employee deductions to determine the net amount of the overpayment of pay.

3. **Agency Contributions.** The NAF instrumentality must send OPM its share of FERS retirement contributions for each employee. The NAF instrumentality should compute and send to OPM, in accordance with their instructions for adjusting retirement, an amount equal to that which would have been contributed had the employee been covered by FERS rather than NAF during the period in question. This payment must include an amount retroactive to the effective date of the FERS coverage. These contributions should be submitted to OPM no later than the second pay period after the amount of the agency contribution is established for each employee.

080513 Annual Leave Lump Sum Repayment. Employees who are covered under the provisions of the Portability of Benefits for Nonappropriated Fund Employees Act of 1990 who were paid lump sum leave payments between January 1, 1987 and April 15, 1991, as a result of a transfer between appropriated and nonappropriated fund positions, may repay those lump sum payments and receive recredit of the leave. Employees who separated from Federal service between January 1, 1987 and April 15, 1991, and who were subsequently rehired may also have the opportunity to repay the lump sum leave and receive recredit in accordance with Section 1077 of Public Law 102-484 (the DoD Authorization Act for Fiscal Year 1993).

0806 DUAL COMPENSATION

080601. General The Dual Compensation Act of 1964, as amended (codified at 5 U.S.C. 5531-33, provides that a retired member of the armed forces who later is employed in a Federal civilian position (including a NAF position) may receive the full salary of that position, but their retired or retainer pay may be reduced. For details, refer to Volume 7, Part B of the DoD financial Management Regulation 7000.14-R.

CHAPTER 9

INTERNAL CONTROLS

0901 PURPOSE. This chapter prescribes the internal control techniques that are to be designed and implemented into all DoD NAF accounting systems.

0902 REQUIREMENTS

090201 Legal. 31 USC 3512 requires the head of each executive agency to establish and maintain systems of accounting and internal control that conform to the requirements prescribed by the Comptroller General of the United States. The head of each executive agency is required to report annually on whether the agency's accounting systems conform to the accounting principles, standards, and related requirements prescribed by the Comptroller General. The accounting requirements of the Comptroller General prescribed under section 3511 are set forth in the General Accounting Office Policy and Procedures Manual for Guidance of General Agencies and implemented in this regulation.

090202 Internal Controls - The plan of organization and all of the coordinate methods and measures adopted within a business entity or activity to safeguard its assets, check the accuracy and reliability of its accounting data, promote operational efficiency, and encourage adherence to prescribed managerial policies. Accounting controls for safeguarding assets and ensuring the reliability of records include systems of authorization and approval, separation of duties, physical controls over assets, and internal auditing. Administrative controls concerning operational efficiency and compliance with policies and procedures include statistical analyses, training programs, and quality controls.

090203 Systems. Subsection (a) of section 3512 requires the head of each executive agency (including the DoD Components) to have systems of accounting and internal control which

provide:

A. Complete disclosure of the financial results of agency activities;

B. Adequate financial information needed for agency management purposes;

C. Effective control over, and accountability for, assets for which the agency is responsible;

D. Reliable accounting results and reports that will be the basis for preparing and supporting agency budget requests, controlling budget execution, and providing financial information the President requires, and;

E. Suitable integration of agency accounting with Treasury's central accounting and reporting responsibilities.

0903 INTERNAL CONTROL STANDARDS. The standards contained in this chapter apply to all manual and/or automated systems of accounting and related internal controls under development, under major revision, or currently operating in all DoD Components. These standards, along with other applicable requirements, shall be considered when Component heads report annually in compliance with management control standards prescribed by GAO and guidelines issued by OMB as they relate to their accounting systems as required by the Federal Manager's Financial Integrity Act, P.L. 97-255. The internal management control (IMC) program is implemented by DFAS 5010.38-R.

090301 Structure of the Accounting System

A. The accounting system shall be structured to produce and report financial information to satisfy the internal needs of the DoD Component and the external reporting

needs of the executive branch, the Congress, and the public as applicable.

B. The system shall be structured in such a way that it ensures the proper gathering, recording, storing, processing, communication, and consistent reporting of the information.

C. Information shall be organized by project or program, responsibility centers, activities, object class of expenditure, organization units, appropriation, etc.

D. The system shall be flexible so it can adapt to changing user and external requirements during the system's life cycle.

E. The system shall be flexible enough to handle additions or deletions, including changes to accounts or account codes, classifications, organizations, and dollar thresholds, without extensive program or system changes.

F. Data shall be captured at the lowest level of detail to facilitate adapting to new and expanded report requirements.

G. The accounting structure shall provide for general ledger and subsidiary accounts, incorporating the double-entry concept.

H. The account structure within the general ledger shall be driven by the type of funds involved and the nature of the Component's operations.

I. The general ledger account structure shall support required internal and external reporting and shall conform with the general ledger as prescribed in the appropriate appendix contained in this regulation.

J. The accounting system shall provide a means of capturing and reporting transactions by organizational segments, appropriations and funds, budget activities, programs, projects, geographic locations, obligations, disbursements, objects of

expenditures, etc. as necessary to meet user needs and outside reporting requirements and inquiries.

K. The classification coding scheme shall be coded in such a way that lower levels of data roll up into higher levels. For example, projects normally roll up into programs, which roll up into budget activities, which roll up into appropriations, which roll up into Component-level information, which roll up into consolidated department wide information.

L. Programming, budgeting, accounting, and reporting classifications shall be consistent with each other and synchronized with the organizational structure so that actual activity can be compared with enacted budgets and support future budget formulation for each management function. To achieve this consistency and synchronization, the account structure and transaction coding and data classification scheme shall be uniform or translatable among all accounting, budgeting, and reporting systems and subsystems, within the Component.

090302 Accounting Processes and Procedures

A. Support for Transactions

1. The financial transactions for which the accounting system must account shall be adequately supported with pertinent documents and source records.

2. These transactions, and any subsequent adjustments, shall be authorized and executed in accordance with management criteria by personnel acting within the scope of their authority.

3. Transactions shall be properly accumulated and correctly classified, coded, and recorded in all affected accounts.

4. Transactions shall be recorded in the accounts promptly and accurately, in the proper amount, to permit preparation of financial reports in accordance with internal needs and external requirements

and prompt analysis of the information by management.

5. Information shall be captured in the accounting records simultaneously with or immediately following the economic event that gave rise to the transaction.

6. All transactions, including those which are computer-generated and computer-processed, shall be uniquely referenced to individual source records.

7. Referencing shall be done in a manner that enables tracing or replicating a transaction from its source to the resulting record or report, and from the resulting record or report to the source, or by tracing indirectly to source records through summaries and calculations contained in general and specific journals.

8. Individual source records fall into the following three categories:

a. Documents (either traditional source documents or paper documents or forms created when data are entered at a terminal),

b. Source listings of transaction data entered at a terminal (these listings include the same data elements as the traditional source document without generating the individual documents), and

c. Source records stored on magnetic media such as disk or tape.

9. Items in source records necessary for audit trail purposes shall include transaction type, record or account involved, amount, processing references, and identification of the preparer and approver of the transaction.

10. To facilitate tracing to source documents, the ledger account shall include transaction references, that is, a record of all postings to the account.

11. In the case of computer generated transactions, verification shall be accomplished through reviews of systems documentation such as edit routines, decision criteria in program listings, master files or data base records, detailed listings of computer media work files, or input transactions which trigger other computer generated transactions.

12. Electronic certification procedures shall include software lockouts to prevent unauthorized individuals from modifying or accessing any information not within the scope of their authority.

B. Reconciliation

1. General ledger balances shall be reconciled with subsidiary accounts and records, either manually or by the computer, in a timely manner.

2. Regularly scheduled reconciliation of control and subsidiary accounts and records for such things as cash receipts, accounts receivable, inventories, and accounts payable shall be performed to substantiate and maintain the accuracy of account postings and balances by checking the agreement between the sum of the detail in subsidiary accounts with the general ledger control balances.

3. General ledger property control accounts shall be periodically reconciled to detailed property records.

4. Accounting records shall be adjusted to be in agreement with the results of physical inventories when they are taken.

5. The results of periodic physical counts of cash and cash items shall be reconciled to recorded amounts and any discrepancies adjusted.

6. Financial data produced by program offices or other financial systems shall be reconcilable with the comparable data in the accounting system.

7. The system, whether

automated or manual, shall have the capability of readily reconciling expenditure data with obligations and outlay data.

8. The system shall include appropriate procedures for closing the accounts at the end of one accounting period and reopening accounts at the beginning of the next period.

C. Transaction Processing/ Production Control

1. The accounting system shall contain internal controls which operate to prevent, detect, and correct errors and irregularities which may occur anywhere in the chain of events from transaction authorization to issuance of reports.

2. The controls shall cover the functions of transaction authorization and approval, data preparation and validation, input, communications, processing, storage, and output, as well as error resolution and reentry and file or data base quality maintenance.

3. The internal controls shall provide reasonable assurance that the recording, processing, and reporting of financial data are promptly performed and that the completeness and accuracy of authorized transactions and data are ensured during automated (or manual) processing of the accounting.

4. Input controls shall exist to detect incomplete, duplicate, or otherwise erroneous transactions and ensure they are controlled until corrected.

5. Processing controls shall exist to provide reasonable assurance that all transactions have been processed and that the application processing was correct, using correct file data, operator procedures, and processing logic.

6. Output controls shall provide reasonable assurance that the output is complete, correct, and distributed only to authorized users.

7. Data communication controls shall exist to ensure that the integrity and confidentiality of messages (data) transmitted by communication lines from the originating point to the reception point are maintained.

8. Data storage and retrieval controls shall exist to ensure that the files and data are protected from loss, destruction, and unauthorized changes, and that only the correct and latest version of data and program files are used during processing.

9. While the particular procedures and records used to effect these controls are left to each Component, the accounting system shall include controls, where appropriate, that prevent or detect the following kinds of situations:

- a. Failure to record a transaction,
- b. I n c o r r e c t o r incomplete recording of a transaction,
- c. Duplicate recording of a transaction,
- d. Loss of a transaction document in handling,
- e. Incorrect entry of data at a terminal,
- f. P r o c e s s i n g o f unauthorized or incorrect data,
- g. Directly changing account/master file/data base records without an authorized transaction,
- h. Use of a superseded or test version of a program rather than the current production version,
- i. Use of a wrong file or record in processing,
- j. Unauthorized file

maintenance transaction (which have a financial impact),

k. Use of an incorrect value in internal tables,

l. Incorrect default value,

m. Input of incorrect program parameters,

n. Unauthorized use of programs which bypass normal program controls and edits,

o. Incorrect or incomplete processing logic,

p. Abnormal interruption of the application processing run,

q. Destruction of part or all of a file during processing,

r. Data base errors,

s. Inappropriate use of operating program testing aids to circumvent normal processing control procedures,

t. Out-of-balance conditions, and

u. Data errors caused during data transfer between interfacing systems.

10. The accounting system shall provide a reference and control list of transactions processed during a processing cycle or a given period of time.

D. Error Handling

1. The accounting system shall provide procedures for control over errors to ensure that once errors are detected:

a. Corrections are made in a timely manner and reentered into the appropriate processing cycle,

b. Corrections are made only once, and

c. The correction itself is validated.

2. Data items that contain errors shall be carefully controlled to ensure they are resubmitted (i.e., the transaction is not lost).

3. For data input errors, error lists or reports indicating why each item was rejected shall be prepared and open items shall be tracked and aged until all errors are corrected.

4. The system shall provide management with reports that list errors, reasons for errors, and corrective action taken.

5. Supervisor personnel shall review error listings and corrections.

6. Procedures shall be established for periodically analyzing reasons for errors and rejected transactions by type and source so that appropriate actions may be taken to obtain improvements.

7. When transaction are input through a terminal, either on-line or for later update to the system, the transaction and its data elements shall be edited as keyed, errors found by the edits are resolved and re-input by the person keying the transaction, or the transaction is held in some fashion until all the data are validated.

8. When error resolution cannot be done at the terminal, the document or source record shall be controlled to ensure errors are researched, corrected, documented, and resubmitted for input into the system in the appropriate processing cycle.

9. Additional editing by the application software shall occur once the transaction is in the system.

E. Control Over Output

1. Output distribution shall be controlled to ensure that only properly authorized personnel receive reports or other output.

2. Prior to distribution, outputs shall be checked for such things as completeness, agreement of control totals, and appropriateness of the number of copies.

3. If feasible, a cross-check with output from related programs shall be done.

4. The user group or area responsible for the function related to the output shall perform simple error detection and control procedures (e.g. visual scans, tests against independently maintained control totals, comparison with approximations or physical counts) before relying on the output.

F. Verifying File Data

1. Since data quality can deteriorate over time the accounting system shall provide maintenance procedures to ensure the continuing quality of files.

2. Depending on what the application and record type are, file reviews shall be performed by the users or other personnel who would be most effective in detecting discrepancies.

3. The need for periodic special reviews to verify file data shall be reduced where input controls are effective and when the examination of reports routinely produced by the system can be relied upon to serve this purpose.

4. Component management shall determine the frequency and extent of file quality reviews with due regard to the risks and costs involved. Similar review procedures shall be considered for satellite files (stored tables) used by application programs.

G. Reviews and Evaluations of the System in Operation

1. Periodic reviews and tests of the accounting system shall be performed to ensure that the system and its controls and security features continue to meet user needs, perform as intended, and conform with applicable accounting standards.

2. In certifying compliance with prescribed accounting principles, standards and related requirements as required by the Federal Managers' Financial Integrity Act, transaction testing of the system in operation shall be performed.

3. Transaction testing shall be done on the critical aspects of the system and results are documented.

4. Tests shall be designed to disclose whether valid transaction are processed properly and whether the system rejects invalid transactions.

5. The tests shall cover the entire flow of transactions from initial authorization through processing, posting to the accounts, and reporting.

6. In developing test plans, consideration shall be given to the results of any prior system testing.

7. When the system involves manual operations, interview and observation techniques shall be performed because of the higher risk that prescribed accounting procedures or control techniques are not consistently followed or that the results of processing test transactions are not representative.

8. System evaluation policies shall provide for more comprehensive evaluation on a cyclical basis. For example, independent and fairly detailed reviews of the entire system or of a major portion of the system might be made every third year, with personnel who operate the system performing less comprehensive reviews in the interim.

9. More than one of the

following testing techniques shall be used to test all key aspects of an accounting system:

- a. Interviewing persons who operate the system.
- b. Observing operating procedures.
- c. Examining system documentation.
- d. Independently verifying data integrity by use of generalized audit software.
- e. Verifying that the computer-based system correctly processes (or rejects) both valid and invalid transactions by using actual or simulated transactions.
- f. Reviewing process and error reports and evaluating error follow-up procedures.
- g. Comparing data from related reports and records.

10. Accounting System managers shall:

- a. Promptly evaluate findings and recommendations made by auditors and others reviewing accounting systems.
- b. Determine proper actions in response to findings and recommendations.
- c. Complete, within established time frames, all actions to correct or resolve findings and recommendations.

H. Financial Reporting

1. Financial reports shall provide information users need, be easy to understand, be accurately and promptly prepared on a consistent and comparable basis, fairly present information and relevant disclosure data, and include the effect of all and

only transactions of the period being reported upon.

2. Financial reports shall comply with restrictions on information classified for security purposes.

3. Internal and external reports shall be prepared from the same source data (the underlying accounting records or data base) and shall be in agreement.

4. Reporting periods may vary between systems; therefore, reconciliation is required between systems.

5. Except when estimates are clearly appropriate, information included in external reports required by the Treasury and OMB shall be from the general ledger or accounts under general ledger control.

6. Interagency, intra-agency, and interfund transactions shall be separately identified in records and statements so they can be properly treated in preparing consolidated reports.

7. Financial statements shall be prepared based on the entity's systematic accounting process covering the total operations of the reporting entity.

I. Accuracy

1. All financial data presented in reports shall be accurate.

2. Reasonable estimates shall be clearly identified in reports and statements when precise measurements are impractical, uneconomical, unnecessary or would cause delay in report issuance.

3. If financial data or reports are based on sources other than the official accounting system, their basis shall be clearly explained.

4. The component's financial reports shall include full and adequate disclosure

of financial and accounting information, including:

a. Disclosure of related party transactions.

b. Liability for employer benefit plan.

c. Department of the Treasury specific reporting requirements.

5. Automated and manual controls built into the system shall ensure the accuracy of financial data collected, processed, and reported. In addition, when reports are manually prepared, they shall result directly from financial data coming from the system and shall be prepared by designated individuals knowledgeable of the reporting requirements, and reviewed and approved by supervisory personnel.

J. Usefulness

1. Internal reports, including reports presented on terminal screen displays, shall be designed and produced to meet users' needs.

2. Recurring internal financial reports shall be based on explicit statements of financial information requirements for each user organizational unit.

3. Information needed by users shall be identified when designing the system.

4. Reports and user satisfaction with the level of detail, frequency, and report distribution shall be verified periodically.

5. Written policies and procedures shall be developed for initiating and approving requests for financial information and for changes to report formats.

6. The accounting system ad hoc reporting or query capabilities, as well as

agency procedures for using these capabilities, shall be readily available to system users.

7. All internal reporting policies and practices shall be reviewed periodically to determine their continued usefulness and whether they represent organizational and program changes.

8. The responsibility for keeping current on changing requirements of external reports shall be assigned to a particular individual or group.

9. Reports shall be designed to highlight major problems, exceptions, or trends and to facilitate the monitoring and evaluation of operations.

10. Reports produced by the accounting system shall compare current and prior-period performance, and planned performance with actual performance in a variety of ways, including on a cash, accrual, or obligation-basis.

11. Reports shall be designed so they can:

a. Signal when controls over funds or other resources have broken down.

b. Alert managers when operations are deviating from financial plans.

c. Provide the financial data needed to analyze and predict the financial consequences of alternative course of action.

12. Accounting system reports, combined with other management information, shall provide managers with a wide range of useful reports that contrast anticipated work units and their anticipated costs with actual work units and actual incurred costs.

13. Data shall be saved as appropriate for historical as well as for reconstruction of data files.

K. Timeliness

1. Reports shall be promptly produced to be of maximum use to management and to meet external requirements.

2. When timeliness is particularly critical, reporting needs shall be met by providing the capability to query the system's data base or by ad hoc report generation capabilities.

3. Systems shall have back-up and recovery provisions to help ensure timely report generation in cases of processing interruption or emergency situations.

4. The Component shall develop and maintain reporting schedules and due dates.

5. Responsibility for report distribution shall be assigned to one individual or group.

6. A control list of reports produced, their due dates, and authorized recipients shall be maintained and checked off as reports are issued.

7. Approved cut off dates shall be established for data input for produced reports and this shall be communicated throughout the Component.

8. Financial reports shall be issued periodically according to the accounting period and as needed.

L. Consistency

1. Financial management data shall be recorded and reported in the same manner throughout the Component using standard accounting and budget definitions and classifications.

2. Financial data reported shall be derived from general ledger accounts that are maintained on a consistent basis from period to period.

3. Any material changes in

accounting policies or methods and their effects shall be clearly explained in the reports.

M. Operation, Maintenance, and Evaluation

1. Management shall monitor an operating accounting system's life cycle to ensure that the system's stability is maintained because of changes in hardware and software.

2. Successful application of management policies and procedures for controlling changes in system software and hardware and improved compilers, and the proper training of new employees shall operate to protect against communication problems, data entry failures, and user negligence.

3. Well-defined organizational responsibilities and strict adherence to procedures and controls governing the processing of changes to the system, such as system maintenance, shall operate to ensure stability of the system in operation.

4. All system changes shall be properly authorized in writing and such authorizations shall be maintained with the system documentation.

5. The separation of duties required for control purposes shall include to the extent practical the following:

a. Computer operations group: Has responsibility to deliver to users products generated by the application systems, to assess problems, and to act as a liaison between users and the maintenance support group in resolving problems.

b. Maintenance support group: Has responsibility to accomplish and document changes or enhancements to meet user needs or to correct program errors detected within the group.

(1) Care shall be used, through use of formally approved and documented system change control procedures,

to protect against fraudulent or otherwise unauthorized changes to previously tested and accepted application systems and data bases.

(2) C o n t r o l procedures shall require proper analysis of requested changes.

(3) After the analysis is completed and documented, user and/or ADP management shall approve the changes before modifications are made.

(4) Within the maintenance support group, not all programmers shall have access to all application software.

(5) After any changes are made, the maintenance support group shall conduct appropriate tests and reruns of the application software to ensure that procedures and controls are working as intended.

c. User groups: Are responsible for ensuring, to the extent practicable, the integrity of data input, processing, and output. This responsibility includes making sure that internal controls and operating procedures are properly implemented, training and operating manuals are provided to appropriate personnel, operations are continually evaluated against the design requirements, problems are promptly communicated, and errors are promptly resolved. In addition, key duties in authorizing, processing, recording, and reviewing transactions shall be separated among individuals.

N. System Documentation

1. The system documentation shall be complete, current, and maintainable.

2. The documentation shall be of sufficient scope and depth to provide management, users, auditors, and system operation, maintenance, and modification personnel with an understanding of the design and operation of each component in the system and its integration with and relation to all other

components.

3. Documentation of the operating system shall be appropriately safeguarded and periodically updated so that it always shows actual operations.

4. System documentation shall include the requirements specified in chapter 2 of Volume 1 of this regulation.

5. Internal control objectives and techniques, pertinent aspects of transactions, and other significant events shall be documented.

a. Internal control objectives shall be logical, applicable, and complete.

b. Internal control techniques shall be effective and efficient in accomplishing the applicable objectives.

6. System documentation shall be available and easily accessible for examination.

O. Personnel

1. Accounting operations shall receive high priority by ensuring that each AO is supervised by a qualified, professional accountant.

2. Accountants shall be aware of, and adhere to, all prescribed accounting principles, standards, and related requirements.

3. All personnel in the operating AO shall receive adequate training to efficiently and economically accomplish their assigned responsibilities.

CHAPTER 10

MISCELLANEOUS

1001 INTERNATIONAL BALANCE OF PAYMENTS (IBOP) PROGRAM. All nonappropriated fund instrumentalities (NAFIs) are subject to the International Balance of Payments (IBOP) requirements in DoD Directive 7060.1 and DoD Instruction 7060.2. Those requirements will be eventually incorporated into Volume 3 of this regulation. Until then, NAF accounting offices should follow the requirements in the appropriate appendix.

1002 AUDITS

100201 Policy. It is DoD policy to provide adequate audit coverage of NAFIs. The primary objectives of such audits shall be to determine whether internal control systems are adequate, resources are safeguarded and managed economically and efficiently, and desired program results are achieved. Particular attention should be placed on identifying potential fraud, waste, or abuse in operations. To the extent possible, audits should be conducted on a system or functional basis, rather than on an activity basis, and the reliability and accuracy of ADP systems should be verified. The results of such system or functional audits should be made available to the NAFI community in the form of reports and/or internal control checklists. Department of Defense personnel, rather than certified public accounting firms, should be used for audits involving potential fraud or other serious improprieties.

100202 Scheduled Audits. Activities will normally be audited annually or as directed by the DoD Component heads. Audits may also be scheduled whenever circumstances warrant or directives require them. Policies regarding the audit of nonappropriated funds and related activities are prescribed in DoD Instruction 7600.6.

1003 C A S H M E T H O D O F ACCOUNTING

100301 General. This section prescribes a uniform cash method of accounting and reporting system applicable to small NAFIs. These procedures represent a single entry cash basis system of accounting and prescribe statements which will reflect the financial condition of the various activities on a standardized basis.

100302 Scope. NAFIs are required to use the accrual method of accounting unless specifically authorized by the DoD Components to use the cash method of accounting.

100303 Definitions. For the purpose of this section, the following definitions apply.

A. Income - All cash receipts.

B. Expenditures - Cash spent for authorized transactions.

C. Net Worth - The total of the fund at a given date, i.e., cash in bank, cash on hand, petty cash, and other authorized investments.

D. Non-expendable Property - Property which ordinarily retains its original identity during use, has a unit acquisition value of \$1,000 or more; and a life expectancy of two years or more. (Examples: furniture, pool table, television.)

E. Expendable Property - Property which has a unit value of less than \$1,000 and/or supplies and materials which are immediately consumed in use or become incorporated in other property, thus losing their separate identities. (Examples: Radio and TV tubes, baseballs, food and equipment valued below \$1,000.)

F. Cash Basis of Accounting - That system where only those transactions involving cash are recorded in the books of account.

100307 Petty Cash. A petty cash fund may be established when authorized by the installation commander. See paragraph 030201.

100308 Property and Equipment. Any property or equipment that is purchased with non-appropriated funds will be expensed at the time of purchase. Two types of property/equipment can be purchased, nonexpendable and expendable. However, for control purposes, only nonexpendable items need be accounted for on a property equipment inventory record unless otherwise directed.

100309 Non-Expendable Property Inventory. An annual physical inventory will be required of all non-expendable property owned. Quantities counted must be reconciled with quantities which appear on the stock records and the dollar value listed on the property/equipment inventory records. Discrepancies between the physical inventory and the property records will be investigated and reported to NAFI management on a timely manner. Adjustments will not be made until approved by the installation commander or a designated individual.

100310 Reporting Requirements. Activities will be advised of the applicable reports and reporting requirements by their program manager.

APPENDIX A**ACCOUNTING PROCEDURES FOR ARMY NONAPPROPRIATED FUND INSTRUMENTALITIES**

This appendix of the DoD Financial Management Regulation is for use by all nonappropriated fund accounting offices which use systems developed by the Department of Army. The appendix contains policies and procedures specific to those systems. The accounting policies and procedures contained in this appendix were formerly published in AR 215-5, that document is now obsolete. General or non-system specific policies and procedures are included in the core regulation and have been excluded from this appendix. For example, the requirement that nonappropriated fund instrumentalities (NAFIs) conform to generally accepted accounting principles is not system specific and applies to all DoD NAFIs. Therefore, it is included in the core regulation and excluded from this appendix.

This appendix supersedes all previously published policies and procedures. Therefore, in the event of conflicting instructions, the policies and procedures in the regulation itself should be followed.

CHAPTER 1

GENERAL INFORMATION

A0101 PURPOSE. This appendix prescribes a uniform system of accounting for Army NAFIs that is like a commercial system. It has standard financial statement formats to allow the operating results of NAFIs to be compared with each other and can be adapted to all NAFIs authorized by AR 215-1. This appendix applies to both manual and automated NAF accounting systems. The Nonappropriated Fund Information Standard System (NAFISS) is the only automated system authorized for Army NAF accounting outside USAREUR. NAFISS consists of seven subsystems: Mutual Data (MD), General Ledger (GL), Accounts Payable (AP), Accounts Receivable (AR), Inventory/ Stock Record (SR), Fixed Assets (FA), and Budget (BG). The MD, GL, AP, FA, and BG subsystems are mandatory for using NAFISS. The AR and SR subsystems are optional. MicroCADs is the standard NAF accounting system for USAREUR and consist of the following subsystems: General Ledger, Accounts Receivable, Accounts Payable, Fixed Assets, and Budget. All subsystems in MicroCADs are mandatory.

A0102 REFERENCES. Required and related publications and prescribed and referenced forms are listed in Attachment 1.

A0103 RESPONSIBILITIES.

A010301 Installation Commanders. Installation commanders will:

A. Fulfill the responsibilities required in A0201.

B. Make sure that adequate internal controls are set up to preserve the integrity of each fund.

C. Determine disposition of assets of dissolved CAOs (per A0207).

D. Appoint an official as point of contact between fund managers and the

servicing CAO when there is no local finance and accounting officer.

A010302 Defense Accounting Office. The Defense Accounting Office (DAO) will be responsible for control of the CAO except the consolidated CAO at Red River Army Depot.

A010303 Central Accounting Office. The central accounting office will do the accounting and supply those services needed to support its serviced NAFIs (see A0204).

A010304 As the representative of both the command and the DAO, the central accounting officer will perform those functions listed in A020201

A010305 Fund Managers. Fund managers of serviced NAFIs will:

A. Administer their own funds, except for formal accounting and reporting functions. They may consult with the CAO in interpreting their financial statements; however, fund managers will be solely responsible for actions taken based on interpretation of financial data supplied by the CAO.

B. Provide the CAO with the value of each month's ending inventory and conduct physical inventories as required.

C. Requisition purchases of merchandise and supplies.

D. Approve the establishment of change funds and petty cash funds. (See A040109 and A040111.)

CHAPTER 2

THE CENTRAL ACCOUNTING OFFICEA0201 ESTABLISHMENT OF A CENTRAL ACCOUNTING OFFICE.

A020101 Central Accounting Office. Each installation, community, or region will have a central accounting office (CAO) to do the accounting for all of its NAFIs. The CAO will give timely, standard accounting and reporting services. The CAO will service each NAFI unless an exception to policy is granted.

A020102 Organization and Funding. The CAO will be set up as a division of the DAO and funded and accounted for as part of the DAO except the consolidated CAO at Red River Army Depot. This CAO is a division of the NAF Directorate, DFAS-IN.

A020103 Services Provided. The CAO provides services that are normally provided by a commercial accounting office.

A020104 DAO. The DAO or designee will appoint a central accounting officer to account for the funds of the serviced activities and for funds entrusted to the CAO. The central accounting officer may be-

A. A GS-510 accountant paid from appropriated funds (APF).

B. A commissioned or warrant officer.

C. A NAF-510 NAF accountant.

A020105 Appropriated Fund Support.

A. Authorized APF Support. Appropriated fund support in addition to the salary of the central accounting officer is authorized under AR 215-1. The support can only be provided in the form of appropriated fund employees, appropriated funded supplies and materials, or through a contract issued by the appropriated fund procurement office. Allowable appropriated fund support is

calculated as follows: Total NAF CAO costs (excluding the central accounting officer position and NAF data automation costs), APF support-40%, NAF support-60%. If the CAO has GS employees other than the central accounting officer, 60% of the value of these GS salaries must be subtracted from the total allowable support. The 60% will be prorated among all NAFIs based on how total CAO costs are prorated, if they are prorated. APF support may be given to the extent funds and appropriated-fund civilian or military positions are available for positions specifically authorized.

B. ADP Cost. The CAO is authorized appropriated fund support for 65 percent of the CAO Automated Data Processing (ADP) cost. Refer to AR 215-1, app C, for details.

A020106 Additional 510-Series Accountants. If the total staff of the CAO is five or more, additional 510-series accountants will be needed to assist the central accounting officer. If the CAO services up to 149 departments, at least one more accountant is needed. At least one more 510-series accountant is needed when 150 to 224 departments are serviced. For each added increment of 75 departments (or fraction thereof), at least one more 510-series accountant is needed. A "department" in this formula is defined as the lowest level of accountability within a NAFI for which a separate income statement is produced. (This does not include unit funds.) The complexity of the serviced NAFI operations should be considered when applying this formula. APF positions for additional accountants will be established when the duties and responsibilities are authorized APF support by AR 215-1. Otherwise the positions will be staffed with NAF personnel. The extra accountants should occupy the following positions in the CAO:

A. First accountant-Assistant Central Accounting Officer.

B. Second accountant-Chief, Accounting and Control Branch.

C. Other accountants-Accounting and Control Branch Accountants or Chief, Pay and Examination Branch or Disbursing Branch.

A020107 Emergency Checking Account. When the installation is served by the consolidated CAO, an emergency checking account may be set up for an installation by the CAO. The disbursing agent should be the DAO. If there is no DAO, the installation commander may appoint a disbursing agent. The emergency checking account (GLAC 113) will be set up with a CAO check. (See A040108 for account restrictions.)

A0202 C A O A N D N A F I ADMINISTRATION In the general administration of CAOs and NAFIs, responsibilities involve specific tasks. Later chapters further detail such procedures for various types of funds. The basic administrative tasks are outlined below-

A020201 Central Accounting Officer Duties. The central accounting officer will:

A. Sign checks in payment of valid obligations of serviced funds after verifying bank account balances are sufficient for payment. The CAO can delegate check signing authority to an alternate.

B. On request from the NAFI and/or program manager, perform budget variance analysis and provide results to fund managers.

C. Prepare reports related to or included with the financial statements, coordinating data with fund and/or program managers.

D. Develop a fair method for prorating the CAO operating cost to serviced NAFIs.

E. Submit all requests for fund equity adjustments through command channels

to DFAS-HQ-A for approval. Also insure financial statements are footnoted to show any approved adjustments.

F. Ensure all routine interfund transfers and authorized debts between funds are liquidated within 30 days of the transactions unless interfund transfers including loans of more than 30 days are authorized by AR 215-1.

G. Evaluate change fund and petty cash fund balances not less than once a year to determine if amounts appear to be either excessive or inadequate and advise fund managers to authorize increases or decreases in balances as appropriate.

H. Meet with NAFI management at least monthly to discuss the financial reports and/or to give technical advice when the CAO is located on the installation served.

I. Prepare the CAO annual budget to include providing accounting and other costs data for inclusion in the appropriated fund budgets.

J. Direct day-to-day operations of the CAO. This is usually carried out through subordinate accountants, accounting technicians, and clerical personnel.

K. Advise subordinates on classification of transactions.

L. Plan and schedule accounting operations and computer processing.

M. Prepare requests to higher headquarters to change accounting policy or systems.

N. Advise the NAFI fund and/or program managers on the financial aspects of operations on their request.

O. Perform the following personnel management functions as a supervisor:

1. Schedule and approve leave.

2. Establish performance standards and appraise actual performance.

3. Counsel subordinates.

4. Initiate proposals for disciplinary action, as required.

5. Maintain production records.

6. Review position descriptions of subordinates for currency and accuracy.

7. Initiate or participate in the review and improvement of work methods and internal organization structure to achieve optimum results.

P. Ensure the CAO and serviced NAFIs comply with DFAS accounting policies and procedures and apply generally accepted accounting principles on a consistent basis.

Q. Perform a financial analysis of each activity's financial statement using tools and techniques discussed in chapter 11. The results of the financial analysis should be incorporated into a written narrative analysis and included with the financial statements once each quarter. However, management analysis is the responsibility of the NAFI manager. (See AR 215-1).

R. Ensure accounting functions are performed efficiently and at the lowest cost to serviced NAFIs.

S. Make disbursements only as permitted in chapter 5.

T. When notified of a change of NAFI managers, request that-

1. Reconciliations of all assets, inventories, and liabilities are prepared, reviewed by both the outgoing and incoming NAFI managers. Both NAFI managers will verify the validity of the reconciliations and the financial statements. (See Figure 2-1)

2. Notification of the transfer be sent to all banks, security dealers and/or investment companies, insurance companies, and payroll offices as deemed appropriate.

3. Incoming and outgoing NAFI managers each receive a copy of the certification of fund transfer, the related financial statements, and all recommendations and command responses.

4. Transfer of accountability is performed at end of month if possible. If performed during the month, prior month financial statements will be used for the transfer.

A020202 Duties of CAO Personnel.
Central accounting office personnel will:

A. Maintain all books of original entry (journals and registers), the general ledger, and related subsidiary ledgers.

B. Maintain fixed asset records.

C. Prepare all disbursement vouchers and checks after assuring availability of funds. (This includes payrolls and paychecks, if the CAO is not serviced by the Central NAF Payroll Office (CNPO).)

D. If not serviced by the CNPO, maintain individual earnings records and issue IRS Forms W-2 for employees of the CAO and serviced NAFIs; combine payroll data received from funds with CAO employee data; and prepare, summarize, and post to proper records the payroll for all employees. (Only one Federal employer's ID number will be used for all personnel paid by the CAO.) If serviced by the CNPO, the CAO serves as the point of contact between the NAFIs and the CNPO. (Installations without a CAO will designate, in writing, to all NAFI managers and the CNPO, the point of contact for the installation.) The CAO posts payroll costs to CAO and NAFI records, whether serviced by the CNPO or not.

E. Prepare required periodic financial reports (The CAO gives the fund

manager ratios and percentages and narrative analysis thereof. The CAO also gives variances in relation to established standards or approved budget goals upon request).

F. Prepare other information when required by management or higher authority. The CAO may provide technical advice, but will not prepare other NAFI budgets.

G. Prepare financial reports for all serviced funds and send them to NAFI managers for review. The deadline for completion of these statements is 6 workdays after the CAO receives the months' final documents from NAFI management. For the consolidated CAO at Red River Army Depot, the deadline is 8 workdays after receipt of the final documents. A major departure in NAFI performance from the previous periods should be discussed with the NAFI managers prior to report distribution.

H. Prepare an annual operating budget for the CAO and a schedule that shows the estimated amounts to be assessed each serviced NAFI. The CAO also prepares comparative financial statements of the CAO operations. The CAO analyzes costs in relation to prior year costs and projected (budgetary) costs.

I. Reconcile the bank accounts of serviced NAFIs monthly. Review daily account balances shown on monthly bank statements to ensure that insurance and collateral are sufficient.

J. Compute the cost of operating the CAO for each NAFI and collect monies due.

K. Maintain DA Forms 1991 (Stock Record Cards), when NAFI management determines it is feasible and cost effective.

L. Arrange for an independent inventory observer to observe the required fixed and resalable merchandise inventories. The consolidated CAO at Red River will request that the installation NAFI management arrange the inventory for those NAFIs it serves.

M. Perform monthly reconciliation of unpaid Government liabilities with corresponding records of receivables from installation NAFIs on the books of the DAO Accounting Division.

N. Review transmittal letters and attached documents for completeness and accuracy. Review daily activity reports to ensure accuracy and receipt of proper supporting documentation.

O. Obtain daily cash deposit data from the local depository bank and makes fund transfers to the central bank. CAOs may use alternative methods to determine deposit data and account balances available for transfer to the central bank. When the accounting is not performed on the installation, the CAO may delegate the function, in writing, to NAFI personnel on site.

P. Notify NAFI managers of missing or delayed fund deposit documentation.

Q. Review and analyze banking charges annually to determine if services are needed and charges are reasonable. Request the assistance of the NAFI Financial Management Division and provide review results to the NAFI manager for appropriate action.

R. Prepare reports concerning local bank deposits per AR 215-1.

A020203 NAFI Manager Tasks. NAFI managers-

A. Make bank transfers of funds when authorized in writing by the CAO to do so. NAFI managers do not sign checks.

B. Collect monies and make bank deposits, and furnish the CAO with all required documentation of cash receipts and deposits. (See chap 4 for requirements.)

C. Take month-end physical resale merchandise inventories and send documents to the CAO within 2 working days, to arrive by the third work day of the following month.

D. Take action to collect dishonored checks and delinquent accounts receivable.

E. Maintain change funds and ensure that checks are cashed only for members or other authorized persons.

F. Ensure invoices mailed by vendors are sent directly to the CAO, except invoices for NAF insurance programs described in AR 215-1.

G. Furnish the CAO with minutes of council meetings, where a council exists. They furnish approved budget and other information to the CAO, as required, for accounting and reporting purposes.

H. Maintain petty cash funds and ensure vouchers are prepared to support all disbursements from such funds. Petty cash must be replenished at the end of each month. Negative submissions are required.

I. Submit a formal written request for any cash advance, including for travel and tour events, to the CAO. (This request will show the amount of the advance. It will include an agreed-upon time period (e.g., 24, 72 hrs) for submission of proper receipts and documents.)

J. Send daily activity reports, purchase orders, receiving reports, delivery tickets, and other required supporting documents to the CAO. Sequentially numbered daily transmittal letters will be used. All documents will be sent within 2 working days of receipt or issue. The CAO must receive the documents by the third work day after receipt or issue. The consolidated CAO at Red River Army Depot will receive these documents by the fifth work day after receipt or issue.

A0203 DOCUMENT CONTROL.

A020301 Source Documents. NAFIs will send all source documents to the CAO within two working days after receipt or issue but the CAOs must receive them by the third work day after receipt or issue. The consolidated CAO at Red River Army Depot must receive

documents by the fifth work day after receipt or issue. CAOs will date-stamp all documents to track those that were received late.

A020302 Electronic Media. If electronic media is used to transmit DARs to the CAO, original documents do not have to be sent to the CAO unless the CAO ask for the documents. However, the original documents must be kept on file for three years after close of the fiscal year.

A0204 ACCOUNTING POLICY FOR A CAO. Total CAO operating costs will be prorated to serviced funds based on percentage of workload for each fund. The expense and liability will be recorded on the serviced funds' books at the end of each month and receivables and income will be recorded on the CAO's books. The CAO will not charge itself for maintaining accounting records. The portion to be charged to each serviced fund will be based on the number of documents processed for that fund, relative time spent on that fund, or by another equitable proration method. Volume of sales and number of personnel employed by a fund are not considered workload factors for this purpose. Costs that can be directly traced to a particular fund will be charged to that fund.

A0205 FINANCIAL STATEMENTS AND SCHEDULES OF OPERATING EXPENSES. CAOs will prepare an income statement each month. The statement will--

A020501 Summarize the results of financial operations and financial condition of the CAO, to aid CAO management in the control and planning functions.

A020502 Provide each serviced NAFI with a detailed statement of the total operating expenses allocated to the NAFIs.

A020503 Serve as a document to support the reimbursement to the CAO from serviced NAFIs.

A0206 CAO COST PERCENTAGE. The CAO cost percentage measures NAF CAO expenses as a percentage of the total revenue of

serviced NAFIs. The CAO cost percentage is heavily influenced by the work environment. Some of the factors affecting it are labor costs, changes in NAFI revenue, and the complexity of the serviced NAFIs. The CAO cost percentage is an important indicator, but it doesn't measure quality of CAO services. The DFAS-established CAO gross cost goal is not to exceed 2.0% of total NAFI revenue. Gross CAO costs include all NAF expenses including the salary and benefits of Central Accounting Officers paid from NAF.

A0207 DISSOLVING A CAO. A CAO will be dissolved when the installation is inactivated or abandoned or the NAF entities can be more effectively serviced by a CAO at another installation. Approval to dissolve a CAO must be requested from DFAS-IN-AN. When a CAO is dissolved, all NAF purchased assets will be transferred to the Consolidated DFAS NAF CAO at net book value. APF purchased assets will be transferred to the local DAO.

CHAPTER 3

THE NAF ACCOUNTING CLASSIFICATION CODE SYSTEMA0301 SCOPE OF THE SYSTEM

A030101 Uniform System. A uniform system for coding transactions has been developed to insure consistency in financial management procedures as well as flexibility in application to either manual or mechanized accounting records in the NAF area.

A030102 Accounting Classification Code. The NAF accounting classification code is a 12-position code. This code shows the major command, the installation, the NAFI, the program code, the location, the department, and the general ledger account related to the transaction. It is made up of six parts, in the following order:

- A. A two-position Command and Installation code.
- B. A one-position NAFI code.
- C. A two-position program code.
- D. A two-position location code.
- E. A two-position department code.
- F. A three-digit general ledger account code (GLAC).

A030103 Master Chart of Accounts. This chapter has the master chart of accounts to be used by commands having the following types of NAFIs: resale and revenue-producing; military general welfare and recreation; supplemental mission services; and civilian employees general welfare and recreation. Each NAFI should select those accounts applicable to its operations. Requests for additions to the chart of accounts should be submitted through command channels to DFAS-HQ-A.

A0302 MAJOR COMMAND AND INSTALLATION CODE. This two-position

alphabetic code shows the command and installation, military community, or other area within the command. AR 215-1 lists the standard codes.

A0303 NAFI CODE. This one-position code shows the NAFI. AR 215-1 lists the NAFI codes.

A0304 PROGRAM CODES. The program code is a two-position code that immediately follows the NAFI code. (For NAFISS input, use ""00" instead of the program code. See the NAFISS user's manuals for the detailed instructions). Program codes show the various business activities within a NAFI. AR 215-1 lists Standard program codes.

A0305 LOCATION CODES. The location code is a two-position code that immediately follows the program code. Facilities/annexes within a program code will be named by a unique location code. The location codes are assigned locally.

A0306 DEPARTMENT CODES. The department code is a two-position code that immediately follows the location code. This code shows the activities of a NAFI for which income and expenses are recorded and reported on the NAFI Income Statement and links the income or expense transactions to the proper department. Department codes are restricted for use. Requests for additional department codes will be sent to the proponent for AR 215-1 for approval. An information copy of the request will be sent to DFAS-IN. AR 215-1 lists standard department codes.

A0307 GLACs. The GLAC is a three digit numeric code that immediately follows the department code. The GLAC shows the general ledger account. The GLACs are listed below in numerical sequence. For their descriptions, see Attachment 2 in this appendix.

Current Assets**Cash**

101-US Cash.
102-Foreign Currency Cash.
103-US Payroll Cash.
104-Foreign Currency Payroll Cash.
105-Cash Change Fund.
106-Foreign Currency Conversion Fund.
107-US Petty Cash.
108-Foreign Currency Petty Cash.
109-Bingo Petty Cash.

Income and Expense Summary

900-Income and Expense Summary.

Asset, liability, and equity accounts (GLACs 101-292) normally have a department code of "00". In NAFISS GLACs 151, 155, 156, and 900 will always have a department code of G1. GLAC 141 will always have a department code of W1. GLACs 142, 143, and 144 will have the applicable department code assigned.

CHAPTER 4

ASSETSA0401 CASH AND INVESTMENTSA040101 Cash Receipts.

A. Safeguarding and Depositing. Cash receipts will be safeguarded and deposited by the NAFI in accordance with AR 215-1. The bank deposit slip, properly identified with the NAFI and activity, will be prepared in triplicate. A copy will be kept by the activity preparing it; the bank will keep a copy; and a bank-receipted copy will be sent to the CAO. The copy sent to the CAO will normally be attached to the daily activity report (DAR), but local conditions or procedures may make it necessary for the deposit slip to be separated and sent to the CAO ahead of the DAR. CAO will send deposits from the local bank to the Central Bank through Electronic Funds Transfer (EFT) on a regular basis except when delegated to on-site NAFI personnel as outlined in A020202. O.

B. Receipt Voucher. DA Form 1992 (Nonappropriated Fund Receipt Voucher) or other sequentially numbered receipt document will be used to receipt for cash when the transaction is not recorded in cash registers or on sales slips. A record will be made of the person and section to whom all books of DA Forms 1992 are issued. The original of completed forms will be given to the person from whom the collection was made; the duplicate attached to the DAR and sent to the CAO; and the triplicate will remain in the book in numerical sequence. The person making the collection will sign the receipt; the signature must appear on all copies. If a receipt is spoiled, mark "VOID" across the face of all copies. Attach the original and duplicate to the DAR. The CAO will maintain records to ensure that all receipts are received and accounted for.

C. Incoming Mail. Someone in the control section will open all incoming mail in the CAO. When checks are received, DA Forms 1992 will be prepared. The checks will be stamped

"FOR DEPOSIT ONLY" on the back, immediately. The duplicate DA Form 1992 should go to the person remitting the check, however, unless requested by the remitter, it will not be mailed to him or her. It will remain in the book with the triplicate. The original will be attached to the DAR. A deposit will be made as soon as possible. Normally the CAO will not receive cash, but if it happens, a deposit should be made as soon as possible. Where large volumes of checks are received daily at the CAO, instruments other than the DA 1992 may be used as long as strong internal controls are in place and there is a record of all checks received.

D. Daily Cashier's Record. DA Forms 4082 (Daily Cashier's Record) will be prepared by all departments of the fund. Register readings and change fund controls will be in accordance with 215-1. Cash register tapes and copies of all receipt vouchers, sales slips, guest checks, cash collection sheets, and other documents will be attached to the DA Form 4082 as supporting documentation. Sales slips should be segregated for posting of charges to members' accounts.

E. Vending or Amusement Machine Collections. DA Form 4083-R (Vending or Amusement Machine Collections) will be prepared in duplicate each time cash is removed from fund-controlled vending or amusement machines. It will be signed by the person representing the command plus the fund or vendor representative. The original DA Form 4083-R will be turned in with the cash and eventually attached to the daily activity report going to the CAO. The duplicate of the form will be sent directly to the CAO by the fund manager or the person designated by the fund manager. The CAO will check it against the original coming with the DAR. The CAO will maintain a control log to assure receipt of all DA Forms 4083-R. A blank copy of DA Form 4083-R is located at the back of this publication for reproduction.

A040102 Consolidated Daily Activity Report.

A. Daily Activity Report. The consolidated daily activity report is a summary of all the cashiers' and other operating reports of each department by location, DA Form 4082 and bank deposit slips prepared in each activity for the day will be sent to the CAO with the consolidated daily activity report. Discrepancies between the consolidated daily activity report and the supporting documentation will be resolved before submission to the CAO. All NAFIs, locations or departments will prepare a consolidated daily activity report for each day of operation. However, if the weekly volume of business is \$500 or less, activity reports may be prepared weekly rather than daily. Even if activity reports are sent weekly, a report is required on the last business day of each month. If no business has occurred since the last report, a negative report will be submitted. All deposits made during the week will be consolidated on the weekly activity report.

B. Content of Report. There is no DA prescribed format for the daily activity report. However, it must contain at least the following information: date of report, day(s) covered by the report, location code, program code, all revenue received in the period covered, cash overages and shortages, name and signature of person preparing form, and name and signature of person verifying the data.

A040103 Foreign Currency Transactions. Transactions in foreign currency will be recorded at the equivalent dollar rate. The rate of exchange to the US Dollar will be shown on the document evidencing the transaction. A subsidiary ledger will be kept in the foreign currency so that there is a running balance of the amount of foreign currency on hand. This is usually done in the disbursing section. Local procedures for a theater of operations, including rates of exchange, are established by the theater command. The procedures prescribed are generally applicable to NAF and must be followed. Gain or loss on use of foreign currency will be determined and recorded at the end of each month. Amounts such as the changes in the

dollar value of foreign currency will be determined and recorded at the end of each month. Amounts such as the changes in the dollar value of foreign currency petty cash funds need be changed only at the end of the fiscal year unless significant. Foreign currency petty cash and change funds should be authorized and accountable as an amount of the foreign currency, e.g., the foreign currency petty cash fund should be stated as 100,000 units of foreign currency; not \$100 worth of foreign currency. The CAO can then adjust the dollar value when necessary on journal voucher.

A040104 Checking accounts.

A. Separate Checking Account. Each NAFI must have a separate checking account. Under no circumstances will cash of one NAFI be used to pay obligations of another. The CAO will not sign a check in excess of the checking account balance.

B. Monthly Bank Statements. The bank will be requested to mail or deliver monthly bank statements directly to the CAO. The CAO will reconcile each bank statement to the accounting records monthly. Use of DA Form 5353-R (Bank Reconciliation Worksheet) is optional. The CAO will also check the bank statement for any electronic transfers of funds they weren't aware of. Unreconciled discrepancies of \$1 or less may be adjusted without further research.

C. Checks Outstanding. When checks are outstanding for 4 months after the issue date, a follow-up will be required. A stop payment order will be issued for all checks outstanding over 6 months unless the bank has a stale date policy, the check has a stale date printed on it, or the service charge for a stop payment order is more than the check amount.

D. Bank Account Signatory. The person appointed as a bank account signatory will sign the forms prescribed by the bank and send them to the bank.

E. Cash In Bank-Payroll.

1. Unclaimed Checks.

Payroll checks that have been unclaimed for one month past issue date will be canceled. If the check was by the CNPO, it will be sent to that office for proper cancellation. A liability (GLAC 209) will be established for a period of 5 months. The contra debit will be to GLAC 101 or 102. At the end of the 6-month period, the amount will be transferred from GLAC 209 to GLAC 825.

2. Outstanding

Checks. When checks are outstanding for 6 months after the issue date, a stop payment order will be issued. The offsetting increase in payroll cash will be credited to GLAC 825. The stop payment order need not be made if either-

a. The servicing bank has a stale date policy; or

b. The service charge is greater than the check amount. In the case of the CNPO check, the amount will be reimbursed to the participating NAFL.

F. Signing Checks. The only people authorized to sign checks or withdraw funds from the IMWRF bank account are authorized personnel within the CAO and personnel outside the CAO who are authorized in writing by the CAO to do so. Dual signatures are required when separation of duties is not possible and when the amount of the check exceeds the signer's fidelity bond limit.

A040105 Blank Check Stock.

A. Prenumbered and Storage. Checks will be sequentially prenumbered by the printer and imprinted with the words "an instrumentality of the United States". Blank check stock will be inventoried upon receipt, stored in a locked, fire-resistant safe with a combination three-tumbler lock, and issued for each day's business using a signed register. The safe must not be easily movable or accessible to check writing personnel.

B. Stock Pile. Blank check stock on hand should never fall below a 90-day supply. A separate record is required for each bank

account. The CAO may designate someone to perform the duties of keeping the records and controlling the blank check stock, but it cannot be one of the check writers or signers.

1. The CAO or designee will sign on receipt of new stock from the bank or printer; the check writer will sign for blank stock issued; and the CAO or designee will sign for any blank stock returned by the check writer. The form must be completed and signed at the time the checks are received, issued, or returned.

2. The following is an alternate method which is useful when a CAO has several bank accounts:

a. A form similar to a stock record will be maintained for each bank account.

b. Another form is prepared listing all checks issued at the beginning of the day. The person receiving the blank checks will sign the form acknowledging receipt.

c. At the end of the day, the unused checks will be noted on another issue form and the person designated by the CAO will sign the form acknowledging receipt. The checks will be returned to stock. The number of checks used will be posted to the stock record at least weekly and at the end of the month.

A040106 Check Signing Equipment. There are three components to check-signing equipment: a signature plate, a key to the machine, and the machine itself.

A. The signature plate must be in the custody of the signatory. When not in use, the plates will be stored in a container with a lock.

B. The key to the machine must be in the possession of the signatory. A designated representative will be authorized to sign checks during the signatory's absence. When the signatory is to be absent, the designee is given

the lock and machine keys and signature plate for which he signs a receipt.

C. A duplicate machine key and the key or combination to the container holding the plates will be placed in a sealed envelope and stored in a safe that does not contain the plates.

D. A log will be maintained to record machine usage. Whenever the machine is operated, the signatory or authorized operator will enter the beginning and ending readings, date, and their initials on the log.

E. When a change of signatory occurs, destroy the signature plates with the destruction witnessed by two other persons. A certificate of destruction will be prepared and signed by the two witnesses and the successor signatory.

A040107 Disbursements.

A. Each of the following steps in the disbursement procedure will be done by a different person:

1. Authorization of payments.
2. Preparation of checks.
3. Signing of checks.
4. Reconciliation of bank accounts.
5. Blank check storage and reconciliation.

B. Spoiled checks will be made non-negotiable by cutting off the signature block and writing "VOID" across the face of the check. Voided checks will be filed in the canceled check file.

C. Checks will be signed by authorized signatories. Blank checks will not be signed before preparation.

D. Alternate signatories should be appointed so that checks can be signed on a timely basis.

E. The normal method of delivery of checks is by mail, however, they are frequently picked up in person. The person delivering checks must ensure that the person picking up a check is the payee or has been designated to pick up the check.

A040108 Emergency Checking Account. This type of checking account may be set up by installations served by the consolidated CAO, according to A020107. These accounts will be set up at the Central Bank, separate from the main checking account. The account will be recorded under GLAC 113-Emergency Checking Account. Any such accounts will be subject to the following restrictions:

A. The disbursing officer will maintain adequate internal control procedures for cash. (See AR 215-1, chap 11.)

B. The account will be limited to emergency use only. (Examples are last minute changes of entertainment groups that require one check be voided and a replacement issued, club cash door prize drawings, and unforeseen petty cash replenishment requirements.) Discrepancies and evidence of misuse of a special account should be reported to the installation commander at once.

C. The account balance will not exceed \$5,000 per NAFI. The amount of the cash advances to the NAFI will be reviewed quarterly by the CAO to ensure cash is not in excess of emergency needs. Additional cash requirements should be submitted through command channels to DFAS for approval.

D. The local installation DAO disbursing agent will maintain control and signature authority over the account.

E. The fund manager will supply the DAO disbursing agent the proper supporting documents. Within 48 hours of the transaction,

the disbursing agent will transmit the supporting documents to the CAO.

F. The account will be replenished by mail deposit or wire transfer, as required. Suspenses and cash replenishment requirements will be accomplished by the CAO and the serviced installation by the end of each month. Funds will be transferred from the main checking account to replenish the emergency account.

G. Bank statements will be mailed directly from the bank to the servicing CAO for reconciliation.

A040109 Change Funds. These funds will be used to make change and cash checks. Cash received from operation may be used to replenish the fund at the end of the day as long as daily income is deposited in total and all checks cashed from these funds are deposited daily. In no case will the custodian exchange dollars for foreign currency.

A040110 Foreign Currency Conversion Funds. These funds will be used to convert dollars to foreign currency as a service to members and customers. The fund will not be used to convert foreign currency to dollars. The dollars collected will be deposited daily or when the fund is replenished and a check issued by the CAO to purchase or obtain foreign currency. The deposit slips should be kept and presented to the CAO when the fund is replenished. Conversion fund rates will be based on the monthly conversion rate established by the theater commander. As a minimum, reimbursement should be requested on the last business day of the month.

A040111 Petty Cash Funds. Petty cash is used for handling minor disbursements including commissary purchases and voluntary child care expenses. A fixed amount, designated as petty cash, is advanced to an appointed individual. Payments are made by the appointed individual and a petty cash voucher is completed to support each transaction. Periodically, a summary is prepared and sent to the CAO. The petty cash fund must be cleared out at the end

of each accounting month. The CAO issues a check payable to the petty cash fund custodian to reimburse the petty cash fund and the vouchers are charged to the appropriate expense accounts. The following policies and procedures apply to petty cash:

A. The NAFI fund manager will appoint individuals to act as petty cash agents. Authorization document will specify by name who is the petty cash fund custodian. Each appointment will be covered by position bond.

B. The amount of a petty cash fund will not exceed one month's requirements.

C. Any one transaction will not exceed \$500. Transactions will not be fragmented to circumvent this limitation. Violations will require commanders approval prior to replenishment of the petty cash fund by the CAO.

D. If cash is given as bingo prizes, a separate petty cash fund will be used for bingo.

E. In foreign locations, an activity may have one petty cash fund in the local foreign currency as well as one in dollars. If an activity gives cash bingo prizes both in dollars and foreign currency, two bingo petty cash funds should be established.

F. There is no limit on the number of petty cash funds a NAFI or Location Code may be authorized, but any one petty cash agent will have as a maximum one non-bingo fund in dollars, one non-bingo fund in foreign currency, one bingo fund in dollars, and one bingo fund in foreign currency.

G. Petty cash funds will not be used for cashing checks, paying salaries and wages, travel payments, or travel advances. Occasional reimbursement for local mileage expense or purchases of gasoline for use in NAFI or privately owned vehicles while on NAFI business is authorized. Local travel payments must be supported by a local travel voucher, DD 1164.

H. Each petty cash fund will be reimbursed at least monthly at the end of the month.

I. The CAO will expedite replenishment of petty cash funds.

J. DA Form 1994 (Petty Cash Voucher) will be used to evidence each petty cash transaction. They will be numbered sequentially and controlled by maintaining a record showing to whom they were issued. Original DA Forms 1994, including those voided, will be accounted for by the person responsible and sent to the CAO when seeking reimbursement. The IMWRF manager or designated representative will sign the approval block of DA Form 1993 prior to forwarding to the CAO for replenishment. When the disbursement is made from the petty cash fund, all receipts and other supporting papers will be stamped "PAID" by the petty cash fund agent. DA Form 1993 (Petty Cash Summary Voucher) will be used to summarize the DA Forms 1994 and serve as a cover voucher when seeking reimbursement from the CAO. The DA Form 1993 is an envelope form and the applicable DA Forms 1994 and supporting documents will be enclosed in the DA Form 1993.

K. Normally, NAFIs are not charged sales taxes, however, in some cases it is more expedient to pay the tax than apply for exemption. Sales taxes up to \$10 on a transaction may be paid from petty cash provided the petty cash agent includes a statement that attempts were made to gain exemption.

L. Use of petty cash for making purchases through money orders or COD is prohibited since this is a circumvention of normal procurement procedures. Petty cash funds are to be used for payment of incidental expenses for which payment by check is not feasible.

A040112 Customer Refunds. NAFI activities may issue cash refunds directly from the cash drawer. Refunds of more than \$50 will normally be made by check, but the local command may decide the maximum amount the

various NAFI activities can refund to customers. Refunds for charge sales will be made as a credit to the charge account. Refunds for credit card sales will be made by credit memo. Cash and check sales may be refunded without a holding period. Proof of original sale/purchase must accompany any request for refund.

A040113 Securities and Investments.

A. ADA Form 4084-R (Investment Register) will be maintained as a subsidiary record to GLACs 115, 116, 117, and 187. This record will be reconciled to the control account each month. DA Form 4084-R is located at the back of this volume and will be reproduced locally on 8½ by 11-inch paper.

B. Adjustments are required to show gain or loss to the value of securities at time of sale. This is done by a debit or credit to the control account for the change in value; an offsetting credit or debit is made to miscellaneous income or expense account. If required, a statement may be prepared at year end, comparing current market value with cost.

A0402 RECEIVABLES.

A040201 Subsidiary Records. The CAO will keep subsidiary records for each member, customer, concessionaire, or other person or activity that owes the NAFI. Aging of accounts receivable will be done and given to the NAFI fund manager.

A040202 Billeting. The CAO will not keep detailed accounts receivable subsidiary records for billeting operations if-

A. Billeting gives a copy of all daily check-in and check-out folios to the CAO including voided folios.

B. The folios are prenumbered.

C. At month end, Billeting gives the CAO a list by folio number of all guests still in the facility and the amount due from each guest.

D. The CAO will post the total of daily room charges and cash collections from the daily activity reports. All unpaid guest charges will be recorded in GLAC 129, Guest Ledger Receivables. Do not transfer the amount of unpaid charges after the customer checks out of the billeting facility to GLAC 121, Member Receivables.

E. At month end the CAO will account for all folio numbers and reconcile the general ledger account balance with the Billeting list of accounts receivable.

F. This paragraph applies to Billeting Operations using the Housing Operations Management System (HOMES). If Billeting uses HOMES, the CAO will not keep the detailed accounts receivable subsidiary or receive copies of daily check-in and check-out folios. The CAO will receive the HOMES reports identified below to substantiate Billeting transactions recorded on the DAR.

1. The CAO will record room charge income on a daily basis. The CAO will receive the following HOMES reports on a daily basis from Billeting to support the room charge income recorded on the DAR: Night Audit Room Postings, Room Postings, Telephone Postings, and Miscellaneous Postings. The total by department from the Night Audit Room Postings and Room Postings reports will be recorded in GLAC 501. The total telephone charges for each department from the Telephone Postings report will be recorded in GLAC 504 or 537. Billeting must identify the GLAC for the items listed on the Miscellaneous Postings report if the total for each department.

2. The CAO will record customer credit card payments as a debit to GLAC 139 and a credit to GLAC 129, if the credit slips are redeemed by the credit card company. These payments are shown on the HOMES Invoice Maintenance Report. The CAO will receive a copy of this report on a daily basis to support the amount recorded in GLAC 139 on the DAR. Billeting must identify the credit card payments on this report. This report also shows adjustments to amounts due from guests who

have checked out with an unpaid balance. Billeting must also identify these adjustments and the GLACs they are to be recorded in.

3. The HOMES Pay Postings report lists all cash received from in-house guests. The CAO will receive a copy of this report on a daily basis to support the amount recorded in GLAC 101 on the DAR. The total amount of payments on this report will be credited to GLAC 129. The HOMES Accounts Receivable Payments report lists the amounts received from guests who checked out with an unpaid balance. This report also includes the payments received from credit card companies. Billeting must identify which payments apply to GLACs 129 and 139, respectively.

4. The HOMES Refund Postings report lists all cash refunds. The CAO will receive a copy of this report on a daily basis to support the DAR.

5. The HOMES Guest Ledger Report is the detailed subsidiary ledger for in-house guests. This report is produced on a daily basis and shows the charges, payments, and outstanding balance for each guest. Separate totals are shown at the end of the report for guests with debit and credit balances. The CAO will receive the report produced for the last day of the month to substantiate the balance in GLAC 129. The total of the credit balances on this report will be recorded as unearned income, debit GLAC 129 and credit GLAC 263. This entry will be reversed at the beginning of the next month.

6. The HOMES Accounts Receivable Balances report is produced on request and shows the amounts due from customers who checked out with an unpaid balance. This report includes the amounts due from credit card companies. The CAO will receive a copy of this report for the last day of the month to substantiate the balance in GLACs 129 and 139.

7. The HOMES Aged Trial Balance Report is produced on request and is the aging schedule for amounts due from customers

who checked out with an unpaid balance. This report also ages the amounts due from credit card companies. The CAO will receive this report for the last day of the month and use it to complete Financial Statement Supporting Schedule.

A040203 Uncollectible Accounts. A receivable (GLACs 121-140) may be considered uncollectible when there is little chance of collecting it. Accounts for which no collection has been made in the past year will be considered uncollectible. If a receivable is deemed to be collectable, but collection will be delayed, the CAO should document the collection process and justification for not writing off a valid receivable. Receivables from other federal government entities will not be written off unless there is no chance of collecting the balance. The fact that an account is considered uncollectible does not prevent continued collection efforts by the fund manager. The CAO will write off monthly all accounts on which no collection has been made in the past year and let the NAFI fund manager and installation commander know of them. This action does not prevent Financial Management Division (FMD) from continuing efforts to collect delinquent accounts. A fund manager may choose the direct write-off method or the allowance method of accounting for uncollectible accounts. If the method is changed, the approval of the installation commander or equivalent is required.

A. Under the direct write-off method, accounts receivable considered uncollectible will be written off by debiting GLAC 661 and crediting the applicable receivable account.

B. Under the allowance method, an estimated bad debt amount is recorded as a debit to GLAC 661 and a credit to GLAC 134 each month. When a specific account is written off, debit GLAC 134 and credit the applicable receivable account. The following procedures will be used to establish and continue allowances for doubtful accounts:

1. To establish an allowance, find the average of the actual bad debt expenses each year for the past three years. Divide this by twelve to arrive at a monthly figure. Record this amount each month during the fiscal year as a debit to GLAC 661 and a credit to GLAC 134.

2. After the initial year, use prior year records (at least three years) to arrive at an estimated amount that should be recorded for the year. Divide this by twelve to arrive at the amount to record in the allowance account at the end of month (debit GLAC 661 and credit GLAC 134).

3. Alternate methods may be used to arrive at the allowance entry, however, it must be able to stand up to scrutiny. Most intermediate accounting text books and accounting handbooks give various methods of computation.

C. IMWRFs may take part in the Air Force's commercial debt collection contract. FMD will provide the necessary information for accounting entries on a DAR to the CAO. No accounting entries are required when the receivables are transferred to the contractor. The contractor will keep a 25% commission and forward the remainder to the installation. The following entry will be used when FMD receives the monthly check from the contractor, which includes interest income and unidentified payments and specifies the amount the contractor kept for his commission.

DR 101-US Cash

DR 751-Collection Agent Expense

CR 12X-Various Receivables

CR 801-Interest Income

CR 825-Miscellaneous Other Income

To record monthly check received from contractor. Contractor's register of collection and deposit ticket serve as supporting documentation.

D. The above instructions do not preclude the CAO from writing off receivables which are over 1 year old. If the contractor makes collection on accounts previously written

off, the CAO will reverse the entry used to write off the receivable.

E. For billeting funds using the HOMES system, the general ledger write-off entry cannot be recorded by the CAO until the accounts are deleted from the HOMES system by the billeting fund personnel. The billeting fund should report account deletions through the HOMES system on a daily activity report and attach a copy of the CAO write-off letter verifying which accounts were written off so that the CAO can record the write-off entry in the same accounting month the accounts are deleted from the HOMES system.

A040204 IRS Tax Refund Offset Program.
Army NAFIs may participate in the U.S. Treasury Department's income tax refund offset program. AMWRF/CFSC will purchase the receivables from NAFIs at a discounted rate and try to collect from the IRS. The following are accounting entries to record the purchase of uncollectible accounts receivable by AMWRF/CFSC. When a letter of acceptance is received by IMWRF, FMD will notify the CAO. The supporting document for the accounting entries is the letter of acceptance from CFSC.

A. Accounting entries for IMWRF.

DR 661-Bad Debt Expense or
DR 134-Allowance for Doubtful Accounts
DR 136-Inter NAFI Receivable
CR 12X-(Various Receivables)
To establish receivable for sale of uncollectible accounts receivables to AMWRF/CFSC and expense bad debts.

1. When CAO is notified that cash was transferred to the IMWRF's account, record the following entry. Letter of acceptance will specify date of cash transfer.

DR 101-US Cash
CR 136-Inter NAFI Receivables
To record receipt of cash from sale of uncollectible receivables.

2. In cases where the receivables were previously written off, record the following entry.

DR 136-Inter NAFI Receivables
CR 661-Bad Debt Expense
To establish receivable for sale of uncollectible receivables to AMWRF/CFSC. Accounts were previously written off.

B. Accounting entries for AMWRF.

DR 799-Miscellaneous Operating Expenses
CR 232-Inter NAFI Payables
To record purchase of receivable (at cost) and establish liability to IMWRF.

DR 232-Inter NAFI Payables
CR 101-Cash
To record payment to IMWRF for receivable.

1. When the debtor responds to notification of pending action by submitting a partial payment.

DR 101-Cash
CR 599-Miscellaneous Operating Income
To record receipt of partial payment on uncollectible receivable purchased from IMWRF.

2. When IRS collected offset against refund.

DR 101-Cash
CR 599-Miscellaneous Operating Income
To record receipt of IRS offset.

3. When IRS subsequently approves spousal claim.

DR 599 - Miscellaneous Income
CR 101 - US Cash
To reduce income previously reported as a result of IRS offset and establish liability to DFAS for amount IRS withheld for injured spousal claim.

DR 201 - Accounts Payable
CR 101 - US Cash

To record payment to DFAS for amount IRS withheld for spousal claim.

A040205 Dishonored (Returned) Checks.
 Arrangements will be made with the bank to have dishonored checks returned directly to the CAO. Upon receipt of returned checks, they will be photocopied (front and back), suspenses will be established, the original checks will be forwarded to the fund manager by transmittal, journal entries will be made, and subsidiary ledgers will be posted. The fund manager or his designee(s) will take collection action. The subsidiary ledger for dishonored checks will be reconciled each month with GLAC 124. The policy and procedures about uncollectible accounts apply to dishonored checks. When served by the consolidated CAO at Red River, checks may be returned by the bank directly to the fund manager with a debit memorandum furnished the CAO. This could expediate recovery from the drawer of the dishonored check. CAO will maintain a subsidiary by name, amount, and date of bank debit.

A040206 Claims Receivable.

A. Destruction or loss of capitalized assets due to fire, theft, or other causes for which an insurance claim is submitted will be recorded by removing the asset and its accumulated depreciation, from accounting records and recording its book value as claims receivable (GLAC 127). When the insurance claim is settled, the receivable will be removed and the difference, if any, will be recorded as an insurance claim gain or loss.

B. Loss of cash for which an insurance claim is submitted will be recorded by a debit to GLAC 127, and a credit to GLAC 101 for the amount of the loss. If a deductible is involved, the amount will be charged to insurance losses and the debit to GLAC 127 reduced. When the insurance claim is settled, the receivable will be removed and the difference, if any, recorded as an insurance claim loss.

C. Loss of merchandise for which an insurance claim is submitted will be recorded as a debit to GLAC 127 and a credit to purchases. This will remove the inventory from the cost of goods sold section. If a deductible is involved, the amount will be charged to

insurance losses and the debit to GLAC 127 reduced. When the insurance claim is settled, the receivable will be removed and the difference, if any, recorded as an insurance claim loss or gain.

D. Normally, insurance claims for expensed items, e.g., supplies, will not be recorded as receivables. If significant, the expense will be reversed and debited to GLAC 127. If a deductible is involved, the amount will be charged to insurance losses and the debit to GLAC 127 reduced. When the insurance claim is settled, the receivable will be removed and the difference, if any, recorded as an insurance claim loss or gain.

A040207 Accounting For Credit Card Transactions. The CAO is responsible for verifying credit card sales drafts and summary tickets with the DAR, computing the discount rate, keeping a detailed subsidiary for each credit card company, reconciling the payment check with the DAR and a suspended copy of the summary ticket, and recording credit card transactions.

A. CAOs will make the following entries if commercial credit card expense is recorded at the end of the month:

1. After verifying the sales drafts and summary tickets with the DAR, the CAO will make the following entry:

DR 139 - Commercial Credit Card Receivable
 CR 302 - Credit sales or applicable 500 series

2. For credit issued for return of merchandise, the CAO will make the following entry:

DR 304-Sales Returns and Allowances or
 applicable 500 series GLAC
 CR 139-Commercial Credit Card Receivable

3. After receiving the reimbursement check from the credit card company or deposit slip from the NAFI, the CAO will make the following entry:

DR 101-US Cash

DR 743-Commercial Credit Card Expense
CR 139-Commercial Credit Card Receivables

4. After receiving sales drafts rejected by the credit card company, the CAO will make the following entry:

DR 122-Customer Receivables
CR 139-Commercial Credit Card Receivables

5. If the NAFI resubmits sales drafts and the credit card company accepts them, the CAO will make the following entry:

DR 139-Commercial Credit Card Receivables
CR 122-Customer Receivables

6. If the NAFI can not collect from the customer after credit card company rejects credit, the CAO will make the following entry:

DR 661 - Bad Debt Expense
CR 122 - Customer Receivables

7. After receiving a copy of the monthly report of the telephone calls made to the credit card company for credit approvals, the CAO will calculate the amount of reimbursement due from the credit card company and make the following entry:

DR 140 - Miscellaneous Other Receivables
CR 730 - Communications Expense

8. To record the reimbursement, the CAO will make the following entry:

DR 101 - US Cash
CR 140 - Miscellaneous Other Receivables

9. CAOs will record credit card expense for the balance in GLAC 139 at the end of the month as follows:

DR 743 - Commercial Credit Card Expense
CR 139 - Commercial Credit Card Receivables

This entry will be reversed the following month.

B. CAOs will make the following entries for credit card receivables if commercial credit card expense is recorded at the time of charge sale:

1. At time of sale:

DR 139-Commercial Credit Card Receivables
DR 743-Commercial Credit Card Expense
CR 302-Credit Sales or applicable 500 series GLAC

2. After receiving the reimbursement check from the credit card company or deposit slip from the NAFI, the CAO will make the following entry:

DR 101-US Cash Account
CR 139-Commercial Credit Card Receivables

3. To record credit issued for return of merchandise-

DR 304-Sales Return and Allowances or applicable 500 series GLAC
CR 139-Commercial Credit Card Receivables
CR. 743-Commercial Credit Card Expense

4. When credit card company rejects a charge sale:

DR. 122-Customer Receivables
CR. 139-Commercial Credit Card Receivables
CR. 743-Commercial Credit Card ense

5. If the NAFI resubmits sales drafts and the credit card company accepts, the CAO will make the following entry:

DR 139 - Commercial Credit Card Receivables
DR 743 - Commercial Credit Card Expense
CR 122 - Customer Receivables

6. If the NAFI can not collect from the customer after credit card company rejects credit, the CAO will make the following entry:

DR 661 - Bad Debt Expense
CR 122 - Customer Receivables

7. After receiving a copy of the monthly report of the telephone calls made to the credit card company for credit approvals, the CAO will calculate the amount of reimbursement due from the credit card company and make the following entry:

DR 140 - Miscellaneous Other Receivables
CR 730 - Communications Expense

To record the reimbursement, the CAO will make the following entry:

DR 101 - US Cash
CR 140 - Miscellaneous Other Receivables

A040208 Delinquent Accounts Receivable. Accounts receivable become delinquent 30 days after billing. NAFIs should take action to collect accounts receivable within the 30 day time frame or shortly after. Delinquent fees may be assessed on the 31st day (the first day the accounts receivable is delinquent). Refer to AR 215-1 for guidance on delinquent fees. Delinquent fees should be recorded as NAFI administration income under GLAC 517-Late Charge Assessment Income.

A0403 MERCHANDISE INVENTORY AND PREPAID ITEMS

A040301 General. In this section, the word storeroom is not used; merchandise is either in a warehouse or in a sales department. Generally, merchandise is controlled in one of two ways:

A. Perpetual Records. By maintaining a perpetual record of each item (stock records). Periodically a physical inventory is taken and the stock records are adjusted to agree with the physical inventory. This method is used for warehouses with limited access to the stock and in certain retail outlets, e.g., golf pro shops. One person is responsible for the merchandise even though other persons (his or her subordinates) may have access to the merchandise. In this chapter, the term warehouse implies that stock records are maintained. If stock records are maintained, the procedures for

warehouses will apply even if a retail sales department.

B. Sales Accountability. By control of the items based on sales accountability. The sales accountability method works on the principal that periodic physical inventories make it possible to anticipate the dollar amount of sales that should be recorded and make it possible to fix accountability for differences between anticipated and actual sales as to department, period of time, and personnel.

A040302 Policy.

A. Inventory Stock Records. DA Form 1991 or an approved mechanized system will be used to maintain warehouse perpetual inventory stock records.

B. Maintenance of Stock Records. Stock Records will be kept by NAFI administrative personnel or by the CAO, whichever is found to be the most cost effective by the NAFI fund manager. Warehouse personnel will not keep stock records, but this does not prevent them from keeping bin cards. If NAFI administrative personnel keep the stock records, they will enter the end-of-month inventory (quantities on hand) from stock records or a physical inventory on a listing from an approved automated system. The completed inventory count is sent to the CAO. If the CAO maintains the stock records, CAO personnel will use the listing produced by an authorized mechanized system. A copy of the listing will be sent to the NAFI fund manager for approval. The CAO will not prepare financial statements until automated listings are approved and provided by the NAFI fund manager.

C. Physical Inventories. Physical inventories are required as of the last business day of each month for merchandise in sales outlets under sales accountability, i.e., when stock records are not kept. Normally, shortages and overages cannot be ascertained since perpetual inventory records are not kept.

D. Required Semi-annually. Physical resale inventories are required semi-annually as

of the last business day of March and September for merchandise on which stock records are maintained. Shortages and overages will be recorded in accounting records separately, i.e., a net amount will not be recorded. The overages and shortages must also be posted to the stock records. If the net difference is 5 percent of the total stock record merchandise value or exceeds \$2,500, physical inventories of the merchandise being maintained on stock records must be taken as of the last business day of each month until the difference is within the prescribed parameters. (See AR 215-1 concerning investigation requirements for losses of \$500 or more.)

E. NAFISS. For those installations using NAFISS, the inventory stock record subsystems will provide mechanized forms for inventory control. Installations using a manual inventory control system will use DA Form 1759 to record the physical inventories required by this regulation.

F. Forms for Issuance. DD Form 1149 (Requisition, Invoice, and Shipping Document), DA Form 3161 (Request for Issue or Turn-in), DA Form 4080 (Transfer Between Activities), or a similar form which includes basically the same information as these forms will be used to issue inventory from the warehouse.

G. Procurement From Government. When requisitions are submitted to appropriated fund activities and other NAFIs, the form prescribed by the issuing organization will be used as a procurement instrument unless otherwise prescribed in AR 215-4.

H. Receiving Report. A legible copy of the procurement instrument (if form design includes receiving functions) or DD Form 250 will normally be used as a receiving report. For items that are delivered several times a month under blanket purchase agreements, e.g., bread, milk, eggs, and fresh vegetables, a copy of the vendor's delivery ticket may be used as a receiving report, however, copies of invoices will not be used as receiving reports. All receiving

reports must be signed by an authorized person whose specimen signature is on file in the CAO.

I. Transfers. DA Form 4080 will be used to record transfers between departments. When blank DA Forms 4080 are received by a NAFI, the NAFI should number them sequentially. A record will be made of the person and section to whom all blank DA Forms 4080 are issued. Only an original will be prepared. Photocopies will be made if additional copies are required. The original should be sent to the CAO. The CAO will keep a control log or a suitable alternative method to determine if all DA Forms 4080 are received. Common uses for the DA Forms 4080 are:

1. Merchandise purchased for resale is used in a department for samples or display and cannot be sold afterwards.

2. Items issued to one department are used by another, e.g., lemons issued to the dining room are used in the bar.

3. Items for resale in one location code are needed by another location code as supplies, e.g., tools on sale in the Arts and Crafts Resale Store are purchased by the officers club swimming pool.

4. Items are returned to the warehouse.

5. Supplies are purchased by the post restaurant NAFI from the NCO club at cost.

6. Transfer of labor costs.

J. Record At Cost. Merchandise will be recorded in accounting records at cost. Cost is the purchase price less trade and cash discounts. Discounts lost and excise taxes paid will not be included in the cost of merchandise. They will be recorded in GLACs 662 and 736, respectively. Freight, drayage, insurance, and handling charges will be included in the cost of merchandise if they can be identified to specific items. If they cannot be identified to specific items they will be recorded in GLAC 731.

K. Method. Use the moving average method or the first-in, first-out method to arrive at unit prices.

L. Use Of Fair Market Value. When the fair market value of merchandise, as determined by an independent appraisal, is materially less than its cost, the merchandise may be devalued upon the approval of the installation commander. All devaluations will be expenses of the current period; they will not be treated as fund equity adjustments. The loss will be charged to GLAC 654 or 655.

M. Reconciliation. The CAO must ensure that the balance in GLACs 141, 142, 143, and 144 on the balance sheet equal the ending inventories on the income statements.

A040303 Physical Inventories.

A. NAFI personnel will conduct required physical inventories of merchandise per table 4-2. See A040303E for information concerning using the Gross Profit method as an alternative to monthly inventory. A person or persons selected by the CAO will observe the physical inventory at least annually. Special physical inventories of the warehouse are exempted from this requirement. One of the semi-annual physical inventories will be observed. Since it is frequently impractical to perform physical inventories of all of the departments of a NAFI and the warehouse at one time, physical inventories may be scheduled and conducted by location code. Physical inventories of location codes with similar missions should be conducted at the same time, e.g., all club activities at one time. The observer(s) will come from the duty roster maintained by the installation adjutant when possible.

B. In coordination with the NAFI manager, the installation CAO schedules the annual physical inventories and briefs the independent observers. (See fig 4-1.) The activity maintaining the stock records reconciles the physical inventory to the stock records and makes necessary adjustments to the stock records. If the stock records are kept by NAFI

personnel, differences will be reported to the CAO. The CAO will adjust the accounting records.

C. Approximately 60 days before a physical inventory must be observed, the CAO will arrange for the observers. If a request for observers goes to the installation adjutant, the desired ranks of the observers should be specified.

D. Following are the policies and procedures about physical inventories of merchandise. Briefings for observers will include these policies and procedures.

1. The organization keeping the stock records will prepare the inventory lists. These lists will be given to the inventory team who will conduct the physical count.

2. Inventory lists will be prepared in the same sequence in which the merchandise is stored or arranged for display, or in stock record number sequence.

3. Cutoff dates for sales, issues, returns, adjustments, and transfers between departments must be established so that inventory lists will accurately reflect items of inventory.

a. Merchandise delivered during the inventory will not be counted unless the purchase and payable or payment have been or will be recorded in the general ledger as of the inventory cutoff date.

b. Merchandise sold during the inventory will be included in the inventory count, unless the related sale and receivable or cash received have been or will be recorded in the general ledger as of the inventory cutoff date.

c. Inventories will be conducted separately for each department.

d. Inven-tories of merchandise held on consignment and returnable containers will be prepared and

conducted separately from department owned merchandise. Inventory lists will be prepared for each owner of the goods.

4. Team members will work in pairs. One person will inspect and count the items; the other will enter the count on the list.

5. Team members should make identification by stock number, if possible.

6. The inventory team will verify that the merchandise is usable/salable.

7. When the physical count of the warehouse is completed, it will be reconciled with the stock records. Differences between the physical count and the stock records will be brought to the attention of the inventory team and the warehouse supervisor. Attempts will be made to locate the missing merchandise.

8. Necessary adjustments will be made to the stock records and the accounting records.

9. All observers must sign the briefing statement and furnish a report to the CAO concerning how the inventory was performed. (See fig. 4-2.)

10. The observers will not be released until the inventory is satisfactorily completed.

11. An accurate physical inventory is extremely important. It is imperative that all concerned be aware of this importance.

E. NAFIs may use the gross profit method of inventory valuation instead of monthly inventories at some sales outlets.

1. To use the gross profit method, the sales outlet must be able to demonstrate a consistent gross profit percentage over the previous 12 months. If the sales outlet resales like items on a continuous basis, the location can take a wall-to-wall physical inventory at the end of each quarter and estimate the ending inventory for the other two months in

the quarter. The estimate is based on the dollar value of merchandise receipts, sales and the gross profit percentage. The NAFI can continue to use this method in the following quarter as long as the actual inventory valuation at the end of the quarter does not deviate more than three percent from the estimate using the gross profit method.

2. To use the gross profit method of inventory valuation, you must first determine the cost of goods percentage of sales. To do this, subtract the gross profit percentage from one (that is, 1.00 less .42 gross profit = .58 or 58% cost of goods sold). Once you determine the cost of goods percentage, multiply the sales figure by the cost of goods percentage to determine the estimated cost of the goods which were sold during the period (that is, sales of \$517 x 58% = \$300 cost of goods sold). To arrive at an estimated ending inventory, subtract the estimated cost of goods sold (\$300) from the cost of goods available for sale (beginning inventory plus purchases, plus/minus adjustments).

A040304 Prepaid Expenses.

A. Prepaid Supplies. When Prepaid Supplies and Equipment, Prepaid Tableware, Kitchenware, Linens, and Uniforms, and Prepaid Bingo Prizes are kept, they will be accounted for on stock records in the same manner as merchandise. In the normal course of operations, payments are made in advance for a number of expenses which are to be used in later months. The prepayment of rent, insurance premiums, and interest are such expenses. These items will be expensed in the month actually used or consumed. The accounting principle of materiality should be considered before employing the prepaid concept. Supplies and equipment which do not fit the criteria for fixed asset depreciation may be expensed over the time period they provide benefit to the NAFI. However, the expensing may not exceed 12 months.

B. Prepaid Expense and Amortization Record. This subsidiary record will be maintained to aid proration of expenses for supplies, maintenance, insurance (RIMP),

licenses, taxes, or other expenses requiring advance payments. Charges will be computed and prorated over each month of the period covered by the advance payment. Supplies will be expensed based on usage and reported by the fund manager. The unexpired portion will be reconciled to the correct G/L control account. The amortization amounts each month will be the basis for adjustments made on the worksheet.

A0404 FIXED ASSETS

A040401 General. Fixed asset accounting records substantiate the fixed assets and accumulated depreciation accounts on the balance sheet, serve as accountability records, and are utilized in computing depreciation. As there are no tax considerations, the purpose of depreciation of NAFI-owned property is to charge operations with the cost of a fixed asset over its estimated useful life. AR 215-1 contains policy on NAFI property and fixed assets.

A040402 Policies and Definitions.

A. Fixed Assets. Nonappropriated fund fixed assets are defined as tangible properties purchased by or donated to a NAFI that have an expected life of two or more years and cost \$1000 or more. Examples are land improvements, buildings, building alterations, renovations, and improvements; furniture, fixtures, and equipment; vehicles, aircraft, and boats; and breeding livestock. Unless otherwise stated below, fixed assets are recorded at cost plus any expenditures necessary to place those assets into readiness for use, i.e., installation, freight, testing, legal fees to establish title, and any other costs of putting the asset in the condition and location for use. Purchase discounts should be applied to reduce the costs, however, interest charges should not be capitalized.

B. Quantity Purchases. Like items purchased in a quantity in excess of one at a total cost of \$1000 or more, regardless of unit cost but meeting other criteria for fixed assets, may be treated as fixed assets at the discretion of the fund manager. This decision is made at the

time the capital purchase and minor construction (CPMC) budget is prepared or revised; not at the time of purchase.

C. Repairs and Maintenance. Expenditures for repairs and maintenance which do not prolong the useful life of property beyond that anticipated when it was purchased or constructed should be charged as expenses at the time they take place. Expenditures of \$2,500 or more which prolong the useful life of property two years or more beyond that anticipated when it was purchased or constructed should be capitalized. Attachments or alterations which increase the usefulness of a building or change it in some way, even though not increasing its life, should be capitalized and depreciated over the estimated remaining useful life of the building. The decision of whether to capitalize is made at the time the capital budget is prepared or revised; not at the time of purchase.

D. Self-Construction. If fixed assets are built or manufactured by the NAFI, all costs incurred, including labor, should be capitalized. Since this situation occurs infrequently, CAOs who need help in this area should contact the proponent of this regulation, in writing, through command channels.

E. Trade-In. When property is traded-in at time of purchase, the new asset will be recorded at the amount of the monetary consideration paid plus the book value of the old asset. Set up a liability for the amount to be paid to the vendor. The acquisition cost and accumulated depreciation of the asset relinquished will be removed from the record.

F. Basket Purchases. If assets are purchased in groups (frequently called a basket purchase) without costs of individual assets being known, the total purchase cost must be allocated among the individual assets on the basis of their respective fair values.

G. Donated Fixed Assets. Fixed assets acquired by donation, i.e., at no cost to the NAFI, will be recorded in the appropriate fixed asset account with a contra credit to GLAC 291-

Contributed Capital, at current estimated value. Costs incurred in the acceptance of the asset, e.g., installation costs, transportation expenses, legal fees, should be capitalized but should not be recorded in GLAC 291. It is the responsibility of the fund manager to furnish the current estimated value. The fixed assets will be depreciated over the expected useful life per table 4-1.

H. Property Control Records. Use of DA Form 4078 (Property Control and Depreciation Record) and DA Form 4079 (Depreciation Expense Control (Furniture, Fixtures, and Equipment)) are mandatory unless the Fixed Asset subsystem of NAFISS or other approved mechanized system is in use. If an approved mechanized system is in use, the mechanized system will be the property control records. Each fixed asset must be recorded on a property control record, manual or mechanized. Fixed assets will remain on property control records, whether fully depreciated or not, until disposition is made by the fund manager. Special property records may also be maintained, if desired by the fund manager, for items considered sensitive by the fund manager that would not otherwise be recorded on property control records. Unless the fund manager has notified the CAO in writing of any general policies in this area, items will be added or deleted only at the specific request of the fund manager or his designee. At least monthly, the CAO will furnish the fund manager a list of the recorded items described above so that he or she is aware of items that are being carried on property control records not recorded in an asset account. The fund manager can add to or delete from this list as he or she desires. These items are not subject to the physical inventories described in this chapter. These items are recorded in NAFISS as subledger code "E".

I. Depreciation. Use of the straight-line method of depreciation is mandatory except for aircraft. Salvage value will not be considered, i.e., the total cost of the asset will be depreciated. Depreciation of fixed assets will begin the month after receipt and continue through the month of 100 percent depreciation. When a fixed asset that is not fully depreciated

is removed from property control records, a full month's depreciation will be recorded. Depreciation expense should be recorded in the using department code.

J. Government-Titled Fixed Assets. An unusual aspect of NAF accounting is that some assets, particularly buildings, are purchased using NAF and the NAFI has exclusive use, but title rests with the government. Special asset accounts (GLACs 175 and 177) and special Accumulated Depreciation accounts (GLACs 176 and 178) have been prescribed for recording these assets.

K. Fixed Assets In Transit. On occasion, title to fixed assets may pass to the NAFI and payment made before the NAFI has physical possession of the property. Typically, this happens when property destined for a NAFI overseas is delivered to an Army port for over water transportation by government means. The CAO makes payment based on the receipt at the port and records it in the Fixed Assets in Transit account. When the NAFI actually receives the property, the cost will be removed from the Fixed Assets in Transit account and placed in the appropriate fixed assets account.

L. Building and Improvement Construction Costs. Most construction contracts allow for progress payments during the construction period. As payments are made they will be recorded in the Building and Improvement Construction Costs account (GLAC 179). When the construction project is completed and ready for occupancy or accepted and occupied by the NAFI, the amount previously recorded will be reversed from the Building and Improvement Construction Costs account and recorded in the appropriate fixed asset account. Depreciation will begin the following month. There are no specific procedures nor forms prescribed for evidencing that the NAFI has occupied a new building or facility therefore the CAO must coordinate closely with the fund manager any time that progress payments are being made. Final payment cannot be used as criteria as payment is sometimes held back.

M. Appropriated Fund Property. The CAO is not responsible for property records for property purchased using appropriated funds.

N. Major Construction. The Army Morale, Welfare, and Recreation Fund (AMWRF) will pay for all major construction, projects costing over \$500,000, less any amounts funded locally. AR 215-1 describes the funding programs for NAF construction. The AMWRF will pay the district engineer or civilian contractor directly as invoices are received and as authorized by the contracting officer. The IMWRF will be notified of the project cost upon project completion.

1. When the AMWRF withdraws funds from the IMWRF for major construction projects, the AMWRF will send a message specifying the amount of the withdrawal. The entry necessary at the time the cash is withdrawn from the IMWRF is a DR to GLAC 196-Construction Advances for the amount the IMWRF pledged to the project, and CR to GLAC 187-Fixed Asset Sinking Fund.

2. When construction is completed, the AMWRF will notify the IMWRF of the amount paid for the project. The CAO will debit the proper fixed asset GLAC for the amount of the project. The credit will be to GLAC 196 for the amount previously debited to this account for the project and GLAC 291 for the remainder. Depreciation will begin the month after the contracting officers representative or the engineers determine that the facility is ready for "beneficial occupancy" or the month after the facility is put in to use, whichever occurs first. If the final cost of the project is not known at this time, base the monthly depreciation on the best estimate of cost and adjust later if necessary.

O. Fixed Assets At Closing Installations.

1. Fixed assets which were not transferred to another installation will be expensed to remove the remaining book value from the books. If the assets were in usable condition and in use at the time of closure, the

assets will be removed from the books and the net book value will be debited to GLAC 832-Loss on Close of a Business Location. If the assets were not in use, record the loss to GLAC 827-Loss on Disposal of Fixed Assets because the loss is not attributable to the closure.

2. When assets with a net book value are transferred:

a. Remove the asset account and corresponding depreciation account from the books. Record the net book value as a debit to GLAC 291-Contributed Capital. The losing CAO will provide the gaining CAO with the net book value of the transferred fixed assets.

b. The gaining installation will debit the applicable fixed asset account with the net book value and credit GLAC 291. The gaining Fund CAO will load the fixed assets on the books at the net book value and continue depreciation over the estimated remaining useful life.

A040403 Transactions. The various fixed asset accounting transactions can be grouped into acquisition, administration, disposition, and depreciation. Physical inventories take a significant amount of the CAO's time and may produce many accounting transactions.

A. Acquisition. Receiving reports are prepared by NAFI personnel evidencing acquisition of fixed assets. If all data required for maintenance of property control records is not included with the receiving report, the CAO will request it from the NAFI manager.

B. Administration. Documentation must be prepared by the fund manager whenever any data on the subsidiary records is changed even though no general ledger entries are required, e.g., fixed assets are transferred from one location to another. Transfers between NAFIs should be handled as donations by the receiving fund and as dispositions by the donating fund.

C. Disposition. Documents are prepared by the fund manager upon disposition of fixed assets. Disposal means that the fund

manager has physical control of the item and disposes of it in accordance with AR 215-1. A "write-off" of a fixed asset means that the NAFI manager does not have physical control of the item, i.e., a shortage. Entries for dispositions will be made on journal vouchers. The only documentation needed by the CAO to "write-off" an asset is evidence that the property is missing.

1. Transfer to Defense Reutilization and Marketing Office (DRMO). When property is transferred to the DRMO, it will be evidenced on the form required by the DRMO (usually DD Form 1348 (DOD Single Line Requisition System Document)). The NAFI manager will furnish the CAO a copy of the document which will be used to support the entry. Any remaining book value will be charged to GLAC 827-Loss or Gain on Disposal of Fixed Assets. Any cash proceeds from disposal received at a later date will be recorded in GLAC 827 if the fixed asset can be identified; if not, the proceeds will be recorded in GLAC 825-Miscellaneous Other Income.

2. Write-off. The fund manager should report shortages of fixed assets to the CAO, in writing, upon discovery. Properly completed physical inventory documentation is considered notification in writing. As soon as notified, the CAO will remove shortages from the property control records, however, this does not constitute relief from property accountability. Relief can only be granted as specified in AR 215-1, therefore the CAO will report the shortages to the NAFI Manager's commander by letter. The letter should be hand-carried where possible and acknowledgement of receipt should be obtained. The letter to the Commander will also have the accounting entries made to remove ("write-off") the shortages from the property control records. A copy of the letter will be sent to the NAFI manager. If the property is found later, the item will be put back on property control records, the accounting entries previously made will be reversed, and an adjusting entry will be made to bring depreciation up to date.

3. Sale. When property is sold by the NAFI, cash or accounts receivable will be debited; the appropriate accumulated

depreciation debited; the appropriate fixed asset account credited; and gain or loss on disposal of fixed asset debited or credited, as applicable. The NAFI manager must give the CAO the documents. If NAFI-purchased or owned property is transferred to the Government and later sold, proceeds from the sale go to the Government; not the NAFI. See AR 215-1.

4. Trade-in. When old property is traded-in at time of purchase, the fund custodian will send documentary evidence. The old asset will be removed from property control records and the new asset recorded as described above.

Table 4-1, Depreciation Periods

Description	Life Expectancy
Buildings	15-40 years
Building Improvements	10-30 years
Furniture, Fixtures, and Equipment	2-10 years
Vehicles, Aircraft, and Boats	2-7 years
Land Improvements	15-25 years

D. Depreciation. Depreciation is a systematic method of charging operations with the cost of a fixed asset over its estimated useful life. Estimates of the useful life of assets are seldom accurate since obsolescence or other factors may abbreviate or elongate its usefulness. Because of the uncertainty, the guideline lives in Table 4-1 will be used. Since salvage values are almost impossible to predict and restrictions are placed on disposal of military property, salvage values will be ignored in depreciation computations for NAFI-owned fixed assets. Although there are several depreciation methods in general use, Army NAFIs will use only the straight-line method except that aircraft may be depreciated based on hours flown (see below). Under the straight-line method, the cost of the fixed asset is spread in equal periodic portions over its estimated useful life. Monthly depreciation is calculated simply by dividing the total depreciable value of the fixed asset by the estimated months of life. An asset will not be depreciated in the month in which it is placed in use nor will a partial month's depreciation be recorded when disposition is made. If the fund manager desires, aircraft may be depreciated based on hours flown. The estimated flying-hours the aircraft is expected to last are divided into the cost to arrive at a depreciation per hour. Each month the fund manager must report to the CAO the number of hours flown so that depreciation may be calculated and recorded. This must be done manually. NAFISS supports only straight-line depreciation.

E. Adjustments. Generally accepted accounting principles dictate that once an accounting principle is adopted it should not be changed in accounting for events and transactions of a similar type. Further, consistency facilitates analysis and understanding of comparative accounting data. If it is determined that a change in the estimated life of an asset is proper, the necessary adjustment to depreciation must be posted to the expense account; not Retained Earnings. By the same token, a large loss on the disposal or write-off of a fixed asset will be posted to the Loss on Disposal of Fixed Assets account; not Retained Earnings.

F. Fully Depreciated Fixed Assets. Fully depreciated fixed assets purchased prior to FY 89 which had an acquisition cost of less than \$1,000 may be removed from the accounting records.

Table 4-2, Types and Frequencies of Physical Inventories

Type	Description	Frequency	Comments
Saleable merchandise, in any warehouse or storeroom.	This is a single account for saleable merchandise held in a warehouse or storeroom.	Monthly by fund employees or NAFI employees. Annually, observed by independent observation team.	Variances between inventory and stock records will be researched, costed, and documented by the inventory team.
Resale merchandise in sales outlets.	These accounts are for resale merchandise in sales outlets. Separate accounts are maintained by activity codes. Sales outlets include bars, snack bars, package stores, and restaurants.	Monthly in sales outlets. Inventories will be conducted by NAFI employees under the direct supervision of the fund custodian or a designated representative. Annually, observed by an independent observation team.	Same as above.
Supplies	Supplies purchased in large quantities are maintained in a warehouse or storeroom until issued to using activities. This includes consumable supplies used in operations that are not normally for resale (china, glassware, silverware, linen, utensils).	Monthly by NAFI employees. Annually, observed by an independent inventory team.	Supplies issued but not consumed will be controlled by management review even though they were expensed at time of issue. Variances will be documented as above and reconciled by the inventory team.
Fixed assets	Includes furniture, fixtures, and equipment; vehicles and flying club aircraft	Annually. The inventory must be taken at the location level. The initial inventory will be taken by an inventory team appointed by the NAFI managers. The next year it will be taken by an inventory team appointed by the NAFI managers under the observation of independent observation team(s). Independent observation team members will observe the inventory every other year thereafter.	A memorandum will be prepared to support any difference between the physical inventory and the property control record. Shortages will be investigated per AR 215-1.
Expensed equipment (hand receipt/annex number).	All expensed equipment issued by DA Form 2062.	Annually, by DA Form 2062 holders. Also, upon change of DA Form 2062 holders.	A joint inventory is required when there is a change of DA Form 2062 holders.
Sensitive items (Note 3).	All items classified as sensitive.	Annually, by NAFI personnel.	A joint inventory is required when there is a transfer of responsibility.
Transfer of accountability.	All categories described above.	On each change of NAFI manager. Can be done by an independent inventory team.	Variances will be documented as described above. Certificate of transfer will be executed between relieving and successor fund managers. (See AR 215-1)

Notes:

1. Those NAF entities that have had only small dollar value of inventory adjustments over a representative period may request an exception to the monthly inventory requirement. Send request through command channels to the Defense Finance and Accounting Service-Indianapolis Center, ATTN: DFAS-IN-AN, 8899 East 56th Street, Indianapolis, IN 46249-1056. The request must be supported by a schedule showing percentages of adjustments, overages, and shortages relating to the value of the inventory. Before approving any request, DFAS will coordinate with the U.S. Army Community and Family Support Center or the Army and Air Force Civilian Welfare Fund, as appropriate.

2. If inventory stock records are kept, the monthly physical inventory requirement is changed to semi-annually, however, if there is a variance between the semi-annual physical inventory and the stock records in excess of 5 percent or \$2,500 of the inventory value, the requirement for a physical inventory will revert to monthly until the cause is determined and corrective action taken.

3. Does not apply to bar and food sensitive items.

A040404 Physical Inventories.

A. Annual Physical Inventory. A physical inventory of all NAFI-owned fixed assets will be conducted at least annually, per table 4-2. Since it is frequently impractical to perform a physical inventory of all of the fixed assets of a NAFI at one time, physical inventories may be scheduled and conducted by Location Code. Recommend that inventories of location codes with similar missions be conducted at the same time, e.g., all club activities at one time; all bowling activities at one time. A person or persons selected by the CAO will observe the inventory per table 4-2. The observer(s) will come from one or more of the following sources:

1. The CAO, including employees maintaining fixed asset records, if on site.

2. The duty roster maintained by the installation adjutant.

B. Scheduling of Annual Inventories. When the CAO is on site, he/she schedules the annual inventories, briefs the persons performing the inventory, briefs the independent observers, and furnishes a listing of the assets (without quantities) to the persons performing the inventory. If the installation is served by the consolidated CAO, the local installation will schedule the inventory and conduct the briefing. When the inventory is completed, the CAO reconciles the inventory to the property control records, and makes necessary adjustments to the property control records and other accounting records. The NAFI manager, the persons conducting the inventory, and the observer(s) sign a statement that the inventory has been properly conducted and that it is correct (see fig 4-3). The CAO will inform the commander, by letter of the results of the inventory (shortages, overages, accounting entries made, or that there were no discrepancies). The letter will be hand delivered, when practical, and an acknowledgement of receipt obtained. The commander will determine any actions to be taken regarding possible investigations.

C. Coordination With NAFI Manager. Approximately 60 days prior to a scheduled fixed asset inventory, the CAO will coordinate with the NAFI manager for appointment of the inventory team. The appointment should be in writing and signed by the NAFI manager and the Central Accounting Officer. The CAO will also arrange for the observer(s). If a request for observer(s) goes to the installation adjutant, the desired rank(s) of the observer(s) should be specified. The use of CAO employees as observers must be carefully considered. While the person who maintains the fixed asset records may be well qualified to act as an observer, the CAO must ensure that he or she can perform the observation objectively. If there is any objection from the NAFI manager, CAO personnel should not be used.

D. Policies and Procedures. The following are policies and procedures for physical inventories of fixed assets. These items will be included in briefings for the inventory team and the observers.

1. Work in pairs. One person will inspect and count the items; the other will enter the count on the list.

2. Make identification by asset number and/or serial number, if possible.

3. Any borrowed, loaned, rented, disposed of, or otherwise missing items will be recorded as shortages unless proper documentation is present.

4. The inventory team will verify that each item is permanently numbered and the number is not disfigured. Also they must verify that the item is well maintained. The listing should be annotated to indicate any items not in use, i.e., in store room or warehouse.

5. When the physical count is completed, the CAO will reconcile it with the property control records. Differences will be brought to the attention of the inventory team and the NAFI manager and reasonable attempts will be made to locate the missing property.

6. Necessary adjustments will be made to the property control records by the CAO as soon as the reconciliation is finished and the NAFI manager and inventory team have had a chance to check for shortages, unless written authority is received from the commander not to do so.

7. All members of the team must sign the briefing statement and the inventory statement.

8. The inventory team will not be released until the inventory is satisfactorily completed.

E. The following will also be included in the briefing:

1. The importance of an accurate physical inventory will be stressed during the briefing.

2. The use of the listing, their arrangement, and the use of location and department codes.

3. The physical presence of some items may be difficult to confirm or ascertain, e.g., building improvements and land improvements.

A040405 Fixed Asset Sinking Fund. NAFIs may use a Fixed Asset Sinking Fund to set aside funds for purchase/replacement of fixed assets in accordance with guidance by MACOMs and/or CFSC. Amounts may be debited to GLAC 187 monthly.

A040406 Disposal of Fixed Assets.

A. Items that have been fully depreciated will remain in the accounts until disposed of. On disposal, the asset account will be credited for the full amount of the asset's capitalized value. Debit the allowance for depreciation account for the depreciated amount of the asset. Items disposed of (through sale, donation, or retirement) that are not fully depreciated will be written off as follows:

1. Sale.

DR Cash or Receivables (amount received).
DR Allowance for Depreciation (amount depreciated).

CR Applicable Asset Account (original amount capitalized).

and

DR or CR Loss or Gain on Disposal of Fixed Assets (difference).

2. Donation, Retirement, or Destruction.

DR Allowance for Depreciation (amount depreciated).

DR Loss on Disposal of Fixed Assets (difference).

CR applicable Fixed Asset Account (original amount capitalized).

B. CAOs will record losses or gains that result from disposal of fixed assets in department code G1 of the location using the asset.

A040407 Lost Assets. After an inventory is validated, fixed asset records will be adjusted to delete lost assets. The loss is reported to the NAFI council and commander. Write-off will not be delayed pending council and commander review. A write-off of a fixed asset does not constitute a relief from property accountability under AR 215-1. The following accounting entries should apply:

A. When insurance recovery or pecuniary liability is expected-

DR GLAC 127-Claims Receivable

DR Allowance for Depreciation

CR Applicable Fixed Asset Account

To record a claim for the net book value of the asset and write-off the acquisition cost of the asset and accumulated depreciation.

B. When insurance settlement or other restitution is made-

DR GLAC 101-US Cash Account

CR GLAC 127-Claims Receivable

and

DR or CR GLAC 827-Loss or Gain on Disposal of
Fixed Asset

C. When loss is not expected to be
recovered-

DR GLAC 827-Loss or Gain on Disposal of Fixed
Asset

DR Allowance for Depreciation

CR Applicable Fixed Asset Account

To write-off lost fixed asset and record a loss
equal to the net book value.

A040431 Closing a Business Location. All costs associated with closing a segment of the NAFI's business, or the entire NAFI, will be recorded in GLAC 832, Loss on Close of Business Location, to include losses on disposal of buildings, improvements, and furniture, fixtures, and equipment. GLAC 832 should be recorded in the administrative department code (G1) of the location that applies to the facility being closed. To record it in IMWRF administration would not show the cost in the proper program code. The notes to the financial statements for the period encompassing the closure should identify the operation that has been discontinued.

CHAPTER 5

LIABILITIES AND FUND EQUITYA0501 LIABILITY FOR NAF
RESOURCES

A050101 Fund Manager Responsibility.
The sole responsibility for managing the resources of a NAFI including cash, rests with the fund manager, or the governing council, as applicable. Therefore, the CAO will disburse or use a NAFI's resources only with the approval of the fund manager or as authorized in this regulation.

A050102 Authority For Payment. Receipt of all the following documents, properly prepared and authenticated, is authority for payment.

A. Procurement Instrument. This may be a purchase order, a contract, a blanket purchase agreement, or other contractual document issued in accordance with AR 215-4.

B. Receiving Report. A receiving report or other signed documentary evidence that the goods or services have been received by the NAFI.

C. Vendor Invoice. An invoice or claim from the vendor requesting payment. This may be an invoice issued for a specific delivery or a statement showing deliveries over a month, week, or other period.

A050103 Absence of a Purchase Order. In the absence of a purchase order, the CAO will forward all documents received to the fund manager for proper disposition. AR 215-4 contains procedures for ratification of unauthorized commitments. Payment will not be made until the commitment has been ratified by issuance of a purchase order or contract. If the goods or services have already been received and cannot be returned (contract is not voidable), the contracting officer will recommend to the installation commander ratification or nonratification of the unauthorized commitment. In that case, the fund manager must obtain

approval from the installation commander and certify in writing that the goods or services represented by the invoice were actually received and that payment is approved.

A050104 Purchases From Another NAFI.
Purchase of goods or services from another NAFI will be supported by a request for the goods or services and a signed document showing receipt. DD Form 1149 or similar form will suffice.

A050105 Purchases from Government.
Purchase of goods or services from the Government (bills from appropriated funds) will not normally be supported by a procurement instrument, however, a receiving report or other signed evidence of receipt must be present to support the payment.

A050106 Payments to NAF Personnel.
NAF personnel will be paid only when the proper personnel documents are received. A TA report authenticated by the NAFI manager or his or her appointed representative must be given to the CAO or servicing payroll office.

A050107 Payee. Checks will not be made payable to "cash" or "bearer". Checks for operating cash such as check cashing, petty cash, foreign currency exchange, and change funds will be made payable to the name of the person appointed by the fund manager followed by the purpose, e.g., "John Doe (Annex 1 Petty Cash)".

A050108 Payee Bankrupt or Insolvent.
When bankruptcy/insolvency of a payee is involved, payment will not be made from NAF without coordination with DFAS. Further, all potential bankruptcy claims will be submitted to DFAS. Bankruptcy procedures in AR 37-103 apply to all NAFIs covered by this regulation.

A0502 PURCHASE ORDERS AND
VENDOR INVOICES

A050201 Acquisition Procedures. AR 215-4 contains acquisition procedures for Army NAFIs.

A050202 Log Maintenance. The CAO will maintain a log by NAFI and purchase order number. All purchase order numbers must be accounted for at month end.

A050203 Daily Receipts. Purchase orders for daily deliveries may be made on a monthly or annual basis. A copy of all blanket purchase agreements (BPA) will be sent to the CAO to document purchases. The CAO will keep a log, indexed by fund, to control the numerical sequence. The call record along with the matching delivery tickets and vendor's invoice are required documentation to support payment. However, payment will not be delayed pending receipt of the call record. Delivery orders issued on DA Form 4067-R (Army NAF Purchase Request) against GSA or DA contracts or agreements will also be controlled each month by fund and recorded in a control log.

A050204 Stock Record Cards. If NAFIs are maintaining manual DA Form 1991 (Stock Record Card), the CAO will send a copy of the invoice on a transmittal letter to the NAFI immediately upon receipt. The invoices will be used to update the NAFI's DA Forms 1991. If the NAFI requires copies of invoices for pricing stock or other purposes, the CAO will furnish a copy immediately upon receipt.

A050205 Copies of Facsimiles. Sequentially numbered electronic telephone message facsimile hard copy (i.e., TELEX) may be used in lieu of a purchase order when the electronic telephone message facsimile is the customary method of procurement. It is common to use this method when obtaining confirmed hotel or transportation reservations. A copy of the sequentially prenumbered receipt voucher will serve as the receiving report when the customer has paid for the reservation confirmation. The copy of the receipt voucher will be forwarded to the CAO and will reference the TELEX or electronic sequentially numbered message.

A0503 RECEIVING REPORTS

A050301 Preparation. A receiving report will be prepared in accordance with AR 215-4 for receipt of merchandise purchased or services performed. Enough information will be shown on the receiving report to verify vendors' invoices for payment. The receiving report will be sent to the CAO.

A050302 Payment Without the Original. CAOs may use electronically sent copies of receiving reports or notice of receipt as supporting documents for payments, original signatures are not required. CAOs must have receiving reports for the first and last payments when the same amount is paid to one vendor at fixed intervals for continuing services such as rent, equipment maintenance, or janitorial services. Payments for the intervening periods may be made without a receiving report. CAOs may require receiving reports for the intervening periods if they question the contract or have reason to believe the services are not being supplied. If CAOs choose to use this procedure, they must impress on the receiving activity to immediately inform them of any changes in the contract.

A050303 Net of Discounts. CAOs will record accounts payable net of discounts. Discounts are to be taken on the gross amount of the invoice if goods are supplied FOB destination. If the goods are supplied FOB other and a separate freight charge is shown, the CAO will take the discount on the cost of goods only. The FOB delivery terms are shown on the purchase order. CAOs will record discounts lost in GLAC 662.

A0504 SERVICE CONTRACT PAYMENTS (See A100702.)

A0505 DA FORM 5313-R (NONAPPROPRIATED FUND PAYABLE/DISBURSEMENT VOUCHER). DA Form 5313-R or a locally developed form which includes the information on DA Form 5313-R will be used to support the establishment of all accounts payable and DA Form 5313-1-R will be used to support disbursements made for other

than petty cash. DA Forms 5313-R and 5313-1-R will be sequentially numbered by IMWRF management upon issue. DA Forms 5313-R and 5313-1-R will be locally reproduced on 8½ x 11 inch paper. Petty cash vouchers may be recorded on these forms, if desired. Vouchers will not be marked "paid" until a check is issued. Purchase orders with original signatures, invoices, and receiving reports will be attached to the voucher. All purchase orders and supporting documents will be stamped "paid" when the check is issued. DA Form 5313-1-R and payment checks are usually made out to the official name of the vendor. Some vendors may ask that the checks be made out and mailed to an office that does not have the same name. This is allowed as long as the payment voucher and invoice clearly show the contract number.

A0506 ELECTRONIC FUNDS TRANSFER (EFT). The servicing payroll office automatically moves funds to its local depository from each serviced NAFI's account at the Central Bank for the NAFI's payroll. RIMP and unemployment compensation premiums are also automatically transferred from the NAFI's account at the Central Bank to the Army Central Insurance Fund.

A0507 PAYING DEBTS OWED THE US GOVERNMENT. The CAO will give priority to payment of NAF liabilities to the US Government. The CAO will coordinate with the Accounting Division of the DAO at least monthly to ensure settlement of all liabilities with the US Government as soon as possible. All personnel working in the CAO should be periodically reminded of this policy. All debts owed to appropriated fund activities are considered debts owed to the US Government. Debts to the Government are normally created from commissary and self-service supply center purchases, billings for utilities, and assorted services provided to the NAFI on a reimbursable basis. Debts owed to the Government will be paid immediately upon receipt of all documentation. The practice of paying debts owed to the Government as much as 30 days after receipt of the required documentation is prohibited.

A0508 FUND EQUITY. Fund equity (net worth) is the excess of total assets over liabilities. The retained earnings section of the Balance Sheet reports the beginning balance (prior month ending balance), plus current month income (loss) activity, and plus/minus adjustments.

A050801 General Ledger Accounts.

A. Contributed Capital. GLAC 291-Contributed Capital, reflects the amount of capital from sources outside the NAFI.

B. Retained Earnings. GLAC 292-Retained Earnings, reflects the amount of retained earnings. Retained earnings includes the beginning balance (prior month ending balance), plus current month income (loss) activity, and plus/minus adjustments.

A050802 Retained Earnings Adjustments. Retained earnings adjustments are extremely rare and require explanation in footnotes to the financial statements. Adjustments to the retained earnings account require DFAS approval.

CHAPTER 6

INCOME

A0601 GENERAL. Income is any inflow or receipt of resources earned by the NAFI. NAFIs usually receive income from the sale of goods or supplying a service. This chapter also has accounting policy for two other sources of income; concessionaire operations and Slot Machine Profits.

A0602 CONCESSIONAIRE INCOME. Certain activities may be operated under contract with a civilian concessionaire. The limits on sales and services by the funds apply fully to concessionaire operations. NAFIs will follow AR 215-1 and AR 215-4 when activities are operated under contract with a civilian concessionaire. AR 215-7 covers Army post restaurant activities operated under contract with a concessionaire. Concessionaire income will be recorded under the NAFI administrative department unless there is a clear relationship between the revenue and a specific location within the NAFI. When a particular location had a part in generating the revenue, the revenue will be recorded under that location.

A0603 CONCESSION ACCOUNTING. When a department of a NAFI operates (either wholly or in part) on a concession basis, the fees received from the concessionaire will be included in the applicable department codes under GLAC 502 - Concessionaire Commission Income. That portion from direct operations (other than concessionaire) will be recorded in other applicable GLACs (i.e., Service/ Recreation Activities income, etc.) and department codes. If the commission fee from the concessionaire is not received by the end of the month to which it pertains, an Accounts Receivable-Concessionaires should be established for the estimated amount receivable.

A0604 ARMY RECREATION MACHINE (ARM) PROFITS. Accountants will make the following accounting entries to record income to the NAFI from the program. Debit 101-US Cash Account and Credit 525-ARM

Expense Reimbursement to record the cash provided to the NAFI to reimburse expenses for supporting slot machines. Record in the location housing the slot machines, using department code G1. Debit 189-ARM Allocations and Credit 524-ARM Income to accrue the NAFIs share of the program income, based on the budget projections given to the NAFI by USACFSC. Record in the NAFI administrative location, using department code G1. After receiving notice from USACFSC of actual income earned, make an entry to adjust GLACs 189 and 524 to the amount of the actual income. Debit 187-Fixed Asset Sinking Fund and Credit 189-ARM Allocations to record the receipt of cash, check, or notice of bank transfer for approved capital expenditure projects. Transfer amounts to GLAC 101 at the time of payment for purchase of fixed assets.

A0605 TICKET SALES. Record the entire proceeds from ticket sales as income and record the cost of the ticket as an expense. The difference between the proceeds and the cost of the ticket is the profit, or mark up, on the sale. When a customer makes a partial payment, record the payment in GLAC 202-Deposits Payable. Clear GLAC 202 when full payment is received.

A0606 INCOME FROM RECYCLING MATERIALS. When the recycling program is run by the installation engineer, the NAFI may receive some revenue from the program. Record the income received under program code RP in GLAC 538-Recyclable Material Income. If the NAFI operates the recycling program for the installation, record the income and expenses of the program in program code TT-Recycling. Record the income in GLAC 501-Service/Recreation Income.

A0607 CONTRIBUTIONS FROM CHARITABLE SOURCES. When NAFIs receive cash contributions from the Combined Federal Campaign (CFC) or other charitable

organizations, record the contributions as a credit to GLAC 807-Contributions From Charitable Sources and a debit to Cash. For non-cash items that meet the criteria for fixed assets, see A040402G, for accounting procedures. For items that do not meet the criteria for fixed assets, record to the appropriate asset or expense account with an offsetting entry to GLAC 807.

A0608 NON-OPERATING SOURCES OF REVENUE. Non-operating Sources of Revenue are established to record the receipt of non-operating revenue by the NAFI (e.g., cash distributions, allocations, and dividends). The revenue will be recorded under the NAFI administration cost center, unless specifically designated for a particular department.

A0609 COUPONS. To assess the impact coupons have on operating activity programs, record the face value of coupons as sales or fees and charges, as appropriate. Cashiers will record the total value of the sale including coupons received. Record the total amount of redeemed coupons on the daily cashiers report.

A0610 TOKEN ACCOUNTABILITY. Tokens are counted, reported, and controlled the same as cash when used by a NAFI. When tokens are sold, record the sale as unearned revenue. When tokens are redeemed, record an entry to reverse the entry which was made when they were sold. When a series of tokens is changed, move the amount of unredeemed tokens to miscellaneous income, under the administration cost center. If a shortage occurs, record the amount as a charge to miscellaneous expense.

A0611 INTEREST INCOME. When interest is earned, record it at the NAFI administration cost center.

A0612 OPERATING SUBSIDIES. When subsidies are received from foreign governments, record all applicable expenses in full to the applicable cost center and record the subsidy as nonoperating income in the same cost center.

A0613 LAYAWAY SALES. When merchandise is sold on layaway, the sale will be

recorded at that time. The merchandise will be segregated from other resale merchandise and should be considered sold. Therefore, the cost of goods sold entry should occur at the same time the sale is recorded. The following entry will be recorded at the time of the sale:

DR GLAC 101 - US Cash	\$ 10
DR GLAC 138 - Layaway Receivables	\$490
CR GLAC 303 - Layaway Sales	\$500

To record the sale of merchandise on layaway.

If the layaway sale is later canceled, the merchandise should be returned to inventory and the previous entry reversed.

CHAPTER 7

EXPENSES

A0701 GENERAL. Expenses are the cost of goods, services, and facilities used in the production of revenue. Expenses are deducted from revenue in determining net income.

A0702 T R A V E L A N D TRANSPORTATION. NAF personnel traveling under official orders citing appropriated funds will be processed by the servicing DAO. NAF personnel traveling under official orders citing NAF will be processed by the CAO as follows:

A070201 Advances. Advances will be requested using DD Form 1351 (Travel Voucher). The NAFI authorizing the travel will prepare DD Form 1351 and submit it to the CAO, with a request for check issuance at least 5 working days before the scheduled date of departure. Two copies of the document authorizing the travel (travel order) will accompany the DD Form 1351. The CAO will review the traveler's DD Form 1588 (Record of Travel Payments) to ensure that the traveler has not previously received an advance for the travel. The NAF CAO may compute the travel advance, or delegate this responsibility to the DAO. If the CAO delegates the advance computation, the CAO will then send the DD Form 1351 to the travel section of the servicing DAO via transmittal letter. The DAO will compute the amount to be advanced and return the DD Form 1351 to the CAO for payment. Advances should not be paid prior to 5 calendar days before the scheduled departure date.

A070202 Travel Settlement Vouchers. When travel is complete, DD Form 1351-2 (Travel Voucher or Subvoucher) must be submitted to the CAO, even if no advance was made. Travel vouchers involving an advance must be submitted for settlement within 15 days after the travel is completed. All other travel vouchers must be submitted for settlement within 30 days after the travel is completed. The CAO will send the DD Form 1351-2 to the travel section of the servicing DAO via transmittal letter; the DAO will compute the settlement,

complete DD Form 1351-2, and return it to the CAO. If the settlement amount is more than the advance, the CAO will make payment to the traveler. If the advance was more than the settlement amount, the CAO will notify the NAFI that authorized the travel to collect the excess advance from the traveler. If the advance is not collected from the traveler after notification, it may be collected from the traveler's pay. (See AR 215-3)

A070203 Record of Travel Payments. All temporary duty travel and permanent change of station travel and transportation costs is recorded on DD Form 1588. The CAO serving the traveler will maintain the DD Form 1588 in alphabetical order. When a travel advance is paid, the CAO will annotate the traveler's DD Form 1588 for the payment. The accounting copy of the travel voucher will be annotated with a suspense date of 15 days after the scheduled return date. The advance suspense file will be reviewed daily to insure that all advances are settled.

A070204 Accounting Entries.

A. When an advance is paid:
DB GLAC 119 - Advances Receivable
CR GLAC 101 - US Cash.

B. In the month the travel occurs, debit the estimated cost of the travel to the expense account and credit the Miscellaneous accrual account.

C. When the travel is settled:

1. Reverse prior entry to expense and accrual.
2. If advance was not previously paid, debit the appropriate expense account for the total cost of the travel and credit Accounts Payable. Process check payment to traveler.

3. If advance was previously paid, debit the appropriate expense account for the total cost of the travel and credit Advance Receivable for an amount not to exceed the traveler's entitlement. If the advance was less than entitlement, credit Accounts Payable for the difference. If advance was greater than entitlement, the uncleared advance amount remains in Advances Receivable until cleared through receipt of cash from the traveler or by payroll deduction as applicable.

A0703 ACCOUNTING FOR VOLUNTEER CHILD CARE EXPENSES.

Volunteer expenses for child care may be reimbursed by the using activity (see AR 215-1). Three methods of payment are possible, depending on the activity and volunteer preferences; petty cash disbursement, inter-department expense transfer (NAFI departments) and prepayment deposit (non-NAFI activities). Accounting entries are as follows:

A070301 Petty Cash Vouchers. Upon settlement of petty cash vouchers (when volunteers are directly reimbursed for private child care costs). DR 678-Volunteer Service and CR 101-Cash.

A070302 Cost Transfer. Upon receipt of Child Development Center (CDC) sign-in sheet for NAFI departments, enter a cost transfer. Any disagreements between the CDC and NAFI department concerning the amount of the cost transfer will be resolved by the CDC and/or Financial Management Division. DR 678 (for the using department) and CR 678 (for the CDC).

A070303 Receipt Of Cash. When cash is received from non-NAFI activities for prepayment of CDC charges (The CAO must keep a subsidiary ledger to account for the prepayment). DR 101-Cash and CR 202-Deposits Payable.

A070304 Income. Upon receipt of sign-in sheets from CDC for non-NAFI activities showing that the services were provided. DR 202-Deposits Payable and CR 501-Service/Recreation Activity Income.

A0704 INSURANCE PREMIUMS FOR FAMILY CHILD CARE PROVIDERS. The Army Risk Management Insurance Program (RIMP) extends insurance coverage at a nominal fee for home providers of child care. The premiums collected for this coverage are forwarded to CFSC. The NAFI does not record the amount collected from the home providers as income and the amount paid to CFSC is not recorded as an expense. The collections and payments are recorded as payables without impacting the income statement. Accounting entries are as follows:

A070401 Premiums. When the NAFI collects the premiums from the child care providers.

DR 101 - US Cash
CR 202 - Deposits Payable

A070402 Recording. When the RIMP bill including NAFI insurance premiums, as well as child care providers insurance premiums, is received.

DR 733 - Insurance Premiums Expense
CR 201 - Accounts Payable
DR 202 - Deposits Payable
CR 201 - Accounts Payable

A070403 Payment. When the RIMP bill is paid,

DR 201 - Accounts Payable
CR 101 - US Cash.

A0705 BILLETING FUND SURCHARGE.

A070501 Collection Of Surcharge. The Department of the Army Billeting Fund (ABF) will collect a 5 percent surcharge on installation Billeting 501-Service/Recreation Activity Income. The CAO must calculate and record the 5 percent surcharge amount in GLAC 758-Army Billeting Fund Surcharge Expense. The entry in GLAC 758 will be made prior to the monthly closing of the accounting books. The CAO will also record the 5 percent as a liability in GLAC 238-Army Billeting Fund Surcharge Payable.

A070502 Transfer of Funds. The U.S. A (CFSC) account equal to the balance in GLAC 238 and transfer the funds to the ABFs' account. This transfer will occur quarterly on the last business day of the second month after the end of the quarter. CAOs should record the cash transfer on that date.

A0706 ENTERTAINMENT AND PROMOTION EXPENSE. Record the cost of entertainment or promotion in the cost center receiving the benefit.

CHAPTER 8

NONAPPROPRIATED FUNDS CENTRAL PAYROLL SYSTEMA0801 GENERAL

A080101 Pay and Leave Policy. The basic policies in AR 215-3 governing the pay and leave accounting for NAF employees will be followed.

A080102 Scope. This chapter concerns all CAOs that have transferred pay and leave services for NAF employees to the Nonappropriated Funds Central Payroll System (NAFCPS); Human Resources Offices (HRO) providing personnel services to CAOs and NAFIs; and NAFI managers and supervisors who are involved in the pay and leave input or output of the NAFCPS. All Army NAFIs within CONUS, Alaska, Hawaii, Japan, Korea, Panama, Puerto Rico and Europe will be serviced by the NAFCPS.

A0802 PAYROLL RESPONSIBILITIES

A080201 Servicing Payroll Offices. There are two servicing payroll offices. The CONUS Central NAF Payroll Office (CNPO) operates under the functional control of Defense Finance and Accounting Service-Indianapolis Center. The USAREUR Nonappropriated Funds Central Payroll Division (NAFCPD) operates under the functional control of NAF Finance and Accounting Operations, 266th Theater Finance Command.

A080202 Duties of Servicing Payroll Office. The servicing payroll office processes payrolls. It will:

A. Make timely payment to all employees assigned to it for pay and leave accounting.

B. Issue employee earnings and leave statements. DA Form 5352 (Nonappropriated Funds Earnings and Leave Statement) (from CNPO) and DA Form 5352-1 (Nonappropriated Funds Earnings and Leave Statement) (from NAFCPD). DA Forms 5352 and

DA Forms 5352-1 can be obtained from the US Army Publications Distribution Center.

C. Provide various disbursement services such as mailing of paychecks, savings bonds, and savings allotment checks based on the instruction of employees, HROs, and NAFI managers.

D. Prepare and maintain all pay and leave records and reports.

E. Report errors detected in personnel or payroll action documents, DA Form 4850 (Nonappropriated Funds Time and Attendance Report) or DA Form 4850-1-R (Nonappropriated Funds Time and Attendance Supplement Report) to the proper office.

F. Ensure that documents needed to make payment to employees have been received before payment is made.

G. Cooperate fully with all serviced offices in the primary mission of pay and leave accounting.

H. Answer all inquiries from serviced offices regarding pay and leave when information is not included in data normally provided by the servicing payroll office.

I. Process tax levies or court orders against wages earned.

J. Withhold Federal, State, and local taxes and remit them to the proper government agencies.

K. Withhold employee deductions for NAF employee benefit programs and remit them, along with employer's contribution, to HQDA in accordance with AR 215-3.

L. Record amounts of unclaimed payroll checks returned from CAOs in accordance with A0806.

A080203 CAO Duties. The servicing CAO will:

A. Receive DA Forms 4850 and 4850-1-R from the NAFIs. Once all forms for the installation are collected, they will be mailed to the servicing payroll office. Installations outside of CONUS, except Hawaii, may transmit their records by AUTODIN, after verification with original payroll data, then mail the original DA Forms 4850 and 4850-1-R immediately after AUTODIN transmission. This function will be handled by the NAFI fund managers at installations serviced by a regional CAO.

B. Receive payroll checks (USAREUR excluded), payroll listings, and preprinted DA Forms 4850 from the servicing payroll office for distribution to the NAFI managers or, CAO employees, and other NAF employees at the installation. For Korea, the CNPO computes the pay and transmits net pay issue records via AUTODIN to the CAO for local check preparation.

C. Make proper G/L accounting entries upon receipt of payroll listings and checks from servicing payroll office.

D. Return unclaimed/undeliverable payroll checks to servicing payroll office in accordance with A0806.

A080204 HRO Duties. The servicing HRO will:

A. Prepare all personnel or payroll action documents and submit them to the servicing payroll office.

B. Submit all changes to the employee's Master Employee Record. Examples are a change of address, a new IRS Form W-4, a new allotment or a change to an existing allotment, and other acceptable forms (A080403).

C. Review payroll reports returned from the CAO per A080702.

D. Comply with AR 215-3, other regulations, personnel and pay manuals, and

directives from HQDA on pay, leave, and personnel of NAFIs.

A080205 NAFI Duties. The serviced NAFIs will:

A. Provide the CAO with correct documents, as required, to support payment and leave accounting for employees.

B. Insure that prescribed procedures for DA Forms 4850 and 4850-1-R preparation and reporting are followed.

C. Collect and deposit overpayments not recoverable from payroll deduction, as requested by the servicing payroll office, and advise the CAO when collection has been made.

D. Collect and deposit fees paid to employees on jury duty.

E. Make required corrections related to pay and leave, in coordination with the servicing payroll office.

F. Interpret and administer regulations on entitlement to pay and leave.

G. Return undeliverable payroll checks to CAO or servicing payroll office for disposition.

A0803 ESTABLISHMENT OF PAY PERIOD. Pay periods are established on a biweekly basis and end on every other Wednesday.

A0804 PERSONNEL OR PAYROLL ACTION DOCUMENTS.

A080401 Maintenance of Payroll Files. The payroll copy of all personnel or payroll action documents will be maintained by the servicing payroll office.

A080402 Document Transmittal.

A. The HRO of the serviced installation will promptly transmit to the

servicing payroll office all personnel or payroll action documents required to maintain individual pay and leave records. The transmittal memorandum/form will be prepared in triplicate. The original and one copy will be sent to the servicing payroll office. One copy will be kept at the servicing HRO.

1. Payroll copies of personnel or payroll action documents to be processed by CNPO must be mailed with a transmittal memorandum, Subject: Personnel/ Payroll Actions Transmittal Number ____ within 1 workday of the day they are authenticated. For installations serviced by CNPO transmittal memorandum and payroll documents will be sent to the Central NAF Payroll Office, PO Box 75, Texarkana, TX 75504-0075.

2. Payroll copies of personnel or payroll action documents to be processed by NAFCPD must be mailed with USAREUR Form AE 1097-R. For installations serviced by NAFCPD transmittal form and payroll documents will be sent to the APO mailing address, CDR, 266th TFC, NAF Payroll Division, Unit #29001-07, APO AE 09007-0137 or the German mailing address, NAF FIN & ACCTG OPNS, 266th TFC, ATTN: NAF Payroll Division, POSTFACH 10-5704, 6900 Heidelberg, Germany.

B. Pay actions will not be processed during the current pay period for employees whose personnel or payroll action documents are not received at the CNPO by noon on Wednesday the last day of the pay period. In USAREUR, pay actions will not be processed during the current pay period for employees whose personnel or payroll action documents are not received in the servicing payroll office by noon on Thursday following the end of the pay period. Their pay or adjustment to pay will be deferred and included in the check for the first full pay period after receipt of the documents.

C. Sample transmittal memorandum is shown in Figure 8-1.

D. Transmittal memorandums will be sequentially numbered, preceded by the

two-letter installation code and followed by the two-digit calendar year (Examples: RR-1-93, RR-2-93, RR-3-93). The transmittal will be date-stamped on receipt at the servicing payroll office. When received, documents will be compared with the list on the transmittal memorandum and reviewed for completeness. Receipt will be acknowledged by signing and returning the duplicate copy. Documents that do not comply with AR 215-3 and other instructions will be returned to the serviced installation for proper completion.

A080403 Documents Submitted to the Servicing Payroll Office. The following is a list of forms that will be accepted by the servicing payroll office to establish, change, or terminate an employee's records.

A. DA Form 3434, Notification of Personnel Action

B. DA Form 3473, Application for USANAF Plan and/or Group Insurance Plans

C. EBB Form 401(k), US Army NAF Employee 401(k) Savings Plan Investment and Disposition Authorization

D. IRS Form W-4, Employee's Withholding Allowance Certificate (Individual State, county, city, or local withholding forms may be accepted.)

E. IRS Form W-5, Earned Income Credit Advance Payment Certificate

F. SBD 1192, Authorization for Purchase and Request for Change-US Series EE Savings Bonds

G. SF 1187, Request for Payroll Deductions for Labor Organization Dues

H. SF 1188, Cancellation of Payroll Deductions for Labor Organization Dues

I. SF 1190, Foreign Allowance Application, Grant, and Report

J. SF 1199A, Direct Deposit Sign-up Form

K. TSP-1, Thrift Savings Plan Election Form

L. Memorandum for:, To be used by the employee to send the HRO information not provided on other acceptable forms. Example: Change of address for an employee not participating in the US Army NAF Employee Benefits System.

A080404 Document Omission. The HRO is responsible for ensuring all personnel or payroll action documents are properly documented and submitted to the servicing payroll office in a timely manner. If an action is not included in the pay cycle, the NAFI manager or HRO will determine the reasons for the omission and take necessary corrective action to include it in the next pay cycle.

A0805 PROCEDURES FOR SUBMISSION OF TIME AND ATTENDANCE FORMS

A080501 Time and Attendance Forms. The time, attendance, and leave of each NAF employee is maintained on DA Form 4850 and DA Form 4850-1-R.

A080502 Maintenance of DA Forms 4850 and 4850-1-R.

A. Each NAFI manager will obtain blank DA Forms 4850 through the post publications office. In USAREUR, the blank DA Forms 4850 will be obtained from the local CAO. Each NAFI manager will keep enough DA Forms 4850 on hand for at least one full pay period. Preprinted DA Forms 4850 will be produced each pay period by the servicing payroll office for employees in a pay status. These will be sent to the CAO for distribution to the NAFIs for future use. DA Forms 4850 for the first three pay periods (two pay periods in USAREUR) of employment must be prepared by hand. For new-hires, the HRO will complete the bottom line of the DA Forms 4850 for the three pay periods (two pay periods in USAREUR) and

attach the forms to copy 6 of the DA Form 3434 (Notification of Personnel Action- NAF Employee), to be sent to the NAFI manager.

B. Each NAFI manager, supervisor, or appointed timekeeper will maintain the DA Forms 4850. The original copy will be forwarded to CAO. Copy two will be held for adjustments or lost forms. Copy three will be retained for a file copy.

C. DA Form 4850-1-R will be locally reproduced on 8-1/2 by 11-inch paper. A copy for local reproduction purposes is located at the back of this volume. Each NAFI manager, supervisor, or appointed timekeeper will maintain the DA Forms 4850-1-R. Each DA Form 4850-1-R will be attached to the corresponding DA Form 4850 for submission to servicing payroll office.

D. DA Forms 4850 and 4850-1-R will be grouped at NAFI level, a 1-digit number, or at NAFI-location level, a 3-digit number.

E. The NAFI manager, supervisor, or designee is responsible for the authentication of DA Forms 4850 and 4850-1-R. No employee or supervisor may sign his or her own DA Forms 4850 and 4850-1-R. No employee may sign his or her own supervisor's DA Form 4850 or 4850-1-R. Corresponding DA Forms 4850 and 4850-1-R will be signed by the same person.

F. The timekeepers will:

1. Prepare DA Form 4853-R (NAF Time and Attendance Transmittal Form) when submitting any documents to servicing payroll office.

2. At the end of each pay period, arrange DA Form 4850 and 4850-1-R in work center sequence and within each work center in social security number sequence.

3. Record the total number of DA Forms 4850 and 4850-1-R in the space provided on DA Form 4853-R (NAF Time and Attendance Transmittal Form). DA Form 4853-R will be locally reproduced on 8-1/2 by 11-inch

paper. A copy for local reproduction purposes is located at the back of this volume.

4. List individually all other documents submitted after the pay period ending date.

A080503 Submission of DA Forms 4850 and 4850-1-R.

A. Each NAFI manager, custodian, or supervisor will review the DA Forms 4850 and 4850-1-R for accuracy, completeness, correction of errors, proper initials on all corrections and proper signature, and submit them to the CAO. The CAO will mail the forms on Thursday following the end of the pay period on Wednesday. The forms will be packaged so that they will not be damaged or lost in transit. If the forms package weighs 11 ounces or less, mark it FIRST CLASS. If it weighs over 11 ounces, mark it PRIORITY. The word FIRST CLASS or PRIORITY should be large enough so that they can easily be read by postal employees. FIRST CLASS and PRIORITY applies to all domestic mail, including APO mail. USAREUR Mailing Instructions: The forms can be mailed via APO or German Bundespost. If Bundespost is used, mail forms either regular or express to the German address. Do not use registered mail and do not use government franked envelopes as this delays receipt. Forms mailed via APO must be addressed to the APO address. Time and attendance forms received by mail after 1500 hours on the Tuesday following the pay period ending on Wednesday will be checked for the postmark date. If the postmark date is later than Thursday after the pay period ending on Wednesday, a service fee will be charged for each DA Form 4850. The mailing addresses for the payroll offices are in A080402A.

B. The CAO has both the fiduciary responsibility for collection and mailing of the DA Forms 4850 and 4850-1-R and the authority to delegate these responsibilities to another central designee if the delegation will not impede the delivery of reports to the servicing payroll office. The keyword is CENTRAL, as the efficient processing of payroll at the servicing payroll offices is dependent upon having a

central point of contact at each installation or community.

C. Each NAFI manager or supervisor will insure that a proper DA Form 4850 or 4850-1-R is submitted for each employee with hours to be reported. The servicing payroll office will process pay or leave for an employee only when an authenticated form is received containing hours worked or leave taken.

A080504 Adjustments to DA Form 4850 and DA Form 4850-1-R. Each NAFI manager or custodian will notify the servicing CAO of any adjustments required as soon as possible after the end of a pay period. Changes will be made on copies number two and three of DA Form 4850. Copy two of the DA Form 4850 will be signed by any person who has a proper DD Form 577 (Signature Card) on file at the servicing payroll office for that NAFI. Adjustments to DA Form 4850-1-R will be made on a new DA Form 4850-1-R. This form will be signed by any person who has a proper DD Form 577 on file for that NAFI in the servicing payroll office. If adjustment is only needed on DA Form 4850-1-R, the corresponding DA Form 4850 is not required to be sent to the payroll office. The servicing CAO will be responsible for sending adjustments to the payroll office. If the adjustments are not received by the payroll office in time to be incorporated into the current pay period, adjustments will be made in the next pay period. When the following errors are found on DA Form 4850 and DA Form 4850-1-R, the payroll clerk will process the time and attendance report and then request correction by the sender:

A. Questionable pay entitlement: Tour of duty does not agree with hours reported, tour of duty uncertain, or holiday worked or taken uncertain.

B. Corrections made on DA Form 4850 and DA Form 4850-1-R not initialed.

C. Scheduled hours as reflected on DA Form 3434 (Notification of Personnel Action) not accounted for on DA Form 4850 and DA Form 4850-1-R.

D. DA Form 4850 and DA Form 4850-1-R sent without signature.

E. Unauthorized signature on DA Form 4850 or DA Form 4850-1-R.

F. NAFI code reported on DA Form 4850 or DA Form 4850-1-R does not agree with DA Form 3434.

NOTE: The work center code in DA Form 4850 and DA Form 4850-1-R will be shown in the following sequence: NAFI code (Position 1), location code (Position 2-3), department code (Position 4-5), and constant "00" (Position 6-7). The standard NAFI number (SNN) in DA Form 3434 will be shown in the following sequence: Installation code (Position 1-2), NAFI code (Position 3), program code (Position 4- 5), location code (Position 6-7), and department code (Position 8-9).

A080505 DA Forms 4850 and 4850-1-R Correction Suspenses. For DA Forms 4850 and 4850-1-R returned for correction, there is a 21 day from date of return suspense for a first request. If corrections are not received, a second request will be forwarded to the CAO (or fund manager in the case of remote CAO) with a suspense date of 15 days from the date requested. Third requests are forwarded to the installation Defense Accounting Office.

A080506 Submission and Use of DA Form 577. Each person authorized to authenticate personnel/payroll action documents, time and attendance reporting documents (DA Forms 4850 and 4850-1-R) and/or Tips, Service Charges, and Meal Reporting documents (DA Form 5163-R) must complete a DD Form 577 (Signature Card) and send it to their servicing payroll office. A copy will be furnished to the servicing CAO. In addition to the name, grade, date, and signature the form must also have the installation name, fund and location codes and the individual's initials. (NOTE: The local commander may require department code also) DD Form 577 will be updated and sent when there are supervisory changes or changes of existing fund, location, or department (if required locally) codes. Payment will not be made on DA Form

4850, DA Form 4850-1-R, and DA Form 5163-R unless a DD Form 577 containing the authenticating official's signature is on file in the servicing payroll office.

A080507 Tips and Service Charges.

A. The Internal Revenue Service requires that employees report tip income on IRS Form 4070 (Employee's Report of Tips to Employer). A similar form can be used if it shows the employee name, social security number, employee address, employer name and address, date submitted to the employer, total tip income received, and the employee's signature.

1. A tip is a voluntary payment by a customer to an employee for services performed.

2. A tip is not subject to negotiation nor dictated by management policy.

3. The customer has a right to precisely determine the amount and recipient of the tip.

4. A tip may be either cash or charge.

B. Cash tips are cash that the employee receives directly from the customer. These tips must be reported to the NAFI manager on IRS Form 4070. The fund manager will complete DA Form 5163-R (Nonappropriated Funds Central Payroll System Tips, Service Charges and Meals Report). Cash tips will be reported under the heading "Reported Tips".

C. Charge tips are the amount the customer adds to a charge ticket to be paid to the employee as a tip. The liability for the tip payable will be established in GLAC 230. The tip will be billed to either the customer or credit card company depending on the type of accounts receivable system being used. There are two ways charge tips may be paid to an employee.

1. The employee may request payment directly. If payment is

requested, the fund manager will submit a request for payment to the CAO. The CAO may issue a local check for the amount of tips reported on the DAR for that employee. The accounting entry will be Debit GLAC 230 and Credit GLAC 101, US Cash Account. The tip payment is then a cash tip to the employee and procedures in (2) above apply.

2. The employee may request that charge tips be paid through the payroll office to be included with their regular payroll check. If this occurs the NAFI manager will provide the employee with a detailed list of tips charged. The employee will complete IRS Form 4070, or similar form and return the completed form to the NAFI manager for submission to CAO with DA Form 5163-R. Report these tips under the heading "Charge Tips".

D. The NAFI manager will complete DA Form 5163-R for each NAFI. They will submit the form to the CAO with other payroll documents the same pay period tips or service charges are earned. DA Form 5163-R will be reproduced locally on 8-1/2 by 11-inch paper. The tips must be reported under the proper heading: "Reported Tips" or "Charge Tips".

E. A service charge is a mandatory charge added to the customer's bill. The NAFI will record the amount in GLAC 527, Service Charge Income. The service charge may be distributed to the employee at the NAFI manager's discretion. If distributed, the service charge will be treated as additional wages and will be included in GLAC 601, Salaries and Wages. Service charges will be reported on DA Form 5163-R under the heading: "Service Charge."

F. Installations are authorized the option to participate in the tip offset system except those in the States of Alaska, California, Nevada, New Mexico and Washington. Under the tip offset system, a part of the employee's hourly wage is composed of tips. Installations will determine the tip offset rate in accordance with AR 215-3, chapter 3. The HRO will furnish the tip offset rate on DA Form 3434, Notification

of Personnel Action, after the tip offset rate is provided by the NAFI. NAFICPS will compute tip offset based on DA Form 5163-R submitted by the installations. The service charge described in A080507E above will not be used in the tip offset calculation.

G. It is the responsibility of the NAFI to compute a tip allocation for those employees whose reported tips are less than 8 percent of applicable gross sales. Tip allocation amounts will be used for informational purposes only. Allocated tips are not subject to either FICA (OASDI and Medicare) or Federal withholding taxes. No G/L entries are required. The tip allocation will be reported on DA Form 5163-R in the "Tip Allocation" column.

A080508 Meals. Meals provided to employees that are to be deducted from pay will be reported on DA Form 5163-R.

A080509 Worker's Compensation. This compensation is provided for employees injured on the job. AR 215-1, chapter 13 prescribes the basic policies and procedures for Worker's Compensation.

A0806 CHECK AND BOND MAILING

A080601 Check Mailing.

A. A maximum of 3 workdays will be allowed for the processing and preparation of payrolls in the servicing payroll office.

B. The time between the end of the pay period and the distribution of checks by the servicing payroll office will be no more than 8 calendar days. The payday for NAF employees serviced by CNPO will be the second Wednesday following the end of the pay period. The payday for NAF employees serviced by NAFICPD will be the second Monday following the end of the pay period.

C. Individual employee payroll checks and Earnings and Leave Statements (ELS) will be mailed to the CAO for delivery on the second Wednesday following the close of each pay period. In USAREUR, payroll checks and

ELS will be mailed to any address the employee designates. Composite checks will be mailed directly to the designated financial organization. The ELS will be mailed to the CAO or designated contact point. Bulk delivery of checks drawn on payrolls to individual payees may be made to third parties for distribution to payees.

D. The NAFI managers will designate in writing the person to receive checks for distribution; that person will receipt for all checks received from the CAO or the servicing payroll office. It is the responsibility of the NAFI manager to establish procedures covering distribution of the checks after they are received from the CAO or the servicing payroll office. Proper internal controls will be provided by the NAFI manager to insure that the handling and distribution of the paychecks is separated from the authorizing and recording of the payments. Undeliverable checks will be returned to the CAO or the servicing payroll office with the reason for nondelivery in accordance with paragraph A040104.

E. The servicing CAO, point of contact, or NAFI managers will notify the servicing payroll office immediately when errors or omissions are found on the payroll checks, reports, preprinted DA Forms 4850, or ELS.

A080602 Savings Bond Mailing.

A. All Series EE US Savings Bonds will be mailed directly to employees, using the address shown on SBD 1192. The bonds will be mailed by the servicing Federal Reserve Bank. To change the bond mailing address, a new SBD 1192 must be submitted to the servicing payroll office.

B. After the Federal Reserve Bank mails bonds, they forward bond registration information to the payroll office. This product provides bond issuance information.

A080603 Nonreceipt or Loss of Bonds. If a bond is not received within a reasonable time, the employee should notify the servicing CAO, in writing. The CAO will then contact the

servicing payroll office to begin the research process with the servicing Federal Reserve Bank.

A0807 OUTPUT REPORTS

A080701 Payroll Reports.

A. Reports are provided to the serviced installations to help the CAO, HRO, and NAFI or program managers manage their personnel and NAFI accounting.

B. Reports are produced and provided to the servicing payroll office to insure that the payroll is processed accurately.

C. Local managers are required to verify that persons paid and charged to their accounts are officially employed. This is done by using the payroll listings below. The servicing payroll office will provide the servicing CAO, HRO, and NAFI or program manager with copies of the following reports produced during pay cycles:

1. Personal Services Report, Biweekly (Figure 8-2)

2. Individual Leave Register, Biweekly (Figure 8-3)

3. Active Employee Address Listing, Upon Request (Figure 8-4)

4. Payroll Change Listing, Biweekly (Figure 8-5)

5. Notice of UA Employee Within-grade Increase Due, Biweekly (Figure 8-6)

6. NAF Centralized Payroll Data Report, Biweekly (Figure 8-7)

7. Transfer of Annual Leave Liability, Biweekly (Figure 8-8)

8. Compute Research Listing, Biweekly (Figure 8-9)

9. Panama Withholding and Educational Taxes, Biweekly (Panama Distribution Only) (Figure 8-10)

10. Caja de Seguro Social de Panama Feeder Report, Monthly (Panama Distribution Only) (Figure 8-11)

11. Quarterly Review of Hours Worked, Quarterly (Figure 8-12)

12. MWR Personnel Strength Report, Quarterly (Figure 8-13)

13. Annual Leave Forfeit Report, Annually (Figure 8-14)

14. NAFI Employees' Compensation and Benefits Program Report, at Fiscal Year End (Figure 8-15)

15. Employee Cross Reference Roster, Upon Request (Figure 8-16)

16. Tip Offset/Service Charge Report, Biweekly (Figure 8-17)

17. Quarterly Inactive Employee Report, Quarterly (Figure 8-18)

18. Compensatory Aging Schedule, Biweekly (Figure 8-20)

19. Annual Leave / Compensatory Time Adjustment Report, Biweekly (Figure 8-21)

20. Compensatory Time Subsidiary Report, Biweekly (Figure 8-22)

21. Home Leave Report, Biweekly (Figure 8-23)

A080702 Brief Description of Reports.

A. Personal Services Report. This report is produced each pay period and shows the current pay for each employee. It is prepared on DA Form 5314, Personal Services (Comprehensive) Nonappropriated Fund Employees. DA Form 5314 is stocked at Red

River Army Depot for use by CNPO and at Rodelheim, Germany for use by NAFICPD. Base pay, gross pay, and net pay are shown with the check number for each employee paid. If the net pay for a person is part of a composite check, the check number is replaced with "ORGN" and the financial organization code. Cash awards are posted separately, below the current pay line entry. The cash award check number is included. The current totals for each work center are shown after the last listed employee of each work center. The amount of each check must be compared to the amounts on this report by the NAFI manager or his representative.

B. Individual Leave Register. This report shows annual, sick, and military leave, and leave or absences without pay for each employee. It includes the department total in each leave category. This report will be used by the servicing HRO to adjust an employee's official service computation date when applicable. It also provides the authority, based upon each person's leave balance, for approving leave. Leave is shown in hours and dollars for the pay period. The current total is shown only in hours.

C. Active Employee Address Listing. This listing gives all address and mailing instructions on the employee's Master Employee Record (MER).

D. Payroll Change Listing. This is a listing of all changes made to employees' MERs during the pay period. It will be used primarily by the servicing HRO to verify that the changes made match documentation submitted by the HRO.

E. Notice of UA Employee Within-grade Increase Due. This report shows UA employees who are within 120 days or 16 weeks of being eligible for a within-grade increase. An employee will remain on this report until his within-grade increase is effective. The servicing HRO will prepare DA Form 4017 (Request for Personnel Action-Nonappropriated Fund Instrumentality) and send it to the employee's supervisor for approval. For the UA employee's within-grade increase to be granted,

item 34 on DA Form 4017 must contain a statement that "work is of an acceptable level of competence" and the form must be signed and dated by the supervisor. Upon receipt of the signed DA Form 4017, HRO will prepare a DA Form 3434 (Notification of Personnel Action). Approved DA Forms 3434 are forwarded by HRO to servicing payroll office for input by payroll clerk. The servicing HRO will insure that all regulatory requirements have been met before authorizing the within-grade increase. (See AR 215-3.)

F. NAF Centralized Payroll Data Report. This report shows the amount of pay and leave expenses that are incurred. It gives all the G/L entries that are required to update the accounting system, record payroll expenses, adjust the accrued annual leave liability, adjust payroll advance accounts, and establish service charge liability. The G/L entries are given at the proper level (department, location, or NAFI) for entry into the accounting system. G/L entries will be provided for installations using NAFISS or MICROCADS. The CAO should insure that the Personal Services Report agrees with this report.

G. Transfer of Annual Leave Liability. This report provides the annual leave liability when an employee's leave balance is transferred from one work center to another. It gives the following data: Social security number, employee's name, annual leave balance in hours, losing and gaining installation code, work center, hourly rate, and the dollar value of annual leave. The CAO and affected NAFI managers will use this report as a basis for transferring monies from the old work center to the new work center. The transfer of monies must be performed in the accounting period for which the name appears on this report. The accounting entries are as follows:

1. When the employee's name is on the report, the gaining NAFI will establish a receivable:

DR 140 - Miscellaneous Other Receivables
CR 243 - Annual Leave Payable

2. The losing NAFI establishes the liability as follows:

a. Transfer without a change in grade:

DR 243 - Annual Leave Payable
CR 240 - Miscellaneous Other Payables

b. Transfer with a downgrade:

DR 243 - Annual Leave Payable
CR 240 - Miscellaneous Other Payables
CR 825 - Miscellaneous Other Nonoperating Income

3. When the money is transferred, the gaining NAFI will make the following entry:

DR 101 - US Cash
CR 140 - Miscellaneous Other Receivables

4. The losing NAFI will make the following entry:

DR 240 - Miscellaneous Other Payables
CR 101 - US Cash

H. Compute Research Listing. This listing is produced when pay is computed and gives informational type messages to identify when internal, automatic action was taken by the computer. An "I" indicates an informational message.

I. Panama Withholding and Education Taxes. This report is used only by Panama. It shows the NAFI name, employee's name, cedula number (7- to 9-digit identification number given to each Panamanian citizen at birth), gross pay, withholding tax, regular pay, and education tax for Panamanian employees. There is a separate line for NAFI totals and a separate page for overall totals. This biweekly report is sent to the CAO in Defense Complex Panama.

J. Caja de Seguro Social de Panama Feeder Report. This report is used only by

Panama. It shows the NAFI name, work center, cedula number, social seguro number (7-digit identification number unique to each Panamanian citizen in the Caja de Seguro Social de Panama System), employee name, gross pay, and the employer contributions and employee deductions to the Panamanian government. This monthly report is sent to the CAO in Defense Complex Panama.

K. Quarterly Review of Hours Worked. This report shows biweekly base hours assigned, regular hours worked, overtime hours worked, and total hours worked for all NAF employees. This report will be used by HROs to review hours worked versus base hours assigned, per AR 215-3.

L. MWR Personnel Strength Report. The installation level of the MWR Personnel Strength Report is sent to the CAO quarterly. The MACOM level is sent to the MACOMs the first and third quarters of the FY for information purposes. The second and fourth quarters the servicing payroll offices send the MACOM and DA levels of the report to CFSC and AAFCWF (See Volume 13, Chapter 7).

M. Annual Leave Forfeit Report. This report is produced only after the close of the leave year. It shows all forfeited leave, by individual, for that year.

N. NAFI Employees Compensation and Benefits Program Report. This report shows the NAFI employee costs (payroll and benefits for US employees, employees overseas, and foreign nationals) and NAF benefit programs (retirement, medical and life insurance) for each MWR program group. An additional page is produced which summarizes each program group. This report is produced at the end of the fiscal year and is sent directly from the servicing payroll offices to CFSC and AAFCWF in accordance with DoD reporting requirements (See Volume 13, Chapter 7).

O. Employee Cross-Reference Roster. This listing is used as a cross-reference of employee information. It will show each employee's social security number, name, work

center, type position code, grade and step, wage area code, first shift hourly rate, annual salary, type employment code, MWR category, installation code, intermittent days or weeks worked, base hours, retirement code, and life insurance and health benefits codes.

P. Tip Offset/Service Charge Report. This report will provide the work center code, employee social security number, employee name, tip offset rate, total tips, and service charges paid to the employee. Also total offset, which is derived by using the total hours in a tipped status times the tip offset rate.

Q. Quarterly Inactive Employee Report. This report will include the employee name, SSN, type of employment, and the date of the last pay period the employee worked for all inactive employees who did not work during that quarter. The purpose of this report is to inform the central accounting officer, NAFI managers, and civilian personnel officers (HRO), of inactive employees on the NAFPCPS master file. The report will be reviewed and verified by the HRO in conjunction with the NAFI or program managers to determine the proper status of employees who have not worked for at least three months.

R. Compensatory Aging Schedule. This report includes the employee name, SSN, pay period number, compensatory hours, and the overtime rate, at which compensatory hours were worked for the 13 pay periods that compensatory balances are carried. The purpose of this report is to inform the CAO and NAFI manager of the compensatory time balance for each employee and the aging of that balance.

S. Annual Leave/Compensatory Time Adjustment Report. This report will include the employee name, SSN, annual leave adjustment, compensatory time adjustment, and compensatory time converted to overtime adjustment. It shows adjustments made to GLAC 243 (Annual Leave Payable), GLAC 247 (US Employee Compensatory Time Payable), and GLAC 248 (Foreign National Employee Compensatory Time Payable for Panamanian Foreign Nationals).

T. Compensatory Time Subsidiary Report. This report will be used by the CAO as a subsidiary record for GLAC 247 and GLAC 248. It includes each employee's current compensatory time balance. In addition, it informs managers two pay periods in advance of employees who have compensatory time balances that are close to conversion to overtime.

U. Home Leave Report. This report is a management information tool. It contains the employee's name, social security number, home leave overseas entrance on duty date, home leave accrual date, home leave eligibility date, accrual rate, beginning of leave year home leave balance, accrued and taken year to date, accrued and taken current pay period, dollar value of home leave taken current pay period, current balance of home leave, current pay period leave without pay, and service year leave without pay.

A0808 TRANSFERRING PAYROLL CASH. One week following the end of each pay period the individual NAFIs must have cash in their bank checking account equal to the gross pay and the employer's share of fringe benefits based on the previous pay period. For CBP participants payroll cash will be transferred by electronic fund transfer (EFT). Installations having NAFIs that are not CBP participants will wire transfer the amount of the consolidated payroll cash for all NAFIs they service. Communities serviced by NAFCPD must have a bank account with the military banking facility.

A080801 EFT. CNPO pulls payroll costs directly from NAFI checking accounts at the central bank. The EFT will occur concurrently with the distribution of the paychecks from CNPO, normally on Wednesday preceding payday. NAFCPD automatically transfers payroll costs from NAFI checking accounts by the second Friday after the pay period ending on Wednesday.

A080802 Wire Transfer. Installations must instruct their servicing bank to wire transfer the payroll cash in time for it to reach the central bank during banking hours on the Wednesday prior to payday (Thursday if Wednesday is a bank holiday). The name of the central bank

and the CNPO account number to be used will be published separately since they are subject to change.

A0809 PAYMENTS The servicing payroll office will send payroll checks to the CAO that services each installation. If an installation does not have a CAO or is serviced by a regional CAO, checks will be sent directly to the NAFIs. The NAFCPD will mail all individual payroll checks directly to the employee's designated address. The NAF Centralized Payroll Data Report will be sent to the servicing CAO.

A080901 The Servicing CAO Will (For Each NAFI):

DR 601 - US Salaries and Wages
DR 6XX - Various Payroll Expense Accounts
CR 101 - US Cash

A080902 Data for Entries. Data for the entries (payments) in A080901 above will be provided each pay period to the CAO. Those installations or NAFIs using NAFISS (MICROCADS in USAREUR) will receive punched cards or magnetic tape and a hard copy NAF Centralized Payroll Data Report.

A0810 SERVICE CHARGES. A service charge will be assessed in each pay period. These charges will be based on a predetermined rate multiplied by the number of employee records on the payroll master file (The rate will be published separately and changed as required). Payment of service charge will be combined with the transfer of payroll cash as described in A0808. Accounting entries will be:

DR 689 - Payroll Service Expense
CR 101 - US Cash

A0811 ANNUAL LEAVE

A081101 Liability. Annual leave liability will be maintained in the general ledgers of the individual NAFIs. The Individual Leave Register will be used as the subsidiary to GLAC 243 (Annual Leave Payable). GLAC 243 balance on the Individual Leave Register can be located on

the Fund Total page. Adjustments to GLAC 243 will be processed by the servicing payroll office. The Centralized Payroll Data Report will show the dollar amount of adjustment and NAFPCS will produce the punched card or magnetic tape record necessary to update the general ledger.

A081102 Advance Leave. When an employee has been granted advance annual leave and continues in a leave accruing status, the amount of leave accrued each pay period will reduce the amount of the advance leave balance.

A081103 Transfer to Ineligible Status. When an employee is transferred from an eligible leave status to an ineligible leave status, the policy is as follows:

A. At the time the employee is transferred, the payroll clerk servicing that installation will review the NAF Individual Leave Register to insure the employee does not have a negative annual leave balance.

B. If the employee has a negative annual leave balance, the payroll clerk will inform the employee's NAFI manager through the servicing HRO. The NAFI manager will make proper arrangements with the employee for a set amount to be deducted from the employee's biweekly pay until the negative balance is liquidated. The NAFI manager will advise the servicing payroll office, through the HRO, of collection arrangements. The servicing payroll office will then take required actions to collect the monies owed for the leave debt.

C. When an employee terminates employment with a negative annual leave balance, the annual leave debt will be deducted from the employee's base wages. If the wages are less than the debt, the servicing payroll office will advise the NAFI manager through the servicing HRO of the balance owed. The employee's NAFI manager must then collect the debt.

A0812 **SICK LEAVE**

A081201 The servicing CAO will enter the dollar value of sick leave taken (by department

or location within each NAFI) by a debit to GLAC 605 and a credit to GLAC 601.

A081202 When an employee is transferred from a leave accruing status to a non-leave accruing status, the policy is as follows:

A. The payroll clerk will review the NAF Individual Leave Register to ensure the employee does not have a negative sick leave balance.

B. If the employee has a negative leave balance, the sick leave debt will be collected by offsetting the lump sum payment for annual leave due him. If the annual leave payment is less than the debt, the servicing payroll office will proceed as for annual leave in A081103B.

A081203 Termination with Negative Sick Leave Balance. When an employee has been granted advance sick leave and terminates employment with a negative sick leave balance, the leave debt will be collected by offsetting the lump sum payment for annual leave due him. If the annual leave payment is less than the debt, the remaining debt will be deducted from the employee's base wages. If wages are less than the debt, the servicing payroll office will advise the NAFI manager through the servicing HRO of the remaining balance owed. The employee's NAFI manager must then collect the debt.

A081204 Recording Advanced Sick Leave. Entries required to effect the proper G/L transactions for an authorized advance sick leave balance are as follows:

A. No entry is required while the employee is in a sick leave accruing status.

B. When the employee changes to a non-leave accruing status or terminates employment:

DR 140 - Miscellaneous Other Receivables
CR 605 - Sick Leave

C. To liquidate the receivable established in A081204B above:

DR 101 - US Cash

CR 140 - Miscellaneous Other Receivables

A0813 HOME LEAVE Home leave is automatically accrued and recorded to eligible employee records via NAFCPS in accordance with AR 215-3.

A081301 Accrual. Home leave may be accrued at the rate of 5, 10, or 15 days for 12 months service depending upon employee's eligibility and Home Leave Accrual Date. Unless adjusted by excess leave without pay, the Home Leave Accrual Date will be the same as the Overseas Entrance-on-duty Date. The balance of home leave carries over every year. There is no maximum accumulation.

A081302 Employee Terminates with Balance. If an employee terminates, the home leave balance is maintained in his terminated record, and if he/she returns to work with less than a 90-day break in service, the balance of home leave is restored for use. If employee transfers from overseas to the States and transfers back overseas AT ANY LATER DATE without more than a 90-day break in service, he/she will have the balance of home leave restored for use.

A081303. AWOP. For periods of absence without pay (AWOP) in excess of two workweeks within each 12 months of service abroad the system will automatically lengthen, at the rate of a day for a day, the period of time on which the individual will accrue home leave.

A081304 Reported in Whole Days. Home leave days taken will be reported on DA Form 4850-1-R in whole days only. Days of home leave taken in excess of days earned will automatically be cutback to annual leave by the NAFCPS. If the individual does not have annual leave sufficient to cover the excess home leave, the balance not covered will be cutback to leave without pay (LWOP).

A081305 GLAC Entries. For installations which have eligible individuals who have taken home leave during the current pay period the GLAC entries are:

DR 623 - Home Leave Expense

CR 601 - US Salaries and Wages

A0814 ACCRUALS

A081401 Payroll Expense. At the end of the month, the servicing CAO will accrue the payroll expense for the estimated gross amount of the unpaid payroll. Employer's share of benefits will be accrued individually. The estimate should be based on the previous pay period. Accounting entries are as follows:

DR 601 - US Salaries and Wages

DR 603 - US Annual Leave

DR 611 - Employers Share of FICA

DR 612 - Employers Share of Group Health and Life Insurance Plans

DR 613 - Employers Share of Retirement Plan

CR 214 - Life Insurance Premiums Payable

CR 215 - Retirement Payable

CR 242 - Salaries and Wages Payable

CR 243 - Annual Leave Payable

CR 244 - Payroll Taxes Payable

A081402 Reversal of Accrual. At the beginning of the next month, these entries will be reversed.

A0815 EMERGENCY PAYMENT PROCEDURES

A081501 Procedures. Cash payment procedures.

A. Determination of cash payment. Local payment to the employee may be made if his or her DA Form 4850 or 4850-1-R is missing, or hours were materially understated on DA Form 4850 or 4850-1-R.

B. Processing cash payment.

1. The CAO must call the servicing payroll office and state why the local payment is required. The nature and rarity of such emergencies require the approval of Chief, CNPO/NAFCPD, or his or her designee.

2. The Chief of the servicing payroll office will instruct the Inquiries

and Control Section to issue the CAO a control number for the approved local payment. The CAO will give the servicing payroll office the name of the installation, work center, the employee's name, his or her social security number, and hours worked. The CAO must provide the servicing payroll office with a DA Form 3434 and a properly authenticated time card before the pay can be computed. The payroll clerk will compute the amount to be paid based on actual hours worked. For new employees, the payroll clerk will base the computation on pay band, hourly rate and hours worked or grade, step, pay scale, and hours worked, as applicable. The CAO or NAFI manager will immediately send a letter to the servicing payroll office providing the information pertaining to the local payment (i.e., control number, pay period ending date, employee name, SSN and amount). The installation will be billed the service charge for the local payments. A CAO or NAFI manager will not disburse NAF funds for employee service without approval from the servicing payroll office. When a CAO or NAFI manager disburses NAF funds without proper approval, he or she is responsible for collection of those funds from the employee.

3. If an adjusted or missing DA Form 4850 or 4850-1-R is resubmitted after the employee has received a cash payment, the time on the second form is computed and added to the current pay. The previous cash payment is then deducted from the net pay.

4. If an employee was erroneously omitted from the current payroll, the servicing CAO, NAFI manager will determine why. The servicing CAO, NAFI manager will ensure that the next pay cycle includes the omitted pay data.

A081502 Payroll Contingency Procedures for Installations Serviced by the CNPO. If unforeseen circumstances prevent receipt of payroll checks at the local installations, the following contingency procedures will be used.

A. If checks are not received by 1400 hours on the second Tuesday following the

end of the pay period, the installation CAO or point of contact will inform the CNPO. (DSN 829-3135 or commercial (903) 792-6484. CNPO will re-issue the payroll checks and earnings and leave statements (ELS). These will be mailed via an overnight delivery service to arrive at the installation on the following Wednesday. (Persons participating in the composite check program will not be included). If the original payroll checks and ELS are received, the CAO or point of contact will return them to CNPO.

B. The CNPO will supply a payroll listing by either AUTODIN or facsimile machine transmission, as preferred by the local installation. If AUTODIN is used, the installation must provide AUTODIN routing information.

C. If the payroll checks have not been received by 1200 hours on Wednesday, the CAO may prepare and issue the local NAF payroll checks. No service fee will be charged to installations when payroll checks are not received by the time local checks are prepared.

D. The CNPO will wire transfer the money to cover the locally produced checks. It will void the checks printed at the CNPO. All efforts should be made to prevent distribution of checks received from the CNPO, if they arrive.

A081503 Payroll Contingency Procedures for Individuals Serviced by NAFCPD. In USAREUR individual payroll checks are mailed directly to each employee's designated address. If an employee does not receive his/her payroll check within three days from the date of the NAF payday he/she may request payment by the servicing CAO. The following contingency procedures will be used.

A. CAOs are authorized to make local payroll payment if an employee does not receive a payroll check within three days of the NAF payday. The CAO will require the employee to sign AEUCF Form 316 certifying that if original check is subsequently received, the employee will return it, uncashed, to the CAO for forwarding to the NAFCPD.

B. Before making the local payment, the CAO must call NAFCPD for approval, explain circumstances and confirm that required AEUCF Form 316 has been signed by the employee requesting the local payment. CAOs are not authorized to make disbursement without NAFCPD approval. If the community CAO issues a replacement check and the original check is cashed, then the funds payroll account will be credited by the NAFCPD. The community CAO is then responsible for collection of those funds from the employee.

C. When requesting disbursement approval from NAFCPD, the CAO will provide the employee name, check number and amount of the missing check from the Payroll for Personnel Services Report. NAFCPD will verify this information and ensure the check has not been cashed. After verification, NAFCPD will issue the CAO a control number for the approved local payment.

D. Once the local payment is made, the CAD will immediately send a completed AEUCF Form 62 transmittal to NAFCPD with a copy of the signed AEUCF Form 316 attached.

E. NAFCPD will include the amount of the local payment in the monthly payroll reconciliation. If this reconciliation results in an amount due to the community, NAFCPD will forward a check to the community financial management division following the next monthly payroll reconciliation.

A0816 CONTINUANCE OF US ARMY NAF EMPLOYEE BENEFIT SYSTEM (EBS) DEDUCTIONS DURING LEAVE-WITHOUT-PAY (LWOP) STATUS Handle NAF EBS deductions for employees who choose to continue life insurance or health benefits coverage while in LWOP status as follows:

A081601 Employee Premium. The employee will remit premium to the servicing CAO on a monthly basis.

A081602 Employer Premium. The servicing CAO will collect the employer's share of these premiums from the employing NAFI.

A081603 Premium Remittance. The servicing CAO will prepare one check, combining the employee and employer portions of the premium. The check will be made payable to the servicing payroll office. The employee's name, work center, period of coverage, and complete coverage information (amount of life or health) should be clearly shown and attached to the check before it is sent to the servicing payroll office.

A0817 PAYMENTS TO EMPLOYEES.

A081701 Payments by CNPO. The CNPO is authorized two methods of payment to NAF employees. One method is for an employee to receive payment through deposit to a financial organization. The second method is for the check to be mailed to the CAO (or to the NAFI if there is no CAO) and hand delivered to the employee. There may be a combination of the two. When the second method is used, the same person that signed the time and attendance report will not distribute the check. The duties of making actual payment and accounting for time and attendance must be separated (see AR 37-103, paragraph 4-9.)

A081702 Payments by NAFCPD. The NAFCPD is authorized two methods of payment to NAF employees. One method is for the employee to receive payment through deposit to a financial organization. The second method is for the check to be mailed directly to the employee. These methods may be combined.

A0818 SECURITY

A081801 Maintenance of Reports. Reports must be protected and maintained under the provisions of the Privacy Act.

A081802 Retention and Destruction of Reports. Installation CAOs, HROs, and NAFI managers will see that AR 25-400-2 is followed in the handling of the payroll reports.

A081803 Checks. Checks remaining in an office overnight must be locked in a safe or vault.

**A0819 R E C O U P M E N T O F
OBLIGATIONS TO A NAFI**

A081901 Employee Obligations to a NAFI.
Certain obligations that an employee owes to a NAFI may be recouped by means of a biweekly payroll deduction.

**A081902 Obligations That Are Not Due to
Overpayments.**

A. If the employee acknowledges the validity and amount of indebtedness and desires to repay by means of a payroll deduction, the NAFI manager will have the employee sign an authorization for payroll deduction. A memorandum may be used for this purpose. Total indebtedness should be paid within 26 pay periods. Basic statement should read:

"I authorize \$ (total dollar amount of indebtedness) be deducted from my paycheck as payment of my obligation to (name of NAFI). Please make biweekly deductions of \$ (amount of biweekly payment) beginning with the first pay period following receipt of this statement."

B. Signed statement will be forwarded to the CAO so that accounts receivable can be established. Entry on the books of the NAFI will be a debit to GLAC 140 and a credit to the appropriate account pertaining to the type of indebtedness incurred. A copy of the statement should be retained for support of the accounts receivable entry. CAO then submits the original statement by transmittal letter to the servicing payroll office.

C. For each pay period that collections are made, the servicing payroll office will send a check to the NAFI for the amount of the biweekly collections with a listing of employee names and individual amounts. Upon receipt of check, GLAC 140 will be credited to reduce the accounts receivable. Documentation

will be retained for support of subsidiary records.

A081903 Erroneous Overpayments. In overpayments resulting from payroll processing and administrative errors, servicing payroll office will notify the employee in writing of such overpayment. Notification will provide total amount of indebtedness, amount of biweekly repayment deductions, and dates of deductions. Deductions will not exceed 15 percent of net pay. Copies of notification will be furnished to CAO. In the event these overpayments are subsequently waived by the installation commander, the employing NAFI is liable for employee's indebtedness to third parties, and not servicing payroll office. Likewise, if an employee terminates prior to liquidation of a debt or obligation being repaid, the employing NAFI is liable for the unpaid amount.

A081904 General Disputes and Waivers. If an employee disputes a debt or obligation, or requests waiver of repayment, the installation commander will make the final decision based upon information made available by both the NAFI and the employee. The employee will be notified in writing of the determination and a copy of the notification will be forwarded to servicing payroll office for collection in accordance with procedures stated above. These involuntary deductions will not exceed 15 percent of net pay. (See AR 215-1 and AR 215-3, paragraph 3-2h.)

A081905 Retirement or Insurance Disputes and Waivers. If the overpayments or disputes discussed in A081903 or A081904 above involve retirement, or health or life insurance the Chief, Employee Benefits Branch, P.O. Box 107, Arlington, VA 22210-0107, not the installation commander, will make determinations regarding waivers.

A0820 ON-THE-SPOT AWARDS All locally paid awards must be reported to the servicing payroll office not later than the pay period following the period in which paid. Payments made in December are especially critical. Awards paid in December should be made prior to the last pay period of the calendar

year. To ensure the calculation of wages and taxes is included on the employee's Form W-2 for the proper tax year, any payment made after the last pay period of the calendar year should be scheduled with the servicing payroll office and reported on a priority basis. Upon receipt of DA Form 5167-R (Incentive Awards Nomination and Approval-Nonappropriated Funds) the CAO will:

A082001 Award Maximums. Ensure the gross amount (amount before retirement contribution, OASDI and Medicare, federal, state and local income tax deductions) does not exceed the \$250 maximum per award. (See AR 215-3, paragraph 9-9 b.)

A. Cash Award. For a cash award, the gross amount is the amount of the award.

B. Savings Bond Award. For a savings bond award, the gross amount is the purchase price of the bond plus the applicable deductions. For employees who do not participate in the NAF Employee 401(k) Savings Plan or the Thrift Savings Plan (for employees covered by portability), the gross amount is determined by use of this formula:

$$\text{Gross Amount} = \frac{\text{Bond Purchase Price}}{(100\% \text{ minus the sum total \% of deductions})}$$

1. Example 1: Bond purchase price for a \$200.00 bond is \$100.00. The sum total of retirement contribution (2%), OASDI (6.2%), Medicare (1.45%), Federal tax (28%), State tax (0%), and local tax (0%) is (37.65%).

$$\begin{aligned} \text{Gross Amount} &= \frac{\$100.00}{(100\% \text{ minus } 37.65\%)} \\ &= \frac{\$100.00}{62.35\%} \\ &= \$160.38 \end{aligned}$$

As the gross amount of the bond award is less than \$250, the award may be given.

2. Using the gross amount of the bond award, \$160.38, the applicable deductions can now be calculated:

Retirement	\$160.38 times 2.00% = \$ 3.20
OASDI	\$160.38 times 6.20% = \$ 9.94
Medicare	\$160.38 times 1.45% = \$ 2.33
Federal tax	\$160.38 times 28.00% = <u>\$44.91</u>
	\$60.38

3. Example 2: Bond purchase price for a \$500.00 bond is \$250.00. The sum total of retirement contribution (2%), OASDI (6.2%), Medicare (1.45%), Federal tax (28%), State tax (0%), and local tax (0%) is (37.65%).

$$\begin{aligned} \text{Gross Amount} &= \frac{\$250.00}{(100\% \text{ minus } 37.65\%)} \\ &= \frac{\$250.00}{62.35\%} \\ &= \$400.96 \end{aligned}$$

As the gross amount of this award exceeds the \$250 maximum, the \$500 bond award cannot be given.

C. Savings Bond Award for 401k/TSP Participants. For employees who do participate in the NAF Employee 401(k) Savings Plan or the Thrift Savings Plan, the calculation differs because the federal government does not tax these deductions. For these employees, the gross amount of a savings bond award is the purchase price of the bond plus the applicable deductions with the federal tax amount reduced for the 401(k) deduction. The gross amount is determined by use of this formula:

$$\text{Gross Amount} = \frac{\text{Bond Purchase Price}}{(100\% \text{ minus the sum total \% of deductions})}$$

1. Example 1: Bond purchase price for a \$200.00 bond is \$100.00. The sum total of 401(k) contribution percentage (3%), retirement contribution (2%), OASDI (6.2%), Medicare (1.45%), Federal tax (% must be

calculated as shown below), State tax (0%), and local tax (0%) is (xx.xx%).

Federal Tax % = [X minus XY] times 28%

X = Gross Amount
Y = Employee's 401(k) Percentage

= [X minus X (3%)] times 28%
= (.28X minus .0084X)
= (.28 minus .0084)X
= .2716X
= 27.16%

In this example the Federal Tax % calculated is 27.16%. As before, you now sum the percentage deductions: 3% + 2% + 6.2% + 1.45% + 27.16% = 39.81%

Gross Amount = $\frac{\$100.00}{(100\% \text{ minus } 39.81\%)}$

= $\frac{\$100.00}{60.19\%}$

= \$166.14

As the gross amount of the bond award is less than \$250, the award may be given.

2. Using the gross amount of the bond award, \$166.14, the applicable deductions can now be calculated:

401(k)	\$166.14 times 3.00% = \$ 4.99
Retirement	\$166.14 times 2.00% = \$ 3.32
OASDI	\$166.14 times 6.20% = \$10.30
Medicare	\$166.14 times 1.45% = \$ 2.41
Federal tax	\$166.14 times 27.16% = <u>\$45.12</u>
	\$66.14

3. Example 2: Bond purchase price for a \$500.00 bond is \$250.00. The sum total of 401(k) contribution percentage (4%), retirement contribution (2%), OASDI (6.2), Medicare (1.45%), Federal tax % must be calculated as shown below), State tax (0%), and local tax (0%) is (xx.xx%).

Federal Tax % = [X minus XY] times 28%

X = Gross Amount
Y = Employee's 401(k) Percentage

= [X minus X (4%)] times 28%
= (.28X minus .0112X)
= (.28 minus .0112)X
= .2688X
= 26.88%

In this example the Federal Tax % calculated is 26.88%. As before, you now sum the percentage deductions: 4% + 2% + 6.2% + 1.45% + 26.88% = 40.53%

Gross Amount = $\frac{\$250.00}{(100\% \text{ minus } 40.53\%)}$

= $\frac{\$250.00}{59.47\%}$

= \$420.38

As the gross amount of this award exceeds the \$250 maximum, the \$500 bond award cannot be given.

(NOTE: The OASDI and Medicare rates used in the examples above are those which were effective for 1994.)

A082002. Award Limits. Ensure that the employee will not have received awards in excess of \$1000 in the inclusive prior 12-month period.

A082003 Type of Award. Determine if the award is for cash or a savings bond.

A. If the award is for cash, the CAO will:

1. Compute the applicable 401(k) contribution, retirement contribution, OASDI, Medicare, federal, state, and local tax deductions.

2. Issue a check locally for the net amount.

3. Prepare a memorandum showing the gross amount, 401(k) contribution,

retirement contribution, OASDI, Medicare, federal, state and local tax deduction amounts and the net amount of the award issued. Attach the DA Form 5167-R to the memorandum and mail to the servicing payroll office requesting the payroll records be adjusted to include the cash award.

B. If the award is for a savings bond, the CAO will:

1. Issue a check locally for the purchase price of the bond (net amount).

2. Prepare a memorandum showing the bond amount, the gross amount (purchase price plus applicable deductions), 401(k) contribution, retirement contributions, OASDI, Medicare, federal, state and local tax deduction amounts and the net amount of the bond. Attach the DA Form 5167-R to the memorandum and mail to the servicing payroll office requesting the payroll records be adjusted to include the bond award.

A082004 Use of Retirement Contributions in Award Calculations. Retirement should only be calculated when employee is participating in the retirement program. To determine if a retirement contribution should be calculated, the CAO should refer to his most recent Employee Cross-Reference Roster. If the employee has an 'R' recorded under the 'RET CDE' column, use the retirement % in the award calculation. For 401(k) or Thrift Savings Plan deductions refer to the employee's Personnel Folder.

A0821 AUTOMATIC WITHIN-GRADE INCREASES FOR PREVAILING RATE EMPLOYEES. Automatic within-grade increases for prevailing rate employees will be produced systemically in accordance with AR 215-3.

A0822 NOTICE OF UA EMPLOYEE WITHIN-GRADE INCREASE DUE. A Notice of UA Employee Within-grade Increase Due report will be produced biweekly. A regular scheduled employee's name will appear on the report beginning the first pay period he/she is within 120 days or 16 weeks of being eligible to receive a within-grade increase. The employee's name

will continue to appear on the report until the within-grade increase is effective. It remains the responsibility of the UA employee's servicing HRO to initiate within-grade increases (See A080702E).

A0823 AUTOMATIC LEAVE CATEGORY CHANGES DA Form 3434's will automatically be produced for NF, UA and PR employees in regular full-time and regular part-time positions in accordance with accrual of annual leave restrictions cited in AR 215-3.

A0824 PORTABILITY OF ANNUAL LEAVE BENEFITS

A082401 Transfer of Leave Balances. Leave balances will be transferred when employees convert from NAF to Appropriated Fund (APF) or from APF to NAF status. However, there will be no transfer of funds. Therefore, the servicing CAO will make entries on the NAF accounting records to adjust the NAF liability for annual leave. NOTE: No adjustments are required for sick leave or home leave.

A082402 NAF to APF Conversion. When a former NAF employee converts to APF status, the servicing payroll office will send the servicing CAO a Record of Leave Data for the individual. The record will give the dollar value of annual leave to be removed from the annual leave liability account. The entry to record income recognized when the annual leave liability is dropped is shown below:

DR 243 - Annual Leave Payable
CR 808 - NAF to APF Conversion Income

A082403 APF to NAF Conversion. When a former APF employee converts to NAF status, the servicing CAO must depend on the local HRO or fund manager to inform them of the transfer. The servicing payroll office will establish the transferred employee's leave balance based on documents received from the local HRO. The servicing payroll office will generate an entry to debit GLAC 603 (Annual Leave Expense) and credit GLAC 243 (Annual Leave Payable) in the amount of the fund's

liability for the individual's leave balance. The servicing CAO will use the Individual Leave Register to identify the dollar amount of this entry. The entry to move the expense of establishing the employee's leave balance from an operating expense account to a non-operating expense account is shown below:

DR 833 - APF to NAF Conversion Expense
CR 603 - US Annual Leave

A0825 NAF 401(K) SAVINGS PLAN AND APF THRIFT SAVINGS PLAN

A082501 NAF 401(k) Savings Plan. The NAF 401(k) Savings Plan allows regular full-time and regular part-time employees to contribute a percentage (1 to 15%) of their gross wages to a tax deferred pension plan. The NAFI will match up to 3% of the employee's gross wages. The employer matching contribution will be recorded in GLAC 626 (Employer Share of 401(k) Expense). The expense will be calculated by the NAFICPS and electronically deducted from the central bank account along with other payroll expenses.

A082502 Thrift Savings Plan. For employees who transferred from APF to NAF status and continued participation in the Thrift Savings Plan (TSP), the matching employer contribution will be recorded in GLAC 627 (Employer Share of TSP Expense.)

A0826 NON-CASH AWARDS

A082601 Report to Servicing Payroll Office. When a NAFI provides a non-cash performance award to an employee, the CAO will report the award to the servicing payroll office so the dollar value of the award can be included on the employee's W-2 as taxable income.

A082602 Reporting and Accounting Procedures. Reporting and accounting procedures found in A0820 apply to non-cash awards. When non-cash awards are made, the NAFI incurs the cost of the item awarded plus the employee's share of payroll taxes related to the award. Refer to the savings bond examples

in A082001B and C for details on calculating the cost of the award.

A. When a NAFI purchases merchandise, trips, or other items of value to be provided as performance awards at a later date, the accounting treatment should be as follows:

DR 160 - Miscellaneous Other Prepaid Expenses
CR 101 - US Cash

B. When the award is provided to the employee, the CAO will establish a receivable from the servicing payroll office as follows:

DR 140 - Miscellaneous Other Receivables
CR 160 - Miscellaneous Other Prepaid Expenses

C. If the non-cash award is purchased at the time it is presented, the entry is as follows:

DR 140 - Miscellaneous Other Receivables
CR 101 - US Cash

A082603 Calculation and Notification. The CAO must calculate the cost of the award and send the servicing payroll office a copy of the DA Form 5167-R (Incentive Awards Nomination and Approval-Nonappropriated Funds) along with a memorandum which includes the information specified by A082003.

A082604 Servicing Payroll Office Procedures. The servicing payroll office will:

A. Add the gross amount of the award to the employee's earnings and leave statement and withdraw this amount from the NAFI's bank account.

B. Issue a check to reimburse the NAFI for the purchase price of the non-cash item awarded.

A082605 Receipt of Reimbursement. Upon receipt of the check from the servicing payroll office, the CAO will clear out the debit balance in GLAC 140 as follows:

DR 101 - US Cash

CR 140 - Miscellaneous Other Receivables

A082606 Tokens of Appreciation. These procedures do not apply to low dollar value "tokens of appreciation". Low dollar items will not be reported to the servicing payroll office, nor are they taxable to the employee.

CHAPTER 9

UNIT FUNDSA0901 GENERAL

A090101 Accounting and Reporting Procedures. This chapter has accounting and reporting procedures for unit funds and unit activities established and administered by installation commanders in accordance with AR 215-1. Installation commander includes, as applicable, the State Adjutant General (AG) for the Army National Guard, the Major, U.S. Army Reserve Command (MUSARC), or reserve component (division, troop command, or brigade) delegated as a major command by the State AG or MUSARC. Included are those funds integrated into the IMWRF, and those maintaining their own accounting records. Funds keeping their own records are:

- A. Inmate morale support funds.
- B. Stockade morale support funds.
- C. Hospital prisoner morale funds.
- D. Non-troop program Reserve units.
- E. Reserve Component units.
- F. Units designated as isolated units.

A090102 Reserve Components and Isolated Unit Funds. Procedures in AR 215-1 are not changed by provisions of this publication.

A090103 Installation Unit Activities. Separate unit funds are not authorized for installation/ base units; however, at MACOM direction, those units may receive monetary NAF support through IMWRF. Installation units receiving NAF support are referred to as "unit activities" and are accounted for within the IMWRF.

A0902 CONSOLIDATED UNIT FUND ACCOUNTING. Under AR 215-1, unit funds of two or more units of company, battery, battalion, brigade, or higher size, may be combined into one consolidated unit fund account. Accounting and reporting is required to be integrated with the functions of the IMWRF.

A0903 SOURCE OF FUNDS. Unit activities receive NAF support from the host IMWRF. NAF support to isolated and reserve component units is provided by the coordinating installation (usually the one nearest the unit). The coordinating installation will request reimbursement from FORSCOM for all CONUS reserve component units and isolated units, or USAPAC for units based in Puerto Rico and the Pacific.

A0904 UNIT MWR FUNDS. The accounting and reporting functions of installation unit activities will be integrated with the IMWRF functions. Isolated and reserve component unit funds will account for their funds in accordance with paragraph A0906.

A0905 ACCOUNTING FOR IMWRF UNIT ACTIVITIES. All installation unit activities will be accounted for using a locally assigned location code and the standard department code 5J under program code HD. Individual unit activity statements will be prepared by the IMWRF management, not the CAO.

A090501 Debit GLAC 6XX and Credit GLAC 201 is an example of entry to record the expense incurred by the IMWRF unit activity.

A090502 Debit GLAC 101 and Credit GLAC 5XX is an example of an entry to record the revenue received by the IMWRF for the unit activity.

A0906 ACCOUNTING FOR ISOLATED UNIT ACTIVITIES. Reserve or isolated units

authorized to keep their own accounting records will use the following:

A090601 The frame work of accounting records in this section is the single-entry or cash basis system. Single-entry bookkeeping is simple and economical. It should, under certain conditions, provide enough data to prepare financial statements. The cash basis of accounting records revenue and expenses when actually received and paid, without regard to the period to which they apply.

A090602 No other classification of accounting transaction is maintained except for property purchased with unit funds or property acquired by gift, transfer, or donation. These acquisitions require subsidiary records for control purposes.

A090603 The isolated unit fund dividend distribution from the DA MWRF will be paid through Forces Comand and be paid by a coordinating installation. The coordinating installation will pay the dividend directly to an approved isolated unit fund and be reimbursed by Forces Command. The entry to record the payment by the coordinating installation is DR GLAC 140 - Miscellaneous Other Receivables and CR GLAC 101 - US Cash. When the corrdinating installation receives reimbursement, the entry is DR GLAC 101 and CR GLAC 140.

A090604 When the isolated unit activity is funded as part of an IMWRF, the procedures in A0905 apply.

A0907 RECORDS AND FORMS. Basic records and forms will be established and maintained as prescribed in this section. Records of a unit fund will be kept to the minimum required to support the funds transactions.

A090701 D A F o r m s 2 1 0 7 (Nonappropriated Fund Receipt and Disbursement Voucher) will be used to support all receipts and disbursements by unit funds. This general purpose voucher is prescribed to support all transactions except those processed through the petty cash fund. Refer to chapter 4 for procedures on petty cash expenditure.

A090702 DA Form 2107 will be numbered sequentially by calendar or fiscal year, i.e., 94-1, 94-2, etc. A single series of numbered vouchers will be used for all transactions within the calendar or fiscal year, whether the action is a receipt or a disbursement. For example, if the last voucher issued was No. 94-10 for an expenditure, and the next transaction to be recorded is a receipt of cash, the collection voucher will be numbered "94-11". Each DA Form 2107 prepared will be dated, numbered, and contain all data required to fully identify the transaction. The voucher will be signed by the fund manager. It will be supported by attached documents required to validate the transaction, such as vendor invoices, statements, bills, receipts, receiving reports, and other related documents.

A090703 Purchases made through petty cash disbursements will be processed according to procedures in chapter 4. A DA Form 2107 will be prepared when the petty cash fund is replenished.

A090704 When possible, all goods and services will be paid for at the time of purchase. Memorandum records will be maintained to insure that outstanding orders are properly suspended. These memorandum files will prevent placing of orders in excess of the unit fund's available cash balances.

A090705 Other records will include a check book, bank deposit slips, bank statements, bank account reconciliations, statements of operation and fund equity, copies of audit reports, property receipts, and miscellaneous correspondence relating to unit fund administration.

A0908 CASH, PROPERTY, AND RECONCILIATION RECORD (CPRR). This DA Form 5627-R (Cash, Property and Reconciliation Record) is the primary official record of unit fund management and administration. DA Form 5627-R will be locally reproduced on 8 1/2 by 11 inch paper. All entries must be supported by an approved DA Form 2107.

A090801 Cash Receipts. Unit fund managers will be responsible for safeguarding cash receipts by promptly depositing them. Dividends received through the IMWRF and cash from sales of fund-owned property will be fully identified so that proper disposition may be made.

A090802 Cash Disbursements. All cash disbursements, except petty cash transactions, will be documented on a DA Form 2107. If a petty cash fund is established, the total authorized amount of the petty cash fund will be entered in the expenditure column of the DA Form 5627-R with a memo entry. Thereafter, only the amount of a fund replenishment to the original authorization will be recorded. When the petty cash fund is discontinued, the amount expended will be entered in the expenditure column, the balance will be deposited in the bank. The later will be shown as a memo entry in the receipts column of the DA Form 5627-R. Transactions affecting cash and property will be entered in both cash and property columns of the DA Form 5627-R.

A090803 Property Transactions. The following transactions will be entered in the DA Form 5627-R to maintain property control: (1) Cash purchases of property; (2) Cash sales of excess or worn out property; (3) Transfers and gifts from other units or other sources; and (4) Disposals to the property salvage officer. Property will be recorded on DA Form 4078. When cash is involved in the property transaction, entries will be made in both the cash column and the property column.

A090804 Reconciliations.

A. Reconcile the property records maintained on DA Forms 4078 with the balance shown in the property column of the DA Form 5627-R each quarter. The cost of all property items purchased with unit funds or otherwise acquired by the unit (excluding Government property) will be summarized from the DA Forms 4078. The amount will be balanced to the amount shown on the fund record.

B. Reconcile the bank statement to the fund cash account each month. This account is also maintained on the DA Form 5627-R. The bank statement balance, minus outstanding checks, plus deposits made after the bank statement cutoff, should always equal the balance column on the DA Form 5627-R.

A0909 PETTY CASH SYSTEM.

A090901 Petty cash procedures will be governed by chapter 4.

A090902 Prepare DA Form 2107 to support the issuance of a check to restore the petty cash fund to its original amount. Attach all supporting documents to the DA Form 2107. Enter the total of all subvouchers on the DA Form 2107. Post the same amount in the expenditures column of the DA Form 5627-R.

A090903 Reserve component units are not required to use petty cash procedures if they:

A. Receive income only from dividends; and

B. Spend those dividends during annual training. Attach all sales slips, receipts, and supporting documents to the DA Form 5627-R. These documents will be accepted as evidence of purchase.

A0910 REPORTING. Unit fund managers will keep a DA Form 5627-R. Record receipts and expenditures on a daily basis, as they occur. At the end of each month, total all columns and send an information copy to the servicing IMWRF. Reserve Component units do not need to send an information copy of the DA Form 5627-R to the servicing IMWRF. RC unit fund managers will send a copy of the DA Form 5627-R to the next major command headquarters each quarter. After review, it will be returned to the RC fund manager to be included in the unit's files.

A091001 Certificate of Transfer. Fund managers will prepare a certificate of transfer as shown in figure 2-1. Both the current manager

and the successor will sign the certificate. It will be filed with the current financial statement.

A091002 The outgoing fund manager will also notify the servicing bank of the change of fund managers. A letter resembling the following will be sent to the bank: "I have this date transferred the unit fund of Company A, 4th Infantry, to John Doe, 1st Lieutenant, Infantry, who will, until replaced, have authority to draw on the fund deposited in your bank. His signature appears below." The letter will be signed by the current fund manager and his or her successor.

CHAPTER 10

FINANCIAL REPORTING REQUIREMENTSA1001 GENERAL

A100101 Information Requirements. Only one information requirement bearing a reports control symbol is prescribed in this chapter; the Nonappropriated Fund Financial Reporting (RCS CSCOA-24).

A100102 Reporting and Submission. Reporting frequency and submission address are prescribed in table 10-1. Additional information is contained in AR 215-1.

A100103 CAO Signature. The CAO will sign all financial statements required in table 10-1. Signatory authority will not be delegated.

A100104 Must Report. Since these are financial reports, there can be no negative reports.

A100105 Reporting Schedules. All financial statements must be submitted per table 10-1.

A. NAFI management should receive the final monthly financial statements as follows:

1. Installation CAOs must provide the final monthly financial statements to NAFI management by the 6th workday after receipt of all documents from the NAFI.

2. The consolidated CAO at Red River Army Depot must provide the final monthly financial statements to NAFI management by the 8th workday after receipt of all documents.

B. Local management may request other supporting schedules and management information or more frequent statements; however, managers should assess the need for such data in relation to the cost.

A100106 Official Cutoff Date. The official cutoff date for the monthly accounting cycle is the last calendar day of the month. However, DFAS may select a date from December 26 through December 31 for cutting off December NAFI financial statements. Transactions subsequent to the cutoff date must be included in the January NAFI financial statements.

A1002 NONAPPROPRIATED FUND FINANCIAL REPORTING (RCS CSCOA-24). This requirement is for an income statement and balance sheet.

A1003 NAFI BANK BALANCES

A100301 Reporting Uninsured Balances. Agencies designated in b below will prepare DA Form 3830-R (NAFI Bank Balances) twice a year showing the total balance in NAF accounts in each bank used by fund managers under their jurisdiction (exempt report, AR 335-15). DA Form 3830-R will be prepared as of March 31 and September 30 and sent to the Commander, U.S. Army Community and Family Support Center, ATTN: CFSC-RM-B, Alexandria, VA 22331-0508, not later than April 15 and October 15. CFSC will review the reports, make necessary adjustments in collateral allocations, and advise installation commanders and other agencies of the adjustments by completing column g of the report.

Table 10-1, Disposition of Reports

Situation	Due Date	Disposition
Funds supported by NAFISS and MICROCADS (except Post Restaurants and CWF)	Monthly. 30 days following the end of the month reported.	Send CFSC interface tape produced by job AVFR77/AVFJRM direct to CFSC, Attn: CFSC-RM, Alexandria, VA 22331-0508. MICROCADS sites will also submit interface tape direct to CFSC.
Post Restaurants and CWF. Balance sheet and income statement.	Monthly. 30 days following the end of the month reported.	Mail direct to CWF Board of Directors, AAFCWF, Box 46579, Washington, DC 20050-6579.
Funds not covered above. Balance sheet and income statements consolidated by NAFI, consolidated program code by department and consolidated location by department.	Monthly. 30 days following the end of the month reported.	Send monthly balance sheets and income statements direct to CFSC at the address above.
NAFI Employees Compensation and Benefit Program. This report is prepared by the NAF payroll offices. NAFIs not supported by one of the payroll offices must prepare the report to cover their NAF employees.	Annually. October 30	Forward to CFSC at the address above. Post Restaurant and CWF reports will be forwarded to the Board of Directors, AAFCWF, Box 46579, Washington, DC 20050-6579

A100302 Preparing agencies.

A. CAOs will report for all NAF deposits maintained by installation NAFIs in local depositories. Reports for balances maintained by the Army Banking and Investment Fund at the contractor bank will be prepared by HQDA (CFSC-RM). Deposits maintained by overseas NAFIs in U.S. military banking facilities are exempt from the record keeping and reporting requirements specified above.

B. NAFI managers will report for all other NAFIs established at major command and HQDA levels.

A100303 Interim reports. Interim reports will be submitted on DA Form 3830-R when:

A. Collateral requirements exceed the current allocations,

B. All NAF accounts maintained within the bank have been closed, or

C. An account is opened with a new financial institution.

A100304 Service Charges. Local banks are compensated for their services on the basis of either compensating balances or flat fee service charges, as agreed to by the local bank and the serviced NAFL. Service charges are supported by monthly bank account and activity analyses (BA&A) sent by the local banks to CAO/NAFL managers. CAOs must send a copy of the March and September BA&As for each local deposit to the following address: Commander, U.S. Army Community and Family Support Center, ATTN: CFSC-RM-B, Alexandria, VA 22331-0508. The March and September BA&As are due at the above address by the 15th of May and November respectively.

A1004 FINANCIAL STATEMENT ERRORS. The method of correction of errors depends on when the error occurred, when it was discovered, and how the error affected the financial records of the NAFL.

A100401 Current FY. If the error occurred in the current FY, adjust all account balances by journal voucher transaction. All transactions must go through the current monthly financial statements. No adjustments are authorized to G/L account totals. CAOs should not make pen and ink changes to account balances if the error is found after statements are final. Instead show the changes in the footnotes to the financial statements. Make the corrections the next month by journal voucher.

A100402 Prior FY. If the error occurred in a prior FY, the corrective action will be recorded in the current fiscal period in almost all cases.

A100403 Material. If the effect of the error is material, submit a request for retained earnings adjustment to DFAS for approval. Include full justification for the adjustment (See A100405 for more information on approvals). A material error which necessitates a prior period adjustment results from:

A. Substantial mathematical mistakes.

B. Substantial mistakes in the application of accounting principles.

C. Substantial oversight or misuse of facts existing at the time the financial statements were prepared.

A100404 Error Versus Change In Accounting. An error is contrasted with a change in an accounting estimate such as the useful life of an asset or bad debt expense under the allowance method. An accounting estimate is changed when new information or subsequent developments provide better insight or improved judgment. However, a change from an accounting principle which is not generally accepted to one that is generally accepted is to be considered a correction of an error. Also, a prior period adjustment is not allowed when late documentation causes prior year expenses to be understated. If documentation was not submitted to the CAO before the prior year statements were prepared, the expenses must be recorded in the current period. The understatement of prior year expense is not defined as an error, since there was no oversight or misuse of facts by the CAO.

A100405 Where To Record. As evidenced by the criteria for a retained earnings adjustment, most transactions will be recorded as income or expense amounts of the current period. When requests for retained earnings adjustments are received by DFAS, they will be evaluated concerning whether the adjustments requested meet the criteria for a retained earnings adjustment. If the item does not constitute a proper retained earnings adjustment, it will be returned to the installation with instructions to include in the current year income statement. If DFAS approves retained earnings treatment, the request will be returned to the installation with instructions for the CAO to footnote the financial statements with an explanation of the adjustment.

A1005 FOOTNOTES TO FINANCIAL STATEMENTS

A100501 Integral Part Of Financial Statements. Footnotes are an integral part of the

financial statements and should be used when more information is needed. The Generally Accepted Accounting Principal of disclosure requires that accountants "disclose" in the financial statements all relevant economic information pertaining to the business entity. When the actual dollar amounts on the financial statements do not provide sufficient information for decision makers, accountants must supplement the financial statements with more detailed data in the form of footnotes. Footnotes are required to provide an explanation of special events on the income statement to help managers compare the operating results of the current business period with the operating results of previous periods. Fund equity adjustments and significant business closures are prime examples of occurrences which require footnotes.

A100502 Post Restaurant Funds and CWF.
For Post Restaurant funds and CWF, financial statements will be footnoted to reflect FY cumulative gross sales by a concessionaire to either of the civilian employee NAFIs which were used to generate the concessionaire income for the reporting period.

A1006 BINGO ACTIVITY SHEET.
Prepare a numbered bingo activity sheet for each bingo event sponsored by the NAFL. Reconcile cash collected for bingo cards sold with bingo cards issued. Enter prizes awarded for games and require the winners to acknowledge receipt and furnish their social security numbers.

A1007 REPORTING TO THE IRS

A100701 General. All records relating to payments to individuals and firms must be retained for at least four years and be available for IRS review if required. CONUS offices should consult their local IRS office when forms, publications, or assistance are needed. Overseas offices should contact their local Legal Assistance office to get the address and telephone number of the nearest IRS representative. IRS representatives, in CONUS and overseas, are available to provide on-site instructions concerning IRS procedures for return preparation and filing, and depositing employment tax payments. Overseas offices should use the

following address to request forms and publications: Forms Distribution Center, PO Box 25866, Richmond, VA 23289, or Forms Distribution Center, Rancho Corboda, CA 95743-0001.

A100702 Contract payments. Cumulative payments made under service contracts of \$600 or more to anyone other than a corporation during a calendar year will be reported by the CAO. Provide all information required on IRS Form 1099 MISC. NAFL contracts with entertainers are considered service contracts. If a single payment to an individual is less than \$600 but total payments made by the CAO during the calendar year to the same individual reach \$600, IRS Form 1099 MISC must be filed. Therefore, the CAO must maintain a list or some method to determine if an individual reaches the \$600 threshold, requiring a report to the IRS of the payments. The IRS Form 1099 MISC will be provided to the individual or firm and to the IRS. The individual or firm should receive a copy of the Form 1099 MISC by January 31 of the year following the calendar year of payment. This requirement also applies to individuals who, in addition to being NAFL employees, have contracts with the NAFL for non-personal services. A separate Form 1099 MISC will be prepared for each individual or firm to whom total payments of \$600 or more are made. An IRS Form 1096 is used to transmit the IRS copy of the Form 1099s to the IRS. These forms must be forwarded to the IRS by February 28 each year. Refer to IRS publications for preparation instructions and filing requirements.

A100703 Gambling/Bingo Winnings. IRS reporting requirements for gambling and bingo winnings are tied to individual games. Winnings are not accumulated from game to game as contract payments are. Each game stands alone for IRS reporting requirements. Whenever cash, merchandise, or a combination thereof with a total value of \$1,200 or more is awarded to a person for winning a single bingo game or other gambling activity, the CAO must prepare IRS Form W-2G (Statement for Certain Gambling Winnings). Individuals should receive their copies of the W-2G either at the time payment is made or not later than January 31 of the

following year. An IRS Form 1096 is used to transmit the IRS copy of the W-2Gs to the IRS. These forms must be forwarded to the IRS by February 28 of the following year. Refer to IRS publications for preparation instructions and filing requirements.

A100704 Records Retention. NAFIs must retain all records pertaining to federal income and employment taxes as required by federal law for at least four years (See AR 25-400, app B, category 27-101-1f, and category 37-105a).

A1008 CONTRACTORS DETERMINED TO BE EMPLOYEES FOR IRS PURPOSES. Some contract payments made to individuals may be considered by the IRS as payments to employees. The specific circumstances which classify individuals as employees are covered in Chapter 8 paragraph 0802 of Volume 13.

A100801 Procedures After Determination. When individuals are determined to be employees in the eyes of the IRS, the NAFI is required to withhold social security tax, medicare tax, and federal income tax from the individuals' earnings. These taxes must be reported to the IRS each quarter using IRS Form 941, Employer's Quarterly Federal Tax Return. The calculation of tax due on IRS Form 941 also requires the employer to match the social security and medicare tax withheld from the employee's pay. A check for the total tax due must accompany the IRS Form 941.

A100802 Forms And Instructions. IRS forms and instructions needed by the CAO include, but are not limited to, Publication 15, Form 941 and instructions, Form W-2 and instructions. If the CAO does not have a Federal Employer Identification Number, they must request one from the IRS. Individuals who are determined to be employees for IRS purposes must receive an IRS Form W-2 instead of an IRS Form 1099 for their earnings.

A100803 Withholding. The applicable tax amounts to be withheld currently are as follows:

Social Security Tax	= 6.2% of earnings
Medicare Tax	= 1.45% of earnings

Federal Income Tax = 28% of earnings unless individual specifies another amount (ie, 10%, \$10, \$0, etc.).

The NAFI must also match the social security and medicare tax amounts. CAOs are not required to withhold state and local taxes, however, withholding of these taxes is not prohibited.

A100804 Proper Classification of Employees. NAFI management and the Department of the Army are responsible for determining if an individual is a contractor or an employee for IRS purposes as specified in AR 215-1. The CAO should be alert for situations where an employee or contractor has been improperly classified, and assist NAFI management, when requested, in making these determinations. It is DFAS policy to cooperate fully with the IRS and ensure that NAF activities comply with the tax laws of the United States. The CNPO will not knowingly make payments to any misclassified person and is required to notify the CAO and DFAS-Indianapolis Center when a misclassified person has been identified.

CHAPTER 11

FINANCIAL ANALYSIS

A1101 GENERAL The objective of financial analysis is the extraction of the data from the financial statement and other sources so that the decision makers have valid data upon which to plan their operations. It is important to know that the balance sheet is a statement of the NAFIs financial position as of a specific point in time. Whereas, the income statement shows the results of operations over a period of time. Management must be able to effectively analyze the data and react in a positive manner.

A1102 STANDARDS The financial analysis provides ratios, trends, and other specific details of the business operations of the NAFIs. However, this accumulation of financial data only indicates the NAFIs financial position. To be useful as a management tool, the data must be compared with the NAFIs goals and established standards. For some NAFIs, standards are established by DA or MACOM agencies. Five of the most significant standards are presented here.

A110201 Current Ratio This measures the NAFIs ability to meet its current obligations. The NAFIs financial position may not be sound unless the fund has more current assets than current liabilities. A ratio of 1.5 to 1 is generally acceptable.

A110202 Acid Test Ratio This measures the extent to which specific current assets can be converted to cash to meet current obligations. A ratio of 1 to 1 is generally acceptable.

A110203 Average Collection Period This measures the average length of time accounts receivable are outstanding. A ratio of 1.3 to 1 is generally acceptable.

A110204 Inventory Turnover This measures the efficiency of inventory control. A ratio of 1 to 1 is generally acceptable for food and bar operations. For all other sales operations, the goal should be 1 to 3.

A110205 Net Income Ratio This measures the rate of return on revenue. A percentage of 5-10 percent is generally acceptable.

A1103 LIMITATIONS Although ratios are useful management tools, they do have some limitations and must be used with caution. Ratios are constructed from accounting data, and accounting data are subject to different interpretations and manipulation.

A110301 Historical Cost The use of historical cost is an excellent means for comparing costs of the NAFI and revenues generated by the activities. However, in periods of rapid inflation, the historical cost of an asset or expense may not provide a good basis to determine current values.

A110302 Estimating Uncertainty in estimating future income statement items is a major limitation. A NAFI manager may predict higher revenues and lower expenses than actually occurs. Based on incorrect estimating of future revenues, assets may be purchased which when depreciated create a net loss.

A110303 Comparability Achieving comparability between NAFIs located at different communities and even in different countries is very difficult. A community that has very little competition from the private sector should have an advantage over a community that must compete with a large number of civilian activities.

A1104 BALANCE SHEET RATIOS

A110401 Current Ratio This ratio is the primary test of the solvency of the NAFI. The ratio is computed by dividing the current assets by the current liabilities. A ratio of 1.5:1 means that the value of the current assets is 150 percent of the value of the current liabilities.

Current Ratio = $\frac{\text{Current Assets}}{\text{Current Liabilities}} = \frac{\$150,000}{\$100,000} = 1.5:1$

A ratio of less than 1.5:1 means that cash flow problems may exist.

A110402 Acid Test Ratio. This is a better test of immediate solvency than the current ratio. The acid test ratio, or quick ratio, shows the amount of current assets that can rapidly be converted to cash to meet current debts. The ratio is computed by dividing the quick assets by the current liabilities. A ratio of 1:1 shows that the activity could pay all current bills within 30 days.

$$\begin{array}{lcl} \text{Acid} & = & \frac{\text{Quick Assets}}{\text{Current Liabilities}} = \frac{\$100,000}{\$100,000} = 1:1 \\ \text{Test} & & \\ \text{Ratio} & & \end{array}$$

If the ratio is less than 1:1, the NAFI may not be able to pay its debts and would appear to be insolvent.

A1105 INCOME STATEMENT RATIOS

A110501 Net Income Ratio. This measures the rate of return on revenue. The ratio may be based on total revenue or only on sales revenue. The ratio for total revenue is computed by dividing net income by total revenue. The ratio for sales revenue is computed by dividing net income by revenue from sales of goods. Total Revenue = Account 301 through 303 less 304 through 306 plus 501 through 599, 801 through 825, and 892. Sales Revenue = Account 301 through 303 less 304 through 306.

A110502 Gross Margin Ratio. This measures the rate of markup on the sale of goods. The ratio is computed by dividing sales revenue less cost of goods sold, by total sales. COST OF GOODS SOLD = Accounts 401 through 456.

A1106 COMBINED RATIOS

A110601 Average Collection Period. This ratio is used to evaluate the effectiveness of the NAFIs collection procedures. The average collection period gives the number of days it takes the NAFIs to receive payment for credit sales. The ratio is computed by dividing the average accounts receivable for a given period

by the average daily sales. A ratio of 1.3:1 indicates that if the terms of payment are net thirty days, payment should be received NLT 40 days after the date of sale.

$$\begin{array}{lcl} \text{Average} & & \text{Average} \\ \text{Collection} & & \text{accounts} \\ \text{Period} & = & \frac{\text{receivable}}{\text{Average daily credit sales}} = \frac{\$1,300}{\$1,000} = .3:1 \end{array}$$

A110602 Inventory Turnover Ratio. This measures the velocity with which the resale merchandise moves through the NAFI. The ratio is computed by dividing the cost of goods sold by the average merchandise inventory. A ratio of 1:1 for food and bar sales and 1:3 for all other sales indicates the NAFI is maintaining optimum inventory levels.

$$\text{Inventory Turnover} = \frac{\text{Cost of goods sold}}{\text{Average inventory}} = \frac{\$100,000}{\$100,000} = 1:1$$

$$\text{Average Inventory} = \frac{\text{Beginning inventory} + \text{Ending inventory}}{2}$$

A slow turnover may indicate the NAFI has over-invested in merchandise or has some obsolete merchandise.

A110603 Return On Assets Ratio. This measures the NAFIs ability to generate revenue with its existing assets. The ratio is computed by dividing net income by the average total assets.

$$\text{Return on Assets} = \frac{\text{Income}}{\text{Average total assets}}$$

$$\text{Average Total Assets} = \frac{\text{Beginning total assets} + \text{ending total assets}}{2}$$

A110604 Return On Fund Equity. This measures the NAFI's ability to use leverage by earning a higher rate of return than is paid for the funds used to operate. The ratio is computed by dividing net income by the average fund equity.

$$\text{Return on Fund Equity} = \frac{\text{Income}}{\text{Average fund equity}}$$

$$\text{Average Fund Equity} = \frac{\text{Beginning fund equity} + \text{Ending fund equity}}{2}$$

A1107 OTHER RATIOS. The preceding ratios, while considered the most important, are by no means the only ones that may be computed. Others that can be reviewed are-

- A. Fixed asset turnover.
- B. Accounts receivable aging.
- C. Working capital to total assets.
- D. Return on tangible assets.
- E. Cash to debt ratio.
- F. Total labor to total revenue ratio.

A1108 COMPARATIVE ANALYSIS

A110801 Balance Sheets And Income Statements. Analysis of the balance sheet and income statement should include a comparative analysis by G/L accounts or groups of G/L accounts. The analysis of the balance sheet and income statement should be done at NAFI level and the activity level, respectively. The account items should be compared for: current and prior month, current and prior quarter, and current and prior year-to-date. The narrative should explain all significant variances and unusual account balances, i.e., credit balance in expense account, debit balance in liability account, or cost of goods exceeding 100 percent and negative cost of goods sold.

CHAPTER 12

MISCELLANEOUSA1201 POST RESTAURANTS

A120101 General. AR 215-7 governs civilian employee NAFIs identified as post restaurant funds and CWF. Post restaurant funds operate restaurants, cafeterias, snack vending machines, and other authorized sale locations. These resale operations generate income to support approved recreation and welfare activities for civilian employees and other authorized patrons. Post restaurant funds are separate NAFIs and are not part of the installation IMWRF. If they are directly operated with NAF employees, partly concessionaire operated, or solely concessionaire operated, but own fixed assets, they will be accounted for in the same manner as other NAFIs.

A120102 Post Restaurant Fund Dividend Accounting. When the post restaurant fund declares a dividend to the CWF, the post restaurant fund will debit GLAC 292 and credit GLAC 206. When the post restaurant fund pays the dividend, the post restaurant will debit GLAC 206 and credit GLAC 101.

A120103 Solely Concessionaire-Operated Post Restaurants.

A. Operated Solely By Concessionaire. If a post restaurant is operated solely by a concessionaire and the NAFI owns no fixed assets, has no other source of income or expense, and does not maintain a bank account, the concessionaire will be instructed to issue one check at the end of each month for commission fees due. It will be made payable to the post restaurant officer (name of installation) and processed in accordance with AR 215-7, para 4-14 and 5-9. The post restaurant officer will also send a copy of the concessionaire's monthly financial statement to the AAFCWF. The statement will show the basis for the computation of the commission fee due and will be signed by the concessionaire of the commission fee due and will be signed by the concessionaire or representative. The statement

will take the place of the regular monthly post restaurant financial reports required by Chapter 10. The post restaurant officer will keep a record of all checks received and forwarded to the post CWF or CAO.

B. Additional Information. Included with each financial report sent to the AAFCWF will be a statement that:

1. Commission fees paid by the concessionaire are the only receipts of the post restaurant;

2. The post restaurant has no expenses and is not required to establish a bank account; and,

3. Any amounts due the AAFCWF will be sent by the post CWF by check drawn on its own bank account.

C. Remittance. The portion due the AAFCWF will be remitted immediately if it is \$10 or more. When the amount due the AAFCWF at the end of the month is less than \$10, the CAO will set aside that amount as an account payable due the AAFCWF. When the account payable reaches \$10, payment will be made to the AAFCWF. These cumulative amounts will not be withheld longer than six months.

A120104 Vending Machines. Revenue from vending machines selling goods owned by the post restaurant fund will be accounted for as sales and recorded in GLAC 301. Revenue from vending machines selling goods owned by a concessionaire will be accounted for as operating revenue and recorded in GLAC 502.

A120105 Reports. The reports prescribed in chapter 10 are applicable to post restaurant NAFIs. The concessionaire's gross sales amount against which the commission income was earned will be footnoted on the applicable income statement. In addition, a statement

showing the computation of dividends available for distribution will be submitted as part of the monthly financial statement. The format is shown in Figure 12-1.

A1202 CIVILIAN WELFARE FUNDS

A120201 General. Civilian Welfare Funds (CWFs) are NAFIs established by installation commanders under AR 215-7. They are NAFIs as defined in AR 215-1. Their primary source of revenue is dividends from profits of post restaurants. On occasion, grants or dividends from the AAFCWF are available.

A120202 CWF Dividend Accounting. Dividends from post restaurants will be credited to GLAC 806. If the dividend is a check from a concessionaire payable to and endorsed by the post restaurant officer, 5 percent of it belongs to the AAFCWF and should be credited to GLAC 201. A check will be issued payable to the AAFCWF and mailed to P.O. Box 46579, WASH, DC 20050-6579.

A120203 Accounting for Loans. When construction or improvements are authorized by the AAFCWF, the following accounting procedures will be used:

A. Certified Invoices. When the certified invoices are submitted to the post CWF, the fund manager will furnish copies to the CAO who will debit GLAC 179 and credit GLAC 268.

B. Completion of Construction. When construction is completed, debit the appropriate fixed asset account and credit GLAC 179.

C. Beginning Loan Payments. When it is determined that loan repayments will start, transfer the amount due in the next 12 months to GLAC 203. Each month when payment is made, debit GLAC 268 until zero (12 months before final payment) then debit 203 until zero (last 12 months).

A120204 Reporting. The reports prescribed in chapter 10 are applicable to Civilian Welfare Fund NAFIs. At the end of each

fiscal year, the CAO will also attach a schedule (on a separate sheet of paper) showing the following civilian strength data as of the end of the fiscal year. It will contain the consolidated strength for all activities located at the installation.

A. Number paid by appropriated funds.

B. Number paid by nonappropriated funds.

C. Total civilian strength for the post.

A120205 DA Form 4138-R (Monthly Authorization Control Record).

A. Controlling Expenditures. The record will be maintained to control expenditures made under the monthly authorization granted each activity by the fund council. DA Form 4138-R will be reproduced locally on 8 1/2 by 11 inch paper.

B. Maintenance Of Records. Authorized expenditures, by activity, will be recorded as approved by the fund council. Purchase orders will be recorded when approved by the civilian NAFI custodian. Receiving reports (indicating the receipt of items purchased) will be entered in the column provided opposite the correct purchase order entry. At the end of the month, each purchase order entry for which no receiving report has been entered, or any differences, will be extended to the column provided for undelivered purchases.

A1203 VETERINARY SERVICES

A120301 Surcharges Collected By The Veterinary. The veterinary will collect prescribed surcharges from paying customers as required by law and deposit them with the day's business. They will be shown as a separate line on the daily activity report. The CAO will record the surcharges as a debit to cash and a credit to GLAC 240, Miscellaneous Other Payables.

A120302 Depositing The Surcharge To The U.S. Treasury. By the 15th of the month, the CAO will issue a check payable to the DAO in the amount of the surcharge collected during the previous month. The CAO will also prepare a DD Form 1131 (Cash Collection Voucher) citing Treasury Miscellaneous Receipt Account 21R3210.0001 and forward the check and voucher to the DAO. Make an entry to debit GLAC 240 and credit GLAC 101.

Figure 4-3, Fixed Asset Inventory Statement

Fixed Asset Inventory Statement
(NAFI, Location & Department)

We, the undersigned, certify that, to the best of our knowledge, a complete and accurate physical inventory was taken of the fund's (or activity's) fixed assets. The inventory was reconciled to the asset records and overages/shortages have been reconciled. All known discrepancies between actual inventory counts and dollar values and the accounting records have been reconciled and corrections made where necessary. The attached inventory list accurately shows the value of the fund's (or activity's) fixed assets as of (date) .

The following adjustments were required:

Physical Inventory	Quantity <u> </u>	Value \$ <u> </u>
Accounting Records	Quantity <u> </u>	Value \$ <u> </u>
Variance Over (Short)	Quantity <u> </u>	Value \$ <u> </u>

Summary of individual adjustments:

<u>Item</u> <u>Description</u>	<u>Unit</u> <u>Cost</u>	<u>Property</u> <u>Control</u> <u>Record</u>	<u>Physical</u> <u>Count</u>	<u>Variance</u> <u>Over/Short</u>
---	---	---	---	---
---	---	---	---	---
---	---	---	---	---
			Net Variance	---

Team Leader	(<u>signature</u>)	(<u>date</u>)
Team Member(s)	(<u>signature</u>)	(<u>date</u>)

Fund Custodian: I agree with the inventory results and the summary of individual adjustments noted above.

(signature) (date)

Independent Observer: I observed the inventory and certify that the inventory was taken appropriately.

(signature) (date)

Central Accounting Officer: I agree with the summary of individual adjustments noted above.

(signature) (date)

Date adjustments made to the fixed asset subsidiary and control accounts:

Fixed asset subsidiary records: (date)

General ledger control records: (date)

Date inventory approved by Command: (date)

		MON		OPR	UNDS	PAYROLL SYSTEM
FROM CYCLE P NAF CENTRAL PAYROLL OFFICE						
TO SERVICING CIVILIAN PERSONNEL OFFICE AA						
2148 193RD NW BRIGADE CPO, FT PANAMA PN						
SUBJECT VERIFICATION LETTER QUARTERLY INACTIVE EMPLOYEE REPORT, QUARTER ENDING 001214						

YOUR OFFICE IS REQUESTED TO ASSIST IN THE VERIFICATION OF INACTIVE EMPLOYEES IN THE NAF CENTRAL PAYROLL SYSTEM. STATISTICAL DATA INDICATES THAT A LARGE VOLUME OF INACTIVE ACCOUNTS ARE MAINTAINED IN THE MASTER FILES. IT IS REQUESTED THAT A COMPARISON BE MADE BETWEEN PERSONNEL RECORDS AND INFORMATION ON THE QUARTERLY INACTIVE EMPLOYEE REPORT. REQUEST ANY DIFFERENCES SUCH AS RESIGNATIONS, TERMINATIONS, DEATHS, OR OTHER REASONS BE NOTED IN THE SPACE PROVIDED BELOW. PLEASE ATTACH APPROPRIATE PERSONNEL ACTIONS AS SUPPORTING DOCUMENTATION. AFTER REVIEW IS COMPLETED, THE VERIFICATION LETTER SHOULD BE SIGNED BY THE CIVILIAN PERSONNEL OFFICER OR RESPONSIBLE AUTHORITY DATED AND RETURNED TO THE NAF CENTRAL PAYROLL OFFICE FOR APPROPRIATE ACTION. THIS REQUEST HAS BEEN COORDINATED WITH DIA AND DCSPT. RESPONSE REQUESTED NO LATER THAN 45 DAYS FROM ABOVE QUARTERLY ENDING DATE.

RESPONSE SHOULD BE MAILED TO CYCLE P NAF CENTRAL PAYROLL OFFICE, 900 STATE LINE ROAD, TERARKANA, TX 75604-0075.

NOTE: COPY OF COMPLETED LETTER SHOULD BE PROVIDED TO SERVICED NAFI FOR NECESSARY ACTION ON DA FORM 4017, IF REQUIRED.

1 THE FOLLOWING DISCREPANCIES WERE REVEALED WHEN SUBJECT REPORT WAS COMPARED TO PERSONNEL RECORDS		NAME		REMARKS	
SOCIAL SECURITY NUMBER					

2 ALL OTHER EMPLOYEES LISTED ON THE SUBJECT REPORT ARE STILL EMPLOYED EXCEPT AS NOTED OVE

ATTACHMENT 2

DESCRIPTION OF GENERAL LEDGER ACCOUNTS

This attachment gives a description for each general ledger account and the typical transactions for each account. It does not include all the possible transactions that may be needed.

Current Assets

Cash

101-US Cash Account

Used for: ALL NAFIs.

Normal balance: Debit

Purpose: Record all US cash receipts and check disbursements.

Typical transactions:

- (1) Debit with all collections of US cash.
- (2) Credit with all US check disbursements and related adjustments.

Normal contra GLACs: many

102-Foreign Currency Cash Account

Used for: NAFIs outside CONUS

Normal balance: Debit

Purpose: Record all foreign currency receipts and disbursements.

Typical transactions:

- (1) Debit with all foreign currency receipts and related adjustments.
- (2) Debit with the increase in value at the equivalent US dollar. Contra to GLAC 943.
- (3) Credit with all foreign currency disbursements and related adjustments.
- (4) Credit with the decrease in value at the equivalent US dollars. Contra to GLAC 943.

Normal contra GLACs: many

103-US Payroll Cash Account

Used for: Does not apply to NAFIs serviced by the CNPO at Texarkana, TX.

Normal balance: Debit

Purpose: Separate checking account for payroll.

Typical transactions:

- (1) Debit with deposits in the net amount of US salaries and wages to be paid each pay period.
- (2) Credit with the disbursement of the net amount of salaries and wages.

Normal contra GLACs: 101.

104-Foreign Currency Payroll Cash Account

Used for: NAFIs outside of CONUS. Does not apply to NAFIs serviced by the CNPO.

Normal balance: Debit

Purpose: Separate checking account for payrolls in foreign currency.

Typical transactions:

- (1) Debit with deposits in the net amount of salaries and wages to be paid foreign employees each pay period.
- (2) Credit with the net amount of salaries and wages disbursed.

Normal contra GLACs: 102.

105-Change Fund

Used for: ALL NAFIs.

Normal balance: Debit

Purpose: Record the amount of impress change fund cash kept on hand for use in daily operations.

Typical transactions:

- (1) Debit with the amount of all established change funds and approved increases.
- (2) Credit with the amount prescribed by the NAFI manager to reduce the cash on hand.

Normal contra GLACs: 101.

106-Foreign Currency Conversion Fund

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of cash to be used for acquiring foreign currency.

Typical transactions:

- (1) Debit with the US dollar equivalent of foreign currency acquired.
- (2) Debit with the increase in value at the equivalent US dollar value.
- (3) Credit with US dollar equivalent of disbursement or transfer of foreign currency units. Use the rate of exchange at which the currency is shown in this account.
- (4) Credit with the decrease in value at the equivalent US dollar value.

Normal contra GLACs: 101.

107-US Petty Cash

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of impress petty cash kept on hand. Typical transactions:

- (1) Debit with the amount of all authorized petty cash funds and increases thereto.
- (2) Credit with the amount approved by the NAFI manager to reduce the impress fund balance.

Normal contra GLACs: 101.

108-Foreign Currency Petty Cash

Used for: NAFIs outside of CONUS.

Normal balance: Debit.

Purpose: Record the amount of impress foreign currency petty cash kept on hand.

Typical transactions:

- (1) Debit with the amount of authorized petty cash funds and increases thereto.

(2) Debit with the increase in value at the equivalent US dollar amount.
 (3) Credit with the amount approved by the NAFI manager to reduce the impress balance.
 (4) Credit with the decrease in value at the equivalent US dollar amount.
 Normal contra GLACs: 102 and 828.

109-Bingo Petty Cash

Used for: ALL NAFIs.

Normal balance: Debit

Purpose: Record the amount of impress petty cash kept on hand to pay for small cash bingo prizes.

Typical transactions:

(1) Debit with the amount of authorized bingo petty cash funds and increases thereto.

(2) Credit with the amount approved by the NAFI manager to reduce the balance.

Normal contra GLACs: 101 and 102.

110-Commercial Credit Card Compensation Balance

Used for: All NAFIs

Normal balance: Debit

Purpose: Record compensating balances with commercial credit card clearing activities when required. NAFISS users will not receive a total for GLAC 110 on the cash receipts journal.

Typical transactions:

(1) Debit for amounts to increase the compensating balance.

(2) Credit for adjustments to the compensating balance.

Normal contra GLACs: 101 and 102.

111-Local Bank Compensating Balance

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record compensating balances with local banks for Central Banking Program (CBP) participants. NAFISS users will not receive a total for GLAC 111 on the cash receipts journal.

Typical transactions:

(1) Debit with amounts to increase the compensating balance.

(2) Credit for returned checks and other adjustments to the local bank account.

(3) Credit with amount transferred to the central bank.

Normal contra GLACs: 101 and 102.

112-Foreign Currency Change Fund

Used for: ALL OCONUS NAFIs.

Normal balance: Debit

Purpose: Record the amount of foreign impress change fund cash kept on hand for use in daily operations.

Typical transactions:

(1) Debit with the US dollar equivalent amount when change funds are established or increases are approved.

(2) Credit with the amount prescribed by the NAFI manager to reduce the foreign currency cash on hand.

Normal contra GLACs: 102.

113-Emergency Local Checking Account

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of authorized emergency checking account balance when approved by the NAF accounting office. The account will be maintained in the Central Bank.

Typical transactions:

(1) Debit with initial amount authorized to establish the account, and any authorized increases in the balance.

(2) Credit with downward adjustments to the authorized balance.

Normal contra GLACs: 101.

Investments

115-NAF Centralized Investment Program

Used for: NAFIs not included in the Centralized Banking and Investment Program.

Normal balance: Debit

Purpose: Record only the current unencumbered portion of the Centralized Investment Program.

Typical transactions:

(1) Debit to increase the balance in the master cash central account.

(2) Credit for amounts set aside in sinking funds (GLACs 187 and 188).

Normal contra GLACs: 101, 102, 187, and 188.

116-Savings Account

Used for: NAFIs not included in the Centralized Banking and Investment Program.

Normal balance: Debit.

Purpose: Record cash deposited in approved banking or savings institutions to earn interest.

Typical transactions:

(1) Debit with deposits of cash.

(2) Credit with withdrawals of principal or interest.

(3) Debit with interest earned. Contra credit to GLAC 901.

Normal contra GLACs: 101, 102, and 801.

117-Marketable Securities

Used for: NAFIs not included in the Centralized Banking and Investment Program.

Normal balance: Debit

Purpose: Record the amount of securities purchased for investment.

Typical transactions:

(1) Debit with the acquisition cost of investments at the time of purchases.

(2) Credit with the acquisition cost of investments at the time of sale or conversion.

Normal contra GLACs: 101 and 102.

Accounts Receivable

119-Advances Receivables

Used for: All NAFIs

Normal balance: Debit

Purpose: Record the amount of travel advances given to travelers on TDY orders and PCS orders.

Typical transactions:

(1) Debit with the amount of advances provided to travelers.
(2) Credit with the amount of the advance when it is refunded or earned by the traveler and recorded as a travel expense.
Normal contra GLAC: 101, 102, 692, 732, and 754.

120-ARM Income Receivables

Used for: All NAFIs participating in the ARM program.
Normal balance: Debit
Purpose: Record the amount or slot machine income the NAFI expects to receive.
Typical transactions:
(1) Debit with the amount of income expected, based on documentation received or based on projected income.
(2) Credit with the original estimate when the actual income is received.
Normal contra GLACs: 101 and 524.

121-Members Receivables

Used for: All NAFIs
Normal balance: Debit
Purpose: Record the amounts owed by members and customers.
Typical transactions:
(1) Debit with the amount of member charge sales, dues, credit transactions, and for receivables collected after their write-off.
(2) Credit with the amount of payments received from members and customers.
Normal contra GLACs: 101, 102, 302, 501, and 509.

123-Concessionaire Receivables

Used for: ALL NAFIs.
Normal balance: Debit
Purpose: Record the computed amount of concessionaire and other commission fees due.
Typical transactions:
(1) Debit with the amount of concessionaire and other commission fees due the fund.
(2) Credit with same amount debited when payment is received.
Normal contra GLACs: 101, 102, and 502.

124-Returned Checks Receivable

Used for: All NAFIs
Normal balance: Debit
Purpose: Record the amount of checks dishonored by banks and penalty fees charged by the bank.
Typical transactions:
(1) Debit with the amount of checks returned and any service fees charged.
(2) Credit with the amounts received from the makers of dishonored checks, and with the amount of checks determined to be uncollectible.
Normal contra GLACs: 101, 102, and 661.

125-AAFES Receivable

Used for: All NAFIs
Normal balance: Debit

Purpose: Record the amount of the distribution the NAFI expects to receive from the AAFES.

Typical transactions:

(1) Debit with the amount expected from AAFES.
(2) Credit with the amount originally debited when the check is received.
Normal contra GLACs: 101 and 549.

126-Loans Receivable

Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of loans to other NAFIs.
Typical transactions:
(1) Debit with the amount of loans made to other NAFIs.
(2) Credit with the amount of payments received from debtors.
Normal contra GLACs: 101, 102, and 801.

127-Claims Receivable

Used for: All NAFIs
Normal balance: Debit
Purpose: Record the amount of claims against third parties covering the destruction or loss of assets due to fire, theft, or other causes.
Typical transactions:
(1) Debit with the net book value of assets lost, stolen, damaged, or destroyed.
(2) Credit with the amounts received as insurance settlements.
Normal contra GLACs: 101, 102, 827, and fixed asset and inventory GLACs.

128-Deposits Receivable

Used for: All NAFIs
Normal balance: Debit
Purpose: Record the amount on deposit with vendors in connection with the purchase of bottled, cased, or barreled merchandise. Adjust the balance to the dollar value of the physical inventory at the end of the accounting period.
Typical transactions:
(1) Debit with the amount of the deposit required by vendors.
(2) Debit with the amount of the deposit given to customers when bottled or cased goods are returned by customers.
(3) Credit when bottled or cased goods are sold to customers or returned to vendors.
Normal contra GLACs: 101, 102, and 741.

129-Guest Ledger Receivables

Used for: Hotel and Billeting NAFIs.
Normal balance: Debit
Purpose: To record the unpaid charges made by hotel and billeting customers.
Typical transactions:
(1) Debit with the amount of unpaid customer charges made before checkout.
(2) Credit with the amount of payments received from customers.
Normal contra GLACs: 101, 102, 123, and 501.

130-Accrued Interest Receivable

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of interest income earned but not yet received.

Typical transactions:

(1) Debit with the amount of accrued interest at the end of the accounting period.

(2) Credit with the accrual amount when interest is received.

Normal contra GLACs: 101, 102, 115, 116, 117, and 801.

131-Grants Receivable

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of a grant due NAFIs for an approved project. Reconcile monthly with GLAC 205 of the next higher echelon which will provide the grant.

Typical transactions:

(1) Debit at Major Command for the amount of the approved funding for the FY.

(2) Debit at installation for the amount of an approved grant due.

(3) Credit at Major Command for the amount of cash transferred, including amount transferred directly to the installation by higher HQ. Contra to GLAC 205 for the amount transferred directly to the installation, and GLAC 101 for the amount retained by the Major Command.

(4) Credit at installation with the amount of cash received.

(5) Credit at Major Command with the amount of any unused grant returned after completion of the project for which the grant was approved.

Normal contra GLACs: 101, 205, 291.

132-Dividends Receivable

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of dividend allocations due. Reconcile monthly with GLAC 206 of the next higher echelon providing the dividend.

Typical transactions:

(1) Debit at Major Command with the amount of the dividend allocation given by higher HQ.

(2) Debit at installations with the amount of the allocation received from the Major Command.

(3) Credit at Major Command with the amount of cash transferred, including the amount transferred directly to installations, by higher HQ.

(4) Credit at installations with the actual amount of cash received.

Normal contra GLACs: 101, 206, and 806.

133-Reserve Component Dividends Receivable

Used for: Major Command MSFs only.

Normal balance: Debit

Purpose: Record an advance dividend credit allocation issued to an installation MSF for reserved component units.

Typical transactions:

(1) Debit with the amount of the advance dividend credit allocation.

(2) Credit with the advance amount when the quarterly dividend is received.

Normal contra GLACs: 206.

134-Allowance for Doubtful Accounts

Used for: All NAFIs. (Use this account only when the NAFI expects uncollectible accounts to total \$300 or more during the fiscal year.)

Normal balance: Credit

Purpose: Record the calculated amount set up to allow for uncollected accounts.

Typical transactions:

(1) Debit with the amounts written-off as they are determined to be worthless.

(2) Credit with the monthly estimate set up for uncollectible charges.

Normal contra GLACs: 121 and 661.

135-Inter NAFI Receivables-Within MACOM

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record amount due from other NAFIs within the MACOM.

Typical transactions:

(1) Debit with the amount due.

(2) Credit with the amount received.

Normal contra GLACs: 101 and 102.

136-Inter NAFI Receivables-Outside MACOM

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record amount due from other NAFIs outside the MACOM.

Typical transactions:

(1) Debit with the amount due.

(2) Credit with the amount received.

Normal contra GLACs: 101 and 102.

138-Layaway Receivables

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record amount due on layaway sales.

Typical transactions:

(1) Debit with the amount due on layaway sales.

(2) Credit with the amount received or the balance due at the time a layaway is cancelled or expires.

Normal contra GLACs: 101, 303, and 516.

139-Commercial Credit Card Receivable

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record credit card charge sales made by customers to a credit card company such as Visa or Master Card. Do not use this account for internal charge sales where payment will not be made to a credit card company.

Typical transactions:

(1) Debit with the amount due from credit card charge sales.

(2) Credit with the amount of payment when received.

Normal contra GLACs: 101.

140-Miscellaneous Other Receivables

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount due the NAFI that can not properly be recorded in another receivable GLAC.

Typical transactions:

(1) Debit with the amounts due the NAFI.

(2) Credit with the payments received or adjustments.

Normal contra GLACs: 101, 599, and 825.

Inventories**141-Warehouse/Storeroom Inventory**

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of inventory held in the central warehouse for resale at the end of the statement period. The entry will be reversed at the beginning of the following accounting period.

Typical transactions:

(1) Debit with the cost of inventory held in the warehouse for resale at the end of the accounting period.

(2) Credit with the cost of inventory held in the warehouse for resale at the beginning of the accounting period.

Normal contra GLACs: 900. Do not use other GLACs.

142-Sales Outlet Merchandise Inventory

Used for: All NAFIs

Normal balance: Debit

Purpose: Record the value of inventory at the end of an accounting period for the sales outlets. The entry will be reversed at the beginning of the following accounting period.

Typical transactions:

(1) Debit with the cost of merchandise on hand at the end of the accounting period.

(2) Credit with the cost of merchandise on hand at the beginning of the accounting period.

Normal contra GLACs: 900. Do not use other GLACs.

143-Inventory In Transit

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of merchandise that has been shipped free on board and held by a common carrier on the last day of the accounting period. (The CAO should have a document from the vendor to support this transaction.) The entry will be reversed at the beginning of the following accounting period.

Typical transactions:

(1) Debit with the cost of merchandise in transit at the end of the accounting period.

(2) Credit with the cost of merchandise in transit at the beginning of the accounting period.

Normal contra GLACs: 900. Do not use other GLACs.

144-Work-in Progress Inventory

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of partially manufactured goods in inventory at the end of the accounting period.

Typical transactions:

(1) Debit with the cost of partially manufactured goods on hand at the end of the accounting period.

(2) Credit with the cost of partially manufactured goods on hand at the beginning of the accounting period.

Normal contra GLACs: 900. Do not use other GLACs.

Prepaid Expenses**151-Prepaid Supplies and Equipment**

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of prepaid supplies and equipment held by the NAFI and/or stored in a central warehouse. These supplies and equipment will be expensed at a later date or issued from a central warehouse.

Typical transactions:

(1) Debit with the cost of items received.

(2) Credit with the cost of supplies and equipment when they are expensed or transferred.

Normal contra GLACs: 201, 726, and 742.

152-Prepaid Taxes and Licenses

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of prepaid taxes and licenses.

Typical transactions:

(1) Debit with the amount of taxes and licenses paid in advance.

(2) Credit with the amount expensed during the period, using the straight-line method.

Normal contra GLACs: 201 and 736.

153-Prepaid Insurance

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of prepaid insurance premiums paid.

Typical transactions:

(1) Debit with the amount of insurance premiums paid in advance.

(2) Credit with the amount expensed for the period, using the straight-line method.

(3) Credit with the amount refunded when insurance is cancelled.

Normal contra GLACs: 201, 607,733, and 734.

154-Prepaid Maintenance and Repair

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record advance payments of \$240 or more on maintenance or repair contracts that will span later months and will result in a monthly expense of \$20 or more.

Amortization is not mandatory, larger amounts may be expensed immediately if it does not materially distort net income for the reporting period.

Typical transactions:

(1) Debit with the amount paid in advance.

(2) Credit with the amount expensed for the accounting period.

Normal contra GLACs: 201 and 658.

155-Prepaid Tableware, Kitchenware, Linens, and Uniforms
Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of prepaid china, glassware, flatware, linens, utensils, and uniforms on hand in the fund. This account also applies to items stored in a central warehouse.

Typical transactions:

- (1) Debit with the cost of the prepaid items.
- (2) Credit with the cost of these items when put into use.

Normal contra GLACs: 201 and 749.

156-Prepaid Bingo Prizes

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of prepaid merchandise on hand for use as bingo prizes.

Typical transactions:

- (1) Debit with the cost of the prepaid items.
- (2) Credit with the cost of these items when put into use.

Normal contra GLACs: 201 and 750.

157-Prepaid Rent

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of prepaid rent.

Typical transactions:

- (1) Debit with the cost of the prepaid rent.
- (2) Credit with the cost of rent as it is used.

Normal contra GLACs: 201 and 746.

159-Prepaid Items In Transit

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of prepaid items in transit when title passes to the NAFI before receiving the assets.

Typical transactions:

- (1) Debit with the cost of the prepaid items in transit at the end of the accounting period.
- (2) Credit with the cost of these items when received.

Normal contra GLACs: 201, 151-157, and 160.

160-Miscellaneous Other Prepaid Expenses

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record all prepaid expenses that can not be properly recorded in another prepaid expense GLAC.

Typical transactions:

- (1) Debit with the amount of expenses paid in advance.
- (2) Credit with the amount expensed for the accounting period.

Normal contra GLACs: 201, 799, and 850.

Fixed Assets and Accumulated Depreciation

161-Buildings

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the costs of buildings moved from GLAC 179. (The transfer will be made when a building or building addition is completed, occupied, or when the IMWRF is notified the building is ready for beneficial occupancy, whichever occurs first.)

Typical transactions:

- (1) Debit with the amount of construction costs transferred.
- (2) Credit with the cost when a building is disposed of.

Normal contra GLACs: 179.

162-Accumulated Depreciation-Buildings

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of depreciation to date for assets in GLAC 161.

Typical transactions:

- (1) Debit with the accumulated depreciation on a building when disposed of.
- (2) Credit with the amount of depreciation expense for each accounting period.

Normal contra GLACs: 851.

163-Furniture, Fixtures, and Equipment

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of nonexpendable furniture, fixtures, and equipment.

Typical transactions:

- (1) Debit with the purchase cost of nonexpendable items.
- (2) Credit with the cost when an item is disposed of.

Normal contra GLACs: 201

164-Accumulated Depreciation-Furniture, Fixture, and Equipment

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of depreciation for GLAC 163.

Typical transactions:

- (1) Debit with the amount of accumulated depreciation when assets are disposed of.
- (2) Credit with the depreciation expense for each accounting period.

Normal contra GLACs: 853.

165-Vehicles, Aircraft, and Boats

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of vehicles, aircraft, and boats (transportation equipment).

Typical transactions:

- (1) Debit with the purchase cost of transportation equipment.
- (2) Credit with the cost of transportation equipment when disposed of.

Normal contra GLACs: 201.

166-Accumulated Depreciation-Vehicles, Aircraft, and Boats

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of depreciation for GLAC 165.

Typical transactions:

(1) Debit with the amount of accumulated depreciation when transportation equipment is disposed of.
(2) Credit with the amount of depreciation expense for the accounting period.
Normal contra GLACs: 854.

167-Breeding Livestock

Used for: All NAFIs.
Normal balance: Debit.
Purpose: Record the cost of breeding livestock.
Typical transactions:
(1) Debit with the cost of the asset.
(2) Credit with the cost when the asset is disposed of.
Normal contra GLACs: 201.

168-Accumulated Depreciation-Breeding Livestock

Used for: All NAFIs.
Normal balance: Credit
Purpose: Record the amount of depreciation for GLAC 167.
Typical transactions:
(1) Debit with the amount of accumulated depreciation on individual fixed assets when disposed of.
(2) Credit with the amount of depreciation expense for the accounting period.
Normal contra GLACs: 856.

169-Building Improvements

Used for: All NAFIs
Normal balance: Debit
Purpose: Record the cost of improvements transferred from GLAC 179.
Typical transactions:
(1) Debit with the cost of improvements transferred from GLAC 179.
(2) Credit with the cost of improvements when the building is disposed of.
Normal contra GLACs: 179.

170-Accumulated Depreciation-Building Improvements

Used for: All NAFIs.
Normal balance: Credit
Purpose: Record the amount of depreciation for GLAC 169.
Typical transactions:
(1) Debit with the amount of accumulated depreciation when disposed of.
(2) Credit with the amount of depreciation expense for the accounting period.
Normal contra GLACs: 852.

171-Land Improvements

Used for: All NAFIs
Normal balance: Debit
Purpose: Record the cost of improvements transferred from GLAC 179.
Typical transactions:
(1) Debit with the cost of improvements transferred from GLAC 179.
(2) Credit with the cost of improvements when the land is disposed of.
Normal contra GLACs: 179.

172-Accumulated Depreciation-Land Improvements

Used for: All NAFIs.
Normal balance: Credit
Purpose: Record the amount of depreciation for GLAC 171
Typical transactions:
(1) Debit with the amount of accumulated depreciation when disposed of.
(2) Credit with the amount of depreciation expense for the accounting period.
Normal contra GLACs: 855.

175-Government Titled Buildings and Improvements

Used for: All NAFIs.
Normal balance: Debit.
Purpose: Record purchases of real property facilities and improvements procured with NAF dollars and retained by the NAFI, title to which is transferred to the Government.
Typical transactions:
(1) Debit with the cost of property facilities and improvements.
(2) Credit with the cost when the property is disposed of.
Normal contra GLACs: 161 and 179.

176-Accumulated Depreciation-Government Titled Buildings and Improvements

Used for: All NAFIs.
Normal balance: Credit
Purpose: Record the amount of depreciation for GLAC 175.
Typical transactions:
(1) Debit with the amount of accumulated depreciation on individual fixed assets when disposed of.
(2) Credit with the amount of depreciation expense for the accounting period.
Normal contra GLACs: 858.

177-Other Government Titled Fixed Assets

Used for: All NAFIs.
Normal balance: Debit.
Purpose: Record purchases of equipment procured with NAF dollars and retained by the NAFI, title to which is transferred to the Government.
Typical transactions:
(1) Debit with the cost of the equipment.
(2) Credit with the cost when the property is disposed of.
Normal contra GLACs: 201.

178-Accumulated Depreciation-Other Government Titled Fixed Assets

Used for: All NAFIs.
Normal balance: Credit
Purpose: Record the amount of depreciation for GLAC 177.
Typical transactions:
(1) Debit with the amount of accumulated depreciation on individual fixed assets when disposed of.

(2) Credit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 857.

179-Construction in Progress

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record progress expenditures for a new building, building addition, or building and land improvements.

This includes construction cost architectural fees, surveys, commissions, legal fees, insurance, and alterations on the uncompleted project.

Typical transactions:

(1) Debit with progress payments on projects.

(2) Credit with the total cost of the project when completed or ready for occupancy. This transfers the asset to the proper fixed asset account.

Normal contra GLACs: 101, 161, 165, 171, 175, 177, 196, and 2XX.

180-Fixed Assets in Transit

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of fixed assets in transit when title passes to the NAFI before receiving the asset.

Typical transactions:

(1) Debit with the cost of the asset in transit.

(2) Credit with the cost of the fixed asset when received by the NAFI.

Normal contra GLACs: 101, 165, 177, 196, and 2XX.

Other Assets

185-Long-term Loans Receivable

Used for: All NAFIs

Normal balance: Debit

Purpose: Record the amount of loans which are due beyond the next 12 months.

Typical transactions:

(1) Debit with the original amount of loans.

(2) Credit with the amount transferred to GLAC 126.

Normal contra GLACs: 126.

186-Artifacts

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of art or other items of historic or intrinsic value at cost if purchased or appraised value if donated. Items will not be appreciated or devaluated. The account balance will remain unchanged unless an official appraisal has taken place. In such case, increases or decreases will be made by a fund equity adjustment approved by DFAS. A detailed subsidiary record will be maintained for this GLAC.

Typical transactions:

(1) Debit with the purchase price.

(2) Debit with the appraised value of donated items.

(3) Credit with the recorded value when items are disposed of.

Normal contra GLACs: 201 and 291.

187-Fixed Asset Sinking Fund

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record those funds earmarked for the purchase of fixed assets.

Typical transactions:

(1) Debit monthly with an amount at least equal to the amount shown on the Minimum Fixed Asset Transfer Worksheet.

(2) Debit with the amount of funds received from outside sources. (Contra to GLAC 291.)

(3) Credit with the amount of the payment for the purchase of fixed assets. (Transfer to GLAC 101.)

(4) Credit with the amount of withdrawals for other purposes approved by higher HQ.

Normal contra GLACs: 101, 115, 196, and 291.

188-Employee Separation Allowance Sinking Fund

Used for: NAFIs outside of CONUS.

Normal balance: Debit

Purpose: Record the funds set aside for employee separation allowances. Normally, cash for payment of separation pay will be invested in the central banking fund, however, deposits may be made in local currency accounts. A review of the related accounts will be made at least at the end of each fiscal year. The balance in these accounts will be adjusted to show the correct liability and sinking fund reserve.

Typical transactions:

(1) Debit with the amount of funds set aside for separation allowances.

(2) Credit with the amount paid to separating employees.

Normal contra GLACs: 101, 102, and 619.

189-ARM Trust Allocations

Used for: MACOM NAFIs only.

Normal balance: Debit

Purpose: Record the amount of ARM profit distribution advice received from CFSC. This account will be used to accumulate the distribution until the applicable expenses are incurred and funds are received from CFSC.

Typical transactions:

(1) Debit with the amount of the ARM profit distribution advice received.

(2) Credit with the amount of the ARM profit received.

Normal contra GLACs: 101, and 524.

190-Transient Lodging Sinking Fund

Used for: Transient Lodging NAFIs only.

Normal balance: Debit

Purpose: Record those funds earmarked for transient lodging improvements.

Typical transactions:

(1) Debit with the amount of transient lodging profit each month.

(2) Credit with the amount of the payment for the purchase of fixed assets or other authorized expenditures. (Transfer to GLAC 101.)

Normal contra GLACs: 101.

193-Central Accounting Office Loan Receivable

Used for: ALL NAFIs.

Normal balance: Debit

Purpose: Record the amount of funds advanced to the CAO to support its accounting services.

Typical transactions:

(1) Debit with the amount of the initial advance and any increases.

(2) Credit with the amount of the refund of the advance by the CAO and any decreases.

Normal contra GLACs: 101.

195-Payroll Deposits Receivable

Used for: ALL NAFIs.

Normal balance: Debit

Purpose: Record the amount either sent to the CNPO or electronically transferred by CNPO from NAFI bank account at the central bank for payroll expenses.

Typical transactions:

(1) Debit with the gross amounts of payroll expenses.

(2) Credit with the gross amounts of payroll expenses.

Normal contra GLACs: 101 and 601-625.

196-Construction Advances

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount provided to higher HQ or other commands for construction of fixed assets for the NAFI.

Typical transactions:

(1) Debit with the amount advanced.

(2) Credit when the asset is transferred to another fixed asset GLAC.

Normal contra GLACs: 101, 179, and 292.

199-Miscellaneous Other Assets

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of assets that can not properly be recorded in other asset accounts. Subsidiary records will be maintained and reconciled to this account monthly.

Typical transactions:

(1) Debit with the cost of the asset.

(2) Credit when the asset is disposed of or moved to another account.

Normal contra GLACs: 201.

Current Liabilities

Payables

201-Accounts Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount due creditors. A schedule of accounts payable will be prepared at the end of each month and reconciled with the control account. The schedule will age the payables into the following categories: 0-30, 31-60, 61-90, and over 90 days.

Typical transactions:

(1) Credit with the amount of the liability on receipt of the goods or services.

(2) Debit with the amount of the cash payment, allowance, credit documents from creditors, or any other event that reduces the debt.

Normal contra GLACs: 101, 102, and many others.

202-Deposits Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amounts received from customers or other NAFIs that will be refunded or transferred to the proper account within the next 12 months (i.e., deposits collected for special orders and party arrangements). CNPO will use this account to record the amounts sent by the serviced funds for later payrolls. This account will be used by local CAO to record the amounts collected from the serviced funds and not yet sent to the CNPO.

Typical transactions:

(1) Credit with the amount of the deposits received.

(2) Debit with the amount of the deposit refunded or transferred to the proper account.

Normal contra GLACs: 101, 102, and many others.

203-Short Term Loans Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of loans payable that are due within the next 12 months.

Typical transactions:

(1) Credit with the amount of loan principal payable in the next 12 months.

(2) Debit with the amount paid on the loan.

Normal contra GLACs: 101, 102, and 268.

204-Installment Contracts Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of installment contracts due in the next 12 months.

Typical transactions:

(1) Credit with the amount of installment contracts payable in the next 12 months.

(2) Debit with the amounts paid on installment contracts.

Normal contra GLACs: 101, 102, and 268.

205-Grants Payable

Used for: Major Command level NAFIs.

Normal balance: Credit

Purpose: Record the amount of grants owed to subordinate NAFIs.

Typical transactions:

(1) Credit with the amount of grants approved for installations.

(2) Debit with the amount of cash transferred to installations.

(3) Debit with the amount cancelled or withdrawn from an installation. This entry applies when withdrawal is made before the receipt of cash. Major Commands will not record an entry when withdrawal is made after receipt of cash by the installations. Then, the cash and allocation would be returned to the original organization which provided the funds.

Normal contra GLACs: 101, 102, 131, and 291.

206-Dividends/Interest Payable

Used for: Major Command and installation MSFs, and post restaurants.

Normal balance: Credit

Purpose: Record the amount of dividends owed to subordinate funds and the amount of dividend declared, but not yet paid, at the end of the statement period by post restaurants to their CWFs, and to the AAFCWF.

Typical transactions:

- (1) Credit at Major Command with the amount of dividends allocated to installations.
- (2) Credit at installation with the amount of dividends allocated to isolated or reserve units.
- (3) Debit at Major Command with the amount of cash transferred to installations.
- (4) Debit at Major Command with the amounts cancelled or withdrawn from the installations. This entry applies when withdrawal is made before the receipt of cash. Major Commands will not record an entry when withdrawal is made after the receipt of cash by an installation. Then, the cash and allocation would be returned to the original organization which provided the funds.
- (5) Debit at installation with the amount of cash transferred to isolated units.
- (6) Debit with the amount of dividends paid.

Normal contra GLACs: 101, 102, 132, and 292.

207-Reserve Components Dividends Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of advance dividend credit allocations for reserve component units (See AR 215-1).

Typical transactions:

- (1) Credit with the amount of advance dividend credit allocation.
 - (2) Debit when the dividend credit allocation is distributed.
- Normal contra GLACs: 101, 102, 133, and 831.

208-Vending Machine Revenue Sharing Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of vending machine profits owed to state licensing agencies or other third parties.

Typical transactions:

- (1) Credit with the amount of vending machine profits owed to state licensing agencies or others.
- (2) Debit with the amounts paid to state licensing agencies and with special dividends to the AAFCWF and installation CWF.

Normal contra GLACs: 101, 102, and 698.

209-Unclaimed Wages Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of checks for wages that were not claimed. The entry will remain in this account for no more than one month after issue.

Typical transactions:

- (1) Credit with the amount of unclaimed wages.

(2) Debit with the amount of wages claimed.

(3) Debit with the amount of checks for wages that remain unclaimed after one month.

Normal contra GLACs: 101, 102, and 825.

210-Federal Withholding Taxes Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of Federal income tax withheld from employee pay, including tips and service charges.

Typical transactions:

- (1) Credit with the amount of taxes withheld.
- (2) Debit with the amounts paid to the IRS.

Normal contra GLACs: 101.

211-State Withholding Taxes Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of state tax withheld from employee pay.

Typical transactions:

- (1) Credit with the amount of state taxes withheld.
- (2) Debit with the amount paid to the state involved.

Normal contra GLACs: 101.

212-Local Withholding Taxes Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of city, county, and area taxes withheld from employee pay.

Typical transactions:

- (1) Debit with the amount withheld from employee pay.
- (2) Credit with the amount paid to the local governing unit.

Normal contra GLACs: 101.

213-FICA Taxes Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of FICA taxes due. FICA taxes will also be withheld from the part time pay or extra duty pay paid to military personnel.

Typical transactions:

- (1) Credit with the amount of FICA taxes withheld from employee pay, including tips, plus the employers contribution.
- (2) Debit with the amount paid to the IRS.

Normal contra GLACs: 101 and 611.

214-Life Insurance Premiums Payable

Used for: ALL NAFIs.

Normal balance: Credit

Purpose: Record the amount of insurance premiums withheld from employee pay plus the amounts contributed by the NAFI.

Typical transactions:

- (1) Credit with the amount of insurance premiums withheld from employee pay plus the amount contributed by the NAFI.
- (2) Debit with the amount paid to the insurer.

Normal contra GLACs: 101, 102, and 612.

215-Retirement Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of retirement premiums withheld from employee pay and the amount contributed by the NAFI.

Typical transactions:

(1) Credit with the amount withheld from employee pay plus the amount contributed by the NAFI.

(2) Debit with the amount paid to the retirement plan.

Normal contra GLACs: 101, 102, and 613.

216-Employee Supplemental Insurance Premiums Payable
Used for: CNPO only for deductions made for employees of the Defense Logistics Agency.

Normal balance: Credit

Purpose: Record the amount of supplemental insurance premiums withheld from employee pay.

Typical transactions:

(1) Credit with the amount of insurance premiums withheld.

(2) Debit with the amount paid to the insurer.

Normal contra GLACs: 101 and 102.

217-Employee Delinquent Tax Levy Withholdings Payable
Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount deducted from employee pay for delinquent taxes.

Typical transactions:

(1) Credit with the amount withheld from employee pay.

(2) Debit with the amounts paid to the taxing authority.

Normal contra GLACs: 101 and 102.

218-Savings Bonds Deductions Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amounts withheld from employee pay for the purchase of savings bonds.

Typical transactions:

(1) Credit with the amount deducted from employee pay.

(2) Debit with the amount paid to the bond issuer.

Normal contra GLACs: 101 and 102.

219-Charitable Deductions Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount employees volunteered to be deducted from their pay for the Combined Federal Campaign.

Typical transactions:

(1) Credit with the amount deducted from employee pay.

(2) Debit with the amount paid to the agency and the amount kept by the NAFI as a service fee.

Normal contra GLACs: 101, 102, and 825.

220-Employee Savings Allotment Deductions Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of allotments employees authorize to be deducted from their pay and paid to the savings institution.

Typical transactions:

(1) Credit with the amount of allotments deducted from employee pay.

(2) Debit with the amount paid to the savings institution.

Normal contra GLACs: 101 and 102.

221-Employee Union Dues Deductions Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount deducted from employee pay for union dues.

Typical transactions:

(1) Credit with the amount deducted for union dues.

(2) Debit with the amount paid to the union.

Normal contra GLACs: 101 and 102.

222-Employee Meal Deductions Payable

Used for: Used by CNPO only.

Normal balance: Credit

Purpose: Record the amount withheld from employee pay for meals charged.

Typical transactions:

(1) Credit with the amount withheld from employee pay.

(2) Debit with the amount paid to the NAFI.

Normal contra GLACs: 101 and 102.

224-Foreign Withholding Taxes Payable

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount of tax withheld from local foreign national pay.

Typical transactions:

(1) Credit with the amount of taxes withheld.

(2) Credit with the amount of increases due to changes in the foreign exchange rate at year end.

(3) Debit with the amount paid to the foreign government.

(4) Debit with the amount of decreases due to changes in the foreign exchange rate at year end.

Normal contra GLACs: 102 and 828.

225-Foreign Unemployment Insurance Taxes Payable

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount withheld from foreign national employee pay for the tax plus the amount contributed by the employer.

Typical transactions:

(1) Credit with the amount of tax withheld from foreign national employee pay plus the amount contributed by the employer.

(2) Debit with the amount paid to the foreign government or authorized agent.

Normal contra GLACs: 102 and 614.

226-Foreign Medical Insurance Taxes Payable

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount withheld from foreign national employee pay and bonuses for the tax plus the amount contributed by the employer.

Typical transactions:

(1) Credit with the amount withheld from foreign national employee pay plus the amount contributed by the employer.

(2) Debit with the amount paid to the foreign government or authorized agent.

Normal contra GLACs: 102 and 615.

227-Foreign Welfare and Pension Taxes Payable

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount withheld from local foreign national pay and bonuses for each tax and the amount contributed by the employer.

Typical transactions:

(1) Credit with the amount withheld from local foreign national pay plus the amount contributed by the employer.

(2) Debit with the amount paid to the foreign government or authorized agent.

Normal contra GLACs: 102 and 616.

228-Manual Pay Reimbursements Payable

Used for: Used only by the CNPO.

Normal balance: Credit

Purpose: Record the amount paid employees independent of the payroll system that must be repaid to the NAFI.

Typical transactions:

(1) Credit with the amount of the manual payment to the employees.

(2) Debit with the amount withheld from the employee and paid back to the NAFI.

Normal contra GLACs: 102 and 102.

229-401k Deduction Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of 401k deductions which were deducted from employees pay and have not yet been forwarded.

Typical transactions:

(1) Credit with the amount of the deduction.

(2) Debit with the amount paid to the 401k account.

Normal contra GLACs: 101 and 626.

230-Tips and Service Charge Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of tips and service charges earned by employees that are collected by the fund.

Typical transactions:

(1) Credit with the amounts that appear on customer charge slips and cash tips turned over to the NAFI.

(2) Debit with the amount paid to the employees.

Normal contra GLACs: 102 and 102.

231-Inter NAFI Payables - Within MACOM

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount owed to other NAFIs.

Subsidiary records will be maintained and reconciled with the control account monthly.

Typical transactions:

(1) Credit with the amount owed to other NAFIs.

(2) Debit with the amount paid to the other NAFI.

Normal contra GLACs: 102 and 102.

232-Inter NAFI Payables - Outside MACOM

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount owed to other NAFIs.

Subsidiary records will be maintained and reconciled with the control account monthly.

Typical transactions:

(1) Credit with the amount owed to other NAFIs.

(2) Debit with the amount paid to the other NAFI.

Normal contra GLACs: 102 and 102.

233-U.S. Unemployment Insurance Payable

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the total amount owed to the Department of Labor for unemployment compensation.

Typical transactions:

(1) Credit with the amount of unemployment compensation collected from NAFIs.

(2) Debit with the amount paid to the Department of Labor.

Normal contra GLACs: 101 and 102

234-ARM Distribution Payable

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the amount of slot machine profits to be distributed to Major Commands and installations.

Typical transactions:

(1) Credit with the amount of the payable.

(2) Debit with the amount paid.

Normal Contra GLACs: 101 and 753.

235-Demand Deposits Payable

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the amount of funds NAFIs have on deposit in the central banking program.

Typical transactions:

(1) Credit with the amount of increases in the funds NAFIs have on deposit.

(2) Debit with the amount of decreases in the funds NAFIs have on deposit.

Normal Contra GLACs: 101.

236-Claims Payable

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the amount of claims payable to individuals or businesses.

Typical transactions:

(1) Credit when the claim is established.

(2) Debit when the claim is paid.

Normal Contra GLACs: 101 and 693.

237-Construction Contracts Payable

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the amount of construction contracts outstanding for major construction funded partially or fully by the military department level NAFL.

Typical transactions:

- (1) Credit with the amount of major construction contracts awarded.
- (2) Debit with the amount paid for major construction.

Normal Contra GLACs: 101 and 699.

238-Army Billeting Fund Surcharge Payable

Used for: Billeting Fund NAFIs Only.

Normal balance: Credit

Purpose: Record the amount of surcharge payable to the HQ Army billeting fund.

Typical transactions:

- (1) Credit with the amount of surcharge payable.
- (2) Debit with the surcharge amount paid.

Normal Contra GLACs: 101 and 758.

239-Thrift Savings Plan Payable

Used for: Used by CNPO Only.

Normal balance: Credit

Purpose: Record the amount of thrift savings deducted from employees pay and the employers matching amount payable to the Federal government.

Typical transactions:

- (1) Credit with the amount deducted and the NAFIs matching contribution.
- (2) Debit with the amount paid to the Federal government.

Normal Contra GLACs: 101 and 627.

240-Miscellaneous Other Payables

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of current liabilities that can not properly be recorded in other current liability accounts.

Typical transactions:

- (1) Credit with the amount of miscellaneous payables.
- (2) Debit with the amount paid.

Normal contra GLACs: Use as applicable.

Accruals

241-Interest Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of interest due on all outstanding interest bearing obligations.

Typical transactions:

- (1) Credit with the amount of interest accrued as of the end of the accounting period.
- (2) Debit with the amount of interest paid.

Normal contra GLACs: 102, 102, and 826.

242-Salaries and Wages Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of salaries and wages earned but not paid at the end of each accounting period.

Typical transactions:

- (1) Credit with the amount of salaries and wages earned but not paid.
- (2) Debit at the beginning of the next accounting period with the amount of the credit balance in this GLAC.

Normal contra GLACs: 101, 102, 601, and 602.

243-Annual Leave Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of leave accrued but not yet taken for all full time and part time employees.

Adjustments necessary to bring the accrued annual leave account into balance with the aggregate individual leave records will be made monthly for those CAOs using NAFISS. The adjustment will be made at the end of each accounting year for those not using NAFISS.

Typical transactions:

- (1) Credit with the amount of leave accrued during the accounting period.
- (2) Debit with the amount of leave taken or paid during the accounting period.

Normal contra GLACs: 103 and 603.

244-Payroll Taxes Payable

Used for: All NAFIs

Normal balance: Credit

Purpose: Record the accrued payroll taxes on the unpaid salaries and wages recorded in GLAC 242 at the end of the accounting period.

Typical transactions:

- (1) Credit with the amount of the employer's share of the tax liability.
- (2) Debit at the beginning of the next accounting period with the amount of the balance shown in this GLAC.

Normal contra GLACs: 103 and 104.

245-Employee Bonuses Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the estimated amount of bonuses accrued, but not yet paid, to employees. Maintain subsidiary records for each type bonus and reconcile to the control account monthly.

Typical transactions:

- (1) Credit with the amount of bonus earned by employees, but not yet paid.
- (2) Credit with the amount of the employer's share of payroll taxes incurred against bonuses.
- (3) Credit with the amount of the increase in the payable due to changes in the foreign exchange rate at year end.
- (4) Debit with the excess amount of the accrual over the amount paid.
- (5) Debit with the amount of bonuses paid to employees.
- (6) Debit with the amount of the decrease in the payable due to changes in the foreign exchange rate at year end.

Normal contra GLACs: 103, 104, 617, 618, and 828.

246-Other Employee Benefits Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the estimated amount of other employee benefits that can not properly be recorded in other GLACs.

Typical transactions:

- (1) Credit with the amount of benefits earned.
- (2) Credit with the amount of employer's share of payroll taxes incurred against the benefits.
- (3) Credit with the amount of increase in the payable due to changes in the foreign exchange rate at year end.
- (4) Debit with the amount paid to employees.
- (5) Debit with the excess amount of the accrual over the amount paid.
- (6) Debit with the amount of decrease in the payable due to changes in the foreign exchange rate at year end.

Normal contra GLACs: 103, 104, 624, 625, and 828.

247-US Employee Compensatory Time Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of compensatory time earned, but not yet paid to employees.

Typical transactions:

- (1) Credit with the amount of compensatory time earned, but not yet paid.
- (2) Debit with the amount of compensatory time paid or used.

Normal contra GLACs: 103 and 621.

248-Foreign National Employee Compensatory Time Payable

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount of compensatory time earned but not yet paid to foreign employees.

Typical transactions:

- (1) Credit with the amount of compensatory time earned but not paid.
- (2) Debit with the amount of compensatory time paid or used.

Normal contra GLACs: 104 and 622.

250-Bingo Cash Jackpot Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of unawarded cash bingo prizes.

Typical transactions:

- (1) Credit with the amount not yet paid.
- (2) Debit with the amount accrued when prizes are awarded.

Normal contra GLACs: 101 and 750.

251-Bingo Merchandise Jackpot Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of the NAFIs cost of unawarded merchandise bingo prizes.

Typical transactions:

- (1) Credit with the amount not yet paid.

- (2) Debit with the amount accrued when prizes are awarded.

Normal contra GLACs: 101 and 750.

256-Audit Expense Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the estimated cost of commercial audits.

Typical transactions:

- (1) Credit with the estimated cost each month until the audit is performed.
- (2) Debit with the amount of the accrual when the audit fee is paid.

Normal contra GLACs: 101, 102, and 738.

257-Accrued Maintenance Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of anticipated maintenance costs for major items that occur infrequently but are properly expensed over the accounting year.

Typical transactions:

- (1) Credit with the amount of estimated maintenance expense accrued.
- (2) Debit with the amount accrued when the maintenance is paid for.

Normal contra GLACs: 101, 102, 657, 658, and 659.

260-Miscellaneous Other Accruals

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of accruals that can not properly be recorded in other accounts.

Typical transactions:

- (1) Credit with the amount of the accrual.
- (2) Debit with the amount when the item is paid for.

Normal contra GLACs: 101 and 102.

Unearned Income**261-Special Event Advance Ticket Sales**

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of the liability for tickets sold in advance of an event.

Typical transactions:

- (1) Credit with the amount of tickets sold.
- (2) Debit when the event is held.

Normal contra GLACs: 101, 102, and 503.

262-Dues and Assessments Advance Payments

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of dues and fees received in advance.

Typical transactions:

- (1) Credit with the amount received in advance.
- (2) Debit with the amount earned.

Normal contra GLACs: 101, 102, and 509.

263-Advance Payments on Accounts

Used for: All NAFIs

Normal balance: Credit

Purpose: Record the amount of fees paid in advance that can not properly be recorded in GLAC 282. For example, fees for billeting or mess.

Typical transactions:

(1) Credit with the amount received in advance.

(2) Debit with the amount earned.

Normal contra GLACs: 101 and 5XX.

267-Miscellaneous Other Unearned Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of the liability for deferred income that can not properly be recorded in other GLACs.

Typical transactions:

(1) Credit with the amount of deferred income.

(2) Debit with the amount earned or moved to another GLAC.

(3) Debit to transfer the months amortized portion of the discount/interest from major construction projects to GLAC 801.

Normal contra GLACs: 101, 102, 196, and 801.

Long Term Liabilities

268-Long Term Loans Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of loans due beyond the next 12 months.

Typical transactions:

(1) Credit with the original amount of the loan.

(2) Debit with the amount moved to GLAC 203.

Normal contra GLACs: 203.

270-US Employee Allowances Payable

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount accrued for various types of allowances to pay each group of US employees upon transfer or separation, such as transportation or severance allowances and separation pay.

Typical transactions:

(1) Credit each month with the amount accrued for allowances.

(2) Debit with the amount paid.

Normal contra GLACs: 101 and 601.

271-Foreign National Employee Allowances Payable

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount accrued for various types of allowances to pay each group of employee upon separation, under local foreign government statutes.

Typical transactions:

(1) Credit with the amount accrued for allowances.

(2) Debit with the amount paid.

Normal contra GLACs: 102, 614, 615, 616, and 619.

272-Reserve for Claims

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the amount of claims to be paid in the future based on actuarial evaluations or other estimating methods.

Typical transactions:

(1) Credit with the estimated amount of outstanding claims.

(2) Debit with the amount paid.

Normal Contra GLACs: 101 and 693.

275-Miscellaneous Other Long Term Liabilities

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of other long term liabilities of the NAFI that can not properly be recorded in another GLAC.

Typical transactions:

(1) Credit with the amount accrued.

(2) Debit with the amount paid.

Normal contra GLACs: Use as applicable.

289-Location Clearing Account

Used for: All NAFIs.

Normal balance: NONE

Purpose: Record the amounts transferred between locations in the same fund. The amounts will be recorded in this account and backed out within the same accounting period.

Typical transactions:

(1) Credit with the amount transferred out of one location.

(2) Debit with the same amount transferred into the other location.

Normal contra GLACs: Use as applicable.

Equity

291-Contributed Capital

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of capital from sources outside the NAFI. For example, the amount of approved grants.

Typical transactions:

(1) Credit with the amount received from higher HQ and other NAFIs.

(2) Credit with the amount of dividends found by AOB to be CPMC equity share.

(3) Credit to record funds provided from outside sources to make payments and CPMC purchases.

(4) Debit at Major Command with cash grants transferred to installations.

Normal contra GLACs: 101, 102, and 196.

292-Retained Earnings

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of retained earnings.

Transactions affecting retained earnings not requiring DFAS approval are limited to the following: net income; net loss; entries associated with dissolution of a NAFI; the

declaration of retained earnings distributions by resale and revenue-sharing funds; approved inter-NAFI transfers; and transfers from GLAC 990 at the end of each fiscal year. Retained earnings adjustments will be explained in a footnote to the Balance Sheet.

Typical transactions:

- (1) Credit with the amount of net income for the accounting period.
 - (2) Credit with the amount of DFAS approved adjustments.
 - (3) Debit with the amount of net loss for the accounting period.
 - (4) Debit with the amount of DFAS approved adjustments.
- Normal contra GLACs: 206 and 900.

Sales

301-Cash sales

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of cash sales of goods. Some examples are sales made by dining rooms, bars, snack bars, and book departments. This account may be used for hotel telephone operations that are accounted for as an annex or activity of the hotel.

Typical transactions:

Credit with the amount of cash sales.

Normal contra GLACs: 101.

302-Credit Sales

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of charge sales.

Typical transactions:

Credit with the amount of charge sales.

Normal contra GLACs: 121 and 139.

303-Layaway Sales

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of sales of items on layaway.

Typical transactions:

Credit with the amount of layaway sales.

Normal contra GLACs: 138.

304-Sales Returns and Allowances

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of returns of, or allowances on, goods previously sold and later returned. See GLAC 653 for customer rejected meals and beverages which were rejected before the customer paid for them.

Typical transactions:

Debit with the amount of sales returns.

Normal contra GLACs: 101, 121, and 139.

305-Sales discounts

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of sales discounts given on the sale of items.

Typical transactions:

Debit with the amount of discounts given on the sale of items.

Normal contra GLACs: 301 and 302.

306-Employee discounts

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of sales discounts given to NAFI employees.

Typical transactions:

Debit with the amount of employee sales discounts.

Normal contra GLACs: 301 and 302.

Cost of goods sold

401-Purchases

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of merchandise purchased for resale including shipping and handling. This account may also be used to record local and long distance telephone service charges when charged as part of a hotel or separate operation. Purchase transactions for warehouse storage and later issue will be identified by use of the fund code of the entity operating the warehouse. Purchase transactions for immediate use by a facility will be identified by use of the assigned facility code with the fund code.

Typical transactions:

(1) Debit with the cost (net of discount) of all merchandise purchased for resale from all sources.

(2) Credit with the balance at the end of the accounting period.

(3) Credit with the discounts received after the purchase cost is recorded.

Normal contra GLACs: 201 and 204.

402-Warehouse/Storeroom Requisitions

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of merchandise moved from the warehouse to various locations within the same NAFI.

Typical transactions:

(1) Debit with the amount of merchandise moved from the warehouse.

(2) Credit with the balance at the end of the accounting period.

Normal contra GLACs: 412 ONLY.

403-Transfers From Other Funds

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of resale merchandise received from another NAFI.

Typical transactions:

(1) Debit with the cost of resale merchandise received from another NAFI.

(2) Credit with the balance at the end of the accounting period.

Normal contra GLACs: 101, 231, and 232.

404-Transfers From Other Locations/Departments

Used for: All NAFIs

Normal balance: Debit

Purpose: Record the amount of resale merchandise received from another location or department in the same NAFI.

Typical transactions:

- (1) Debit with the cost of resale merchandise received.
- (2) Credit with the balance at the end of the accounting period.

Normal contra GLACs: 414 ONLY.

411-Purchase Returns and Allowances

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of merchandise returned or allowances taken.

Typical transactions:

- (1) Credit with the amount of merchandise returned or allowances taken.
- (2) Debit with the balance at the end of the accounting period.

Normal contra GLACs: 201.

412-Warehouse/Storeroom Issues

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the cost of merchandise moved from the warehouse or storeroom to departments or locations in the same NAFI.

Typical transactions:

- (1) Credit with the cost of merchandise moved.
- (2) Debit with the balance at the end of the accounting period.

Normal contra GLACs: 402 ONLY.

413-Transfers to other Funds

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the cost of resale merchandise issued to another NAFI.

Typical transactions:

- (1) Credit with the cost of resale merchandise issued.
- (2) Debit with the balance at the end of the accounting period.

Normal contra GLACs: 135 and 136.

414-Transfers to Other Locations/Departments

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the cost of resale merchandise transferred to another department or location in the same NAFI.

Typical transactions:

- (1) Credit with the cost of resale merchandise transferred.
- (2) Debit with the balance at the end of the accounting period.

Normal contra GLACs: 404 ONLY.

416-Other Inventory Reductions

Used for: All NAFIs.

Normal balance: Credit.

Purpose: Deduct the cost of unusual reductions in inventory from cost of goods sold, such as losses that result from insurance claims. Also used when transferring amounts to an operating expense GLAC or to net to zero in the cost of goods sold section for a non-resale NAFI other than a warehouse. Also includes the cost of meals provided to employees free of charge.

Typical transactions:

Credit with the amount of the loss or transfer.

Normal contra GLACs: 131, 6XX, 730, and 7XX.

432-Cost of Goods Sold, Inventory Overage

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the value of inventory overages resulting from the physical inventory count of resale merchandise.

Typical transactions:

Debit with the amount of inventory overages.

Normal contra GLAC: 512 ONLY.

452-Cost of Goods Sold, Promotions

Used for: All NAFIs.

Normal balance: Credit.

Purpose: Deduct the cost of merchandise consumed during promotions within the NAFI from cost of goods sold.

Typical transactions:

Credit with the cost of the merchandise given away.

Normal contra GLAC: 652 ONLY.

453-Cost of Goods Sold, Customer Rejected Goods

Used for: All NAFIs.

Normal balance: Credit

Purpose: Deduct the cost of meals and beverages rejected by customers before sales are consummated from cost of goods sold.

Typical transactions:

Credit with the cost of rejected meals and beverages.

Normal contra GLAC: 653 ONLY.

454-Cost of Goods Sold, Resale Merchandise, Spoilage, Breakage, and Obsolescence

Used for: All NAFIs.

Normal balance: Credit

Purpose: Deduct the cost of food and bar items or other resale merchandise broken or spoiled from cost of goods sold.

Typical transactions:

Credit with the cost of merchandise losses.

Normal contra GLAC: 654 ONLY.

455-Cost of Goods Sold, Warehouse/Storeroom Spoilage, Breakage, and Obsolescence

Used for: All NAFIs.

Normal balance: Credit

Purpose: Deduct the cost of broken or spoiled warehouse inventory items from cost of goods sold. This includes inventory obsolescence losses reported to the installation commander.

Typical transactions:

Credit with the cost of merchandise losses.

Normal contra GLAC: 655 ONLY.

456-Cost of Goods Sold, Inventory Shortage

Used for: All NAFIs.

Normal balance: Credit

Purpose: Deduct the cost of inventory shortage discovered in the physical inventory count from cost of goods sold.

Typical transactions:

Credit with the cost of inventory shortages.

Normal contra GLAC: 656 ONLY.

Other Operating Income**501-Service/Recreation Activity Income**

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of income from recreation fees and services, or income from the NAFIs recycling supplemental mission sale of recyclable material to a commercial dealer.

Typical transactions:

Credit with the amount of income received.

Normal contra GLACs: 101, 121, and 139.

502-Concession Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of fees received or due from vending machines, restaurants, snack bars, and such, operated under a concessionaire contract. Also record the amount received from hotels, tour operators, etc. for referrals and bookings.

Typical transactions:

Credit with the amount received or due.

Normal contra GLACs: 101 and 123.

503-Special Events Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of income received from special events sponsored by a NAF activity that can not be properly recorded in GLAC 501.

Typical transactions:

Credit with the amount of income received.

Normal contra GLACs: 101 and 139.

504-Rental and Usage Fee Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of fees received from or billed to customers and others for the use of facilities, equipment, utilities, delivery services, and other charges.

Typical transactions:

Credit with the amount of fees received or billed.

Normal contra GLACs: 101 and 121.

505-TV and Radio Rights Income

Used for: ALL NAFIs.

Normal balance: Credit

Purpose: Record the amount of income received or billed from TV and radio coverage of athletic and special events. Also includes amounts received from cable franchise fees.

Typical transactions:

Credit with the amount of income received or billed.

Normal contra GLACs: 101.

506-Program and Brochure Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of income received from the sale of programs and brochures at athletic and special events.

Typical transactions:

Credit with the amount of income received.

Normal contra GLACs: 101.

507-Guaranteed Participation Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of income received for taking part in athletic and special events where the host guarantees income.

Typical transactions:

Credit with the amount of income received.

Normal contra GLACs: 101.

509-Dues Income

Used for: NAFIs which charge dues.

Normal balance: Credit

Purpose: Record the amount of dues billed, collected, or moved from GLAC 282.

Typical transactions:

Credit with the amount of dues billed, collected, or moved from GLAC 282.

Normal contra GLACs: 101 and 262.

511-Cash Overage Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of the overages of cashiers.

Typical transactions:

Credit with the amount of the overages.

Normal contra GLACs: 101.

512-Inventory Overage Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of inventory overages identified in the physical inventory count.

Typical transactions:

Credit with the amount of inventory overages.

Normal contra GLACs: 432 ONLY.

515-Vendor Reimbursement Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of vendor reimbursement received for services or supplies provided to the concessionaire by the NAFI.

Typical transactions:

Credit with the amount charged.

Normal contra GLACs: 101.

516-Forfeited Layaway Sales Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of revenue received when a layaway order is cancelled or expires.

Typical transactions:

Credit with the amount or revenue received.

Normal contra GLACs: 101.

517-Late Charge Assessment Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount charged for late payment.

Typical transactions:

Credit with the amount charged.

Normal contra GLACs: 101.

518-POV Registration Fee Income

Used for: USAREUR Vehicle Registration Fund.

Normal balance: Credit

Purpose: Record the amount of revenue received from the registration of privately owned vehicles involving issuing license plates.

Typical transactions:

Credit with the amount received from the sale of license plates.

Normal contra GLACs: 101.

519-Operator License Fee Income

Used for: USAREUR Vehicle Registration Fund.

Normal balance: Credit

Purpose: Record the amount of revenue received from the issue of operator licenses.

Typical transactions:

Credit with the amount received from the sale of license plates.

Normal contra GLACs: 101.

520-Reregistration Fee Income

Used for: USAREUR Vehicle Registration Fund.

Normal balance: Credit

Purpose: Record the amount of revenue received from the issue of registration decals.

Typical transactions:

Credit with the amount received for reregistration decals.

Normal contra GLACs: 101.

521-Nonoperational Vehicle Fee Income

Used for: USAREUR Vehicle Registration Fund.

Normal balance: Credit

Purpose: Record the amount of revenue received from the issue of documents which let an owner keep a vehicle but don't allow it to be driven.

Typical transactions:

Credit with the amount or nonoperational fees received.

Normal contra GLACs: 101.

522-Weapons Registration Fee Income

Used for: USAREUR Vehicle Registration Fund.

Normal balance: Credit

Purpose: Record the amount of revenue received from the registration of privately owned weapons.

Typical transactions:

Credit with the amount or registration fees received.

Normal contra GLACs: 101.

523-Returned Check Service Charge Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of revenue received from locally assessed service charge for collecting returned checks.

Typical transactions:

Credit with the amount of service charge assessed or collected.

Normal contra GLACs: 101, 121, and 140.

524-ARM Profit Distribution Income

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount of revenue received from the ARM program at the time the money is removed from the machines and/or when the ARM profit distribution advice is received from CFSC.

Typical transactions:

Credit with the amount of the revenue or profit distribution advice received.

Normal contra GLACs: 101, 120, and 189.

525-ARM Expense Reimbursement Income

Used for: NAFIs outside CONUS.

Normal balance: Credit

Purpose: Record the amount of income received from CFSC as reimbursement for the cost of providing a facility for and operating the slot machines.

Typical transactions:

Credit with the amount of reimbursement received or expected.

Normal contra GLACs: 101, and 120.

527-Service Charge Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of revenue earned as service charges, other than from returned checks.

Typical transactions:

Credit with the amount of service charges added to customer bills.

Normal contra GLACs: 101 and various receivables.

528-Warehouse Price Variance Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the price adjustments when the amount to be paid for inventory purchases is less than the amount recorded as the original purchase. Use only for warehouse inventories under stock record control. Do not use for retail inventories.

Typical transactions:

Credit with the amount of service charges added to customer bills.

Normal contra GLACs: 101 and 201.

529-Fishing Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the fees earned from fishing activities.

Typical transactions:

Credit with the amount of revenue.

Normal contra GLACs: 101 and 121.

530-Hunting Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the fees earned from hunting activities.

Typical transactions:

Credit with the amount of revenue.

Normal contra GLACs: 101 and 121.

531-Green Fees Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned as green fees.

Typical transactions:

Credit with the amount of revenue earned.

Normal contra GLACs: 101 and 121.

532-Driving Range Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned from driving ranges.

Typical transactions: Credit with the amount of revenue earned.

Normal contra GLACs: 101 and 121.

533-Golf Cart Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned from renting golf carts.

Typical transactions:

Credit with the amount revenue earned.

Normal contra GLACs: 101 and 121.

534-Instructional Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned as instruction fees.

Typical transactions:

Credit with the amount of revenue earned.

Normal contra GLACs: 101 and 121.

535-Lane Fees Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned as bowling lane fees.

Typical transactions:

Credit with the amount of revenue earned.

Normal contra GLACs: 101 and 121.

536-Shoe Rental Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned from shoe rentals.

Typical transactions:

Credit with the amount of revenue.

Normal contra GLACs: 101 and 121.

537-Local Telephone Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned from customer use of telephones.

Typical transactions:

Credit with the amount of revenue.

Normal contra GLACs: 101.

538-Recyclable Material Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the payment received from non-NAFI recycling programs. This account will not be used for the revenue earned by the NAFI from selling recyclable materials when the NAFI runs the recycling program.

Typical transactions:

Credit with the amount of the payment.

Normal contra GLACs: 101.

539-Amusement Machine Income (Non-Concessionaire)

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned from NAFI controlled amusement machines.

Typical transactions:

Credit with the amount of revenue.

Normal contra GLACs: 101.

541-Commercial Travel Office Commission Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the income the installation receives.

Typical transactions:

Credit with the amount of income.

Normal contra GLACs: 101.

542-APF Contract Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the income received from APF contracts where the NAFI performs a service or provides materials to the U.S. Government.

Typical transactions:

Credit with the amount of income.

Normal contra GLACs: 101 and 140.

543-USDA Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the income received from the U.S. Department of Agriculture for meals provided to children.

Typical transactions:

Credit with the amount of income.

Normal contra GLACs: 101 and 140.

545-AAFES Dividend Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the Army Simplified Dividend (ASD) received from the military exchange service.

Typical transactions:

Credit with the amount of income.

Normal contra GLACs: 101 and 125.

546-Insurance Premiums Income

Used for: CFSC and SAI Fund only.

Normal balance: Credit

Purpose: Record the amount of insurance premiums received from installations and Major Commands.

Typical transactions:

Credit with the amount of insurance premiums received or billed.

Normal contra GLACs: 101 and 140.

547-Income From Allocation of Expenses

Used for: CFSC only.

Normal balance: Credit

Purpose: Record the amount of income from other funds when costs are distributed between various funds.

Typical transactions:

Credit with the amount of cost allocated to other funds.

Normal contra GLACs: 101 and 119.

548-Coupon and Special Offer Discounts

Used for: All NAFIs.

Normal balance: Debit (Contra income account)

Purpose: Record the amount of coupon and special offer discount granted to customers.

Typical transactions:

Debit with the amount of discounts granted.

Normal contra GLACs: 101 and 5XX.

549-AAFES Other Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the other income received from the military exchange service that is not ASD.

Typical transactions:

Credit with the amount of income.

Normal contra GLACs: 101 and 125.

550-Consignment Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the full amount of cash received from consignment sales. Includes tickets sold via automated ticketing machines.

Typical transactions:

Credit with the amount of consignment tickets sold.

Normal contra GLACs: 101, 121, and 140.

551-Communications Services Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the revenue earned from customer use of communications equipment including electronic mail, faxes, etc..

Typical transactions:

Credit with the amount of revenue.

Normal contra GLACs: 101, 121, and 140.

553-Commercial Sponsorship Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the cash or checks received from commercial sponsors or MWR events, functions, or promotions.

Typical transactions:

Credit with the amount of cash or checks received.

Normal contra GLACs: 101.

554-Food Purchase Rebate

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the rebates received from food vendors involved in the food purchase rebate program.

Typical transactions:

Credit with the amount of rebate received.

Normal contra GLACs: 101.

555-Garnishment Processing Revenue

Used for: Central NAF Payroll Office only.

Normal balance: Credit

Purpose: Record the amount of garnishment processing revenue received from individuals whose wages are garnished.

Typical transactions:

Credit with the amount or revenue collected.

Normal contra GLACs: 101.

599-Miscellaneous Other Operating Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of income received that can not properly be recorded in any other operating income GLAC.

Typical transactions:

Credit with the amount of income received.

Normal contra GLACs: 101 and 140.

Operating Expenses

Labor Expenses

601-US Salaries and Wages

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of gross salaries and wages paid to U.S. employees.

Typical transactions:

(1) Debit with the gross amount of salaries and wages paid, including overtime.

(2) Debit with the gross amount of salaries and wages earned but not paid, at the end of the accounting period. This entry will be reversed at the beginning of the new accounting period.

(3) Credit with the amount of annual and sick leave paid.

Normal contra GLACs: 242, 243, 603, 605, and 623.

602-Foreign National Salaries and Wages.

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of salaries and wages paid to foreign national employees.

Typical transactions:

(1) Debit with the gross amount of salaries and wages paid.

(2) Debit with the gross amount of salaries and wages earned, but not paid, at the end of the accounting period. This entry will be reversed at the beginning of the new accounting period.

(3) Credit with the amount of annual and sick leave paid.

Normal contra GLACs: 242, 243, 604, and 606.

603-US Annual leave

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of annual leave earned each payroll period.

Typical transactions:

Debit with the amount of annual leave earned at the end of each payroll period.

Normal contra GLACs: 243.

604-Foreign National Annual Leave

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of annual leave earned by foreign national employees at the end of each payroll period.

Typical transactions:

Debit with the amount of annual leave earned at the end of each payroll period.

Normal contra GLACs: 243.

605-US Sick Leave

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of sick leave paid to U.S. employees during the accounting period.

Typical transactions:

Debit with the amount of sick leave paid during the accounting period.

Normal contra GLACs: 101, 103, and 601.

606-Foreign National Sick Leave

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of sick leave paid to foreign national employees during the accounting period.

Typical transactions:

Debit with the amount of sick leave paid at the end of each payroll period.

Normal contra GLACs: 102, 104, and 602.

607-US Worker's Compensation Insurance

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of the NAFI's cost for Worker's Compensation Insurance for US employees.

Typical transactions:

Debit with the cost of Worker's Compensation Insurance.

Normal contra GLACs: 101 and 201.

608-Foreign National Worker's Compensation Insurance

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of the NAFI's cost for Worker's Compensation Insurance for foreign national employees.

Typical transactions:

Debit with the cost of Worker's Compensation insurance.

Normal contra GLACs: 102 and 201.

609-US Retroactive Wage Increases

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of wage increases granted retroactively to U.S. employees. When such an increase is anticipated, the amount may be estimated and apportioned monthly over the period covered.

Typical transactions:

Debit with the estimated or actual amount of the wage increase for the accounting period.

Normal contra GLACs: 246.

610-Foreign National Retroactive Wage Increases

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of wage increases granted retroactively to foreign national employees. When such an increase is anticipated, the amount may be estimated and apportioned monthly over the period covered.

Typical transactions:

Debit with the estimated or actual amount of the wage increase for the accounting period.

Normal contra GLACs: 246.

611-Employer's Share of FICA

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of the NAFI's share of FICA taxes, which matches the amount deducted from the employee's wages.

Typical transactions:

Debit with the amount of the NAFI's share of FICA taxes.

Normal contra GLACs: 213.

612-Employer's Share of Employee Group Health and Life Insurance Plans

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of the NAFI's share of group health and life insurance premiums.

Typical transactions:

Debit with the amount of the NAFI's share of group health and life insurance premiums.

Normal contra GLACs: 214.

613-Employer's Share of NAF Employee Retirement Plans

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of the NAFI's share of NAF group annuity retirement plan.

Typical transactions:

Debit with the amount of the NAFI's share of NAF group annuity retirement plans.

Normal contra GLACs: 215.

614-Foreign National Unemployment Insurance Taxes

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of the NAFI's share of foreign national unemployment insurance taxes.

Typical transactions:

Debit with the amount of the NAFI's share of foreign national unemployment insurance taxes.

Normal contra GLACs: 225.

615-Foreign National Medical Insurance Taxes

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of the NAFI's share of foreign national medical insurance taxes.

Typical transactions:

Debit with the amount of the NAFI's share of foreign medical insurance taxes.

Normal contra GLACs: 226.

616-Foreign National Welfare and Pension Taxes

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the amount of the NAFI's share of foreign national welfare and pension taxes.

Typical transactions:

Debit with the amount of the NAFI's share of foreign national welfare and pension taxes.

Normal contra GLACs: 227.

617-US Employee Bonuses and Awards

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of U.S. employee bonuses, to include the amount of cash and non-cash awards.

Typical transactions:

Debit with the amount of employee bonuses and awards.

Normal contra GLACs: 245.

618-Foreign National Employee Bonuses and Awards

Used for: NAFIs outside of CONUS.

Normal balance: Debit

Purpose: Record the amount of estimated accruals for bonuses to be paid to foreign national employees, to include cash and non-cash awards.

Typical transactions:

Debit with the estimated amount of the bonuses or awards accrued for the accounting period.

Normal contra GLACs: 245.

619-Foreign National Employee Separation Pay

Used for: NAFIs outside CONUS.

Normal balance: Debit

Purpose: Record the estimated accruals for separation pay to be paid to foreign national employees.

Typical transactions:

Debit with the amount accrued each month for separation pay.

Normal contra GLACs: 271.

620-US Unemployment Insurance Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of NAFI unemployment compensation costs.

Typical transactions:

Debit with the amount of unemployment compensation insurance expense for the period.

Normal contra GLACs: 101 and 153.

621-US Compensatory Time Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of compensatory time earned by US employees.

Typical transactions:

Debit with the amount of earned compensatory time.

Normal contra GLACs: 247.

622-Foreign National Compensatory Time Expense

Used for: NAFIs outside of CONUS.

Normal balance: Debit

Purpose: Record the amount of compensatory time earned by foreign national employees.

Typical transactions:

Debit with the amount of foreign national employee earned compensatory time earned.

Normal contra GLACs: 248.

623-Home leave Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the expense when home leave is taken. Do not accrue home leave.

Typical transactions:

Debit with the amount of home leave expense.

Normal contra GLACs: 601

624-Other US Benefits

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of employee related expenses that can not properly be recorded in another GLAC. For example, quarters allowances and tuition fees for dependents.

Typical transactions:

Debit with the amount of expense for the accounting period.

Normal contra GLACs: 246.

625-Other Foreign National Benefits

Used for: NAFIs outside of CONUS.

Normal balance: Debit

Purpose: Record the amount of employee related expenses that can not properly be recorded in another GLAC. For example, expense for foreign national employee's recreation and welfare required by the foreign government.
Typical transactions:
Debit with the amount of expense for the accounting period.
Normal contra GLACs: 246.

626-Employer Share of 401K Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the employer share of 401K contributions on behalf of employees.
Typical transactions:
Debit with the amount of expense for the accounting period.
Normal contra GLACs: 101.

627-Employer Share of Thrift Savings Plan Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the employer share of thrift savings plan contributions on behalf of employees.
Typical transactions:
Debit with the amount of expense for the accounting period.
Normal contra GLACs: 101.

Other Operating Expenses

651-Manager's Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of reimbursable expenses incurred by the NAFI manager in the administration of the NAFI. This includes customer relation items and the cost of comparative shopping.
Typical transactions:
Debit with the amount of the expense.
Normal contra GLACs: 101 and 201.

652-Promotion Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of nonreimbursable incurred by the manager in the administration of the NAFI. This includes the cost of free food and beverages to members and the cost of sampling meals for the purpose of testing the quality of the food and service.
Typical transactions:
Debit with the cost of the promotion item.
Normal contra GLACs: 452 only.

653-Customer Rejected Goods Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the cost of meals and beverages rejected by customers before sales are consumated.
Typical transactions:
Debit with the cost of rejected meals and beverages.

Normal contra GLACs: 453 only.

654-Resale Merchandise, Spoilage, Breakage, and Obsolescence Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the cost of food and bar items or other resale merchandise broken or spoiled. This includes inventory obsolescence losses reported to the installation commander.
Typical transactions:
Debit with the amount of losses.
Normal contra GLACs: 454 only.

655-Warehouse/Storeroom Spoilage, Breakage, and Obsolescence Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of broken or spoiled warehouse inventory items recorded in GLACs 141, 151, 155, and 156. This includes inventory obsolescence losses reported to the installation commander.
Typical transactions:
Debit with the cost of the losses.
Normal contra GLACs: 455 only.

656-Inventory Shortage Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the cost of inventory shortages identified in physical inventories. Individual DA Forms 1991 should show all adjustments.
Typical transactions:
Debit with the amount of losses.
Normal contra GLACs: 456 only.

657-Facility Maintenance and Repair Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of repairs and maintenance of facilities. This includes NAFI-owned and non-NAFI-owned facilities. Generally, amounts over \$2,500 will be capitalized.
Typical transactions:
Debit with the cost of repairs and maintenance.
Normal contra GLACs: 201.

658-Equipment Maintenance and Repair Expense
Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of repairs and maintenance of equipment. This includes NAFI-owned and non-NAFI-owned equipment. Generally, amounts over \$2,500 will be capitalized.
Typical transactions:
Debit with the cost of repairs and maintenance.
Normal contra GLACs: 201.

659-Vehicle Maintenance and Repair Expense
Used for: All NAFIs.
Normal balance: Debit

Purpose: Record the cost of maintaining and repairing vehicles owned by the NAFI.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 201.

660-Training Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of training employees.

Typical transactions:

Debit with the cost of the training.

Normal contra GLACs: 201.

661-Bad Debt Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of returned checks and other receivables that can not be collected.

Typical transactions:

Debit with the uncollectible amounts.

Normal contra GLACs: 12X and 134.

662-Discount Loss Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of discounts lost because the payment was not made within the time shown on the vendor invoices.

Typical transactions:

Debit with the amount of discounts lost.

Normal contra GLACs: 201.

663-Bank Service Charge Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of keeping a bank account.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 101.

664-Vehicle Operating Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of normal operating costs of vehicles such as gas.

Typical transactions:

Debit with the amount of vehicle operating expenses.

Normal contra GLACs: 101 and 201.

665-Printing Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of printing and reproduction costs.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 101 and 201.

666-Vehicle License Plate Expense

Used for: USAREUR Vehicle Registration Fund only.

Normal balance: Debit

Purpose: Record the NAFI's cost of license plates bought for the vehicle registration program.

Typical transactions:

Debit with the cost of license plates bought for the vehicle registration program.

Normal contra GLACs: 101 and 201.

667-Vehicle Decal Expense

Used for: USAREUR Vehicle Registration Fund only.

Normal balance: Debit

Purpose: Record the NAFI's cost of decals bought for the vehicle registration program.

Typical transactions:

Debit with the cost of decals bought for the vehicle registration program.

Normal contra GLACs: 101 and 201.

669-Door Prize and Promotion Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of merchandise or other prizes given away, including bingo, which are not normally found in the NAFIs inventory.

Typical transactions:

Debit with the cost of door prize or promotion merchandise.

Normal contra GLACs: 101 and 201.

670-Sports Activities Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost incurred for running sports programs, such as travel and entry fees.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

671-Awards and Trophies Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of cash awards and the cost of trophies and other non-cash awards. This does not apply to employee awards. See GLACs 617 and 618 for employee awards.

Typical transactions:

Debit with the amount of awards and trophies, both cash and non-cash.

Normal contra GLACs: 101 and 201.

672-Sports Officials Expense

Used for: All authorized NAFIs.

Normal balance: Debit

Purpose: Record the amount of officiating expenses incurred by the NAFI to include MSF activities and Army Athletic Association events.

Typical transactions:

Debit with the amount of officiating expenses.

Normal contra GLACs: 101 and 201.

673-Sports Recruiting Expense

Used for: All authorized NAFIs.

Normal balance: Debit

Purpose: Record the cost incurred in recruiting potential scholar-athletes.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

674-Sports Scouting Expense

Used for: All authorized NAFIs.

Normal balance: Debit

Purpose: Record the costs incurred in the scouting of opponents sporting events.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

675-Sports Training Table Expense

Used for: All authorized NAFIs.

Normal balance: Debit

Purpose: Record the cost incurred in feeding scholar-athletes.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

676-Sports Visiting Team Billeting and Meals Expense

Used for: All authorized NAFIs.

Normal balance: Debit

Purpose: Record the cost incurred in feeding and housing visiting teams.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

677-Program and Brochure Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the costs in buying and selling programs and brochures.

Typical transactions:

Debit with cost incurred.

Normal contra GLACs: 101 and 201.

678-Volunteer Service Expense

Used for: All NAFIs.

Normal balance: Debit (Credit for the child care center).

Purpose: Record the NAFI cost to care for the children of authorized volunteers who give their services to command approved MWR programs. The activity or fund receiving the benefit of the volunteers services is charged with compensating the child care program for costs incurred. Credit this account at the child care center. The resulting credit balance in an expense account will not require an explanatory footnote to the financial statements. Crediting the expense rather than an income account prevents overstatement of income and expense.

Typical transactions:

(1) Debit with the amount charged to the NAFI or activity for compensating the child care program.

(2) Credit for the Child Care program with the amount of revenue received.

Normal contra GLACs: 135, 136, 231, and 232.

679-Condolences/Memorials Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the costs for condolences and memorials.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

680-Warehouse Price Variance Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the price adjustments when the amount to be paid to the warehouse for inventory purchases is more than the amount recorded as purchases. Use only for warehouse inventories under stock record control. Not to be used for retail inventories.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

681-Commissions Paid Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the costs incurred by NAFIs under agreement with travel agencies, businesses, or individuals that provide business referrals.

Typical transactions:

Debit with the costs incurred.

Normal contra GLACs: 101 and 201.

682-Civilian Personnel Services Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the NAFI's share of the cost of civilian personnel services.

Typical transactions:

Debit with the NAFI's share of the cost of civilian personnel services.

Normal contra GLACs: 201.

683-Administrative Support Branch Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the NAFI's share of the cost of Administrative Support Branch Services.

Typical transactions:

Debit with the NAFI's share of the cost.

Normal contra GLACs: 231 and 232.

684-Central Procurement Office Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the NAFI's share of central procurement office services.

Typical transactions:

Debit with the NAFI's share of the cost.

Normal contra GLACs: 231 and 232.

685-Central Accounting Office Expense

Used for: All NAFIs that use an off site accounting office.

Normal balance: Debit

Purpose: Record the NAFI's share of the accounting office expenses.

Typical transactions:

Debit with the NAFI's share of the cost.

Normal contra GLACs: 231 and 232.

686-Contract Services Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost for all services performed for the NAFI on contract or agreement.

Typical transactions:

Debit with the cost of all services performed for the NAFI on contract or agreement.

Normal contra GLACs: 201.

688-Common Service Fund Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the NAFI's share of common service expenses.

Typical transactions:

Debit with the NAFI's share of expense.

Normal contra GLACs: 231 and 232.

689-Payroll Service Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the NAFI's share of the payroll service expense. Record at the department code level.

Typical transactions:

Debit with the NAFI's share of expense.

Normal contra GLACs: 231 and 232.

690-Data Processing Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the NAFI's share of ADP expenses.

Typical transactions:

Debit with the NAFI's share of the expense.

Normal contra GLACs: 201.

691-CDS/YA Meals and Snack Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of meals and snacks served by CDS when the cost is a part of the child development program. Do not use to record sales.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 101 and 201.

692-Training Travel Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of travel by NAF civilian employees to attend training.

Typical transactions:

Debit with the amount of travel expense for training.

Normal contra GLACs: 101 and 119.

693-Claims Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of claims paid by the NAFI.

Typical transactions:

Debit with the amount of claims paid by the NAFI.

Normal contra GLACs: 101, 236, and 272.

694-Studies and Analysis Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of contract studies and analysis.

Typical transactions:

Debit with the amount of contract studies and analysis paid by the NAFI.

Normal contra GLACs: 101 and 201.

695-Annuity Expense

Used for: CFSC Only.

Normal balance: Debit

Purpose: Record the amount of annuities paid during the accounting period.

Typical transactions:

Debit with the amount of annuities paid.

Normal contra GLACs: 101 and 201.

696-Grants Expense

Used for: CFSC Only.

Normal balance: Debit

Purpose: Record the amount of grants provided to other NAFIs.

Typical transactions:

Debit with the amount of grants provided.

Normal contra GLACs: 101 and 201.

697-Dividend Expense

Used for: CFSC only.

Normal balance: Debit

Purpose: Record the amount of dividends provided to other NAFIs.

Typical transactions:

Debit with the amount of dividends provided.

Normal contra GLACs: 101 and 206.

698-Vending Machine Income Sharing Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of the NAFI's vending machine profits subject to profit sharing or other sharing requirements.

Typical transactions:

Debit with the amount of vending machine profits payable to state licensing agencies or other outside operations.

Normal contra GLACs: 208.

699-Major Construction Expense

Used for: CFSC Only.

Normal balance: Debit

Purpose: Record the cost of major construction projects.

Typical transactions:

Debit with the cost of major construction projects.

Normal contra GLACs: 201 and 237.

726-Supply Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of supplies bought for immediate use or issued from the warehouse for use.

Typical transactions:

(1) Debit with the amount of supplies bought for immediate use.

(2) Debit with the amount of supplies received from the warehouse.

Normal contra GLACs: 151 and 201.

727-Laundry and Dry Cleaning Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost for the cleaning linens, uniforms, and such.

Typical transactions:

Debit with the amount of expense for laundry and dry cleaning.

Normal contra GLACs: 101 and 201.

728-Ice Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of ice for operations.

Typical transactions:

Debit with the amount of expense for ice.

Normal contra GLACs: 101 and 201.

729-Utilities Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of electricity, gas, water, and other utilities billed to, or paid by the NAFI.

Typical transactions:

Debit with the amount billed to or paid by the NAFI for utilities.

Normal contra GLACs: 101 and 201.

730-Communications Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost for telephone service, tolls, telegraph service, and postage charges including cost of providing toll-free service to in-calling customers.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

731-Freight Expense

Used for: ALL NAFIs.

Normal balance: Debit

Purpose: Record the cost of moving operating supplies and equipment by commercial carriers. Freight expense that can be identified to a specific fixed asset should be included in the cost of the asset and depreciated.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 101 and 201.

732-Operational Travel Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of travel by NAF civilian employees as authorized by AR 215-1.

Typical transactions:

Debit with the amount of travel expense.

Normal contra GLACs: 101 and 119.

733-Insurance Premiums Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of premiums paid for vehicles, aircraft, watercraft, fidelity bonds, and money and security insurance coverage.

Typical transactions:

Debit with the amount of premiums paid.

Normal contra GLACs: 101 and 153.

734-Building and Contents Insurance Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of premiums paid for buildings and contents insurance coverage.

Typical transactions:

Debit with the amount of premiums paid.

Normal contra GLACs: 101 and 153.

735-Advertising Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of monthly calendars and flyers, general advertising, and advertising for special events and sales.

Typical transactions:

Debit with the cost of advertising.

Normal contra GLACs: 101 and 201.

736-Taxes and Licenses Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of taxes on alcoholic beverages and any other tax or licenses required by Federal and State governments.

Typical transactions:

Debit with the amount of taxes paid or billed to the NAFI.

Normal contra GLACs: 101 and 201.

737-Tort Claims Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of tort claims paid by the NAFI per Chapter 12, AR 27-20 and AR 215-1.

Typical transactions:

Debit with the amount of claims paid by the NAFI.

Normal contra GLACs: 101, 236, and 272.

738-Audit Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of audits performed by commercial firms if the NAFI is required to pay.

Typical transactions:

Debit with the cost of commercial audits.

Normal contra GLACs: 256.

739-Cash Shortage And Overage Expense

Used for: All NAFIs.

Normal balance: Debit if shortage, Credit if overage.

Purpose: Record the amount of shortages or overages of cashiers.

Typical transactions:

(1) Debit with the amount of cash shortages.

(2) Credit with the amount of cash overages.

Normal contra GLACs: 101 and 102.

740-Interest Expense-Prompt Payment Act

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of interest penalties paid for late payments.

Typical transactions:

Debit with the amount of the penalty paid.

Normal contra GLACs: 101.

741-Deposits Lost Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of deposits lost on containers due to breakage or loss.

Typical transactions:

Debit with the amount of the penalty paid.

Normal contra GLACs: 101 and 128.

742-Furniture and Equipment Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of furniture, fixtures, and equipment identified as expense items rather than depreciable fixed assets.

Typical transactions:

Debit with the amount of expense items.

Normal contra GLACs: 201.

743-Commercial Credit Card Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount charged by commercial credit card companies for handling member credit card charge sales.

Typical transactions:

Debit with the fees charged by commercial credit card companies.

Normal contra GLACs: 101 and 201.

744-General Entertainment Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of general entertainment activities.

Typical transactions:

Debit with the amount of general entertainment expense.

Normal contra GLACs: 101 and 201.

745-Special Events Entertainment Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of entertainment for special events for which an admission fee may be charged.

Typical transactions:

Debit with the expense of entertaining for special events.

Normal contra GLACs: 101 and 201.

746-Rental Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of renting equipment, buildings, vehicles, and other items.

Typical transactions:

Debit with the amount paid by or billed to the NAFI.

Normal contra GLACs: 101 and 201.

747-Flowers and Decorations Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of china, glassware, silverware, utensils linens, and uniforms bought for immediate use, issued from the warehouse, or transferred from the prepaid GLAC. This GLAC includes the cost of renting.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 101, 155, and 201.

750-Bingo Prize Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of bingo prizes awarded.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 101, 156, and 201.

751-Collection Agency Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of collection agency charges.

Typical transactions:

Debit with the fees charged by collection agencies.

Normal contra GLACs: 101 and 201.

752-Investment Expense

Used for: CFSC Only.

Normal balance: Debit

Purpose: Record the amount of expenses incurred in investing cash by the central investment funds.

Typical transactions:

Debit with the amount of expenses incurred.

Normal contra GLACs: 101, 117, and 201.

753-ARM Distribution Expense

Used for: CFSC only.

Normal balance: Debit

Purpose: Record the amount of slot machine revenues distributed to other NAFIs.

Typical transactions:

Debit with the amount of slot machine revenue distributed to other NAFIs.

Normal contra GLACs: 101 and 234.

754-PCS Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost related to PCS of NAF employees including travel, per diem, movement and storage of household goods, and any other related expenses.

Typical transactions:

Debit with the cost of the PCS expense.

Normal contra GLACs: 101, 119, and 201.

755-Interest Expense

Used for: CFSC only.

Normal balance: Debit

Purpose: Record the amount of interest paid by the fund to scintillations and to vendors.

Typical transactions:

Debit with the amount of interest paid.

Normal contra GLACs: 101 and 201.

756-Consignment Ticket Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of tickets which the NAFI sells on consignment.

Typical transactions:

Debit with cost incurred.

Normal contra GLACs: 101 and 201.

757-Commercial Communications Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost for commercial communication services incurred for customer paid services provided.

Includes electronic mail, fax, etc.

Typical transactions:

Debit with the cost incurred.

Normal contra GLACs: 101 and 201.

758-Billeting Fund Surcharge Expense

Used for: Billeting NAFIs only.

Normal balance: Debit

Purpose: Record the amount of surcharge which is payable to the HQ Army billeting fund NAFI.

Typical transactions:

Debit with cost incurred.

Normal contra GLACs: 238.

759-Cable/Pay TV Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of cable and pay TV services purchased.

Typical transactions:

Debit with cost incurred.

Normal contra CLACs: 201

799-Miscellaneous Operating Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of operating expenses that can not properly be recorded in other operating expense accounts.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: 240 and 260.

Nonoperating Income

801-Interest Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of interest income earned on bank deposits and securities. Only record at fund administration level. Appreciation in the value of bonds not providing for periodic payments of interest will also be credited to this account.

Typical transactions:

(1) Credit with the amount of interest income accrued during the accounting period.

(2) Credit with the amount of interest income received in addition to the amount accrued.

(3) Credit with the amount of appreciation to the value of bonds not providing for periodic payments of interest.

Normal contra GLACs: 101 and 267.

803-Gain On Disposal Of Other Fund-Owned Property

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount received from the sale of NAFI-owned property that was expensed when bought. Record at the location where the property was located. This account is not to be used to record gains from the sale or other disposal of fixed assets.
Typical transactions:
Credit with the amount received from the sale of property.
Normal contra GLACs: 101.

806-Nonoperating Sources of Revenue

Used for: All NAFIs
Normal balance: Credit
Purpose: Record the amount of nonoperating revenue received by the NAFI. The revenue will be recorded under the fund administration location unless the funds are specified for a particular NAFI program. If the funds are designated, the revenue will be recorded in the administration department of the recipient location. An example is a cash distribution from a higher HQ to an installation NAFI.
Typical transactions:
Credit with the amount of the nonoperating revenue.
Normal contra GLACs: 101.

807-Contributions and Donations From Charitable Sources

Used for: All NAFIs
Normal balance: Credit
Purpose: Record the contributions received from the Combined Federal Campaign or other charitable organizations. Record the contribution in the administrative department of the recipient location.
Typical transactions: Credit with the amount of the contribution.
Normal contra GLACs: 101.

808-NAF To APF Conversion Income

Used for: All NAFIs
Normal balance: Credit
Purpose: Record the amount of accrued leave removed from the NAFI books when a NAF employee moves to the APF payroll and the NAFI is not required to transfer funds to the APF books for the accrued leave.
Typical transactions:
Credit with the amount of the accrued leave.
Normal contra GLACs: 243.

825-Miscellaneous Other Nonoperating Income

Used for: All NAFIs.
Normal balance: Credit
Purpose: Record the amount of income that can not properly be recorded in another income GLAC. Only record at fund administration. Some examples are unclaimed wages held for 6 months, and amounts of checks that have not cleared the bank within 6 months after issue, or on which stop payment orders have been made.
Typical transactions:
Credit with the amount of the income.
Normal contra GLACs: 101.

Nonoperating Expenses**826-Interest Expense**

Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of interest expense incurred. Only record at fund administration level.
Typical transactions:
(1) Debit with the interest expense accrued for the accounting period.
(2) Debit with the amount of interest paid in addition to the amount accrued.
Normal contra GLACs: 101 and 241.

827-Loss or Gain on Disposal of Fixed Assets

Used for: All NAFIs.
Normal balance: Debit if loss, Credit if gain.
Purpose: Record the amount of loss or gain on the sale or other disposal of fixed assets. Record in location where asset was used.
Typical transactions:
(1) Debit with the amount of the asset's current book value in excess of the amount received.
(2) Credit with the amount of cash received in excess of the assets current book value.
Normal contra GLACs: Fixed Asset GLACs.

828-Loss or Gain on Foreign Currency Transactions

Used for: All NAFIs.
Normal balance: Debit if loss, Credit if gain.
Purpose: Record the amount of losses or gains resulting from differences between foreign currency units and the equivalent US dollar. Only record at fund administration level.
Typical transactions:
(1) Debit with the amount of the loss.
(2) Credit with the amount of the gain.
Normal contra GLACs: 102.

830-Isolated Unit Dividend Expense

Used for: CFSC only.
Normal balance: Debit
Purpose: Record the amount of dividends paid to isolated units that keep their own accounting records.
Typical transactions:
Debit with the amount of cash paid to the unit.
Normal contra GLACs: 101.

831-Reserve Component Dividend Expense

Used for: All NAFIs.
Normal balance: Debit
Purpose: Record the amount of dividends reserved for or paid to reserve components.
Typical transactions:
(1) Debit for Major Commands with the amount of reserve component dividends reported by each NAFI.
(2) Debit for Major Commands with the amount of dividends paid directly to reserve component units.
(3) Debit for NAFIs with the amount of dividends paid to reserve component units.
(4) Debit for NAFIs with the amount of dividends due to non-troop program reserve component units.
(5) Credit with the amount of adjustments as applicable.

Normal contra GLACs: 101 and 206.

832-Loss on Close of Business Locations

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record all costs associated with closing down a business, such as losses on disposal of buildings, improvements, and furniture, fixtures, and equipment. Record at the location that applies to the facility or business activity being closed. Also applies to base closure. Typical transactions:

Debit with the amount of book value of assets written off as a result of closing down a segment of the NAFI's business.

Normal contra GLACs: Fixed assets and various other asset GLACs.

833-APF to NAF Conversion Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the cost of the accrued leave which must be established on the NAFIs books when an employee transfers from APF to NAF and the NAFI must fund the employees transferred accrued leave.

Typical transactions:

Debit with the amount established as accrued leave for the employee.

Normal contra GLACs: 243.

850-Miscellaneous Other Nonoperating Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of nonoperating expense that can not properly be recorded in other expense GLACs. Record at fund administration level.

Typical transactions:

Debit with the amount of expense.

Normal contra GLACs: 201 and 260.

Depreciation and Amortization

851-Building Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expense for buildings financed by the NAFI.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 162.

852-Building Improvements Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expenses for building improvements that have been capitalized.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 170.

853-Furniture, Fixtures, and Equipment Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expense for furniture, fixtures, and equipment capitalized by the fund.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 164.

854-Vehicles, Aircraft, and Boats Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expense on vehicles, aircraft, and boats capitalized by the NAFI.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 176.

855-Land Improvements Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expenses for land improvements that have been capitalized.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 172.

856-Breeding Livestock Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expense on breeding livestock.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 168.

857-Other Government Titled Fixed Assets Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expense on fixed assets bought by the NAFI and then moved to the Government.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 178.

858-Government Titled Buildings and Improvements Depreciation Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: Record the amount of depreciation expense on buildings and improvements paid for by the NAFI and then turned over to the Government.

Typical transactions:

Debit with the amount of depreciation expense for the accounting period.

Normal contra GLACs: 176.

Extraordinary Items

891-Extraordinary Expense

Used for: All NAFIs.

Normal balance: Debit

Purpose: THIS ACCOUNT IS USED VERY SELDOM.

Record the amount of the expense incurred for unusual and infrequent items. Losses must meet the following criteria to be considered extraordinary: material in nature, of a character significantly different from typical NAFI activities, and NOT EXPECTED TO EVER OCCUR AGAIN.

Typical transactions:

Debit with the amount of the expense.

Normal contra GLACs: Use as applicable.

892-Extraordinary Income

Used for: All NAFIs.

Normal balance: Credit

Purpose: THIS ACCOUNT IS USED VERY SELDOM.

Record the amount of income received from unusual and infrequent items. Gains must meet the following criteria to be considered extraordinary: material in nature, of a character significantly different from typical NAFI activities, and NOT EXPECTED TO EVER OCCUR AGAIN.

Typical transactions:

Credit with the amount of income.

Normal contra GLACs: Use as applicable.

Income and Expense Summary

900-Income and Expense Summary

Used for: All NAFIs.

Normal balance: Credit

Purpose: Record the amount of expenses and income in order to compute the amount of net income or net loss for the accounting period. Amounts recorded in several accounts will be recorded as contra entries to this account. At the end of each period, this account is closed into fund equity.

Typical transactions:

(1) Debit with the amount of expenses at the end of each accounting period.

(2) Credit with the amount of income at the end of each accounting period.

(3) Credit with the amounts recorded in inventory GLACs.

Normal contra GLACs: Various and 292.

APPENDIX B**ACCOUNTING PROCEDURES FOR AIR FORCE NONAPPROPRIATED FUNDS**

This appendix of the DoD Financial Management Regulation is for use by all nonappropriated fund accounting offices which use systems developed by the Department of the Air Force. The appendix contains policies and procedures specific to those systems. General or non-system-specific policies and procedures are included in the core regulation and have been excluded from this appendix. For example, the requirement that nonappropriated fund instrumentalities (NAFIs) conform to generally accepted accounting principles is not system-specific and applies to all DoD NAFIs. Therefore, it is included in the core regulation and excluded from this appendix.

This appendix supersedes all previously published policies and procedures, in the event of conflicting instructions, the policies and procedures in the regulation itself should be followed.

CHAPTER 1

PRINCIPLES, STANDARDS, AND REQUIREMENTS

B0101 Accounting Entity. The NAF Accounting Office (NAF AO) summarizes financial accounting results in terms of the entities that conduct the operation.

A. NAFI. Consider each NAFI (established according to AFI 34-201, Use of Funds) a separate entity for accounting purposes. Maintain asset, liability, and equity accounts at the NAFI-level. Use subsidiary records to reflect the location within the NAFI where the assets are used.

B. NAFI Subdivisions. NAFIs consist of one or more subdivisions called cost centers. Do not confuse the accounting term "cost center" with the operational term "activity." Group financial transactions relating to one operational activity (e.g., an NCO club) into one or more cost centers (e.g., bar, restaurant, snack bar, etc.). See AFMAN 34-214 for standard cost center codes and descriptions. These codes are used for accounting purposes only. They do not imply any organizational or operational relationship. Changes or additions to these codes must be approved by AFSVA/SVF. Use an optional third digit to provide further subdivisions (if needed).

B0102 Document Flow and Control. The activity manager sends all accounting documents to the NAF AO the next workday after the transaction date. Off-base sites submit accounting documents to the servicing NAF AO using a prearranged schedule.

B0103 General Ledger. The NAF AO maintains a separate general ledger for each NAFI. Air Force NAFs use a uniform general ledger chart of accounts to summarize NAFI business transactions.

A. General Ledger Account Codes (GLAC). AFSVA/SVF develops and assigns standard three-digit GLACs to identify general ledger and balance sheet accounts.

Changes or additions to these codes must be approved by AFSVA/SVF. The NAF AO uses an optional fourth digit to provide increased detail data within the guidelines of each GLAC description. See AFMAN 34-214 for GLACs and descriptions.

B. Authorized Changes. Changes to requests to combine history balances of individual accounts must be approved by AFSVA/SVF.

C. General Ledger Maintenance. The NAF AO maintains the general ledgers and prepares the financial statements. They post transactions to the general ledger each workday. Before publishing financial statements, the NAF AO:

1. Includes information from other systems, such as Point of Sales (POS) systems, into the NAF accounting system.
2. Prepares adjusting and closing entries.
3. Updates financial records.
4. Reconciles subsidiary records to general ledger control accounts.

D. Final Processing. The RMFC designates a central control point to compile all data for final processing. Before publishing the financial statements, the RMFC ensures that the NAF AO accomplishes the items listed in paragraph B0103.C.

E. Subsidiary Records. The NAF AO keeps subsidiary records on balance sheet accounts. Reconcile the balances in these subsidiaries to the general ledger control accounts before preparing the financial statement. Automate the subsidiary records where possible. If the subsidiary records are not in balance to the general ledger control accounts,

the RMFC annotates the financial statement before releasing to external users.

B0104 Nonappropriated Fund Standard Accounting Management System (NAFSAMS). AFSVA maintains the standard Air Force accounting system. They provide centralized software development, maintenance, and support. AFSVA releases software updates and is the single organization authorized to change Air Force standard software.

B0105 Interim Financial Statements. The NAF AO prepares reports monthly and provides the information to SV management. SV management uses the interim financial statement to assess each operation's current performance. SV management uses the interim financial statements to plan for the future.

A. Adjusting Entries. The NAF AO posts required adjusting entries before completing interim reports. Refer to AFMAN 34-214. Establish and use a checklist for all required adjusting entries and automated processing. Document and explain adjustments to the general ledger on AF Form 2541, NAF Journal Voucher. Number and control journal vouchers (JV) by NAFI. Enter the JV number on the transaction to provide an adequate audit trail. The RMFC or designee (e.g., office manager) approves AF Forms 2541. Before approving, ensure that the NAF AO correctly prepared the entries and that explanations or backup documents have sufficient detail.

B. Finalizing the Financial Statement. After the NAF AO posts all transactions to the G/L for the current accounting period, the NAF AO:

1. Prepares a preliminary trial balance.
2. Reconciles all subsidiary records.
3. Makes any necessary adjustments.
4. Prepares the final interim trial balance before the final closeout.

5. Maintains the original trial balance.

6. Provides each manager and the Nonappropriated Fund Financial Analyst (NAFFA) with a copy (or a copy of the interim financial statement).

C. Financial Statements. The NAF AO prepares a final financial statement for each NAFI at the end of each accounting period after they have produced and reconciled the trial balance.

B0106 Fund Equity. The RMFC limits transactions into and out of equity to:

- A. Net income.
- B. Net losses.
- C. Approved prior year adjustments.
- D. Entries associated with the establishment, disestablishment, distribution, or redistribution of capital (see AFMAN 34-214).

B0107 Fund Equity Adjustments. DFAS approves request to make adjustments to fund equity. The RMFC submits requests for prior year fund equity adjustments through the MAJCOM, AFSVA/SVF, and AF/SVF to DFAS. The NAF AO records the transaction only after DFAS grants approval. Footnote the financial statement with the adjustment. Refer to AFMAN 34-214 for additional details.

B0108 Reserving Fund Equity. The NAF AO establishes the following Reserved Equity accounts for each NAFI:

A. Reserved Equity-Current Purchases. At the end of each accounting period, adjust this account to reflect the total value of all outstanding orders which have not yet been received. Include outstanding orders from all obligation documents, such as outstanding purchase orders, blanket purchase agreement (BPA) orders, and purchase requests for goods and services, including fixed assets on order.

B. Reserved Equity-Capital Requirements. During the month of September for each fiscal year, close the current dollar amount in the reserved equity to Fund Equity-Prior Year and set up the dollar amount for the next fiscal year. As of 30 September this account should reflect one fiscal year of proposed capital requirements (for example 30 September 1993 would reflect a balance for FY 94). At any other time during the year, the balance reflects the amounts approved but not yet obligated for the current FY. The NAF AO posts a change to this account when:

1. The NRB changes (part I that deals with capital assets).

2. An activity orders a capital item.

3. The fiscal year closes.

a. At the close of the fiscal year, the NAF AO reduces the current balance to zero and establishes the amount for the next fiscal year based on Part I of the NRB.

(1) Base- level NAFIs record only that portion of their NRB that the base will fund.

(2) MAJCOMs record the dollar value of approved grants for NRB items which have not yet been paid. The MAJCOMs adjust these amounts as they transfer portions of these grants to base level.

C. Reserved Equity-Quantity (Bulk) Expendable Equipment. During the month of September for each fiscal year (FY), close the current dollar amount in this reserve equity account to Fund Equity - Prior Year and set up the dollar amount for the next fiscal year. As of 30 September, this account should reflect one year of proposed quantity purchases of expendable items (part II of the NRB) (for example 30 September 93 would reflect a balance for FY 94). At any other time during the year, the balance reflects the amounts approved but not yet obligated for the current FY. The NAF AO posts a change to this account when:

1. The NRB changes (part II that deals with bulk purchases).

2. An activity orders a capital item.

3. The fiscal year closes. Follow the guidance in paragraph B0108.B.

B0109 Income. Record income when earned. Record to the benefitting cost center, if practical and identifiable. Income collected before the accounting period in which it is earned is recorded as a liability. Transfer the liability to income in the period in which it is earned.

B0110 Expenses. Record expenses when incurred. Record expenses to the cost center incurring the expense, if practical and identifiable.

A. Certain expenses, such as general advertising, depreciation on equipment for general purpose use, and accounting support service charge, are "overhead" expenses. The NAF AO posts these expenses to fund administration as defined in the cost center codes for A1-A9. Do not prorate those overhead expenses to other activities (except CCC A9 and certain marketing expenses as defined in CCC A5). Do not record identifiable activity operating expenses into the NAFI's fund administration cost center.

B. Transfer merchandise, supplies, or services between activities at cost.

B0111 Grants. The NAF AO posts grants according to AFMAN 34-214.

B0112 Extraordinary Items. DFAS must give advance approval to record any transaction as an extraordinary gain or loss. The RMFC submits requests through the MAJCOM, AFSVA/SVF, and AF/SVF. The NAF AO does not post the transaction until DFAS gives written approval. Attach a footnote to the financial statements to explain the cause of the transaction and the effect it has on current operations.

B0113 Contingencies. Contingencies are

existing conditions, situations, or circumstances involving uncertainty as to possible gain or loss. The NAFI ultimately resolves contingencies when one or more future events occur or fail to occur. The RMFC works with SV management to determine the amount of the loss contingency. The NAF AO post accruals for loss contingencies where the outcome is probable and the amount is reasonably estimable. Do not record gain contingencies. When SV management identifies a contingency, the NAF AO footnotes the financial statements explaining the contingency and the potential for gain or loss.

B0114 Assessments. The NAF AO posts Air Force assessments to the activity being assessed.

B0115 Command Lodging Fund (CLF) Procedures. The NAF AO posts transfers of cash from the CLFs to base lodging funds and vice versa as transferred equity.

B0116 Morale, Welfare, and Recreation Fund Transfers. The NAF AO posts base or MAJCOM available cash transfers as transferred equity. When Air Force returns cash to the base or MAJCOM, each level records it as transferred equity.

B0117 Accounting in Small NAFIs. The NAF AO maintains NAF accounting records on the accrual basis of accounting, except as shown below.

A. The IUF maintains accounting records on a cash basis if total revenue is less than \$36,500 per year, and authorization is received from MAJCOMs.

B. Small NAFIs that lack local accounting support, or those with limited programs such as MAJCOM or remote site NAFIs, may not need all of the detailed accounting records and procedures required by larger NAFIs.

C. Small NAFIs may use the cash receipts journal, check register, and adjusting, closing, and reversing journals, and other general purpose journals as required to support their financial statements.

B0118 Major Command (MAJCOM) Supplements.

A. MAJCOMs may supplement this instruction. AFSVA/SVF through DFAS approves drafts of command supplements to this instruction before publication. The MAJCOMs furnish a copy of the final publication to HQ AFSVA/SVF.

B. BRFs or CWFs. Coordinate command supplements involving BRFs or CWFs with the BOD AAFCWF before submitting to AFSVA/SVF. Send one copy of each approved command supplement involving BRF or CWF to the BOD AAFCWF.

B0119 Requests for Technical Assistance or Waiver. Submit requests for clarification or interpretation of this instruction through the MAJCOM/SVF or field operating agency (FOA), HQ AFSVA/SVF to DFAS. Submit each request for waiver, except those waivers authorized and granted locally according to AFI 34-201, through the MAJCOM/SVF or FOA to HQ AFSVA/SVF. Waivers granted according to AFI 34-201 must be approved by the installation commander through the custodian, SV commander or director, as applicable. MAJCOMs submit their requests for waiver concerning BRFs and CWFs to HQ AFSVA/SVF through the BOD AAFCWF, 21 Army Pentagon, Washington DC 20310-0021. In the request for waiver, outline the problem, identify the specific requirement to be waived, recommend an alternative, and furnish complete justification. Waivers to this AFI have no effect without a control number assigned by the approving authority.

A. Review waivers, at least annually or when conditions and circumstances change.

B. Waivers are valid for a period not to exceed 3 years. At the end of the 3-year period, reevaluate waivers through the custodian, SV commander or director, MAJCOM, FOA, or HQ AFSVA/SVF, as appropriate.

C. All waivers in effect before the date of this AFI are void and must be reaccomplished.

B0120. Forms. AFSVA/SVF approves request for changes to Air Force forms. SV may automate the AF and NAF forms if form content and requirement do not change.

CHAPTER 2

EXEMPT NAFIS

B0201 USAF Academy (USAF) Athletic Association (USAFAAA). The USAFA Director of Services (HQ USAFA/SV) establishes and maintains the standard NAF accounting system according to Air Force directives. The USAFAA follows standard Air Force NAF accounting instructions to ensure consistency with generally accepted accounting principles and standards.

A. Fiscal Year (FY). The USAFAAA's FY is from 1 July through 30 June.

B. Reporting Requirements. The USAFAAA is exempt from reporting requirements specified in chapter 10 of this regulation.

C. Annual SVF Financial Report. The USAFAAA provides financial data to AFSVA/SVQ. AFSVA/SVQ includes the information in the annual MWR Financial Report, RCS: DD-M(A)1344.

B0202 USAFA Cadet Dining Hall NAFI.

A. Authority. This NAFI is established under the authority of DOD Instruction (DODI) 1338.17.

B. The NAF AO uses AFI 34-209, AFMAN 34-214, and AFMAN 34-215 to account for the cadet dining halls. When these directives conflict with DODI 1338.17, the requirements in DODI 1338.17 take precedence.

C. The fund is exempt from reporting requirements specified in chapter 10 of this appendix.

D. Reporting requirements.

1. The NAF AO uses report formats and preparation instructions found in DODI 1338.17 attachments. Prepare the report in three parts.

2. Reporting requirements

are assigned RCS: DD-COMP(A)1291.

E. The commandant of cadets, or designee, coordinates this report with the USAFA Director of Financial Management and Comptroller and the USAFA Director of Services. The commandant of cadets sends the coordinated report to the Assistant Secretary of Defense (Comptroller), ATTN: Directorate of Military Personnel. Send this report not later than 90 days after the end of the FY.

CHAPTER 3

PROPERTY

B0301 Property. The NAF AO maintains accounting records and updates the subsidiary account for NAF property transactions. This includes:

- (1) Maintaining property records on all fixed assets;
- (2) Process payments to vendors; (3) Preparing asset lists for inventory purposes.

A. Non-reimbursable, Inter and Intra NAFI Transfers. Any activity that transfers property completes AF Form 2534, NAF Property Disposal/ Transfer Receipt. Authorized approval required by AFI 34-201 is adequate supporting documentation. The NAF AO receives the AF Form 2534 and posts the transaction according to AFMAN 34-214.

B0302 Defense Reutilization and Marketing Office (DRMO) Property. The NAF AO capitalizes acquisition costs of \$1,000 or more for DRMO property. The property must have a useful life of two or more years. See AFMAN 34-214 for detailed procedures.

B0303 Leases. The NAF AO posts leases as either capital leases or operating leases. Use the criteria in AFMAN 34-214 to decide if leases are capital or operating. Amortize capital leases over the life of the assets. Post other leases as operating leases. Post rental expense when payment is made. See AFMAN 34-214 for detailed procedures.

B0304 Repair of Fixed Assets. The NAF AO capitalizes repair of a fixed asset when the repair costs \$1,000 or more. The repair must extend the useful life of the asset 2 years or more. If the repair does not qualify, post the cost as an expense. See AFMAN 34-214.

A. Equipment. Use the same property number with an alpha code A, B, C, etc., for the number of repairs. When the activity disposes of the property, the NAF AO

writes off the related repairs.

B. Renovations. The NAF AO writes off the undepreciated value of previous renovations when new renovations completely change the previous one. Write off related renovations when an activity disposes of a facility.

B0305 Depreciation. The activity manager assigns the projected life for a fixed asset based on the depreciation tables in AFMAN 34-214. The RMFC helps the activity manager to determine the projected life. The RMFC and the civil engineers establish facility depreciation periods according to the depreciation table in AFMAN 34-214.

A. See AFMAN 34-214 for procedures on computing depreciation. The NAF AO posts depreciation expense to the cost center where the property is actually used. Do not charge depreciation expense to an administrative cost center code except when either situation applies:

1. The operation's business office physically uses the property.
2. More than one cost center uses the property. An example is a general purpose vehicle used by several cost centers in a club.

B. The applicable activity manager determines whether or not fixed assets have a salvage value. The RMFC, DRMO, and the SCO help to determine the salvage value. The NAF AO uses these values to determine the depreciable value.

C. The NAF AO continues to post depreciation expense for NAF capital assets transferred to APF records until the items are fully depreciated. Post the depreciation expense in the transferring activity's cost center.

B0306 Master Property Record Changes. The activity manager prepares an AF Form 2534 to physically move property items between cost centers or to dispose of property by any method. Forward the completed form to the NAF AO. The NAF AO processes the transfer in the accounting records.

B0307 Trade-In of Assets. The NAF AO posts the disposition of the old asset using the normal process. Post the newly-acquired asset at its full cost (before trade-in). When the trade-in value does not equal book value for the disposed asset, post the gain or loss in the disposed asset account.

B0308 Disposition of Assets. The NAF AO posts disposals of assets in the accounting system. Post any gain or loss resulting from the disposal on the financial statement. Use this procedure for all assets including those acquired by transfer or donation. See AFMAN 34-214 for detailed procedures.

B0309 Acquisition of Expendable Items. Expendable items do not meet fixed asset requirements. See AFMAN 34-214 for detailed procedures on acquisition of expendable items.

B0310 Government Surplus Aircraft. The NAF AO capitalizes initial repair costs to make government surplus aircraft air worthy. The repair must cost \$1000 or more. It must have a useful life of two years or more. If it does not meet this criteria, post the repair cost as an expense.

B0311 Government Surplus Aircraft Engines. The NAF AO depreciates an aircraft engine only when the old unit is removed from the aircraft and replaced by a rebuilt or new engine. Depreciate the replacement engine only until the first overhaul is due or for a maximum useful life of three years.

B0312 Claims. AFSVA settles claims for insured assets that are destroyed or damaged. Once AFSVA settles the claim, the NAF AO adjusts the affected accounts. Usually claim settlements do not exceed the acquisition value less accumulated depreciation of the property destroyed (book value).

B0313 BRF/CWF. For acquisitions or disposal of assets belonging to a Base Restaurant Fund or Base Civilian Welfare Fund, see AFJI 34-122.

CHAPTER 4

REVENUE TRANSACTIONS

B0401 Revenue Processing. Activities use AF Form 1875, NAF Individual Cashier's Report (ICR), to provide accountability for individual cashiers. Activities use AF Form 1876, NAF Consolidated Cost Center Report (CCCR), or the daily cash reconciliation report (for lodging operations) to report deposits and consolidated income to the NAF AO. Activity managers control ICRs and CCCRs according to AFI 34-202, Protection of Assets. The NAF AO subsequently uses the AF Form 1876 to enter information into the financial records. AFMAN 34-214 contains detailed accounting procedures.

B0402 Service Charge Procedures for Lodging Funds. When TLFs charge several different rates, the NAF AO uses fourth-digit shredouts of the appropriate revenue GLAC to account for each rate within the TLF cost center.

B0403 Monte Carlo Night. The NAF AO accounts for Monte Carlo as a resale operation.

B0404 Quality Recycling Program (QRP). The NAF AO posts income and expenses to the QRP cost center. AFMAN 34-214 contains detailed accounting procedures.

B0405 Interest. AFSVA/SVF determines the interest rate paid on all cash within the CMIP and the amount of any end-of-year dividend. The NAF AO posts interest income in the applicable NAFI's administrative cost center code.

B0406 AAFES Simplified Dividend. The NAF AO does not accrue for distributions as they are made on a current basis. AFMAN 34-214 contains detailed accounting procedures.

B0407 Operating Subsidies. The NAF AO posts subsidies from foreign governments as nonoperating income in the applicable cost center. Post the associated expense to the applicable cost center.

B0408 Foreign Currency. NAF activities involved in accommodation exchange services buy foreign currency for resale at the wholesale rate established by the contracted military banking facilities (MBF) overseas. AFMAN 34-214 explains the computation.

B0409 Commercial Sponsorship Program. The NAF AO posts the sponsorship in the activity identified by the vendor. Use the administrative CCC of that activity if appropriate. If the vendor does not specify an activity, record the sponsorship in the NAFI's administrative CCC.

B0410 Randolph Sheppard Act-Vending Facility Program for the Blind. The NAF AO posts the NAFI's proceeds from vending machines as revenue in the applicable cost center. Show the payment to agencies for the blind as expenses in those cost centers. Use applicable GLACs to record these expenses.

B0411 Slot Machine. The NAF AO posts slot machine income and expenses in the activity having the slot machines. Use cost center codes A9, G5, W5, X5, Y5 and Z5 to record transactions involving slot machine revenue and expenses. See the guidelines in AFMAN 34-214.

CHAPTER 5

ACCOUNTS RECEIVABLE

B0501 Internal Accounts Receivable (A/R) Processing. The NAF AO maintains A/R subsidiaries except for lodging funds. The NCR 9300 User's Manual contains instructions for processing A/R. AFMAN 34-214 contains other A/R procedures. If problems arise in balancing the general ledger control accounts to subsidiary records, the RMFC or designee assists in reconciliation. If the NAF AO identifies variances but cannot correct them prior to publishing financial statements, the NAF AO footnotes the financial statements.

B0502 A/R Function Located Outside the NAF AO. AFSVA/SVF approves requests to locate the A/R function outside the NAF AO. The RMFC prepares an A/R operating instruction (OI) for each approved operation. Include instructions to ensure:

A. The operating location reconciles the subsidiary record to the control account, as a minimum, before preparing the financial statement.

B. The operating location prepares a proper aging of accounts receivable.

B0503 A/R Operating Instruction. The RMFC develops an OI to provide guidance on monitoring A/R. Include guidance on:

A. Follow-up actions.

B. Account write-offs.

C. Procedures to prevent fraud by collusion (more than one person working together to cause the fraud).

B0504 Billing Cutoff Date. Activity managers and the RMFC attempt to establish a billing cutoff date other than the end of the month. Do not make the cutoff date earlier than

the 16th of the month. Ensure this date coincides for all clubs serviced by the NAF AO. The NAF AO posts dues for the current month, regardless of cutoff date, as of the 15th of the month (after posting all daily business for the 15th). Customers may pay dues and fees in advance. See AFMAN 34-214 for details.

B0505 Minimum or Maximum Purchase Requirement for Extension of Internal Credit. The SV commander or director approves minimum or maximum amounts that a customer may charge on internal credit.

B0506 Scope of Credit. Members of clubs may use their membership cards in any MWR fund activity. See AFMAN 34-214 for detailed A/R procedures.

B0507 Organizational Credit. The SV commander or director may authorize official organizations to purchase through an open charge account from NAFIs. The NAF AO keeps written authorization (includes project officer's name and number) on file.

B0508 Late Payment Charge. The MAJCOM/SV may authorize a late payment charge on member accounts. Do not authorize more than \$20 for any one delinquent cycle (60 and 90 days). The NAF AO posts late payment charges as non-operating revenue to the NAF AO cost center to offset costs of collecting delinquent accounts. Do not charge more than \$40 for the entire delinquency period. See AFMAN 34-214.

B0509 Reversal of Dues Incorrectly Charged. The NAF AO prepares the list with back-up documentation to request dues adjustments. If the NAF AO does not maintain the A/R subsidiary records, the activity manager of the operating location submits the list and back-up documentation to the RMFC. The RMFC approves any dues adjustments. Once approved,

the NAF AO processes the adjustment. See paragraph B0511 for procedures to write-off valid uncollectible accounts.

B0510 Collection Actions. The NAF AO performs collection actions except where waived. This does not prevent activity managers from helping the NAF AO collect delinquent A/R.

A. The NAF AO:

1. Processes collection actions according to AFI 34-202.

2. Maintains, controls and reports delinquent accounts and returned checks on AF Form 1708, NAF Dishonored Check Control Log.

3. Documents follow-up actions.

B. The NAF AO does not delay the minimum followup actions required in AFMAN 34-214. The installation commander approves requests to shorten the time-frame in AFMAN 34-214.

B0511 Bad Debt Write Off Procedures. If the followup procedures prescribed in paragraph B0510 and AFMAN 34-214 are not successful, the RMFC begins write-off procedures as stated in AFI 34-202. The NAF AO posts the bad debt write-off to the applicable activity's administrative cost center.

B0512 Commercial Debt Collection Contracts. RMFCs use the Air Force Nonappropriated Fund Purchasing Office (AFNAFPO) procured commercial debt collection contract to collect past due accounts, returned checks, and other debts owed to Air Force NAFIs. Use the contract for individuals where payment cannot be recover through DD Forms 139, Military Pay Order, or APF/NAF payroll systems. See AFI 34-202. When an account is sent to the collection agency, the NAF AO writes it off the financial statements. Use the applicable cost center to record the bad debt write off.

B0513 Reinstatement of Membership

Privileges. The SV commander or director approves requests for reinstatement of membership privileges (see AFMAN 34-214).

B0514 A/R Aging and Reporting. The NAF AO prepares and reports aged A/R for all NAFIs and activities authorized internal credit systems. When a location outside the NAF AO maintains the A/R subsidiary records, the activity manager furnishes an aged A/R report to the NAF AO.

B0515 Dues Cutoff for Delinquent Accounts. The NAF AO does not post membership dues to a member's account after 3 months dues have been posted and remain unpaid. The NAF AO can only charge up to three months' unpaid dues in the following instances:

A. A member has an MPO pending.

B. A member turns in his or her club card.

C. A member leaves the base without clearing the club.

B0516 Allowance for Uncollectible A/R. The NAF AO posts bad debt expense at the end of each accounting period. Post the estimated value of uncollectible A/R. Use the applicable activity's administrative cost center. Record this same amount in an allowance for uncollectible A/R account. Base the estimate on the average write-offs of A/R using historical data.

A. Do not establish an allowance for uncollectibles that exceeds 1 percent of the A/R for the current period. If the estimate of average write-offs is greater than 1 percent, review collection procedures to ensure they are sufficient and timely.

B. The NAF AO reduces the allowance for uncollectibles account when an actual account is written-off. If the write-off reduces the allowance for A/R account to zero, expense any remaining amount in the current accounting period.

B0517 Allowance for Uncollectible Returned Checks. If the amount of write-offs is not significant, the NAF AO may post the expense at the time of write-off. If history indicates significant amounts written-off, establish an accrual according to paragraph 7.18.

B0518 Accounts with Credit Balances. The NAF AO reviews accounts with credit balances at the end of each accounting period. If the credit balances exceed five percent of total A/R due, the NAF AO posts this amount in an unearned income liability account. Reverse the entry the following month. If the credit balances are less than five percent of the receivables, net them in the A/R asset account.

B0519 Lodging A/R.

A. Lodging personnel send statements to TDY personnel on the last day of the month for:

1. Visiting officers' quarters (VOQ).

2. Visiting airmen quarters (VAQ).

3. Temporary lodging facilities (TLF).

B. Send statements only if patrons used the quarters for 15 days or more and the anticipated stay during the succeeding month exceeds 15 days (see AFMAN 34-214).

C. Collection actions required in AFI 34-202 remain the RMFC's responsibility. Use the time-frame in AFMAN 34-214 to complete follow-up actions. The Innkeeper processes collection actions on accounts that are 30 and 60 days delinquent. The RMFC ensures that the Innkeeper is performing collection actions in a timely manner. Once accounts become 90 days delinquent, the RMFC assumes responsibility for additional collection actions.

B0520 Returned Checks. For policy, follow-up, and collection procedures on returned checks, see AFI 34-202.

CHAPTER 6

PURCHASE AND CONTROL OF MERCHANDISE

B0601 Partial Shipments. The activity documents receipt of partial shipments on a DD Form 250, Material Inspection and Receiving Report. The activity completes the form and writes "Partial Shipment" across the top of the form. Annotate the form with the original purchase order (PO) number. Complete the partial receiving report with the item number, quantity received, and description of items received. Annotate the original PO to show items received in a partial shipment, the date received, and the date the partial receiving report was forwarded to the NAF AO.

B0602 Value Added Tax (VAT). Under United States and Federal Republic of Germany (FRG) agreement, authorized personnel may obtain exclusion from the German VAT if they make their purchases through an official US government contracting activity at USAF Europe (USAFE) installations. VAT offices are part of the MWR Fund. For currency conversion on VAT transactions, the NAF AO reimburses the Military Banking Facility (MBF) the difference between the bulk rate and the wholesale rate for its monthly VAT Deutsche Mark (DM) transactions. For procedures governing operation of VAT offices see USAFE AFR 176-1.

B0603 Stock Records. The NAF AO uses the NAFSAMS inventory system to maintain automated stock records to track inventory or highly sensitive items. Activities may use other automated systems to track in-house inventories.

A. The applicable activity manager maintains stock record cards on all transactions involving firearms. Report any discrepancies immediately to the RMFC.

B. When using stock record cards, limit access to the cards. Secure records during nonduty hours.

B0604 Stock Levels and Reorder Points. The activity manager and RMFC establish stock levels and reorder points. The NAF AO may include reorder points in the inventory subsidiary.

B0605 Stock Numbers and Standard Units of Measure. The NAF AO, with the assistance of the activity manager, assigns stock numbers and standard units of measure to control inventories on all resale, storeroom merchandise and supply items. Use consistent numbers throughout all NAFIs. The activity annotates the stock numbers on AF Form 2533, NAF Transfer Between Cost Centers, or uses order entry forms when transferring merchandise for resale or promotion. See the NCR 9300 User's Guide for the list of standard units of measure and their abbreviations used when processing inventory. Refer to AFMAN 34-214 for additional details.

B0606 AF Form 2533, NAF Transfer Between Cost Centers (TBCC). The activity manager or designee uses AF Form 2533 or an order entry form to transfer goods or stock between cost centers. The activity manager or designee may consolidate work orders to one TBCC (See AFMAN 34-214).

B0607 AF Form 1735, NAF Interfund Purchase Order (IPO). The activity manager or designee uses an AF Form 1735 or order entry form to order services or merchandise from other NAFIs. The ordering activity manager processes and numbers IPOs or order entry registers. The RMFC signs the IPO unless purchase authority was delegated to the ordering activity manager. The NAF AO processes the payment between the applicable NAFIs, using AF Form 1804, NAF Interfund Dollar Transfer. Process the payment not later than the following month (See AFMAN 34-214).

B0608 Spoilage, Breakage, and Out-Dated Material. The activity manager determines the amount of spoilage or breakage by incident, not by individual line item. The NAF AO posts reported losses in the month of occurrence. AFMAN 34-214 contains accounting procedures.

B0609 Commodities. The activity manager controls commodities received through the United States Department of Agriculture (USDA) Food Program. The requirements for ordering, receiving, and controlling inventory and payment vary from state to state. The activity manager, appropriate flight chief, and the RMFC, decide the method of inventory accountability (See AFMAN 34-214).

CHAPTER 7

ACCOUNTS PAYABLE PROCESSING

B0701 Establishment of Accounts Payable. The NAF AO posts accounts payable transactions when an activity has received goods or services on credit. The NAF AO makes payment to the vendor to clear the accounts payable.

B0702 Documents and Entries. The NAF AO does not record an obligation unless orders or agreements are in writing and supported by a receiving report (RR) or proof of shipment. Any activity using a POS system to maintain perpetual inventory enters receiving documents into the POS system before forwarding to the NAF AO. Activities using POS systems forward documents to the NAF AO no more than two workdays after the receiving date.

B0703 Payable Suspense File. The NAF AO establishes a suspense file for all payables. The NAF AO sets the file up to ensure they pay invoices timely and to help reconcile the subsidiary. The documents in this file make up the subsidiary record of the general ledger control account. The total should balance to the automated accounts payable subsidiary and the general ledger control account. After processing RRs through the payable system, file them in the suspense file for matching with invoices and making payment.

B0704 Proof of Shipment. The NAF AO may need to pay vendors on shipment, rather than on receipt of goods. Review the contract terms to determine if the vendor requires payment on shipment. See AFMAN 34-214 for guidance.

B0705 Vendor Invoices. The vendor mails invoices directly to the NAF AO. When the NAF AO receives the invoice, the RMFC may provide a copy of it to the activity manager. See AF Form 2210, General Provisions, for required information for a vendor to include on invoices. The NAF AO uses the invoice as part of the

documentation required for payment. Include vendor invoice numbers with the check to the vendor. See AFMAN 34-214 for overpayments and minor errors on invoices.

B0706 Discounts. The NAF AO posts discounts by reducing the cost of the item purchased. Take all discounts to which you are entitled. The discount period begins with the date of the contractor's invoice. For the purpose of earning a discount, the day that the NAF AO issues the check is considered the payment date. To comply with the Prompt Payment Act, mail checks to vendors on the same day they are issued.

B0707 Delivery Costs. The NAF AO posts freight costs to purchase expendable equipment, supplies, or resalable merchandise as supplies expense or cost of goods as appropriate. Include freight, postage, etc., as part of the purchase price. Include freight cost associated with capitalized items (fixed assets) as part of the acquisition cost of the asset.

B0708 Preparing Accounts Payable for Payment. The NAF AO matches vendor invoices with the receiving reports. The activity manager or designee certifies AF Forms 1735 used to transfer merchandise between NAFIs. No invoice is required for AF Forms 1735. Pay AF Forms 1735 using interfund dollar transfers.

B0709 Documentation Required for Payment. The NAF AO usually requires three documents to substantiate payment to a vendor. They are: a contract, a receiving report, and a vendor invoice. The following qualify as a contract: (1) Purchase order; (2) Blanket purchase agreement (BPA), or a call or delivery order written against an NPA, etc.; (3) A single document that constitutes a contract.

A. When an Air Force agency or

a utility provides goods or services, the NAF AO does not receive a formal contract (for example, commercial telephone service or purchases from the commissary). The NAF AO uses the documents in this paragraph to support payment.

1. The NAF AO substantiates payments to government sources by their invoices and extended commissary subsistence requests (AF Form 287, Subsistence Request).

2. The activity manager or designee certifies the government invoices and commissary subsistence requests.

3. The designer certifies invoices for interior design contracts.

4. The lodging fund may request customer refunds using SIMS check requests.

B. Use of AF Form 2539, NAF Disbursement Request. Use AF Form 2539 instead of a purchase order, for items such as:

1. Loan payments.
2. Registration or entry fees.
3. NAF official travel.
4. Tax payments and Internal Revenue Service payments.
5. Workers' compensation claims.
6. Payments to other government instrumentalities.
7. Payments against special contracts, interior design, commercial telephone, utilities, etc. See AFMAN 34-214 for entertainers and NAF official travel.

C. Blanket Purchase Agreements (BPA). The NAF AO should pay amounts due

vendors for calls placed against BPAs or interfund purchases monthly. This does not apply to meat or meat food products. Pay for meat or meat food products according to the Prompt Payment Act. See AFMAN 34-214 for other requirements related to paying vendors on BPA.

D. Signature Authorization. The RMFC or designee approves documents authorizing payments made from NAFs. The RMFC designates signature authority in writing. File the authorization in the LOF.

E. Filing Paid Documents. The NAF AO marks all backup documentation by stamping them paid after making disbursements. File one copy of the check, with all backup documentation, in the accounts payable disbursements file. File these chronologically by vendor.

F. Centralized Payment of Consolidated Purchases. AFSVA/SVFF pays vendors for AFNAFPO central buys and subsequently withdraws the amount paid from each base's CMIP account. See AFMAN 34-214 for details.

CHAPTER 8

INVENTORY

B0801 Inventory Maintenance. Activity managers control inventories at all times to prevent loss due to spoilage, obsolescence, or theft. The NAF AO maintains inventory records by updating the system with information from accounts payable, AF Forms 2533, or NCR order entry forms. To ensure the general ledger and the actual inventory contain the same data, the RMFC may establish a cutoff date for inventory related documents (see AFMAN 34-214). The types of inventories are:

A. Central storeroom. The NAF AO accounts for inventory maintained in a central storeroom as an asset until the storeroom issues the inventory. Once the storeroom issues the inventory, the NAF AO posts the expense in the applicable GLAC using the applicable CCC.

B. In-Use. Activities establish inventories for merchandise held for resale or consumption in sales outlets.

C. Decentralized Storeroom. Activities establish decentralized storeroom inventories as

1. Backup stock for in-use inventories.

2. High value or sensitive (such as POL and spare parts for aero club and slot machine operations) merchandise identified by management for additional control.

D. Consigned Merchandise. The consignor establishes consigned merchandise inventory to control items received on consignment. When consigned goods are received, the NAF AO does not post the receipt of, or any obligation for, the consigned items in the financial records. AFMAN 34-214 contains additional procedures.

E. Fixed Assets. The NAF AO

includes furniture, equipment, and facilities. Show this inventory as the appropriate accounting type, APF or NAF. AFMAN 34-214 contains additional procedures.

F. Inventory-In-Transit. The NAF AO records items purchased but received by an agent outside the NAFI proper. When the NAFI receives the items, record in the correct accounts.

B0802 Establishing Inventory Dollar Levels. The SV commander or director approves maximum inventory levels for each cost center (See AFMAN 34-214).

B0803 Review of Storeroom and In Use Inventories. Activity managers review all inventories and stock records to identify slow moving items and dead stock at least semi-annually. The SV commander or director may authorize below cost sales (not promotional) for slow moving or dead stock inventory items.

B0804 Inventory Schedule and Frequency. Activity managers submit completed inventory count sheets to the NAF AO for extension. The NAF AO processes inventories promptly to obtain a dollar valuation of the physical inventory for inclusion in the financial reports. The RMFC uses the physical inventory to determine if variances exist and if analysis or investigation is required according to AFI 34-202.

A. Activities inventory all food or beverage activities, pro shops, audio/photo and tickets monthly.

B. Activities inventory other resale merchandise including centralized and decentralized storerooms and merchandise on consignment, as a minimum, at the end of each quarter.

C. Activities inventory

merchandise held for special events by type of event. Items include donations received from commercial sponsored occasions (see AFI 34-202).

D. Activities with firearms inventories them monthly. The activity manager accounts for firearms daily.

E. The SV commander or director may allow any activity having a point-of-sale (POS) system that maintains perpetual inventory to take only an annual physical inventory. As a minimum, an independent observation team must observe the taking of the physical inventory:

1. At the end of the FY.
2. On change of activity manager (unless waived).
3. When spot checks by the NAFFA indicate an inventory problem.
4. When required by an Air Force Audit.

B0805 Change of Activity Managers.

A. The NAF AO furnishes fixed asset property listings to the activity managers when management changes. Incoming activity managers must satisfy themselves as to the correctness of the property records. To verify the property records, the activity usually physically inventories the property. The incoming activity manager may waive this requirement. The NAF AO attaches the waiver to the change of custodian certificate (see AFMAN 34-214 for details).

B. The incoming activity manager also checks correctness of decentralized storeroom or in-use inventories. (See AFMAN 34-214 for details).

B0806 Change of Custodian (RMFC).
Change of custodian does not require a physical inventory except for NAF AO assets. Transfer inventories by exchanging receipts between the

outgoing and incoming RMFCs.

B0807 Decentralized Storeroom (Aero Club and Slots Operation). See AFMAN 34-214 for decentralized inventories for Aero clubs and slot machines.

B0808 Free Items or Donations. When vendors provide free items as bonuses or a purchase discount, the receiver notes the free items on the receiving report. The NAF AO records free items on the inventory. If an activity receives donations for special occasions and gives them away, the activity manager accounts for these items without having the NAF AO process them through the inventory and cost of goods sold. The RMFC or designee examines all transactions involving donations to ensure that the activity manager accounts for the items received.

CHAPTER 9

CHILD CARE

B0901 Reimbursement for Child Care Food Programs (CCFP). The NAF AO posts income, accounts receivable and subsequent reimbursement for child development program participation in the USDA CCFP. The USDA administers the program in all states and territories through the state or regional office. Follow regional USDA policies for completion and reporting purposes.

A. Reimbursement Requests for Continental United States (CONUS) Bases. At CONUS bases, the child development center director or designee completes the required forms requesting reimbursements (using state provided forms). Send the requests to the NAF AO. The NAF AO reconciles the forms to the subsidiary record and forwards them to the state's office for the USDA CCFP.

B. CCFP Sponsorship Family Day Care Providers. Air Force Child Development Centers (CDC) act as sponsors for family day care home providers participating in the USDA CCFP.

C. USDA, through the sponsoring CCFP, reimburses family day care providers for part of the costs of providing nutritional meals and snacks to the children. The NAF AO does not issue IRS Form 1099 for CCFP disbursements to family day care providers for USDA reimbursements.

D. The CDC receives compensation from the USDA to administer the program. The CDC can use the funds received from USDA to hire staff to administer the program.

B0902 Accounting for Child Care Service to Volunteers. The CDC or authorized family day care providers may provide child care services for volunteers when the volunteers serve the Air Force community.

A. When the CDC provides child care services to volunteers, refer to AFMAN 34-214 for accounting procedures.

B. The installation commander may approve, in writing, a specific number of family day care providers to care for children of volunteers when no space is available in the CDC. The NAF AO prepares a nonpersonal service contract, in advance, with the provider to specify the rate charged and other charges (for example, food, diapers). The NAF AO provides the day care provider an IRS Form 1099 at year-end according to IRS requirements. The NAF AO includes on the IRS Form 1099 the amount paid to day care providers for volunteer care. Do not include amounts paid relating to USDA food reimbursements.

CHAPTER 10

REPORTS**B1001** Temporary Lodging Facility (TLF) Assessment.

A. AFSVA/SVF advises the NAF AO of new or changed rates for assessment collection and reporting purposes.

B. The NAF AO computes the TLF assessment. Do not count or include visiting officers' quarters (VOQ) and visiting airmen's quarters (VAQ) used for permanent change of station (PCS) families unless AFSVA/SVP officially redesignates them as TLFs. Post all income from such units in the VOQ or VAQ cost centers of the lodging fund. See AFMAN 34-214 for computation and reporting. The NAF AO reports assessment data to AFSVA/SVFF before the 15th work day of the following month.

B1002 Employee Census Data (Quarterly). The NAF AO reports employee totals as of the last pay period of the quarter. Include foreign national information that is not included in the US employees' payroll system. See AFM 176-378 for format.

B1003 APF Support to Morale, Welfare, and Recreation (MWR) Activities, RCS: HAF-MWR(Q)7503. Financial Services Office (FSO) personnel prepare and submit this report according to AFR 177-101. The RMFC reviews the data for accuracy and validates the report. Include a footnote showing the amount of APF expenditures to cost centers supported by the NAFI in the quarterly financial statements.

B1004 Special Morale and Welfare Expenditure Report. The NAF AO prepares the SM&W Expenditure Report for each quarter according to AFI 34-201. The NAF AO reconciles the SM&W report to cost center "Q" on the MWRF financial statement.

B1005 Nonappropriated Fund Cash

Management and Investment Program (CMIP) Report, RCS: HAF-DPM(D)7505. For reporting CMIP transactions, follow guidance in AFMAN 34-215.

B1006 Nonappropriated Fund Financial Statement, RCS: HAF-DPM(Q)7407. See AFMAN 34-214 for the format of the financial statement for all NAFIs.

A. The financial statement consists of four basic elements:

B. Balance Sheet. The NAF AO prepares a report of assets, liabilities, and fund equity (see AFMAN 34-214).

C. Income and Expense (I&E) Statement. The NAF AO prepares a consolidated statement of income and expenses for each NAFI and supports the consolidated statement with individual cost center reports. Use the same format for the consolidated statement and the individual cost center reports (see AFMAN 34-214). Report the amount of appropriated fund support provided for each NAFI on the quarterly consolidated statement.

D. Statement of Cash Flows (SCF). The RMFC or designee prepares this statement on a quarterly and annual basis. Prepare it either manually or by using an automated program.

E. Supporting Schedules. AFSVA/SVF, MAJCOM, and local management may require supporting schedules to the financial statements. As a minimum, the NAF AO prepares the following to support financial statements:

1. Schedule of aged accounts receivable.

2. A copy of AF Form 1736,

NAF Cash Management and Investment Program Account Verification, to support the quarterly financial statement.

F. Special Instructions, Frequency, and Distribution. See AFMAN 34-214 for special reporting instructions for unit funds, subordinate commands, MAJCOMs, BRFs, and CWFs.

G. NAF AOs transmit reports to MAJCOMs to arrive by the 15th calendar day after the quarter being reported. Each MAJCOM accumulates the data and submits reports to AFSVA/SVF to arrive NLT the 20th of the month after the end of each fiscal quarter. (See AFMAN 34-214 for format for submission, MAJCOM submission and method of submission).

B1007 Quarterly Prompt Payment Report, RCS:DD-COMP(Q)1619. NAF AO's prepare quarterly Prompt Payment Reports (see AFMAN 34-214 for format). Submit the report to AFSVA/SVF by the 10th calendar day following the end of each quarter. Round all amounts to the nearest dollar. AFSVA/SVF prepares and submits the quarterly report to SAF/FMPB.

B1008 Annual Prompt Payment Report, RCS: DD-COMP(A)1607. AFSVA/SVF prepares and submits the annual prompt payment report to SAF/FMPB.

B1009 International Balance of Payments Transactions, RCS: DD-COMP(Q)743 (AF). This report applies to all Air Force NAF supported activities having transactions entering the international balance of payments (IBP) (whether abroad or in the US, its possessions, Puerto Rico, and Panama Canal Zone) except unit funds and those NAFLs whose quarterly purchases do not exceed \$50,000. AFSVA/SVF prepares and submits the quarterly report for applicable bases. Follow guidance in AFMAN 34-214.

B1010 Tax Reports. See AFMAN 34-214 for reporting quarterly payroll tax returns. Use IRS Form 1096, Annual Summary and Transmittal of US Information Return, IRS Form 1099-MISC, Statement for Recipients of

Miscellaneous Income (entertainers and personnel service contracts), and TD Form W-2G, Statement for Certain Gambling Winnings (bingo). See AFLs 34-201 and 34-202, AFM 176-378 (for reporting tips) and NCR 9300 Users' Guide for procedures in assembling and reporting information.

B1011 Certification of Financial Statements. Quarterly, the custodian certifies the financial statements for all NAFLs by signing the following certification, "I certify that the information used for preparation of and the balances in this statement are true and correct to the best of my knowledge." This certification includes all elements of the financial statement as defined in AFMAN 34-214. Forward the certification to AFSVA/SVF, through your MAJCOM, to arrive not later than 45 days following the end of the quarter.

B1012 Certification of Cash Management and Investment Program (CMIP) Accounts. Quarterly, the custodian certifies the accuracy of the CMIP account verification on AF Form 1736, CMIP Account Verification, and forwards it to AFSVA/SVF through MAJCOM/SVF to arrive NLT 45 days after the end of the quarter. Submit a certification statement on AF Form 1736. Use the statement described in paragraph 12.11. Include a separate AF Form 1736 for each account and NAFL, i.e., cash, severance, and cash in bank savings.

CHAPTER 11

DEPOSITS, CHECK WRITING AND CONTROL OF CHECK STOCK

B1101 Deposit Slips. The NAF AO receives the numbered deposit slips (validated and unvalidated) for CMIP processing. If the NAF AO receives an unvalidated deposit slip, suspense it until the bank sends a validated copy. The NAF AO should receive the validated deposit slip within 3 days after the day of business. Immediately notify the office manager of any variances between the suspended deposit slip and the validated deposit slip when received. If the NAF AO finds a difference in the amount actually deposited, process a deposit adjustment to the general ledger and CMIP.

B1102 Bank Fees and Charges. The NAF AO posts bank fees and charges to the NAFI's administrative cost center. Include those items that are not identified to a patron. This includes fees for deposit bags, keys or deposit slips and re-presented check fees absorbed by the NAFI (does not include return check service charge). It also includes the fee paid for armored car service.

B1103 Check Writing Function.

A. Check Number Control Log. The NAF AO maintains a log (either manual or automated) of all checks (written and voided) and related information for general, payroll, limited payee checks.

B. Check Writing. The NAF AO reports checks written to AFSVA/SVFB through CMIP transmission. Under CMIP, the NAF AO prepares all checks except payroll from a single general check stock. The individual responsible for check writing (check writer):

1. Uses checks in numerical sequence.

2. Writes checks for individual NAFIs and identifies the NAFI on each check. Include the NAF ID on each check

stub (except payroll).

3. Spells out the dollar amount for checks typed manually or processes them through a check protector. They should not contain typing errors or strikeouts.

C. General Checks. The NAF AO normally writes checks on a weekly or bi-weekly basis to ensure compliance with the Prompt Payment Act requirements. The NCR 9300 automatic check generation program normally generates these checks. However, the NAF AO may prepare handwritten checks for out-of-cycle payments.

D. Foreign Currency Checks. Overseas locations use foreign currency and limited payee checks. The NAF AO uses a foreign currency checking account, established in a military banking facility in the overseas area, to satisfy local requirements for foreign currency and to make disbursements that require this medium of exchange. Use limited payee checks (LP) for change funds and accommodation sales (see AFI 34-202).

E. Distribution of Checks and Paid Documents. The check writer returns the signed checks with supporting documents to the accounts payable technician for distribution. AFMAN 34-214 contains mail, retention, and distribution instructions.

B1104 Control of Blank Check Stock. The NAF AO stores blank checks in a locked container or safe. Use AF Form 1249, Check/Bond Control Record, to record receipt, issue, return, balance on hand, and spoiled or voided checks. Maintain a separate check control record for each type of check. NAFIs not under CMIP obtain check stock from normal commercial sources.

B1105 Destruction of Blank Check Stocks.

When a blank stock of checks needs to be destroyed, two individuals independent of the check writing function witness the destruction (see AFMAN 34-214). The NAF AO notifies AFSVA/SVFB of the destruction according to AFMAN 34-214.

CHAPTER 12

MISCELLANEOUS TRANSACTIONS

B1201 Aero Club Liability Insurance Expense. The NAF AO computes liability insurance premiums for Aero Club aircraft based on the number of flying hours per aircraft. Compute the monthly expense by using the total flying hours reported on the status of Aero Club Aircraft and Operations Report, RCS: HAF-DPM(Q)7211. See AFMAN 34-214.

B1202 Aero Club Hull Insurance. The NAF AO computes hull insurance based on the declared value of each aircraft as reported on the quarterly RCS: HAF-DPM(Q)7211 report. See AFMAN 34-214.

B1203 Workers' Compensation (WC). The Payroll Retrieval Interface to General Ledger (PRIGL) program computes the accrued WC expense and produces the journal entries used to update the financial records. The PRIGL computes premiums based on US civilian gross payroll. The NAF AO posts the premium expense by the end of each accounting period to each applicable cost center. See AFMAN 34-214.

B1204 Unemployment Compensation (UC). The PRIGL computes the accrued UC expense and produces the journal entries used to update the financial records. The PRIGL program computes premiums base on US civilian payroll. The NAF AO posts the premium expense by pay period to each applicable cost center where personnel are assigned. See AFMAN 34-214.

B1205 Asset and Liability Insurance. The NAF AO records premiums at the end of each accounting period based on balances from the quarterly 7407 report. Use the fund administration cost center for each NAFL.

A. Asset Computation. The NAF AO computes asset premium payments based on the book value of assessable assets.

B. Liability Computation. The NAF AO computes liability premium payments based on the total gross income for each applicable NAFL.

B1206 Group Life Accidental Death and Dismemberment and Comprehensive Medical Expense Insurance Program. The PRIGL computes the employer's share of the Insurance Program. The NAF AO posts this expense each pay period to the respective cost center where personnel are assigned. Transfer the total employee and employer share of group insurance to the MWR fund. The NAF AO makes payment from the MWR fund to the Air Force Insurance Fund (AFIF) through CMIP.

B1207 Retirement Program. The PRIGL computes the employee's contribution of retirement and transfers it to the MWR fund. The NAF AO makes payment from the MWR fund to the Air Force Retirement Fund (AFRF) through CMIP.

B1208 Reimbursements from MAJCOMs. When MAJCOMs authorize reimbursements, the NAF AO does not net the reimbursement into the expense account. Record the expense in full on the NAFLs books. The MAJCOM does not reimburse for more than 100 percent of the actual cost.

B1209 Procedures for Aero Club Accruals. The NAF AO accrues the anticipated engine overhaul or replacement cost monthly. NAF AOs should also establish accruals in Aero Clubs for any other planned major maintenance such as repainting aircraft. To account for accrued maintenance, the NAF AO keeps two separate subsidiary ledgers, one for engine overhaul and one for other planned maintenance. See AFMAN 34-214.

B1210 Promotions. An activity uses the entertainment and promotional expense GLACs

to separate the expense of such programs. Use these accounts for programs or events held to further the growth or development of that activity. The NAF AO posts expenses for goods and or supplies only when an activity specifically advertises the items in connection with a promotion, or the item is used during a free program. Transfer labor expenses only if an activity specifically schedules labor that is used in conjunction with the promotion or giveaway. Post the cost of the entertainment or promotion to the activity receiving the benefit. See AFMAN 34-214 for additional details.

B1211 Severance Pay. The NAF AO accrues obligations for severance pay due employees according to AFMAN 34-214. Accrue severance for NAF foreign national employees during the period in which the entitlement is earned, whether or not the amount is currently payable. For other NAF employees, severance accrual begins when the NAFI knows it will incur such a liability in the future (for example, when announced for closure or major realignment). Set aside funds in the severance benefits investment program to pay for future liabilities. Contact HQ AFSVA/SVF to establish a severance benefits investment account.

VOQ	visiting officers quarters
WC	workers' compensation

ATTACHMENT B.2

TERMS EXPLAINED

B2.1. Accounting Period. An accounting period is from the first day of a given month through the last day of the same month.

B2.2. Accounting System. The NAF accounting system is based on commercial accounting practices modified to meet the needs of the Air Force. The principles underlying this system are based on experience, the needs within the Air Force NAFI environment, and generally accepted accounting principles (GAAP).

B2.3. Accounting Year. The accounting year is from 1 October of a given year through 30 Sep of the following year.

B2.4. Activity. This term describes operational organizations within the SV structure, such as bowling center, officers' club. It is also used when referring to specific functions within each operational organization such as, lanes operation, snack bar, bar, dining room, slot machines, ticket operations, etc. Do not confuse the operational functions of the "activity" with the accounting term "cost center."

B2.5. Assets. Assets are economic resources obtained or controlled by NAFIs as a result of past transaction or events. They are classified as either current or noncurrent items.

B2.6. Balance sheet. The balance sheet shows the financial position of a NAFI at a point in time. It lists the assets and claims against the NAFI. The balance sheet lists separate columns for current period (FY) and prior period data. This report also includes current and acid test ratios.

B2.7. Budget Working Committee. Individuals selected by the Services Commander or Director to review and prioritize items on NAF Requirements budgets.

B2.8. Cash Flow Budget. A formal financial

plan which shows the beginning cash balance, the cash inflows and outflows, and the ending cash balance expected for a period of time. The purpose of the cash flow budget is to anticipate changes in the level of cash. The ANF AO prepares a cash flow budget for each NAFI.

B2.9. Cost Center. Term used to identify the accounting subdivision of a NAFI. This term is used for accounting purposes and should not be confused with the operational term "activity." A standard 2-digit identity code is assigned by Air Force for each cost center.

B2.10. Current Assets. Cash and other assets that can be reasonably expected to be converted to cash or consumed (accounts receivables and inventory) during the next 12 months.

B2.11. Current Liabilities. Debts that should be paid within the next 12 months; includes accounts payable, accrued payroll, taxes, and current portion of loans payable.

B2.12. Custodian. The Resource Management Flight Chief (RMFC) is the primary custodian for all NAFIs supporting a base with the exception of the base restaurant and civilian welfare funds, exchanges, and in some instances NAFIs at remote or isolated units.

B2.13. Depreciation. The method used to expense the acquisition cost of a fixed asset over the life expectancy of that asset.

B2.14. Financial Analysis. Analysis is a continuing process throughout the normal course of operations, with the manager as the focal point. The objective is to spot potential problems, identify root causes, and obtain solutions.

B2.15. Fixed Assets. Tangible items with an individual cost of \$1,000 or more, and with a life span of 2 years or more, which do not lose their

identity through use. Includes items such as, furniture, equipment, tools, machinery, facilities, major repairs and improvements, etc.

B2.16. Fund Equity. Fund equity (net worth) is the excess of total assets over total liabilities.

B2.17. General Ledger. The general ledger is the core of the NAF accounting system and provides a detail of all accounting transactions for the current period. The system consists of control accounts for assets, liabilities, equity, income, and expenses.

B2.18. Host MWRF. Provides financial management and accounting services required by NAFIs at other locations. The host MWRF custodian is responsible for financial management assistance and accounting support, and serves as the focal point for fiduciary accountability.

B2.19. Income and Expense (Operating) Budget. A formal financial plan which reflects monthly and quarterly projected income and expenses for a fiscal year. It reflects the expected outcome of management's plans and decisions in financial terms. It shows the revenue and associated expenses an activity expects to generate over a given period. This budget gives the activity manager an estimate of the profit to be realized from the operation. (For this reason, the I&E budget is sometimes referred to as the "operating" budget.)

B2.20. Liabilities. Liabilities are obligations to transfer assets, provide services, or otherwise expense assets to satisfy responsibilities resulting from past or current transactions. They are classified on the financial statements as either current or noncurrent liabilities.

B2.21. Minimum Cash Balance. The minimum amount of cash that should be kept in cash-in-bank for efficient operations and sound cash management.

B2.22. NAF Requirements Budget. A formal 5 year financial plan which shows the estimated cost and time for buying new equipment, furnishing, renovating facilities, replacing and

repairing fixed assets, buying bulk purchases of expendable equipment and buying bulk purchases of high cost supply items.

B2.23. Small Operations. Those with limited programs and gross revenues of less than \$36,500 per year. Small operations may not require all of the detailed accounting records and procedures outlined for NAFIs at bases or stations.

B2.24. Statement of Cash Flows. The Statement of Cash Flows is a formal statement of cash received and cash paid out for the period being reported. It shows the uses and sources of cash. It is prepared by NAFI.

B2.25. Unprogrammed NAF Expenditures. Expenditures for costly capital assets (equipment and facilities) which are not included in the NRB of the NAFI (called "unprogrammed"). These can cause serious cash flow problems.

B2.26. In Use Inventory. In use inventory consists of merchandise maintained by operating activities for resale or consumption in sales outlets such as bars, pro shops, restaurants, and snack bars.

APPENDIX C**ACCOUNTING PROCEDURES FOR NAVY NONAPPROPRIATED FUND**

This appendix of the DoD Financial Management Regulation is for use by all non-appropriated fund accounting offices which use systems developed by the Department of Navy. The appendix contains policies and procedures specific to those systems. General or non-system specific policies and procedures are included in the core regulation and have been excluded from this appendix. For example, the requirement that nonappropriated fund instrumentalities (NAFIs) conform to generally accepted accounting principles is not system-specific and applies to all DoD NAFIs. Therefore, it is included in the core regulation and excluded from this appendix.

This appendix supersedes all previously published policies and procedures. Therefore, in the event of conflicting instructions, the policies and procedures in the regulation itself should be followed.

CHAPTER 1

GENERAL INFORMATIONC0101 GENERAL

C010101 Purpose. This appendix prescribes financial management policies and a uniform accounting system for all nonappropriated funds within the Department of the Navy. These provisions are intended to increase efficiency and effectiveness, permit greater control by management, facilitate the conducting of audits by proper authority, and provide guidance to all participants in the system.

C0102 SCOPEC010201 Policies.

A. Scope. The policies set forth herein are applicable on a worldwide basis to all nonappropriated fund instrumentalities (NAFIs) within the Department of the Navy, including the Navy and Marine Corps Morale, Welfare, and Recreation Support Activity and are to be followed unless specific request for deviation is submitted through and approved by the appropriate chain of command and the Defence Finance and Accounting Service (DFAS). The Navy Exchange and the Marine Corps Morale, Welfare, and Recreation Support Activity Manuals contain accounting procedures for their respective systems and are subject to DFAS review and approval. The Bureau Of Naval Personnel Recreation and Mess Central Accounting System (RAMCAS) Users Handbook contains detailed accounting procedures for NAFIs participating in the RAMCAS and is subject to DFAS review and approval. Recommendations for improvements, modifications and/or additions to this appendix are encouraged and should be submitted to the DFAS.

B. Private Organizations. Private organizations and funds thereof, established and operated by individuals acting

outside the scope of any official capacity as officers, employees, or agents of the Government, and which are established to provide desirable morale enhancing facilities and services, are subject to DOD guidelines. The financial management policies and procedures set forth in this appendix are not applicable to private organizations, however, they maybe used as guidelines.

C. This appendix is not intended to approve the establishment or operation of any of the activities referred to herein. Military and civilian NAFIs are established and operated in accordance with instructions issued by the applicable program manager.

C010202 Basic Policies.

A. Establishment and Operation. The Department of the Navy advocates the establishment and operation of well-rounded morale, welfare, and recreational programs to insure the mental and physical well-being of its personnel. Adequate programs and facilities to carry out this policy should be provided, operated, and maintained through financial support tendered by the Department of the Navy. Appropriated and Nonappropriated funds will be used as appropriate to fund the cost of these programs and facilities. Provisions will be made to account for appropriated expenses by categories and activity types.

B. Immunities and Privileges. The programs and facilities provided through morale, welfare, and recreation functions are deemed by the Department of the Navy to be essential to the performance of its functions. As such, they are necessary adjuncts of the department. Morale, welfare, and recreation activities operated as Nonappropriated Fund Instrumentalities (NAFIs) are entities of the Government and as such are entitled to all the

immunities and privileges which are available to the departments and agencies of the Federal Government under the Constitution and statutes.

C. Civilian Employees. Morale, welfare, and recreation programs established primarily for civilian employees of the Navy are intended to provide food and other services where required, and to offer certain recreational activities as inducement to recruitment and retention of the civilian work force.

D. Administration of Programs. Morale, welfare, and recreation programs will be administered in compliance with applicable Federal laws and operate in concert with certain state and municipal laws. Questions involving jurisdiction and compliance which cannot be resolved locally, should be submitted to the appropriate authority for resolution.

E. Nondiscrimination. The facilities and/or services of morale, welfare and recreation programs will not be made available to any group which practices discrimination on the basis of gender, race, creed, color, age, physically/mentally handicap, or national origin. This will not prohibit the establishment of cultural or ethnic private organizations, providing membership is not restricted or discriminatory. Private organizations whose memberships are restricted on the basis of religion may be authorized to operate on DOD installations provided authorization is also approved for requests by similar organizations without preference.

F. Nonappropriated Funds are Government Funds. All nonappropriated funds are government funds dedicated exclusively to the collective welfare and recreation of military and civilian personnel and their dependents. These funds will not be donated to any individual, firm, group, or organization, charitable or otherwise, to the detriment of the joint welfare and recreation of all personnel and their dependents.

G. Cross-Service Borrowing. To the extent funds are not available from within the Department of the Navy, cross-service borrowing of nonappropriated funds is encouraged. Commercial borrowing will be obtained only as a last resort. Approval of either cross-service or commercial borrowing must be obtained in advance from the applicable program manager.

C0103 SYSTEMS APPROVAL. DFAS-HQ has the responsibility for final review and approval of financial management processing systems prior to implementation.

CHAPTER 2

FINANCIAL MANAGEMENTC0201 GENERALC020101 Basic Functions of Management.

The basic functions of management include planning, coordinating and controlling. Planning is directed toward the establishment of desirable future objectives and the formation of an organizational structure to be followed in their achievement. Coordination consists of integrating individual and group effort with the over-all objectives. Controlling results from the evaluation of individual and group effort in terms of the predetermined goals.

C020102 Discharge of Management Functions.

The effective discharge of these functions is essential to sound business management and successful operations. In small activities the manager may personally supervise every phase of operations and the basic functions of management may be performed with little recourse to accounting data. In larger entities, direct personal supervision by one individual is seldom possible and it is necessary to establish a chain of command from top management to departmental supervisors. Under such circumstances, accounting becomes an indispensable tool of management. Accounting not only provides each level of management with relevant financial data, but it also furnishes basic facts required in planning, coordinating, and controlling.

C0202 BUDGETING AND MANAGEMENT

C020201 Nature of Budgeting. Budgeting consists of establishing specific future goals and periodically measuring actual results against the planned objectives. A budget is a formal written statement of management's plans for the future, expressed in financial terms. A budget charts the course of future action. Thus, it serves management in the same manner that the architect's blueprints assist the builder and the navigator's flight plan aids the pilot. A budget,

like a blue-print and a flight plan, should contain sound, attainable objectives based on a realistic plan of operations rather than mere wishful thinking.

A. Accounting and Management. Probably no other instrument contributes more directly to management than a budget. A budget embraces both accounting and management functions. It is a management function because it is an expression of management's plans and an accounting function because plans are translated into financial terms for subsequent comparison with actual performance. Each of management's primary functions is directly served by budgeting. Planning is encouraged because careful study, investigations, and research must be given to expected future operations if the budget is to contain sound, attainable goals. Advanced planning, in turn, increases the reliance of management on fact finding in making decisions and lessens the role of hunches and intuition in managing a business enterprise.

B. Preparation. Coordination is facilitated as each level of management participates in the preparation of the budget. In addition, a budget enables top management to explain its objectives to each stratum of management. For example, planned merchandise purchases are developed in accordance with anticipated sales. Manpower requirements and salary costs can be correlated with anticipated income from services to be rendered.

C. Control. While managerial planning and coordination are important, they must be accompanied by control. Budgeting contributes to effective management control through the preparation of frequent budget reports in which actual performance and budget of objectives are compared and variations are revealed. The disclosure of variations enables management to focus attention on the

areas which require immediate corrective action. Budget objectives act as a deterrent against waste and serve to encourage efficiency and cost savings.

D. Budget Revisions. For the budget to remain an effective management tool, revised budgets incorporating significant program changes for the balance of an accounting period should be prepared. Revisions should not be made solely to eliminate variations from planned performance.

C0203 BUDGETING PROCEDURES.

C020301 Responsibility for Preparation.

A. Budget Officer. The responsibility for actual preparation of the budget is assigned to the local budget officer and the MWR Director. Budgets are prepared for both appropriated and nonappropriated funds requirements in accordance with guidance established by the program manager.

B. Budget Input. Requests for budget estimates should be extended to the lowest level in the chain of command to enlist the participation and cooperation of all strata of management. After the estimates have been received, they are reviewed and incorporated into a master plan. This process usually necessitates a revision of some of the estimates, and each supervisor is given an opportunity to defend his estimates and requests. The various budgets are then agreed upon and approved by the commanding officer. Finally, the budgets are distributed and explained to each responsible supervisor as the operating plan against which their performance will be compared.

C. Sources of Information. Budgets are dependent upon the preparation of timely, clear, and accurate financial statements reporting operational results and financial condition of the business entity. The financial condition of an activity is presented in its balance sheet, while its earnings are reported in the income statement. The items appearing in these statements are major considerations in planning.

D. Elements of Financial Planning.

1. Management of Working Capital. The efficient administration and control of capital used in an activity.

2. Financial Plan. Determining the sources and required amount of initial or additional capital. This is an estimate based on past experience.

3. Operating Budget. The projection of income and expense for a future period. Permits comparison and analysis of projected data with actual data. This is an estimated view of future income and expense based on past experience. The estimate will be influenced by management policies such as a reduction of personnel costs which could increase the net profit. It could also be influenced by an anticipated reduction in patronage through military transfers which could result in a decrease in level of operations and net profit.

4. Cash Budget. A projection of cash receipts and disbursements for a specified future period. It is necessary to know how much cash will be necessary to operate during the coming months and at what times and in what amounts cash will be available to meet payment needs. Cash budget shall be derived from and reconciled with the operating and capital budgets.

5. Capital Budget. The projection of expenditures for acquisition, construction, renovation, and expansion of capitalized fixed assets such as furniture, fixtures, equipment, and building improvements. The source of funding and estimated completion date shall be indicated.

6. Annual Appropriated Fund Budget. An itemized listing of required appropriated fund support.

7. Balance Sheet Projection. The projection of assets, liabilities,

and net worth at a future date based on planned operational results.

C0204

OPERATING BUDGET

A. General. In its simplest, the operating budget is expected receipts less desired profits. Planning is designed to increase receipts or reduce allowable costs and expenses, or both, to achieve the desired profit objective. For instance, once the desired profit is determined, there must be planning to obtain this profit. It may be reached by increasing receipts through more aggressive promotion, additional facilities, or a rise in prices. The profit objective, through more effective management, may also be approached by cutting costs (allowable costs) through a reduction in personnel, tighter control on costs, or reduction of administrative expenses.

B. Profit Objective. The profit objective should be consistent with the need for maintaining the lowest possible price to customers, expansion requirements, and other management needs. An activity which has acquired elaborate, or even adequate facilities, may be in a position to budget profits at or near the break-even point, and pass along the usual operating gains to customers through reduced prices, dues, or other service charges. The purpose of the budget under such circumstances is to limit administrative expenses so as to increase the direct benefit accruing to customers through lower charges.

C. Forecasting Receipts. Forecasting future receipts is the most important element in the operating budget since all other elements are dependent upon this figure and must vary accordingly.

1. B a s i c Management Unit. A basic unit of measurement must be determined to forecast future receipts. This unit of measurement is obtained from data collected from past operations. The measurement unit may be selected from such data as the number of customers, meals, and guests applicable to each major activity (bar, dining room, golf course, barber shop, or any

other department). Dollar amounts may be applied to measurement units upon determination of pricing and rate standard.

2. Forecasting Procedure. Future receipts from the sale of goods should be computed separately from income from other activities such as room service, greens fees, and membership dues, etc.

3. Other forecasts. Income from similar activities may forecast in a like manner. Income from nonresale activities may be forecast directly in terms of measured units and by the application of rates as determined by the board or council, or as prescribed in the by-laws in the case of membership dues and assessments. Consideration should be given to such factors as number of dependents, training schedules, seasonal variations, and holidays.

D. Limiting Expenses. When the total gross income from sales and other activity sources has been forecast, the dollar amount of net profit needed to support future requirements may be determined. The difference between these two figures (gross income and net profit) represents the maximum amount which may be used to defray all expenses during the budget period. Major costs such as cost of goods sold, wages and salaries, personnel benefits, utilities, and depreciation should be forecast separately for each month of the budget period. General and administrative expenses representing smaller amounts may be consolidated. The distribution of expense by activity should be accomplished when practicable. Prior experience should be the basis for apportioning expense allowances to the various activity accounts. Past expenses, however, should be examined closely as to propriety and necessity. Savings accomplished and reflected in greater profits may be converted to lower prices in subsequent periods. This factor actually may induce greater dollar volume gross income through increased patronage. Conversely, it may be found that the budgeted gross income is so low as to result in the forced reduction of essential expenses, adversely

affecting sales volume and patronage. These matters cannot be resolved by a predetermined formula but must be resolved by good management.

E. Presentation of Operating Budget. The final form of the operating budget is the same as the income statement, except that provision is made for monthly comparisons. All items should be expressed in terms of percentages of total sales for analysis and comparative purposes.

C0205 CASH BUDGET

C020501 General. A cash budget is an effective tool in planning cash requirements and resources of a business. It is important to note that the excess or deficit of cash receipts over disbursements for a given accounting period may not equal the amount of net profit or loss as reported in the income statement for the same period. Sales on credit, purchases on credit, and other accruals reflected in the income statements prevent a direct comparison.

C020502 Purpose. The primary purpose of the cash budget is to identify existing and anticipated cash resources to finance operations, pay debts as they mature, pay for desired expansion, and maintain the business in a satisfactory or liquid position. Sales volume, inventory levels, pricing, credit policies, and plans for replacement and expansion of fixed assets, should be critically reexamined in the light of the cash budget, and modified as necessary. When the cash budget indicates a deficit during all or part of the budget period, the entire plan of operations may be too ambitious for the resources available. Certain budgeted activities may have to be curtailed or deferred until additional capital can be accrued from future earnings.

C020503 Preparation. In estimating cash receipts and disbursements, other budgets must be carefully studied. Appropriate consideration should be given to future plans of management which will affect cash. After cash receipts and disbursements have been estimated, a minimum cash balance is established that will be adequate

to meet cash requirements. The cash budget should be prepared progressively by monthly revision to provide a perpetual forecast. The period of time covered by a cash budget varies with the type of business and the activity's cash position. When the supply of cash is short, a weekly or even a daily cash budget may be necessary. Ordinarily, however, twelve separate monthly budgets are prepared for the year. Cash budgets are usually accompanied by detailed schedules of the major items summarized in the budget. Forecasts of total income as reflected in the operating budget must be adjusted for cash transactions. Cash receipts arising from credit sales and other charges will necessitate preparation of accounts receivable aging schedules, actual and projected. Monthly comparison should be made with actual cash receipts and disbursements for the purpose of planning future operations.

C0206 CAPITAL BUDGET

A. General. The capital budget is a summary of proposed expenditures of cash for depreciable assets for the following purposes:

1. Additions and extensions to property and equipment.
2. New property and equipment.
3. Replacement of property and equipment unit.
4. Furniture, fixtures, and office equipment.

B. Purpose. The objective of the capital budget is to increase or at least maintain future profits without jeopardizing the financial stability of the activity. Expansion or replacement proposals that do not further sales volume are not in themselves a sufficient basis for expanding capital investment, unless it is to be supported by a continuing high volume.

C. Long Range Planning.

1. Planning for capital expenditure must be considered from a long-range viewpoint to include the following considerations:

a. Long-term estimate of revenue, cost of operations, and profits.

b. Possibly serve an increased patronage without expansion of fixed assets.

c. Determine expansion of property and equipment required to serve increased patronage in terms of physical units.

d. Ability to obtain the required amount of capital when needed.

2. The capital budget may be forecast by calendar quarters for 1 year in advance, and for each year thereafter up to 5 years.

D. Sources of Capital. Failure to carefully budget capital expenditures is likely to result in the diversion of cash required for working capital to the acquisition of fixed assets, thereby impairing the ability of the fund to meet its current financial obligations. If cash required for operations is used for this purpose, it results in a diversion of working capital into fixed capital. The maximum funds available for capital expenditures, without impairment of working capital, are measured by:

1. Reinvested (Retained) earnings for a given period.

2. Annual allowances for depreciation (accumulated depreciation accrued through monthly charges).

3. Proceeds from loans (ultimately to be repaid from future earnings).

E. Financing Replacements and Expansion. Capital expenditures for replacement of fixed assets as a general rule should be limited to the accumulated allowances for depreciation, while expansion of amounts required as additions to working capital.

F. Preparation. The capital budget should be prepared in two forms.

1. A listing of individual projects or fixed asset items to be acquired during a future period stating the estimated cost of each, the date and amount of actual expenditures, and the unexpended balance of budgeted expenditure.

2. Summarized by Period. Capital budget summarized by period. The budgeted project may be summarized for each budget period and computation made of the total funds estimated to become available for capital expenditures.

C0207 BALANCE SHEET PROJECTION

A. General. The balance sheet projection is a preview of the financial condition on a specified future date, based on the plan of operations adopted. The balance sheet projection may be prepared as a culmination of other forecasts and budgets specified in other sections of this Chapter.

B. Purpose. The balance sheet projection may be used to:

1. Note the flow of reinvested profits into current and fixed assets.

2. Check on the accuracy of the operating budgets.

3. Aid in planning capital expansion.

4. Forecast cash balances and requirements.

5. Aid profit planning designed to secure an adequate return on the total investment.

6. Maintain the ratio of current assets to current liabilities and other financial ratios at a desirable level.

C. Preparation. The balance sheet projection should be maintained for periods coinciding with those of the operating budget. It should be prepared in substantially the same form as the balance sheet except that it may be condensed to show only the more significant items. If other budgets discussed in this chapter are regularly prepared, very little additional effort will be required for preparation of the balance sheet projection since most of the projected items have already been ascertained. Only a few additional items such as prepaid expense must be projected. Accounts receivable are estimated by adding to the opening balance the amount of estimated sales on account, less estimated collections during the period. Similarly, other balance sheet items are projected based on data contained in the operating, cash, and capital expenditure budgets.

D. Use of Financial Ratios. Financial ratios referred to in the following paragraph should be used in the analysis of the balance sheet projection. Comparisons of desired financial ratios with projected ratios may result in modification of operational plans and budget elements.

C0208 MANAGEMENT OF WORKING CAPITAL

A. General. Working capital management includes the following terms:

1. Current Assets. Cash and other assets that may reasonably be expected to be realized in cash, sold or consumed, within 1 year through the normal operations of the business. In addition to cash, the assets usually found in this group are accounts receivable, loans receivable, merchandise inventory, short-term investments, and prepaid expenses. They are customarily

listed in order of liquidity, which is the order of their expected conversion to cash.

2. Current Liabilities. Debts that in the ordinary course of business will be liquidated within a year such as accounts payable, loans payable, salaries and wages payable, and collections received in advance for which goods or services will be given within a year.

3. Working Capital. The excess of current assets over current liabilities.

4. Fixed Capital. That portion of total capital (additional to working capital) consisting of relatively permanent assets acquired for use in the conduct of the business. Such capital is not intended for disposal in the ordinary course of events, and includes items such as furniture, fixtures, equipment, and building improvements.

B. Flow of Working Capital. Upon establishing a business, cash may comprise the total capital. A part of cash is invested in fixed assets such as equipment, furnishings, building improvements, etc. The remainder is retained in part as cash to meet operating expenses, and in part to purchase goods as the stock in trade. These goods are sold and converted into cash or accounts receivable, which are ultimately collected in cash, to complete the working capital cycle. Each time the cycle is made, from cash to goods to cash, it should yield a return. A constant and rapid circulation (cycling) of working capital is desirable to compound the yield and increase the return, in relation to the amount of working capital required.

C. Administration of Current Assets.

1. Cash. A cash balance on hand and in banks should be maintained at the minimum amounts required for change funds, petty cash and payables due in the next succeeding month. Additional amounts not used in current operations should be

invested in securities redeemable when cash is desired, and yielding maximum interest.

2. Receivables. The volume of receivables is determined by sales and credit policies and by the effectiveness of collection of outstanding accounts. The efficient collection of receivables is a vital part of working capital management. Laxity in this regard may tie up an undue amount of cash otherwise needed as working capital as well as increase losses from bad debts. It may be necessary to impose customer credit limits on accounts that are in excess of a reasonable period or amount.

3. Inventories. Inventory management involves regulation of the size of the investment in goods on hand, the types of goods carried in stock, and turnover rates. The investment in inventory should be kept at a minimum consistent with maintenance of adequate stocks of proper quality to meet sales demand. Increases or decreases in the inventory investment must be tested against the effect on profits and working capital. Standard levels of inventory should be established as adequate for a given volume of business, and stock control procedures applied so as to limit purchase as required. Such controls should not preclude volume purchase of nonperishable items when price advantages may be obtained under unusual circumstances. The rate of inventory turnover is a valuable test of merchandising efficiency and should be computed monthly.

D. Required Working Capital.

1. The following factors generally affect the amount of working capital required:

- a. Turn-over rate of inventories.
- b. Turn-over rates of accounts receivable.
- c. Terms of purchase.

d. Terms of credit sales.

e. Overall expansion.

f. Seasonal variations.

g. Changes in customer strength.

2. The approximate amount of working capital required to operate at a given date, and the amount of working capital excess or deficit, may be calculated as follows:

Current Assets
Less: Current Liabilities
Equals: Working Capital
Less: One Inventory Turnover
Less: Net of 1 Month's Expenses and Revenues from other than Sales Activities
Equals: Working Capital Excess or Deficit

E. Working Capital Ratios. The ratio analysis or working capital can be used by management as a means of checking upon the efficiency with which working capital is being applied. Important ratios for working capital management analysis are the working capital and inventory turnover ratios and the turnover or average collection period for accounts receivable. The behavior of ratios, over a series of accounting periods, is indicative of trends which may signal the need for adjustments in the future. Some of the working capital ratios which may be computed are described below.

1. Capital Ratio. The relationship between current assets and current liabilities is called the current ratio. This ratio measures the ability to pay short term debts and is computed by dividing the total of current assets by the total of current liabilities. Marketable securities, receivables, and inventories may decline in value and there is no certainty as to when they will be converted into cash. On the other hand, current liabilities must

be paid at their face value and at specific dates. It is desirable, therefore, that current assets always be materially in excess of current liabilities. The excess of current assets over current liabilities is also frequently used as an index of current financial condition. It is referred to as working capital or net current assets. There is general rule that a current ratio less than a 2:1 is unsatisfactory. Like most generalities this one is subject to modification in certain specific cases. A ratio that is smaller would indicate that debts may be too high. On the other hand, if the current ratio is too large this means more current assets should be converted to other useful purposes.

2. Acid-Test Ratio.

This ratio is the sum of cash, receivables, and marketable securities (called quick assets) divided by current liabilities. The acid-test ratio is a supplemental measure of liquidity. A ratio of 1:1 indicates that for every dollar of current debt there is available one dollar of quick assets to meet current liabilities. As a general rule, the acid-test ratio should be no less than 1:1. While it is generally desirable that the acid-test be high and improving, it is possible for it to be too high for the good of the business. Cash and most receivables are not earning interest and the return on most temporary investments is not large. Neither too little nor too much working capital is desirable. One of the arts of business management is the ability to determine and maintain the optimum amount of each type of asset.

3. Ratio of Net

Sales to Assets. The ratio of net sales to assets is a measure of the effectiveness of the utilization of assets. Assume that two similar activities have equal amounts of assets but that the sales of one are double the amount of the sales of the other. Obviously, the former is making better use of its assets. In computing the ratio, any long-term investments should be excluded from total assets as they make no contribution to sales. The units of product sold may also be used in place of the dollar amount of sales, if sales can be stated in a common unit. Assets used in determining the ratio may be the total at the end

of the year, the average at the beginning and end of the year, or the average of monthly totals.

4. A c c o u n t s

Receivable Turnover. The relationship between sales volume and accounts receivable is stated as the accounts receivable turnover. It is calculated by dividing net sales on account by the average accounts receivable. The average of the monthly balances of accounts receivable should be used in the computation, as it gives recognition to seasonal fluctuations. When such data are not available it is necessary to use the average of the balances at the beginning and end of the year. Accounts receivable yield no revenue hence it is desirable to keep the amount invested in them at a minimum and the number of turnovers as high as possible. Prompt collection reduces the amount of loss from bad debts. The composition of accounts receivable changes continually during the business cycle. Accounts receivable are increased when charge sales are made and decreased when collections are received. Increases or decreases in the volume of sales will also affect the amount of outstanding accounts. Another method of expressing the result is to divide 365 (days) by the receivable turnover figure to get the average number of days that the receivables were on the books.

5. Merchandise

Inventory Turnover. Most of the observations about receivables discussed in the preceding subsection (d. above) are also applicable to merchandise inventory. Inventory in excess of the needs of the business ties up funds that could be used in other ways to better advantage and may increase the amount of insurance, storage, and other related expenses. There is also added risk of loss through price declines and deterioration or obsolescence of the merchandise. The merchandise inventory turnover rate is computed by dividing the cost of goods sold by the average cost price value of the inventory. If monthly data are not available, it is necessary to use the average of the inventories at the beginning and end of the year.

F. Turnover of Working

Capital. A close relationship exists between sales and working capital. As sales volume increases,

the investment in inventories and receivables increases and therefore, a larger amount of working capital is necessary. The turnover of working capital reflects the extent to which the business is operating on a small or large amount of working capital in relation to sales. This turnover or ratio is composite of number of relationships (inventories, receivables, current liabilities, etc.). These various component elements should be analyzed individually to account for changes from period to period. The turnover of working capital is computed by dividing the net sales for the year by the average working capital.

CHAPTER 3

OPERATIONAL STANDARDSC0301 GENERALC030101 Responsibility.

A. Assistant Secretary of the Navy (Manpower and Reserve Affairs). As the overall policy director for NAFIs, authorizes the establishment of new type activities and assigns their program classification.

B. Program Manager. The program manager, as the administrative manager for morale, welfare, and recreation functions under his command, is responsible for the technical and administrative directives which will:

1. Set forth requirements for establishment of the programs and activities.

2. Insure implementation of budgeting, accounting analysis and evaluation, and auditing.

3. Implement report requirements and time frames.

4. Aid in the preparation of budgets for both appropriated and nonappropriated funds.

5. Specify management policies.

6. Specify formats and provisions of contracts.

7. Implement policies for the disposition of surplus property.

8. Establish policies for purchasing, contracting, investing, administering and protecting assets in accordance with this handbook.

9. Set forth liquidation and closing procedures for disestablishment activities consistent with this handbook.

10. Establish and maintain adequate systems of internal control that provide reasonable assurance that the objectives of internal control are met and reviewed periodically (for all functions; not solely financial management).

11. Establish audit programs and management review cycles for NAFIs under his command.

C. Commanding Officer. Fund administration and supervision are command functions. Consequently, commanding officers have the same responsibility for the proper administration of nonappropriated funds as for any other functional element of their command. Under the technical supervision of the appropriate program manager, and in accordance with applicable directives, the commanding officer has jurisdiction over, and is responsible for, the establishment, administration, operation, and financial condition (including solvency, stability, and dissolution) of NAFIs and will:

1. Direct the activity operation in accordance with policies and procedures set forth by the program manager and as delineated herein.

2. Review and evaluate financial statements and where applicable forward as directed to higher authority.

3. Appoint qualified managers and insure that an advisory group is designated for each morale, welfare, and recreation program to act in an advisory capacity to the commanding officer by observing the

overall operation of the activity and making recommendations to the commander for its improvement. Individuals responsible for either the receipt or disbursement of appropriated funds will not be appointed as a manager or custodian of nonappropriated funds. The custodian/treasurer or Other Membership Associations, such as, flying clubs, rod and gun clubs, etc., should be elected or appointed from the memberships of such activities, subject to the approval of the commanding officer.

4. Budget for appropriated funds which are authorized to support morale, welfare, and recreational activities.

5. Insure that technical advice and assistance in the supervision of activity functions is obtained from other staff members on matters in which they have functional responsibility.

6. Effect corrective action on recommendations made by audit, program managers, and/or advisory personnel.

7. Disapprove any recommendation of the manager/custodian or advisory group which is deemed not to be in the best interest of the Department of the Navy.

8. Ascertain that each activity is being properly administered and its monies and property safeguarded, that all income has been received in full, and insure that all disbursements are made only for authorized purposes.

9. Direct that inventories are taken as required by governing directives.

10. Designate a successor manager:

a. When the manager is absent by order, leave of absence, or any other cause for more than 30 days (and there is no designated assistant), the commander will designate a successor manager and require a

physical inventory to be made in support of a statement of assets. Such inventory will be certified by the manager as correct to the best of his knowledge, and signed as a receipt by his successor subject to such exceptions, if any, as may be noted therein. The signed statement will be retained as a part of the activity's records. In the case of Navy Exchanges, successor managers (Navy Exchange Officers) are appointed by the Commander, Naval Supply Systems Command and relieving procedures are provided by the Navy Exchange Manual.

b. A n inventory of the complete system is not necessary when the manager of a morale, welfare, and recreation activity (consisting of branches which have assigned managers with specific duties and responsibilities set forth in writing by the commander) is relieved at a time other than the normal termination of an accounting period. All cash on hand, however, to include receipts for petty cash and change funds rendered by branch managers, the bank accounts and any property with the central office, will be verified by both parties and invoice and receipt accomplished.

c. Unless there is an assistant manager, an acting manager will be appointed by the commanding officer when a manager is to be absent from duty for a limited period of 5 to 30 days. The acting manager becomes responsible by signed receipt for all assets as shown in the records as of the transfer date, subject to confirmation within 30 days thereafter. In the case of Navy Exchanges, an acting Navy Exchange Officer is designated by the commander as provided by the Navy Exchange Manual.

D. Manager. The manager as a direct representative of the commanding officer exercises executive control over the morale, welfare, and recreation function and is charged with the following responsibilities and specific duties and will:

1. Receive, and safeguard monies and other assets in accordance

with this handbook and other applicable regulations, directives and/or manuals.

2. Cause to be put into effect all management policies as directed by the program manager, the commanding officer, and other competent authorities.

3. Employ, train, supervise, and discharge personnel, and establish rates of pay and working hours, subject to the approval of the commanding officer, minimum wage legislation, and DOD wage surveys,

4. Establish a continuous training program for all personnel.

5. Develop, implement, and maintain an internal control system in accordance with this handbook.

6. Be financially liable for losses of monies and property when his dishonesty, fraud, or culpable negligence is established.

7. Insure the adequate protection of cash (including bank deposits) and proper investment of monies is in conformity with this handbook and applicable directives issued by the program manager. (see Appendix B).

8. Prepare necessary budgets in accordance with this handbook and as prescribed by the program manager.

9. Insure that inventories are taken as required by governing directives.

10. Be responsible for all purchasing and contracting and insure compliance with SECNAVINST 7043.5(series) and other pertinent directives.

11. Be responsible for all financial operations of the activity to include all income-producing or service functions.

12. Insure that each fund maintained in support of a retirement program is regularly reviewed by one or more qualified actuaries.

C0302 APPROPRIATED AND NONAPPROPRIATED FUNDS

C030201 Guidance. Guidance for the use of appropriated and nonappropriated funds support to military morale, welfare, and recreation (MWR) programs and activities is contained in NAVCOMPT Man. Vol 7. Base Comptrollers will prepare budgets for annual appropriated and nonappropriated fund support for morale, welfare and recreation programs in accordance with major claimant guidance consistent with the fund use rules prescribed and annual budget guidance provided in NAVCOMPT Notice 7111.

C030202 Use of APF. As prescribed on NAVCOMPT Man. Vol.7, appropriated funds may be used to provide support to morale, Welfare and Recreation Programs. The following outlines procedures used in accounting for appropriated fund support to morale, welfare and recreation activities.

A. Comptrollers will issue quarterly/yearly operating targets (OPTAR) to each Morale, Welfare and Recreation program manager permitting obligation of appropriated funds within the specified monetary limits.

B. The morale, welfare and recreation manager will initiate typical obligating documents (such as travel orders, DD Form 1348's, purchase orders, labor cards for Appropriated fund paid morale, welfare and recreation employees, etc.) when intending to directly cite OPTARED appropriated funds.

C. Order for Work and Services (NAVCOMPT Form 2275) may be issued against unobligated OPTAR balances to morale, welfare and recreation activities to cover anticipated reimbursements of nonappropriated fund costs by appropriated funds for authorized support. The NAVCOMPT Form 2275 should be issued in an amount based on estimated

reimbursement needs and carry an expiration date consistent with the OPTAR. The issuing activity must assign a Navy Standard Document Number to the NAVCOMPT Form 2275 and upon its acceptance, have it recorded as an obligation in the appropriated accounting records. The total OPTAR availability includes both the direct cite obligations and the anticipated reimbursements obligated under the NAVCOMPT Form 2275 (See Appendix C-2).

D. An APF entity may contract with the NAFI for services, functions, or goods that the NAFI is in the unique position to provide. Work and services must be processed by contract, activities will no longer be able to use reimbursable orders to pay for goods or services provided by NAFI.

E. At year-end, base comptrollers prepare reports of appropriated fund support to morale, welfare and recreation activities in accordance with this appendix.

F. When morale, welfare and recreation activities request supplies and services as authorized by NAVCOMPT Manual, Volume 7, they may use NAVCOMPT Form 2275 Order For Work and Services. The requesting MWR activity must completely fill the applicable blocks on NC Form 2275 except that block 12 will be annotated to indicate that the order is to be paid by nonappropriated funds. When an MWR activity requests work and services using Operating Target (OPTAR) appropriated funds, block 12 of NC Form 2275 will be annotated with applicable appropriated accounting data. In both cases, billings will be sent to the activity indicated in block 11.

C0303 FRAUD OR OTHER DISHONEST ACTS. Any employee or person connected with a morale, welfare, and recreation activity will report to the proper authority any suspected misappropriation, embezzlement, larceny or robbery of property or funds, or other improper matter for action in accordance with Article 1139, U.S. Navy Regulations, 1973 and applicable instructions.

C0304 INSURANCE

C030401 Self Insurance. The Comptroller General has consistently held that unless otherwise provided by law, appropriated funds are not available for insurance of government property as the government is a self insurer. This prohibition does not extend to nonappropriated funds used to insure nonappropriated fund purchased property. One of the most effective means of protecting assets is through insurance. Certain insurance coverage is mandatory while other types of protection are at the option of the fund or as specified by the program manager.

C030402 Morale, Welfare, and Recreation Activity Insurance Requirements. Activities will normally carry as a minimum the following insurance:

A. Worker's Compensation as required by state and territorial laws, and in the employment of foreign nationals as required by local laws. Where no provisions for worker's compensation are applicable, employer's liability insurance shall be provided.

B. Group life and comprehensive medical/health insurance.

C. Property insurance, including fire and extended coverage, sprinkler leakage, robbery, theft, and securities coverage. When the insurable value exceeds \$10,000 it will be provided by commercial insurance or on a self-insurance basis. Insurance may be provided on an optional basis for insurable values of less than \$10,000.

D. Bodily injury and property damage liability insurance (general and automobile) will be provided by commercial insurance or on a self-insurance basis.

E. The methods by which assets are protected will encompass sound risk management principles that will satisfy all applicable insurance laws (both domestic and foreign) while providing the broadest most cost-effective protection available.

F. Amounts of coverage and the techniques of handling risk of loss should be based on risks involved in transactions not protected by internal control procedures and as may be determined by the program manager and/or commanding officer.

G. A plan to provide funding for retirement payments. Program Managers will ensure that retirement plans are funded in accordance with sound actuarial principles. Independent external actuarial review is required every two years. Also required is an examination by a certified public accounting firm during scheduled audits every two years.

C030403 Concessionaire Insurance Requirements

A. Adequate Insurance Coverage. Morale, welfare, and recreation activities which carry on business through concessionaires within the United States will provide in their contracts that adequate worker's compensation, employers' liability, bodily injury and property liability insurance will be carried to protect the interest of the concessionaire, the activity, and the Federal Government. In overseas areas concessionaire contracts will provide that the concessionaire will comply with the local laws or customs of the country or political subdivision in which the concession is located.

B. Named As Additional Insured. With respect to bodily injury and property damage liability insurance, the concessionaires contract must contain a clause which provides that the activity concerned and the United States of America are named as additionally insured parties, in addition to the concessionaires. The activity will obtain from the concessionaire, a certificate of compliance, signed by the insurer, which clearly indicates that the type and amount of insurance stipulated in the agreement, has been issued to the concessionaire.

C030404 Performance Bond. Contractors or vendors under contract for construction or for

the furnishing of supplies or services may be required to post a collateral or performance bond in order to protect the activity from loss by insuring the fulfillment of such contract.

C030405 Insurance and Federal Tort Claims. Procedures for processing insurance and tort claims will be in accordance with JAG Manual, Chapters XX and XXIII.

C0305 CONCESSION OPERATIONS AND CONTRACTS

C030501 Direct Operation. So far as practicable, all facilities, services, and functions should be a direct operation. Where circumstances would preclude realizing comparable service and a reasonable financial return, contractual agreements may be entered into between individuals or commercial organizations and activities with the consent of the commanding officer and/or program manager.

C030502 Utilities. A concessionaire is responsible for payment of the cost of all utilities in connection with his operations. Where utilities are furnished by the Government on a reimbursable basis, charges will be made in accordance with NAVCOMPT Manual, Vol. 3, Chapter 7, Part D or Navy Industrial Fund Procedures, as applicable and NAVCOMPT Manual, Vol. 7 paragraphs 075260 and 075261.

C030503 Policies. Policies regarding the control of concessionaire operations are prescribed in SECNAVINST. 7043.5A(series).

C030504 Commissions. Commissions from concessionaires to the nonappropriated funds will be based on a percentage of sales.

C0306 AUDIT AND INSPECTION

C030601 All Levels. Activities at all levels of command are subject to audit and/or inspection. Activity managers will cooperate with auditing and inspecting personnel. Mishandling of nonappropriated funds and property, and violations of standards of conduct in connection therewith, will be referred to the

commanding officer, and when deemed appropriate, to the Naval Investigative Service. Irregularities of a potentially serious nature will be reported through command channels to the Assistant Secretary of the Navy (Financial Management).

C030602 Audited Annually. Activities will normally be audited annually or as directed by the program manager whenever circumstances warrant and directives require such action in discharge of his responsibility.

C030603 Policies Regarding Audit. Policies regarding the audit of nonappropriated funds and related activities are prescribed in SECNAVINST 7510.7C(series).

C0307 RECORDS MANAGEMENT

C030701 Records Maintenance And Disposition. All records pertaining to the administration of nonappropriated funds will be maintained and disposed of in accordance with SECNAVINST 5212.5C(series).

C030702 Audit Trails. Computerized records are authorized so long as the required data are maintained and necessary audit trails are established.

C0308 LIQUIDATION AND CLOSING

C030801 Liquidation. Upon receipt of notification that an installation and/or activity is to be inactivated or placed in a standby status, the program manager, major claimant and the commanding officer will take such action as is deemed necessary to preclude careless or extravagant expenditure of assets prior to the dissolution of the fund. During the period between proposed inactivation and actual closing, disbursements will be limited to normal essential expenses, future commitments canceled, and the contractual agreements canceled or renegotiated when necessary. These responsibilities and procedures will apply also in the event a fund is dissolved for reasons other than inactivation of an accomplished: Applicable detailed liquidation procedures for exchanges are contained in the Navy and Marine Corps

Exchange Manuals. Applicable detailed liquidation procedures for morale, welfare and recreation funds are provided by the program manager.

A. Question all creditors, past and present, to determine whether any liabilities exist and accordingly liquidate any outstanding payables.

B. Collect all accounts receivable, or charge off to operating expenses those found to be uncollectible.

C. Obtain settlement of all transportation and insurance claims owed to the activity.

D. Remit final withholding tax and social security payments and furnish employees with statements of earnings and deductions.

E. Convert all Government securities into cash. (Note: Some Government securities require time notices before redemption.)

F. Advise the depository to forward final bank statement to the applicable program manager, cognizant auditor, or other designated authority, as appropriate.

G. Perform a terminal audit of the activity.

C030802 Time Period. Within 60 days subsequent to receipt of notification to which reference is made in C030801 above, all outstanding payables will be liquidated and monies remaining forwarded as directed by the program manager.

C030803 Disposition of Property and Records. Upon the disestablishment of an activity the property and records thereof will be disposed of in the following manner unless otherwise prescribed by the program manager:

A. Merchandise may be sold to other activities or returned to vendors for credit, if possible.

B. Transfer merchandise and property to other activities as prescribed by the program manager. Receiving activities will be responsible for payment of all expenses incident to packing, crating, and movements of merchandise of property.

C. All records and related correspondence remaining after the terminal audit will be forwarded to the major claimant for subsequent forwarding to the nearest Federal Records Center.

C030804 Final Disposition of Residual Assets. Upon final dissolution, all residual assets which remain after the transfer of monies cited above, including proceeds from sale of property and merchandise, will be forwarded promptly by check as directed by the applicable program manager. Residual assets will be accompanied by a certified copy of the terminal audit of funds and, if appropriate, by notation of corrective actions taken hereon. Fixed asset disposal entries are normally based on the book values existing at the close of the last month of business operations for the dissolving NAFI and not the last month of the NAFI's existence as a fiscal entity, ie., a fixed asset is not depreciated over the final accounting periods required for liquidation and closing if normal business operations have ceased and the fixed asset is no longer being used or providing service.

CHAPTER 4

UNIFORM CHART OF ACCOUNTSC0401 GENERALC040101 Uniform Chart of Accounts.

A. This Chapter establishes a uniform chart of accounts for recording transactions of all nonappropriated funds within the Department of the Navy with exception of those accounted for by the Navy and Marine Corps Exchange Systems. All NAFIs participating in the (RAMCAS) shall use the chart of accounts listed in the RAMCAS Users Handbook. All classes of transactions are normally first entered in books of original entry and subsequently posted to the ledger accounts.

B. Each type of account coding is listed, described, and categorized in paragraphs 401 and 402. Subclassifications may be established where needed provided all such subclassifications are standardized at the program manager level.

C040102 Schedule of Accounts.

A. To classify the accounts in an orderly manner in accordance with a definite plan for control of operations and facilitate analysis of operating results, a series of three digit account numbers has been assigned to the following major classifications appearing in the general ledger.

Account Categories

<u>Series</u>	<u>Category</u>
100	Assets
200	Liabilities and Net Worth
300	Sales Income
400	Cost of Sales
500	Activity Income
600-700	Operating Expenses
800	Other Income
900	Other Expense

C0402 UNIFORM CHART OF ACCOUNTS.

General ledger accounts will be numbered and titled to conform to the below Uniform Chart of Accounts. These accounts are numbered in such a manner as to provide for the uniform addition of subaccounts by program managers. For example, account 100 Cash can be expanded with 101 Concentration Bank Account; 108 Imprest Bank Account-Payroll; 114 Petty Cash; etc. Program managers will also assign two-digit individual Activity/Department Codes to asterisked accounts so that they are uniform for each morale, welfare, and recreation program category. Some activities will need only a minimum number of accounts to maintain their records in an adequate manner, whereas, large funds may necessarily need to augment the number of accounts listed. Program managers may assign additional detail accounts not otherwise prescribed by this handbook that are consistent with its accounting policies. Requests for approval of any deviations will be submitted to the DFAS-HQ via the appropriate program manager.

ASSETSCURRENT:

100	Cash
120	Investments
130	Inventories
*150	Receivables
160	Prepayments

NON-CURRENT:

170	Fixed Assets
171	Vehicles/Aircraft
173	Furniture, Fixtures, and Equipment
175	Buildings and Facilities
177	Building and Facilities Improvements

178	Construction in Progress
180	Accumulated Depreciation
181	Vehicles/Aircraft Depreciation
183	Furniture, Fixtures and Equipment Depreciation
185	Buildings and Facilities Depreciation
187	Building and Facility Improvements Depreciation
190	Other Non-Current Assets

LIABILITIES AND NET WORTHCURRENT:

200	Accounts Payable
210	Salaries and Wages, Personnel Benefits and Taxes Payable
230	Allocations
240	Loans Payable
250	Unearned Income
260	Other Current Liabilities

LONG-TERM:

270	Loans Payable (Long Term)
280	Other Long-Term Liabilities
290	Net Worth
291	Net Worth Beginning of Fiscal Year
293	Net Income (Loss)
295	Transfers In
297	Transfers Out
299	Distributions

INCOME AND EXPENSESSALES INCOME:

*300	Sales Revenue
*310	Sales Returns and Allowances

COST OF SALES:

*400	Cost of Sales
------	---------------

ACTIVITY INCOME:

*500	Participation Fees and Charges Revenue
530	Dues and Assessment Revenue
550	Mission Support Revenue
560	Distribution Revenue
590	Concessionaire Revenue

OPERATING EXPENSES:

*600	Salaries and Wages
*620	Personnel Benefits
*640	Utilities and Rents
*660	Communications
*680	Maintenance and Repair (incl. Minor Construction)
*700	Supplies and Equipment (Expense Type)
*720	Transportation of Persons
*730	Transportation of Things
*740	Common Services
*760	Depreciation
*780	Other Operating Expenses

OTHER INCOME:

800	Interest Income
810	Miscellaneous Income
890	Extraordinary Income

OTHER EXPENSES:

900	Interest Expense
910	Miscellaneous Expense
950	Late Payment Penalty Expense
990	Extraordinary Expense

CLEARING ACCOUNT:

999	Profit or Loss Clearing Account
-----	---------------------------------

*Requires 2-digit individual
Activity/Dept. Codes
Use Code 99 for G&A Indirect Expenses.

C0403 DESCRIPTION OF GENERAL
LEDGER ACCOUNTS

A. This paragraph describes the accounts within the General Ledger structure and explains the purpose for which each type account is normally used. Accounts herein are

described only to a three-digit level. Program managers may assign and describe additional specific detail accounts not otherwise prescribed by this appendix.

100 CASH. This series of debit balance asset accounts is used to record cash balances, such as checking accounts; savings accounts; petty cash; change funds; etc. Accounts maintained in foreign currencies must be converted to equivalent U.S. dollars for financial statement reporting purposes.

120 INVESTMENTS. This series of debit balance asset accounts is used to show the value of temporary interest bearing investments, such as certificates of deposit; federal securities; etc.; that will be converted back into cash within one year. Supporting securities registers will be maintained to record details as to cost, purchase date, yield, maturity date, and other pertinent information.

130 RECEIVABLES. This series of debit balance asset accounts is used to record amounts which are owed to an activity and are expected to be collected within one year, such as accounts receivable-customers; accounts receivable-dues; accounts receivable-returned checks; commuted rations; etc. Subsidiary accounts identifying amounts owed by individual debtors are maintained in support of these control-type accounts. When receivables are subsequently paid, this series of accounts is credited and cash recorded in the appropriate 100 series of accounts.

150 INVENTORIES. This series of debit balance asset accounts represents the monetary value of various types of merchandise on hand. The balance of warehouse/central storeroom control accounts must be in agreement with detail stock record cards. Differences between control totals in these central accounts and official physical inventories are adjusted to inventory shortages/overages accounts as General & Administrative expenses (Activity/Dept Code 99). Retail inventory accounts will be identified with program manager assigned 2-digit Activity/Dept codes uniform within the MWR category. Departmental

inventory account overages/shortages are adjustment to cost of sales accounts.

160 PREPAYMENTS. This group of debit balance asset accounts is used to record the unused or unexpired portion of items other than fixed assets whose benefit extends beyond the current accounting period such as prepaid supplies; prepaid insurance; advances; etc.

179 FIXED ASSETS. This series of debit balance asset control accounts is used to record the cost value of fixed assets of durable or costly nature that have been purchased with nonappropriated funds. Detail property record cards will be maintained for each asset item in support of the value of these accounts. (Excepting Acct. 178). Designated accounts (171-177) group assets into depreciable life span groupings (See para. 572). Account 178 is used to accumulate the capitalized value of construction in progress until an item is financially complete. The value is transferred to account 175 or 177 as appropriate.

180 ACCUMULATED DEPRECIATION. This series of credit balance control asset accounts is used to record the total accumulated depreciation on the assets recorded in the 170 series of accounts to show their diminished value due to usage, obsolescence, or passage of time. These accounts are credited with the amount of depreciation charged to operations during an accounting period.

190 OTHER NON-CURRENT ASSETS. This series of debit balance asset control accounts includes interest bearing investments that will be converted back into cash for more than a year and other receivables owed to an activity but not due or collectible within one year. This series of accounts also includes investments established to fund reserves for acquisitions to be made more than a year in the future. Subsidiary accounts or registers will be maintained in support of these control accounts.

200 ACCOUNTS PAYABLE. This series of credit balance liability control accounts is used to record amounts owed trade creditors or organizations for goods or services received

which will be paid within a year in the normal course of business. Also included are accounts for customer security deposits; payables due employees; collections due U.S. Treasury; assessments payable (e.g., on slot machines); etc. At the end of each accounting period supporting schedules and subsidiary ledger accounts will be reconciled to these accounts.

210 SALARIES AND WAGES, PERSONNEL BENEFITS, AND TAXES PAYABLE. This series of credit balance liability accounts is used to record the amounts for salaries, wage, and annual leave earnings of employees that have been accrued but not paid at the end of an accounting period. Accrued payroll and leave schedules will be prepared to support entries to these control accounts. Also included are accounts used to record accrued payroll related expenses such as taxes withheld or other amounts deducted from employees wages to pay for a variety of benefits. Employer contributions owed for any of these taxes or programs are included in the appropriate account with the employee portion.

230 ALLOCATIONS. This series of credit balance liability accounts is used to record the amount of monies held but available to be drawn upon by another activity such as for the use of units which are not authorized to maintain separate recreation funds. The value of funds allowed to activities is credited to these accounts with a debit to prepaid expenses and individual account amounts are supported by subsidiary records. As expenditures are made, by/or in behalf of the units, cash is credited and these accounts and the supporting subsidiary balances are decreased. An equal portion of the deferred (prepaid) expense is credited and an applicable program expense account is charged.

240 LOANS PAYABLE. This series of credit balance liability accounts shows the amounts owed on loans and notes which will be paid in full within one year. For payables with terms of more than a year, only the portion to be paid in the current year will be recorded in these accounts and the remainder of the liability will be recorded as a long-term payable in the 270 account series.

250 UNEARNED INCOME. This series of credit balance liability accounts is used to record amounts of dues, deposits, or other collections accepted in advance but not yet earned. As amounts are earned, they are transferred to an income account. Subsidiary records are maintained to determine the source of prepayments and when amounts will become earned.

260 OTHER CURRENT LIABILITIES. These accounts are used to classify and record amounts of other current short-term payables not categorized or described by any of the above specified liability accounts (e.g., bonuses).

270 LOANS PAYABLE (LONG TERM). This series of credit balance liability accounts represents the amount owed on loans and notes which are not due to be paid within one year. The portion of any of these payables that is to be paid within one year will normally be recorded as a current liability in an account in the 240 series.

280 OTHER LONG-TERM LIABILITIES. These accounts are used to classify and record amounts of long-term payables other than loans, such as retirement and severance allowances; unearned income/dues; advance collections; etc.

290 NET WORTH. This account series is limited to the recording of retained equity; net income (loss); entries associated with establishments, disestablishments, or consolidations of funds; and the distribution of capital (dividends/distributions) by Category C-Business Activities. The periodic closing of the nominal accounts (300 through 900 series of accounts) is made to account 293.

300 SALES INCOME. This series of credit balance income accounts is used to record revenues earned from the sale of merchandise. Two-digit individual Activity/Department codes are maintained for each retail activity/function (such as dining, hobby shop, bar, wine sales, etc.) with related cost of sales accounts in the 400 series, related inventory accounts in the 150 series, and related direct expense accounts in the 600-700 series; suffix codes 00 through 98. Sales

returns are recorded separately in the 310 account and not netted against the 300 sales revenue account for fuller disclosure of gross and adjusted sales revenue.

400 COST OF SALES. This debit balance account is used to record the cost of resale merchandise sold. Separate two-digit Activity/Department codes are maintained relating to each resale income account in the 300 series. The cost of free meals furnished to employees will not be charged to cost of goods sold but charged as either a direct or G & A expense in the 620 account series.

500 PARTICIPATION FEES AND CHARGES REVENUE. This series of credit balance income accounts is used to record use, rental, participation fee, or admissions revenue for various sports, recreation or other program services. Separate suffix accounts are assigned with related direct expense accounts in the 600-700 series.

530 DUES AND ASSESSMENT REVENUE. This series of credit balance income accounts is used to record revenues derived from membership dues and interfund assessments levied on particular activities (such as a percentage of slot machine or mess sales/profits, consolidated accounting offices revenue earned through the performance of services, etc.)

550 MISSION SUPPORT REVENUE. This series of credit balance income accounts is used to record revenues earned from the performance of appropriated funded mission responsibilities (janitorial services for common areas, etc. which are other than reportable morale, welfare, and recreation support costs by appropriated funds).

560 DISTRIBUTION REVENUE. This series of credit balance income accounts is used to record regular recurring revenue derived by a distribution or transfer from other units (such as exchange profit distributions, cafeteria allocations, package store profits) and/or central fund transfers or grants to field activities. It is deemed to be income to the recipient as distinct from amounts (such as initial establishment

capitalizations) creditable as direct increases to net worth in the 290 series of accounts.

590 CONCESSIONAIRE REVENUE. This series of credit balance income accounts is used to record revenues earned from concessionaire agreements of sales functions contracted out vice performed in-house, such as tour desk, ticket services, cafeteria concessions, etc.

600-799 OPERATING EXPENSE. These debit balance expense accounts are used to record by type the direct and/or indirect nonappropriated fund costs of operations (based upon the nature of the services, articles, or other items involved). They parallel appropriated fund classifications and definitions described in DODI 7000.12(series), Financial Management of Morale, Welfare, and Recreational Activities and are structured to meet its reporting requirements. These accounts require the use of two-digit suffix codes 00 through 98 for identifying them as direct activity/department operating expenses. Suffix code 99 is assigned to identify indirect (G&A) operating expenses within these series classifications. Where expenses can be identified to a particular activity/department, they must be recorded as a direct expense.

600 SALARIES AND WAGES. This series includes the NAF cost of personnel compensation such as regular salaries and wages, overtime pay, severance pay, differentials for service abroad, and contract labor. (Excludes costs that are reported under another expense caption e.g., maintenance and repair labor).

620 PERSONNEL BENEFITS. This series includes payroll related costs of benefits and employer contributions for payroll taxes life insurance/health insurance/retirement contribution costs, awards, employee meals, cost of living allowances, relocation expenses of employees, etc.

640 UTILITIES AND RENTS. This series includes the cost of heat, light, power water, gas, electricity, steam and other utility services exclusive of transportation and communications services. Includes rental of equipment (except transportation equipment) and rental of real

property and charges under Purchases Rental Agreements for equipment prior to the time that the title to the equipment is acquired.

660 COMMUNICATIONS. This series includes charges for the transmission of messages, postal charges, (other than parcel post), messenger service, teletype service and telephone service including installation charges and use of telephone instruments and switchboards.

680 MAINTENANCE AND REPAIR (INCL. MINOR CONSTRUCTION). This series includes expenses for the maintenance and repair of equipment, facilities, and real property purchased through commercial contracts or base civil engineers. Maintenance and repair performed in-house will include direct labor and materials. Overhead allocation for G&A expense (supplies, miscellaneous materials, equipment usage) will only be allocated where such is necessary to prevent a gross underestimation of maintenance and repair costs. Minor maintenance and repair not separately identified as a maintenance and repair expense need not be allocated to this expense element series as long as such costs are included under other expense series of accounts (such as salaries, supplies, etc.). Minor construction costs are expensed in these accounts only if less than amounts to be capitalized and reported in the Fixed Assets series of accounts.

700 SUPPLIES AND EQUIPMENT (EXPENSE TYPE). This series includes costs (other than significant maintenance and repair supplies) of operating supplies (e.g., china, glassware, silver, linens, uniforms, and kitchen utensils), equipment, printing and duplicating, and materials ordinarily consumed in use, such as sports gear, office supplies, fuels, punched cards and checks, subscriptions, hand tools, etc. Includes expensed materials used to form a minor part of equipment or fixed property (such as repair parts).

720 TRANSPORTATION OF PERSONS. This series includes charges (such as commercial transportation fares, rental cars fees, per diem allowances, mileage allowances, tolls, charges for

use of passenger carrying vehicles, etc.) for temporary duty (TDY) and permanent change of station (PCS) travel and subsistence for travelers conducting MWR program functions.

730 TRANSPORTATION OF THINGS. This series includes charges (such as those common carriers, parcel post, drayage, cartage, transportation of PCS household goods, rentals of truck and transportation equipment, etc.) for the transportation of things and for the care of such things while in the process of being transported for MWR programs (Where feasible such freight-in costs should be included in Resale Inventory or Fixed Assets accounts).

740 COMMON SERVICES. This series of expenses includes charges received from MWR Support Service Offices by any other benefiting category MWR for such services as accounting, procurement, personnel support, etc.

760 DEPRECIATION. This series includes the annually expiring cost value of fixed assets capitalized in the 170 account series. Expenses charged to these accounts are aligned to the various 180 series of accounts - Accumulated Depreciation.

780 OTHER OPERATING EXPENSES. This series includes all other charges for direct or indirect operating expenses not classifiable in any of the above 600-779 series of accounts (e.g., inventory shortage/overages, spoilage, uncollectible accounts, advertising, insurance premiums, etc.).

800-890 OTHER INCOME. These credit balance accounts are used to record sundry and extraordinary income gained from exceptional nonrecurring nonstandard business operations and not recordable as operating income (e.g., interest income, insurance proceeds, cash overage, bonus merchandise, gains on disposition of fixed assets, income from installation sale of recyclable materials, etc.).

900-998 OTHER EXPENSES. These debit balance accounts are used to record sundry and extraordinary expenses not recordable as direct or indirect operating costs (e.g., lawsuit losses,

fines, cash shortages, losses on disposition of fixed assets, etc.).

999 PROFIT OR LOSS CLEARING ACCOUNT. This account is used to accumulate all revenues and expenses for the purpose of determining the net profit/net loss for an accounting period. After all revenue and expense accounts (nominal accounts) have been closed to this account the final balance is transferred to account 293. A credit balance represents a net profit for the period and a debit balance represents a net loss for the period.

CHAPTER 5

PROCEDURESC0501 TAXES

C050101 General. Taxable wages generally consist of all earnings (regular, overtime, service charges, and reported tips) by an employee for services performed for his employer. Managers should obtain each year a copy of "Employer's Tax Guide, Circular E", and comply with applicable provisions thereof. Other helpful information may be found in the publications "Your Federal Income Tax" and "Tax Guide for Small Business." These publications can be obtained from the Internal Revenue Service. Copies of circular covering state income taxes should also be obtained from appropriate state authorities.

C0502 FEDERAL TAXES

C050201 Reporting And Remittance. Reporting and remittance of Federal taxes will be as prescribed by the Director of Internal Revenue.

A. Federal Income Taxes - Withholding. Withholding taxes are based on the rate established by the Internal Revenue Service and are published in the "Employers Tax Guide, Circular E." Federal income tax will be withheld from nonappropriated funded compensation of civilian and off-duty military personnel employees in conformance with the Internal Revenue Code.

B. Social Security Tax. The Federal Insurance Contributions Act (FICA) tax on wages, imposed by section 3101 of the Internal Revenue Code, will be deducted from the wages of civilian and off-duty military employees; and the excise tax imposed by

section 3111 on employers will be paid on such wages as follows:

1. Within CONUS, Alaska, Hawaii, Puerto Rico, and the U.S. Virgin Islands - on wages of all civilian employees irrespective of their citizenship.

2. Within other areas - on wages of civilian employees who are citizens of the United States.

3. Deduction will be made from the wages of military personnel employed during off-duty hours.

4. Sickness or injury payments made under worker's compensation law or contract insurance or certain employer plan are exempt from Social Security tax. In the absence of an employer's sick pay plan, payments will not be exempt from Social Security tax until the lapse of six calendar months subsequent to the last calendar month the employee worked for the employer. Applicable rates and computation tables are published in NAVCOMPT Manual, Volume 3 Chapter 3, and "Employers Tax Guide, Circular E." Provisions must be made to discontinue deductions when the maximum annual deduction amount has been reached.

5. Social Security taxes should be withheld from the pay of Nonappropriated Fund Instrumentality employees for periods during which they are on sick leave.

C. Federal Unemployment Tax Act - FUTA. It has been determined that employees of Navy paid with nonappropriated funds are considered employees of the Navy for unemployment compensation and are covered by Title XV of the Social Security Act as amended 1 September 1954 (42 U.S.C. 1361 et seq.). Accordingly, filing unemployment tax returns and the payment of unemployment taxes are unnecessary. (See Appendix B concerning the Federal Unemployment Compensation Program for nonappropriated fund paid employees.)

D. Meals, Lodging and Other Facilities. The fair cost of furnishing employees with meals, lodging, or other such facilities, for the convenience of the employees will be considered paid to the employees for purposes of Federal income, FICA, and FUTA taxes. Conversely, the fair cost of furnishing employees such facilities for the convenience of the employer will not be considered wages paid if:

1. In the case of meals, they are furnished on the business premises of the employing NAFL, and

2. In the case of lodging, it is furnished on the business premises of the employing NAFL and acceptance of the lodging provided is a condition of employment.

E. Federal Occupational Taxes. Morale, welfare, and recreation entities located in the continental United States, Alaska, and Hawaii are subject to the following occupational taxes imposed by the Internal Revenue Code. (For the purpose of these type taxes, each category of MWR activity on an installation is subject to the following occupational taxes irrespective of the number of operational locations on the installation.)

1. The tax on a wholesale dealer in beer, imposed by section 5111(b).

2. The tax on a wholesale dealer in liquor, imposed by section 5123.

3. The tax on a retail dealer in beer, imposed by section 5121(a).

4. The tax on a retail dealer in liquor, imposed by section 5121(a).

5. The tax on fuel, imposed by section 4041

6. The tax on heavy trucks, imposed by section 4051

7. All other excise taxes that may be imposed as a result of changes to applicable tax laws.

C0503 STATE, TERRITORIAL, AND LOCAL TAXES

C050301 Immunity. Morale, welfare, and recreation activities of the Navy Department are entitled to immunity from the taxes of states, the District of Columbia, territories and possessions of the United States, the Commonwealth of Puerto Rico, and political subdivisions thereof.

C050302 Income Taxes Withheld From Civilian Employees. Income taxes of states and territories will be withheld from the compensation of all civilian employees whose regular place of employment is within the state or territory, when an agreement exists between the Secretary of the Treasury and the state or territory made pursuant to the Act of 17 July 1952 (66 Stat. 765, 5 U.S.C. 84b, 1952 (17 Fed. Reg. 10131). Upon the request by, and authorization of, a civilian employee not otherwise subject to withholding of pay under these agreements, voluntary withholding of income tax may be made in favor of the state of residence if that state has entered into such a withholding agreement.

C050303 Income Taxes Withheld From Off-Duty Military. State income tax must be withheld from off-duty military employees for the state in which the MWR activity is located. State and local income tax withholding for active military duty will be in accordance with the DoD Pay Manual.

C050304 State W-2. Copy of the W-2 will be filed with the state indicating taxable wages paid.

C050305 Requests for Rulings. Requests submitted to federal, state, territorial, or local authorities, such as pertaining to requests for rulings, interpretations of tax law, and advice as to procedures in tax matters, shall be cleared via official channels with the applicable program manager. Routine inquiries, for tax forms, filing dates, and such general information that do not

affect determination as to particular applicability or construction of tax laws in conjunction with Navy activities may be made directly to the local Internal Revenue Office and need not be cleared via the program manager unless so directed. In states where applicable, personal income taxes will be withheld and submitted as required by that state's law except as noted above.

C050306 Provisions of 4 U.S.C. 5104. Taxes of a state, the District of Columbia, or a territory of the United States upon, or measured by sales, purchases, storage, or use of gasoline or other motor fuels will be collected and paid according to the provisions of 4 U.S.C. 5104.

C050307 Enforcement. Commanding officers will prescribe and enforce necessary controls, including reasonable quantity limitations where appropriate, to insure that restrictions and limitations governing the sale and disposition of state tax-free items are strictly observed. Commanders will cooperate with state tax officials; will investigate all complaints; and will take prompt and appropriate corrective and disciplinary action with respect to any violation or abuse of the tax exemption privilege.

C050308 Report To State or Local Government. State tax office copies of the Internal Revenue Service Form W-2 will be sorted into groups as determined by the residence address of the employee and forwarded with a letter of transmittal to the appropriate address furnished in NAVCOMPT Manual, Volume III, paragraph 033010. In addition to the taxing authorities listed, naval activities are authorized to furnish withholding statements to any other city or taxing jurisdiction which requests such information provided such city or taxing jurisdiction is actually levying a tax on income and provided that the city or taxing jurisdiction will furnish a copy of its ordinance to the activity so it can be determined whether or not any employees are liable for taxes. When an employee is a resident of a state in which compensation for personal services is subject to income tax and is also subject to a tax levied by a city, county, or other taxing unit, extra copies of the Internal Revenue Service Form W-2 should be prepared for the use of the

taxing units. These instructions are not to be construed as constituting a legal interpretation by the Navy Department of an employee's residence for purpose of taxation. The State Tax Office Copy of the W-2 form covering employees residing in a state, city, or any other taxing jurisdiction not listed nor otherwise requesting such information will be destroyed.

C0504 FOREIGN TAXES Activities located in foreign countries, including occupied areas and the Trust Territory of the Pacific Islands, will not pay to, nor collect for, any foreign country or political subdivision any tax unless the United States has consented to such levy collection by treaty, convention, or executive agreement.

C050401 Federal Income Taxes Relating To Guam Or The Northern Mariana Islands (NMI).

A. General.

1. Guam: 48 U.S.C. 1421h provides that Federal income taxes withheld from the compensation of employees of the U.S. Government employed in Guam shall be paid to the government of Guam.

2. Northern Mariana Islands (NMI): 48 U.S.C. 1681 note (P.L. 94-241, Section 703(b)) contains provisions applicable to NMI which are similar to those for Guam.

B. Defining Income Taxes Derived from Guam or NMI. The term "Federal income taxes" is interpreted to include the Federal income taxes imposed upon the compensation of civilian and military personnel of the U.S. Government for services performed in Guam, or NMI. This include the Federal income taxes imposed upon the compensation of those who are employed on a part-time basis.

C. Certifying of Federal Income Taxes Creditable to Guam. All departments and agencies of the Federal Government and service and social organizations associated with a military or civilian morale,

welfare, and recreation entity, having Federal civilian or military employees stationed in Guam or NMI, must certify each calendar quarter the total amount of Federal income taxes withheld from salaries or such employees, to the Commissioner of Internal Revenue, Attn: TX:R:R, Washington, D.C. 20224. Separate certifications will be required for taxes creditable to Guam and those creditable to NMI. The certification(s) may be in the form of a letter, citing as authority for the certification(s) Section 3-4085 of the TFRM (I TFRM 3-4000) and identifying the certifying entity, the employer identification number, the calendar quarter covered by the certification(s), and the dollar amount withheld. The certification(s) should be submitted as soon as possible after the close of the calendar quarter but not later than the end of the month after the close of the calendar quarter covered by the certification(s). The amount shown in the certification(s) must agree with the amount of income tax withheld included in the quarterly Federal tax return of the employer (Form 941).

C0505 T A X R E P O R T I N G PROCEDURES

C050501 Negotiations With Taxing Authorities. Except as consistent with the above paragraphs, all matters involving the attempt to impose taxes upon, or require collection from morale, welfare, and recreation activities by the Federal Government, a state, the District of Columbia, a territory or possession of the United States, the Commonwealth of Puerto Rico, a foreign nation, or any political subdivision thereof, will be reported through appropriate channels in detail prior to payment or collection to either The Judge Advocate General or The Office of the General Counsel as appropriate. Negotiations with taxing authorities will not be conducted by any Department of the Navy Personnel without the express authorization of the Judge Advocate General or The Office of the General Counsel as appropriate.

C050502 1099 Requirement. Activities making payments under personal services contracts aggregating \$600 or more to anyone other than a corporation during a calendar year

will report the aggregate amount paid, the name, address, and the social security account number of the recipient of such payments on IRS Form 1099. Contracts with entertainers are within the definition of a personal services contract. If an employee, to whom wages or salaries are paid and reported on IRS W-2, also engages in a personal services contract with his employing activity and receives compensation under such contract, it is the responsibility of the activity to report on IRS Form 1099 the total of such contractual payment (even though less than \$600) if the combined total of the wages and the contract compensation was \$600 or more in the calendar year.

C050503 Prizes and/or Awards. Individual prizes and/or awards which total \$600 or more will be reported on IRS Form 1099. One-game winnings of \$1200 or more from a bingo game or slot machine will be reported on IRS FORM W-2G.

C050504 IRS Forms 1096, W-2G, and 1099. Returns made on IRS Forms 1096, W-2G, and 1099 for a calendar year will be filled on or before 28 February of the following year with the appropriate Internal Revenue Center. In addition, a copy of IRS Form 1099 and W-2G will be sent no later than 31 January of the year following payment by the activity to the individual who rendered services or received awards or winnings.

C050505 Collection, Reporting and Payment. Managers must collect, report, and promptly pay all taxes required by law when due.

C0506 CASH

C050601 General. Cash includes: petty cash funds, change funds, bank accounts, and cash receipts. Purpose, policy, and procedure for use of cash are set forth in this part. Cash receipts are covered in paragraph C050702 of this chapter.

C050602 Petty Cash Fund.

A. Imprest Fund. Where a volume of small cash purchases is necessary, a petty cash fund operated under the imprest method may be established to be used for small payments, not to exceed \$150 for any one transaction (\$300 for emergency conditions). Petty cash funds shall not be used for payment of employee's or entertainer's wages. All other purchases shall be processed using purchase orders or contracts. Splitting of purchases to circumvent the limitation is prohibited. The commanding officer will authorize in writing the establishment of this fund, if needed, and specify the amount authorized. The manager will determine the Individual responsible for the petty cash fund.

B. Reimbursement. The amount of cash on hand plus the total of authorized paid petty cash vouchers must always equal the amount shown in the petty cash fund account. For example, the petty cash fund has been established in the amount of \$200.00. The fund is inspected at month end and \$151.25 in cash and vouchers totaling \$48.75 are found. To reimburse the petty cash fund a check for \$48.75 would be written. Thus, at all times cash or cash plus vouchers will equal \$200.00. Before reimbursement is made, the vouchers are examined and it is determined which expense accounts are to be debited. If expenditures were made for minor repairs \$20.75, supplies \$8.00, and miscellaneous expense \$20.00, the following entry would be required:

680-XX	Maintenance and Repair	\$20.75
700-XX	Supplies	8.00
780-XX	Other Operating Exp	20.00
100	Cash	\$48.75

NOTE: The credit goes to cash, not to petty cash.

C. Establishment. Establishment of this fund and replenishment thereof will be made by checks drawn on the regular checking account. The individual responsible for the petty cash fund will obtain signed receipts for all funds advanced. No disbursement will be made from the petty cash fund without a

supporting voucher approved by a responsible official and signed by the person receiving the cash. To prevent alteration, these vouchers should be typewritten, or made out in permanent ink, dated, and the amount written out in full in words, i.e., ten dollars, not \$10.00. Each petty cash voucher will indicate the nature of the expense and be supported by vendor's receipts or invoices where appropriate.

D. Vouchers. Petty cash vouchers will be prenumbered in sequence. This fund will be reimbursed as of the last business day of each accounting period and at any other time when necessary. At the time of reimbursement, the petty cash vouchers shall be examined for possible evidence of fraud and canceled by perforation, date stamp, or some other satisfactory manner so as to prevent their possible reuse.

E. Commingling. Cash receipts shall never be commingled with the petty cash fund.

C050603 Change Fund.

A. Authorizations. The commanding officer will authorize in writing the establishment of each fund, if needed, specifying the amount authorized. The individual responsible for each fund will be determined by the manager and designated in writing, specifying the amount each individual is responsible for. The establishment of the change fund will be by check. This fund is established primarily for the purpose of making change. With proper documentation, it may be used to issue refunds. Other expenditures from change funds are prohibited. Should the commanding officer authorize cashing of checks from the change fund, the following information will be placed on the checks: name, rank, current address, social security number, organization, and telephone number. In the case of membership activities, (and for members only not guests) the above information is not required on each check if already on file within the activity. If the person cashing the check is a dependent, the information should be given on the sponsor. As required by the Privacy Act, of 1974, any request

made to an individual for disclosure of a social security number or other personal information must be accompanied by a privacy act statement at all check cashing locations consistent with the following:

"Note to check cashiers: disclosure of social security number and other personal information is mandatory if you wish to cash a check. All information furnished will be used to identify, to this activity, writers whose checks have been returned unpaid. Request for this information is made pursuant to the authority of Title 5, U.S.C., Section 301 and Title 10, U.S.C., Section 5031."

B. Establishment, Operation, Disestablishment. The manager provides each activity cashier with a separate fixed amount change fund and obtains a signed receipt in duplicate from the custodial cashier. When the activity cashier is reassigned or relieved, the custodian returns the change fund and obtains the original of his receipt. To preclude daily turn-in of change funds, a locked box in which to store change until the next duty day may be provided. When this procedure is used, the locked boxes containing cash should be stored in the activity's safe.

C. Employee Checks. Employee checks, including payroll checks, will not be cashed by the issuing activity except when the employee is utilizing the activity as an authorized patron.

D. Change Fund Balance. In keeping with the principle that the place for excess cash is in the bank, the change fund should be in the absolute minimum amount sufficient for normal operations.

E. Audit. The entire change fund must be available for audit and/or verification at all times.

C050604 Cash Counts.

A. Daily Verification. All funds and cash receipts must be verified daily. Surprise counts of all cash receipts and funds in custody of cashiers will be made on a periodic

and at least quarterly basis (the designee must be independent of the cash function). This includes petty cash, change funds, and all cash receipts for deposit on hand. This count will be accomplished during duty hours while the fund is in operation and the cash counted reconciled to the applicable general ledger accounts and the daily activity records. Any checks included in such surprise counts shall be deposited by the counter or under his supervision. The bank should be requested to notify the counter directly if any such checks are returned for insufficient funds.

B. Surprise Counts. This requirement does not preclude additional surprise cash counts by disinterested personnel as may be prescribed by the program manager or the commanding officer.

C. Certification. A dated and signed certification of each cash count will be kept on file for at least one year to attest the fact that this requirement was accomplished.

C050605 Bank/Credit Union Accounts.

A. Purpose. Accounts with a local bank or credit union are primarily established for depositing daily receipts, making disbursements by check and obtaining change.

B. Policy. Local accounts will be established where necessary for each activity in accordance with policies and standards prescribed by the program manager and in accordance with this handbook. These accounts will be carried in the name of the activity. Activities are permitted to open checking accounts with financial institutions that do not return canceled checks.

C. Deposits. All cash receipts will be deposited daily in the bank. Where authorized, refunds and cash prizes may be made from change funds or cash receipts if proper safeguards are instituted with proper documentation. Weekend and holiday receipts will be deposited daily when there is access to a night depository, or if no night depository on the next first business day. Daily activity records

will be prepared daily to substantiate any deposit. When the amount to be deposited is less than \$100 or exception is authorized by the program manager, an activity is permitted to defer the deposit of such small amounts until the amount to be deposited reaches \$100. However, all undeposited receipts will be recorded at month end and be deposited on the last business day of the accounting period. In these cases, only one deposit slip is necessary. The regular deposit slips furnished by banks will be prepared for all deposits made. The activity identification will be indicated on each deposit slip. The original of the deposit slip will be retained by the bank. The duplicate, properly validated by the bank teller, will be returned and attached to the daily activity records.

1. Remote Locations. In instances where the location of the depository precludes daily deposits, a government check will be obtained from the local disbursing officer or arrangements made to purchase money orders from the nearest U.S. Post Office in exchange for cash. The cost of such money orders will be paid from petty cash; not subtracted from the daily deposit amount.

2. Authenticated Receipt. An authenticated receipt shall be obtained from the bank for each deposit and shall be retained on file as part of the official records. Normally, this will be a receipted copy of the bank deposit slip, but it may also be a printed receipt if a machine record system is used by the bank. The receipted copy of the deposit slip shall be signed by the person making the deposit and retained by the activity until the deposit slip/receipt, authenticated by the bank, has been returned and found correct. Cash, or deposits containing cash, shall not be entrusted to anyone for transmittal to banks unless a fidelity insurance bond covers such risks.

3. Receiving Checks. Each activity receiving checks shall insure that the following information is placed on personal checks by the person presenting the check prior to receiving cash or merchandise: name, rank, social security number, organization,

and phone number. In the case of membership activities (and for members only - not guests) the above information is not required on each check if already on file within the activity. If the person cashing the check is a dependent, the information should be given on the sponsor. Immediately upon receipt, checks will be endorsed "For Deposit Only to Account of (Title of Activity)", thereby limiting the negotiability of the instruments.

4. Securing Cash. Cash on hand will be kept in locked receptacles and cash receipts must be physically segregated from petty cash and change funds. Classified material or personal property will not be kept in safes with cash.

5. Signed Receipts. Persons entrusted with cash will obtain signed receipts for funds turned over to other persons. Custodians of cash will be furnished with locked receptacles for the safekeeping of the funds and will be the only persons to have access to such funds.

D. Deposits By Mail. Since cash is not to be deposited by mail, an "Exchange for Cash" check from the local disbursing officer or money order from the local post office will be obtained. This check and personal checks included in the deposit will be listed individually, as required by the deposit slip. Only checks that are payable in U.S. dollars and drawn on banks of the United States will be included in the deposit.

E. Bank Service Charges. In the event a bank levies a service charge, the charge will be debited to a miscellaneous general and administrative expense account.

F. Returned Checks. When the local bank returns a check, the activity will prepare an entry to show the decrease (credit) in the bank account and an increase (debit) to the returned checks account (accounts receivable). The bank should be instructed to mail returned checks directly to the activity manager or his designee, who is independent of the cashier and bookkeeping functions. Returned checks that

remain uncollectible for a 6-month period will be written off (after the manager is satisfied that all efforts to collect the amounts have been made and the commanding officer has approved such write-offs in advance). The general journal entry will be a debit to a bad debt expense account and a credit to the returned checks accounts (accounts receivable).

G. Replaced Or Redeposited Returned Checks. When the returned check is redeposited or replaced by cash or a new check, it will be included in the applicable daily deposit and reported on the daily activity record as a debit to cash and a credit to the returned checks account (accounts receivable).

H. Check Cashing. The program manager will be responsible for prescribing policy for the cashing of checks. Where practicable, arrangements should be made with banking facilities for automatic redeposit of checks returned for insufficient funds the first time. Checks returned as nonnegotiable will be charged to an accounts receivable-returned checks account until subsequent collection or approved for write-off by the commanding officer and/or program manager.

I. Collection For Dishonored Checks. All debts arising as a result of dishonored checks issued to activities or instrumentalities shall be vigorously pursued by the activities or instrumentalities which have been issued the dishonored checks. This vigorous pursuit of the debt must be evidenced by issuing a written demand for payment; by affording the indebted member the due process rights prescribed by Title 37 USC 1007(c); and by assessing of interest, penalties, and administrative costs when permitted by law.

1. Debt Collections. In the case of debts owed by active duty and reserve personnel, notification of the member's commanding officer is also required in most instances. The offset of a member's pay may be undertaken only when all other reasonable collection action has failed. In those instances, the activity or instrumentality which holds the dishonored check will be responsible for

preparing the forms necessary to effect the withholding from their pay and for certifying to the member's disbursing officer that the provisions of the Title 37 USC 1007(c) as applicable, have been fulfilled.

2. Debt Collection From Retirees. In the case of retired and reserve members, this certification should be made to the Navy or Marine Corps Finance Center, as applicable. The disbursing officer or finance center shall be responsible for executing the withholding and for informing the member of the reason for the withholding. Application of the proceeds of the charge will be by either credit to an appropriation or fund or by remittance of a U.S. Treasury check, depending upon instructions furnished to the disbursing officer by the activity or instrumentality.

3. Policies regarding Collection of Dishonored Checks Accepted by Commissaries, Ships' Stores, and Nonappropriated Fund Instrumentalities are prescribed in SECNAVINST 7200.18(series).

C050606 Reconciliation Of Bank/Credit Union Balances.

A. Monthly Reconciliation. A monthly reconciliation will be made between the checkbook, bank statement, and the general ledger cash account. The reconciliation should be performed by a person who is not a check signer and who is independent of the cashier and cash recording functions. This person should receive directly from the bank or credit union a statement and the canceled bank checks or equivalent listings. The standard procedure for reconciling a bank account is as follows:

1. Arrange checks in numerical sequence;

2. Compare checks or listings with list of checks outstanding at close of previous month as shown on the reconciliation statement and with checks issued during the month as shown in the cash disbursement journal, noting all checks outstanding or issued which are not reported or

returned. This comparison should include check number, name of payee, and amount;

3. List by date, number, payee, and amount, all checks which have not been paid by the bank. Stop payment orders should be filed with the bank, or, other appropriate action taken on checks outstanding for more than six months;

4. Determine that any amounts appearing in the previous month's reconciliation as deposits not credited by the bank are shown by the bank as credits on the current month's bank statement. Such credits should be dated within one or two days of the date deposited as shown by the books. Intervals longer than 2 days should be investigated by the reconciler and satisfactorily resolved;

5. Ascertain that all reconciling items other than checks outstanding and deposits not credited by the bank shown in the previous month's reconciliation are accounted for either as corrections by the bank during the current month or by appropriate entry to the general ledger cash account;

6. Compare amounts listed in the cash receipts journal with deposit amounts shown by the bank statements and list any amounts which have not been credited by the bank;

7. Determine what charges and credits, if any, have been made by the bank during the month which have not been entered in the accounting records;

8. If necessary, compare paid checks returned by bank with debits shown on the bank statement; and

9. Summarize the above information on the statement, or a separate sheet attached to the statement.

10. The person who makes the reconciliation will sign it and show the date the reconciliation was completed.

11. Reconciliations should be reviewed, approved, and dated by an official whose duties do not normally include the handling of cash. After such review and approval, appropriate entries in the accounts should be prepared for all reconciling items other than deposits not credited and checks outstanding, unless such items represent errors by the bank. Any such disclosed errors should be reported to the bank immediately for correction.

12. Savings account passbook balances shall be reconciled with the general ledger balance and the bank records each month for the purpose of timely recording of interest earned.

13. Bank statements, the bank reconciliation, canceled checks and credit union listings shall be filed in chronological and/or numerical order as part of the permanent records of the activity.

C050607 Foreign Currency.

A. Prohibited From Speculating. Morale, welfare, and recreation activities are prohibited from speculating in foreign currencies. They may however, acquire local foreign currency in accordance with the NAVCOMPT Manual, paragraph 042552, provided:

1. Currency held in support of construction and severance/retirement liabilities, as approved by program managers, is for the purpose of avoiding or minimizing losses due to currency fluctuations or revaluations;

2. Currency to pay payrolls and related costs is obtained as needed;

3. Currency holdings to pay the cost of supplies and inventories is held to an absolute minimum and does not exceed that amount required for expenditures occurring in a 30-day period. (Program managers may approve the holding of

a 45-day foreign currency requirement under exceptional conditions);

4. Activities shall not have direct access to the disbursing officer's accounts as means of converting any foreign currency into dollars; and

5. Foreign currencies on deposits are in accounts meeting the requirements set forth in this appendix.

B. Investing of Funds in Foreign Areas. If military banking facilities offer substantially less interest, other U.S. banks in the same foreign area may be utilized for the purpose of holding foreign currencies, when authorized under host country law. Factors to consider in making decisions regarding foreign currency include probability of fluctuations, revaluations, and the comparative rate of return on foreign currency holdings as opposed to dollar instruments. U.S. Military banking facilities or other financial institutions designated by the Treasury Department are to be used to hold currencies when authorized under host country law. In the absence of such institutions, funds shall be held in Foreign banks, as designated by the Treasury Department.

C050608 Borrowing Policies. The NAFI program managers will base all borrowing decisions on sound economic and financial management factors for the best possible cost/benefit relationship for both borrower and lender. To the extent funds are not available from within the Navy, interservice borrowing at DOD component level will be considered as an alternative to commercial borrowing. Applicable program managers will establish procedures to consummate interservice borrowing transactions when the services concerned determine that such loans are mutually advantageous.

C0507 INCOME

C050701 General.

A. Income Defined. Income is money or money equivalents (checks, money orders, bank credit cards, e.g., BankAmericard)

earned or accrued during an accounting period. Receipts can take various forms: sales in the various departments, collections for surcharges, collections of accounts receivable, repayment of returned checks, loans received by the activity, etc. In most cases, income will be received by persons designated as cashiers.

C050702 Cash Receipts.

A. Control. Cash receipts require the fullest possible measure of control. Cash receipts of an entity relate to the receipt of currency, coins, checks, bank drafts, and money orders.

B. Records. It is vital that accurate and timely records be kept of cash receipts. Cash receipts accountability applies to money and charge documents. In order to segregate the functions of handling money and cash items and keeping the records, someone other than the bookkeeper prepares a list of departmental receipts. Cash registers will be used if available and feasible and each sale rung up in view of the customer. Employees receiving cash shall not be permitted to work out of an open register drawer. The drawer must be closed after every deposit of cash to insure proper ring-up and prevent pilferage. Where cash registers are not available, sales must be recorded on prenumbered sales tickets. The original copy of the sales tickets will be attached to the daily activity record as support.

C050703 Cash Registers.

A. Purpose. The cash register is used to safeguard activity funds in the custody of the individual cashiers during hours of operation and to furnish a record of each individual sale.

B. Policy. Each transaction will be recorded on the register at the time of the sale in conformance the internal controls cited in the Volume 13, Chapter 9.

C050704 Cashiers.

A. Individual Cashiers.

Each individual cashier will be provided with a change fund. Sales will be recorded on the register and the cash deposited in the cash drawer and the drawer closed after each sale. Daily, upon completion of the cashier's scheduled working period, the cashier will count the receipts, prepare applicable parts of a daily activity record, and either turn in receipts and the daily activity record to a person designated by the manager, or deposit them in a night depository-type safe as directed. In those instances where daily receipts cannot be turned in at the close of business, each day the daily activity record and the receipts will be delivered the following workday prior to the opening of the day's business. The manager will designate a safe place where those receipts may be kept overnight.

B. Central Cashier.

The central cashier will either receive the receipts and the daily activity record from the individual cashier or will obtain them from the night depository safe. The receipts will be verified and appropriate certification will be recorded on the daily activity record. This form will be forwarded to the person designated to read the register.

C. Person Designated To

Read Register. The person designated by the manager (generally an assistant manager and never the individual cashier) will read the register upon completion of the cashier's scheduled working period but in all cases prior to another cashier's utilizing the register. The tape should be removed from the register and attached to the daily activity record. The register readings and appropriate certifications should be entered on the daily activity record. Cashiers shall not be permitted, at any time, to see cash register readings. The central cashier should never be designated to read the register.

D. Cash Boxes.

When the use of cash registers is not practicable, the cashier will be furnished a cash drawer or metal box. When in use, the cash drawer or box will be in custody of the cashier at all times. In those instances when the cash drawer or box is also

used to turn in the daily receipts, the cash drawer or box will be placed in a safe or other secure place until the cashier is able to present the receipts for verification and removal by the manager or his designated representative.

C050705 Credit Card Sales.

A. Purpose.

Credit card sales reduce the amount of cash handling at activities and afford patrons the privilege of paying for their purchases on a delayed basis.

B. Policy.

Appropriate regulations authorize certain activities and individuals to have credit card sales. The total of credit card sales will be recorded on a credit draft or invoice (furnished by the credit agency). The patron's credit card (furnished by the credit agency) will be used to imprint the necessary identification and the patron will sign the draft or invoice. The cashier will verify the signature with that on the credit card. The cashier will verify, reconcile, and ensure that the individual credit card sales total, agrees the register tape card sales. These drafts or invoices will be forwarded as directed by the credit card agency and will be recorded as charges on the Daily Activity Record.

C050706 Cash Receipt Vouchers.

A. Prenumbered cash

receipt vouchers will be used for receipts of cash not recorded in cash registers or on sales slips. The receipt voucher will be prepared in triplicate for each cash collection. The receipt voucher will be distributed as follows:

Original--to the patron or the individual making the payment

First Copy--attached as support to the Daily Activity Record (used to post Cash Receipt Journal)

Second Copy--retained in numerical sequence

C050707 Cash Received In Mail.
Provision must be made to record all cash

(checks, money orders, etc.) received through the mail by a person other than the cashier. As frequently as such cash is received a listing will be prepared in sufficient copies as deemed necessary to provide the required internal control. The person preparing the listing and the person receiving the cash receipts must both sign the form in acknowledgement of accountability.

C050708 Coin Operated Machines.

A. Vending and Amusement Machines. The keys to vending and amusement machines operated by the activity will be held in the custody of the manager or his designated representative. Machines should be emptied by the manager or his designated representative with another person as witness. Cash taken from vending machines will be reconciled with stock needed for refilling such machines. The manager or his designated representative and the witness will sign the daily activity records. Amusement machines will be controlled by nonresettable coin counters and the cash receipts reconciled with the meters each time the machines are serviced.

B. Slot Machines. Due to the sensitive nature of slot machines, close control and supervision over all aspects of operations must be exercised at all times. Slot machines must be owned by the activity in which located or another activity of the same installation and recorded on the appropriate property records in detail to include such items as make, model, serial number(s), and token or coin denomination. Commanding officers and managers must take all measures to insure that:

1. Slot machines are procured in accordance with the procedures prescribed by the program manager.

2. All keys to cash boxes, meter boxes, coin receivers, or internal mechanisms of slot machines are entrusted to carefully selected personnel. At no time shall any one person have available for his use or in his possession sufficient keys which will permit him to have access to either internal or external cash boxes.

a. The casement, meter boxes, and coin receiver keys to all slot machines and one key to one of the locks on the slot machine cash box (for those machines equipped with double locks on the cash box) will be entrusted to the custody of an officer designated by the command such as a command duty officer or other designated officer from a list that provides a frequent, preferably daily change. The designated officer will record each opening of a slot machine and must verify the cash count. One key to the other lock on the cash box shall be retained by the activity manager;

b. For those machines with only one lock to the cash box and access is through the casement, the key to the cash box shall be retained by the activity manager;

c. As indicated above, all keys except the one cash box key in custody of the activity manager shall be retained in the custody of the officer designated by the command such as a command duty officer or other designated officer. However, for those commands maintaining a separate officer list for the purpose of observing cash collections, keys will be transferred directly to and from the place of safekeeping. Control over keys will be established by maintaining a record of the name, social security account number (SSAN), and organization of the persons to whom issued. The record will also state the specific purpose for the issue;

3. Disinterested persons are appointed to collect cash, witness repair work, or free jams. This duty should be rotated to prevent collusion or compromise.

4. All funds collected from slot machines are property safeguarded and accounted for in accordance with provisions of this handbook.

5. The verification of cash removed from slot machines is made by two members of management and the officer designated above.

6. All slot machines are emptied as often as required, but not less than once weekly. Cash must always be collected on the last day of each month in order that income can be credited in the appropriate accounting period.

C050709 Bingo.

A. Bingo Receipts. Receipts will be controlled through the use of a cash register and/or the use of prenumbered coupons or tickets. The tickets will be issued by serial numbers to bingo cashiers, who will be responsible for missing numbers when turning in receipts. When cards are sold at a reduced price, management must take a reading of the ticket numbers or use tickets of a different color or series before the reduced price sale begins. A special Event Report will be prepared for each bingo event as required by this handbook.

B. Bingo Cards. Bingo cards should be marked or date stamped to indicate payment has been received for a card. Before a prize is presented to a bingo winner, the card will be checked to insure that payment has been received.

C. Bingo Awards. Every award shall be properly signed for by the recipient. For additional verification, include the recipient's name, rank (if applicable), social security number, organization, and telephone number. Cash prizes will be paid by check or from an imprest fund established for that purpose. For this purpose the fund limitation is waived.

D. Bingo Merchandise Prize Controls.

1. Procurement. Bingo prizes may be procured on a consignment basis when authorized by the program manager. The consignment basis is similar to a memorandum receipt where the activity has responsibility for the items not present at periodic inventories. The purchase agreement for bingo prizes should permit the return of unaccepted prizes to the vendor for full credit.

2. Inventory. A perpetual inventory of merchandise prizes shall be kept current at all times, and a proper identification number shall be affixed to each merchandise prize. Prizes should not be in a storeroom where employees have easy access. They must be kept under lock and key. Small expensive prizes require additional safeguards. When the display table is set up for the game, the manager or a designated responsible person should personally check the prizes out of the storage area, using the inventory records as a checklist.

3. Sale. The retail sale of bingo prizes is prohibited. Surplus or slow-moving bingo prizes should be returned to vendors for credit or disposed of as a special or consolation prize.

C0508 PURCHASING

C050801 General.

A. Prenumbering. Prenumbered purchase orders or consecutively numbered contracts will be issued for all purchases (including entertainment) made from commercial sources except for purchases paid from the petty cash fund. In certain instances where orders are placed with the vendor by telephone, a confirmation purchase order will be processed and forwarded to the vendor with the notation, "Confirming - Do not duplicate this purchase." Purchase orders will be used to document performance during a merchandise contract relationship. Purchase orders will not be used when purchasing merchandise from Naval Supply Systems sources or when requisitioning documents are prescribed by local supply activities. Sufficient copies will be prepared to enable the activity to process the requisition document in the same manner as prescribed for purchase orders.

1. Purchasing With NAF. To purchase merchandise with nonappropriated funds from the General Services Administration, either one of the following forms must be used: Single line Item Requisition System Document (DD Form 1348),

or Multiuse Standard Requisition/Issue System Document (Standard Form 344). A local fund code established by the Supply Department will be cited on each document to distinguish the transaction from a similar transaction utilizing appropriated funds.

2. Scope. All segments of the Department of the Navy procuring with non-appropriated funds will comply with SECNAVINST 7043.5A.

B. Authorization. The manager or other person specifically authorized in writing to be the purchasing/contracting officer will be responsible for all purchasing for the activity. The manager must approve the purchase of equipment and furnishings and/or services which will be recorded as fixed assets. The person designated should not be authorized to receive such merchandise, operating supplies, equipment, or furnishings. The commanding officer will establish a monetary limit the purchasing/contracting officer can expend at one time for a specific purpose without his prior and specific written approval. Activities shall not make purchases on the installment plan. Lease/purchase agreements, conditional sales contracts, and time contracts are not permitted unless authorized by the program manager.

1. Forms Control. All purchase orders will be numbered consecutively and strictly controlled and accounted for. They will be completed in their entirety before signature and will not be signed in blank.

C050802 Blanket Purchase Orders.

A. Tangible Goods. A purchase order may be issued as a blanket order for tangible goods. It may be used in the following instances where the purchase price remains the same:

1. No competition (one source of supply, e.g., Coca Cola) and frequent deliveries are required.

2. Source of supply is accepted on basis of bids and frequent deliveries are required.

3. When such a purchase order is used, all of the descriptive and unit price information except quantity and total cost should be included. In addition, the following type statement should appear on the purchase order: "You are hereby authorized to deliver the following products in the unit size specified and for the unit price indicated, during the period _____ to _____". Increments of delivery will be determined on a need basis by the purchasing/contracting officer or by the manager. Purchase action of a continuing nature must be documented by a contract.

C050803 Blanket Purchase Agreement.

A. Open Ended Charge Account. A blanket purchase agreement is essentially an open ended charge account kept with a supplier for goods which are usually price volatile in nature, and which necessitate frequent deliveries. Among the advantages of this type agreement are the invoicing terms (one billing a month vice frequent billings and payments) and the ability to "call-in" orders on a frequent basis. The use of blanket purchase agreements is to be limited to tangible goods meeting the criteria stated above (e.g., produce) where a fixed unit price order is not possible (i.e., the use of a blanket purchase is not feasible).

B. Calls. Calls against blanket purchase agreements generally will be made orally. Written calls may be executed on informal correspondence. Documentation of individual numbered calls (such as recording the calls in a log) is required but shall be limited to essential information. Memorandum type forms may be developed locally for this purpose.

C050804 Contracts, Agreements, Leases, Licenses, and Permits.

A. Contracts and Agreements. All contracts for construction

projects will be negotiated by the Public Works Department and will cite a single source of funds either appropriated or nonappropriated funds. Contracts for other than construction projects, negotiated on behalf of the activity, will be charged directly to the respective activity's nonappropriated funds and state that no appropriated fund of the United States will be charged or held liable thereunder. Each contract or agreement, other than construction contracts, will be signed by the manager or his designated representative, and the representative of the person or firm furnishing such work or services.

B. Examination of Contractor's Records. A standard "Examination of Records Clause" will be incorporated in all nonappropriated fund contracts except those with foreign contractors where precluded by the laws of the country involved or where the Secretary of the Navy determines that the inclusion of the clause would not be in the public interest. The wording of the clause will be in accordance with SECNAVINST. 7043.5A(series).

C. Leases, Licenses, and Permits. Instruction concerning the issuance of leases, licenses, and permits for use of government property or facilities, including property and facilities under the control of morale, welfare, and recreation activities, is given in Real Estate Administration, NAVDOCKS P-73.

C050805 Purchase Discounts. In determining the cost of purchased property, discount shall be deducted from the price billed. Such discounts are reductions of costs that represent savings achieved through payments of bills within vendor's stipulated time limits. They are not income and shall not be accounted for as such, since they do not produce an increase in assets based on the sale of goods or services. In determining the cost of purchased property, the amount to be recorded shall be net of discounts. The value of discounts not taken shall be charged to operations as "discounts lost". This instruction applies to inventory accounting systems maintained at cost value.

C0509 RECEIVING

C050901 Policy. Persons other than the purchasing agent or bookkeeper will be designated in writing to be responsible for receiving.

C050902 Procedures For Receiving.

A. Delivery. When delivery is made, the receiving clerk will:

1. Withdraw both filed copies of the purchase order from the "open order" file.

2. Inspect the merchandise to assure it is of the quantity and quality ordered.

3. Record on both copies of the purchase order the quantity received.

4. Record on both copies of the purchase order the serial numbers of all equipment received.

5. If satisfactory, certify both copies of the purchase order in the spaces provided on the bottom and mark on the vendor's delivery slip the purchase order number.

6. If any variance exists between quantity and/or quality of the merchandise ordered and that delivered, bring it to the attention of the purchasing agent prior to accepting delivery of the merchandise.

7. Record on both copies of the purchase order the storeroom or department where the merchandise is placed so the bookkeeper can record the correct account.

8. Obtain countersignature of departmental personnel to whom merchandise is turned over on delivery on both copies of the purchase order and the vendor's delivery slip.

9. Forward a copy of the annotated purchase order and vendor's delivery slip to the bookkeeper as evidence of receipt to support the bill-paying process.

10. Retain a copy of the purchase order at the receiving activity for future reference.

B. Receiving Procedures.

Receiving procedures for partial or incomplete shipments are the same as those prescribed for blanket purchase orders.

C050903 Special Procedures. When a blanket purchase order or agreement is used, or as partial shipments occur, vendors delivery slips and the receiving copies of the purchase order will be certified and processed as outlined above. In addition, the receiving activity must indicate that the receiving documents are for a partial shipment, delivery increments (of a blanket purchase order or agreement), or the final increment of a partial shipment before forwarding the documents to the bookkeeper. A copy of the receiving documents will be retained at the receiving activity for ready reference concerning merchandise received. When a final shipment is received or when it is determined that no further shipment can be expected, the receiving activity will indicate final shipment or cancellation information on both copies of the purchase order and send a copy to the bookkeeper.

C050904 Procedures For Bookkeeper.

A. Receiving Documents.

Upon receipt of receiving documents the bookkeeper will:

1. Partial or Incomplete Shipments. In the case of a partial shipment or uncompleted blanket purchases, delivery slips or invoices will be filed in the open order file pending shipment completion. Invoices will be inspected to insure merchandise received complies with the terms of purchase. When the receiving documents for the final shipment are received, all invoices or delivery

slips will be compared with the final receiving copy of the purchase order.

2. Completed Shipments. In the case of a completed shipment, withdraw the open order file copy of the purchase order and compare it with the final receiving copy of the purchase order and attached invoices or delivery slips.

3. Receiving Documents. Compare the receiving documents with the open order file of the purchase order and the dealer's invoice. If the documents agree, an annotation of accuracy will be made on the documents, a check prepared and all documents submitted to the person designated to sign checks. If a discrepancy appears, it should be brought to the attention of the purchasing agent for resolution. After resolution the check will be prepared and documentation forwarded as noted above. When several purchases are made from a vendor and separate payments are not required, payments may be made by the issuance of one check.

C050905 Storing, Recording and Issuing.

A. Policy. Each storage facility will be kept locked under the custodian of one person designated by the activity manager. Access to the storage area will be governed so as to prevent unauthorized withdrawals. Stock records will be maintained to show perpetual inventory of each type item held in a warehouse or storeroom. Receipts and issues will be posted daily. Custodians and managers will be held responsible for the receiving and issuing of all merchandise. Receiving Reports will be executed promptly and forwarded to the accounting department to take advantage of any discounts. Damaged and short shipments will be investigated promptly to effect adjustments or replacements.

B. Procedure. Merchandise and operating supplies, when received, will be handled in one of two ways:

1. Future Use. Stored in a storeroom when purchased for future

use. The initial positioning of such material will be indicated by the receiving clerk on the receiving/bookkeeper copy of the purchase order and the bookkeeper will debit an applicable storeroom inventory account. When resale items (food, beverages, etc.) are subsequently issued to a department for sale, entries on a requisition will show a debit to the applicable departmental cost of sales account and a credit to the applicable storeroom inventory account. When operating supplies or replacements are issued to a department, entries on a requisition will show a debit to the applicable departmental expense account and a credit to the applicable storeroom inventory account.

2. Delivered to Department. Delivered directly to an operating department (for example, gymnasium, stables, etc.) for immediate use. The initial positioning of such material will be indicated by the receiving clerk on the receiving/bookkeeper copy of the purchase order and the bookkeeper will debit an applicable departmental cost of sales or departmental expense account, as appropriate. If items are subsequently transferred from one department to another, entries on a requisition will show a debit to the appropriate cost of sales or departmental expense account of the department gaining the items and a credit to the appropriate account of the department transferring the items.

C0510 DISBURSING

C051001 Cash Disbursements.

A. Prenumbered Checks. Disbursements will be made by printed prenumbered checks that are maintained under maximum security and issued in strict numerical sequence, however, minor miscellaneous expenditures may be made from a petty cash fund. Also, refunds and cash prizes may be made from change funds or cash receipts if proper safeguards are instituted with proper documentation. All checks will bear the name of the activity and be secured in a locked receptacle. All checks issued should be written in permanent ink preferably by a computer, check-

writing machine, or typewriter. If an error is made in writing a check, the check shall be voided and another issued. Under no circumstances should checks be signed in advance or made payable to cash or bearer. Advance payments are authorized only when specifically approved by the program manager or designated representative. The routing and processing of check payments is vital and should include the following independent and documented steps:

1. Authorization of payment,
2. Preparation of checks,
3. Signing of checks,
4. Mailing or delivering of checks, and
5. Reconciliation of checking account.

B. Validity Check. Prior to the signing of any check, the person designated to sign will determine the validity of the voucher intended for payment. Validity shall be determined by comparing the amount of the voucher to the supporting documents (purchase order, receiving report and the vendor's invoice). All supporting documents will then be stamped with a "Paid/Date" stamp and the voucher annotated with the check number. After signature, the check will be mailed or delivered to the payee. It should not be returned to the bookkeeper or person who prepared it. Spoiled checks will not be destroyed but will be retained, marked "void", and rendered nonnegotiable by at least mutilating the signature area. Voided checks will be held until the account statement is received and then filed therewith. The general ledger cash balance will be reconciled monthly with the balance in the account statement.

C. Designation of signatory. Individuals authorized to sign checks will be

designated in writing by the commanding officer or his designated representative. A dated signature card will be filled with the financial institution for each person authorized to sign checks. Controls may be reinforced by requiring countersignatures. Rubber stamp signatures are not authorized.

C051002 Processing of Bills or Invoices.

A. Bookkeeping Procedures.

Upon receipt of a bill, the bookkeeper will place it in the file with a copy of the purchase order, pending receipt of the material or services. The bill will be verified with the quantity ordered and received, unit price, extension, and terms of payment. Any transportation charges on the invoice are to be checked with the terms on the purchase order. Priority in processing payments will be given to all bills offering cash discount terms. After the bill has been matched to the order, the bookkeeper will indicate in writing on the bill that it is correct, initial the bill, prepare a check and submit the check with the order and all documents attached, to the person designated to sign checks. Any differences will be called to the attention of the person designated to sign checks. No bill will be paid unless covered by an order on which appears a certification of receipt and acceptance signed by the designated representative of the receiving activity concerned. Only invoices fulfilling the following requirements are acceptable for payment:

1. Original,
2. Formal invoice format,
3. Unaltered,
4. Addressed to the activity,
5. If covering multiple deliveries supported by delivery slips,
6. Dated and stating terms,

7. Quantity or quantities,

8. Description of merchandise or services,

9. Unit price or prices,

10. Extension of quantities and unit cost price,

11. Total amount of invoice.

B. Subsidiary Accounts. A separate account of each creditor will be maintained in a subsidiary ledger supporting the general ledger accounts payable controlling account. An appropriate ledger sheet (procured locally) will be maintained for each creditor in alphabetical order. Each month these subsidiary ledger sheets shall be totaled and reconciled to the general ledger control account. In a small activity where the number of creditors is minimal, the maintenance of a subsidiary ledger may be waived by the commanding officer.

C0511 PAYROLL

C051101 Control of Payroll.

A. Payments of Salaries and Wages. All salaries and wages will be paid by check except in those foreign countries where a formal working agreement indicates that subject employees must be paid in cash. In the case of a requirement to pay cash, one check will be drawn for the net payroll amount and employees will sign for the amount of cash received.

B. Notification Schedules. Written notification schedules must be made of the exact hours each employee is expected to be on the job each day.

C. Authorizations. The manager or designated representative must authorize, in writing, all employment, separation actions, changes in the approved work schedule,

or other changes that affect the pay of employees.

D. Reporting Hours Worked. A system will be devised locally whereby hours worked by each employee can be reported to the payroll clerk. Such a system might be as follows: Employees hours of attendance for work are punched on a time clock (smaller activities may use time sheets or a similar type log). Departmental supervisors certify in writing on the time card, time sheet, or time log, the number of hours worked during the period. These time records are then submitted to the payroll clerk, who computes the employees' wages and keeps their individual earnings records.

E. Pay and Earnings Statement. A check will be prepared for each employee, and when feasible, an individual earnings statement (format developed locally) itemizing information contained on the individual earnings record for each employee. Each check will be signed by the manager or other authorized person.

F. Accuracy Checking. The manager will appoint someone other than the payroll clerk to check the accuracy of the payroll. The manager or his designee will then approve the payroll and sign and distribute the pay checks and the individual earnings statements.

G. Payroll Checking Account. Whenever the size of the payroll warrants, a separate checking account should be established for payroll disbursements.

H. Items Not To Be Used For Payroll Payments. Current cash receipts, petty cash funds, or change funds shall never be used for payroll purposes.

I. Unclaimed Payroll Checks. After an appropriate interval (usually 2 weeks) all unclaimed payroll checks should be voided and recredited to the bank account. Checks issued but not presented for payment within one year will be canceled and upon proper notification to the bank recredited to the

bank account. It is highly important that unclaimed pay be investigated to disclose any irregularities that may exist as the result of "payroll padding" and pocketing of unclaimed wages. Payroll checks should be marked "Not negotiable after 60 days from date of issue."

J. Abnormalities. The manager shall continually examine any abnormal increases in the number of employees, rates, and labor costs.

K. Signing of Blank Checks Not Authorized. Managers will not sign payroll checks in blank for emergency use during their absence.

L. Controls on Time Cards. Payroll time cards/sheets will be canceled or dated in order to prevent their possible reuse.

M. Verification. From time to time, the payroll should be checked to make sure that the number of names corresponds to the number of employees, that W-4's are on file for each employee and that gross pay and deductions are consistent with applicable laws and the employee's desired deductions from gross pay. At least once a year a person not normally associated with the payroll function will distribute the pay, requiring identification of each employee before distributing the check, and document the results.

C051102 Service Charge, Gratuities, and Cash Tips.

A. Service Charges. A service charge is an amount of money automatically added to a patron's bill by the activity. If the service charge is to be retained by the activity, it should be credited to the appropriate revenue account. If the service charge is to be paid to an employee, credit a Salaries & Wages, Personnel Benefits and Taxes Payable Account. The employee shall be paid the service charge on his regular payroll check. Service charges are subject to both the employee's and employer's share of FICA tax.

B. Gratuities. Gratuities are considered to be any charge tip voluntarily added by the patron to his bill. Gratuities shall be credited to a Salaries & Wages, Personnel Benefits and Taxes Payable Account. This type of income is not subject to the employer's share of FICA tax.

C. Cash Tips. Cash tips refer to tips given directly by the patron to the employee.

D. Reporting Gratuities and Cash Tips. Gratuities and cash tips are required by law to be reported by the employee to the employer on or before the tenth of the month following the month the tips were received by the employee if \$20.00 or more for the month. These "Reported Tips" are posted and accumulated for purposes of determining income and FICA tax withholdings. Services charges are not to be included in this reporting as they are included as regular wages. Managers should obtain copies of "Reporting Your Tips For Federal Tax Purposes" (Publication 51) from the District Director of Internal Revenue for distribution to affected employees.

E. Reporting by Certain Large Food or Beverage Establishments with Respect to Tips. To promote full reporting of employee tip income, food and beverage establishments must estimate expected tips in relation to levels of gross receipts from food or beverage cash sales, charge receipts, and the retail value of complimentary food or beverages served to customers. Such establishments (as determined by program managers) are required, under Section 6053(c) of the Internal Revenue Code of 1954, to file an annual tip information return on or before the last day of February of the year following the calendar year for which it was made to the District Internal Revenue Service Center on Form 8027 with Transmittal Form 8027T. Required attachments to the return include photocopies of each employees' W-2 for whom an allocation is made and a copy of any written employer/tipped employees' good faith agreement applicable for the reporting year. Reporting establishments shall assign a unique 15-digit activity reporting number on each Form

8027 report. Additionally, employers shall furnish to each employee to whom a tip amount is allocated a written statement on the employees' Form W-2 showing the aggregate amount allocated to the employee for the calendar year.

C0512 PROPERTY ACCOUNTABILITY AND CONTROL

C051201 General.

A. Recording. Fixed Assets (nonexpendable property) procured with nonappropriated funds will be recorded at original acquisition cost less cash discount plus freight-in and installation cost plus the cost of additions, modifications, or enhancements thereto. If the original cost is not known, an estimated value will be assigned. In determining the estimated value, reference should be made, where possible, to manufacturers; price lists, cost of similar items, and such other sources of information as may be available. When the source of funds for the original procurement of property cannot be determined, it will be considered to have been purchased with appropriated funds. Property on loan will be controlled through use of appropriate issue and signed receipt documents. A Certificate of Disposition must be approved by the commanding officer or his designated representative before a fixed asset may be dropped from a Property and Depreciation Record (NAVCOMPT Form 742). Some fixed asset types:

1. Fixed Assets (Title Remains With Morale, Welfare, and Recreation Activity). To reflect acquisition cost (or estimated value if acquired by other than purchase), allowance for depreciation, and net book value.

2. Other Fixed Assets (Government real property facilities, improvements, and equipment procured with nonappropriated funds, title to which is transferred to the government). To reflect nonappropriated funded acquisition cost, allowance for depreciation, and net book value.

An explanatory footnote will be included in the balance sheet as follows: "The title of real property financed with nonappropriated funds and reported hereon is vested with the U.S. Government."

3. Fixed Assets
(Purchased with Nonappropriated Funds to be reimbursed with appropriated funds). As of 1 October 1990 appropriated funds may not be used to reimburse a NAFI. In those instances when property is purchased with nonappropriated funds to be subsequently reimbursed with appropriated funds, such property will not be recorded on the books of the nonappropriated fund instrumentality (NAFI). To record a transaction of this nature, the NAFI will debit accounts receivable and credit cash or accounts payable.

B. Diversion of Assets. A building or structure constructed or purchased using nonappropriated funds will not be diverted to a use other than in direct support of the MWR purpose for which it was acquired without the prior concurrence of the program manager.

C. Proceeds From Sale. In accordance with U.S.C. 485(C) the net proceeds from the sale of a building or structure, acquired or constructed using nonappropriated funds and subsequently sold upon disposition of Government property, will be credited to the applicable fund as determined by the program manager. When it is uneconomical or impractical to ascertain the amount of net proceeds, the proceeds will be credited to Miscellaneous Receipts of the U.S. Treasury.

C051202 Classes of Property.

A. Nonexpendable Property. Nonexpendable property (minor fixed tangible assets) is that which ordinarily retains its original identity during its period of use, is not fully consumed in normal use, has a unit acquisition value of \$1,000 or more and has a life expectancy of more than two years. Examples include furniture, fixtures and office equipment. When purchases are made in bulk for like items

(example, a set of chairs) and the total cost is \$1,000 or more, regardless of the unit cost, the items may be capitalized and depreciated. Nonexpendable property will be recorded in the general ledger as fixed assets and capitalized. Property and depreciation records will be maintained as subsidiary records to the general ledger controlling account. Only one item or group of like items will be recorded on each property and depreciation recorded. At least annually, the total value recorded on the subsidiary records will be reconciled to the corresponding general ledger account balance. Each nonexpendable item will be given a unique identification number which shall be permanently affixed with a tag or by some other method, to identify activity property. Assets in this group will be considered fixed assets for depreciation purposes.

B. Expendable Property. Expendable property consists of any property with a life expectancy of less than 2 years acquired by purchase, gift, or transfer that has a unit acquisition value of less than \$1,000 such as:

1. Supplies and materials which after issue are immediately consumed in use or become incorporated in other property, thus losing their separate identities (examples: paints, glue, fuel, preserving materials, radio and TV tubes, etc.); or

2. Articles which, when issued for immediate installation, are used to repair or complete other articles and thereby lose their identity (examples: spare and repair parts and components).

a. Property obtained for immediate use will be charged directly to operating expense. However, if expendable supplies are purchased by a department to be consumed in future periods, such items must be recorded as prepaid supplies.

b. Those expendable property items in use having a unit value of \$300 or more will be recorded on a consolidated property record with each item

supported by a separate property and depreciation or stock record. Each item in this group shall be permanently affixed with a number tag or identified by some other method. These items will not be recorded in the general ledger as assets but expensed upon receipt.

c. All other expendable property purchased and stored in the warehouse or storeroom will be recorded on stock records. Issues from the storage area will be based on numbered and controlled requisitions and expensed from prepaid supplies.

C. Appropriated Funded Property. Appropriated funded property purchased for or assigned to morale, welfare, and recreation activities will be accounted for and controlled in accordance with NAVCOMPT Manual, Volume 3, Chapter 6. The fund manager will provide guidance to insure that this property is safeguarded from theft, abuse, waste, and unauthorized use.

D. Resale Merchandise. Merchandise purchased and placed in storage for the purpose of resale is considered an asset of the activity and will be recorded by debiting the applicable general ledger inventory account. When merchandise is delivered to a resale department, the cost of goods sold will be charged to the appropriate account series. Stock records (NAVCOMPT Form 742-1) will be maintained for all merchandise carried in warehouses or central storerooms. Issues from the storage area will be based on numbered and controlled requisitions. Frequent reviews should be made to determine if stock is being purchased in economically sufficient but not excess quantities. Stock record cards will be reconciled with the general ledger inventory account at least monthly.

E. Surplus Property. Surplus/excess items are deemed to be those items which have been screened in accordance with current disposal regulations. Items acquired through surplus/excess programs remain appropriated funded property and will be accounted for and controlled as such in

accordance with current regulations and as directed by the program manager. When no longer needed, these items will be turned in to the nearest Defense Reutilization Marketing Office (DRMO) with a statement that they were previously obtained from appropriated funded surplus/excess sources and that no part of any proceeds from sale or other disposition are due the returning activity. Likewise, when the Defense Property Disposal Office sells nonappropriated funded property the proceeds are returned to the activity disposing of the property.

F. Loss or Damage of Property. In instances involving loss or damage to insurable interests of nonappropriated funded property, insurance procedures, as prescribed by the program manager, will be adhered to. In those situations where the recovery involves both insured nonappropriated funded property, and other insured Government property, the recovery of nonappropriated funded property remains with the morale, welfare, and recreation activity. Recovery for appropriated damaged property should be deposited to the Navy General Fund Receipt Accounts as indicated in 2416A of the JAG Manual. Appropriate documentation should be included in every claims file.

G. Donated Property. Includes those assets that are given to an MWR activity at no cost by another MWR activity or a private donor (in accordance with SECNAVINST 4001.2F(series)). Excludes property obtained from appropriated funds surplus sources as described above.

1. Donating MWR Activity Accounts to be Recorded

a. When initially purchased:

Debit: Fixed Assets
Credit: Cash

b. When donated to another activity:

Debit: Miscellaneous Expense
 Debit: Accumulated Depreciation (where appropriate)
 Credit: Fixed Assets

2. Receiving Activity. The receiving activity will record the receipt of donated property as follows:

a. When received from another activity:

Debit: Fixed Assets
 Credit: Miscellaneous Income
 Credit: Accumulated Depreciation (where appropriate)

b. When received from a private donation:

Debit: Fixed Assets
 Credit: Miscellaneous Income

C051203 Depreciation.

A. General. Depreciation is the allocation of asset acquisition value or cost to present and future operations on the basis of some equitable and rational mathematical system. Although the purchase or acquisition of an asset occurs at one time, the benefits derived from an asset's use are received in future periods. Therefore, an asset's value or cost must be allocated to the periods that receive beneficial use. The income would be distorted if the total cost were charged to expense in any one accounting period.

To show these assets in the financial statements at their adjusted real value, (book value, or asset acquisition cost less accumulated depreciation) the amount of such depreciation is recorded in an accumulated depreciation account and is offset from the fixed asset account on the balance sheet.

B. Policy. The following accounting policy is applicable with respect to depreciation.

1. Fixed Assets. Fixed assets will be depreciated in accordance with the following schedule, until the accumulated depreciation account shows 100% of the cost of such assets. Local commanders or appointed designee will determine the estimated useful life of each fixed asset within the guidelines set forth in the following schedule.

Fixed Assets Value	Useful Life Span (years)	Assets	Depreciation
\$1,000 or more	2-10	Furniture, Fixtures, Equipment & Livestock	Straight Line, No Salvage Value
\$1,000 or more	2-10	Vehicles & Aircraft	Straight Line, No Salvage Value
\$1,000 or more	20-40	Buildings & Facilities	Straight Line, No Salvage Value
\$1,000 or more	5-20	Buildings & Facility Improvements	Straight Line, No Salvage Value

2. Depreciable Assets. Assets with remaining depreciable lives expensed in previous years will be capitalized in the general ledger by debiting the fixed assets account for the acquisition cost, crediting the accumulated depreciation account for the total accumulated depreciation since acquisition and crediting prior period income adjustment for the difference between the acquisition cost and the amount posted to accumulated depreciation. These assets will be depreciated during the remaining life of the assets by debiting depreciation expense and crediting accumulated depreciation.

3. Contributed or Donated Assets. Assets acquired from outside sources by contribution or donation will be recorded in general ledger fixed assets account for their fair market value and credited to Miscellaneous Income.

4. Used Assets. Used assets acquired including donated property will be initially recorded in the financial records and depreciated over their estimated remaining useful lives.

5. Computing Depreciation. Assets maintained on computer file are depreciated beginning in the month following acquisition. Assets on non-computer file are depreciated beginning in the first month

of the fiscal year following the fiscal year of acquisition.

C. Method of Computing Depreciation. Within the Department of the Navy, all fixed assets will be depreciated by the straight-line method. Under this method, an equal portion of the cost of the asset is allocated to each accounting period of use; consequently, this is most appropriate when usage of an asset is fairly uniform from year to year. The possibility of a salvage value is ignored and the annual depreciation charge is computed merely by dividing the total cost of the assets by the number of years of estimated useful life.

D. Recording of Depreciation. At the end of each accounting period the following entries will be required to record depreciation:

Debit - Depreciation Expense
Credit - Accumulated Depreciation

Depreciation is not recorded as a decrease to the fixed asset account but as an increase to a contra-asset account, accumulated depreciation. The fixed asset account will always show the acquisition cost of the fixed assets. The accumulated depreciation account will show the estimated decrease in value of the fixed assets. The difference between the two accounts is book value. Accumulated depreciation is shown on

the asset side of the balance sheet as a reverse of norm amount.

1. Cash Sale of a Fixed Asset. Cash sales of fixed assets are not combined with the operating income from the sales of inventory or services because the activity is not in business to sell fixed assets. When a fixed asset is sold, everything relating to that specific asset must be eliminated from the books. The fixed asset and accumulated depreciation accounts will always be involved. If the market value (amount received) of the asset differs from the book value, a profit or a loss occurs.

2. Trade-ins. When one asset is traded in for another, the acquisition cost of the new asset is the cash value of the consideration parted with; that is, the cash paid and the amount that could be obtained by a sale of the old asset. Unless known, market value for assets traded in will be net book value. If the cash purchase price of the new asset and the market value of the asset to be traded are unknown, the book value of the asset traded will be considered as its market value.

C051204 Disposition of Unserviceable or Excess Property.

A. Navy Plant Property Procured With Appropriated Funds. Property recorded on the Navy Plant Property Records, including nonappropriated procured buildings and improvements, which have become unserviceable or excess to the needs of the activity will be returned to the appropriate accountable officer for disposition in accordance with existing regulations.

B. Other Property Procured With Nonappropriated Funds. Other property procured with nonappropriated funds which has become unserviceable or excess to the needs of the activity will be disposed of as follows:

1. Used as a trade-in on a similar item.

2. Sold to or transferred to another MWR activity.

3. If not desired by another MWR activity within reasonable shipping distance or if it is deemed unfit for redistribution by the Program Manager, it will be disposed of in accordance with current Navy and base disposal regulations. To avoid collusion or chance for private gain at government expense, items for disposal must be advertised or announced using the current estimated price as a basis for the selling price.

C. Recyclable Material. Morale, Welfare and Recreation (MWR) activities are authorized to use the installation MWR contracting service to sell nonappropriated recyclable scrap such as aluminum cans, bottles and newspapers directly to local recycling firms or continue to use the Defense Reutilization Marketing Office (DRMO). However, prior to selling locally, get assurance from the servicing DRMO that no long term collection or surplus sales contracts are in effect for the installation for the specific types of recyclables. If a DRMO contract exists for this type of property, the contract takes precedence until expiration unless exception is granted by the servicing DRMO. All appropriated recyclable materials shall continue to be processed through the DRMO.

C051205 Inventories.

A. Inventory Systems. There are two systems of determining quantities of goods in the inventory, periodic and perpetual. The periodic system relies upon an actual inventory taken at the end of an accounting period to determine the cost of items sold during the period. The revenue from goods sold during the period is recorded in the sales account, but no concurrent entries are made to record the decrease in the inventory. It is therefore only by a count at the end of the period that the inventory can be determined. The perpetual inventory system uses accounting records that continuously disclose the amount of the inventory. Increases in inventory items are recorded as debits to the appropriate accounts

and decreases are recorded as credits. The balance is the book inventory of items on hand.

B. Valuation of Inventories.

All inventories are valued at cost which is defined as invoice price plus freight charges less discounts. Inventory items received at no cost are recorded as a debit to the inventory account and a credit to Bonus Merchandise. End-of-period physical inventories are valued or priced on the weighted average or first-in first-out (FIFO) basis. In FIFO, requisitions are priced at the earliest invoice cost at which the items were placed in stock. Quantities on hand at the inventory date are considered to be those items most recently purchased. Under the weighted average method of inventory valuation, goods are valued at an average cost. Cost of goods on hand at the end of a period is assumed to be the weighted average of the inventory cost of goods on hand at the beginning of the period and all goods purchased during the period. Physical inventories of fixed assets are valued or priced at original acquisition unit costs including freight-in and related installation charges.

C. Inventory Frequency.

Inventory frequency will be prescribed by appropriate program managers. However, as a minimum requirement, all merchandise, consumable supplies, fixed assets, and property on loan require an annual physical inventory; and, cash and resale merchandise will require an inventory at the close of each accounting period. The results of the inventory will be reconciled with property records and the general ledger controlling accounts. Upon the relief of the responsible person, as determined by the program manager, inventories as set forth above will be accomplished.

D. Types of Inventories.

1. Warehouse or central storeroom resale merchandise.

2. Departmental resale Merchandise.

3. Prepaid Supplies such as china, silver, glassware, and maintenance supplies.

4. Fixed Assets, capitalized nonexpendable property (includes such items as furniture, fixtures, and equipment).

5. Expendable property items which are recorded on property records although expensed at time of receipt.

6. Cash, which includes all cash at an activity (such as petty cash funds, change funds, and undeposited receipts).

E. Procedures For Taking A Physical Inventory.

1. General. A physical inventory, when possible, will be taken either before or after regular operating hours. If this is impractical, it will be taken at a time that will be least inconvenient to patrons. Sales will be made during inventory count only in the case of an emergency. Such sales will be included in the count and treated as sales of the subsequent accounting period.

2. Pre-inventory Procedures. Specific inventory instructions will be issued to employees at least ten days prior to the physical inventory. These instructions will describe:

a. Counting and listing procedures that will be utilized;

b. Inventory count forms

c. Pricing of inventory; and

d. Transaction cutoffs.

A pre-inventory meeting will be held with all employees who are to participate in the counting of the inventory. Inventory instructions and

procedures, personnel assignments, and working hours will be reviewed and discussed during this meeting.

3. Personnel. The manager will designate experienced personnel as inventory supervisors who will be responsible for a complete and accurate inventory. In fulfilling these responsibilities, supervisors will select and train the counters and verifiers and make certain that all preliminary preparations are made prior to counting the stock.

4. Layout Sketch. To assure accurate and expeditious inventory taking in the store, warehouse, stockroom, etc., layout sketches should be prepared in which each fixture (i.e., shelves, gondolas, bins, tables, etc.) is illustrated and identified by a number. Large areas will be prepared by inventory supervisors well in advance of the inventory date. A number, identical to the one entered on the layout sketch will be affixed to each fixture.

5. Cut-off Time.

a. A cut-off date for sale and receipt of merchandise will be established by the accounting office. The cut-off date for the receipt of retail merchandise may be set two or three days earlier than the close of the accounting period to permit arrangement and counting of stock prior to the inventory date. All merchandise received prior to the receiving cut-off will be included in inventory. Merchandise received after the cut-off date will be excluded. Vendors and transportation companies may be requested to delay deliveries until after completion of the physical inventory. If merchandise is delivered during the inventory, do not include or record its receipt. If any sale is permitted, the item must be entered on the inventory sheet.

b. A proper cut-off time (date and hour) will be established for each activity by the accounting branch for the return of merchandise to vendors and the transfer of merchandise from the warehouse or storerooms. All branch and activity locations will be notified by the warehouse at cut-off time of

the number of the last requisition against which merchandise was transferred prior to inventory count. This will enable the activities to ascertain whether all the merchandise charged to them has been received.

6. Stock.

a. General. All merchandise on the selling floor and warehouse will be arranged, sorted, and consolidated by identical merchandise and price line to facilitate counting and listing. Merchandise sold but being held for pick-up will be segregated from regular stock and will not be included in the inventory.

b. Retail merchandise will be properly marked with the retail selling price. All other merchandise will be properly marked with the cost price.

c. All merchandise returned by patrons and for which credit has been given will be properly remarked and included in the appropriate departmental inventory.

d. All merchandise in the receiving room that has been received prior to the inventory cut-off date will be marked and sent to the warehouse, or selling floor, as appropriate, for consolidation with identical merchandise.

e. With the exception of cartons retained for packaging of merchandise on display, all empty cartons will be removed from the selling floor and warehouse, and collapsed so that they will not be included in the inventory count.

f. All slow moving, damaged, and obsolete stock will be properly marked down to the retail price at which it is expected to be sold and the changes will be effected prior to the inventory cut-off date.

G. Inventory Sheets. The manager will cause type written inventory sheets

to be prepared by department for all items. To the maximum extent possible inventory sheets will list the items according to the manner in which they are physically arranged at the inventory site. Nomenclature shall identify the items to be inventoried. Inventory numbers, manufacturer's serial numbers, and component parts of sets shall be shown on the inventory sheet. All sheets will be dated, pre-numbered, and accounted for. Only one department's merchandise or property will be listed on any one inventory sheet. Inventory sheets shall be distributed to the individuals assigned to conduct the inventory. Upon completion of the physical inventory, all sheets will be signed by each person participating in the inventory process.

F. Inventory Taking Procedures.

1. Counting the Merchandise.

a. General. Merchandise will be counted only after completion of all pre-inventory preparations. When possible, individuals familiar with departmental stock will be assigned to taking inventory. Counter will be indoctrinated thoroughly not only in the method of counting but also in the system of recording the count, for example, the count proceeds from left to right, top to bottom, in book-reading fashion. Normally, the work is done by a team of two people. One should call and inspect the inventory while the other enters (in ink) the quantities on the sheets. Each department will be inventoried separately. During the course of the inventory, independent test checks will be conducted to insure the maximum of accuracy. Items found to be on hand, which were omitted from the inventory sheet, will be recorded by the inventory team, provided such items can be positively identified as activity-owned property.

b. Unit Prices. Unit prices for retail department merchandise will be taken from price tickets at the time of count. All merchandise will be listed and counted in the same unit category as priced

for sale; for example, if cakes of soap sell for 3 for 25 cents, the multiple retail sales prices will be used and recorded "25 cents for 3," (not "3/25"). Only the unit cost price will be shown for service department items. This will be taken from the unit cost price shown on the outside of the case or container or from the last invoice. The same person inserting the unit price amount also records the unit "type" such as dz., ea., gr.

c. Inventory Count. All counts, identification, and pricing of inventories are to be adequately rechecked by a disinterested party other than the one who recorded the original data. All inventory counts are to be supervised and audited by the accounting personnel.

d. Extension of Inventory Sheets. Inventory count sheets will be extended by personnel in the accounting office. All inventory sheets will be extended and footed.

e. Departmental Inventory Worksheets. After the inventory work sheets have been extended and footed, inventory sheets will be summarized in value by department. These values will then be compared against the book inventory. Retail variances will be converted to cost by multiplying retail variances by departmental cost ratios.

2. Items Excluded.

a. Merchandise on Order. Merchandise ordered but not received will not be included in the inventory even if the invoice is received prior to the inventory date.

b. Merchandise Sold--Held for Pickup. Merchandise being held for pick-up which has been sold prior to inventory time, including all lay-aways, will be removed from the regular stock so that it will not be included in the inventory count.

c. Items Charged to Expense Accounts. Items charged to

expense accounts, when received, will not be included in the physical inventories. Merchandise on hand that is to be returned to vendors will not be counted unless it has been charged to an inventory account.

3. Items Included.

a. All materials and parts used for rendering a service, all ingredients used for preparing a finished product, and all unsold resale merchandise in stock will be included in the physical inventory of the various departments.

b. The value of containers, empty or full, for which deposits have been placed with vendors will be included in the inventory of the applicable department. Containers which are so damaged that they cannot be returned to the vendor will be inventoried and a notation will be made of their condition so they may be disposed of. Items out on loan for which activity holds custody receipts will be counted as items on hand, after a reasonable sample of custody receipts are verified. Discrepancies will be investigated as required by the inventory team.

4. Cash Counts. A member of the inventory team shall verify by actual count the petty cash fund, the change fund, and undeposited receipts. The total amounts of each fund will be accounted for. All noncash items should be documented on a locally devised form and retained. I.O.U.'s and post dated checks will not be regarded as cash. The manager or designee will be continuously present during the count, and will affirm the return of the cash funds to his possession. Trace amounts of the petty cash and change funds to the general ledger balance. The amount of undeposited receipts should equal the amounts reported on the daily activity sheet since the last deposit plus current sales. Management and Command Evaluation Staffs/Audit Boards should make surprise counts as appropriate.

5. Inventory Discrepancies. All inventory variances will be investigated to the satisfaction of the

commanding officer. The investigation will include, but not be limited to:

a. Review of inventory counts for proper quantity, measure, identification, and price;

b. Inventory extensions;

c. Footing and recapitulation of inventory sheets;

d. Physical inspection of facilities for inventory not counted or double counted;

e. Review of sales cut-off;

f. Review of purchase cut-off;

g. Review of price changes;

h. Review of departmental transfers; and verification of Inventory Summary worksheets and variance computation, Physical inventory variances will be charged or credited to the inventory shortages/overages account and the inventory account charged or credited to reflect the physical inventory value. The adjustment will be made based upon the physical inventory extended value after investigation of discrepancies has been completed.

C0513 ADJUSTING AND CLOSING ENTRIES

C051301 General.

A. End Of Accounting Period. At the end of an accounting period, before the financial position of an activity can be determined, it is necessary to make various accruals, adjustments, and closings to certain accounts to effect corrections, and to record transactions not previously made.

B. Accrual Method. Under the accrual method of accounting various income and expense items that have accrued (accumulated) from day to day must be recorded at the end of a period. It is not practical or convenient to record this information daily, but the complete information is needed at the end of a period. These end of period entries are called "adjusting entries". Adjusting entries are needed to record:

1. Prepaid items used and/or consumed during the period.

2. Salaries and wages earned but not paid.

3. Income earned but not received.

4. Decrease in the value of equipment, buildings, and vehicles.

5. Transactions not previously made.

C051302 Adjusting Entries.

A. Prepaid expense accounts will be adjusted by entries debiting the expense accounts for the amount that has been consumed during the accounting period and crediting the applicable asset account. When an activity buys and stores an asset which will be consumed or used in the future, the value of the item will be maintained in an asset account until it is used. When it is consumed or used, the asset account will be decreased (credited) and an expense account will be increased (debit).

B. Many activities will pay their employees in one month for hours worked in a prior month. This situation occurs when employees are paid every two weeks, regardless of calendar date. Using the accrual method of accounting, an expense must be recorded in the month it occurs.

C. The accrual of interest income is accounted for by an entry debiting receivables and crediting interest income.

Investments earn interest on a periodic basis although the cash may not be received.

D. Whenever the activity receives an asset that it has not earned, the individual or business that gave the asset has a legal claim to either services or assets. Therefore, a liability exists, not income. When the activity has performed the service or given the assets to this individual or business, thus earning legal title to the original asset received, an entry will be made transferring the respective ownership from a liability account to an income account. All accrued liability accounts will be adjusted with entries to the appropriate income and expense accounts.

E. It may be necessary to adjust the General Ledger balances of the departmental resale inventories because of physical inventory valuations. These accounts, when approved by the commanding officer, will be adjusted to show only the annual closing inventory. When the closing inventory is greater than the opening inventory, it is apparent that more merchandise was received than was sold. The applicable cost of goods sold account will be decreased, and the inventory account increased by the amount that the closing inventory exceeds the opening inventory. An entry will be made debiting the inventory and crediting cost of goods sold. As a result the inventory accounts will be adjusted to the value of inventory actually on hand and the cost of goods sold account will show the cost of merchandise sold. The above entries will be reversed when the closing inventory is less than the opening inventory.

F. Issues and direct deliveries to a department will be charged to its cost of goods sold, not to an inventory account. At the end of the period, an adjusting entry will be required if the department has used more or less inventory than has been issued during the period.

G. If an activity's inventory increases, the value of all of the goods received has not been used; if it decreases, the value of all of the goods received and part of the beginning

inventory have been used. This procedure is summarized in the cost of goods sold section of the profit and lost statement.

H. Warehouse or storeroom perpetual inventory records normally should agree with the value of the merchandise on hand in storage. However, if the value of the physical inventories is greater than the value of the perpetual inventory, an entry will be made debiting warehouse inventory and crediting an inventory overage account for the difference. If the value of the perpetual inventory is greater than the value of the physical inventory, an entry will be made debiting an inventory shortage expense account and crediting warehouse inventory for the difference. All adjustments will be investigated to the satisfaction of the Commanding Officer. Appropriate documentation for the adjusting entries will be retained for subsequent utilization during investigations or disciplinary actions.

C051303 Closing The Books.

A. Income and expense accounts (nominal accounts) are used to accumulate information concerning current period changes to net worth. At the end of the period, the net worth account does not reflect the true balance. It is necessary to transfer the amount in the income and expense accounts to the net worth account. This process is called "closing the books," and accomplishes two objectives.

1. Clears income and expense accounts of transactions of the past period.

2. Shows the proper balance in the net worth account.

B. To close the books, the following entries are required:

1. Decrease each income account by the full amount with a debit and a credit to Account 999 Profit or Loss Clearing Account.

2. Decrease each expense account by the full amount with a credit and a debit to Account 999.

3. Credit net worth by debiting Account 999 with the difference between income and expense (net profit). If expenses exceed income, the amount of the loss would be a debit to net worth and a credit to Account 999.

C. Notice the accounts closed are the income and expense accounts. Closing the books eliminates the balances in all accounts on the profit and loss statement - the income and expense accounts are thus summarized to arrive at a net profit or loss figure. The profit or loss is transferred to the net worth section of the balance sheet. Formal closing is not required at the end of each month. However, all income and expense accounts must be closed at least annually.

C051304 Post-Closing Trial Balance. After the closing entries have been posted to the accounts, another trial balance is prepared to prove debits equal credits. This is necessary to insure the ledger is in balance before posting the next month's transactions.

C0514 SPECIAL PROCEDURES

C051401 General. The procedures contained in this Section are applicable to the groups or types of activities indicated. They are supplemental to procedures contained elsewhere in this appendix.

C051402 Bachelor Officers Quarters/Billeting Fund.

A. Room Registration. A registration record (NAVCOMPT Form 2104) will be used to register each guest of the activity. As accountable documents, forms will be prenumbered to control occupancy and revenue.

B. Room Rental Charges. Certain individuals (as designated by BUPERS) authorized to utilize housing are required to pay a user fee while occupying quarters. These rents

are collected and accounted for and deposited in a billeting fund. These collections will be used to partially defray operational and facility costs normally paid from appropriated funds.

C. Housekeeping Services.

Housekeeping services, including maid and janitorial services or common use areas, will be provided initially through the use of a nonappropriated funded cleaning service. Nonappropriated funded costs for the common use areas will be reimbursed by station operations and maintenance funds to the Billeting Fund. The costs of services for individual room cleaning will be supported with nonappropriated funds derived from charges upon the residents of the activity.

D. Linen Charges.

The laundering or dry cleaning of government-owned room linens and equipment will be at the expense of appropriated funds. Certain individuals (as designated by BUPERS) are required to reimburse the activity for these expenses. These costs shall be included in service charges levied upon the individuals as mentioned above and will be retained in the billeting funds.

C051403 Military Student Subsistence and Commuted Rations.

A. NROTC Midshipmen, Contract Students, and Third Class USNA Midshipmen. NROTC midshipmen, contract students, and Third Class USNA midshipmen while on training under orders away from their unit are entitled to rations in kind only. Accordingly, when they are ordered to subsist in a nonappropriated funded mess, the mess will be reimbursed for their subsistence by the host activity submitting a bill to the local disbursing officer for the cost of meals consumed in accordance with the procedures outlined in NAVCOMPT Manual, par. 046397.2.

B. First and Second Class USNA Midshipmen and Aviation Cadets. First and Second Class USNA midshipmen and all Naval Aviation Cadets will either join the mess or pay cash for meals consumed.

C. Army and Air Force

Cadets. Payment for subsisting Army or Air Force cadets will be accomplished by submitting a bill to the appropriated military academy for meals consumed following the general guidance contained in NAVCOMPT Manual, par 046397.2 for Naval midshipmen.

D. Commuted Rations.

Commuted rations for assigned enlisted personnel detailed to work at the activity will be paid in the manner prescribed in NAVCOMPT Manual, par. 046397.1.

C051404 Guest Houses, Hostess Houses, and Navy Lodges.

A. Room Registration.

A registration record will be used to register all guests of Marine Corps temporary lodging facilities and Navy lodges.

B. Room Charges.

Each guest will be given a receipt for funds collected for room charges. Receipts will be procured locally, prenumbered, and used in numerical sequence with each number accounted for.

C051405 T r a n s i e n t F a m i l y Accommodations.

A. Occupancy Procedures.

1. General.

A registration record will be prepared for an signed by each tenant and filed by tenant's name, for ready reference, until the unit is vacated. A visible index file is preferred. When the unit is vacated the registration record will be removed, completed, and filed by month of vacancy for audit purposes. Each tenant will be furnished an inventory of the contents of the unit occupied, and the condition thereof, and will acknowledge receipt in writing.

2. O c c u p a n c y

Record. The accommodations officer or designated representative will maintain an occupancy record of each unit. The record will indicate the move-in date and the intended date of vacancy. The intended date of vacancy will

be changed to the actual date of vacancy when the tenant actually vacates. The accommodations officer, or designated representative, will verify that the unit is vacated on the date specified and inspect the unit and its contents for loss or damage before the tenant receives a refund or leaves the premises.

B. Charges.

1. General. Each tenant is required to pay rent for the premises occupied which will include furniture, fixtures, and utilities. In addition, each tenant is required to pay for the loss of or damage to the premises occupied, including contents when such loss or damage is caused by deliberate or negligent acts of the tenant, members of his household, or his guests. The tenant will sign an agreement that he accepts financial responsibility.

2. Unit Rental Rate.
A daily fixed unit rental rate for each type of unit will be established by the accommodations officer and approved by the commanding officer. The rate will include the following items:

- a. Estimated cost to maintain each unit,
- b. Estimated depreciation cost of the contents of the unit,
- c. A one-time cleaning and linen charge,
- d. Estimated cost of common services,
- e. Estimated cost of utilities furnished, and
- f. Amount to cover the cost of overhead expenses.

3. Direct Charges.
The tenant will be required to pay directly for services furnished from sources other than those furnished by the transient family accommodations officer.

4. Advance Payments and Security Deposits. The tenant will be required to pay, in advance, for the estimated number of days he intends to occupy the premises. The establishment of a security deposit to forestall delinquencies, or to cover loss or damage of government property, will be optional and within the discretion of the commanding officer, and, if required, will be in addition to the advance rental payment. The amount of the security deposit, when required, will be established by the accommodations officer and approved by the commanding officer.

5. Refunds. The tenant will be refunded the difference between the advance payment made and the actual rental charge, and the amount of the security deposit or the difference between the amount of the security deposit and any charges assessed for loss or damage to government property. Such refunds will be made in cash from the departure fund, cash receipts, or a change fund when accompanied by proper documentation. In those instances where the charges for loss or damage to government property exceed the amount of the security deposit, the additional funds will be collected from the tenant before he leaves the premises.

C051406 Host Nation Support-Master Labor Contract (MLC) Cost Sharing. In those cases where a foreign country is committed to fund part of the personnel allowances for its nationals, then the NAFI shall be obligated only for the NAFI portion of the cost.

CHAPTER 6

RECORDING FINANCIAL TRANSACTIONSC0601 GENERALC060101 Journals, Ledgers and Forms.

This chapter describes basic journals, ledgers, and forms which will be maintained locally for the purpose of recording and accumulating financial data and preparing related statements and reports. MWR activities participating in centralized accounting systems under the control of the Bureau of Naval Personnel will use program manager prescribed forms and procedures.

C060102 Illustrative Examples. The various records described, and in some instances shown herein, are presented as illustrative examples and, as such, may be modified to fit the type of accounting equipment utilized, the type and volume of transactions processed, and the requirements of program managers. The diversity of operations makes it impractical to prescribe internal records to meet the operational requirements of all morale, welfare, and recreational activities. Commercial type journals, ledgers, and forms may be procured or devised locally.

C060103 Journalizing Rules. The fundamental rules for journalizing are listed below:

record: A. Debit entries are to

assets; 1. Increases in

liabilities; 2. Decreases in

losses; 3. Expenses or

worth. 4. Decreases in net

B. Credit entries are to record:

1. Decreases in assets;

2. Increases in liabilities;

3. Income or gains;

4. Increases to net worth.

C0602 JOURNALS.

A. General Journal. The general journal is the form for recording all financial occurrences and value changes not within the scope of the other books of original entry. Activities in a centralized accounting system submit a general journal voucher to an accounting unit rather than post to this journal. Most financial transactions will be recorded in one of the special journals, limiting the use of the general journal to the recording of unusual transactions. Unlike the special journals, postings from the general journal to the general ledger may be made as they occur and not at the end of an accounting period. NAVCOMPT Form 730 may be used for this purpose.

B. Cash Receipts Journal. The cash receipts journal is the daily record for recording all cash receipts and bank deposits for activities not participating in a centralized banking system. The journal will contain columnar headings to show the date, description, total amount received, amount deposited, and separate columns to provide credits to the most commonly used accounts. All cash received regardless of source will be recorded in this journal. The journal will also include a general ledger credit column for receipts that are not provided for under the separate columnar

headings. At the end of the accounting period, all columns will be totaled and balanced. Each column total is then posted to the general ledger, except the general ledger credit column for which individual entries are posted by account classification. NAVCOMPT Form 732 may be used for this purpose.

C. Cash Disbursements Journal. The cash disbursements journal is used by activities not utilizing a central banking system to record all disbursements. Columnar headings will be provided for the date, description, check number, voucher number, the amount of the check, discounts earned, and separate columns to provide for debits to the most commonly used accounts. This journal will also include a general ledger debit column to record disbursements other than those provided for in the separate columns. At the end of the accounting period, all columns will be totaled, balanced, and posted to the general ledger except the general ledger debit column for which individual entries are posted by account classification.

D. Purchase Journal. The purchase journal is used to record the liability (accounts payable) and make distribution of charges at the time goods or services are received. Columnar headings will be provided for the date, the name of the vendor, invoice number, purchase order or voucher number, accounts payable credits, and separate columns to provide for distribution to the most commonly used accounts. A general ledger debit column will be included for distribution to accounts not provided for under the separate columnar headings. At the end of the accounting period, each column will be totaled and posted to the general ledger except the general ledger debit column for which individual entries are posted by account classification. Activities in a centralized system post all unpaid bills to an accrual journal voucher at the end of an accounting month.

E. Purchase Journal - Check Register. The purchase journal check register may be used in lieu of the purchase and cash disbursement journals. The NAVCOMPT Form

734 serves to combine the functions of these two journals. A section is provided to record the liability for purchases and make distribution of charges at the time goods or services are received. The disbursement section is used to document the payment of funds. Columnar headings are provided for dates, description, name of vendor, invoice, voucher and check number, and separate columns are provided for the most commonly used accounts.

F. Payroll Journal. A payroll journal is used to record all the information necessary for the preparation of an activity's payroll. The use of a payroll journal is not mandatory but is prescribed as an optional procedure where the number of employees is sufficient to justify its maintenance as a desirable practice. Activities employing a small number of employees may record the payment of salaries directly in the cash disbursements journal. The data concerning each employee contained in the payroll journal or the cash disbursements journal are posted to individual earnings records, which must be maintained for each employee. Summary totals from this form are posted directly to applicable accounts in the general ledger or onto a payroll summary form used by a mechanized system. When the use of a payroll journal is deemed appropriate it must contain as a minimum the information recorded when a NAVCOMPT Form 2210 is used.

1. When utilized, this form is prepared for each payroll period. This form consists of two parts; Part A (which is used to record employee work and leave information and gross earnings (including free meals received and tips reported by employees)) and Part B (which is used to record deduction information, net wages, check number and expense distribution). To complete the form, if an employee works more than one shift or more than one job in a single pay period, the information should be recorded for each job or shift on separate lines of the form. An additional line should then be used as a total line for columns (15-29). Part B will then be filled out for this total line only. Though it takes up additional space, this procedure eliminates the most common payroll errors made by payroll

clerks. For example, if an employee works two separate jobs, two individual lines and a total line would be used. Similarly if an employee works two different shift differentials a total of three lines would be used. If an employee works only one job or one shift and works overtime, only one line is used.

2. Note that annual leave expense is the dollar amount for the number of hours of annual leave earned during the pay period (column 6 x column 14) while sick leave expense is the amount of sick leave paid during the pay period (column 21). In general an employee's wages are charged to the department in which he works. If the employee performs an administrative function, record that employee's wages under Salaries and Wages Administrative.

G. Combination Journal - Ledger. This is an alternative record used as a book of original entry. Activities that have a limited number of transactions may utilize the combination journal-ledger. All receipts and disbursements are recorded daily. All entries must be supported by valid receipt and disbursement vouchers. Columnar headings are provided to show the date, explanation, check and voucher numbers. Debit and credit columns are incorporated to meet the operational needs of the activity. As a minimum, the format contains the following three sections: cash in bank, general ledger and net worth. The total of all debit columns must always equal the total of the credit columns. A separate general ledger is not required. Prepare the trial balance and financial statements directly from the information contained in the combination journal-ledger. Subsidiary ledgers for accounts receivable and accounts payable must be maintained.

C0603 LEDGERS.

A. General Ledger. The general ledger is the record in which all accounting entries are ultimately summarized. The accuracy of the information recorded must be absolute in all details. The data contained in this record is used as the basis from which the financial statements are constructed. A separate

ledger sheet will be maintained for each account used. NAVCOMPT Form 733 may be used as the general ledger. At the end of the accounting period, a trial balance will be prepared and each control account reconciled with its related subsidiary ledger.

B. Subsidiary Ledger. A subsidiary ledger is used to support a general ledger account balance. It is mandatory that subsidiary ledgers be maintained for accounts receivable and accounts payable and any other account which management deems necessary for control purposes. The NAVCOMPT Form 733 may also be used as a subsidiary ledger form.

C0604 FORMS.

A. Expenditure Voucher (NAVCOMPT Form 740). This form will be used for recording all purchases and other expenses when a voucher system is desirable. When invoices are payable separately under discount, a voucher will be prepared for each. One voucher is prepared for each vendor when all invoices for that vendor are paid by one check.

B. Property and Depreciation Record (NAVCOMPT Form 742). The property and depreciation record is used to record nonexpendable property (property valued at \$1000 or more per item or set of items) and related depreciation, and may be used to record expendable property and special property items when deemed necessary for control purposes. As a minimum, this record must show a complete description of the asset. Only one item or number of like items will be recorded on each form. Property and depreciation records supporting the fixed assets general ledger accounts must be maintained separately from stock record cards for merchandise inventory.

C. Stock Record (NAVCOMPT Form 742-1). The stock record (NAVCOMPT Form 742-1) is used to record resale merchandise and supplies in a warehouse for storeroom. It may be used to record expendable property. The form is designed to accommodate recording of like items of merchandise and supplies. The stock record

must show a complete description of the merchandise and all pertinent information regarding receipt and issues.

D. Petty Cash Voucher (NAVCOMPT Form 743). This form is used to support all disbursements made from the petty cash fund. Vouchers are prenumbered sequentially and controlled. When the payment is to be charged to more than one control account, the amount applicable to each account is shown on a separate line. These separate lines must total to the amount paid. Persons requesting reimbursement from the petty cash fund must complete a petty cash voucher signing the "Received By" block and attach a valid receipt.

E. Individual Earnings Record (NAVCOMPT Form 2209). This form is used to accumulate payroll information for each employee on a quarterly and annual basis and facilitates the preparation of social security and W-2 earnings statements, which must be furnished as required by federal law. A signed statement of working conditions or a contract of the terms of employment should be obtained from each employee.

F. Daily Activity Record (NAVCOMPT Form 2211). The daily activity record is used to record all activity income, and when properly used creates a built-in internal control system which protects the cash assets. All individual cashiers responsible for receiving cash and charge sales record the required information on a daily activity records upon completion of their assigned work schedule and turn the cash and the NAVCOMPT Form 2211 in to the designated person. The person designated to receive the cash verifies the cash and charge sales and records the required additional information on the NAVCOMPT Form 2211. The person designated reads the register, records the readings on NAVCOMPT Form 2211, and computes cash overage or shortage. All entries on the daily activity record must be made in ink. No corrections may be made to lines 1 through 6. If errors are made on these lines, the cashier must either destroy the form (or if locally required void and surrender the erroneous form)

and prepare a new one. Authorized corrections on other lines of the form are made by drawing a single line through the error and writing the correct amount immediately above. Corrections may be made only by the person making the original and must be initialed and dated.

G. Certificate of Disposition (NAVCOMPT Form 2212). Nonappropriated fund procured property that is controlled by use of a property and depreciation or stock record which has become unserviceable or missing may not be dropped from an activity's records until a certificate of disposition is prepared by the activity and approved by the commanding officer or his designated representative. Annotations are made on the form to indicate the cause of the condition and substantiating documents including custody receipts are attached. In the cases where individual culpability is known or suspected, an investigation concerning the property should be conducted. The safeguards of the Uniform Code of Military Justice (UCMJ) Article 31 must be followed if the individual is a member of the Armed Forces and is suspected of any offense.

H. Purchase Order (NAVCOMPT Form 2213). A purchase order must be used for all purchases of supplies, services, materials and equipment from commercial sources except for purchases made by contract or from the petty cash fund. When requisitioning merchandise from the Naval Supply System, forms are prescribed by the local supply activity. The activity's designated purchasing agent completes NAVCOMPT Form 2213 to initiate the purchasing process. After completion, the original is sent to the vendor. The duplicate is forwarded to the bookkeeper for inclusion in the numerical "open order" file maintained in that department. The triplicate and quadruplicate copies are forwarded to the area where the merchandise will be received, where an "open order" file will be maintained by vendors' name until delivery. The last copy is retained by the purchasing agent for reference purposes. After receipt of goods, the purchase order copies are circulated as described in Chapter V. Activities participating in a centralized system use 2147 in lieu of

NAVCOMPT Form 2213. NAVCOMPT Form 739 may be used by all other activities until present stocks are exhausted.

I. Requisition (NAVCOMPT Form 2214). A requisition must be used to document the transfer of all merchandise or operating supplies from one department of an activity to another department (warehouse to resale location or resale location to resale location). It may also be used to document transfers from one activity to another. Requisitions are prepared by the department or activity requesting the items in a sufficient number of copies to provide copies for the issuing activity, the requesting activity, the accounting department of each of these activities, and an additional copy for a stock control point if different from the issuing or requesting activity. In most instances, requisitions between departments of a single activity are prepared using the three copies of the form. For requisitions between activities, an extra copy must be prepared so that both bookkeeping departments have documentation to support the accounting records. The forms are sequentially prenumbered by stamping, overprinting, or typing and are issued in blocks to the individual departments. Continuation sheets, where necessary, are prepared by the use of a locally developed form that utilizes the same format as the requisition, or by voiding the next successively numbered requisition and annotating it with the requisition number of the original, the words "continuation page" and indicating the number of each page. For example, if three sheets are used in a requisition, the tops of all copies of the first sheet are marked "1 of 3", the second "2 of 3", and third "3 of 3". DD Form 1149 may also be utilized for this purpose.

J. Inventory Record (NAVCOMPT Form 2215). An inventory record is used to list the value and quantity of an activity's inventory as shown by stock records or a physical sighting and count of the resale items, operating supplies, and replacements. This listing is then reconciled with the valuation for these accounts shown in the general ledger. Valuation is made on a first in, first out basis for

both cost and retail values. Last invoice price may be used to price merchandise located in sales outlets. Discrepancies between the valuations shown on the inventory record and the general ledger and/or stock records must be investigated and proper adjustments to the accounting records made. This investigation should ascertain the cause of the discrepancy and the corrective action necessary to prevent it. Investigation results must be documented and made a part of the official records of the activity. Locally developed or procured forms may be substituted as an inventory sheet, provided the information shown is equivalent to the information requirements of the NAVCOMPT Form 2215.

K. Property Receipts. To facilitate control and to insure maximum use of property, the commanding officer or his designated representative will specify time limits for the use of items of property in great demand.

1. Temporary Periods. A signed custody receipt (NAVCOMPT Form 744) will be obtained from each individual borrowing property without charge. This receipt will be returned to the individual when the property is returned. Prenumbered sales vouchers for rentals (such as boats, trailers, golf clubs, etc.) should be used. Returns should be annotated on customer's voucher.

2. Issues for an Indefinite Period. The custodian will maintain a file of signed custody records (NAVCOMPT Form 745) obtained from individuals charged with the accountability of property issued for an indefinite period.

L. Consolidated Property Record. This memorandum record will be maintained to show a complete listing of each expendable item purchased by the activity and stored in the warehouse or storeroom, and special items as defined in Chapter V. Property and depreciation records (NAVCOMPT Form 742) or stock records (NAVCOMPT Form 742-1) will be maintained as subsidiary records to the memorandum consolidated property record.

M. Receipt Voucher. A receipt voucher (procured locally) will be used for receipts of cash not recorded in cash registers or on sales slips. These forms will be prepared in triplicate for each cash collection. The original receipt voucher will be given to the individual making payment. The second copy will be used to post the cash receipts journal. The third copy will be retained for numerical accountability. As a minimum, the form will contain the date of receipt, number of receipt, amount received, received from, received by and received for.

N. Special Event Reports. A special event report (procured locally) will be prepared in ink for each special event and will show the date of the event, collections made, tickets sold, list of prize winners, prizes won, dollar value, signature of persons winning prizes, and any other pertinent data deemed necessary by management. The report will be signed by the individual in charge of the event and one other person who will verify sales and cash collected. If the special event is of a recurring nature, i.e. weekly bingo, then the report is unnecessary provided equivalent data is maintained through Daily Activity Records, Receipt Vouchers, etc. to enable construction of the report if need be.

O. Registration Record (NAVCOMPT Form 2104). The registration record must be prepared for and signed by the tenant of BOQ'S transient accommodations, guest houses, etc.

C0605 REPORTS. In order to provide management with current information pertaining to the financial condition of the activity, the submission of financial statements periodically is of utmost importance. Financial statements are prepared at the end of each accounting period; monthly, quarterly, or as prescribed by the program manager. The accounts prescribed in this handbook have been designed to facilitate the preparation of such statements. All financial statements are prepared from the official accounting records. Financial statements must be submitted by each activity in accordance with instructions issued by the applicable program manager. A sample balance sheet and income

statement are shown in chapter VII, for illustrative purposes only. Reporting requirements and formats for MWR program managers are specified by the Secretary of the Navy and the Comptroller of the Navy, respectively. SECNAVINST 7000.22(series) and Appendix H provide guidance for reporting requirement and formats.

C0606 PROCUREMENT OF FORMS.

A. NAVCOMPT Forms. NAVCOMPT forms prescribed or mentioned in this handbook may be obtained by submitting a DOD Single Line Item Requisition (DD Form 1348), citing the ordering number of the form desired to:

Commanding Officer
Naval Publications and Forms Center
5801 Tabor Avenue
Philadelphia, Pennsylvania 19120

The names, form numbers, and ordering numbers of NAVCOMPT Forms commonly used in morale, welfare and recreation programs are listed on the following page.

B. Other Forms. All other forms deemed necessary at morale, welfare and recreation activities must be procured and/or developed locally, except as prescribed or made available by applicable program managers.

Form Name	NAVCOMPT Form Number	Ordering Number
General Journal	730	0104-701-1900
Cash Receipts Journal	732	0104-701-2100
General Ledger	733	0104-701-2200
Purchase Journal-Check Register	734	0104-701-2302
Budget Record	735	0104-701-2400
Expenditure Voucher	740	0104-701-3000
Property and Depreciation Record	742	0104-701-3200
Stock Record	742-1	0104-701-3250
Petty Cash Voucher	743	0104-701-3300
Custody Receipt	744	0104-701-3400
Custody Record	745	0104-701-3500
Status of Nonappropriated Fund Balances	2062	0104-702-3601
Registration Records	2104	0104-703-8300
Retail Price Change	2145	0104-704-2500

Order for Work and Services	2275	0104-702-2751
Voucher for Disbursement and/or Collection	2277	0104-702-2770

CHAPTER 7

INVESTMENTSC0701 GENERAL

C070101 Policies. This chapter establishes NAF investment policies as prescribed by DoD program policies and assigns the program managers' responsibilities for financial management of their NAF investment programs. DFAS-HQ/A will annually review and monitor selected investment information provided by program manager.

C070102 Applicability. The policies set forth herein apply to exchanges and all military and civilian Morale, Welfare, and Recreational (MWR) investments within the Department of the Navy, except retirement funds. Policies pertaining to the management, investment and administration of retirement plans are contained in SECNAVINST 5300.22A(series), Navy and Marine Corps Personnel Policy Manual for Nonappropriated Fund Instrumentalities (NAFIs).

C070103 Limitations. Nonappropriated funds may be invested, only as provided for in DoD program policy. The size of the investment program must not exceed the projected need to fund otherwise unfunded MWR requirements. Funds will not be accumulated solely for investment income. However, cash assets in excess of immediate operational needs will be invested as soon as possible after receipt. Program Manager will ensure that adequate investments are established to fund replacement of tangible fixed assets, employee severance pay, pension plans, constructing and alteration of facilities, mobilization contingencies, and new operational programs that may be introduced.

C0702 RESPONSIBILITIES.

C070201 Program managers. Program managers (Commandant of the Marine Corps, Commander, Naval Supply Systems Command, Commander, Naval Military Personnel

Command; and Commander, Military Sealift Command) will:

A. Establish and maintain adequate systems of internal control that provide reasonable assurance that the policies set forth herein are complied with.

B. Establish an investment steering committee and appoint competent membership.

C. Appoint investment officers who are financial management specialists with training in investment banking.

D. Review and approve, at least annually, an investment plan (strategy) prior to authorizing funds to be invested. The plan should also identify the projected requirements for which the funds are being invested. Such annual plan will be modified by the Program Manager as internal and/or market conditions require.

E. Establish a system to review, evaluate and track the investment portfolio performance.

F. Ensure that the procurement and/or sale of investment instruments is conducted on a competitive basis. This process, at a minimum, requires obtaining multiple telephonic quotes and rotation among qualified bidders to assure:

1. Maximum yields subject to risk evaluations and forecasted cash positions;

2. E q u i t a b l e treatment of bidders. All bids and consummated transactions will be documented.

G. Require an annual review and/or inspection of investment funds to include the evaluation of internal controls and follow-up on corrective action taken on recommendations in Naval Audit Service (NAVAUDSVC) and private sector audits and any other inspection recommendations.

C0703 REPORTING REQUIREMENTS

C070301 Annual Report. Annually, program managers will be requested to submit a summary of NAF investments to DFAS-HQ/A for review.

A. The annual report will be as of 30 November.

B. The report will be submitted for each year in time to reach DFAS by the 5th workday in January.

C. The report will include identification of:

1. Investments placed with financial institutions and a certification that they are properly insured and collateralized as required by DoD program policy.

2. Investments made with foreign financial institutions; and

3. Investments made by field activities.

C070302 Format. In addition to the reports, addressees will provide a copy of all audits performed, by internal as well as external auditors.

ATTACHMENT C.1

RULES RELATIVE TO THE PROTECTION OF BANK DEPOSITS
(CHECKING ACCOUNT)

1. Responsibility. The manager as a direct representative of the commanding officer is responsible for the protection of all nonappropriated funds including deposits with financial institutions and the associated collateral requirements.

2. Deposits with Insured Institutions in the United States. Only banks insured by the Federal Deposit Insurance Corporation, savings and loan associations insured by the Federal Savings and Loan Insurance Corporation, or credit unions insured by the National Credit Union Administration, shall be selected as depositories for nonappropriated funds. Deposits up to \$100,000 may be deposited in such insured institutions for each time account (savings and certificate of deposits), and deposits up to \$100,000 may be made for each demand account (checking).

a. Banks. A deposit in excess of \$100,000 is required to be collateralized, prior to the depositing of the funds, by the institution pledging acceptable collateral with the district Federal Reserve Bank or a third party custodian approved by a Federal Reserve Bank. (Refer to paragraph 5 and 6 of this Attachment).

(1) Insurance coverage for any interest or dividends received during the life of the certificate will not be required until the certificate expires. If the dividends are paid quarterly, then time certificates should only be executed for a one year period.

(2) Provision is made under Section 10 of the Act of June 11, 1974, 56 Stat. 356 amended, (12 U.S.C. of 265) whereby banks insured by the Federal Deposit Insurance Corporation which have been designated depositories by the Secretary of the Treasury may deposit securities in the form of United States Treasury bonds or, otherwise, any other

Federal funds. The deposit is subject to the control or regulation of the United States or any of its officers, agents, or employees. Under regulations of the Treasury Department, such bonds or securities must be deposited with a Federal Reserve Bank of the United States Treasury Department or a designated third party custodian.

b. Credit Unions and Savings and Loan Associations. Although insured credit unions and savings and loan associations are eligible to receive deposits of nonappropriated funds, such deposits are limited to the maximum amount covered by insurance namely, \$100,000. Deposits in excess of insured amounts must be collateralized in accordance with paragraph 5 of this Attachment.

3. Deposits with Overseas Branches. Deposits in overseas branches of United States banks are not insured when deposits are only payable in a foreign country or at an office of the bank located in areas outside the United States, District of Columbia, Puerto Rico, and the Virgin Islands. Therefore, collateral in the full amount will be required to cover such uninsured deposits. Deposits in the currency indigenous to the country may be made in branches of United States banks or in foreign depository banks without collateral but are limited to the amounts required for current operating expenses and construction and severance/retirement liabilities, as collateral cannot normally be obtained from foreign banks.

4. Insured Deposits. The term "insured deposit" contained in the Federal Deposit Insurance Act means the net amount due to any depositor for deposits in an insured bank, after deducting offsets, less any part thereof which is in excess of the maximum coverage. The net amount shall be determined according to such regulations as the Board of Directors of the

Federal Deposit Insurance Corporation may prescribe. The above method also applies to funds deposited in insured credit unions and savings and loan associations.

In determining the amount due any depositor, there shall be added together all deposits in the insured institution maintained in the same capacity and in the same right for his/her benefit either in his/her now name or in the name of others. Deposit maintained in the same insured institution in different rights or capacities are not so added together for insurance computation. When a custodian has custody of several funds/accounts and each fund/account is maintained in a different right or capacity, each fund/account is entitled to the maximum insurance coverage. The foregoing provides that one or more funds/accounts can be administered by a single custodian without impairing the insurance protection.

Under Section 10 of the Act of June 11, 1942, and subsection 2(m) of the Federal Insurance Act, each officer, employee, or agent of the United States having official custody of public funds and lawfully depositing these funds in a bank insured by Federal Deposit Insurance Corporation is, for the purpose of determining the amount of the insured deposit, considered a depositor in such custodian capacity separate and distinct from any other official custody of public funds, and lawfully depositing these funds in the same insured bank in custodial capacity. Since nonappropriated funds under military control have been held to be public funds within the meaning of this Act of June 11, 1942, as amended, each person acting as official custodian of such nonappropriated funds and lawfully depositing then in any insured institution will be insured up to the maximum limit on such deposits maintained in each different right or capacity provided that separate records are maintained for each nonappropriated fund account.

5. Pledge of Collateral. For deposits of Navy or Marine Corps organizational funds in excess of insured amounts, depositors shall request the bank, savings and loan association, or credit union to immediately pledge the

necessary collateral with a designated third party custodian and require that the depositor be notified by message within two (2) days after deposit. If necessary collateral is not pledged as requested, the funds should be removed and no funds in excess of \$100,000 should be deposited in the financial institution.

6. Third Party Custodians. The third party custodian relationship is between the Federal Reserve Bank and the financial institution and is supported by a standard third party agreement. Prior to using a third party custodian you should obtain a copy of the Agreement and advise the Federal Reserve of your intention to use the custodian. You should also have an agreement whereby the custodian will provide you monthly statements which show the type and amount of collateral pledged by each institution for your account.

7. Utilization of Banking Facilities. The services of banking institutions operating on military installations will be utilized to the extent there is a need for such services and the services and the on-base banking institution can provide the types of service needed at a competitive price. The on-base banking facility was established and justified, in part, as a means of providing convenient banking services to custodians of nonappropriated funds. The use of other banks would tend to defeat the purpose for which the facility was established by denying it the support that comes from the maintenance of deposit accounts. This practice is necessary in fairness to the banking facility and to avoid possible subsidy by the Treasury Department and the Department of the Navy relating to such accounts. If an activity has approval to automate its payroll system with a commercial bank or service center and such services are not available at the installation banking facility, such limited service may be contracted for elsewhere.

8. The Investment of Funds. The investment of funds in excess of current operating requirements in insured accounts or in the U.S. Government securities is authorized, subject to the conditions described in paragraph 2 above. See Chapter 8 for investments.

9. Savings and Loan Associations. Savings and Loan Associations which are insured by the Federal Savings and Loan Insurance Corporation are eligible to receive deposits of nonappropriated funds up to a maximum of \$100,000. Because there is no way to obtain collateral from savings and loan associations, deposits are limited to the amount covered by insurance - namely, \$100,000.

ATTACHMENT C.2

FEDERAL UNEMPLOYMENT COMPENSATION PROGRAM FOR
NONAPPROPRIATED FUND PAID EMPLOYEES1. GENERAL

a. Authority. 5 U.S.C. 8501 to 8508 amended the Social Security Act by adding an unemployment insurance program for Federal civilian employees. The Secretary of Labor administers the program through agreements with state employment security agencies. Under terms of each agreement, the state agency, as an agent of the United States, takes claims and pays benefits to eligible Federal service employees under the same terms and conditions of its state unemployment compensation law which apply to industry employees who are covered by and file claims under the state law. In those instances where the Secretary of Labor does not have an agreement with an individual state, the Secretary, under regulations prescribed by him, shall pay a claim in the same amount, on the same terms, and subject to the same conditions as would be paid under the unemployment compensation law of the State if an agreement did exist.

b. Eligibility. Nonappropriated fund paid civilian employees and military personnel employed voluntarily during off-duty hours are considered as having rendered "Federal Service" thereby entitling them to unemployment benefits. To be eligible for unemployment benefits under any state law, a claimant must be ready, willing and able to work, in addition to meeting other conditions prescribed under the state law.

c. Base Period. The amount of unemployment benefits to be paid and the number of weeks for which benefits will be paid is based on the amount of "Federal Service" (and state covered) wages earned in a 52 week period (base Period) preceding the claim. "Base period" is a 52 week period defined in each state law, is variable among the state, and in most states is the first four of the last five completed calendar quarters preceding the claim.

2. COVERAGE. All employees paid nonappropriated funds within the United States, Puerto Rico, Virgin Island, and all United States citizen employees wherever located perform "Federal Service" for unemployment compensation purposes. The program requires no contributions from MWR employers or employees and provides unemployment benefits similar to those provided to workers in private industry. The Department of the Navy pays the cost of any benefits paid to its employees.

3. NOTIFICATION TO EMPLOYEES. Standard Form 8, Notice to Federal Employees about Unemployment Compensation will be issued on or before the last day of active duty to employees whose services terminate for any reason, who transfer to an activity served by a different payroll office, or who are placed in a non-pay status for seven or more days. Additionally, a personnel separation statement will be issued showing the employee's name and social security number, salary rate, date of separation and specific reason(s) for separation or placement in a non-pay status. (The employing unit should maintain a copy of this locally produced personnel action document for reference purposes.) Activities will ensure that the payroll unit designation and address and Navy MWR identification code 426 are inserted in the space provided on SF-8 is current and complete. On presentation of the SF-8 when claim is filed, the state agency addresses its request for wage and separation information (Form ES-931) to the payroll unit address shown on the SF-8.

4. REQUEST FOR WAGE AND
SEPARATION INFORMATION

a. Responsibility. Pursuant to 5 U.S.C. 8501-8508 requirements, Navy activities will furnish information requested by state employment security agencies concerning civilian

employees wages and employment to determine claimant's entitlement to unemployment compensation benefits.

b. Submission of Request. The state agency will send Form ES-931, Request for Wage and Separation Information, to the payroll office address shown on SF-8 when a claim is filed by a former employee. The activity will complete all Form ES-931 items on the basis of its payroll records and personnel action documents. Navy Identification Code 426 will be entered in Section II, Item 4, on all Forms-931. One complete form will be retained in a separate alphabetical file by name and the remaining Form ES-931 copies returned to the state employment security agency address shown on the form. The file copy of the Form ES-931 copies and related unemployment compensation forms will be retained for a period of at least two years.

c. Control of Form ES-931. A control (register or card file) will be established to ensure that the completed Form ES-931 and related forms (Form ES-934), Request for Information or Reconsideration of Federal Findings (Form ES-936), and Request for Verification are returned to the state agency within four working days of receipt of the form. If the Form ES-931 cannot be completed and returned within four working days of receipt, the activity will immediately inform the state agency that completion and return will be delayed and will include an estimate as to when the completed form will be returned. If another activity has the wage employment records required for completion of Form ES-931, the form should be sent to that activity for completion and the state agency should be advised of the transfer. If there is no record of employment, all forms should be returned promptly to the state agency with the notation "No record of employment."

5. SOURCE OF INFORMATION TO COMPLETE FORM ES-931. Information for completion of Form ES-931 will be obtained from the individual pay record. The pay record should be retained for 30 days in the event that the state agency may request information in addition to that reported on Form ES-931. If a

Request for Additional Information, Form ES-934 is pending, the pay record should be retained until such request has been processed.

6. COMPLETION OF FORM ES-931

a. Information furnished by state agency. The state agency will have completed the parts of the form which identify the claimant for whom wage and separation information is being requested and which specify the base period for which wage data are needed.

b. Completion of entries by activity payroll office

(1) Item 1a, Federal Service. Check "yes" or "no" as applicable. If no employment was performed during base period specified, briefly explain, complete item 3, sign the form and return to state agency. Any question concerning whether or not a specific type of service is "Federal service" will be referred to the office of Civilian Manpower Management for determination.

(2) Item 1b, Location of last employment. Enter the state or foreign country in which "duty station" was located as described on Form ES-931.

(3) Item 2a, Base Period - Wage Information. Enter gross wage information before reductions for the base period indicated. Complete the item in the manner and only to the extent specified. Include in "base Period wages" all remuneration including cost of living allowances, post differentials, back-pay awards, payments for sick leave, allowances in kind, and retroactive pay increases (allocated to the period in which paid). Report lump-sum terminal leave payments exclusively in item 3a, Form ES-931.

(4) Item 3, Terminal Leave and Separation Information

(a) Item 3a, enter information as to whether or not lump-sum terminal leave payment was made. If "yes", enter dates or period covered by terminal leave

and enter the dollar amount of the lump-sum payment for terminal leave and the date of payment. If "no", so indicate. Also enter the hourly rate of pay and the claimant's hours of regular duty per workday and basic work week hours.

(b) Item 3b, enter the date on which the employee was separated.

(c) Item 3c, enter the date of the employee's last day of active pay status, if earlier than date of separation or if employee has not been separated.

(d) Item 3d, enter reason for separation or non-pay status. If past experience with Forms ES-934 in similar cases shows the information in "Remarks" is inadequate for state agency adjudication purposes (such as "Suspended", "Retired", "Personal Reasons"), enter, in addition, clarifying findings obtained from the personnel office.

7. BACK PAY AWARDS. Back pay awards may require a redetermination of a claimant's benefit rights, or the recovery of benefits already paid. Therefore, the state agency to which a Form ES-931 has been sent for such employee should be informed by letter of the date, amount, and period covered by the back pay award. Upon receipt of this information, the state agency will determine whether such back pay wages are in the claimant's base period. If the back pay wages are in the claimant's base period, the state agency will request a corrected assignment of wages by Form ES-931 to include the amount of back pay wages determined to be in the claimant's base period along with other wages for the period. The activity will not attempt to deduct unemployment compensation benefit payments from back pay awards (35 Comp. Gen 241). Recoveries will be made exclusively by state agencies.

8. REQUEST FOR INFORMATION OR RECONSIDERATION OF FEDERAL FINDINGS, FORM ES-934. It is essential that the state agency have adequate information on which to base its determination of entitlement. If for any reason the information supplied on Form ES-931 is not

adequate, the state agency or state administrative appeal authority will request additional information. Provision is made also for a claimant, within the time limits specified in the state law, to request a Federal agency to supply additional information or to reconsider its findings. The claimant's request will usually be made through the state agency with which his claim was originally filed. These requests may be made by Form ES-934, Request for Information or Reconsideration of Federal Findings, by letter, or by other state forms. To expedite processing, all requests should be subject to the same control as Form ES-931. If an answer cannot be made in 4 days, the state agency should be notified when an answer can be expected. The Federal agency shall furnish any relevant information requested which it is not otherwise prohibited by law from releasing. If the request is for reconsideration of findings, the Federal agency should consider any information supplied by the claimant, the state agency, or the state administrative appeal authority, and should review its findings. It should promptly correct any errors or omissions and should reverse, modify, or affirm its findings, and should advise the state agency of its action and the basis thereof. The Forms ES-934 pertaining exclusively to separation information should be referred to the personnel office for its action. The personnel office should return the completed Form ES-934 should be retained and the remaining completed forms returned to the state agency.

9. VERIFICATION OF WAGE AND SEPARATION REPORTS. Each state agency will request verification of a sampling of Forms ES-931. These requests will be made on Verification Letter Form ES-936. This form should receive the same prompt attention as Form ES-931. In order to provide a proper check, it is desirable that Form ES-936 be completed by an employee other than the person who prepared the original Form ES-931. The state agency will send a representative to visit any activity if a reply to Form ES-936 indicates that there has been a lack of understanding of the program, that errors have been made, or that the activity desires to discuss reporting problems.

10. NOTICE TO STATE AGENCY OF REFUSAL OF WORK OFFER. When an offer of reemployment is refused by a former employee who worked for the activity in the area covered by the personnel and payroll offices where the offer is made, the personnel office should promptly notify the payroll office of the refusal. On receipt of such notice, the payroll office will review its alphabetical file of completed Forms ES-931 to determine whether the file contains a form pertaining to the person who refused reemployment. A copy of a completed Forms ES-931 should be maintained in this file for every former employee in the area covered by the payroll office who filed a claim for unemployment compensation benefits. If the file reveals that the former employee filed claim for unemployment compensation benefits and if the "Date of Request" in the upper right-hand corner of the Form ES-931 is within 12 months of the date on which reemployment was offered, a notice should be sent to the state agency which initiated the Form ES-931, giving the following information: The employee's name and social security number, the date of the job offer, the nature, location and salary of the job offered, and the reasons for the refusal, if known.

11. OTHER STATE FORMS. In addition to receiving Forms ES-931, 934, and 936, payroll units will receive several types of state agency forms furnishing information or requesting information. Two of these forms may be as follows:

a. Notice to Claim Determination. Most state laws require mailing of this form to former employers notifying them about a state decision on a claim filed by a former employee. If it appears from the notice that the state agency may pay benefits where, in the opinion of the payroll or personnel officer, the facts concerning separation should prevent such payment, the activity should file an appeal from such determination as instructed on the form.

b. Request for Wage Information for a Specific Week. When a claimant reports earnings from part time work, state agencies will request employer verification of the amount of such earnings. Request are also made when the

state believes that the claimant had earned wages but failed to report such earnings.

12. DISTRIBUTION OF UNEMPLOYMENT COMPENSATION COSTS TO FORMER EMPLOYING NAFIS. The Department of Labor assigned Federal Agency Codes (FAC) to identify "Bill to Navy Activities". Each "Bill to Activity" must identify each claimants former employing activity and work related information, i.e., wages earned, social security number, period worked, job title, reason for dismissal, etc. The following FAC(s) are assigned to the Navy and should appear on all documents used to process claims.

Federal Agency Code	Bill To Activity	Includes NAFIs Under the Command of
807	Navy Exchange Service	The Navy Exchange System and Military Sealift Command
808	Navy Rec. & Club System	Bureau of Naval Personnel Command and Chief of Naval Operations
809	Marine Corps MWR Support Activity	The Marine Corps Exchange System

FAC 426 should not be used after 30 September 1985.

13. BILLING PERIOD. Billing by the Department of Labor is accomplished on a quarterly basis and started on February 1986. The program manager has the discretion to reimburse the Department of Labor from either the central activity or individual NAFI.

14. REPORTING REQUIREMENTS. The Bureau of Labor Statistics requires an initial identification of all NAFI,s by name and address that fall under each FAC. Subsequent reporting is limited to additions or deletions of NAFIs. These reports should be forwarded to DFAS-HQ-A.

15. REMITTANCE ADDRESS. Remittance checks are payable to the U.S. Department of Treasury and submitted along with the Department of Labor request for reimbursement vouchers to the following address:

U.S. Department of Treasury
Trust Fund Branch
Pennsylvania Avenue and Madison Place NW
Treasury Annex No. 1, Room 326
Washington, D. C. 20226

ATTACHMENT C.3

NONAPPROPRIATED FUND INTERNATIONAL BALANCE OF
PAYMENTS-TRANSACTION REPORTING

1. PURPOSE. These instructions prescribe IBOP reporting requirements for all Navy nonappropriated fund activities located overseas. However, these instructions may be amplified to specific additional requirements promulgated by the Navy Civilian Personnel Instruction Par. 280.12 for civilian morale, welfare, and recreation activities, and the Naval Military Personnel Command instructions issued in the 7010.7(series) for military morale, welfare, and recreation activities.

2. SUBMISSION OF REPORTS

a. General. A Department of the Navy International Balance of Payments Transactions Report for Nonappropriated Fund transactions will be prepared in triplicate by each overseas Naval morale, welfare, and recreation activity (both civilian and military). The original of each report will be submitted to the appropriate office in accordance with the NAVCOMPT Instruction 7020.10 series in time to be received by the date specified in par. 2b. A copy of the report will be furnished the responsible commander and the second copy will be retained for reference.

b. Frequency of Reporting. Reports will be prepared quarterly governing nonappropriated fund transactions during the quarter ending March, June, September, and December. The reports will be submitted no later than twenty (20) calendar days following the close of the quarter. Except as modified in accordance with additional requirements specified by responsible offices the reports will be prepared in accordance with pars. 3 and 4.

3. REPORTING INSTRUCTIONS

a. General. This report will include only payments and receipts affecting nonappropriated funds in accordance with definitions and criteria delineated in the current

NAVCOMPT Instruction 7020.10(series). Payments and receipts affecting appropriated funds used in the operation of morale, welfare, and recreation activities will be excluded from this report. Morale, welfare, and recreation activities aboard ship will include only transactions aboard which are with activities ashore and enter the international balance of payments. All data reported will be stated in dollars or dollar equivalents for payments made in foreign currencies. The amounts reported will cover the reported quarter only and will be noncumulative.

4. PREPARATION. Each activity report will be properly identified by the title of the report, name and location of the reporting morale, welfare, and recreation activity and the quarter which the report covers. Entries will be made in the specified columns opposite the appropriate country as follows:

a. Column 1. Country. List each country, international organization, and applicable country code as provided in par. 027002-3 of the NAVCOMPT Manual.

b. Column 3. Sales. Enter here receipts from the sales of merchandise and services, including commissions from concessionaires. Excluded are concessionaire sales and receipts from any U.S. Government agency or activity.

c. Column 3. Other Revenue. Enter here receipts for membership dues, chaplains funds, net receipts from bingo, slot machines, and similar transactions.

d. Column 4. Total Receipts. Enter the sum of the receipts shown in columns 2 and 3.

e. Column 5. Net Pay, U.S. Personnel. Enter the net pay of U.S. civilian

personnel (part time or full time), and U.S. military personnel employed while off duty.

f. Column 6. Gross Pay, Foreign Nationals. Enter the gross pay of all direct or indirect hire, foreign nationals. Include all payments to or on behalf of the foreign nationals.

g. Column 7 Foreign Payments for Procurement of Merchandise for Resale. Enter here foreign payments for merchandise purchases for resale but exclude payments for purchases from any U.S. Government agency or activity.

ATTACHMENT C.4

FINANCIAL MANAGEMENT, OVERSIGHT AND AUDIT OF THE
NONAPPROPRIATED FUND (NAF) INVESTMENT PROGRAM

1. GENERAL. This Chapter amplifies and implements the NAF investment policies and assigns Department-wide responsibilities for financial management, oversight and audit of the NAF investment program.

2. APPLICABILITY. The policy set forth herein applies to all military and civilian Morale, Welfare, and Recreational (MWR) investments within the Department of the Navy, except retirement funds. Policies pertaining to the management, investment and administration of retirement plans are contained in SECNAVINST 5300.22 (series), Navy and Marine Corps Personnel Policy Manual for Nonappropriated Fund Instrumentalities (NAFIs).

3. POLICY

a. General. Nonappropriated funds may be invested only as provided for in paragraph 5. The size of the investment program must not exceed the projected need to fund otherwise unfunded MWR requirements. Funds will not be accumulated solely for investment income. However, cash assets in excess of immediate operational needs will be invested as soon as possible after receipt.

b. Risk. Each MWR activity will exercise caution to ensure the protection of funds invested. The most important factor to consider in evaluating any investment is risk. Holding an investment exposes you to some degree of risk. Higher yields often mean more risk and less liquidity. It is important to be informed about the different options available so that the return is maximized without accepting unnecessary risk or loss of liquidity. Investments authorized by paragraph 5 generally carry low levels of risk.

c. Liquidity. An asset is said to be liquid if it can be converted into cash easily and

rapidly without substantial loss in value. Liquidity is not an absolute property; it varies from asset to asset. MWR activities must have access to their funds when needed to meet operational or planned program requirements; therefore, investments must be readily convertible to cash. The maturity on investments will be limited generally to 36 months. However, investments up to 63 months are authorized provided that they are in support of a capital improvement program. Documentation must be on file to substantiate the existence of the capital improvement program.

d. Yield. In an effort to maximize the expected return on funds within the constraints of ensuring security and providing necessary liquidity, prudent action must be exercised to pursue yields of at least equivalent rates of return on portfolios of similar low risk cash management funds. This objective is secondary to the risk and liquidity objectives.

e. Investment Planning. Investment program plan (strategy) will be formulated and approved by the investment steering committee prior to investing funds. Emphasis must be placed on fund allocation when constructing the investment portfolio. Fund allocation is the process of distributing monies among the various types of investments: treasury bills; certificates of deposit; bonds; repurchase agreements; etc. This process requires a realistic assessment of the degree of risk that the MWR entity is willing to accept commensurate with the rate of return they wish to earn. In order to minimize interest rate fluctuations, activities should generally employ a hold-to-maturity strategy. The maturity of instruments should be matched with planned capital improvements and other funding requirements to the maximum extent possible. The investment plan should also incorporate the subjective aspects of risk/return management that dominate rational planning

without losing sight of the fact that (1) increases in expected return are accompanied by increases in risk and (2) investors should diversify to reduce risk. Characteristics of investment instruments are illustrated on page I-9 and are provided as guidance in investment selection. It is also a requirement that, at the annual DOD NAF review of Investment Management, an annual update be provided outlining current investment policies, procedures, and audit compliance with Service and DOD IG findings. This information will also be due to ASD(FM&P) not later than the first day of the third month following the end of the organization's fiscal year.

f. Collateralization. Funds shall not be maintained in a bank, savings association, or credit union unless they are insured by the applicable Federal insurer, or notice is received that the financial institution has pledged the necessary collateral with the appropriate Federal Reserve Bank or its designee:

(1) Collateral for checking and savings accounts deposits should cover 100 percent of the last quarter's highest daily balance in excess of the \$100,000 insured limitation. Collateral for time deposits should cover 100 percent in excess of the \$100,000 insured limitation.

(2) Insured Limitation. Investments in fund accounts for several MWR activities are limited to \$100,000 unless records are maintained by both the bank and the investor to show the balance for each activity. If multiple coverage is desired, records must reflect daily changes in amounts for each MWR activity having an interest in the account; and in all cases, the records must be available within three working days. The Federal Deposit Insurance Corporation (FDIC) Regulation, Section 330.1 specifies the record keeping requirements for multiple coverage.

(3) Program managers and/or their designees will coordinate directly with financial institutions and the servicing Federal Reserve Bank or authorized third-party custodians to obtain collateral. Procedures for

securing and pledging of collateral are contained in Treasury Financial Manual 6-9000 and are to be followed without exception.

4. RESPONSIBILITIES

a. The Assistant Secretary of the Navy (ASN) Manpower and Reserve Affairs (M&RA), is responsible for establishing MWR policy and procedures and for the overall management and oversight of matters relating to MWR programs and activities.

b. The ASN Financial Management (FM), is responsible for all policy matters relating to financial management of the MWR investment program. In fulfilling this responsibility, the ASN FM will:

(1) Issue specific guidance for the development and approval of financial management systems and provide procedures for budgeting, financial analyses, internal review, and reporting of financial information.

(2) Oversee execution of policies contained in this handbook. As a minimum, this function will require an annual review of selected investment information and monitoring collateralization requirements. The specific requirements for oversight and review will be the responsibility of the Office of the Comptroller of the Navy.

(3) Participate in the Department of Defense (DOD) investment fund review.

c. Program managers (Commandant of the Marine Corps, Commander, Naval Supply Systems Command, Commander, Naval Military Personnel Command; and Commander, Military Sealift Command) will:

(1) Establish and maintain adequate systems of internal control that provide reasonable assurance that the policies set forth herein are complied with.

(2) Establish an investment steering committee and appoint competent membership.

(3) Appoint investment officers who are financial management specialists with training in investment banking.

(4) Review and approve, at least annually, an investment plan (strategy) prior to authorizing funds to be invested. The plan shall also identify the projected requirements for which the funds are being invested. Such annual plan will be modified by the Program Manager as internal and/or market conditions require.

(5) Establish a system to review, evaluate and track the investment portfolio performance.

(6) Ensure that the procurement and/or sale of investment instruments is conducted on a competitive basis. This process, at a minimum, requires obtaining multiple telephonic quotes and rotation among qualified bidders to assure:

(a) Maximum yields subject to risk evaluations and forecasted cash position.

(b) Equitable treatment of bidders. All bids and consummated transactions will be documented.

(7) Require an annual review and/or inspection of investment funds to include the evaluation of internal controls and follow-up on corrective action taken on recommendations in Naval Audit Service (NAVAUDSVC) and private sector audits and any other inspection recommendations.

d. The Auditor General of the Navy (AUDGENAV), is responsible for the internal auditing function within the Department of the Navy (DON). He/she oversees the conduct of internal audits, including those performed by internal review and nonappropriated fund organizations and audit services provided by

private sector auditors under DON contracts. No contract for audit services may be entered into or a final payment made under an existing contract for such services without the approval of the AUDGENAV.

5. AUTHORIZED INVESTMENTS AND RESTRICTIONS. Investments of nonappropriated funds are limited to the following:

a. Banks. Interest bearing checking accounts, savings accounts, and certificates of deposit to the amount insured by the Federal Deposit Insurance Corporation (FDIC) or Federal Savings and Loan Insurance Corporation (FSLIC) or pledge of collateral with the appropriate Federal Reserve bank or its designee.

b. Savings Associations. Interest bearing checking accounts, share accounts, and certificates of deposit to the amount they are insured by FDIC or FSLIC or pledge of collateral with the appropriate Federal Reserve bank or its designee.

c. Credit Unions. Funds shall only be invested in credit unions to the amount insured by the National Credit Union Share Insurance Fund (NCUSIF) unless excess amounts are covered by pledge of collateral with the appropriate Federal Reserve bank or its designee. Credit unions serving Department of Defense installations may be covered by any state-sponsored or private share insurance plan that is at least equal to the NCUSIF coverage required for Federal credit unions.

d. U.S. Government Securities. Obligations of the Federal Government, guaranteed as to principal and interest by the U.S. Government or obligations issued by U.S. Government-sponsored enterprises. Certain securities are guaranteed by the "full faith and credit" of the U.S. Government (principal and interest) while other securities are issued by "U.S. Government-sponsored enterprises." The "U.S. Government-sponsored enterprises" were established and chartered by the Federal Government, and are sponsored by a government agency although they are privately

owned and generally privately financed. Examples of securities that are "full faith and credit" and those that are "Government-sponsored enterprises" are listed below (not all-inclusive):

Full Faith & Credit

1. All U.S. Treasury Securities (Bills, Notes, & Bonds)
2. Department of Housing & Urban Development Community Development Block Grant
3. Farmers Home Administration Certificates of Beneficial Ownership
4. Government National Mortgage Association (GNMA)
5. Overseas Private Investment Corporation (OPIC)
6. Small Business Administration, Small Business Investment Companies, State/Local Development Companies
7. U. S. Maritime Administration Title XI Ship Mortgage Bonds

Government-Sponsored Enterprises

1. Farm Credit System:
 - a. Banks for Cooperatives
 - b. Federal Intermediate Bank Debentures
 - c. Federal Land Bank
2. Federal Home Loan Bank (FHLB)
3. Federal Home Loan Mortgage Corporation (FHLMC, "Freddie MAC")
4. Federal National Mortgage Association (FNMA, "Fannie Mae")
5. Student Loan Marketing Association (SLMA, "Sallie Mae")

e. Repurchases and Reverse Repurchases of Book Entry and Certificate Securities. Repurchase and Reverse Repurchase Agreements shall be limited to U.S. Government Securities and shall be made only with primary government securities dealers designated by the Federal Reserve Bank of New York, or with banks that meet high capital adequacy standards established by the program manager. Primary government securities dealers must meet and certify to the nonappropriated fund entity their compliance with the "Capital Adequacy Guidelines for U.S. Government Securities Dealers" as published by the Federal Reserve Bank of New York. The bank must meet capital adequacy standards established by the program manager and confirmed by an independent bank rating service external to the program manager's rating procedures. Collateral must be in the amount of 100% of market value of the purchased security, plus interest. Collateral for repurchase agreements is restricted to U.S. Government Full Faith and Credit Securities. To preclude frequent calls to mark-to-the-market, collateral in the amount of 102% of market value plus interest is desirable for U.S. Treasury Securities (Bills, Notes and Bonds). Collateral in the amount of 104% of market value plus interest is desirable for all other U.S. Government Full Faith and Credit Securities.

(1) Safekeeping of Repurchase Instruments. Book entries must be wired to a third-party bank selected by the NAFI. Alternatively, securities must be delivered to a bank designated by the NAFI. In either case, the instruments cannot be commingled with the assets of the bank, and the NAFI must receive a safekeeping receipt for the securities. Third party banks must meet the same rating standards as investment banks. The seller's letter with attachment as shown on Page I-11 contains the necessary language to provide the NAFI with a Power of Attorney to negotiate the securities, if necessary.

(2) Selling Treasury Paper. For temporary use of funds, use the purchaser's letter with attachment as shown in Page I-15 and handle the transaction in the same manner as the repurchase agreement.

(3) Availability of Funds. In both cases (a. and b. above), the funds should be available to the NAFI or the financial institution on the day the transaction is made. Interest begins on date of sale or purchase and ends on the day before the transaction is completed.

f. Eurodollar. If the Eurodollar market offers significantly higher yields, funds can be deposited with a U.S. bank dealing in this market. Funds invested in Eurodollars will not exceed the dollar amount insured by FDIC unless collateralized as required by Treasury Financial Manual 6-9000.

g. Restrictions

(1) Foreign Depositories. Investments are not authorized to be made in foreign financial institutions. Chartered affiliates of American banking institutions operating overseas are not considered foreign depositories for the purpose of this handbook.

(2) Maturity Limitation. The maturity on investments will generally be limited to 36 months. However, investments up to 63 months are authorized provided that they are in support of a documented capital improvement program.

Table C-1, Matrix of Investment Characteristics

Type of Security	Maturity	Marketability	Liquidity	Default Risk	Market Risk	Yield
Overnight Repurchase Agreements	1-3 days	Not Marketable	1	1	1	7
Treasury Bills	3-6 months	Broad Market	2	0	1	8
Federal Agency Discount Notes	60-90 days	Broad Market	3	1	2	6
Treasury Notes	2-5 years	Broad Market	4	0	4	4
Federal Agency Debenture-Not Fully Insured	2-5 years	Thin Market	6	1	5	2
Federal Agency Debenture-Fully Insured	2-5 years	Thin to Good Market	7	0	5	3
Insured CDs	1 year	Not Marketable	8	1	3	1
Collateralized CDs	60-90 days	Not Marketable	5	1	2	5

NOTES:

1. LIQUIDITY refers to the ability to readily convert the security to cash with little or no capital loss. Liquidity is related to average length of maturity and to the degree of marketability. The most liquid assets have the lowest score (1) while the least liquid asset is assigned the highest score (8).

2. DEFAULT RISK is the risk that the principal will not be repaid in full on a timely basis. The default risk for all approved investments is minimal. A score of "0" means that the security is backed full faith and credit by the U.S. Government and has virtually no default risk. A score of "1" means that the security is not fully guaranteed by the U.S. Government, and thus has slight default risk.

3. MARKET RISK is the degree to which the value of the investment will fluctuate with changing market conditions, and is primarily related to length of maturity. Investments are ranked from lowest ("1") to highest ("5") market risk. YIELD refers to the percentage interest income derived from the investment. Instruments are ranked from the highest yield ("1") to the lowest yield ("8").

4. YIELD refers to the percentage interest income derived from the investment. Instruments are ranked from the highest yield ("1") to the lowest yield ("8").

Figure C-1, Sample Repurchase Agreement, Seller's Letter

Dear Sirs:

From time to time, you may enter into repurchase transactions with us, evidenced by confirmation from us to you, pursuant to which we purchase from you specific securities and you agree to repurchase the same securities at a specified later date. Attachment 1 to this letter states the general terms and condition that shall apply to each such repurchase transaction. The confirmation of each such repurchase transaction, as supplemented by the attachment, shall constitute a binding agreement between us.

Please acknowledge your acceptance of the foregoing by signing and returning the enclosed copy of this letter.

Sincerely,

Agreed and accepted this

Figure C-2 Seller's Agreement, General Terms and Conditions of Repurchase Agreements

1. Definitions. (a) (Name of NAFL); (b) "Buyer"; the person purchasing securities from ____ (c) "Specific Repurchase Agreement," the confirmation setting forth the specific terms for an individual repurchase transaction in which ____ sells securities to Buyer and agrees to repurchase them; (d) "Purchased Securities," the securities sold by ____ to Buyer; (e) "Purchase Price," the price at which Purchased Securities are sold by ____ to Buyer; (f) "Purchase Date," the date on which Purchased Securities are sold by ____ to Buyer; (g) "Repurchase Date," the date provided in a Specific Repurchase Agreement on which ____ is to repurchase the Purchased Securities from Buyer; (h) "Repurchase Price," the price at which Purchased Securities are to be repurchased on the Repurchase Date (which is equal to the Purchase Price plus Interest); (i) "Interest," the interest component of the Repurchase Price; (j) "Interest Rate," the rate at which interest is calculated; (k) "Long-Term Specific Repurchase Agreement," a Specific Repurchase Agreement under which the Repurchase Date is more than 21 days after the Purchase Date; (l) "Pledged Securities," securities, other than Purchased Securities, pledged to Buyer by ____ to secure its obligations hereunder; (m) "Cash Collateral," cash pledged to Buyer ____ to secure its obligations hereunder; (n) "Collateral," Pledged Securities and/or Cash Collateral; (o) "Margin," the excess of (i) the market value of the Purchased Securities under a Specific Repurchase Agreement plus Attributable Collateral over (ii) the Repurchase Price thereunder; (p) "Original Margin," the excess on the Purchase Date of (i) the market value of the Purchased Securities under a Specific Repurchase Agreement over (ii) the Repurchase Price thereunder; (q) "Attributable Collateral," for purposes of determining the amount of Margin, Collateral attributed to individual Specific Repurchase Agreements on the basis that Collateral is first attributed to restore the Margin under each Specific Repurchase Agreement to the Original Margin and thereafter attributed pro rata on the basis of the Repurchase Prices; and (r) "Act of Insolvency," with respect to any person, the filing by such person of a petition in bankruptcy, adjudication of such person as insolvent or bankrupt, petition or application by such person for any receiver or trustee for itself or any substantial part of its property, commencement by such person of any proceeding relating to it under any reorganization, arrangement, dissolution or liquidation law, or the initiation of any such proceeding against such person if such person indicates by any act its consent thereto or if such proceeding is not dismissed within 30 days.

2. Security Interest and Possession. The Buyer is hereby granted a security interest in and lien upon all Purchased Securities, Pledged Securities and Cash Collateral. Upon Buyer's request, ____ shall deliver Purchased Securities and Pledged Securities to Buyer; provided, that ____ shall, without such request, deliver to Buyer Purchased Securities purchased by Buyer under Long-Term Specific Repurchase Agreements, unless Buyer authorizes ____ to retain such securities. All Cash Collateral shall be delivered by ____ to Buyer, but shall be segregated from other funds of Buyer and identified as Cash Collateral. On the Repurchase Date specified in a Specific Repurchase Agreement, Buyer's security interest in the Purchased Securities subject thereto shall be deemed released upon the tendering of payment therefor by ____ and Buyer shall thereupon deliver to ____ any such Purchased Securities previously delivered by ____ to Buyer.

3. Margin Maintenance---Obligation. If at any time the Margin under a Specific Repurchase Agreement is not equal to at least 100% of the Original Margin, Buyer may from time to time require ____ to provide Collateral so that the Original Margin is restored. At the option of ____, the Collateral shall consist of Pledged U.S. Treasury Securities acceptable to buyer and/or Cash Collateral.

4. Margin Maintenance Buyer's Obligation. If at any time the Margin under a Specific Repurchase Agreement exceeds 120% of the Original Margin (a "Margin Excess"), ____ may require Buyer to elect either (a) to deliver cash to ____ or (b) to release from its security interest and lien such Collateral (whether or

not Attributable Collateral) and/or Purchased Securities thereunder as ___ selects, or to elect some combination of (a) and (b), so that a Margin Excess no longer exists; provided, however, that ___ shall select Purchased Securities in the case of an election under clause (b) only if there is then no Collateral. Upon the release of any Collateral or Purchased Securities that were previously delivered by ___ to Buyer, Buyer shall return such Collateral or Purchased Securities to ___.

5. Principal Payments, Interest and Dividends. Except as provided in Paragraph 12 below, all principal payments in respect of, and all interest and dividends paid or payable on, the Purchased Securities and Pledged Securities ("Income") shall be the property of and owned by ___. Buyer shall deliver Income to ___ on the date on which it is payable.

6. Substitution. ___ shall be entitled at any time to substitute U.S. Treasury Pledged Securities and/or Cash Collateral (the "Substituted Assets") for Purchased Securities, Pledged Securities or Cash Collateral ("Replaced Assets"), provided that the Substituted Assets are reasonably acceptable to Buyer and have a market value equal to at least the market value of the Replaced Assets.

7. Buyer Representations. The Buyer represents and warrants that it is duly authorized to enter into this Agreement and the transactions contemplated in it and that the person signing this Agreement on behalf of Buyer is duly authorized to act on its behalf.

8. Representations. ___ represents and warrants that it is duly authorized to enter into this Agreement and the transactions contemplated in it and that the person signing this Agreement on behalf of ___ is duly authorized to act on its behalf.

9. Payment and Delivery. Unless otherwise mutually agreed, all payments hereunder and under each Specific Repurchase Agreement shall be in immediately available funds. All deliveries of securities by one party to the other party shall be in suitable form for delivery or shall be accompanied by duly executed instruments of transfer or assignment in blank and such other documentation as the party receiving possession may reasonably request. The buyer shall not, however, cause any such transfer of securities to be registered, except as provided in Paragraph 12 below. All deliveries shall be affected within the delivery time scheduled from time to time by the New York Clearing House Association.

10. Market Value Determination. The market value of all Purchased Securities and Pledged Securities shall be determined daily at the close of business by using the "bid" price for the securities in question as it appears in the most current issue of the Wall Street Journal or such other source as is mutually acceptable to Buyer and ___.

11. Segregation of Securities. All Purchased Securities and Pledged Securities, held by Buyer or his or her designated bank; shall be segregated from other securities in the possession of the holder and shall be identified as subject to this Agreement. Segregation may be accomplished by appropriate identification on the books and records of the holder.

12. Default. In the event that (i) ___ fails to repurchase any Purchased Securities upon the Repurchase Date relating thereto; (ii) ___ fails, after one business day's notice, to comply with Paragraph 3 above or (iii) an Act of Insolvency occurs with respect to ___ (each a "___ Default"):

(A) At the option of Buyer, exercised by written notice to ___ obligations under each Specific Repurchase Agreement to repurchase Purchased Securities shall thereupon become immediately due and payable. In such event, the Repurchase Price under each Specific Repurchase Agreement shall be adjusted to equal the sum of (i) the Purchase Price plus (ii) interest thereon, at the Interest Rate, from the Purchase Date until payment thereof plus (iii) to the extent permitted by applicable law, interest on the Interest

component of such adjusted Repurchase Price, at the Interest Rate, from the date on which the ___ Default occurs until the day of payment of such Interest component. Such adjusted Repurchase Price is hereafter referred to as the "___ Liability."

(B) If Buyer exercises the option referred to in subparagraph (A) of this Paragraph 12, all income payable thereafter shall be applied by Buyer to the Seller's Liability.

(C) The Buyer may, after giving one business day's notice to ___ (but no such notice shall be required in the event of an Act of Insolvency); (i) sell any or all Purchased Securities and/or any or all Pledged Securities and apply the proceeds thereof to the ___ Liability and/or (ii) apply Cash Collateral to the ___ Liability. All sales shall be in a recognized market at such price or prices as Buyer may reasonably deem satisfactory.

(D) The Buyer may register the transfer of any securities delivered to it by whether such delivery occurred subsequent or prior to the ___ Default.

13. Buyer Default. In the event that (i) Buyer fails to deliver any Purchased Securities to ___ upon the relevant Repurchase Date against payment therefor, (ii) Buyer fails to comply with Paragraph 4, above, or (iii) an Act of Insolvency occurs with respect to Buyer (each a "Buyer Default").

Figure C-3, Sample Repurchase Agreement Purchaser's Letter

Dear Sirs:

From time to time, you may enter into repurchase transactions with us, evidenced by confirmations from us to you, pursuant to which you purchase from us specific securities and we agree to repurchase the same securities at a specific later date. Attachment to this letter states the general terms and conditions that shall apply to each such repurchase transactions. The confirmation of each such repurchase transactions, as supplemented by the attachment, shall constitute a binding agreement between us.

Please acknowledge your acceptance of the foregoing by signing and returning the enclosed copy of this letter.

Very truly yours,

Agreed and Accepted this

Figure C-4, Purchaser's Agreement, General Terms and Conditions of Repurchase Agreements

1. Definitions. (a) (Name of NAFI); (b) "Seller," the person selling securities to ____; (c) "Specific Repurchase Agreement," the confirmation outlining the specific terms for an individual repurchase transaction in which Seller sells securities to and agrees to repurchase them; (d) "Purchased Securities," the securities sold to ____ by Seller; (e) "Purchase Price," the price at which Purchased Securities are sold to ____ by Seller; (f) "Purchase Date," the date on which Purchased Securities are sold to ____ by Seller; (g) "Repurchase Date," the date provided in a Specific Repurchase Agreement on which Seller is to repurchase the Purchased Securities from ____; (h) Repurchase Price," the price at which Purchased Securities are to be repurchased on the Repurchase Date (which is equal to the Purchase Price plus Interest); (i) "Interest," the interest component of the Repurchase Price; (j) "Interest Rate," the rate at which Interest is calculated; (k) "Long-Term Specific Repurchase Agreement," a Specific Repurchase Agreement under which the Repurchase Date is more than 21 days after the Purchase Date; (l) "Pledged Securities," securities, other than Purchased Securities, pledged to ____ by Seller to secure its obligations hereunder; (m) "Cash Collateral," cash pledged to ____ by Seller to secure its obligations hereunder; (n) "Collateral," Pledged Securities and/or Cash Collateral; (o) "Margin," the excess of (i) the market value of the Purchased Securities under a Specific Repurchase Agreement plus Attributable Collateral over (ii) the Repurchase Price thereunder; (p) "Original Margin," the excess on the Purchase Date of (i) the market value of the Purchased Securities under a Specific Repurchase Agreement over (ii) the Repurchased Price thereunder; (q) Attributable Collateral," for purpose of determining the amount of Margin, Collateral attributed to individual Specific Repurchase Agreements on the basis that Collateral is first attributed to restore the Margin under each Specific Repurchase Agreement to the Original Margin and thereafter attributed pro rata on the basis of the Repurchase Prices; and (r) "Act of Insolvency," with respect to any person, the filing by such person of a petition in bankruptcy, adjudication of such person as insolvent or bankrupt, petition or application by such person for any receiver or trustee for itself or any substantial part of its property, commencement by such person or any proceeding relating to it under any reorganization, arrangement, dissolution or liquidation law, or the initiation of any such proceeding against such person if such person indicates by any act its consent thereto or if such proceeding is not dismissed within 30 days.

2. Security Interest and Possession. ____ is hereby granted a security interest in and lien upon all purchased Securities, Pledged Securities and Cash Collateral. Upon ____ request, Seller shall deliver Purchased Securities and Pledged Securities to ____; provided, that Seller shall, without such request, deliver to Purchased Securities purchased by ____ under Long-Term Specific Repurchase Agreements, unless ____ authorizes Seller to retain such securities. All Cash Collateral shall be delivered by Seller to ____ but shall be segregated from other funds of ____ and identified as Cash Collateral. On the Repurchase Date specified in a Specific Repurchase Agreement, ____ security interest in the Purchased Securities subject thereto shall be deemed released upon the tendering of payment therefor by Seller, and ____ shall thereupon deliver to Seller any such Purchased Securities previously delivered by Seller to ____.

3. Margin Maintenance Seller's Obligation. If at any time the Margin under a Specific Repurchase Agreement is not equal to at least 100% of the Original Margin, ____ may from time to time require Seller to provide Collateral so that the original Margin is restored. At the option of Seller, the Collateral shall consist of Pledged Securities reasonably acceptable to ____ and/or Cash Collateral.

4. Margin Maintenance Obligation. If at any time the Margin under a Specific Repurchase Agreement exceeds 120% of the Original Margin (a "Margin Excess"), Seller may require ____ to elect either (a) to deliver cash to Seller or (b) to release from its security interest and lien such Collateral (whether or not Attributable Collateral) and/or Purchased Securities thereunder as Seller selects, or to elect some

combination of (a) and (b), so that a Margin Excess no longer exists; provided, however, that Seller shall select Purchase Securities in the case of an election under clause (b) only if there is then no Collateral. Upon the release of any Collateral or Purchased Securities which were previously delivered by Seller to ___, ___ shall return such Collateral or Purchased Securities to Seller.

5. Principal Payments, Interest and Dividends. Except as provided in Paragraph 11, above, all principal payments in respect of, and all interest and dividends paid or payable on, the Purchased Securities and Pledged Securities ("Income") shall be the property of and owned by Seller. ___ shall deliver Income to Seller on the date on which it is payable.

6. Seller Representation. Seller represents and warrants that it is duly authorized to enter into this Agreement and the transactions contemplated hereunder and that the person signing this Agreement on behalf of Seller is duly authorized to act on its behalf.

7. Representations. ___ represents and warrants that it is duly authorized to enter into this Agreement and the transactions contemplated hereunder and that the person signing this Agreement on behalf of ___ is duly authorized to act on its behalf.

8. Payment and Delivery. Unless otherwise mutually agreed, all payments hereunder and under each Specific Repurchase Agreement shall be in immediately available funds. All deliveries of securities by one party thereto to the other party shall be in suitable form for delivery or shall be accompanied by duly executed instruments of transfer or assignment in blank and such other documentation as the party receiving possession may reasonably request. ___ shall not, however, cause any such transfer of securities to be registered, except as provided in Paragraph 11 below. All deliveries shall be effected within the delivery time scheduled from time to time by bank wire.

9. Market Value Determination. The market value of all Purchased Securities and Pledged Securities shall be determined daily at the close of business, by using the "bid" price for the securities in question as it appears in the most current issue of the Wall Street Journal or such other source as is mutually acceptable to Seller and ___.

10. Segregation of Securities. All Purchase Securities and Pledged Securities, whether held by ___ or Seller shall be segregated from other securities in the possession of the holder and shall be identified as subject to this Agreement. Segregation may be accomplished by appropriate identification on the books and records of the holder.

11. Seller Default. In the event that (i) Seller fails to repurchase any Purchased Securities upon the Repurchase Date relating thereto, (ii) Seller fails, after one business day's notice, to comply with Paragraph 3 above or (iii) an Act of Insolvency occurs with respect to Seller (each a "Seller Default"):

(A) At the option of ___, exercised by written notice to Seller, Seller's obligation under each Specific Repurchase Agreement to repurchase Purchased Securities shall thereupon become immediately due and payable. In such event, the Repurchase Price under each Specific Repurchase Agreement shall be adjusted to equal the sum of (i) the Purchase Price plus (ii) interest thereon, at the Interest Rate, from the Purchase Date until payment thereof plus (iii) to the extent permitted by applicable law, interest on the interest component of such adjusted Repurchase Price, at the Interest Rate, from the date on which the Seller Default occurs until the date of payment of such Interest component. Such adjusted Repurchase Price is hereafter referred to as the "Seller Liability."

(B) If ___ exercises the option referred to in subparagraph (A) of Paragraph 11, all Income payable thereafter shall be applied by buying to the Seller Liability.

(C) __ may, after giving one business day's notice to Seller (but no such notice shall be required in the event of an act of insolvency, (i) sell any or all Purchased Securities and/or any or all Pledged Securities and apply the proceeds thereof to the Seller Liability and/or (ii) apply Cash Collateral to the Seller Liability. All sales shall be in a recognized market at such price or prices as __ may reasonable deem satisfactory.

(D) Seller shall immediately deliver to __ any Purchased Securities and Pledged Securities then in Seller's possession.

(E) __ may register the transfer of any securities delivered to it by Seller, whether such delivery occurred subsequent or prior to the Seller Default.

12. Default. In the event that (i) __ fails to deliver any Purchased Securities to Seller upon the relevant Repurchase Date against payment therefor; (ii) __ fails to comply with Paragraph 4 above of (iii) an Act of Insolvency occurs with respect to __ (each a "Default"):

(A) At the option of Seller and upon tendering of payment of the aggregate Repurchase prices (reduced as provided in the next sentence), all Specific Repurchase Agreements shall mature. Thereupon, (i) interest in Purchased Securities, Pledged Securities and Cash Collateral shall be deemed released, and __ shall deliver all such securities and cash to Seller and (ii) interest shall cease to accrue, and each Repurchase Price shall be reduced to reflect such cessation.

(B) Seller may purchase securities ("Replacement Securities") of the same class and amount as, any Purchased Securities or Pledged Securities that are not delivered by __ to Seller as required hereunder. Such purchase may be made in any recognized market at such prices as Seller may reasonably deem satisfactory. __ shall be liable to Seller (the "__ Liability") (i), with respect to Purchased Securities, for any excess of the price paid by Seller for the Replacement Securities over the Repurchase Price (reduced as provided above) and (ii) with respect to Pledged Securities, for the price paid by the Seller for the Replacement Securities. In Addition, __ shall be liable to Seller for interest on the __ Liability with respect to each such purchase of Replacement Securities from the date thereof until paid in full by __. Such interest shall be at a rate equal to the prime rate for short-term bank commercial loans, as published in The Wall Street Journal, changing as such published rate changes. In the event of __ Default under clause (i) or (ii) of this Paragraph, subparagraphs (A) and (B) hereof shall be effective only upon one business day's notice to Seller.

13. The transactions subject to these terms and conditions shall be governed by the laws of the State of __.

FOREWORD

This Volume of the Department of Defense Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedure, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume establishes procedures for DoD Components to use in identifying, investigating, reporting, and processing violations of the Antideficiency Act. These procedures are consistent with the policies established in DoD Directive 7200.1, "Administrative Control of Appropriations," May 7, 1984.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

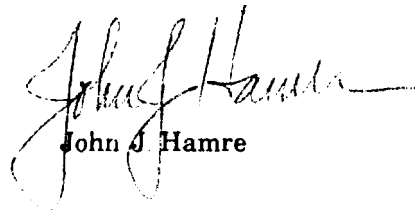

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910. 1-M. "DoD Procedures for Management of Information Requirements." November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume of the Regulation through its normal publication channels. Other Federal Agencies and the public may obtain copies of this volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161; telephone (703) 487-4650.

John J. Hamre

**INTRODUCTION
TO THE
DOD FINANCIAL MANAGEMENT REGULATION**

GENERAL

The DoD Financial Management regulation provides all DoD Components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller). The regulation consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Formulation
3. Budget Execution
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursables Policy and Procedures
12. Special Accounts Policy and Procedures
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Funds and Antideficiency Act Violations
15. Security Assistance Policy and Procedures

Authorization

This Regulation is issued by the Under Secretary of Defense (Comptroller) under authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures, November 15, 1992.

PUBLICATIONS AND MEMORANDA INCORPORATED

Volume 14 of the Regulation has incorporated the following:

Enclosures 1, 2, 5, 6, and 7 of DoD Directive 7200.1, "Administrative Control of Appropriations," May 7, 1984.

Under Secretary of Defense (Comptroller) memorandum of December 19, 1994, subject: Reporting Antideficiency Act Violations.

Under Secretary of Defense (Comptroller) memorandum of December 19, 1994, subject: Violations of the Antideficiency Act.

CHAPTER 1

ADMINISTRATIVE CONTROL OF APPROPRIATIONS

A. PURPOSE

1. This chapter establishes policy and procedures for the administrative control of funds. Procedures and details for controlling available funds are contained in Appendix A. The DoD Components are required to establish and maintain effective controls over appropriations and other funds in accordance with this Chapter and Appendix A.

2. Definitions of terms used in this Volume are contained in Volume 1 of this Regulation.

3. The provisions of this Volume take precedence over any conflicting guidance in other volumes of this regulation, other DoD regulations, manuals, or directives, with the exception of DoD Directive 7200.1, “Administrative Control of Appropriations.”

B. POLICY

1. Defense-wide Appropriations. Unless otherwise specified, for purposes of this Volume, the Office of the Deputy Comptroller (Program/Budget) shall be considered a “DoD Component” for matters involving Defense-wide (Treasury Symbol “97”) appropriations.

2. Administrative Control Systems. DoD Components shall:

a. Design systems for the administrative control of funds so that administrative subdivisions of funds are placed at the highest practical organizational level consistent with effective and efficient management.

b. Restrict the use of limitations on available funds to those necessary to comply with statutory provisions, such as those imposed by the appropriate DoD Authorization or DoD Appropriations Act, or to address specific management requirements.

3. Reporting Requirements for Administrative Control Systems. DoD Components shall establish a reporting system for the administrative control of funds process to provide data for reviewing the efficiency (e.g., obligation rate) with which funds are used. Reporting requirements shall be established separately from an administrative subdivision of funds limitation when a need exists for accumulating data below the allotment level.

4. Delegations of Authority. All delegations or redelegations of authority or functions under this Chapter shall be made in writing. Appendix A provides additional information on this subject.

5. Statutory Limitations and Duties of DoD Officials. No DoD official shall authorize or create any obligation or make any expenditure beyond the amount permitted under any statutory

limitation that modifies or restricts the availability of funds. Special or recurring statutory limitations on DoD funds are frequently imposed by the DoD Authorization or Appropriations Acts, or may be imposed by other legislation. Specifically, DoD officials, including commanders and supervisors to whom funds are entrusted or apportionments or administrative subdivisions of funds are issued, shall:

a. Limit any further subdivision of funds to the amount provided and currently available.

b. Limit the obligation and expenditure of funds provided to the amount currently available at the time of the obligation or expenditure, enforce those limitations, and ensure that all personnel involved in administrative control and use of available funds are knowledgeable of such limitations.

c. Limit the obligation and expenditure of funds provided to the purposes authorized by type of fund or account.

d. Ensure that the obligation and expenditure of funds provide for a bona fide need of the period of availability of the fund or account.

e. Preclude acceptance and use of voluntary services, gifts and donations except in accordance with specified provisions of law.

f. Ensure that all personnel, including the actual fund users, contracting personnel, and other personnel involved in administrative control and use of available funds, are fully aware of, and comply with, the requirements of the Antideficiency Act as described in this Volume and other applicable guidance.

g. Ensure that decisions on the obligation of funds are in compliance with the provisions of the Antideficiency Act by careful review and examination of the facts involved in advance of the decision.

h. Rigorously enforce compliance with all the provisions of the Antideficiency Act and other specific laws that limit the obligation and expenditure of funds.

i. Maintain internal control systems to ensure that:

(1) All available funds are identified, controlled, and recorded in the official accounting records from the time received until subdivided to others or obligated and expended.

(2) All available funds are identified with authorized purposes by account and period of availability for new obligations and for the period of availability for expenditure.

(3) All special and recurring provisions and limitations on the obligation and expenditure of funds are identified and documented for all available funds and accounts.

(4) All proposed obligations of funds are reviewed to ensure that sufficient funds are available to cover the obligation, that the purpose of the obligation is consistent with the authorized purposes of the fund or account, and that the obligation does not violate any special or recurring provisions and limitations on the incurrence of obligations.

j. Issue and maintain appropriate delegations of authority.

k. Ensure that amounts reported to the U.S. Treasury are accurate, that is, recorded accurately and posted to the correct appropriation account.

l. Ensure that general and specific internal controls are in place and operating as required by DoD Directive 5010.38, "Internal Management Control Program."

m. Ensure that appropriate training programs are in place to provide personnel with the knowledge, skills, and abilities to perform the duties specified above.

6. Apportionments, Allocations, Allotments, and Reimbursable Orders. The administrative control of appropriations process includes apportionments, allocations, allotments, and reimbursable orders. Information about those types of fund control mechanisms is contained in Appendix A to this Volume and Volume 2 of this Regulation.

7. Obligations and Expenditures. Available funds are used by the incurrence of obligations and expenditures. An amount shall be recorded as an obligation or expenditure when incurred as supported by documentary evidence of the occurrence of the event. An oral order or agreement shall be formalized in writing or conform to prescribed electronic standards in order to provide proper support and an audit trail for an obligation. Oral orders executed in this manner without a formal commitment of funds run a strong risk of violating the Antideficiency Act and should be avoided if at all possible.

a. Once incurred, all obligations and expenditures shall be recorded, accurately and promptly, as of the date incurred even if recordation results in a negative amount in the accounting records for an appropriation or fund, or an administrative subdivision of an appropriation. (For this purpose, negative amount means that obligations or disbursements exceed the amount of funds that are appropriated or otherwise available.) A violation resulting from a negative amount is caused by the actions of the individual(s) who caused or created the obligation. The recording of the obligation in the accounting system merely records an obligation that already exists.

b. Adjustments in obligations may consist of recording changes to obligation amounts that existed in a prior period that may or may not have been identified and recorded during that period. If an adjustment causes total obligations for a prior period, after consideration of all known valid obligations and deobligations, to exceed the amount that was available for obligation for that prior period, a potential violation of subsections 1341(a) or 1517(a), or both, of Title 31, United States Code, may have occurred.

c. A within-scope contract adjustment is properly chargeable to the funds that funded the original contract. Such adjustment must be charged to those funds even if sufficient funds are not available. If sufficient funds are not available, a potential violation may have occurred.

d. An increase-in-scope adjustment to a contract is properly chargeable to funds currently available at the time the change was made.

e. Additional guidance for both types of contract adjustments is available in chapter 25 of the DoD Accounting Manual, DoD 7200.9-M, or, when published, Volume 3 of this Regulation.

8. Administrative Control of Revolving Funds

a. General. Obligations and expenditures of a revolving fund, whether subject to, or exempt from, apportionment, shall be controlled under applicable provisions of this Chapter and Appendix A.

b. Cash Balances. The disbursement of amounts in excess of the Treasury [cash] balance of a revolving fund is a potential violation of the Antideficiency Act. Additionally, the disbursement of amounts in excess of the balance of sub-numbered cash accounts or other subdivisions of cash within a revolving fund, when such sub-numbered accounts or subdivisions have been specifically designated as being subject to the provisions of the Antideficiency Act, is a potential violation of the Antideficiency Act.

c. Apportionment. A revolving fund may be subject to apportionment or it may be exempt from apportionment, depending upon the type of fund.

(1) Revolving Funds Subject to Apportionment. An apportionment limits the obligations that may be incurred to the apportioned amount. The incurring of obligations in excess of apportioned budgetary resources is a potential violation of the Antideficiency Act without regard to whether a revolving fund has additional unapportioned budgetary resources or other assets equal to or greater than the amount of the deficiency.

(2) Revolving Funds Exempt from Apportionment. A revolving fund that is exempt from apportionment may not incur obligations in excess of available budgetary resources. The incurring of obligations in excess of available budgetary resources is a potential violation of the Antideficiency Act.

d. Budgetary Resources. The incurring of obligations in excess of budgetary resources is a potential violation of the Antideficiency Act. The concept of “budgetary resources” is defined and explained in OMB Circular A-34, “Instructions on Budget Execution.” Budgetary resources available to revolving funds are composed of the same elements as budgetary resources available to appropriated funds. Further, while budgetary resources available for obligation for reimbursable work differ depending upon whether a reimbursable order is accepted from a Federal

Government account or from the public, such budgetary resources are determined in the same manner for a revolving fund as they are for an appropriated fund.

(1) Orders from other Federal Government Accounts. Funded orders from other Federal Government accounts, that represent valid obligations of the ordering account, provide a budgetary resource without regard to whether they are accompanied by an advance payment.

(2) Orders from the Public. Orders from the public, including local and State governments and international organizations (e.g., United Nations), provide a budgetary resource only to the extent accompanied by an advance payment of cash which is received and credited to the account.

e. Organizational Level for Revolving Fund Potential Violations. Systems for the administrative control of revolving funds should be placed at each organizational level at which budgetary resources may be received, held, transferred, obligated, or expended. The lowest organizational level for administrative control purposes generally should be the level, frequently a single site, at which an obligation may be occurred or an expenditure approved. In the case of a revolving fund account that encompasses operations at multiple sites, responsibility for potential Antideficiency Act violations generally should not be assigned to an organizational level lower than the level at which the administrative control system is adequate to prevent, and detect, a potential violation of the Antideficiency Act.

9. Records

a. The Defense Finance and Accounting Service (DFAS), working with other DoD Components, shall ensure that accounting records are maintained that provide full disclosure of the financial operations and resource utilization applicable at each successive organizational level. The accounting records shall show the amounts of funds received at each organizational level, funds issued to others, current available balances, and funds committed, obligated, and expended.

b. These fund control records shall constitute an integral part of the official accounting records maintained for each successive organization level for the DoD Component. Financial reports reflecting funds received, issued, available and utilized shall be prepared from the official accounting records.

c. DoD Components shall maintain key records and documents on appropriations, allocations, and budgetary data for the funds for which they are responsible.

d. DoD Components shall retain, for 6 years, 3 months, workpapers and documentary evidence developed and/or obtained during an investigation of an actual or potential violation of the Antideficiency Act.

10. Annual Report of Evaluation. Each DoD Component shall annually conduct an evaluation of its overall administrative funds control processes as well as the processing of violations of the Antideficiency Act.

a. The evaluation shall address actions taken in the following areas:

(1) To improve compliance with the Antideficiency Act.

(2) To improve the timeliness of processing violations, including time spent on legal reviews.

(3) To ensure the quality and independence of the investigators of potential violations.

(4) To impose appropriate disciplinary action for all individuals determined to be responsible for a violation.

(5) To improve the effectiveness of and compliance with internal controls over appropriations and funds in the Component.

(6) To identify lessons learned from the investigation of violations of the Antideficiency Act, publicize the lessons learned and implement appropriate corrective actions to preclude the reoccurrence of violations of the Antideficiency Act.

b. The evaluation shall (1) address actions taken, for each of the six areas discussed above, in the prior fiscal year and (2) be completed by December 31 of each calendar year. The first evaluation shall be performed for fiscal year 1995. A copy of the results of the evaluation shall be provided to the Office of the Under Secretary of Defense (Comptroller) by January 31, 1996, and each January 31 thereafter.

c. The Office of the Under Secretary of Defense (Comptroller) shall review the evaluation reports and may request briefings or other actions as appropriate. In addition, DoD Components may be requested to evaluate areas of special interest.

CHAPTER 2

VIOLATIONS OF THE ANTIDEFICIENCY ACT

A. HOW VIOLATIONS OCCUR. Generally, violations of the Antideficiency Act may occur when:

1. Funding authority is issued in excess of the amount available and the excess amount is obligated or expended.

a. The issuance of funds by means of a formal subdivision of funds (allocation, allotment, suballotment or other formal designation of a limitation) in an amount that exceeds the amount currently available would result in a violation of the Antideficiency Act if those excess funds distributed are actually obligated or expended. The individual authorizing the release of those funds would be responsible for the violation.

b. The issuance of a funded order in excess of available funds may also result in a violation of the Antideficiency Act.

2. Obligations or expenditures are authorized or incurred in excess of the amount of funds available at the formal subdivision of funds level. Incurring an obligation or disbursement in excess of a target (vice a formal subdivision of funds) does not in itself create a violation of the Antideficiency Act. However, if exceeding a target causes the governing formal fund subdivision or limitation to be breached, a potential violation of the Antideficiency Act would be incurred.

3. Special and recurring statutory limitations or restrictions on the amounts for which an appropriation or fund may be used are violated.

4. Regulatory limitation on the amounts for which an appropriation or fund may be used are violated, when specifically carrying an antideficiency limitation.

5. Statutory limitations on the purposes for which an appropriation or fund may be used are violated.

6. Regulatory limitation on the purposes for which an appropriation or fund may be used are violated, when specifically carrying an antideficiency limitation and corrective funding is not available.

7. Obligations are authorized or incurred in advance of funds being available.

8. Obligations or expenditures of funds do not provide for a bona fide need of the period of availability of the fund or account and corrective funding is not available.

9. Voluntary services are accepted, or personal services are employed, in excess of that authorized by law.

B. SIGNIFICANT PROVISIONS OF PUBLIC LAW 101-510 AND PUBLIC LAW 102-484

1. General. A DoD employee is at risk of violating the Antideficiency Act under certain provisions of Public Law 101-510 or Public Law 102-484. Public Law 101-510 provides for the cancellation of appropriations after specified periods, extension of the expired status for appropriations from 2 years to 5 years, and elimination of the merged accounts. Section 1004 of Public Law 102-484 allows a currently available appropriation to be charged for obligation adjustments when certain expired appropriations have insufficient obligational authority.

a. A potential violation may occur if the following limitation is exceeded when a currently available appropriation is being charged: the unexpended balance of the canceled appropriation. Paragraph 2, below, provides additional guidance.

b. A potential violation may occur if an obligation is incurred in an expired account for a contract change that exceeds \$4 million in a fiscal year without prior written approval of the Office of the Under Secretary of Defense (Comptroller). In addition, a potential violation may occur if a DoD Component incurs an obligation in an expired account for a contract change that exceeds \$25 million in a fiscal year without requesting approval from the Congress 30 days before the obligation is incurred. Paragraphs 3 and 4, below, provide additional guidance.

c. A potential violation may occur if an obligation is created or authorized against, or an expenditure is made or authorized from, an account that was canceled pursuant to Public Law 101-510.

d. Under section 1004 of Public Law 102-484, DoD Components are required to submit a report of violation to the Congress if currently available appropriations are used for obligations properly chargeable to expired accounts whose availability for new obligations expired during the period FY 1986 through FY 1991 (but have not yet been canceled). A violation also may occur if charges to a currently available appropriation exceed (1) 1 percent of the appropriation of the expired account that has insufficient availability, or (2) 1 percent of the currently available appropriation being charged. Paragraph 5, below, provides additional guidance.

2. Public Law 101-510. Under certain circumstances, a payment that otherwise would be chargeable to a canceled account--both as to purpose and amount--except that the account has been canceled, can be paid from, and charged to, an appropriation that, at the time of the payment, is available for incurring new obligations for the same purpose as the canceled account. However, the total of all such payments charged to a currently available appropriation may not exceed the lesser of:

a. One percent of the total amount originally appropriated to the current appropriation being charged.

- b. The unobligated balance of the currently available appropriation.
- c. The unobligated balance of the canceled appropriation.

3. Contract Changes Exceeding \$4 Million. Under certain circumstances, obligations for contract changes in expired accounts that exceed \$4 million in a fiscal year within a program, project, or activity of an appropriation must be approved by the Office of the Under Secretary of Defense (Comptroller) before being incurred.

4. Contract Changes Exceeding \$25 Million. Under certain circumstances, obligations for contract changes in expired accounts that exceed \$25 million in a fiscal year within a program, project or activity of an appropriation must be submitted to the Congress for at least 30 days prior to being incurred.

5. Section 1004, Public Law 102-484. Section 1004 of Public Law 102-484 permits, in certain circumstances, currently available appropriations to be charged when sufficient obligational authority does not exist in certain expired accounts.

- a. The amount charged to a currently available appropriation may not exceed 1 percent of the appropriation for the currently available account being charged, or 1 percent of the appropriation of the expired account, whichever is less.

- b. A potential violation must be reported and investigated when charges to a currently available appropriation would have resulted in a violation of the Antideficiency Act had they been charged to the applicable expired account.

6. Additional Guidance. Specific guidance on accounting for, and paying amounts otherwise chargeable to, canceled accounts or expired accounts, is available in (a) a Principal Deputy Comptroller memorandum, dated June 13, 1991, subject: “Revised DoD Guidance on Accounting for Expired Accounts, Including ‘M’ and Merged Surplus Accounts”; as modified by (b) a Principal Deputy Comptroller memorandum, dated April 20, 1992, subject: “DoD Accounting Guidance for Contract Changes”; and further modified by (c) an Acting Comptroller memorandum, dated December 4, 1992, subject: “Additional Requirements Associated with Merged, Expired, and Canceled Accounts”; and (d) Volume 3 of this Regulation, upon publication.

C. **CODIFICATION OF THE ANTIDEFICIENCY ACT**. When the “Antideficiency Act” was codified into Title 31 of the United States Code, its provisions were incorporated into a number of sections of that Title. The sections that are most frequently cited are sections 1341, 1342, and 1517. Paragraphs 1 through 3, below, summarize the highlights, and Appendix B contains the full wording, of those three sections of Title 31. Chapter 10 of this volume and Enclosure 2-1 provide examples of the most common types of violations of the Antideficiency Act. Enclosure 2-2 provides examples of actual violations that have occurred.

1. Title 31, United States Code, Section 1341, Limitation on Expending and Obligating Amounts. Section 1341 forbids any officer or employee of the United States from:

a. Obligating, expending, or authorizing the use of funds exceeding the amount available in an appropriation or fund.

b. Involving the Federal Government in any contract or obligation for the payment of money before an appropriation is made available.

c. Obligating, expending, or authorizing of funds required to be sequestered.

d. Involving the Federal Government in any contract or obligation for the payment of money required to be sequestered.

2. Title 31, United States Code, Section 1342, Limitation of Voluntary Services. Section 1342 forbids the acceptance of voluntary services on behalf of the Federal Government, or employment of personal services in excess of that authorized by law, except as it may be necessary in emergencies involving the safety of human life or the protection of property.

3. Title 31, United States Code, Section 1517, Obligation and Expenditure Limits. Section 1517 forbids the overobligation and overexpenditure of an apportionment or an amount permitted by a regulation prescribed for the administrative control of appropriations.

4. Violations Caused by Exceeding Limitations Imposed by Law. Violating a limitation imposed by law (the Congress) may be a violation of the Antideficiency Act under Title 31, United States Code, subsection 1341(a)(1).

5. Violations Caused by Exceeding Limitations Imposed by the Office of Management and Budget, Department of Defense, and DoD Components/Agencies

a. Exceeding a limitation of funds administratively imposed by the Office of Management and Budget, Department of Defense, or a DoD Component, on obligations or expenditures may be a violation of the Antideficiency Act under subsection 1517(a).

b. If an administrative subdivision of funds is exceeded, a potential violation shall be reported. The receipt of additional funds before the end of a reporting period does not mitigate a violation of a limitation or eliminate the reporting requirement for a potential violation. Also, a failure to record a valid obligation or expenditure as of the date incurred does not avoid the incurrance of, and the requirement to report, a potential violation of the Antideficiency Act if, upon recordation, available funds in the account or other limitations are exceeded.

EXAMPLES OF POSSIBLE VIOLATIONS OF THE ANTIDEFICIENCY ACT

A. GENERAL. Most of the examples described below are taken from actual violations that have occurred within the Department. However, these violations are fact-specific and, in other circumstances, a potential violation may or may not be incurred. These examples are provided for information only and are not intended to imply that, in all similar, but not identical, circumstances, a violation would have been incurred.

B. TITLE 31, UNITED STATES CODE, SECTION 1341

1. Title 31, United States Code, section 1341(a)(1)(A)

a. An overobligation by a DoD activity exceeded a target distributed to that activity and caused the total appropriation to be exceeded. For example, a target of \$1 million of an operation and maintenance appropriation was exceeded by \$250,000, but the responsibility for violations was not passed to the organization that was provided the target. When the total obligations were summarized at the appropriation level, the total appropriation was exceeded because of this specific overobligation. There is no violation at the organization that was provided the target, but a potential violation has occurred at the appropriation level.

b. An overobligation by a DoD activity exceeded an allotment distributed to that activity--and the responsibility for violations was established at the allotment level--and caused the total appropriation to be exceeded. For example, an allotment of \$1 million of an operation and maintenance appropriation was exceeded by \$250,000, and the responsibility for violations was established at the allotment level. When the total obligations were summarized at the appropriation level, the total appropriation also was exceeded because of this specific overobligation. There is one potential violation at two different funding levels--the allotment level and the appropriation level.

c. A DoD activity exceeded the limitation specified in Title 10, United States Code, section 2805(c), by using operation and maintenance funds in excess of the minor construction limitation to construct improvements to a hazardous waste storage facility.

2. TITLE 31, UNITED STATES CODE, SECTION 1341(a)(1)(B)

A DoD activity arranged for a lease to obligate and pay for a subsequent fiscal year's 12-month lease of a building with current fiscal year operation and maintenance funds. Specifically, fiscal year 19XX funds of \$180,000 were used to contract, obligate and pay for a FY 19XX+1 building lease. This action violated the Antideficiency Act because it obligated the Federal Government to a contract for the payment of money before the appropriation to be charged was available.

C. TITLE 31, UNITED STATES CODE, SECTION 1342

Apparently at the urging of the Chairman, a member of a Federal Commission agreed to waive his statutory entitlement to \$100 per day while involved in Commission business. The year after the Commission was disbanded, the former member changed his mind and filed a claim for a portion of the compensation he would have received had it not been for the waiver. Since the \$100 per day was a statutory entitlement, the purported waiver was invalid and the former commissioner was entitled to be paid. By accepting the waiver and allowing the commissioner to conduct Commission business without pay, the provision against acceptance of voluntary services was violated and a violation of the Antideficiency Act occurred.

D. TITLE 31, UNITED STATES CODE, SECTION 1517

1. A DoD activity improperly obligated \$225,000 of other procurement funds instead of required operation and maintenance (O&M) funds to document, not acquire, a specialized communications equipment program. When the error was discovered, the DoD activity had no O&M funds available to replace the other procurement funds obligated improperly. Therefore, the O&M appropriation apportionment was exceeded, and a violation of Title 31, United States Code, section 1517, occurred. To fund the violation, \$225,000 of O&M funds were requested from the Headquarters of the DoD activity. While this action corrected the funding of the obligation, a violation of the Antideficiency Act occurred because the fund holder did not have sufficient funds available to replace the other procurement funds improperly obligated.

2. A DoD activity used operation and maintenance funds, rather than other procurement funds to purchase a data processing local area network (LAN). Even though the hardware components and LAN operating system software were purchased separately, the components and the software together constituted a system with an aggregate cost in excess of the expense/investment threshold specified by the Congress for the required use of procurement appropriation funds. A violation of Title 31, United States Code, section 1517, occurred because the DoD activity did not have the required amount of other procurement funds at the time of the purchases.

3. A DoD activity used family housing operation and maintenance funds in excess of the statutory limit for the maintenance and repair of a family housing unit without prior congressional approval. The statutory limit was exceeded when additional costs were approved by the contracting officer. Therefore, a violation of the Antideficiency Act occurred because a statutory limit was exceeded.

4. Two different activities holding targets within an O&M appropriation at a DoD installation exceeded the targets established for their activities by the holder of the allotment. Even though both activities contributed to a violation of an allotment--an administrative subdivision of funds--the allotment holder is responsible for the resulting violation of the Antideficiency Act. The activities that exceeded their targets did not violate the Antideficiency Act because the holder of the allotment did not assign responsibility for violations of the Antideficiency Act to the two activities.

5. A funds holder erroneously distributed more funds than he/she had available. The activities receiving the funds incurred obligations and expenditures in excess of amounts available to the fund holder, but below the amount distributed to them. The funds holder incurred a violation of the Antideficiency Act because he/she was responsible for exceeding the total fund availability.

CHAPTER 3

PRELIMINARY REVIEWS OF POTENTIAL VIOLATIONS

A. PRELIMINARY REVIEWS

1. The purpose of a preliminary review is to gather basic facts and determine whether a violation has apparently occurred. When a DoD Component has some evidence that a violation may have occurred, preliminary checks of the applicable business transaction and accounting records shall be made to determine whether a potential violation exists. These actions include checking for duplications or other errors in recording, checking commitments and obligations to ensure they are valid and properly chargeable against the funds involved, and checking actual fund status in the account affected at the time the questionable transaction occurred. A preliminary review shall focus on the potential violation and not the corrective actions. If a potential violation occurs at an appropriation level, the preliminary review shall be completed by an individual meeting the criteria in Section D of Chapter 4 in this Volume.

2. The existence of a violation may depend upon an interpretation of statutory or regulatory constraints imposed on the use of a particular appropriation or account, the proper fiscal year to be charged, or similar issues. In all cases, the advice of legal counsel shall be requested to address legal issues raised during a preliminary review.

3. The results of the preliminary review shall be documented in a report of preliminary review and provided to an Assistant Secretary of a Military Department for Financial Management; or the Comptroller or Senior Financial Manager of the Joint Staff; Unified Combatant Commands; Inspector General, DoD; Defense Agency; DoD Field Activity; or the Uniformed Services of the University of Health Sciences (hereafter referred to collectively as “DoD Components”) for approval. The preliminary review report shall be coordinated with the applicable DoD Component office of legal counsel.

4. If the DoD Component involved determines that there is a potential violation, a formal investigation shall be initiated within 15 business days of the approval of the report of preliminary review. The provisions in Chapters 4 and 5 shall be followed for conducting a formal investigation. Procedures for reporting progress and the status of investigations are contained in chapter 6. Reporting procedures for violations are discussed in chapter 7.

5. If the DoD Component involved determines that there is no violation, the preliminary review report completes the actions regarding the potential violation. No further action is required after the report is approved.

B. PRELIMINARY REVIEWS INITIATED BY THE UNDER SECRETARY OF DEFENSE (COMPTROLLER)

1. When the Office of the Under Secretary of Defense (Comptroller) is apprised of a potential violation by an audit report or otherwise learns of a potential violation, the applicable DoD Component may be requested, by memorandum, to perform a preliminary review of the circumstances surrounding the potential violation in a timely manner, usually within 90 days.

2. Once the preliminary review report has been completed and the findings indicate a potential violation, a formal investigation shall be initiated by the applicable DoD Component within 15 business days of the approval of the report. An investigating officer shall be assigned in accordance with the provisions of Chapter 4 of this Volume and the Under Secretary of Defense (Comptroller) shall be advised of the results of the review report.

3. If the results of the preliminary review indicate that “no violation” occurred, the preliminary review report completes the actions regarding the potential violation and no further action is required after the report is approved. However, the results of the review shall be coordinated with the Office of the Under Secretary of Defense (Comptroller).

C. PRELIMINARY REVIEWS INITIATED AS A RESULT OF EXTERNAL REPORTS

1. In some cases, the General Accounting Office; Inspector General (IG), DoD; a Military Department Audit Agency; or other organizations external to a DoD Component may advise in a report that a potential violation may have occurred. Generally, in the case of audit reports, a recommendation to investigate the potential violation is included in the report.

2. Within 10 business days of receipt of a draft report that alleges a potential violation, the Office of the Under Secretary of Defense (Comptroller), the Assistant Secretary for Financial Management of a Military Department or the Comptroller of a Defense Agency or DoD Field Activity, as applicable, shall request that a preliminary review of the potential violation be initiated within the next 30 days.

3. In responding to the findings and recommendations in the reports, the DoD Component shall provide the status of the preliminary review or formal investigation as requested by the applicable organization.

4. Otherwise, the policies and procedures prescribed in section A., above, for the preliminary review shall apply.

D. ROLE OF THE INSPECTOR GENERAL, DOD

1. The Inspector General Act of 1978 provides the Inspector General, DoD, with the authority to conduct investigations of violations of the Antideficiency Act.
2. The IG, DoD, reserves the right to initiate investigations of potential violations of the Antideficiency Act, depending upon the type, amount, or significance of the violation.
3. The IG, DoD, may elect to conduct investigations not requested by the Under Secretary of Defense (Comptroller) or other DoD official.
4. When the IG, DoD, conducts such investigations, the resultant report shall constitute the official DoD report on the matter; no other DoD Component shall conduct parallel or supplemental investigations unless directed to do so by the Secretary of Defense, Deputy Secretary of Defense, or Under Secretary of Defense (Comptroller).

CHAPTER 4

BEGINNING AN INVESTIGATION

A. **PURPOSE OF A FORMAL INVESTIGATION.** A formal investigation is required under the provisions of this Volume whenever a preliminary review determines that a potential violation has occurred. Generally, the existence of a potential violation shall be established during the preliminary review and before a formal investigation begins. The purpose of the formal investigation is to determine the relevant facts and circumstances concerning the potential violation--if a violation has occurred, what caused it, what are appropriate corrective actions and lessons learned, and who was responsible for the violation.

B. **APPOINTMENT OF AN INVESTIGATING OFFICER.** A formal investigation shall be performed by an appointed investigating officer. The investigating officer shall be advised of his or her appointment by a formal memorandum. Included in that memorandum will be the case number and specific time frames to be met during the investigation. The case number shall be used on all applicable correspondence and reports related to the formal investigation.

C. **WHEN MORE THAN ONE DOD COMPONENT IS INVOLVED.** In some cases, a DoD Component whose funds are involved, rather than the DoD Component where the potential violation occurred, may request a formal investigation by the DoD Component where the potential violation occurred. A case number shall be assigned by the DoD Component whose funds are involved and the required information regarding the investigation shall be included in the next monthly activity report (Enclosure 6-1) of that DoD Component. If the DoD Component whose funds are involved is not successful in obtaining cooperation from other DoD Components implicated, the matter shall be referred to the Office of the Under Secretary of Defense (Comptroller) for resolution.

D. **PROCEDURES FOR SELECTING AN INVESTIGATING OFFICER.** Investigations of violations shall be conducted by individuals with no vested interest in the outcome, and who are capable of conducting a complete, impartial, unbiased investigation. A commander of a major command, a superior to a commander of a major command who is in the chain-of-command, or equivalent in an organization other than a Military Department, shall appoint an adequately trained and qualified individual to serve as an investigating officer. To help assure independence and impartiality during an investigation, an investigating officer shall be selected from an organization external to an installation-level organization being investigated.

1. When the Office of the Under Secretary of Defense (Comptroller) requires that a formal investigation be conducted, the applicable major command, or higher command, shall assign an investigating officer within 15 business days of the receipt of the request.

2. If the Under Secretary of Defense (Comptroller) notifies the Inspector General, DoD, (IG, DoD) (or other audit organization) that a potential violation requiring IG, DoD, investigation has been reported, the IG, DoD, shall assign an investigating officer and advise the Office of the

Under Secretary of Defense (Comptroller) of the date the investigation began in the next monthly activity report. A case number shall be assigned by the organization being investigated.

3. Except as provided for in paragraphs D.4. and D.5., below, an investigating officer shall meet all of the following qualifications:

a. Be chosen from a roster of qualified personnel as required by DoD Directive 7200.1, "Administrative Control of Appropriations."

b. Be adequately trained to conduct an investigation of this type, including having successfully completed a training course after May 1, 1995, as specified in Section B. or C. of Chapter 8 of this Volume.

c. Have adequate experience in the functional area that is involved in the apparent violation.

d. Have knowledge of financial management policies and procedures and the Antideficiency Act.

e. Have skill in investigating potential violations.

f. Otherwise be fully qualified to serve as an investigating officer.

4. An auditor from the IG, DoD; Army Audit Agency; Naval Audit Service; or Air Force Audit Agency can be considered to be fully qualified to serve as an investigating officer if he or she has an appropriate background in fiscal matters. Likewise, an investigator from the IG, DoD, or from the Inspector General organizations of the Military Departments (The Inspector General of the Army, The Naval Inspector General, and The Inspector General of the Air Force) can be considered fully qualified to serve as an investigating officer, if he or she has an appropriate background in fiscal matters.

5. Individuals not meeting the requirements of paragraphs D.3. and D.4., above, maybe considered to be "trained" investigation officers, and be eligible for selection to conduct investigations, provided that all of the following conditions are met:

a. They have successfully conducted and completed a previous investigation of an actual violation of the Antideficiency Act.

b. The prior investigation began after January 1, 1991, but before October 1, 1995.

c. Their name is included on the roster of approved qualified personnel as discussed in Chapter 8 of this Volume.

d. The current investigation begins before September 30, 1996.

6. After September 30, 1996, investigating officers must meet the requirements of either paragraph D.3. or D.4., above.

7. An investigating officer(s) need not be senior-in-grade to the person(s) being investigated.

8. If an individual involved in the investigation or in the process of selecting and appointing the investigating officer has a conflict of interest or any personal stake in the outcome of the investigation, that individual shall remove himself or herself from the process. Those matters that may not lend themselves to impartial investigation--because the investigator is assigned to the level where the violation occurred--shall be referred to the next higher level, through command channels, for the appointment of an investigator.

E. APPOINTMENT OF AN INVESTIGATING OFFICER BY THE UNDER SECRETARY OF DEFENSE (COMPTROLLER) OR OTHERS. An appointment of an investigating officer may be made or reviewed by the Under Secretary of Defense (Comptroller), an Assistant Secretary of a Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components, whenever a potential violation (a) is of special interest to that official, (b) demands specific attention, or (c) may involve a high-level official. Such a review or appointment also may be made whenever other circumstances warrant such involvement.

F. LEGAL ISSUES. An investigating officer may face a number of legal issues during the course of an investigation and may be expected to take statements. An investigating officer should consult with appropriate legal counsel on any legal issues associated with the investigation

G. USING AN INVESTIGATING TEAM. If a potential violation appears to involve a complex situation or a multitude of functional areas, a team approach may be necessary. The appointing official shall ensure that the investigating officer receives adequate support, including access to additional personnel with the requisite knowledge in all of the functional areas involved. The appointment of a legal advisor for the investigating team also should be considered.

CHAPTER 5

CONDUCTING INVESTIGATIONS

A. **PURPOSE OF AN INVESTIGATION.** The purpose of an investigation of a potential violation of the Antideficiency Act is to determine what happened, what were the causes, who was responsible, what actions should be taken to correct the current situation, and what actions should be taken to ensure that a similar violation does not occur in the future. Once an investigating officer is appointed, a formal investigation should begin.

B. **CHECKLISTS.** A checklist at Enclosure 5-1 shall be used during an investigation to document the results. The checklist at Enclosure 5-2 shall be used by the appointing officer in the review of the investigating officer's report of violation. The checklist at Enclosure 7-1 also should be used during the investigation and preparation of the final summary report of violation.

C. **RESEARCH EFFORT.** During the investigation, an investigating officer may be required to perform extensive research. The research effort may include accounting directives and regulations, directives and regulations related to the functional area involved (such as civil engineering or contracting), legal directives, public law, and legal opinions. An investigation officer shall normally review all specific documentation in the functional area involved related to the violation such as purchase requests, contracts, work orders, vouchers, and supporting materials, etc.

D. **TIMEFRAME FOR INVESTIGATION.** Investigations of potential violations of the Antideficiency Act, including the submission of the final summary reports to the Office of the Under Secretary of Defense (Comptroller), shall be completed within 9 months. (See reporting requirements in Chapter 6.) All appointing officials shall stipulate in the appointing letter a due date for the investigative report. Such due date shall conform with the 9-month timeframe regardless of the scope of the event or amount of the potential violation. The date established by the appointing official also shall consider the requirement for the Assistant Secretary of a Military Department for Financial Management, or equivalent, to submit a final summary report to the Office of the Under Secretary of Defense (Comptroller). The total process for investigating and reporting potential violations of the Antideficiency Act shall not take more than 1 year from date of discovery through the preparation of transmittal letters to the President, the Director of the Office of Management and Budget, and the leaders of both Houses of the Congress.

E. **APPROVING EXCEPTIONS TO TIMEFRAMES.** The Heads of the DoD Components may approve an exception to the above timeframe, on a case-by-case basis. This responsibility may be delegated to the Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components. This

responsibility shall not be redelegate. The Office of the Under Secretary of Defense (Comptroller) shall be notified of any extension that is approved and provided a justification for that extension. However, any extension granted shall not allow the time for completing the entire investigation (see Section B., above) to exceed 1 year from the day the investigation began.

F. SPECIAL INTEREST INVESTIGATIONS. Investigations of special interest may deviate from the 9-month timeframe, when necessary. However, the Under Secretary of Defense (Comptroller) shall be notified by the applicable appointing officer or investigating officer when such deviations are necessary. If the Under Secretary of Defense (Comptroller) agrees, the timeframe may be extended. Special interest investigations include potential violations that may have been the subject of a news release; requested by the Secretary, Deputy Secretary, or the Under Secretary of Defense (Comptroller); or involve a high-level DoD official.

G. INVOLVEMENT OF THE UNDER SECRETARY OF DEFENSE (COMPTROLLER). The Under Secretary of Defense (Comptroller) may supervise the progress of an investigation when the nature of the violation or the implication of individuals in the violation warrants such involvement. Such supervision may include requirements for oral and written progress reports and may require a team of investigating officers and compressed timeframes.

H. DEVELOPING CONCLUSIONS. During the investigative process, the investigating officer shall use extreme care in obtaining and documenting all the relevant specific facts of the case. The conclusions in the Investigating Officer's Report, including the identification of the person(s) as responsible for the violation, must be supported by the facts presented in the report.

I. IDENTIFYING CIRCUMSTANCES AND FIXING RESPONSIBILITY. The investigating officer shall consider carefully the facts and circumstances of the situation before fixing responsibility for a violation. Commanding officers, budget officers, or fiscal officers may be named because of their overall responsibility or position, or the fact that they are designated as the holder of a subdivision of funds, if they failed to properly exercise their responsibilities. However, the investigation shall attempt to discover the specific act--or the failure to take an action--that caused the violation and who was responsible for that act or the failure to take an action. A report of violation is considered incomplete until an individual(s) has been named as responsible for a violation. A conclusion that no one could be determined to be responsible for a violation is not acceptable.

1. A report of violation shall include assignment of responsibility to one or more individuals for a violation so that appropriate administrative or disciplinary action, if any, may be imposed as required by Title 31, United States Code, sections 1349, 1350, 1518, and 1519.

2. All relevant aspects of the case, including all persons and records connected with the event, shall be investigated fully. The key personnel involved in a violation shall be interviewed.

If an employee to be interviewed is a member of a bargaining unit, the investigating officer shall comply with appropriate statutory and collective bargaining agreement protections for such employee. Key facts associated with the events leading to the potential violation shall be examined and documented in the report and any conflicts should be addressed immediately by the investigation officer. If a series of events at several levels led to the violation, the report should clearly identify what happened at each level and how the events contributed to the violation.

3. The investigating officer must logically support from the documented facts a determination that one or more of the individuals involved are responsible for causing the violation.

4. The investigating officer shall show clearly what each person involved did, or failed to do, that caused the violation. The following questions should be considered:

- a. Did the violation occur because an individual carelessly disregarded instructions?
- b. Did the violation occur because an individual was inadequately trained or lacked knowledge to perform their job properly? If so, was the individual or a supervisor at fault?
- c. Did the violation occur because of an error or mistake in judgment by an individual or a supervisor?
- d. Did the violation occur because of lack of adequate procedures and controls? If so who was at fault?
- e. Did the violation occur because of other reasons? If so, who was at fault?

5. If, at any time during an investigation, the investigating officer believes there may be a criminal issue(s) involved, the investigation shall be stopped immediately. The investigating officer should consult with legal counsel to determine if the issue should be referred to appropriate criminal investigators for resolution.

J. **DEVELOPING CORRECTIVE ACTIONS.** Once the causes and the individual(s) responsible for the violation have been determined, officials of the DoD Component under investigation, working with the investigating officer, shall determine the corrective actions that are necessary to ensure that a violation of a similar nature will not recur. Those actions shall be included in both the report of violation and the final summary report. In addition, officials of the DoD Component under investigation, working with the investigating officer, shall develop a summary of lessons learned from the specific circumstances of the case that can be applied to the installation involved, the major command, the DoD Component, or all DoD Components. Section D of Chapter 10 in this Volume contains further guidance on corrective actions.

K. **RECOMMENDING DISCIPLINARY ACTION.** At the conclusion of an investigation, appropriate disciplinary action (to include no disciplinary action) shall be determined for the individual(s) named as responsible for the violation. That determination shall be based on consultations involving the individual's commander, the investigating officer, the staff judge advocate, and others with appropriate authority but on the ultimate responsibility of the appropriate commander or other official. The recommended disciplinary action, if any, shall be based on the severity of the violation, the degree of responsibility of the named individual and any mitigating circumstances. If responsibility for the violation is that of an individual(s) from an organization outside the organization under investigation, follow the procedures in paragraph B.7., Chapter 7 in this Volume. The type of disciplinary action taken shall be included in the report of violation and the final summary report of violation (see Chapter 7). Chapter 9 of this Volume contains additional guidance regarding recommended disciplinary actions.

L. **ACCUMULATING COSTS.** When conducting an investigation outside the major command to which the investigating officer is assigned, incidental costs (TDY, local travel, etc.) incurred shall be identified and accumulated. Reimbursement shall be requested, in accordance with Volume 11 of this Regulation from the command that was under investigation.

CHECKLIST FOR INVESTIGATING OFFICERS

The investigating officer shall ensure that the following items have been considered during the course of an investigation and the preparation of the investigating officer's report of violation:

1. Review the Preliminary Review Report and develop questions, as needed, to:
 - a. Ensure a full understanding of the facts and circumstances of the potential violation.
 - b. Validate the existence of the potential violation.
2. Examine the physical evidence associated with the potential violation and document each piece of evidence.
 - a. Make copies of the transaction(s) that caused the potential violation. The transactions may consist of working group documents, planning documents, commitment documents, obligating documents, payment documents, or others. Copies of the transactions related to the violation may be located in the functional area originating the obligation, the contracting office, engineering office, or Defense Accounting Office.
 - b. Trace and document who authorized or approved the transaction(s).
 - c. Trace and document all of the relevant decisions that led up to and the contributing circumstances that set the stage for the transaction(s) that caused the potential violation. These decisions might be traced to minutes of installation financial board meetings, installation financial working group meetings, or any other installation group meeting in which decisions concerning an installation's financial decisions are conducted.
 - d. If a regulation, funding document, or other administrative document was violated, review the pertinent document. Determine specifically what administrative limitation was exceeded. Review the sections of Title 31 of the United States Code related to administrative violations: Sections 1511 through 1519. See Appendix B of this Volume. Determine specifically which section of Title 31 was violated.
 - e. If a statutory limitation was exceeded, review the pertinent statute. Title 31, United States Code, sections 1341 through 1348 contain general government-wide provisions dealing with statutory limitations. Voluntary services are covered by section 1342. See Appendix B of this Volume. Other statutory limitations in Title 10, United States Code, or DoD Appropriations or Authorization Acts may be involved. Determine specifically which statute was violated.
3. Interview the key players and document the results of the interviews. (When interviewing DoD civilian employees who also are bargaining unit members, ensure that the relevant questions of the United States Code and the collective bargaining agreement are adhered to.)

- a. Question each key person to determine the role each played in the violation.
 - b. Question facts and circumstances that do not appear logical or supportable.
 - c. For those that are viewed as potentially responsible in any way, question why they did what they did and when they did it.
 - d. If they indicate that their supervisor instructed them to perform certain acts that contributed to the potential violation, interview their supervisors.
 - e. Reinterview to address conflicts in documented evidence.
4. Examine relevant circumstantial evidence associated with the potential violation and describe how each piece of circumstantial evidence relates to the case. Label all circumstantial evidence as such in the report. Inclusion of photographs, drawings, etc., particularly of construction projects, is not mandatory, but could be helpful in explaining the violation.
5. Assemble and analyze the documented evidence.
 - a. Develop and document a list of findings based upon the evidence. Identify the evidence that supports each finding.
 - b. Develop and document a list of conclusions, including which specific act, or failure to act, caused the potential violation. Identify the evidence and findings that supports each conclusion.
 - c. Determine if a violation of the Antideficiency Act has, in fact, occurred and if so, which provision of the Act was violated. Include in the documentation the rationale and evidence that support this conclusion and state the type of violation and the section of the Antideficiency Act that was violated.
 - d. Identify the amount and date of the potential violation.
6. Determine if the acts that caused the violation were in compliance with established internal controls or local operating procedures.
 - a. If the acts were in compliance with either the controls or procedures, determine what improvements are required to the controls and procedures to prevent future violations of this type.
 - b. If the controls or procedures were deficient or in need of improvement, interview the supervisors of the operating personnel to determine why the controls and procedures were deficient.

c. In consultation with the installation commander, operating personnel, and supervisor(s), recommend or review revised controls and procedures to prevent future violations of the same type. Include in the report any recommended improvements in procedures or controls and the actions taken on those recommendations by the local command. Describe actions in detail so they may be evaluated for application at other locations.

d. Obtain from management officials of the DoD Component involved any lessons learned from this event for use by others in addressing similar circumstances. Include any recommended lessons learned in the report.

7. Determine to what degree each key player was responsible for the violation.

a. If operating personnel failed to follow established procedures or controls, assign that person(s) as bearing a significant responsibility for the violation.

b. If a supervisor requested an employee(s) to disregard established procedures or controls, assign the supervisor in lieu of the employee, as bearing a significant responsibility for the violation.

c. If the standard operating procedures or internal controls are deficient and the deficiencies were a major contributing cause of the violation, assign the supervisor responsible for the procedures or controls as bearing a significant responsibility for the violation.

d. In most cases the individual(s) that is determined to be significantly responsible for the violation should be named as the responsible individual in the report of investigation.

e. If the violation involves a centrally managed allotment, the head of the operating agency at the time the violation was incurred shall be named responsible for the violation. However, other individuals also may be named responsible for the violation.

f. Identify in the report the individual(s) named responsible by name, rank/grade, position title, job series, and organization.

g. Include in the report a brief, clear description of the causes and circumstances surrounding the violation.

(1) The description must clearly state what the officer(s) or employee(s) responsible for the violation did, or failed to do, that caused the violation.

(2) State whether the violation was due to careless disregard of instructions; an error; a lack of adequate training, procedures, or controls; or due to other reasons.

(3) The report should not be so brief that it does not clearly convey the essential facts and circumstances of what happened. Clearly state in sufficient detail what happened.

(4) Identify the name and position of the holder of the funds subdivision (for example, installation commander) and an evaluation of the performance of his or her fund control responsibilities. The level of command immediately above the holder normally will furnish this evaluation. This evaluation may be omitted if the holder of funds is named the responsible individual for the violation.

8. The individual(s) named responsible shall be:

a. Advised that he/she may consult with legal counsel or, when applicable, union representative.

b. Advised that a violation has been determined to have occurred and that he or she is named a responsible individual for the violation and he or she will be allowed to review the report and examine evidence on which the determination was based.

c. Allowed to submit a sworn or unsworn statement regarding the alleged violation after reviewing the report and evidence. If the individual declines to make a statement, the report will so indicate.

d. Allowed to designate witnesses to testify in their behalf.

9. Designated witnesses shall be interviewed for the record.

a. Any new facts presented in the statement(s) will be addressed by the investigator in the report.

b. If a designed witness declines to make a statement, the report will so indicate.

10. The investigator shall assess whether the individual(s) named responsible committed the violation knowingly and willfully.

11. The commander, in consultation with the investigating officer and legal officials, shall determine appropriate disciplinary action against the individual(s) named responsible.

a. The recommended disciplinary action, if any, should be commensurate with the severity of the violation and the degree of responsibility of the individual.

b. Include in the report the recommended disciplinary actions and a statement by the local commander describing any administrative discipline imposed and any further action taken with respect to the officer(s) or employee(s) named responsible for the violation. The individual responsible for determining disciplinary action should attach a written statement to the report acknowledging that:

(1) A violation is a serious matter.

(2) Disciplinary action taken should be appropriate to the causes and circumstances determined during the investigation.

(3) The Department must report the violation to the Congress and the President.

(4) The disciplinary action that was taken is commensurate with the severity of the violation, with full justification of extenuating circumstances. (Chapter 9 contains further guidance on these statements.) If no disciplinary action is deemed appropriate, a full justification is required.

12. The investigator shall review the report before transmittal to the appointing official to determine that:

a. The report includes copies of the designation of the investigator by the appointing authority and the preliminary report.

b. The case control number, title of the appropriation/ fund involved, Treasury symbol, amount, date of occurrence, date discovered, and a description of how the potential violation was identified are included in the report. Also, the name and title of the investigator, the dates, place and scope of the investigation shall be included in the report.

c. There are no obvious questions or issues that have not been addressed.

d. The documented evidence supports the findings, conclusions and recommendations in the report.

e. All key players and designated witnesses have been interviewed.

f. All relevant evidence has been included in the report.

g. All circumstantial evidence has been properly labeled to distinguish it from the evidence in item 12.f., above.

h. The documentation indicates that all witnesses and individuals that were suspected of committing a criminal offense and provided testimony were properly informed of their rights; for example, with respect to military personnel, under Article 31, UCMJ.

i. An individual(s) has been named responsible, disciplinary action has been recommended, and the required statement by the commander on the appropriateness of the disciplinary action, whether imposed or not, is included in the report. The individuals are identified by name, rank/grade, position title, job series, and organization.

j. The investigator has indicated that the individual(s) named responsible did not commit the violation willfully and knowingly. If there were indications that an individual(s) may have

willfully and knowingly committed a violation, the case should have been referred to criminal investigators--see paragraph I.5. in Chapter 5.

k. Corrective actions have been taken or recommended and any lessons learned are identified in the report.

l. Any findings, conclusions, and recommendations that are based upon testimony are cross-referenced to the record of the testimony.

m. The documentation includes records of applicable legal advice when required.

n. The name and position of the fund holder and an evaluation of his/her performance are included in the report.

o. The report has been signed by the investigator.

CHECKLIST FOR APPOINTING OFFICERS

The appointing officer shall ensure that the following items are addressed in the investigating officer's report of violation:

1. Is a copy of the appointing officer's memorandum and the Preliminary Review Report included in the report?
2. Does the report include the case control number, title of the appropriation/fund involved, Treasury symbol, amount, date of occurrence, date discovered, and a description of how the potential violation was identified, the name and title of the investigating officer, the dates, place and scope of the investigation?
3. Is the evidence clearly documented in the report and is the evidence relevant to the case?
4. Does the evidence appear to be complete or are significant factors missing that should be considered? Do there appear to be relevant unanswered questions?
5. Are the findings clearly stated, logical, supported by the evidence and relevant to the case?
6. Is each finding that is based upon testimony properly cross-referenced to the testimony?
7. Are the findings and conclusions fully substantiated by the evidence and testimony?
8. Were all conflicts in testimony addressed in the report?
9. Is there an explicit statement that a violation, in fact, occurred or that no violation occurred? If a violation has occurred, does the report include a citation of the section of the Antideficiency Act that was violated?
10. Does the report name at least one individual as being responsible for the violation? Does the evidence support the determination of responsibility made by the investigating officer? Is the individual(s) named responsible identified by name, rank/grade, position title, job series, and organization? Does the report identify the date of the potential violation and the amount?
11. Does the report include a clear description of the causes and circumstances surrounding the violation?
 - a. The description must clearly state what the officer(s) or employee(s) responsible for the violation did, or failed to do, that caused the violation.
 - b. State whether the violation was due to careless disregard of instructions; an error; a lack of adequate training, procedures, or controls; or due to other reasons.

c. The report should not be so brief that it does not clearly convey the essential facts and circumstances of what happened. Clearly state in sufficient detail what happened.

d. Identify the name and position of the holder of the funds subdivision (for example, installation commander) and an evaluation of the performance of his or her fund control responsibilities. The level of command immediately above the holder normally will furnish this evaluation. This evaluation may be omitted if the holder of funds is named the responsible individual for the violation.

12. Does the report indicate that each individual named responsible was:

a. Advised that he or she may consult with legal counsel?

b. Advised that a violation has been determined to have occurred, that he or she is named a responsible individual for the violation, and he or she will be allowed to review the report and examine evidence on which the determination was based?

c. Allowed to submit a sworn or unsworn statement regarding the alleged violation after reviewing the report and evidence? If the individual declines to make a statement, the report should so indicate.

d. Allowed to designate witnesses to testify in his or her behalf?

13. Were the rights of the individual(s) named responsible protected? Are there indications in the report that suggest that their rights were not fully protected? If so, the case may have to be reinvestigated.

14. Were all witnesses--designated by the individual(s) named responsible--interviewed or does the report include valid reasons why they were not interviewed?

15. Was there any relevant new information provided by the oral or written statements by the individual(s) named responsible, or their designated witnesses? If so, does the report address this new evidence and its bearing on the responsibility of the named individual(s)?

16. Does the report explicitly state whether the violation was willfully and knowingly committed? If there are indications that the violation was willfully and knowingly committed, the investigation should have been referred to criminal investigators--see paragraph I.5. in Chapter 5.

17. Has the investigating officer included a discussion of the following items in the report and have appropriate actions been taken by the local command to:

a. Discipline the named individual(s), if appropriate, and provide a statement by the local commander justifying the action taken.

b. Identify and install corrective actions to prevent similar violations in the future.

- c. Improve procedures and controls, if appropriate.
 - d. Identify lessons learned from this case.
18. Has the report been signed by the investigator?

CHAPTER 6

STATUS REPORTS ON INVESTIGATIONS

- A. **OVERVIEW.** During the course of an investigation, reports of progress are required to provide status to the DoD Component concerned and to the Office of the Under Secretary of Defense (Comptroller). In addition, status of investigations that are overdue to the Office of the Under Secretary of Defense (Comptroller) is required.
- B. **MONTHLY ACTIVITY INFORMATION.** Information as indicated on Enclosure 6-1 is required on a monthly basis to report progress on overdue investigations and status on all other on-going investigations.
- C. **INFORMATION REQUIREMENTS.** The Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components, shall report the required information on a monthly basis to the Office of the Under Secretary of Defense (Comptroller) by the fifth business day of the month following the reporting month.
1. When a formal investigation is initiated, the applicable Office of the Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components, shall assign a case number and ensure that the appointing official establishes a completion date for the investigation. That completion date shall allow sufficient time for the DoD Component to submit the final report of violation to the Under Secretary of Defense (Comptroller) within 9 months after the formal investigation began.
 2. If the 9-month completion date for final reports of violation is not met, a monthly report providing status of those overdue investigations is required. In addition, the status of on-going investigations must be reported each month.
 - a. The information required by Enclosure 6-1 includes a list of the overdue reports of violation, the date each report is due to the Under Secretary of Defense (Comptroller), and the current status.
 - b. The information required by Enclosure 6-1 also includes any information not reported previously, including changes or new information for on-going investigations.
 - c. If necessary, all information on all on-going investigations may be reported each month, but the new or revised information should be highlighted in bold or underlined. Annotating the reporting of changes and new information will facilitate the analysis of the current status of the investigations.

3. Status on cases shall continue to be reported on a monthly basis from the beginning of the formal investigation through the date a final violation report or a “No Violation” Report is provided to the Office of the Under Secretary of Defense (Comptroller). Procedures for reporting a violation to the Office of the Under Secretary of Defense (Comptroller) are contained in Chapter 7. If a case is returned to a DoD Component by the Office of the Under Secretary of Defense (Comptroller), monthly status reporting shall be resumed by the DoD Component until that case is again provided to the Office of the Under Secretary of Defense (Comptroller). When the case is returned, a suspense date for returning the case shall be assigned to the DoD Component commensurate with the time required to (a) provide the additional information, (b) correct the report, or (c) complete other actions requested.

(INSERT COMPONENT)

SUMMARY STATUS OF ANTIDEFICIENCY ACT INVESTIGATIONS

AS OF (Insert Last Day of Month)

PART I

OVERDUE CASES

CASE #	DATE DUE TO USD(C)	CURRENT STATUS

NOTE: Include the case number for all cases that are overdue, the initial date due to the Under Secretary of Defense (Comptroller), and a statement of the most current status. Address any steps taken to expedite the case. If the status has not changed since the prior month's report, indicate "status unchanged from previous month."

PART II

UPDATE OF INFORMATION PREVIOUSLY PROVIDED

(1) CASE NUMBER	(2) STATUS	(3) AMOUNT	(4) APPN & TREASURY ACCT SYMBOL	(5) US CODE REF	(6) ORGAN- IZATION	(7) LOCA- TION

(8) NATURE OF VIOLATION	(9) DATE POTENTIAL VIOLATION OCCURRED	(10) DATE POTENTIAL VIOLATION DISCOVERED	(11) DATE INVESTIGA- TION BEGAN	(12) SOURCE OF POTENTIAL VIOLATION
(See examples attached)	00/00/00	00/00/00	00/00/00	Source (If identified by an audit report, provide the report number and title).

(13) BRIEF DESCRIPTION OF POTENTIAL VIOLATION	(14) PROGRESS OF VIOLATION/ OTHER COMMENTS
Briefly describe what appears to have caused the potential violation.	Provide significant milestones regarding progress of the case--e.g., date investigating officer was appointed, date report was submitted to the appointing official, the FM, the Legal Office, etc. Also provide other comments as appropriate.

PART II (CONTINUED)

- (1) Insert the case number assigned by the DoD Component.
- (2) Insert the current status of the case.
- (3) Insert the amount of the violation.
- (4) Insert the Appropriation and the Treasury Account Symbol.
- (5) Insert the United States Code Reference suspected of being, potentially at risk of being, or actually violated.
- (6) Insert the name/designation of the organization where the suspected or potential violation occurred.
- (7) Insert the location of the organization where the suspected or potential violation occurred.
- (8) Insert the nature of the violation--see Table 2-1.
- (9) Insert the date the suspected, potential, or actual violation occurred.
- (10) Insert the date the suspected, potential, or actual violation was discovered.
- (11) Insert the date the investigation began.
- (12) Insert the source of the suspected, potential or actual violation (if identified by an audit report, include the report title and number).
- (13) Insert a brief narrative description of the suspected, potential or actual violation--describe what appears to have caused the suspected, potential or actual violation.
- (14) Insert a brief narrative on the progress of the investigation--include significant milestones, such as date the report was submitted to the appointing official, date the report was submitted to the FM, etc. Also provide other appropriate comments regarding the violation.

NOTE: The case number, amount and appropriation should be reported each month for all investigations not yet formally submitted to the OUSD(C). For all other information requested, report only information that previously has not been reported, or information that has changed since reported previously.

Other (Explain)

CHAPTER 7

REPORTING VIOLATIONS OR FINDINGS OF “NO VIOLATION”

A. OVERVIEW. One of the most important responsibilities of investigating a violation of the Antideficiency Act is that of documenting the results and preparing the necessary reports.

1. The investigating officer must submit a detailed report to the appointing official.

2. The Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components shall ensure that a summary report of violation is prepared and submitted to the Office of the Under Secretary of Defense (Comptroller) within 9 months of discovery of the violation. This report should summarize the results of the investigation report and include as attachments the statement(s) of the individual(s) named responsible and other significant information.

3. Letters reporting a violation to the President, the Office of Management and Budget, and the Congress are required and will be prepared by the Office of the Under Secretary of Defense (Comptroller).

B. INVESTIGATING OFFICER’S REPORT OF VIOLATION. At the conclusion of an investigation, the investigating officer shall prepare a Report of Violation that documents the results of the investigation. The report shall be completed within 9 months of appointment, unless an extension has been granted in accordance with the provisions in Chapter 5 of this Volume. The timeline for preparing the report should take into consideration the review process to meet the 9-month deadline for submitting the final report.

1. The report shall be prepared in accordance with the policies and procedures in DoD Directive 7200.1, “Administrative Control of Appropriations,” and chapter 5 of this Volume. Investigating officers shall use the checklist provided in Enclosure 5-1 to ensure that all appropriate elements have been considered in the report.

- a. The appointing official and legal counsel also shall ensure that the report includes all pertinent items. For example, the investigating officer's report should contain statements of individuals having knowledge of the transaction(s) causing the violation, including the person(s) determined to be responsible.

- b. Documentation evidencing all material elements of the violation and supporting the conclusions reached shall be included with the report.

- c. The holder of funds shall be identified by name and position and an evaluation made of the exercise of his or her responsibilities.

2. The formal Report of Violation has no detailed format requirements, but must contain the following six parts: Part I, Authority; Part II, Matters Investigated; Part III, Facts; Part IV, Discussion; Part V, Conclusions; and Part VI, Recommendations.

a. Part I, Authority, shall contain the names, ranks or grades, and titles of the appointing official and the investigating officer(s), the date of the appointment, and an overview of the issues that are to be investigated.

b. Part II, Matters Investigated, shall contain a summary of the scope of the investigation and the methods used to accomplish the investigation, for example, face-to-face interviews; research of legal, financial, and management issues; written explanation of the facts of the potential violation, etc. It should discuss the issues and the areas or functions that were reviewed, evaluated, and investigated. The names, ranks, and titles of the individuals that were interviewed should be included. Part II should contain a discussion on any related areas and matters that were not investigated and the rationale for omitting them from the investigation.

c. Part III, Facts, shall contain the details of what was actually determined and documented during the investigation. Attachments that substantiate the details should be referenced. For example, the amount of funds that were involved in the violation; the section or subsection of Title 31, United States Code that was violated; the year and name of the appropriation(s) involved; the date(s) on which the potential violation occurred and when and how it was discovered; the name and location of the organization involved; the results of interviews of individuals involved in the violation; and a summary of how the area(s), procedures, processes, etc.--that were involved in the investigation--operated. If the investigation has been undertaken because of an audit report, that report shall be identified by title, number, date, and issuing audit organization. If the investigation was conducted as a result of a memorandum or letter directing an investigation, that document should be referenced and a copy attached to the report. The checklists at enclosures 5-1 and 7-1 should be used to ensure that all essential items are discussed.

d. Part IV, Discussion, shall contain a summary of what was accomplished during the investigation. Include a discussion of the evolution of the issues being investigated, number of people interviewed, mitigating circumstances surrounding the violation, issues that could or could not be proved during the investigation and the supporting rationale, any issues that cannot be agreed upon by those individuals involved, and any other comments that are pertinent to the investigation.

e. Part V, Conclusions, shall contain a detailed summary of what actually caused the violation and the associated circumstances; what actions should have been, but were not, taken by specific individuals; what actions were taken that should not have been taken; why the violation happened; whether the violation was committed knowingly and willfully; the name(s) of the individuals responsible for the violation; and the name(s) of the organization(s) involved.

f. Part VI, Recommendations, shall contain recommendations for (1) improving the overall and specific policies, procedures, and processes used by the functional areas involved in

the violation; (2) revising specific statutes or regulatory guidance that may have been involved; (3) obtaining funding to correct the violation; (4) imposing appropriate disciplinary action against the individual(s) responsible; and (5) ensuring that a similar violation will not occur in the future.

3. The person(s) named responsible for a violation shall be given an opportunity to (a) read the report of the facts and circumstances leading to the determination of responsibility and (b) provide a statement of any circumstances they believed to be extenuating. The individual named responsible shall be granted this opportunity even if he or she is no longer working where the violation occurred, or is retired or separated from the Department of Defense.

a. The opportunity to provide a second (i.e., final) statement should be offered after a final determination of responsibility has been made. The statement should not be based on an uncompleted investigation.

(1) The statement should first acknowledge that he or she has read the report and understands that he or she is being held responsible for the violation. If the individual can provide additional information, pertinent to the particular case, which was not addressed in the investigation and has a bearing on responsibility for the violation, he or she has the right, and should be requested, to do so.

(2) The individual also may refute statements made by others and make other comments. The final written statement, including any extenuating circumstances, shall be included in the Report of Violation and also attached to the summary report of violation submitted to the Under Secretary of Defense (Comptroller).

b. If the person(s) named responsible refuses to give a statement, request the person(s) to submit a signed statement of declination. If he or she refuses to sign a declination, include a statement to that effect, signed by an appropriate official, in the report. If the person(s) named responsible for the violation cannot be located despite a due diligent effort, a statement to that effect, signed by an appropriate official, shall be included in the report.

c. The report shall include an evaluation of any new or conflicting facts or circumstances when the statement of the responsible individual(s) differs from the report contents.

d. The report shall include a statement as to whether the person(s) determined to be responsible for the violation either did or did not knowingly and willfully incur the violation. If, in the judgment of the investigating officer, the violation was willfully committed, the procedures in Chapter 5, paragraph I.4. of this volume shall be followed.

4. The report shall include the required acknowledgements and a written statement, from the official responsible for determining the appropriate discipline for those individuals responsible for a violation, as required by the Under Secretary of Defense (Comptroller) in a memorandum dated December 19, 1994, subject: Violations of the Antideficiency Act. See section P of enclosure 7-1 and section B in Chapter 9 of this Volume for these requirements.

5. The investigating officer shall compile the Report of Violation and forward that report directly to the appointing official.

6. The appointing official shall add comments; ensure a legal review; coordinate the report with responsible officials in other functional areas involved in the violation (such as contracting, civil engineer or comptroller); and forward the report to the applicable Assistant Secretary of the Military Department, or the Comptroller or Senior Financial Manager for other DoD Components.

7. When the violation affects the funds of another DoD Component or the responsible individual is from another DoD Component, the appointing official shall (a) immediately notify the Office of the Under Secretary of Defense (Comptroller); (b) advise the other DoD Component involved before submission of the final summary report of violation; and (c) obtain coordination on the report from the other DoD Component involved.

C. **DOD COMPONENT SUMMARY REPORT OF VIOLATION.** After receipt of the Report of Violation from the appointing official, the Assistant Secretary of a Military Department for Financial Management, or Comptroller (or equivalent) for other DoD Components, shall ensure that a Summary Report of Violation is prepared, using the checklist at Enclosure 7-1. (Alternatively, the appointing official may prepare, or have the investigating officer prepare, and submit, the Summary Report of Violation.) The original and seven copies of the Summary Report shall be submitted to the Office of the Under Secretary of Defense (Comptroller). The Summary Report of Violation shall contain a copy of all pertinent documents referenced in the body of the report.

1. If funds of another DoD Component are involved, a copy of the Report of Violation shall be furnished to that Component.

2. If the same official is responsible for more than one violation under the same circumstances, one Report of Violation may encompass multiple violations. As an example, if--on several different occasions--an individual authorized obligations against an appropriation that should not have been used for that particular purpose, and funds in the correct appropriation were not available, those violations could be combined into one Report of Violation.

D. **REVIEW OF SUMMARY REPORT OF VIOLATION.** The Office of the Under Secretary of Defense (Comptroller) shall review the Summary Report of Violations for completeness, clarity, compliance with reporting requirements, and adequacy of corrective and administrative disciplinary action taken. If the Office of the Under Secretary of Defense (Comptroller) determines that the Summary Report of Violation does not meet the requirements of this Volume or DoD Directive 7200.1, the report shall be returned to the Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components. That official will be asked to resubmit the report with the requested information within the period of time as specified by the Office of the Under Secretary of Defense (Comptroller).

E. **REPORT TO THE PRESIDENT AND THE CONGRESS.** Following receipt of the Summary Report of Violation from the Assistant Secretary of a Military Department for Financial Management, or Comptroller (or equivalent) for other DoD Components, the Office of the Under Secretary of Defense (Comptroller) shall prepare notification letters for the President, through the Director of the Office of Management and Budget the Resident Pro Tem of the Senate; and the Speaker of the House of Representatives. These letters notify the President and the Congress of the violation, its cause(s) and circumstances, the names of the individual(s) responsible for the violation, and the disciplinary action taken. The notification letters shall be coordinated with the Office of the Deputy General Counsel (Fiscal) (ODGC(F)).

F. **REPORT OF “NO VIOLATION.”** If the results of a formal investigation determine that there was no violation, the investigation report shall include that conclusion supported by appropriate justification.

1. The Office of the Under Secretary of Defense (Comptroller) shall evaluate the “no violation” investigation report and submit a copy to the ODGC(F) for a review and concurrence.

2. If the Office of the Under Secretary of Defense (Comptroller) and the ODGC(F) agree with the conclusion of “no violation,” no further action is required of the DoD Component involved. If, however, the Office of the Under Secretary of Defense (Comptroller) and the ODGC(F) do not agree that there was “no violation,” the report shall be returned to the applicable Assistant Secretary of the Military Department for Financial Management, or equivalent. That official shall be requested to reopen the investigation and report the results, provide additional documentation of “no violation.” or accomplish some other action within a specified timeframe.

3. After the second investigation is completed or the requested action has been taken, the investigating officer shall submit the revised report to the applicable Assistant Secretary of the Military Department for Financial Management, or equivalent, for the preparation of a summary report of violation in accordance with the procedures in section B, above. The summary report shall be submitted to the Office of the Under Secretary of Defense (Comptroller) within 15 days following receipt by the applicable Assistant Secretary of the Military Department for Financial Management or equivalent.

CHECKLIST FOR FINAL SUMMARY REPORT OF VIOLATION

During preparation of the final summary report of an Antideficiency Act violation, the following items should be considered. This checklist is intended for the investigating officer, the appointing official, DoD managers, and commanders. Adherence to this checklist can help to reduce requests by the Office of the Under Secretary of Defense (Comptroller) for additional information on cases.

___A. Case Control Number

All violation cases are identified by a case control number. Case control numbers are assigned by the Office of the Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components, and provided through channels to the investigating officer. The reports must contain the case control number for control and monitoring requirements of the Department.

___B. The title of the appropriation or other fund account involved.

For instance, Operation and Maintenance, Air Force.

___C. The Treasury symbol of the appropriation or fund account involved.

For instance, 2142020 which stands for Army, fiscal year 1994 Operation and Maintenance, Army, funds.

___D. The amount of the violation.

The amount of the violation must correspond to the amount of funds which will be requested to correct the violation or the amount for which approval will be obtained to correct the violation.

___E. The date(s) on which the violation occurred.

___F. The date on which the violation was discovered.

___G. How the violation was discovered.

Was it discovered locally? Did an audit agency discover the violation?

___H. Name and rank of the officer(s) responsible for the violation. Name, grade, and civilian job series number--required by the Office of Management and Budget--of the civilian(s) responsible for the violation.

1. If a violation involves a centrally-managed allotment, the head of the operating agency at the time the violation was incurred shall be named responsible.
2. Others, in addition to the head of the operating agency, also may be determined to be responsible for the violation.

___I. The position title of the officers(s) or employee(s) responsible for the violation.

Spell out completely the position title. For instance, Chief, XYZ branch, is not sufficient. Spell out the formal name for the XYZ branch. Include enough detail so that an outsider will be able to understand the individual's position.

___J. The organization of the officer(s) or employee(s) responsible for the violation.

Completely spell out the name of the organization. For instance, base civil engineering is not sufficient. Spell out the full formal name and numerical designation, if any, of the base civil engineering office, such as 366 Combat Support Group Civil Engineering Squadron. Again, an outsider should be able to understand what the organization is.

___K. The section or subsection of Title 31, United States Code that was violated--for example, Title 31, United States Code, subsection 1341(a)(1)(A); Title 31, United States Code, subsection 1517(a)(2); or Title 31, United States Code, section 1342.

1. If a legal limitation is exceeded, usually Title 31, United States Code, subsection 1341(a)(1)(A) was violated. However, refer to Chapter 2 and subsection 1341(a)(1) for more specific guidance.

2. If a DoD or DoD Component administrative limitation was exceeded, usually Title 31, United States Code, subsection 1517(a)(2), was violated. However, refer to Chapter 2 or subsection 1517(a) for more specific guidance.

3. Title 31, United States Code, section 1342 (acceptance of voluntary services) is very seldom violated. However, see Enclosure 2-2 for an example.

___L. State whether the violation was an overobligation of an appropriation, an apportionment, or an allotment.

If an administrative subdivision of funds is involved with the violation, state whether the administrative subdivision of funds was overobligated. An administrative subdivision of funds can be an allotment, a centrally- managed allotment, an operating budget authority, an allocation, a suballotment, a suballocation, etc.

___M. A statement about the effect on the next higher level of funding.

1. Exceeding an administrative subdivision at the local level can lead to the next higher level exceeding its subdivision of funds and could also lead to the DoD Component's apportionment and appropriation being exceeded.

2. For instance, if an installation exceeded an amount in an operating budget authority or an allotment, did this cause the higher command operating budget authority or allocation to also be exceeded? If the higher command operating budget authority or allocation is exceeded, did this also cause the DoD/Component apportionment or appropriation to also be exceeded?

- ___N. A brief, clear description of the causes and circumstances surrounding the violation. The description must clearly state what the officer(s) or employee(s) responsible for the violation did, or failed to do, that caused the violation. State whether the violation was due to careless disregard of instructions; an error; a lack of adequate training, procedures, or controls; due to other reasons, etc.

The report of violation should not be so brief that it does not clearly convey the essential facts and circumstances of what happened. Clearly state in sufficient detail what happened.

- ___O. A statement that either the violation was knowingly and willfully committed or that the violation was not knowingly or willfully incurred.

- ___P. A statement of the administrative discipline imposed and any further action taken with respect to the officer(s) or employee(s) named responsible for the violation. The individual responsible for determining disciplinary action should attach written statements to the report acknowledging that (1) a violation is a serious matter and (2) disciplinary action taken/to be taken is appropriate to the causes and circumstances determined during the investigation, (3) the Department must report the violation to the Congress and the President, and (4) the disciplinary action taken/to be taken is commensurate with the severity of the violation, with full justification of extenuating circumstances. (Chapter 9 contains further guidance on these statements.) If no disciplinary action is deemed appropriate, a full justification is required.

- ___Q. Description of specific action(s) taken to correct the violation. Include any procedural changes or new safeguards established to prevent recurrence of the same type of violation. Describe actions in detail so that adequacy of the corrective action(s) may be evaluated.

- ___R. A statement as to the adequacy of the system of administrative control prescribed under Chapter 1 and Appendix A. If the official signing the report recommends changes to this Volume, he or she shall submit the proposed changes to the Accounting Policy Directorate, Office of the Under Secretary of Defense (Comptroller).

- ___S. A statement shall be made concerning the steps taken to coordinate the report with the other component or agency, if another DoD Component or another Federal agency is involved.

The appointing official should coordinate the report with the applicable Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components or Federal agencies.

- ___T. Each officer or employee named responsible for the violation shall be given the opportunity to state any circumstances believed to be extenuating. The statement should not be based on a preliminary investigation, but should be made after a determination of responsibility has been made. If possible, the officer or employee shall be encouraged not to refer to documents that are not part of the report submission.

The individual(s) found responsible for the alleged violation must be:

1. Allowed to consult with legal counsel.
2. Advised that a violation has been determined to have occurred and that he or she is named a responsible individual for the violation and will be allowed to review the report and examine evidence on which the determination was based.
3. Allowed to submit a sworn or unsworn statement regarding the alleged violation after reviewing the report and evidence.

- ___U. The report shall include an evaluation of any conflicting facts or circumstances when the statement of the responsible officer(s) or employee(s) differs from the report itself.

- ___V. Name and position of the holder of the funds subdivision (for example, an installation commander) and an evaluation of the performance of his or her fund control responsibilities. The level of command immediately above the holder normally will furnish this evaluation. This evaluation may be omitted if the holder of funds is named the responsible individual for the violation.

Provide the name and position of the holder of funds along with the evaluation.

- ___W. A statement of any additional action taken by, or at the direction of, the head of the DoD Component with respect to the overallocation, overallotment, authority, or directive to overobligate, or overexpend, and any procedural changes or new safeguards established to prevent recurrence of such violation. Also include the actions taken to provide funds, if required, to cover the amount of the violation.

See item Q, above.

___X. Lessons learned. A statement summarizing lessons learned from the results of the investigation. Recommended lessons learned shall include those applicable to (1) the installation where the violation occurred, (2) the major command, (3) the DoD Component involved, and (4) all DoD Components.

___Y. Additional Information. Include in the report of violation the following information:

1. Testimony from witnesses.
2. Other documentation such as photographs, drawings, copies of appropriate pages of regulations, etc., gathered to support any conclusion(s) reached.
3. The review of such report by the appointing official.
4. Any other pertinent information generated as the result of the investigation. If the violation involved an appropriation with a negative balance, state whether the cause of the negative balance was systemic or a unique situation. (Includes item X, above.)

___Z. Other Comments. Each report is a unique work reflecting each investigating officer's individual effort.

Assistance may be requested of the legal counsel at the major command which appointed the investigating officer. Please ensure the report is tabbed so that information referenced in the report can be located easily.

CHAPTER 8

TRAINING0801 INTRODUCTION

This chapter establishes policies and procedures for the training of individuals assigned to investigate potential and actual violations of the Antideficiency Act (ADA). To ensure efficiency in the investigation of, and reporting on, ADA violations, those involved in the investigation process must receive adequate training.

0802 TRAINING FOR INVESTIGATORS

★ One of the most important individuals involved in the investigation process of the Antideficiency Act violations is the investigator. It is the responsibility of each Department of Defense (DoD) Component to ensure that its ADA investigators are trained properly. Although each DoD Component is responsible for ADA investigator training, the Defense Finance and Accounting Service (DFAS) is available to develop supporting courses, if requested by the DoD Components. Investigator training courses developed by a DoD Component shall be coordinated with the DFAS. Training requirements for Antideficiency Act investigators are as follows:

★ 080201. Completion of an Appropriations Law, or equivalent course, shall be a prerequisite for ADA investigators.

080202. ADA investigators shall be qualified to: interview witnesses, gather evidence, develop “facts,” document findings and recommendations, prepare reports of violation, recommend appropriate disciplinary action, meet timeframes established for the completion of an investigation, and recommend corrective actions. Chapter 5, enclosure 5-1, of this volume also has a checklist which should be used by investigators.

★ 080203. ADA investigators shall receive additional training on an as needed basis.

★ 080204. DoD Components are encouraged to develop courses using interactive media or computers. A training handbook also may be used as a “hands-on” guide during an investigation.

080205. Once an individual completes appropriate training, his or her name shall be included on a roster of available ADA investigators maintained by each DoD Component. Data to be maintained on the roster for available investigators include the name, rank/grade, date initial training was received, organization to which assigned, functional specialty(ies), and number of investigations previously conducted. Controls shall be established to ensure that the required roster is kept current. The roster shall be used by DoD Components to select individuals to investigate potential violations of the Antideficiency Act.

080206. Upon completion of appropriate training; each individual shall receive a certificate stating that he or she has completed the training course. In order to continue to remain eligible to conduct investigations, individuals shall be required to renew their certificates every 5 years by attending a refresher-training course.

0803 TRAINING FOR FINANCIAL AND PROGRAM MANAGERS

DoD Components also shall provide appropriate training for its senior financial managers and program managers. The focus of this training shall include the basics of fund control and the ADA statute; the types of violations that can occur; the most frequent types of violations that occur within the Department and their causes; the requisite training, supervision, and oversight of personnel who perform financial management or programmatic functions; and methods for preventing violations. Video, computer courses or a handbook may be used for such training. The training shall be provided to these managers on a periodic basis to ensure currency of topics identified above.

CHAPTER 9

DISCIPLINARY ACTION

A. **ADMINISTRATIVE DISCIPLINE.** A military member or DoD employee who is responsible for a violation under DoD Directive 7200.1, “Administrative Control of Appropriations,” or this Volume, shall be subject to appropriate administrative discipline. Appropriate administrative discipline for violations of Title 31, United States Code, sections 1341(a), 1342, or 1517, is authorized by Title 31, United States Code, sections 1349 or 1518.

1. Disciplinary action shall be administered on a case-by-case basis as determined by the appropriate authority. The level of discipline administered to the individual responsible **shall** be commensurate with the nature and seriousness of the offense, the record of the person responsible, their level of experience, the degree and level of responsibility of the individual. Any mitigating circumstances **shall** also be considered.

2. Administrative discipline for a civilian employee may include written admonishment or reprimand, reduction in grade, suspension from duty without pay, or removal from office.

3. Military personnel may be subject to appropriate administrative discipline or may be subject to action under the Uniform Code of Military Justice.

4. Even though the individual determined to be responsible for a violation is no longer on active duty or employed by the applicable DoD Component, appropriate disciplinary action may be pursued. If disciplinary action is taken, such action shall be documented in the individual’s personnel file in accordance with established policies.

B. **DOCUMENTING DISCIPLINARY ACTION.** A violation of the Antideficiency Act is a serious matter as it represents a violation of a Federal statute. The fact that a violation was not willfully and knowingly committed does not, by itself, justify a decision not to impose disciplinary action. The individual who is responsible for determining the appropriate disciplinary action shall:

1. Acknowledge, in writing, that he or she understands that (a) a violation of the Antideficiency Act is a violation of Federal statute; (b) the Department is required to report the violation to the President and the Congress of the United States; (c) even though a violation may not have been committed willfully or knowingly that, by itself, does not justify a decision not to administer disciplinary action; and (d) disciplinary action commensurate with the severity of the violation and other factors should be taken against the individual(s) named responsible for a violation.

2. Provide a written statement addressing why he or she believes that the disciplinary action taken, or the failure to take disciplinary action, is commensurate with the severity of the violation. If there are extenuating circumstances, they must be considered.

3. Include both statements discussed above in the report of investigation.

C. **CRIMINAL PENALTIES.** If a violation has been determined to have been knowingly and willfully committed, there are statutory provisions requiring criminal penalties. Thus, an officer or employee found responsible for committing a violation knowingly and willfully may be subject to criminal penalties. All investigations that provide any indications that the violation was knowingly and willfully committed shall be terminated by the investigating officer. The investigating officer should consult with legal counsel to determine if the investigation should be referred to the appropriate criminal investigation organization. for action.

1. Both sections 1350 and 1519 of Title 31, United States Code, discuss criminal penalties for violations of the Antideficiency Act. Title 31, United States Code, section 1350, prescribes that “an officer or employee of the United States Government or of the District of Columbia government knowingly and willfully violating section 1341(a) or 1342 of this title shall be fined not more than \$5,000, imprisoned for not more than 2 years, or both.” Title 31, United States Code, section 1519, includes the violation of section 1517(a) and provides the same level of punishment. Criminal penalties for military personnel may include punishment under Article 15 of the Uniform Code of Military Justice or trial by Courts Martial.

2. When submitting a final summary report of violation to the Office of the Under Secretary of Defense (Comptroller) that may require criminal penalties, a statement to that effect--which is required by OMB Circular No. A-34--shall be included in the summary report from the Assistant Secretary of the Military Department for Financial Management, or the Comptroller or Senior Financial Manager for other DoD Components.

CHAPTER 10

VIOLATIONS--CAUSES, PREVENTION, AND CORRECTION

A. CAUSES OF VIOLATIONS

1. Based on an analysis of investigations of violations, the Office of the Under Secretary of Defense (Comptroller) has developed the following list of the most frequent causes of violations of the Antideficiency Act:

- Established internal controls and standard operating procedures not followed.
- Inadequate supervisory involvement or oversight.
- Lack of appropriate training.
- Inadequate standard operating procedures and internal controls.

2. As the above list indicates, supervisors of DoD personnel who have responsibility for control and use of DoD funds should ensure that their personnel are provided with proper oversight, support, and necessary training to help prevent violations. The following section discusses specific actions that can be taken to reduce or prevent violations.

B. PREVENTING VIOLATIONS

1. To help prevent violations of the Antideficiency Act, DoD personnel should be knowledgeable of the requirements in this Volume. Supervisors at all levels should provide their employees with the requisite training and experience in the control and use of funds at levels commensurate with their responsibilities. Furthermore, supervisors should perform oversight and validation checks to ensure that established internal controls and standard operating procedures are adequate and are being consistently followed by their employees. Supervisors shall use their internal management control programs as required by DoD Directive 5010.38, "Internal Management Control Programs," to assess periodically the reliability of internal control systems and employee internal management control accountability.

2. One of the most effective ways to prevent violations is to perform regular reviews of the status of funds reports. In this regard, commitments shall not be added to obligations to determine whether a violation has occurred. However, if the amount of commitments and the amount of obligations (undelivered orders, accrued expenditures unpaid, and accrued expenditures paid) exceed the total availability of an allotment, allocation, or appropriation, a violation could occur if all or some of the commitments eventually become valid obligations.

3. The most common types of violations in the Department of Defense can be significantly decreased by proactive measures specifically tailored to address the causes and corrective actions required to prevent their occurrence. DoD personnel with responsibilities for the control and use of funds of the types described below should be aware of these common types of violations and be required to take positive actions to avoid their occurrence.

4. The five types of circumstances that account for most of the violations of the Antideficiency Act in the Department, in order of precedence, are as follows:

- a. Exceeding limits on the use of Operation and Maintenance (O&M) funds for minor construction projects.
- b. Exceeding the fund availability amount in an appropriation or exceeding the amount of an allotment/ suballotment.
- c. Using O&M funds to acquire equipment items that exceed the designated amount for the mandatory use of procurement funds (expense versus investment threshold rule).
- d. Not recording obligating documents in a timely or accurate manner which results in overobligating funds already obligated (because the obligating document was not recorded timely or correctly).
- e. Obligating in advance of funds being provided.

5. To prevent the most common violation (paragraph B.4.a., above), engineering and contracting personnel shall be advised of the provisions of Title 10, United States Code, section 2805, and DoD rules and regulations that cover minor construction projects. Engineering personnel frequently are determined to be responsible for violations involving construction projects exceeding statutory construction limitations and administrative construction limitations placed in engineering regulations. A brief summary of some of the provisions of section 2805 and the DoD rules and regulations follows:

- a. The amount of O&M funds that may be used for a minor construction project is limited by statute. However, from time to time, that limit is increased by the Congress. If the specified limit is exceeded, Military Construction funds are required to be used for the entire project including planning and design. A violation of Title 31, United States Code, section 1341(a)(1)(a), may occur when the limitation is exceeded. The limitation applies for the use of O&M funds for a minor construction project even though there is sufficient obligational authority available in the O&M account (that was charged) at the time the project is authorized and approved.
- b. Engineering and contracting personnel also should be familiar with the statutory limitation, under the provisions of Title 10, United States Code, section 2825, on the maintenance and repair funds that may be used for a family housing unit. That limit may not be exceeded without prior approval by the Congress. When that limit is exceeded for any reason during the

completion of a family housing maintenance and repair project, and the conditions specified in the law for waiver of the statutory limitations have not been met, a violation of Title 31, United States Code, section 1341(a)(1)(a), may occur. However, in FY 1992, the Congress approved after-the-fact notification of increased costs beyond the statutory limit only for the removal of “encountered asbestos” under specific conditions.

c. Construction costs which are misclassified as alternations by engineering personnel may result in a violation of the Antideficiency Act. A potential violation may occur if the amount of the misclassification added to construction costs, if any, exceeds a statutory limitation. For example, an engineering project which has a minor construction cost of \$280,000 plus maintenance and repair costs of \$70,000 could cause a violation of a \$300,000 operation and maintenance minor construction statutory limitation if the maintenance and repair work is later proved to be construction. Likewise, a maintenance and repair project in the amount of \$350,000 could be a potential violation of the Antideficiency Act if the maintenance and repair is determined later to be construction.

6. The second most common violation is exceeding availability of funds (paragraph B.4.b., above). The frequency of this type of overobligation condition is reported to have contributed to the passage of the Antideficiency Act.

a. A violation of the Antideficiency Act has occurred if an obligation or expenditure exceeds the amounts available in an apportionment, a reapportionment, a revolving fund, or an administrative subdivision of funds. All DoD commanders, managers, and personnel should be aware that this type of violation accounts for about one-third of the Antideficiency Act violation cases in the Department.

b. The establishment of a funds control system is essential to ensure that all obligations are properly edited against available funds and authorized, before they are incurred. This process must include the recording of a reservation of available funds for authorized obligations that are not immediately obligated and recorded. The reservation shall be by means of a formal commitment or an informal reservation record of the estimated amount of the obligation, or an estimated obligation that is documented to approximate closely the obligation when incurred and recorded.

c. For example, some of the Military Departments have experienced problems with overobligated reserve component personnel accounts. Funds in these accounts are used to pay reservists for week-end drills, travel, special tours, other training, etc. Reserve component unit commanders--who control a formal administrative subdivision of funds subject to the Antideficiency Act--should budget and reserve against available funds estimated amounts for week-end drills and other scheduled training in advance of the incurrence and recording of these obligations.

7. The third most common type of violation (see paragraph 4.c., above) involves the use of O&M funds to purchase equipment items that should be acquired with procurement funds.

a. The Congress designates an amount above which acquisitions of equipment shall be funded with procurement funds. The amount has been frequently increased in recent fiscal years.

b. The commonly reported scenario involves DoD personnel using operation and maintenance (O&M) funds to purchase a computer system when Other Procurement funds are required. Other procurement funds shall be used whenever a piece of computer equipment becomes an integral part of a computer system or local area network (LAN) unless the total costs of the entire system or LAN is less than the amount designated for use of procurement funds. Additional expense/ investment criteria, as it applies to information technology equipment and software can be found in Chapter 1, Volume 2A, and Chapter 18, Volume 2B of this Regulation.

c. Similar problems also frequently occur when acquiring low dollar value equipment items that are estimated to cost less than the congressionally designated amount for procurement funds but actually cost more than that amount when acquired.

d. A violation of the Antideficiency Act does not automatically occur in these situations (paragraphs B.7a.- B.7.c., above) because, when discovered, the obligation is simply moved from the O&M account to the applicable procurement account. If sufficient funds are available after recording the obligation in the procurement account, including all other known valid obligations and deobligations, a potential violation of the Antideficiency Act has not occurred. However, if sufficient funds are not available to cover the obligation in the procurement account, a potential violation of the Antideficiency Act may have occurred.

e. DoD decision makers, such as program managers, information systems and contracting personnel must be knowledgeable of the expense versus investment rules if this type of violation is to be prevented. Training of program managers and information systems, contracting and comptroller personnel should be focused on this issue. Such training should help to reduce the incorrect application of the expense versus investment rule and the resulting violations of the Antideficiency Act.

8. The fourth most common type of violation (paragraph B.4.d., above) occurs when obligating documents are not recorded in the accounting system in a timely and accurate manner and, as a result, funds subject to the Antideficiency Act are overobligated.

a. When obligations are not recorded, the official records in the accounting systems reflect an inflated (and incorrect) availability of funds. Since those records are used by personnel to certify fund availability for other obligations, a violation can easily occur because the records do not reflect the correct amount of funds available for obligation.

b. To help prevent this type of violation, the comptroller community shall require that all organizations that incur obligations and record obligations maintain strict and absolute positive controls over obligating documents and/or their electronic equivalents to ensure that none are lost or misplaced and are accurately recorded in a timely manner. Such controls include batch totals of transactions and dollar amounts incurred, transmitted, received, processed and recorded.

9. The fifth most common type of violation (paragraph B.4.e., above) is caused when managers obligate funds in advance of their availability.

a. The most common scenario is the use of current year funds to procure goods or services that only are properly funded with subsequent years' appropriations. A violation of the Antideficiency Act occurs when an individual has obligated funds before being authorized and appropriated by the Congress.

b. For example, the signing of a lease for a facility or equipment and agreeing to pay, or simply obligating, for 2 years of lease cost during the first year would constitute an obligation in advance of the availability of the funds for the second year. Similarly, agreeing to pay for, or obligating, a maintenance agreement for equipment for 2 years would constitute a violation of the Antideficiency Act.

c. Signing a contract for a new project or new work effort for which funds are not previously authorized and approved by the Congress would also constitute this type of violation of the Antideficiency Act.

d. To help prevent this type of violation, training programs should include specific focus on the importance of ensuring that funds are authorized and available before obligating the government to contracts for future fiscal years expenses.

10. The Department can make significant progress in the reduction of these common violations through proper education and effective training of personnel and ensuring that adequate internal controls and standing operating procedures are in place and being followed.

a. This volume should be used to communicate the importance of learning about violations to the personnel throughout the Department involved in the stewardship of DoD funds. Other sources on the subject of the Antideficiency Act include the United States Code and opinions and decisions of the Comptroller General.

b. This volume should be used as source material to conduct seminars and workshops targeted to general and specific audiences including program managers, engineers, contracting, information systems, comptroller personnel, commanders, supervisors, and managers.

c. The formal education structure within the Department is another avenue available to educate personnel on the Antideficiency Act. Formal courses can be used to alert personnel to common violations and high-risk business transactions and decisions that can result in a violation. The DoD financial management community sponsors professional development courses that include discussion on Antideficiency Act violations. These courses are located at Syracuse University, at Syracuse, New York, primarily for Army-sponsored personnel; the Naval Post Graduate School, at Monterey, California, primarily for Navy-sponsored personnel; and the Air Force Professional Military Comptroller School at Maxwell AFB, Alabama, primarily for Air Force-sponsored personnel. In addition, the Judge Advocate General School at Charlottesville,

Virginia, includes a fiscal law course in its curriculum. See Chapter 8 of this Volume for a further discussion of training.

11. It is critical that DoD commanders and managers are aware of the Antideficiency Act concepts and the most common causes of violations--see Section A above. The full spectrum of DoD's formal education programs for all military officers, from staff officer courses to executive development classes, should incorporate relevant aspects of this volume for use in highlighting the potential pitfalls and risks associated with the Antideficiency Act.

12. On-the-job training is the responsibility of all supervisors and personnel. Supervisors and managers should incorporate the provisions of this volume in their on the job training programs for those employees responsible for funds administration and for use of funds.

C. NO VIOLATION--ERRONEOUS CHARGING OR RECORDING

1. No violation of the Antideficiency Act is considered to have occurred when an overobligation or overexpenditure is solely the result of not recording available documents or transactions that increase fund availability, recording an erroneous transaction, or recording a transaction erroneously. In each instance, the potential violation status is eliminated by correcting the erroneous transaction, or by posting the omitted transaction. However, such actions should not include the deletion or adjustment of any valid transactions. If after the proper recording of the transactions, an overobligation or expenditure remains, a potential violation of the Antideficiency Act has occurred.

2. A violation of Title 31, United States Code, section 1517, may exist when the amount of authorizations of funds granted to other activities exceeds the amount of funds available under the applicable authorization of funds received. Sometimes errors occur when recording transactions that have the effect of showing more funds in the allotment, operating budget authority, or other administrative subdivision of funds than are actually available. When such errors do occur and the funds are not obligated or expended, there generally is no potential violation. However, the error must be corrected as soon as it is detected. Conversely, errors which require correction by obtaining additional funds in the administrative subdivision of funds cannot eliminate the fact that a violation has, indeed, occurred and must be investigated.

3. An erroneous recording is the recording of an authorization of funds, obligation, commitment, or expenditure in an incorrect fund or account; or the posting of an amount other than the correct amount for the transaction. An erroneous recording may occur by citing the wrong fund, appropriation, subhead, budget project, or allotment/suballotment authorization number on an obligation and/or expenditure document. Examples may also include the recording of duplicate payments or overpayments and/or related obligations. An omission is the failure to post a properly executed authorization of funds (either received or granted), a purchase requisition, commitment, an obligation, or an expenditure, when the document/transaction is available for recording.

4. Once incurred, failure to record valid obligations or expenditures, in the official accounting records will not preclude or avoid a potential violation. All obligations or expenditures shall be recorded accurately and promptly even if the recording results in a negative amount in the accounting records.

5. A potential violation may not exist after an error in the records has been corrected if the following situation exists: Neither obligations nor expenditures incurred exceed the amount of the applicable authorization of funds received at the time of correction and would not have exceeded the applicable authorization of funds received at the time of the initial transaction(s) that are being corrected.

6. A failure to record a valid obligation or expenditure as of the date incurred does not avoid the occurrence of a violation of the Antideficiency Act if the recording results in the account balance or other limitation being exceeded. A potential violation must be reported if this occurs. Obtaining additional funds to cover the violation is required. However, obtaining the additional funds does not eliminate the fact that a violation occurred.

D. CORRECTIVE ACTION

1. Part of an investigating officer's responsibilities includes recommended actions to prevent future violations of a similar type (procedural corrections) and to correct the specific adverse funding condition (funding corrections) that resulted from the violation.

2. The report of violation does not serve to condone, retroactively approve, or financially justify, a violation. All violations must be corrected with the proper funding or the necessary approval from the proper approving authority.

3. Procedural Corrections

a. These corrective actions usually are made by the installation activity causing the violation and may include training or changes in procedures to preclude similar violations. Other activities may also be involved. For instance, it is possible that, as a part of an installation's overall corrective action, a change in local procedures for an organization such as contracting, engineering, information systems, or Defense Accounting Office--which supports the installation--is required. Additionally, changes in practices or procedures by the finance office could provide benefits to the activity that caused the violation. However, unless individuals in the finance office caused the violation, corrective actions taken by that office would be secondary to the corrective actions taken by the responsible organization.

b. Recommendations for future consideration of installation-level corrective actions are not acceptable in the report. The report must state what corrective actions were actually taken and are being taken to preclude similar violations in the future.

c. Recommendations that apply at other installations and organizations should be included in the report and so identified. Such recommendations should be specific and not general in nature. The major command, or equivalent, shall address such recommendations and include a statement whether these recommendations are considered appropriate for adoption by the major command. The Head of the DoD Component, or designee, shall evaluate such recommendations and include a statement whether they are considered appropriated for adoption by the DoD Component.

d. The investigating officer also may make recommendations for improvements in the contents of the Checklists or other portions in this Volume.

e. If recommendations are directed towards changing DoD Component regulations, the recommendation should include the number and name of the regulation, the paragraph which is recommended for change, the recommended wording of the change, and the rationale for the recommended change. A situation in which an investigation determines that a particular regulation caused or contributed to the cause of a violation, the report of violation shall contain a recommendation for changing that portion of the regulation.

4. Funding Corrections

a. The report must state what actions were taken to request the proper funding. Wording in the report to the effect that funds will be requested is not sufficient.

(1) Under Title 31, United States Code, section 1301(a), appropriations shall be applied only to the objects for which the appropriations were made, except as otherwise provided by law. This means that if improper funds were used, the correct funds must be used as provided by law. The funding correction should be made as soon as possible. However, since it may take some time to obtain the proper funds, the report should not be held until the funds are provided. The report shall state what action has been taken to ensure the violation is “financially corrected” and when the funds are expected to be received.

(2) As an example, if O&M funds were improperly used for a minor construction project costing in excess of the limitation for minor construction, the installation must request proper funding to comply with Title 31, United States Code, section 1301(a). The proper funds, in this example, should be requested from the Military Construction appropriation to restore the O&M appropriation to the proper balance. The installation budget office requests the proper funds. Obtaining these funds may take some time to accomplish. Therefore, the report should state what action has been taken to obtain the funds and when the funds are expected to be received.

(3) Care must be taken when correcting financial transactions that involve foreign currency fluctuations budget rates. The appropriate budget rate for the appropriate year must be used.

(a) The appropriation from which the incorrect transaction took place must be corrected as well as the applicable foreign currency fluctuations centrally-managed allotment from which any gain or loss (difference between the current rate actually paid and the budget rate actually obligated) was incorrectly credited or charged. If the appropriation to which the charge must be made is subject to foreign currency fluctuations budget rates, i.e., when an O&M account was charged when a military construction account should have been charged instead, a charge to the appropriation at the applicable budget rate and a charge or credit to the applicable centrally-managed allotment will be required.

(b) Corrections applying to foreign currency fluctuations centrally-managed allotments require coordination with the funds manager of the applicable foreign currency fluctuations centrally-managed allotment at the DoD Component.

b. In some cases, the appropriation that should provide the proper funding to correct a violation may now be closed. Guidance on the treatment of transactions that should have been charged to accounts that are now closed, is being addressed in Volume 3 of this Regulation.

c. In some cases involving violations of departmental or DoD Component administrative limitations, proper funding may not be needed. However, administrative approval after-the-fact from the proper approving authority should be obtained in order to properly document the records associated with the violation.

d. The correction of a violation by means of receipt of the proper funding or the after-the-fact approval does not negate the occurrence of the violation. Violations, even though financially corrected subsequently, must still be properly investigated and reported.

APPENDIX A--PROCEDURES FOR THE ADMINISTRATIVE CONTROL OF FUNDS

A. **ADMINISTRATIVE CONTROL SYSTEMS.** As discussed in chapter 1, systems for administrative control of funds should be designed so that administrative subdivisions of funds are placed at the highest practical organizational level consistent with effective and efficient management. For instance, a single allotment for an appropriation or other fund normally provides a sufficient basis for control of funds without further allotments or suballotments at lower levels, such as program elements, object classes, or other types of data. Use of limitations on funding documents shall be restricted to those necessary (1) to comply with statutory provisions imposed by the DoD Authorization or DoD Appropriation Acts, or other legislation, and (2) to address specific management requirements.

1. Reporting Requirements for Administrative Control Systems. A system for administrative control of funds shall be established to provide data for reviewing the efficiency with which funds are administered or used. When a need exists for accumulating data below the allotment level, reporting requirements shall be established separately from an administrative subdivision of funds.

2. Delegations of Authority. All delegations or redelegations of authority or functions under Chapter 1 of this Volume shall be made in writing. No delegation or redelegation of authority or functions shall be exercised in any manner that limits the capabilities of the Secretaries of the Military Departments, the Directors of the Defense Agencies, or designated officials of the Office of the Secretary of Defense to exercise the control necessary to discharge properly their responsibilities under this Volume.

3. Apportionments

a. When DoD-military appropriations or other funds are required to be apportioned under law by the Office and Management and Budget (OMB) to a DoD Component, a request for the apportionment or reapportionment shall be prepared and submitted through the Under Secretary of Defense (Comptroller) to the Director of OMB. A request for an apportionment shall be in such form and at such time as the Under Secretary of Defense (Comptroller) may prescribe to conform with the requirements of the Director of OMB (see Volume 2 of this Regulation).

b. Obligations during any apportionment period shall not exceed the amount of the apportionment available for that period or of any administrative subdivisions of the apportionment.

4. Allocations

a. The Under Secretary of Defense (Comptroller) or designee, shall make allocations of apportioned amounts, in writing, to the heads of DoD Components. The Secretary of a

Military Department, or designee, shall make further allocations of apportioned amounts, in writing, to the heads of operating agencies.

(1) The original signed document or an authenticated copy bearing a signature or an electronic equivalent of a signature shall be forwarded to the recipient of the allocation. This does not preclude the use of an automated system to communicate and record fund subdivisions as long as a confirmation copy bearing an authenticated signature or an electronic equivalent of a signature is available to the recipient via the automated system.

(2) Amounts allocated may be suballocated to major subordinate operating commands.

b. Allocations shall not exceed the amount available for use for each apportionment period.

c. The use of an electronically reproduced equivalent of an original signature is considered an acceptable implementation of the requirement for a document containing an authenticated signature. However, in accomplishing electronic transmission of fund authorizations through linked computer systems, internal controls for electronically transmitted allocations and suballocations shall have the following minimum characteristics:

(1) Fund control systems shall provide validation of fund authorities by use of access codes and lockout techniques.

(2) One set of access codes shall be used to issue fund authorizations.

(3) Other controlled access codes shall be used to process a signature section of fund control documents for transmissions to funded activities.

(4) The authentication, signature element, and symbol shall be included as part of electronically-produced funding documents.

d. Anticipated transfers or other items of anticipated receipts may be allocated only when realized.

e. Allocations, suballocations, or portions of an allocation, that are not required to be subdivided further may be treated and recorded as allotments.

f. DoD Components shall not authorize or incur an obligation, or make a disbursement against apportioned anticipated transfer authorizations until received. Such actions must be delayed until the completed Standard Form (SF) 1151, "Nonexpenditure Transfer Authorization," is received and the resources realized.

g. DoD Components shall not authorize or incur an obligation or make a disbursement against apportioned anticipated reimbursements. Such actions shall be delayed until the applicable customer order is received in the case of the Federal Government activities and funds are collected in the case of other customers.

5. Allotments

a. The recipients of allocations and suballocations, or their designees, shall make allotments in specific amounts to the heads of installations or organizational units of DoD Components, as required. The total of the amounts allotted shall not exceed the amount of the allocation available for each period.

b. The recipients of allotments may make suballotments to the heads of other organizational units, including those of other DoD Components, as required. The total of the amounts suballotted shall not exceed the amount of the allotment available for use for each period.

c. Allotments and suballotments shall be made in writing and the recipient's copy either shall be signed by the fund-issuing authority or be an authenticated copy bearing an authorized authenticated signature or an electronic equivalent of a signature. The document shall contain at least the following basic information:

(1) Name or title of the allottee.

(2) Amount of the allotment and the period of availability.

(3) Legal restrictions or limitations on the obligation and disbursement of the allotted funds.

(4) The amount of anticipated reimbursements, specified to the organizational level responsible for receiving the reimbursable orders.

d. In emergency circumstances, it may not be possible to provide a formal allotment or suballotment document before incurring obligations. Under such emergency conditions, it may be necessary to use expedited means of communication pending formal confirmation.

(1) A telephone may be used to make oral arrangements to indicate that funds will be provided. However, the official allocation or allotment of funds does not occur until the documentation of the issuance of funds has been transmitted by the issuer and received by the recipient by means of a facsimile machine (fax) record.

(2) In such cases, both the issuer and recipient shall document the funding transaction showing action taken, the date, amount involved, authorizing official, and method of communication. The issuer shall immediately fax a copy of the documentation to the recipient and request acknowledgment of receipt by fax. The recipient shall sign the documentation and return a copy to the issuer by fax. The issuer shall sign the same documentation and return by fax a copy containing both signatures. The official funds issuance does not occur until this final double-signed transmission document has been received by the recipient of the funds.

(3) The recipient is not authorized to issue funds to others or authorize or incur obligations with the funds received until after receipt of the double-signed transmission record.

e. The head of an operating agency, who has specific written approval of the Head of a DoD Component, may establish centrally-managed allotments. These allotments shall be established only when it is impractical to administer decentralized allotments under normal operating procedures. More specific guidance on requirements for establishing centrally-managed allotments are provided in Volume 3 of this Regulation. Before approval, a specific written determination shall be made that adequate controls have been established to avoid overobligating or overexpending such an allotment.

(1) The amount of the centrally-managed allotment shall be within the amount and terms of the allocation.

(2) Requests for the establishment of a centrally-managed allotment must justify fully the need, delineate possible alternatives, and demonstrate clearly why the centrally-managed allotment method is the only practical administrative procedure.

(3) The official who establishes or continues the use of a centrally-managed allotment shall be held responsible, to the extent prescribed by law, directive, and regulation, for ensuring that obligations are not incurred, or expenditures made, beyond the amount available under each centrally-managed allotment.

(4) The establishing or continuing official is responsible for the administration of each centrally-managed allotment and shall prescribe an adequate system of financial and nonfinancial control. The system shall:

(a) Designate the name or position of specific individuals authorized to incur obligations or make expenditures against each centrally-managed allotment.

(b) Establish suitable limitations on the numbers, quantities or volume for which obligations may be incurred or expenditures made.

(c) Provide for accounting and reporting at least monthly.

(d) Ensure timely notice to prevent the centrally-managed allotment from being overobligated or overexpended by taking necessary management action, which may include:

1. Increasing the amount of the centrally-managed allotment.

2. Terminating the centrally-managed allotment.

3. Terminating new obligations or disbursements.

4. Taking other necessary management actions to prevent an overobligation or overexpenditure.

(5) Each centrally-managed allotment shall be reviewed annually to determine whether its operation should be continued. This determination shall be made by the head of the DoD Component concerned, or designee. The annual review shall include an evaluation by an internal audit group of the adequacy of control procedures established to prevent violations of subsections 1341(a)(1) or 1517(a) or both, of Title 31, United States Code, and a recommendation whether continuation of the centrally-managed allotment is justified.

6. Reimbursable Orders

a. DoD organizations may be authorized by law to accept reimbursable orders for services provided or goods sold to other Federal Government-funded customers and authorized private parties.

b. Apportioned reimbursements shall not be allotted unless there is reasonable assurance that orders will be received. Even though apportioned and allotted, these estimates shall not be considered budgetary resources available for obligation unless the following two conditions are met:

(1) Valid orders, including written agreements, have been received from and obligated by Federal Government-funded customers.

(2) Advance payment has been collected, in the case of orders from the public.

c. In the case of Federal Government customer orders, the value of the reimbursable order and the associated budgetary resources is subject to the amount of the goods and services as provided to the customer and ultimately collected from the customer. In the case of the supply management area of the Defense Business Operation Fund, anticipated contract authority is provided by the OMB that allows for issuance of obligations and disbursements prior to receipt of customer orders.

d. Under certain circumstances, and only with the prior written approval of the OMB, immediate and automatic apportionment of the amounts of reimbursable orders received and accepted may be authorized. (See Volume 2 of this Regulation.)

e. Reimbursable orders received from state or local governments, recognized international bodies such as the United Nations and North Atlantic Treaty Organization, foreign governments, corporations, or individuals are subject to special controls.

(1) These orders, except Foreign Military Sales (FMS) orders, shall be recognized as reimbursable orders received only to the extent that cash has been received and deposited with the Treasury. Contract authority may be recognized for FMS orders based upon a dependable undertaking when cash advances are not provided for the full amount of the order from a foreign

government or international body. Bills are then presented for payment from the account established in the FMS Trust Fund for the applicable country.

(2) FMS Disbursement controls shall be established to ensure that disbursements are not made until the cash is actually received from the foreign country and deposited in the Treasury by the FMS Trust Fund. Expenditure authorizations are used to ensure that funds are available in the account for the country involved before disbursements are made.

e. Reimbursable orders that are financed by appropriated or revolving funds of Federal agencies provide expenditure as well as obligational authority.

f. Officials responsible for incurring obligations and making expenditures shall be particularly cognizant of reimbursable authority received. Controls shall be established to avoid obligating or expending in excess of the amount of appropriated funds available, plus the amount of reimbursements that ultimately will be earned and collected.

7. Reconciliations. DoD managers at all levels shall ensure that accounting records for receipt and use of budgetary resources are reconciled. Obvious accounting errors shall be corrected immediately and negative account balances shall be researched and reconciled promptly with appropriate source documents.

a. Transactions or adjustments shall be recorded in accounting records only when supported by appropriate source documents or electronic equivalents. Managers shall not permit identified errors to go uncorrected for extended periods of time, inaccurate transactions to be recorded or failures to record transactions in a timely manner. Due diligence is necessary in order to avoid the mistaken appearance of a potential Antideficiency Act violation which occurred because of careless record keeping.

b. An investigation shall be initiated by the applicable DoD Component and reported to the Office of the Under Secretary of Defense (Comptroller) as required by this Volume if a manager suspects that a potential violation of the Antideficiency Act may have occurred. However, investigations of potential violations of the Antideficiency Act should not be required merely to force correction of erroneous records.

B. **FINANCIAL MANAGEMENT SYSTEMS.** In addition to effective and efficient administrative funds control systems established by the DoD Components, the Defense Finance and Accounting Service (DFAS) shall be responsible for establishing accounting and finance systems. The accounting and finance systems shall be established for reporting commitments and obligations created by DFAS's customers and expenditures made against those customers' obligations by the DFAS. Title 31, United States Code, section 3512, contains the following requirements for those systems:

1. Federal Agencies shall maintain systems of accounting and internal controls that ensure (a) complete disclosure; (b) adequate financial information; (c) effective control over, and accountability for, assets; (d) obligations and costs comply with applicable laws; and (e) revenues and expenditures applicable to the Department's operations are properly accounted for, so that accounts and reliable financial and statistical reports are prepared and accountability of assets are maintained.

2. Specifically, financial management systems shall be:

a. Designed to assist responsible officials in restricting the authorization or incurrence of obligations to the amount of, and for the authorized purposes for which the obligational authority is available.

b. Capable of providing timely disclosure of the authorization or creation of an obligation, or the making of disbursements in excess of amounts available in both unexpired and expired accounts.

APPENDIX B--EXCERPTS FROM TITLE 31, UNITED STATES CODE

“MONEY AND FINANCE”

SUBTITLE II - THE BUDGET PROCESS

CHAPTER 11 - THE BUDGET AND FISCAL, BUDGET, AND PROGRAM INFORMATION

31 UNITED STATES CODE 1104 BUDGET AND APPROPRIATIONS AUTHORITY OF THE PRESIDENT

§ 1104. Budget and appropriations authority of the President

“(a) The President shall prepare budgets of the United States Government under section 1105 of this title and proposed deficiency and supplemental appropriations under section 1107 of this title. To the extent practicable, the President shall use uniform terms in stating the purposes and conditions of appropriations.

(b) Except as provided in this chapter, the President shall prescribe the contents and order of statements in the budget on expenditures and estimated expenditures and statements on proposed appropriations and information submitted with the budget and proposed appropriations. The President shall include with the budget and proposed appropriations information on personnel and other objects of expenditure in the way that information was included in the budget for fiscal year 1950. However, the requirement that information be included in the budget in that way may be waived or changed by joint action of the Committees on Appropriations of both Houses of Congress. This Subsection does not limit the authority of a committee of Congress to request information in a form it prescribes.

(c) When the President makes a basic change in the form of the budget, the President shall submit with the budget information showing where items in the budget for the prior fiscal year are contained in the present budget. However, the President may change the functional categories in the budget only in consultation with the Committees on Appropriations and on the Budget of both Houses of Congress. Committees of the House of Representatives and Senate shall receive prompt notification of all such changes.

(d) The President shall develop programs and prescribe regulations to improve the compilation, analysis, publication, and dissemination of statistical information by executive agencies. The President shall carry out this subsection through the Administrator for the Office of Information and Regulatory Affairs in the Office of Management and Budget.

(e) Under regulations prescribed by the President, each agency shall provide information required by the President in carrying out this chapter. The President has access to, and may inspect, records of an agency to obtain information.”

31 UNITED STATES CODE 1105 BUDGET CONTENTS AND SUBMISSION TO CONGRESS

§ 1105. Budget contents and submission to Congress

“(a) On or after the first Monday in January but not later than the first Monday in February of each year, the President shall submit a budget of the United States Government for the following fiscal year. Each budget shall include a budget message and summary and supporting information. The President shall include in each budget the following:

- (1) information on activities and functions of Government.
- (2) when practicable, information on costs and achievements of Government programs.
- (3) other desirable classifications of information.
- (4) a reconciliation of the summary information on expenditures with proposed appropriations.
- (5) except as provided in subsection (b) of this section, estimated expenditures and proposed appropriations the President decides are necessary to support the Government in the fiscal year for which the budget is submitted and the 4 fiscal years after that year.
- (6) estimated receipts of the Government in the fiscal year for which the budget is submitted and the 4 fiscal years after that year under--
 - (A) laws in effect when the budget is submitted; and
 - (B) proposals in the budget to increase revenues.
- (7) appropriations, expenditures, and receipts of the Government in the prior fiscal year.
- (8) estimated expenditures and receipts, and appropriations and proposed appropriations, of the Government for the current fiscal year.
- (9) balanced statements of the--
 - (A) condition of the Treasury at the end of the prior fiscal year;
 - (B) estimated condition of the Treasury at the end of the current fiscal year; and
 - (C) estimated condition of the Treasury at the end of the fiscal year for which the budget is submitted if financial proposals in the budget are adopted.
- (10) essential information about the debt of the Government.

(11) other financial information the President decides is desirable to explain in the practicable detail the financial condition of the Government.

(12) for each proposal in the budget for legislation that would establish or expand a Government activity or function, a table showing--

(A) the amount proposed in the budget for appropriation and for expenditure because of the proposal in the fiscal year for which the budget is submitted; and

(B) the estimated appropriation required because of the proposal for each of the 4 fiscal years after that year that the proposal will be in effect.

(13) an allowance for additional estimated expenditures and proposed appropriations for the fiscal year for which the budget is submitted.

(14) an allowance for unanticipated uncontrollable expenditures for that year.

(15) a separate statement on each of the items referred to in section 301(a)(1)-(5) of the Congressional Budget Act of 1974 (2 U.S.C. 632(a)(1)-(5)).

(16) the level of tax expenditures under existing law in the tax expenditures budget (as defined in section 3(a)(3) of the Congressional Budget Act of 1974 (2 U.S.C. 622(a)(3))) for the fiscal year for which the budget is submitted, considering projected economic factors and changes in the existing levels based on proposals in the budget.

(17) information on estimates of appropriations for the fiscal year following the fiscal year for which the budget is submitted for grants, contracts, and other payments under each program for which there is an authorization of appropriations for that following fiscal year when the appropriations are authorized to be included in an appropriation law for the fiscal year before the fiscal year in which the appropriation is to be available for obligation.

(18) a comparison of the total amount of budget outlays for the prior fiscal year, estimated in the budget submitted for that year, for each major program having relatively uncontrollable outlays with the total amount of outlays for that program in that year.

(19) a comparison of the total amount of receipts for the prior fiscal year, estimated in the budget submitted for that year, with receipts received in that year, and for each major source of receipts, a comparison of the amount of receipts estimated in that budget with the amount of receipts from that source in that year.

(20) an analysis and explanation of the differences between each amount compared under clauses (18) and (19) of this subsection.

(21) a horizontal budget showing--

(A) the programs for meteorology and of the National Climate Program established under section 5 of the National Climate Program Act (15 U.S.C. 2904);

(B) specific aspects of the program of, and appropriations for, each agency; and

(C) estimated goals and financial requirements.

(22) a statement of budget authority, proposed budget authority, budget outlays, and proposed budget outlays, and descriptive information in terms of --

(A) a detailed structure of national needs that refers to the missions and programs of agencies (as defined in section 101 of this title); and

(B) the missions and basic programs.

(23) separate appropriation accounts for appropriations under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) and the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801 et seq.).

(24) recommendations on the return of Government capital to the Treasury by a mixed ownership corporation (as defined in section 9101(2) of this title) that the President decides are desirable.

(25) a separate appropriation account for appropriations for each Office of Inspector General of an establishment defined under section 11(2) of the Inspector General Act of 1978.

(26) an analysis, prepared by the Office of Management and Budget after consultation with the chairman of the Council of Economic Advisors, of the budget's impact on the international competitiveness of United States business and the United States balance of payments position and shall include the following projections, based upon the best information available at the time, for the fiscal year for which the budget is submitted--

(A) the amount of borrowing by the Government in private credit markets;

(B) net domestic savings (defined as personal savings, corporate savings, and the fiscal surplus of state and local governments);

(C) net private domestic investment;

(D) the merchandise trade and current accounts;

(E) the net increase or decrease in foreign indebtedness (defined as net foreign investment); and

(F) the estimated direction and extent of the influence of the Government's borrowing in private credit markets on United States dollar interest rates and on real effective exchange rate of the United States dollar.

(27) a separate statement of the amount of appropriations requested for the Office of National Drug Control Policy and each program of the National Drug Control Program.

(28) a separate statement of the amount of appropriations requested for the Office of Federal Financial Management.

(b) estimated expenditures and proposed appropriations for the legislative branch and the judicial branch to be included in each budget under subsection (a)(5) of this section shall be submitted to the President before October 16 of each year and included in the budget by the President without change.

(c) The President shall recommend in the budget appropriate action to meet an estimated deficiency when the estimated receipts for the fiscal year for which the budget is submitted (under laws in effect when the budget is submitted) and the estimated amounts in the Treasury at the end of the current fiscal year available for expenditure in the fiscal year for which the budget is submitted, are less than the estimated expenditures for that year. The President shall make recommendations required by the public interest when the estimated receipts and estimated amounts in the Treasury are more than the estimated expenditures.

(d) When the President submits a budget or supporting information about a budget, the President shall include a statement on all changes about the current fiscal year that were made before the budget or information was submitted.

(e)(1) The President shall submit with materials related to each budget transmitted under subsection (a) on or after January 1, 1985, an analysis for the ensuing fiscal year that shall identify requested appropriations or new obligational authority and outlays for each major program that may be classified as a public civilian capital investment program, and for each major program that may be classified as a military capital investment program, and shall contain summaries of the total amount of such appropriations or new obligational authority and outlays for public civilian capital investment programs and summaries of the total amount of such appropriations or new obligational authority and outlays for military capital investment programs. In addition, the analysis under this paragraph shall contain --

(A) an estimate of the current service levels of public civilian capital investment and of military capital investment and alternative high and low levels of such investments over a period of ten years in current dollars and over a period of five years in constant dollars;

(B) the most recent assessment analysis and summary, in a standard format, of public civilian capital investment needs in each major program area over a period of ten years;

(C) an identification and analysis of the principle policy issues that affect estimated public civilian capital investment needs for each major program; and

(D) an identification and analysis of factors that affect estimated public civilian capital investment needs for each major program, including but not limited to the following factors:

(i) economic assumptions;

(ii) engineering standards;

(iii) estimates of spending for operation and maintenance;

(iv) estimates of expenditures for similar investments by State and local governments; and

(v) estimates of demand for public services derived from such capital investments and estimates of the service capacity of such investments.

To the extent that any analysis required by this paragraph relates to any program for which Federal financial assistance is distributed under a formula prescribed by law, such analysis shall be organized by State and within each State by major metropolitan area if data are available.

(2) For purposes of this subsection, any appropriation, new obligational authority, or outlay shall be classified as a public civilian capital investment to the extent that such appropriation, authority, or outlay will be used for the construction, acquisition, or rehabilitation of any physical asset that is capable of being used to produce services or other benefits for a number of years and is not classified as a military capital investment under paragraph (3). Such assets shall include (but not be limited to)--

(A) roadways or bridges,

(B) airports or airway facilities,

(C) mass transportation systems,

(D) waste water treatment or related facilities,

(E) water resources projects,

(F) hospitals,

(G) resource recovery facilities,

(H) public buildings,

- (I) space or communications facilities,
- (J) railroads, and
- (K) federally assisted housing.

(3) For purposes of this subsection, any appropriation, new obligational authority, or outlay shall be classified as a military capital investment to the extent that such appropriation, authority, or outlay will be used for the construction, acquisition, or rehabilitation of any physical asset that is capable of being used to produce services or other benefits for purposes of national defense and security for a number of years. Such assets shall include military bases, posts, installations, and facilities.

(4) Criteria and guidelines for use in the identification of public civilian and military capital investments, for distinguishing between public civilian and military capital investments, and for distinguishing between major and non-major capital investment programs shall be issued by the Director of the Office of Management and Budget after consultation with the Comptroller General and the Congressional Budget Office. The analysis submitted under this subsection shall be accompanied by an explanation of such criteria and guidelines.

(5) For purposes of this subsection--

(A) the term “construction” includes the design, planning, and erection of new structures and facilities, the expansion of existing structures and facilities, the reconstruction of a project at an existing site or adjacent to an existing site, and the installation of initial and replacement equipment for such structures and facilities;

(B) the term “acquisition” includes the addition of land, sites, equipment, structures, facilities, or rolling stock by purchase, lease-purchase, trade, or donation; and

(C) the term “rehabilitation” includes the alteration of or correction of deficiencies in an existing structure or facility so as to extend the useful life or improve the effectiveness of the structure or facility, the modernization or replacement of equipment at an existing structure or facility, and the modernization of, or replacement of parts for, rolling stock.

(f) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared in manner consistent with the requirements of the Balanced Budget and Emergency Deficit Control Act of 1985 that apply to that and subsequent fiscal years.”

31 UNITED STATES CODE 1106 SUPPLEMENTAL BUDGET ESTIMATES AND CHANGES

§ 1106. Supplemental budget estimates and changes

“(a) Before July 16 of each year, the President shall submit to Congress a supplemental summary of the budget for the fiscal year for which the budget is submitted under section 1105(a) of this title. The summary shall include--

(1) for that fiscal year--

(A) substantial changes in or reappraisals of estimates of expenditures and receipts;

(B) substantial obligations imposed on the budget after its submission;

(C) current information on matters referred to in section 1105(a)(8) and (9)(B) and (C) of this title, and

(D) additional information the President decides is advisable to provide Congress with complete and current information about the budget and current estimates of the functions, obligations, requirements, and financial condition of the United States Government.

(2) for the 4 fiscal years following the fiscal year for which the budget is submitted, information on estimated expenditures for programs authorized to continue in future years, or considered mandatory, under law; and

(3) for future fiscal years, information on estimated expenditures of balances carried over from the fiscal year for which the budget is submitted.

(b) Before July 16 of each year, the President shall submit to Congress a statement of changes in budget authority requested, estimated budget outlays, and estimated receipts for the fiscal year for which the budget is submitted (including prior changes proposed for the executive branch of the Government) that the President decides are necessary and appropriate based on current information. The statement shall include the effect of those changes on the information submitted under section 1105(a)(1)-(14) and (b) of this title and shall include supporting information as practicable. The statement submitted before July 16 may be included in the information submitted under subsection (a)(1) of this section.

(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.”

31 UNITED STATES CODE 1107 DEFICIENCY AND SUPPLEMENTAL APPROPRIATIONS

§ 1107. Deficiency and supplemental appropriations

“The President may submit to Congress proposed deficiency and supplemental appropriations the President decides are necessary because of laws enacted after submission of the budget or that are

in the public interest. The President shall include the reasons for the submission of the proposed appropriations and the reasons the proposed appropriations were not included in the budget. When the total proposed appropriations would have required the President to make a recommendation under section 1105(c) of this title if they had been included in the budget, the President shall make a recommendation under that section.”

31 UNITED STATES CODE 1108 PREPARATION AND SUBMISSION OF APPROPRIATIONS REQUESTS TO THE PRESIDENT

§ 1108. Preparation and submission of appropriations requests to the President

"(a) In this section (except subsections (b)(1) and (e)), “agency” means a department, agency, or instrumentality of the United States Government.

(b)(1) The head of each agency shall prepare and submit to the President each appropriation request for the agency. The request shall be prepared and submitted in the form prescribed by the President under this chapter and by the date established by the President. When the head of the agency does not submit a request by that date, the President shall prepare the request for the agency to be included in the budget or changes in the budget or as deficiency and supplemental appropriations. The President may change agency appropriation requests. Agency appropriation requests shall be developed from cost-based budgets in the way and at times prescribed by the President. The head of the agency shall use the cost-based budget to administer the agency and to divide appropriations or amounts.

(2) An officer or employee of an agency in the executive branch may submit to the President or Congress a request for legislation authorizing deficiency or supplemental appropriations for the agency only with the approval of the head of the agency.

(c) The head of the agency shall include with an appropriation request submitted to the President a report that the statement of obligations submitted with the request contains obligations consistent with section 1501 of this title. The head of the agency shall support the report with a certification of the consistency and shall support the certification with records showing that the amounts have been obligated. The head of the agency shall designate officials to make the certifications, and those officials may not delegate the duty to make the certifications. The certifications and records shall be kept in the agency--

(1) in a form that makes audits and reconciliations easy; and

(2) for a period necessary to carry out audits and reconciliations.

(d) To the extent practicable, the head of the agency shall--

(1) Provide information supporting the agency's budget request for its missions by function and subfunction (including the mission of each organizational unit of the agency); and

(2) relate the agency's programs to its missions.

(e) Except as provided in subsection (f) of this section, an officer or employee of an agency (as defined in section 1101 of this title) may submit to Congress or a committee of Congress an appropriation estimate or request, a request for an increase in that estimate or request, or a recommendation on meeting the financial needs of the Government only when requested by either House of Congress.

(f) (Not applicable to DoD)

(g) amounts available under law are available for field examination of appropriation estimates. The use of the amounts is subject only to regulations prescribed by the appropriate standing committees of Congress.”

31 UNITED STATES CODE 1112 FISCAL, BUDGET, AND PROGRAM INFORMATION

§ 1112. Fiscal, budget, and program information

“(a) In this section, “agency” means a department, agency, or instrumentality of the United States Government except a mixed-ownership Government corporation.

(b) In cooperation with the Comptroller General, the Secretary of the Treasury and the Director of the Office of Management and Budget (OMB) shall establish and maintain standard data processing and information systems for fiscal, budget, and program information for use by agencies to meet the needs of the Government, and to the extent practicable, of State and local governments.

(c) The Comptroller General

(1) in cooperation with the Secretary, the Director of OMB, and the Director of the Congressional Budget Office (CBO), shall establish, maintain, and publish standard terms and classifications for fiscal, budget, and program information of the Government, including information on fiscal policy, receipts, expenditures, programs, projects, activities, and functions;

(2) when advisable, shall report to Congress on those terms and classifications, and recommend legislation necessary to promote the establishment, maintenance, and use of standard terms and classifications by the executive branch of the Government; and

(3) in carrying out this subsection, shall give particular consideration to the needs of the Committees of Appropriations and on the Budget of both Houses of Congress, the Committee on Ways and Means of the House, the Committee on Finance of the Senate, and the CBO.

(d) Agencies shall use the standard terms and classifications published under subsection (c)(1) of this section in providing fiscal budget, and program information to Congress.

(e) In consultation with the President, the head of each executive agency shall take actions necessary to achieve to the extent possible--

(1) consistency in budget and accounting classifications;

(2) synchronization between those classifications and organizational structure; and

(3) information by organizational unit on performance and program costs to support budget justifications.

(f) In cooperation with the Director of the CBO, the Comptroller General, and appropriate representatives of State and local governments, the Director of OMB (to the extent practicable) shall provide State and local governments with fiscal, budget, and program information necessary for accurate and timely determination by those governments of the impact on their budgets of assistance of the United States Government.”

EXCERPTS FROM CHAPTER 13, TITLE 31, UNITED STATES CODE

“MONEY AND FINANCE”

SUBTITLE II - THE BUDGET PROCESS

CHAPTER 13 - APPROPRIATIONS

SUBCHAPTER I - GENERAL

31 UNITED STATES CODE 1301 APPLICATION

§ 1301. Application

“(a) Appropriations shall be applied only to the objects for which the appropriations were made except as otherwise provided by law.

(b) The reappropriation and diversion of the unexpended balance of an appropriation for a purpose other than that for which the appropriation was originally made shall be construed and accounted for as a new appropriation. The unexpended balance shall be reduced by the amount to be diverted.

(c) An appropriation in a regular, annual appropriation law may be construed to be permanent or available continuously only if the appropriation--

(1) is for rivers and harbors, lighthouses, public buildings, or the pay of the Navy and Marine Corps; or

(2) expressly provides that it is available after the fiscal year covered by the law in which it appears.

(d) A law may be construed to make an appropriation out of the Treasury or to authorize making a contract for the payment of money in excess of an appropriation only if the law specifically states that an appropriation is made or that such a contract may be made.”

SUBCHAPTER II - TRUST FUNDS AND REFUNDS

31 UNITED STATES CODE 1321 TRUST FUNDS

§ 1321. Trust funds

“(a) The following are classified as trust funds:

- (1) Philippine special fund (custom duties).
- (2) Philippine special fund (internal revenue).
- (3) Unclaimed condemnation awards, Dept. of Treasury.
- (4) Naval reservation, Olangapo civil fund.
- (5) Armed Forces Retirement Home Trust Fund.
- (6) Return to deported aliens of passage money collected from steamship companies.
- (7) Vocational Rehabilitation, special fund.
- (8-11) Library of Congress - trust funds.
- (12) Relief and Rehabilitation, Longshoremen's and Harbor Workers' Compensation Act.
- (13) Cooperative work, Forest Service.
- (14) Wages and effects American Seamen, Dept. of Commerce.
- (15-16) St. Elizabeth's Hospital.
- (17-19) National Park Service, donations.

- (20) Indian monies.
- (21) Funds of Federal prisoners.
- (22) Commissary Funds, Federal prisons.
- (23) Pay of Navy, deposit funds.
- (24) Pay of Marine Corps, deposit funds.
- (25) Pay of Army, deposit funds.
- (26) Lincoln birthplace.
- (27) Flood control, Mississippi River.
- (28) Flood control, Sacramento River.
- (29) Effects deceased employees, Dept. of Treasury.
- (30) Effects of patients, Public Health Service.
- (31) Effects of deceased employees, Dept. of Commerce.
- (32) Topographic survey, contributions.
- (33-34) National Institutes of Health, gift funds.
- (35) Patients' deposits, U.S. Marine Hospital, Carville.
- (36) Estates deceased personnel, Department of Army.
- (37) Effects of deceased personnel, Department of Interior.
- (38) Fredericksburg and Spotsylvania Battlefields memorial fund.
- (39) Petersburg Military Park.
- (40) Gorgas laboratory quotas.
- (41) Contributions, boundary commission U.S. and Mexico.
- (42) Salvage proceeds, American vessels.
- (43) Wages due American seamen.

- (44) Federal Industrial Institution for Women, chapel.
- (45) General Post funds, National Homes, Dept of V.A.
- (46) Repatriation of American seamen.
- (47-48) Expenses, public survey.
- (49) Contributions, Alaska roads.
- (50) Protective works Lake of Woods/Rainy River, Minn.
- (51) Washington redemption fund.
- (52-58) District of Columbia funds.
- (59) Repealed.
- (60) Music auditorium, Library of Congress.
- (61) Bequest Gertrude Hubbard.
- (62) Puerto Rico special fund (Internal Revenue).
- (63) Miscellaneous trust funds, Department of State.
- (64) Improvement funds contributed (name of river or harbor).
- (65) Improvement funds, advanced (name of river or harbor).
- (66) Funds contributed for Indian projects.
- (67) Trust funds Indian tribes.
- (68) Ships stores profits, Navy.
- (69) Completing Surveys within Railroad land grants.
- (70) Memorial to Women of World War, contributions.
- (71) Memorial to John Ericsson.
- (72) Red Cross Building, contributions.

- (73) Estate of decedents, Dept. of State Trust Fund.
 - (74) Funds due Incompetent Beneficiaries, Dept of V. A.
 - (75) Promote Education of Blind.
 - (76) Fort Sill road paving.
 - (77) Bequest, museum and library - Army Surgeon General.
 - (78) Contributed, flood control (river, harbor or project).
 - (79) Matured obligations, District of Columbia.
 - (80) Promote Education of Blind, interest.
 - (81) Repealed.
 - (82) Post-Vietnam era Veterans Education Acct., Dept of V. A.
 - (83) U. S. Government Life Insurance Fund, Dept of V. A.
 - (84) Estates of deceased soldiers, U.S. Army.
 - (85-86) District of Columbia funds.
 - (87) Expenses Smithsonian Trust.
 - (88) Civil Service Retirement and Disability Fund.
 - (89) Canal Zone Retirement and Disability Fund.
 - (90) Foreign Service Retirement and Disability Fund.
- (b) Amounts (except amounts received by the Comptroller of the Currency and the Federal Deposit Insurance Corporation) that are analogous to the funds named in subsection (a) of this section and are received by the United States Government as trustee shall be deposited in an appropriate trust fund account in the Treasury. Amounts accruing to these funds (except to the trust fund "Soldiers' Home, Permanent Fund") are appropriated to be disbursed in compliance with the terms of the trust. Expenditures from the trust fund "Soldiers' Home, Permanent Fund" shall be made only under annual appropriations. Those appropriations are authorized to be made."

SUBCHAPTER III - LIMITATIONS, EXCEPTIONS, AND PENALTIES

31 UNITED STATES CODE 1341 LIMITATIONS ON EXPENDING AND OBLIGATING AMOUNTS

§ 1341. Limitations on expending and obligating amounts

“(a)(1)An officer or employee of the United States Government or of the District of Columbia government may not--

(A) make or authorize an expenditure or obligation exceeding an amount available in an appropriation or fund for the expenditure or obligation;

(B) involve either government in a contract or obligation for the payment of money before an appropriation is made unless authorized by law;

(C) make or authorize an expenditure or obligation of funds required to be sequestered under section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985; or

(D) involve either government in a contract or obligation for the payment of money required to be sequestered under section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985.

(2) This subsection does not apply to a corporation getting amounts to make loans (except paid in capital amounts) without legal liability of the United States Government.

(b) An article to be used by an executive department in the District of Columbia that could be bought out of an appropriation made to a regular contingent fund of the department may not be bought out of another amount available for obligation.”

31 UNITED STATES CODE 1342 LIMITATION ON VOLUNTARY SERVICES

§ 1342. Limitation on voluntary services

“An officer or employee of the United States Government or of the District of Columbia government may not accept voluntary services for either government or employ personal services exceeding that authorized by law except for emergencies involving the safety of human life or the protection of property. This section does not apply to a corporation getting amounts to make loans (except paid in capital amounts) without legal liability of the United States Government. As used in this section, the term "emergencies involving the safety of human life or the protection of property" does not include ongoing, regular functions of government the suspension of which would not imminently threaten the safety of human life or the protection of property.”

31 UNITED STATES CODE 1349 ADVERSE PERSONNEL ACTIONS

§ 1349. Adverse personnel actions

“(a) An officer or employee of the United States Government or of the District of Columbia government violating section 1341(a) or 1342 of this title shall be subject to appropriate administrative discipline including, when circumstances warrant, suspension from duty without pay or removal from office.”

b) An officer or employee who willfully uses or authorizes the use of a passenger motor vehicle or aircraft owned or leased by the United States Government (except for an official purpose authorized by section 1344 of this title) or otherwise violates section 1344 shall be suspended without pay by the head of the agency. The officer or employee shall be suspended for at least one month, and when circumstances warrant, for a longer period or summarily removed from office.”

31 UNITED STATES CODE 1350 CRIMINAL PENALTY

§ 1350 Criminal penalty

“An officer or employee of the United States Government or of the District of Columbia government knowingly and willfully violating section 1341(a) or 1342 of this title shall be fined not more than \$5000, imprisoned for not more than 2 years, or both.”

31 UNITED STATES CODE 1351 REPORTS OF VIOLATIONS

§ 1351. Reports on violations

“If an officer or an employee of an executive agency or an officer or employee of the District of Columbia government violates section 1341(a) or 1342 of this title, the head of the agency or the Mayor of the District of Columbia, as the case may be, shall report immediately to the President and Congress all relevant facts and a statement of actions taken.”

EXCERPTS FROM CHAPTER 15, TITLE 31, UNITED STATES CODE

CHAPTER 15 - APPROPRIATION ACCOUNTING

SUBCHAPTER I -- GENERAL

31 UNITED STATES CODE 1501 DOCUMENTARY EVIDENCE REQUIREMENT FOR GOVERNMENT OBLIGATIONS

§ 1501. Documentary evidence requirement for Government obligations

“(a) An amount shall be recorded as an obligation of the United States Government only when supported by documentary evidence of--

(1) a binding agreement between an agency and another person (including an agency) that is--

(A) in writing, in a way and form, and for a purpose authorized by law; and

(B) executed before the end of the period of availability for obligation of the appropriation or fund used for specific goods to be delivered, real property to be bought or leased, or work or service to be provided;

(2) a loan agreement showing the amount and terms of repayment;

(3) an order required by law to be placed with an agency;

(4) an order issued under a law authorizing purchases without advertising--

(A) when necessary because of a public exigency;

(B) for perishable subsistence supplies; or

(C) within specific monetary limits;

(5) a grant or subsidy payable--

(A) from appropriations made for payment of, or contributions to, amounts required to be paid in specific amounts fixed by law or under formulas prescribed by law;

(B) under an agreement authorized by law; or

(C) under plans approved consistent with and authorized by law;

(6) a liability that may result from pending litigation;

(7) employment or services of persons or expenses of travel under law;

(8) services provided by public utilities; or

(9) other legal liability of the Government against an available appropriation or fund.

(b) A statement of obligations provided to Congress or a committee of Congress by an agency shall include only those amounts that are obligations consistent with subsection (a) of this section.”

31 UNITED STATES CODE 1502 BALANCES AVAILABLE

§ 1502. Balances available

“(a) The balance of an appropriation or fund limited for obligation to a definite period is available only for payment of expenses properly incurred during the period of availability or to complete contracts properly made within that period of availability and obligated consistent with section 1501 of this title. However, the appropriation or fund is not available for expenditure for a period beyond the period otherwise authorized by law.”

(b) A provision of law requiring that the balance of an appropriation or fund to be returned to the general fund of the Treasury at the end of a definite period does not affect the status of lawsuits or rights of action involving the right to an amount payable from the balance.

SUBCHAPTER II - APPORTIONMENT

31 UNITED STATES CODE 1511 DEFINITION AND APPLICATION

§ 1511. Definition and application

“(a) In this subchapter, “appropriations” means--

- (1) appropriated amounts;
- (2) funds; and
- (3) authority to make obligations by contract before appropriations.

(b) This subchapter does not apply to--

- (1) amounts (except amounts for administrative expenses) available--
 - (A) for price support and surplus removal of agricultural commodities; and
 - (B) under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c);
- (2) a corporation getting amounts to make loans (except paid in capital amounts) without legal liability on the part of the United States Government; and

(3) the Senate, the House of Representatives, a committee of Congress, a member, officer, employee, or office of either House of Congress, or the Office of the Architect of the Capitol or an officer or employee of that Office.”

31 UNITED STATES CODE 1512 APPORTIONMENT AND RESERVES

§ 1512. Apportionment and reserves

“(a) Except as provided in this subchapter, an appropriation available for obligation for a definite period shall be apportioned to prevent obligation or expenditure at a rate that would indicate a necessity for a deficiency or supplemental appropriation for the period. An appropriation for an indefinite period and authority to make obligations by contract before appropriations shall be apportioned to achieve the most effective and economical use. An apportionment may be reapportioned under this section.

(b)(1) An appropriation subject to apportionment is apportioned by--

- (A) months, calendar quarters, operating seasons or other time periods;
- (B) activities, functions, projects, or objects; or
- (C) a combination of the ways referred to in clauses (A) and (B) of this paragraph.

(2) The official designated in section 1513 of this title to make apportionments shall apportion an appropriation under paragraph (1) of this subsection as the official considers appropriate. Except as specified by the official, an amount apportioned is available for obligation under the terms of the appropriation on a cumulative basis unless reapportioned.

(c)(1) In apportioning or reapportioning an appropriation, a reserve may be established only--

- (A) to provide for contingencies;
- (B) to achieve savings made possible by or through changes in requirements or greater efficiency of operations; or
- (C) as specifically provided by law.

(2) A reserve established under this subsection may be changed as necessary to carry out the scope and objectives of the appropriation concerned. When an official designated in section 1513 of this title to make apportionments decides that an amount reserved will not be required to carry out the objectives and scope of the appropriation concerned, the official shall recommend the rescission of the amount in the way provided in Chapter 11 of this title for appropriation requests. Reserves established under this section shall be reported to Congress as provided in the Impoundment Control Act of 1974 (2 U.S.C. 681 et seq.).

(d) An apportionment or reapportionment shall be reviewed at least 4 times a year by the official designated in section 1513 of this title to make apportionments.”

31 UNITED STATES CODE 1513 OFFICIALS CONTROLLING APPORTIONMENTS

§ 1513. Officials controlling apportionments

“(a) The official having administrative control of an appropriation available to the legislative branch, the judicial branch, the United States International Trade Commission, or the District of Columbia government that is required to be apportioned under section 1512 of this title shall apportion the appropriation in writing. An appropriation shall be apportioned not later than the later of the following:

(1) 30 days before the beginning of the fiscal year for which the appropriation is available;
or

(2) 30 days after the date of enactment of the law by which the appropriation is made available.

(b)(1) The President shall apportion in writing an appropriation available to an executive agency (except the Commission) that is required to be apportioned under section 1512 of this title. The head of each executive agency to which the appropriation is available shall submit to the President information required for the apportionment in the form and the way and at the time specified by the President. The information shall be submitted not later than the following:

(A) 40 days before the beginning of the fiscal year for which the appropriation is available; or

(B) 15 days after the date of enactment of the law by which the appropriation is made available.

(2) The President shall notify the head of the executive agency of the action taken in apportioning the appropriation under paragraph (1) of this subsection not later than the later of the following:

(A) 20 days before the beginning of the fiscal year for which the appropriation is available; or

(B) 30 days after the date of enactment of the law by which the appropriation is made available.

(c) By the first day of each fiscal year, the head of each executive department of the United States Government shall apportion among the major organizational units of the department the

maximum amount to be expended by each unit during the fiscal year out of each contingent fund appropriated for the entire year for the department. Each amount may be changed during the fiscal year only by written direction of the head of the department. The direction shall state the reasons for the change.

(d) An appropriation apportioned under this subchapter may be divided and subdivided administratively within the limits of the apportionment.

(e) This section does not affect the initiation and operation of agricultural price support programs.”

31 UNITED STATES CODE 1514 ADMINISTRATIVE DIVISION OF APPORTIONMENTS

§ 1514. Administrative division of apportionments

“(a) The official having administrative control of an appropriation available to the legislative branch, the judicial branch, the United States International Trade Commission, or the District of Columbia government, and, subject to the approval of the President, the head of each executive agency (except the Commission) shall prescribe by regulation a system of administrative control not inconsistent with accounting procedures prescribed under law. The system shall be designed to--

(1) restrict obligations or expenditures from each appropriation to the amount of apportionments or reapportionments of the appropriation; and

(2) enable the official or the head of the executive agency to fix responsibility for an obligation or expenditure exceeding an apportionment or reapportionment.

(b) To have a simplified system for administratively dividing appropriations, the head of each executive agency (except the Commission) shall work toward the objective of financing each operating unit, at the highest practical level, from not more than one administrative division for each appropriation affecting the unit.”

31 UNITED STATES CODE 1515 AUTHORIZED APPORTIONMENTS NECESSITATING DEFICIENCY OR SUPPLEMENTAL APPROPRIATIONS

§ 1515. Authorized apportionments necessitating deficiency or supplemental appropriations

“(a) An appropriation required to be apportioned under section 1512 of this title may be apportioned on a basis that indicates the need for a deficiency or supplemental appropriation to the extent necessary to permit payment of such pay increases as may be granted pursuant to law

to civilian officers and employees (including prevailing rate employees whose pay is fixed and adjusted under subchapter IV of Chapter 53 of title 5) and to retired and active military personnel.

(b)(1) Except as provided in subsection (a) of this section, an official may make, and the head of an executive agency may request, an apportionment under section 1512 of this title that would indicate a necessity for a deficiency or supplemental appropriation only when the official or agency head decides that the action is required because of--

(A) a law enacted after submission to Congress of the estimates for an appropriation that requires an expenditure beyond administrative control; or

(B) an emergency involving the safety of human life, the protection of property, or the immediate welfare of individuals when an appropriation that would allow the United States Government to pay, or contribute to, amounts required to be paid to individuals in specific amounts fixed by law or under formulas prescribed by law, is insufficient.

(2) If an official making an apportionment decides that an apportionment would indicate a necessity for a deficiency or supplemental appropriation, the official shall submit immediately a detailed report of the facts to Congress. The report shall be referred to in submitting a proposed deficiency or supplemental appropriation.”

31 UNITED STATES CODE 1516 EXEMPTIONS

§ 1516. Exemptions

“An official designated in section 1513 of this title to make apportionments may exempt from apportionment--

(1) a trust fund or working fund if an expenditure from the fund has no significant effect on the financial operations of the United States Government;

(2) a working capital fund or a revolving fund established for intragovernmental operations;

(3) receipts from industrial and power operations available under law; and

(4) appropriations made specifically for--

(A) interest on, or retirement of, the public debt;

(B) payment of claims, judgments, refunds, and drawbacks;

(C) items the President decides are of a confidential nature;

(D) payment under a law requiring payment of the total amount of the appropriation to a designated payee; and

(E) grants to the States under the Social Security Act (42 U.S.C. 301 et seq.).”

31 UNITED STATES CODE 1517 PROHIBITED OBLIGATIONS AND EXPENDITURES

§ 1517. Prohibited obligations and expenditures

“(a) An officer or employee of the United States Government or of the District of Columbia government may not make or authorize an expenditure or obligation exceeding--

(1) an apportionment; or

(2) the amount permitted by regulations prescribed under section 1514(a) of this title.

(b) If an officer or employee of an executive agency or of the District of Columbia government violates subsection (a) of this section, the head of the executive agency or the Mayor of the District of Columbia, as the case may be, shall report immediately to the President and Congress all relevant facts and a statement of actions taken.

31 UNITED STATES CODE 1518 ADVERSE PERSONNEL ACTIONS

§ 1518. Adverse personnel actions

“An officer or employee of the United States Government or of the District of Columbia government violating section 1517(a) of this title shall be subject to appropriate administrative discipline including, when circumstances warrant, suspension from duty without pay or removal from office.”

31 UNITED STATES CODE 1519 CRIMINAL PENALTY

§ 1519. Criminal penalty

“An officer or employee of the United States Government or of the District of Columbia government knowingly and willfully violating section 1517(a) of this title shall be fined not more than \$5,000, imprisoned for not more than 2 years, or both.”

SUBCHAPTER III - TRANSFERS AND REIMBURSEMENTS

31 UNITED STATES CODE 1531 TRANSFERS OF FUNCTIONS AND ACTIVITIES

§ 1531. Transfers of functions and activities

“(a) The balance of an appropriation available and necessary to finance or discharge a function or activity transferred or assigned under law within an executive agency or from one executive agency to another may be transferred to and used--

(1) by the organizational unit or agency to which the function or activity was transferred or assigned; and

(2) for the purpose for which the appropriation was originally available.

(b) The head of the executive agency determines the amount that, with the approval of the President, is necessary to be transferred when the transfer or assignment of the function or activity is within the agency. The President determines the amount necessary to be transferred when the transfer or assignment of the function or activity is from one executive agency to another.

(c) A balance transferred under this section is--

(1) credited to an applicable existing or new appropriation account;

(2) merged with the amount in an account to which the balance is credited; and

(3) with the amount with which the balance is merged, accounted for as one amount.

(d) New appropriation accounts may be established to carry out subsection (c)(1) of this section.”

SUBCHAPTER IV - CLOSING ACCOUNTS

31 UNITED STATES CODE 1552 PROCEDURE FOR APPROPRIATION ACCOUNTS
AVAILABLE FOR DEFINITE PERIODS

§ 1552. Procedure for appropriation accounts available for definite periods

“(a) On September 30th of the 5th fiscal year after the period of availability for obligation of a fixed appropriation account ends, the account shall be closed and any remaining balance (whether obligated or unobligated) in the account shall be canceled and thereafter shall not be available for obligation or expenditure for any purpose.

(b) Collections authorized or required to be credited to an appropriation account, but not received before closing of the account under subsection (a) or under section 1555 of this title shall be deposited in the Treasury as miscellaneous receipts.”

31 UNITED STATES CODE 1553 AVAILABILITY OF APPROPRIATION ACCOUNTS TO PAY OBLIGATIONS

§ 1553. Availability of appropriation accounts to pay obligations

“(a) After the end of the period of availability for obligation of a fixed appropriation account and before the closing of that account under section 1552(a) of this title, the account shall retain its fiscal-year identity and remain available for recording, adjusting, and liquidating obligations properly chargeable to that account.

(b)(1) Subject to the provisions of paragraph (2), after the closing of an account under section 1552(a) or 1555 of this title, obligations and adjustments to obligations that would have been properly chargeable to that account, both as to purpose and in amount, before closing and that are not otherwise chargeable to any current appropriation account of the agency may be charged to any current appropriation account of the agency available for the same purpose.

(2) The total amount of charges to an account under paragraph (1) may not exceed an amount equal to 1 percent of the total appropriations for that account.

(c)(1) In the case of a fixed appropriation account with respect to which the period of availability for obligation has ended, if an obligation of funds from that account to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount of obligations from that from that appropriation during a fiscal year for contract changes for that program, project, or activity to exceed \$4,000,000, the obligation may only be made if the obligation is approved by the head of the agency (or an officer of the agency within the Office of the head of the agency to whom the head of the agency has delegated the authority to approve such an obligation).

(2) In the case of a fixed appropriation account with respect to which the period of availability for obligation has ended, if an obligation of funds from that account to provide funds for a program, project, or activity to cover amounts required for contract changes would cause the total amount obligated from that appropriation during a fiscal year for that program, project, or activity to exceed \$25,000,000, the obligation may not be made until--

(A) the head of the agency submits to the appropriate authorizing committees of Congress and the Committees on Appropriations of the Senate and the House of Representatives a notice in writing of the intent to obligate such funds, together with a description of the legal basis for the proposed obligation and the policy reasons for the proposed obligation; and

(B) a period of 30 days has elapsed after the notice is submitted.

(3) In this subsection, the term "contract change" means a change to a contract under which the contractor is required to perform additional work. Such term does not include adjustments to pay claims or increases under an escalation clause.

(d)(1) Obligations under this section may be paid without prior action of the Comptroller General.

(2) This subchapter does not--

(A) relieve the Comptroller General of the duty to make decisions requested under law; or

(B) affect the authority of the Comptroller General to settle claims and accounts.

31 UNITED STATES CODE 1555 CLOSING OF APPROPRIATION ACCOUNTS AVAILABLE FOR INDEFINITE PERIODS

§ 1555. Closing of appropriation accounts available for indefinite periods

An appropriation account available for obligation for an indefinite period shall be closed, and any remaining balance (whether obligated or unobligated) in that account shall be canceled and thereafter shall not be available for obligation or expenditure for any purpose, if--

(1) the head of the agency concerned or the President determines that the purposes for which the appropriation was made have been carried out; and

(2) no disbursement has been made against the appropriation for two consecutive fiscal years.”

31 UNITED STATES CODE 1557 AUTHORITY FOR EXEMPTIONS IN APPROPRIATION LAWS

§ 1557. Authority for exemptions in appropriation laws

A provision of an appropriation law may exempt an appropriation from the provisions of this subchapter and fix the period for which the appropriation remains available for expenditure.

EXCERPTS FROM CHAPTER 33, TITLE 31, UNITED STATES CODE

CHAPTER 33 - DEPOSITING, KEEPING, AND PAYING MONEY

31 UNITED STATES CODE 3324 ADVANCES

§ 3324. Advances

“(a) Except as provided in this section, a payment under a contract to provide a service or deliver an article for the United States Government may not be more than the value of the service already provided or the article already delivered.

(b) An advance of public money may be made only if it is authorized by--

(1) a specific appropriation or other law; or

(2) the President to be made to -

(A) a disbursing official if the President decides the advance is necessary to carry out -

(i) the duties of the official promptly and faithfully; and

(ii) an obligation of the Government; or

(B) an individual serving in the armed forces at a distant station if the President decides the advance is necessary to disburse regularly pay and allowances.

(c) Before the Secretary of the Treasury acts on a requisition for an advance, the Comptroller General shall act on the requisition under section 3522 of this title. The Comptroller General does not countersign a requisition for an advance.

(d) The head of an agency may pay in advance from appropriations available for the purpose--

(1) to the Secretary of the Army, charges for messages sent by the Secretary of the Army for the head of the agency, including charges for--

(A) payment of tolls of commercial carriers;

(B) leasing facilities for sending messages; and

(C) installing and maintaining facilities for sending messages; and

(2) charges for a publication printed or recorded in any way for auditory or visual use of the agency.

CHAPTER 35 -- ACCOUNTING AND COLLECTION

SUBCHAPTER II -- ACCOUNTING REQUIREMENTS, SYSTEMS, AND INFORMATION

31 UNITED STATES CODE 3511 PRESCRIBING ACCOUNTING REQUIREMENTS AND DEVELOPING ACCOUNTING SYSTEMS

§ 3511. Prescribing accounting requirements and developing accounting systems

“(a) The Comptroller General shall prescribe the accounting principles, standards, and requirements that the head of each executive agency shall observe. Before prescribing the principles, standards, and requirements, the Comptroller General shall consult with the Secretary of the Treasury and the President on their accounting, financial reporting, and budgetary needs, and shall consider the needs of the heads of the other executive agencies.

(b) Requirements prescribed under subsection (a) of this section shall--

(1) provide for suitable integration between the accounting process of each executive agency and the accounting of the Department of the Treasury:

(2) allow the head of each agency to carry out section 3512 of this title; and

(3) provide a method of--

(A) integrated accounting for the United States Government;

(B) complete disclosure of the results of the financial operations of each agency and the Government; and

(C) financial information and control the President and Congress require to carry out their responsibilities.

(c) Consistent with subsections (a) and (b) of this section--

(1) the authority of the Comptroller General continues under section 205(b) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 486(b)); and

(2) the Comptroller General may prescribe the forms, systems, and procedures that the judicial branch of the Government (except the Supreme Court) shall observe.

(d) The Comptroller General, the Secretary, and the President shall conduct a continuous program for improving accounting and financial reporting in the Government.

31 UNITED STATES CODE 3512 EXECUTIVE AGENCY ACCOUNTING AND OTHER FINANCIAL MANAGEMENT REPORTS AND PLANS

§ 3512. Executive agency accounting and other financial management reports and plans

“(a)(1) the Director of OMB shall prepare and submit to the appropriate committees of the Congress a financial management status report and a government-wide 5-year financial management plan.

- (2) A financial management status report under this subsection shall include--
- (A) a description and analysis of the status of financial management in the executive branch;
 - (B) a summary of the most recently completed financial statements--
 - (i) of Federal agencies under section 3515 of this title; and
 - (ii) of Government Corporations;
 - (C) a summary of the most recently completed financial statement audits and reports--
 - (i) of Federal agencies under section 3521(e) and (f) of this title; and
 - (ii) of Government corporations;
 - (D) a summary of reports on internal accounting and administrative control systems submitted to the President and Congress under the amendments made by the Federal Managers' Financial Integrity Act of 1982 (Public Law 97-255); and
 - (E) any other information the Director considers appropriate to fully inform the Congress regarding the financial management of the Federal Government.
- (3)(A) A government-wide 5-year financial management plan under this subsection shall describe the activities the Director, the Deputy Director for Management, the Controller of the Office of Federal Financial Management, and agency Chief Financial Officers shall conduct over the next 5 fiscal years to improve the financial management of the Federal Government.
- (B) Each government-wide 5-year financial management plan prepared under this subsection shall--
- (i) describe the existing financial management structure and any changes needed to establish an integrated financial management system;
 - (ii) be consistent with applicable accounting principles, standards, and requirements;
 - (iii) provide a strategy for developing and integrating individual agency accounting, financial information, and other financial management systems to ensure adequacy, consistency, and timeliness of financial information;

(iv) identify and make proposals to eliminate duplicative and unnecessary systems, including encouraging agencies to share systems which have sufficient capacity to perform the function needed;

(v) identify projects to bring existing systems into compliance with the applicable standards and requirements;

(vi) contain milestones for equipment acquisitions and other actions necessary to implement the 5-year plan consistent with the requirements of this section;

(vii) identify financial management personnel needs and actions to ensure those needs are met;

(viii) include a plan for ensuring the annual audit of financial statements of executive agencies pursuant to section 3521(h) of this title; and

(ix) estimate the costs of implementing the government-wide 5-year plan.

(4)(A) Not later than 15 months after the date of the enactment of this subsection, the Director of OMB shall submit the first financial management status report and government-wide 5-year financial management plan under this subsection, to the appropriate committees of Congress.

(B)(i) Not later than January 31 of each year thereafter, the Director of OMB shall submit to the appropriate committees of Congress, a financial management status report and a revised government-wide 5-year financial management plan to cover the succeeding 5 fiscal years, including a report on the accomplishments of the executive branch in implementing the plan during the preceding fiscal year.

(ii) The Director shall include with each revised government-wide 5-year financial management plan a description of any substantive changes in the financial statement audit plan required by paragraph (3)(B)(viii), progress made by executive agencies in implementing the audit plan, and any improvements in Federal Government financial management related to preparation and audit of financial statements of executive agencies.

(5) Not later than 30 days after receiving each annual report under section 902(a)(6) of this title, the Director shall transmit to the Chairman of the Committee on Governmental Operations of the House of Representatives and the Chairman of the Committee on Governmental Affairs of the Senate a final copy of that report and any comments on the report by the Director.

(b) The head of each executive agency shall establish and maintain systems of accounting and internal controls that provide--

(1) complete disclosure of the financial results of the activities of the agency,

- (2) adequate financial information the agency needs for management purposes;
 - (3) effective control over, and accountability for, assets for which the agency is responsible, including internal audit;
 - (4) reliable accounting results that will be the basis for--
 - (A) preparing and supporting the budget requests of the agency;
 - (B) controlling the carrying out of the agency budget; and
 - (C) providing financial information the President requires under section 1104(e) of this title; and
 - (5) suitable integration of the accounting of the agency with the central accounting and reporting responsibilities of the Secretary of the Treasury under section 3513 of this title.
- (c)(1) To ensure compliance with subsection (a)(3) of this section and consistent with standards the Comptroller General prescribes, the head of each executive agency shall establish internal accounting and administrative controls that reasonably ensure that--
- (A) obligations and costs comply with applicable law;
 - (B) all assets are safeguarded against waste, loss, unauthorized use, and misappropriation; and
 - (C) revenues and expenditures applicable to agency operations are recorded and accounted for properly so that accounts and reliable financial and statistical reports may be prepared and accountability of the assets may be maintained.
- (2) Standards the Controller General prescribes under this subsection shall include standards to ensure the prompt resolution of all audit findings.
- (d)(1) In consultation with the Comptroller General, the Director of OMB--
- (A) shall establish by December 31, 1982, guidelines that the head of each executive agency shall follow in evaluating the internal accounting and administrative control systems of the agency to decide whether the systems comply with subsection (b) of this section; and
 - (B) may change a guideline when considered necessary.
- (2) By December 31 of each year (beginning in 1983), the head of each executive agency, based on an evaluation conducted according to the guidelines prescribed under paragraph (1) of this subsection, shall prepare a statement on whether the systems of the agency comply with subsection (b) of this section, including--

(A) if the head of an executive agency decides the systems do not comply with subsection (b) of this section, a report identifying any material weakness in the systems and describing the plans and schedule for correcting the weakness; and

(B) a separate report on whether the accounting system of the agency conforms to the principles, standards, and requirements the Comptroller General prescribes under section 3511(a) of this title.

(3) The head of each executive agency shall sign the statement and reports required by this subsection and submit them to the President and Congress. The statement and reports are available to the public, except that information shall be deleted from a statement or report before it is made available if the information specifically is--

(A) prohibited from disclosure by law; or

(B) required by Executive order to be kept secret in the interest of national defense or the conduct of foreign affairs.

(e) To assist in preparing a cost-based budget under section 1108(b) of this title and consistent with principles and standards the Comptroller General prescribes, the head of each executive agency shall maintain the accounts of the agency on an accrual basis to show the resources, liabilities, and costs of operations of the agency. An accounting system under this subsection shall include monetary property accounting records.

(f) The Comptroller General shall--

(1) cooperate with the head of each executive agency in developing an accounting system for the agency; and

(2) approve the system when the Comptroller General considers it to be adequate and in conformity with the principles, standards, and requirements prescribed under section 3511 of this title.

(g) The Comptroller General shall review the accounting systems of each executive agency. The results of a review shall be available to the head of the executive agency, the Secretary, and the President. The Comptroller General shall report to Congress on a review when the Comptroller General considers it proper.”

31 UNITED STATES CODE 3524 AUDITING EXPENDITURES APPROVED WITHOUT VOUCHERS

§ 3524. Auditing expenditures approved without vouchers

“(a)(1) The Comptroller General may audit expenditures, accounted for only on the approval, authorization, or certificate of the President or an official of an executive agency, to decide if the expenditure was authorized by law and made. Records and related information shall be made available to the Comptroller General in conducting the audit.

(2) The Comptroller General may release the results of the audit or disclose related information only to the President or head of the agency, or, if there is an unresolved discrepancy, to the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives, and the committees of Congress having legislative or appropriation oversight of the expenditure.

(b) Before December 1 of each year, the Director of OMB shall submit a report listing each account that may be subject to this section to the committees on the Budget and Appropriations of both Houses of Congress, the Committee on Governmental Affairs, and to the Committee on Government Operations, and to the Comptroller General.

(c) The President may exempt from this section a financial transaction about sensitive foreign intelligence or foreign counter-intelligence activities or sensitive law enforcement investigations if an audit would expose the identifying details of an active investigation or endanger investigative or domestic intelligence sources involved in the investigation. The exemption may apply to a class or category of financial transactions.

(d) This section does not--

(1) apply to expenditures under section 102, 103, 105(d)(1),(3), or (5), or 106(b)(2) or (3) of title 3; or

(2) affect authority under section 8(b) of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403j(b)).

(e) Information about a financial transaction exempt under subsection (c) of this section or a financial transaction under section 8(b) of the Central Intelligence Agency Act of 1949 (50 U.S.C. 403j(b)) may be reviewed by the Permanent Select Committee on Intelligence of the House and the Select Committee on Intelligence of the Senate.

(f) Subsections (a)(1) and (d)(1) of this section may be superseded only by a law enacted after April 3, 1980, specifically repealing or amending this section.”

APPENDIX C--EXCERPTS FROM TITLE 10, UNITED STATES CODE

10 UNITED STATES CODE 2201 APPORTIONMENT OF FUNDS; AUTHORITY FOR EXEMPTION; EXCEPTED EXPENSES

§ 2201. Apportionment of funds; authority for exemption; excepted expenses

“(a) Exemption from apportionment requirement. If the President determines such action to be necessary in the interest of national defense, the President may exempt from the provisions of section 1512 of title 31 appropriations, funds, and contract authorizations available for military functions of the Department of Defense.

(b) Airborne alerts. Upon a determination by the President that such action is necessary, the Secretary of Defense may provide for the cost of an airborne alert as an excepted expense under section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)).

(c) Members on Active Duty. Upon a determination by the President that it is necessary to increase (subject to limits imposed by law) the number of members of the armed forces on active duty beyond the number for which funds are provided in appropriation Acts for the Department of Defense, the Secretary of Defense may provide for the cost of such additional members as an excepted expense under section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)).

(d) Notification to Congress. The Secretary of Defense--

(1) shall immediately notify Congress of the use of any authority under this section; and

(2) shall submit monthly reports to Congress on the estimated obligations incurred pursuant to subsection (b) and (c).”

10 UNITED STATES CODE 2204 OBLIGATION OF APPROPRIATIONS

§ 2204. Obligation of appropriations

“To prevent overdrafts and deficiencies in the fiscal year for which appropriations are made, appropriations made to the Department of Defense or to a military department, and reimbursements thereto, are available for obligation and expenditure only under scheduled rates of obligation, or changes thereto, that have been approved by the Secretary of Defense. This section does not prohibit the Department of Defense from incurring a deficiency that it has been authorized by law to incur.”

10 UNITED STATES CODE 2208 WORKING-CAPITAL FUNDS

§ 2208. Working-capital funds

“(a) To control and account more effectively for the cost of programs and work performed in the Department of Defense, the Secretary of Defense may require the establishment of working capital funds in the Department of Defense to--

(1) finance inventories of such supplies as he may designate; and

(2) provide working capital for such industrial-type activities, and such commercial-type activities that provide common services within or among departments and agencies of the Department of Defense, as he may designate.

(b) Upon the request of the Secretary of Defense, the Secretary of the Treasury shall establish working-capital funds established under this section on the books of the Department of the Treasury.

(c) Working-capital funds shall be charged, when appropriate, with the cost of--

(1) supplies that are procured or otherwise acquired, manufactured, repaired, issued, or used; and

(2) services or work performed; including applicable administrative expenses, and be reimbursed from available appropriations or otherwise credited for those costs, including applicable administrative expenses and costs of using equipment.

(d) The Secretary of Defense may provide capital for working-capital funds by capitalizing inventories. In addition, such amounts may be appropriated for the purpose of providing capital for working-capital funds as have been specifically authorized by law.

(e) Subject to the authority and direction of the Secretary of Defense, the Secretary of each military department shall allocate responsibility for its functions, powers, and duties to accomplish the most economical and efficient organization and operation of the activities, and the most economical and efficient use of the inventories, for which working-capital funds are authorized by this section.

(f) The requisitioning agency may not incur a cost for supplies drawn from inventories, or services or work performed by industrial-type or commercial-type activities for which working-capital funds may be established under this section, that is more than the amount of appropriations or other funds available for those purposes.

(g) The appraised value of supplies returned to working-capital funds by a department, activity, or agency may be charged to that fund. The proceeds thereof shall be credited to current applicable appropriations and are available for expenditure for the same purposes that those appropriations are so available. Credits may not be made to appropriations under this subsection as the result of capitalization of inventories under subsection (d).

(h) The Secretary of Defense shall prescribe regulations governing the operation of activities and use of inventories authorized by this section. The regulations may, if the needs of the Department of Defense require it and it is otherwise authorized by law, authorize supplies to be sold to, or services to be rendered or work performed for, persons outside the Department of Defense. However, supplies available in inventories financed by working-capital funds established under this section may be sold to contractors for use in performing contracts with the Department of Defense. Working-capital funds shall be reimbursed for supplies so sold, services so rendered, or work so performed by charges to applicable appropriations or payments received in cash.

(i) Reports annually shall be made to the President and to Congress on the condition and operation of working-capital funds established under this section.

(1) Regulations under subsection (h) shall authorize a working-capital funded Army industrial facility (including a Department of the Army Arsenal) that manufactures large caliber cannons, gun mounts, recoil mechanisms, ammunition, munitions, or components thereof to sell manufactured articles or services to a person outside the Department of Defense if--

(A) in the case of an article, the article is sold to a United States manufacturer, assembler, developer, or other concern--

(i) for use in developing new products;

(ii) for incorporation into items to be sold to, or to be used in a contract with, an agency of the United States;

(iii) for incorporation into items to be sold to, or to be used in a contract with, or to be used for purposes of soliciting a contract with a friendly foreign government; or

(iv) for use in commercial products;

(B) in the case of an article, the purchaser is determined by the Department of Defense to be qualified to carry out the proposed work involving the article to be purchased;

(C) the article or service is not readily available to the purchaser from a commercial source in the United States in a timely manner that meets the requirements of the purchaser;

(D) the sale is to be made on a basis that does not interfere with performance of work by the facility for the Department of Defense or for a contractor of the Department of Defense; and

(E) in the case of services, the services are related to an article authorized to be sold under this subsection and are to be performed in the United States for the purchaser.

(2) Nothing in this subsection shall be construed to affect the application of the export controls provided for in section 38 of the Arms Export Control Act (22 U.S.C. 2778) to items which incorporate or are produced through the use of an article sold under this subsection.

(j) The Secretary of the Army may authorize a working-capital funded Army industrial facility to manufacture or remanufacture articles and sell these articles, as well as manufacturing or remanufacturing services provided by such facilities, to persons outside the Department of Defense if--

(1) the person purchasing the article or service is fulfilling a Department of Defense contract; and

(2) the Department of Defense solicitation for such contract is open to competition between Department of Defense activities and private firms.

(k) the Secretary of Defense shall provide that of the total amount of payments received in a fiscal year by funds established under this section for industrial-type activities, not less than 3 percent during fiscal year 1985, not less than 4 percent during fiscal year 1986, and not less than 5 percent during fiscal year 1987 shall be used for the acquisition of capital equipment for such activities.”

10 UNITED STATES CODE 2410(a) APPROPRIATED FUNDS; AVAILABILITY FOR CERTAIN CONTRACTS FOR 12 MONTHS

§ 2410(a). Appropriated funds; availability for certain contracts for 12 months

Funds appropriated to the Department of Defense for a fiscal year shall be available for payments under contracts for any of the following purposes for 12 months beginning at any time during the fiscal year:

(1) The maintenance of tools, equipment, and facilities.

(2) The lease of real or personal property, including the maintenance of such property when contracted for as part of a lease agreement.

(3) Depot maintenance.

(4) The operation of equipment.

10 UNITED STATES CODE 2805 UNSPECIFIED MINOR CONSTRUCTION

§ 2805. Unspecified minor construction

“(a)(1) Except as provided in paragraph (2), within an amount equal to 125 percent of the amount authorized by law for such purpose, the Secretary concerned may carry out minor military construction projects not otherwise authorized by law. A minor military construction project is a military construction project (1) that is for a single undertaking at a military installation, and (2) that has an approved cost equal to or less than \$1,500,000.

(2) A Secretary may not use more than \$5,000,000 for exercise-related unspecified minor military construction projects coordinated or directed by the Joint Chief of Staff outside the United States during any fiscal year.

(b)(1) A minor military construction project costing more than \$500,000 may not be carried out under this section unless approved in advance by the Secretary concerned.

(2) When a decision is made to carry out a minor military construction project to which paragraph (1) is applicable, the Secretary concerned shall notify in writing the appropriate committees in Congress of that decision, of the justification for the project, and of the estimated cost of the project. The project may then be carried out only after the end of the 21-day period beginning on the date the notification is received by the committees.

[(3) Repealed. Pub. L. 101-510, Div. A, Title XIII, § 1301(16), November 5, 1990, 104 Stat. 1668]

(c)(1) Except as provided in paragraph (2), the Secretary concerned may spend from appropriations available for operation and maintenance amounts necessary to carry out an unspecified military construction project costing not more than \$300,000.

(2) The authority provided in paragraph (1) may not be used with respect to any exercise-related unspecified military construction project coordinated or directed by the Joint Chiefs of Staff outside the United States.

(d) Military family housing projects for construction of new housing units may not be carried out under the authority of this section.”

APPENDIX D--EXCERPTS FROM OTHER TITLES; INCLUDING TITLE 2, UNITED STATES CODE

EXCERPTS FROM TITLE 2--THE CONGRESS

CHAPTER 17B--IMPOUNDMENT CONTROL--Sections 681-688

2 UNITED STATES CODE 681 DISCLAIMER

§ 681. Disclaimer

“Nothing contained in this Act, or in any amendments made by this Act, shall be construed as--

(1) asserting or conceding the constitutional powers or limitations of either the Congress or the President;

(2) ratifying or approving any impoundment heretofore or hereafter executed or approved by the President or any other Federal officer or employee, except insofar as pursuant to statutory authorization then in effect;

(3) affecting in any way the claims or defenses of any party to litigation concerning any impoundment; or

(4) superseding any provision of law which requires the obligation of budget authority or the making of outlays thereunder.”

2 UNITED STATES CODE 682 DEFINITIONS

§ 682. Definitions

“For purposes of sections 682 to 688 of this title--

(1) “deferral of budget authority” includes--

(A) withholding or delaying the obligation or expenditure of budget authority (whether by establishing reserves or otherwise) provided for projects or activities; or

(B) any other type of Executive action or inaction which effectively precludes the obligation or expenditure of budget authority, including authority to obligate by contract in advance of appropriations as specifically authorized by law;

(2) “Comptroller General” means the Comptroller General of the United States;

(3) “rescission bill” means a bill or joint resolution which only rescinds, in whole or in part, budget authority proposed to be rescinded in a special message transmitted by the President under section 683 of this title, and upon which the Congress completes action before the end of the first period of 45 calendar days of continuous session of the Congress after the date on which the President's message is received by the Congress;

(4) “impoundment resolution” means a resolution of the House of Representatives or the Senate which only expresses its disapproval of a proposed deferral of budget authority set forth in a special message transmitted by the President under section 684 of this title; and

(5) continuity of a session of Congress shall be considered as broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of the 45-day period referred to in paragraph (3) of this section and in section 683 of this title, and the 25-day periods referred to in sections 687 and 688(b)(1) of this title. If a special message is transmitted under section 683 of this title during any Congress and the last session of such Congress adjourns sine die before the expiration of 45 calendar days of continuous session (or a special message is so transmitted after the last session of the Congress adjourns sine die), the message shall be deemed to have been retransmitted on the first day of the succeeding Congress and the 45-day period referred to in paragraph (3) of this section and in section 683 of this title (with respect to such message) shall commence on the day after such first day.”

2 UNITED STATES CODE 683 RESCISSION OF BUDGET AUTHORITY

§ 683. Rescission of budget authority

“(a) Transmittal of special message

Whenever the President determines that all or part of any budget authority will not be required to carry out the full objectives or scope of programs for which it is provided or that such budget authority should be rescinded for fiscal policy or other reasons (including the termination of authorized projects or activities for which budget authority has been provided), or whenever all or part of budget authority provided for only one fiscal year is to be reserved from obligation for such fiscal year, the President shall transmit to both Houses of Congress a special message specifying--

(1) the amount of budget authority which he proposes to be rescinded or which is to be so reserved;

(2) any account, department, or establishment of the Government to which such budget authority is available for obligation, and the specific project or governmental functions involved;

(3) the reasons why the budget authority should be rescinded or is to be so reserved;

(4) to the maximum extent practicable, the estimated fiscal, economic, and budgetary effect of the proposed rescission or of the reservation; and

(5) all facts, circumstances, and considerations relating to or bearing upon the proposed rescission or the reservation and the decision to effect the proposed rescission or the reservation, and to the maximum extent practicable, the estimated effect of the proposed rescission or the reservation upon the objects, purposes, and programs for which the budget authority is provided.

(b) Requirement to make available for obligation

Any amount of budget authority proposed to be rescinded or that is to be reserved as set forth in such special message shall be made available for obligation unless, within the prescribed 45-day period, the Congress has completed action on a rescission bill rescinding all or part of the amount proposed to be rescinded or that is to be reserved. Funds made available for obligation under this procedure may not be proposed for rescission again.”

2 UNITED STATES CODE 684 PROPOSED DEFERRALS OF BUDGET AUTHORITY

§ 684. Proposed Deferrals of budget authority

“(a) Transmittal of special message. Whenever the President, the Director of OMB, the head of any department or agency of the United States, or any officer or employee of the United States proposes to defer any budget authority provided for a specific purpose or project, the President shall transmit to the House of Representatives and the Senate a special message specifying--

(1) the amount of the budget authority proposed to be deferred;

(2) any account, department, or establishment of the Government to which such budget authority is available for obligation, and the specific projects or governmental functions involved;

(3) the period of time during which the budget authority is proposed to be deferred;

(4) the reasons for the proposed deferral, including any legal authority invoked to justify the proposed deferral;

(5) to the maximum extent practicable, the estimated fiscal, economic, and budgetary effect of the proposed deferral; and

(6) all facts, circumstances, and considerations relating to or bearing upon the proposed deferral and the decision to effect the proposed deferral, including an analysis of such facts, circumstances, and considerations in terms of their application to any legal authority, including specific elements of legal authority, invoked to justify such proposed deferral, and to the

maximum extent practicable, the estimated effect of the proposed deferral upon the objects, purposes, and programs for which the budget authority is provided.

A special message may include one or more proposed deferrals of budget authority. A deferral may not be proposed for any period of time extending beyond the end of the fiscal year in which the special message proposing the deferral is transmitted to the House and the Senate.

- (b) Consistency with legislative policy

Deferrals shall be permissible only--

- (1) to provide for contingencies;
- (2) to achieve savings made possible by or through changes in requirements or greater efficiency of operations; or
- (3) as specifically provided by law.

No officer or employee of the United States may defer any budget authority for any other purpose.

- (c) Exception

The provisions of this section do not apply to any budget authority proposed to be rescinded or that is to be reserved as set forth in a special message required to be transmitted under section 683 of this title.”

2 UNITED STATES CODE 685 TRANSMISSION OF MESSAGES; PUBLICATION

§ 685. Transmission of messages; publication

- “(a) Delivery to House and Senate. (Text omitted here; for detail refer to U.S.C. title 2)
- (b) Delivery to Comptroller General. (Text omitted here, for detail refer to U.S.C. title 2)
- (c) Transmission of supplementary messages. (Text omitted here, for detail refer to U.S.C. title 2)
- (d) Printing in Federal Register. (Text omitted here, for detail refer to U.S.C. title 2)
- (e) Cumulative reports of proposed rescissions, reservations, and deferrals of budget authority. (Text omitted here, for detail refer to U.S.C. title 2).”

2 UNITED STATES CODE 686 REPORTS BY COMPTROLLER GENERAL

§ 686. Reports by Comptroller General

- “(a) Failure to transmit special message. (Text omitted here, for detail refer to U.S.C. title 2)
- (b) Incorrect classification of special message. (Text omitted here, for detail refer to U.S.C. title 2)

2 UNITED STATES CODE 687 SUITS BY COMPTROLLER GENERAL

§ 687. Suits by Comptroller General

“If, under this chapter, budget authority is required to be made available for obligation and such budget authority is not made available for obligation, the Comptroller General is hereby expressly empowered, through attorneys of his own selection, to bring a civil action in the United States District Court for the District of Columbia to require such budget authority to be made available for obligation, and such court is hereby expressly empowered to enter in such civil action, against any department, agency, officer or employee of the United States, any decree, judgment, or order which may be necessary or appropriate to make such budget authority available for obligation. No civil action shall be brought by the Comptroller General under this section until the expiration of 25 calendar days of continuous session of the Congress following the date on which an explanatory statement by the Comptroller General of the circumstances giving rise to the action contemplated has been filed with the Speaker of the House of Representatives and the President of the Senate.”

2 UNITED STATES CODE 688 PROCEDURE IN HOUSE OF REPRESENTATIVES AND SENATE

§ 688. Procedure in House of Representatives and Senate

- “(a) Referral. (Text omitted, for detail refer to United States Code, Title 2.)
- (b) Discharge of committee. (Text omitted, for detail refer to United States Code, Title 2)
- (c) Floor consideration in the House. (Text omitted, for detail refer to United States Code, Title 2)
- (d) Floor consideration in the Senate. (Text omitted, for detail refer to United States Code, Title 2).”

EXCERPTS FROM SELECTED TITLES AND SECTIONS OF UNITED STATES CODE

TITLE 5--GOVERNMENT ORGANIZATION AND EMPLOYEES

5 UNITED STATES CODE 1304 LOYALTY INVESTIGATIONS; REPORTS;
REVOLVING FUND

§ 1304(e). Loyalty investigations; reports; revolving fund

“(1) A revolving fund is available, to the Office (i.e. Office of Personnel Management) without fiscal year limitation, for financing investigations, training, and such other functions as the Office is authorized or required to perform on a reimbursable basis. However, the functions which may be financed in any fiscal year by the fund are restricted to those functions which are covered by the budget estimates submitted to the Congress for that fiscal year. To the maximum extent feasible, each individual activity shall be conducted generally on an actual cost basis over a reasonable period of time.

(2) The capital of the fund consists of the aggregate of--

(A) appropriations made to provide capital for the fund, which appropriations are hereby authorized, and

(B) the sum of the fair and reasonable value of such supplies, equipment, and other assets as the Office from time to time transfers to the fund (including the amount of the unexpended balances of appropriations or funds relating to activities the financing of which is transferred to the fund) less the amount of related liabilities, the amount of unpaid obligations, and the value of accrued annual leave of employees, which are attributable to the activities the financing of which is transferred to the fund.

(3) The fund shall be credited with--

(A) advances and reimbursements from available funds of the Office or other agencies, or from other sources, for those services and supplies provided at rates estimated by the Office as adequate to recover expenses of operation (including provision for accrued annual leave of employees and depreciation of equipment); and

(B) receipts from sales or exchanges of property, and payments for loss of or damage to property, accounted for under the fund.

(4) Any unobligated and unexpended balances in the fund which the Office determines to be in excess of amounts needed for activities financed by the fund shall be deposited in the Treasury of the United States as miscellaneous receipts .

(5) The Office shall prepare a business-type budget providing full disclosure of the results of operations for each of the functions performed by the Office and financed by the fund, and such budget shall be transmitted to the Congress and considered, in the manner prescribed by law for wholly owned Government corporations.

(6) The Comptroller General of the U.S. shall, as a result of his periodic reviews of the activities financed by the fund, report and make such recommendations as he deems appropriate to the committees on Post Office and Civil Service of the Senate and House at least every three years.”

TITLE 18--CRIMES AND CRIMINAL PROCEDURE

18 UNITED STATES CODE 4124 PURCHASE OF PRISON-MADE PRODUCTS BY FEDERAL DEPARTMENTS

§ 4124. Purchase of Prison-made Products by Federal Departments

“(a) The several Federal departments and agencies and all other Government institutions of the United States shall purchase at not to exceed current market prices, such products of the industries authorized by this chapter as meet their requirements and may be available.

(b) Disputes as to the price, quality, character, or suitability of such products shall be arbitrated by a board consisting of the Comptroller General of the United States, the Administrator of General Services, and the President, or their representatives. Their decision shall be final and binding upon all parties.

(c) Each Federal department, agency, and institution subject to the requirements of subsection (a) shall separately report to the General Services Administration all of its acquisitions of products and services from Federal Prison Industries, and that reported information shall be entered in the Federal Procurement Data System referred to in section 6(d)(4) of the Office of Federal Procurement Policy Act. Each report published by the Federal Procurement Data System that contains the information collected by the System shall include a statement to accompany the information reported by the department, agency, or institution under the preceding sentence as follows: "Under current law, sales by Federal Prison Industries are considered intragovernmental transfers. The purpose of reporting sales by Federal Prison Industries is to provide a complete overview of acquisitions by the Federal Government during the reporting period."

(d) Within 90 days after the date of enactment of this subsection, Federal Prison Industries shall publish a catalog of all products and services which it offers for sale. This catalog shall be updated periodically to the extent necessary to ensure that the information in the catalog is complete and accurate.”

TITLE 33--NAVIGATION AND NAVIGABLE WATERS

33 UNITED STATES CODE 576 REVOLVING FUND; ESTABLISHMENT;
AVAILABILITY; REIMBURSEMENT; TRANSFER OF FUNDS; LIMITATION

§ 576. Revolving fund; establishment; availability; reimbursement; transfer of funds; limitation

“There is established a revolving fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of the plant and equipment of the Corps of Engineers used in civil works functions, including acquisition of plant and equipment, maintenance, repair, and purchase, operation, and maintenance of not to exceed four aircraft at any one time, temporary financing of services finally chargeable to appropriations for civil works functions, and the furnishing of facilities and services for military functions of the Department of the Army and other Government agencies and private persons, as authorized by law. In addition, the Secretary of the Army is authorized to provide capital for the fund by capitalizing the present inventories, plant and equipment of the civil works functions of the Corps of Engineers. The fund shall be credited with reimbursements or advances for the cost of equipment, facilities, and services furnished, at rates which shall include charges for overhead and related expenses, depreciation of plant and equipment, and accrued leave: Provided, that on July 1, 1953, (1) the fund shall assume the assets, liabilities, and obligations of the Plant accounts, as carried on the records of the Corps of Engineers as of June 30, 1953, under the appropriations for “Maintenance and improvement of existing river and harbor works,” “Flood control, general,” and “Flood control, Mississippi River and tributaries,” and (2) there shall be transferred from said appropriations to the fund amounts equivalent to the unexpended cash balances of the Plant accounts on June 30, 1953: Provided further, That the total capital of said fund shall not exceed \$140,000,000.”

TITLE 41--PUBLIC CONTRACTS

41 UNITED STATES CODE 11 NO CONTRACTS OR PURCHASES UNLESS
AUTHORIZED OR UNDER ADEQUATE APPROPRIATION; REPORT TO CONGRESS

§ 11. No contracts or purchases unless authorized or under adequate appropriation; report to Congress

“(a) No contract or purchase on behalf of the United States shall be made, unless the same is authorized by law or is under an appropriation adequate to its fulfillment, except in the Department of Defense and in the Department of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy, for clothing, subsistence, forage, fuel, quarters, transportation, or medical and hospital supplies, which, however, shall not exceed the necessities of the current year.

(b) The Secretary of Defense and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy shall immediately advise the Congress of the exercise of the authority granted in subsection (a) of this section, and shall report quarterly on

the estimated obligations incurred pursuant to the authority granted in subsection (a) of this section.”

TITLE 44--PUBLIC PRINTING AND DOCUMENTS

44 UNITED STATES CODE 501 GOVERNMENT PRINTING, BINDING, AND BLANK BOOK WORK TO BE DONE AT GOVERNMENT PRINTING OFFICE

§ 501. Government Printing, binding, and blank book-work to be done at Government Printing Office

“All printing, binding, and blank-book work for Congress, the Executive Office, the Judiciary, other than the Supreme Court of the United States, and every executive department, independent office and establishment of the Government, shall be done at the Government Printing Office, except--

(1) classes of work the joint committee on Printing considers to be urgent or necessary to have done elsewhere; and

(2) printing in field printing plants operated by an executive department, independent office or establishment, and the procurement of printing by an executive department, independent office or establishment from allotments for contract field printing, if approved by the Joint Committee on Printing.

“Printing or binding may be done at the Government Printing Office only when authorized by law.”

APPENDIX E--EXCERPTS FROM OMB CIRCULAR A-34

FROM PART III, OMB CIRCULAR A-34

REQUIREMENTS FOR REPORTING ANTIDEFICIENCY ACT VIOLATIONS

32.1 Adverse personnel actions and penalties

“In accordance with sections 1349 and 1518 of Title 31 of the U.S. Code, an officer or employee violating sections 1341(a), 1342, or 1517(a) of Title 31 shall be subject to appropriate administrative discipline, including--when circumstances warrant--a written reprimand, suspension from duty without pay, or removal from office.

“In addition, in accordance with sections 1350 and 1519 of Title 31 of the U.S. Code, an officer or employee convicted of willfully and knowingly violating sections 1341(a), 1342, or 1517(a) of Title 31 shall be fined not more than \$5,000, imprisoned for not more than 2 years, or both.

32.2 Requirements to report Antideficiency Act violations.

“The agency head will furnish to the President, through the Director of OMB, and to the Congress, information on Antideficiency Act violations of the following character:

“(1) Overobligation or overexpenditure of an appropriation or fund. This is any case where an officer or employee of the United States has made or authorized an expenditure from or created or authorized an obligation against any appropriation or fund in excess of the amount available in the account. (31 U.S.C. 1341(a)).

“(2) Contract or obligation in advance of an appropriation. This is any case where an officer or employee of the United States has involved the Government in a contract or other obligation for the payment of money for any purpose in advance of appropriations made for such purpose, unless such contract or obligation is authorized by law. (31 U.S.C. 1341(a))

“(3) Obligation and expenditure of funds required to be sequestered. This is any case where an officer or employee of the United States has made or authorized an expenditure or obligation of funds required to be sequestered under section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended. (31 U.S.C. 1341(a))

“(4) Contract or obligation of funds required to be sequestered. This is any case where an officer or employee has involved the Government in a contract or other obligation for the payment of money required to be sequestered under section 2521 of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended. (31 U.S.C. 1341(a))

“(5) Acceptance of voluntary service. This is any case where an officer or employee of the United States has accepted voluntary service for the United States or employed personal services in excess of that authorized by law, except in cases of an emergency involving the safety of human life or the protection of property. As used above, the term “emergencies involving the safety of human life or the protection of property” does not include ongoing, regular functions of government, the suspension of which would not imminently threaten the safety of human life or the protection of property. (31 U.S.C. 1342).

“(6) Overobligation or overexpenditure of an apportionment or reapportionment. This is any case where an officer or employee of the United States has authorized or created an obligation or made an expenditure in excess of an apportionment or reapportionment. This includes adjustments that cause obligations in expired accounts that have not been merged to exceed the apportionment for the year in which such obligations were incurred. (31 U.S.C. 1517(a)).

“(7) Overobligation or overexpenditure of an allotment or suballotment. This is any case where an officer or employee of the United States has authorized or created an obligation or made an expenditure in excess of the amount permitted by the prescribed and approved agency fund control system. (31 U.S.C. 1517(a)).

“(8) Overobligation or overexpenditure of other administrative subdivisions of funds. Generally the overobligation of other administrative subdivisions of fund, e.g., operating budgets, allowances, financial plans, statutory limitations other than those found in the appropriation act, and other than those defined as a statutory limitation in this Circular, are violations of the Antideficiency Act only when it causes an overobligation or overexpenditure of an allotment, apportionment or appropriation unless the apportionment or agency's fund control regulations specify otherwise. (31 U.S.C. 1517(a)).

“Overobligation or overexpenditure of the following administrative divisions of funds are always violations of the Antideficiency Act: apportionments, allotments, and suballotments. Overobligation or overexpenditure of other administrative divisions of funds are violations of the Act only when so specified in the agency's fund control regulations or when the overobligation results in the overobligation of an apportionment allotment, or suballotment.

“The overobligation of an allocation does not necessarily result in a violation of the Antideficiency Act unless either the allocation is separately apportioned, e.g., as a category B or in an attachment to the SF 132 (unless otherwise specified on the SF 132), or the agency fund control regulations specifies that an overobligation of the allocation automatically results in a violation of the Antideficiency Act.

“Violations involving subapportionments relating to allocation accounts will be reported through OMB to the President by the agency that administers the allocation account through the agency administering the parent account.

32.3 Contents of report to the President.

“The agency report to the President on an Antideficiency Act violation will be in the form of a letter (original and three copies), forwarded through the Director of OMB

“The letter will set forth the following data, in the sequence outlined:

“(1) The title and Treasury symbol (including the fiscal year) of the appropriation or fund account, the amount involved for each violation, and the date on which the violation occurred.

“(2) The name and position of the officer(s) or employee(s) responsible for the violation.

“(3) All facts pertaining to the violation, including the type of violation (e.g., overobligation of an appropriation, overobligation of an apportionment, overobligation of an allotment or suballotment), the primary reason or cause, any statement from the responsible officer(s) or employee(s) with respect to any circumstances believed to be extenuating, and any germane report by the agency's Inspector General and/or the agency's counsel.

“(4) A statement of the administrative discipline imposed and any further action(s) taken with respect to the officer(s) or employee(s) involved in the violation.

“(5) In the case where an office[r] or employee is suspected of willfully and knowingly violating the Antideficiency Act, confirm that all information has been submitted to the Department of Justice for determination of whether further action is needed.

“(6) A statement regarding the adequacy of the system of administrative control prescribed by the head of the agency and approved by OMB, if such approval has been given. If the head of the agency determines a need for changes in the regulations, such proposals will be submitted as provided in section 31.5.

“(7) A statement of any additional action taken by, or at the direction of the head of the agency, including any new safeguards provided to prevent recurrence of the same type of violation.

“(8) If another agency is involved, a statement concerning the steps taken to coordinate the report with the other agency.

32.4 Report to the Congress.

“The report to the Congress will be in the form of identical reports to the Speaker of the House of Representatives and the President of the Senate.”

“If it is identical to the report to the President, a statement to this effect will be included in the report to the President. If it is not identical, one copy of the report to the Congress will be submitted to OMB with the report to the President.

32.5 Report on GAO Findings

“Reports to the President and the Congress should also be made on violations not previously reported by the agency that are included in findings of the General Accounting Office in connection with audits and investigations.

“In these cases, the report to the President will indicate whether the agency agrees that a violation occurred, and if so, it will contain an explanation as to why the violation was not discovered and previously reported by the agency. If the agency does not agree that a violation has occurred, the report to the President and to the Congress will explain the agency's position.

32.6 OMB-requested investigations and audits

“Whenever OMB determines that a violation of the Antideficiency Act may have occurred, OMB may request that an investigation or audit be undertaken or conducted by the agency. In such cases, a report describing the results of the investigation or audit should be submitted to OMB through the head of the agency. If the report indicates that no violation of the Antideficiency Act has occurred, the agency head will so inform OMB and forward to OMB a copy of the report. If the report indicates that a violation of the Antideficiency Act has occurred, the agency head will report to the President and the Congress in accordance with sections 32.3 and 32.4 respectively, as soon as possible. If the agency head does not agree that a violation has occurred, the report to the President and to the Congress will explain the agency's position.

32.7 Timing of Reports by Agency Heads

“The required reports to the President and to the Congress, signed by the head of the agency, will be made immediately after a violation becomes known.

EXCERPTS FROM PART III, OMB CIRCULAR A-34

111.12 Antideficiency Act violations

“Agencies are required to report violations of the Antideficiency Act when the following conditions occur. (Note: See section 32 of this Circular for instructions on reporting Antideficiency Act violations.)

“(a) New obligations and expenditures or adjustments to obligations and expenditures exceed the original appropriations. This is any case where an officer or employee of the United States has made or authorized an expenditure from or created or authorized an obligation against any appropriation or fund account in excess of the amount available in the original appropriation or fund account.

“(b) New obligations or any expenditures in canceled accounts. This is any case where an officer or employee of the United States has made or authorized an expenditure from or created or authorized an obligation against an account that was closed pursuant to 31 U.S.C. 1551-1557.

“(c) New obligations and expenditures or adjustments to obligations and expenditures that exceed the amount apportioned or allotted. This is any case where an officer or employee of the United States has made or authorized an expenditure from or created or authorized an obligation against any appropriation or fund account in excess of the amount apportioned or allotted to the original appropriation or fund account.”

DOD 7000.14-R

DEPARTMENT OF DEFENSE

FINANCIAL MANAGEMENT REGULATION

VOLUME 15

SECURITY ASSISTANCE POLICY AND PROCEDURES

MARCH 1993

(with changes through September 1999)

**UNDER SECRETARY OF DEFENSE
(COMPTROLLER)**

COMPTROLLER OF THE DEPARTMENT OF DEFENSE

WASHINGTON, DC 20301-1100

MAR 18 1993

FOREWORD

This Volume of the Department of Defense Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures." It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume incorporates material previously issued under DoD 7290.3-M, "Foreign Military Sales Finance and Accounting Manual," September 18, 1986, authorized by DoD Instruction 7290.3, "Foreign Military Sales Finance and Accounting," May 8, 1991, which are both hereby canceled. This Volume establishes procedures for security assistance activities involving management, fiscal matters, accounting, pricing, budgeting for reimbursements to DoD appropriation accounts, and revolving funds, auditing, international balance of payments, and matters affecting the DoD budget, consistent with DoD Directive 5132.3, "DoD Policy and Responsibilities Relating to Security Assistance," March 10, 1981.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Unified and Specified Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Comptroller of the Department of Defense.

The reporting requirements contained in this regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 7750.5-M, "Procedures for Management of Information Requirements."

Verbal inquiries regarding Chapter 7 should be directed to the Director, Accounting Policy, Office of the DoD Comptroller, (703) 697-0585 or DSN 227-0585. Questions regarding all other Chapters may be directed to the Deputy Director for Accounting, Defense Finance and Accounting Service, (703) 607-1339 or DSN 327-1339

Written questions or recommendations for changes to this Volume of the Regulation, as well as requests for deviations from or exceptions to specific standards, along with justification, should be forwarded, through channels, to the address below:

Office of the Comptroller of the Department of Defense
Room 3E822
The Pentagon
Washington, DC 20301-1100

DoD Components will be provided copies of this Volume of the Regulation through normal publication channels. Other Federal Agencies and the public may obtain copies of this Volume from the Defense Institute of Security Assistance Management (DISAM/DRP), Wright-Patterson Air Force Base, Ohio 45433-5000 (DSN 785-2994).

Donald B. Shycoff
Acting Comptroller

DEFINITIONS

1. **Above-the-line-Cost.** Cost identified as specific FMS line items for articles or services or as part of a specific line on an LOA (see Table 201-1). Applicable costs are added to arrive at the estimated cost shown on the LOA format.

2. **Accrued Expenditures.** The term used for the credits entered into the budgetary accounts to recognize liabilities incurred for (1) services performed by employees, contractors, other Government accounting entities, vendors, carriers, grantees, lessors, etc.; (2) goods and other tangible property received; and (3) items such as annuities or insurance claims for which no current service is required. Accrued expenditures are categorized as either paid or unpaid.

A. **Accrued Expenditure-Paid.** The budgetary account which matches the proprietary account “funds disbursed.” It represents the dollar value of goods and services received for which payment has been made.

B. **Accrued Expenditure-Unpaid.** The budgetary account which matches the proprietary account “accounts payable.” It represents the dollar value of goods and services received for which payment has not been made.

3. **Allotment.** Authority issued to a DoD Component to incur commitments and obligations within a specified amount. In the FMS program there are two types of allotments:

A. **Allotment for Actual Administrative Expenses.** All of the actual cost incurred by DoD Components in administering the FMS program are funded by this allotment. The allotment is issued on a quarterly basis and may not be exceeded.

B. **Allotment for Program Implementation.** An allotment of FMS case contract authority for use on a direct cite basis, citing the allotment holder's accounting station. This type of allotment is made when SAAC determines it does not have the accounting capability to support detailed accounting requirements below the FMS

case level, i.e., commitments, obligations and disbursements resulting from contract award to implement individual FMS case line items. The amount released on each FMS case is a specific limitation and the monthly status-of-allotment report must show the status of each case.

4. **Anticipated Reimbursements.** “Anticipated Reimbursements” refers to the dollar value of reimbursable orders that has been included in the DoD Component's budget. Applicable amounts are not available for obligation until an actual customer order has been received. There are two general type of anticipated FMS reimbursements.

A. **Apportioned Anticipated Reimbursements.** Initial and interim reports of budget execution reflect apportioned anticipated reimbursements but commitments and obligations cannot exceed the value of approved amounts reflected in column 10 of the DD Form 2060. September 30 budget execution reports will reduce the amount of anticipated reimbursement to agree with DD Form 2060 actual orders. In the event the reimbursable program is subject to apportionment action, DD Form 2060 orders received in excess of the apportionment are not available for obligation until the apportionment for reimbursable orders is increased through the Defense budget process.

B. **Automatically Apportioned Anticipated Reimbursements.** When anticipated reimbursements are subject to automatic apportionment, the value of any DD Form 2060 reimbursable order is available for obligation.

5. **Arrearage.** In FMS, a country-level arrearage occurs on a net cash basis wherein total accrued expenditures exceed total available cash resources.

6. **Attrition.** The destruction of a DoD capital asset when a foreign student was in physical control of the asset or was a direct result of negligence, simple or gross.

7. Below-the-line-Costs. Costs identified in the LOA (See Table 201-1) in lines 9 through 12. Applicable costs are added to line 8, net estimated costs, to arrive at line 13, estimated total costs. Normally, SAAC retains the obligational authority necessary to execute these applicable costs.

8. Contract/Budget Authority. Authority provided by law to enter into obligations (in support of FMS cases) without all of the cash necessary to liquidate the obligations. There are two basic types of budget authority resulting from operation of the FMS program:

A. Contract/Budget Authority in DoD Appropriation/Fund Account. In the direct program portion of the budget, this authority results from the appropriation process. For the reimbursable portion of the budget, the authority results from receipt of customer orders. In the case of the FMS program, the customer order (and hence budget authority) results from receipt by the implementing agency of a reimbursable order issued by the Security Assistance Accounting Center (SAAC) for all or a portion of an FMS case.

B. Contract/Budget Authority in the Trust Fund. This authority represents that portion of the FMS case which will be implemented in the current fiscal year. That portion of an FMS case that may not be implemented in the current fiscal year is an uncommitted acceptance. Uncommitted acceptances are not budget authority but are reported in schedules attached to the DD Form 1176, "Report on Budget Execution."

9. Defense Business Operations Fund. A working capital fund.

10. Defense Stock. The term "stock" includes defense articles on hand that are available for prompt delivery. It also includes defense articles (contract) on order that are available for delivery within a reasonable time from the date of order by an eligible foreign government or international organization without increasing outstanding contracts or entering into new contracts. Any orders received from and eligible foreign government or international organization which cannot be filled in this manner fall within the provisions

of Section 22 of the Arms Export Control Act [reference (a)].

11. Dependable Undertaking. A firm commitment made by a foreign government or international organization to pay the full cost of and to assure the U.S. Government against any loss on a contract for new production or the performance of a defense service.

12. Direct Cite. Citation of the Trust Fund, 97-11X8242, as the financing source on documents leaving the DoD system, contracts with commercial firms, General Services Administration, Department of Transportation, etc. The term "direct cite" is not valid if any DoD organization establishes a reimbursable order to a DoD appropriation account, or Defense Business Operations Fund.

13. Distributed Costs. Refers to a cost which has been identified or allocated to an FMS case.

14. Estimated Actual Charges. A systematic and documented estimate of actual cost. The procedure is used in the absence of an established cost accounting system and the procedure is sometimes referred to as a cost finding technique.

15. Expenditure Authority. Authority issued by SAAC to a disbursing activity authorizing the disbursement of an FMS country's funds. See Section 406 for complete details.

16. Full Value for DoD Stocks and Services. A selling price computed in accordance with Chapter 7 of this Volume.

17. Financing Appropriation. The appropriation account originally increased as a result of the performing DoD Component's acceptance of a reimbursable order from the SAAC. This activity is reflected as "FMS reimbursables."

18. FMS Case. A DD Form 1513, "United States Department of Defense Offer and Acceptance," which has been accepted by a foreign country.

19. FMSO. A term which stands for Foreign Military Sales Order and used to describe LOAs which implement Cooperative Logistics Supply Support Arrangements. Two LOAs are written;

a FMSO I and a FMSO II. The FMSO I, Part A, represents the on-hand value of DoD CONUS inventories required to support FMS customer requisitions. The FMSO I, Part B, provides the obligational authority to fund the remaining portion of the order. The FMSO II is the annual consumption case, and all FMSO deliveries are reported against this case.

20. Implementing Agency. The Military Department or Defense Agency assigned responsibility by the Defense Security Assistance Agency to prepare a DD Form 1513 and to implement the case. The implementing agency is responsible for overall management of the actions which will result in delivery of the materials or services set forth in the Letter of Offer and Acceptance (LOA) which was accepted by a foreign country or international organization.

21. Indebtedness. “Indebtedness” refers to financial obligations of FMS customers to make payment(s) to the U.S. Government in accordance with the provisions of the Letters of Offer and Acceptance.

22. Major Defense Equipment (MDE). MDE are those items of significant military equipment, as identified in the International Traffic in Arms Regulation U.S. Munitions List, which have incurred a nonrecurring cost for RDT&E of \$50 million or a total production cost of \$200 million or more.

23. Net Case Value. Total amount of cost reflected above-the-line on the LOA as amended or modified.

24. Nonstandard Article. For FMS purposes, a nonstandard article is one that the DoD does not manage, either because applicable end items have been retired or because they were never purchased for DoD Components.

25. Nonstandard Service. For FMS purposes a nonstandard service is a service that the DoD does not routinely purchase or perform.

26. Obligational Authority. Total authority received through use of the DD Form 2060. Includes column 11 authority to incur commit-

ments and obligations directly against the Trust Fund and column 10 reimbursable orders.

27. Omnibus Billing Statement of Account. A statement of additional charges or credits to cases that have been recategorized from active to inactive status.

28. Reimbursable Order. A DD Form 2060 with a dollar value in column 10. Applicable amounts must be reflected in reimbursement reports as an FMS Trust Fund reimbursable activity.

29. Secondary Appropriation. An appropriation account increased as a result of reimbursable orders from an implementing agency which cite one of the implementing agency’s appropriation accounts. Activity in a secondary appropriation is not categorized as an “FMS reimbursable.”

30. Staging Cost. The cost incurred by the Department of Defense in consolidation of materiel before shipment to an FMS customer. Includes costs incident to storage and control of inventory, consolidation of incoming articles into a single shipment, and a break in CONUS transportation.

31. Trust Fund. The Trust Fund, “Advances, Foreign Military Sales, Executive” (97-11X8242).

32. Uncommitted Acceptance. The portion of the dollar value for FMS which cannot be executed and which has not been released to an implementing agency.

33. Undistributed Cost. A cost or disbursement to a budget authority which has not been allocated to a specific case.

34. Working Capital Fund. The Defense Business Operations Fund.

CHAPTER 1**GENERAL INFORMATION**0101 **INTRODUCTION**

010101. **Purpose.** The purpose of this Volume is to:

A. Establish the accounting, pricing, budgeting, and reporting policies and procedures which are necessary to implement the financial management requirements of the Arms Export Control Act [reference (a)], hereinafter referred to as the AECA.

B. Establish the accounting, financing, and billing procedures for foreign military sales (FMS) transactions in the Trust Fund (Advances Foreign Military Sales, Executive) and in the performing appropriations when FMS orders are executed on a reimbursable basis.

C. Establish the pricing and costing criteria for FMS sales of defense articles and defense services (including training) and construction services furnished to friendly foreign governments and international organizations under authority of the AECA.

D. Ensure that the pricing policies are applied in situations where a contractor, involved in direct sales to a foreign government, acts as an agent of the foreign government in executing a purchase agreement with the U.S. Government for Department of Defense (DoD) materiel and services. The policies apply where coproduction, codevelopment, cooperative production, or cooperative development agreements are entered into with foreign governments.

★ 010102. **Authority.** This Regulation is issued under authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," [reference (b)].

★ 010103. **Applicability.** This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff and the Unified Combatant Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components"). Unless specifically exempted, FMS transactions should follow DoD accounting guidance contained elsewhere in this Regulation.

010104. **Objectives.** The general objectives of this Volume are to:

A. Assure full compliance with the financial management and pricing requirements of the AECA, as amended.

B. Provide an integrated accounting and financial control system that will record all financial transactions related to an FMS case from the time it is accepted until it is completed.

★ C. Provide complete accounting support for the budget schedules and budget concepts as reflected in Volumes 2A and 2B of this Regulation [reference (d)].

D. Provide an accounting and financial control pattern for FMS work which gives appropriate recognition to the fact that the budget authority resulting from accepted FMS cases is not necessarily recorded for obligation in the year in which the case is accepted by the FMS customer.

E. Ensure that Trust Fund and performing appropriation accounting, reporting, and budget schedules are properly interfaced.

F. Facilitate budgeting, financial planning, and cost estimating for FMS transactions.

G. Ensure compliance with all requirements for the administrative control of funds and provide a Trust Fund accounting system that will meet General Accounting Office (GAO) standards.

010105. Volume Organization and Maintenance

A. Organization. This Volume consists of chapters which are organized in terms of major categories of interest. For example, Chapter 2, Finance, provides the procedures to be followed in recognizing budget authority by various DoD Components involved in execution of an FMS case. Paragraph 020102 explains the responsibilities of the various DoD Components, paragraph 020103 explains the documents required for creation of budget authority, and paragraph 020104 establishes policies for recognition of budget authority in the FMS Trust Fund.

B. Identification System

1. Each of the chapters is subdivided into sections that are numbered consecutively in the hundred series identified by the chapter number. For example, section 0101 is the first section in Chapter 1, section 0201 is the first section in Chapter 2, etc.

2. Paragraphs are numbered consecutively with a six-digit number consisting of the chapter number (two digits), the section number (two digits), and a two-digit paragraph identity. For example, the first paragraph in section 0101 is numbered 010101 and the

fourth paragraph in section 0101 is numbered 010104. Subparagraphs and subdivisions thereof are identified, in turn as necessary, by upper-case letters, Arabic numerals, lower-case letters, Arabic numerals in parentheses, lower-case letters in parentheses, underlined Arabic numerals and underlined lower-case letters. Thus, a subparagraph might be referred to as subparagraph 010101.A.1.a.(1)(a)1.a. Lower-case Roman numerals in parentheses will be used to identify lists of items within the text of a paragraph or subparagraph.

★ 3. Page numbers are listed consecutively by chapter.

★ 4. Table numbers consist of a two-part number. The first part will be the chapter number and the second part will be an Arabic number assigned to the table (e.g., 1-1, 1-2, etc.).

5. Appendix numbers consist of a two-part number. The first part will be the consecutive letter of the alphabet and the second part will be the page number (e.g., A-1, B-2, etc.).

★ C. Basic Publication and Changes. This Volume will be placed on the internet to permit financial management policies contained in this Regulation to realize the widest possible distribution and dissemination within the DoD, while preserving valuable resources for other uses. Formal coordination is required for all changes to the DoDFMR and must be approved by the Under Secretary of Defense (Comptroller). Changes to the Volume will be made to the extent feasible by reissuance of individual chapters. Revised guidance issued by Under Secretary of Defense (Comptroller) memorandum in advance of a formal change to the Volume will be incorporated in a formal change as soon as possible after issuance of the memorandum.

D. Distribution. This Volume and changes thereto will be distributed in accordance with provisions of the DoD Directives System.

E. Syntax. The use of the virgule, commonly know as a slash (/) mark, throughout this Regulation is to denote alternatives, as in "and/or."

★ 010106. Interpretations, Recommendations, and Deviations. Requests for clarification, interpretation of, or changes to the provisions of this Volume will be submitted through comptroller channels to the Office of the Under Secretary of Defense (Comptroller). Any guidance contained in this Volume that appears to be in conflict with other DoD issuances or the governing statutes and regulations will be reported to the DFAS-HQ/A. Deviations from the financial and accounting policies prescribed in this Volume may not be implemented without the prior approval of the Office of the Under Secretary of Defense (Comptroller).

010107. Effective Date and Implementation

A. The provisions of this Volume are effective immediately.

B. The DoD Components will, when necessary, proceed to design or modify their reporting systems and pricing regulations in a manner that is consistent with the policies and procedures contained herein.

★ C. Organizations responsible for billing, reimbursement, and reconciliation should retain a canceled Volume for reference since certain material, e.g. salary tables, will not be repeated.

0102 TREASURY ACCOUNTS

010201. Treasury Accounts Applicable to FMS Trust Fund Operations. The Treasury Department has established the following Trust Fund receipt and expenditure accounts to be used to account for cash collections, budget authority, and cash disbursements resulting from the FMS Program:

★ A. Cash Receipts. Cash collected for sections 21, 22, and 29 sales of the AECA is deposited into Treasury Account 8242.001, "Deposits, Advances, Foreign Military Sales, Executive." Cash collections into this account include cash transfers from appropriations provided by the U.S. Government to finance section 23 credit sales and the proceeds of section 24 guaranteed commercial loans. Departmental Treasury reports reporting the status of collections will reflect account 8242.001 and are listed in the Treasury Financial Management Service system under Line Code 1389, "Proprietary Receipts from the Public."

B. Budget Authority. The budget authority resulting from FMS orders is recognized in Treasury Account 97-11X8242, "Advances, Foreign Military Sales, Executive." Budget authority is recognized only to the extent it is estimated that orders will be executed during a year. The portion of the order which cannot be executed is classified as an uncommitted acceptance.

C. Cash Expenditures. Cash disbursements to contractors (when direct cite procedures are used) and to DoD Components for services, items from inventory, and procurements financed by DoD appropriations/fund accounts are made from account 97-11X8242, "Advances, Foreign Military Sales, Executive."

010202. Treasury Accounts Applicable to Appropriations Made Available to Finance Credit Sales and Guaranties Under Sections 23 and 24 of the AECA

A. Receipt and Utilization of Appropriations.

★ 1. Account 11X4121, "Foreign Military Loan Liquidating Account, Funds Appropriated to the President," was established to record the receipt and use of funds appropriated by the Congress to finance section 23 credit sales and section 24 guaranties for pre-1992 loan obligations.

★ 2. Account 11(fiscal year)1085, "Foreign Military Financing, Direct Loan Program Account, Funds Appropriated to the President," was established to record the appropriation that subsidizes (the estimated long term cost to the U.S. Government) the post-FY 1991 foreign military direct loan obligations.

★ 3. Account 11X4122, "Foreign Military Financing, Direct Loan Financing Account, Funds Appropriated to the President," receives the subsidy cost payments from the program account, and includes all other cash flows to and from the U.S. Government resulting from post-1991 foreign military direct loans.

★ 4. Account 11(fiscal year)1082, "Foreign Military Financing Program, Grants, Funds Appropriated to the President," was established to record the receipt and use of funds appropriated by the Congress to finance, by grant, U.S. defense sales to selected foreign friends and allies, and primarily through the FMS program.

★ B. Cash Collections. The following accounts are used for collections made from foreign countries as a result of credit sales and guaranties.

★ 1. Account 11X4121, "Foreign Military Loan Liquidating Account, Funds Appropriated to the President." This account issued to collect the country's repayments to the Defense Security Cooperation Agency (DSCA) for default payment made by the DSCA to the Federal Financing Bank or commercial banks holding loans guaranteed by the DSCA for pre-1992 loan obligations.

★ 2. Account 11X4122, "Foreign Military Financing, Direct Loan Financing Account, Funds Appropriated to the President." This account is used for collections of the countries' repayments for post-1991 direct loan obligations.

0103 TYPES OF FINANCING

010301. General. There are two types of financing associated with FMS: reimbursable and direct cite. The detailed budgeting and accounting requirements for each type are discussed throughout the remainder of this Volume.

★ 010302. Reimbursable Financing. Section 21 sales and those section 22 sales of the AECA for which the President has determined it is in the national interest to bill for defense articles and services on or after delivery (deferred payment), shall be accomplished using reimbursable financing. In other words, if deferred payment is authorized, then the appropriation accounts must be used to initially finance any outlays until FMS customer payment is made.

010303. Direct Cite Financing. New procurements initiated as a result of FMS orders under sections 22 and 29 of the AECA (except as exempted above) should be accomplished to the maximum extent feasible and appropriate through direct citation of the FMS Trust Fund (97-11X8242) on applicable contractual documents.

010304. Accounting Classification Codes of the FMS Trust Fund. Accounting classification codes of the FMS Trust Fund are shown in Table 1-1.

FMS TRUST FUND ACCOUNTING CLASSIFICATION CODES

<u>Appropriation/ Limit</u>	<u>Agency Code</u>	<u>Agency Name</u>
97-11X8242.XXX1	B	Army
97-11X8242.XXXC	C	Defense Information Systems Agency
97-11X8242.XXX2	D	Air Force
97-11X8242.XXXG	G	Defense Finance and Accounting Service
97-11X8242.XXXX	K	Marine Corps
97-11X8242.28XX	P	Navy and Marine Corps (MISIL)
97-11X8242.XXXX	P	Navy (STARS)
97-11X8242.XXX9	Q	Defense Security Cooperation Agency
97-11X8242.XXXE	E	U.S. Army Corps of Engineers
97-11X8242.XXXM	M	Army - Other
97-11X8242.XXXR	R	Defense Logistics Agency
97-11X8242.XXXU	U	National Imagery and Mapping Agency
97-11X8242.XXXV	V	Defense Contract Audit Agency
97-11X8242.XXXW	W	Defense Advanced Research Projects Agency
97-11X8242.XXXZ	Z	Defense Threat Reduction Agency

Table 1-1

SUMMARY OF MAJOR CHANGES TO DoD 7000.14-R, VOLUME 15, CHAPTER 1 SECURITY ASSISTANCE POLICY AND PROCEDURES			
PAGE	PARA	EXPLANATION OF CHANGE/REVISION	PURPOSE
1-1	010102	Deleted reference to DoD Instruction 7290.3, Foreign Military Sales Finance and Accounting revised cost factors is available for reconciliation.	Instruction previously canceled
1-1	010103	Updated list of organizations.	Update
1-2	010104.C.	Reference updated to "DoDFMR."	Update
1-3	010105.B. 3./4.	New page numbering.	Regulation Stds
1-3	010105.C.	"DoDFMR" will be published and distributed on the internet. Interim changes may be issued via memorandum by USD(C).	Update
1-3	010106	Revision of method for requesting changes.	Update
1-4	010107.C.	Requirement to retain copies of canceled volumes added to ensure information concerning text clarified.	Internal control /Protect USG/ Reconciliation
1-4	102	Old section 0102 was moved to Chapter 7; section deleted.	Update
1-4	010201.A.	Treasury requirement to include point designation on the receipt account symbol (Ltr 29 Sep 93)	Update
1-4	010201.A.	Reference updated.	Update
1-4 and 1-5	010202.A/ B.	Revised information on receipt and cash collection accounts.	Update
1-5	010202.A	Loan and credit account information updated.	Update
1-5	010202.B.	Account information updated and new paragraph added.	Update
1-6	010303.A./ B.	Deletion of these old paragraphs since account 11X4117 is fully liquidated and has been eliminated from the Treasury's Federal Accounts Symbols and Titles.	Update

CHAPTER 2

FINANCE

0201 INTRODUCTION

020101. Objectives. The objectives of the policies set forth in this chapter are to assure that all Letters of Offer and Acceptance (LOAs) which have been accepted by FMS customers are brought under full accounting control and that budget authority is released for execution in the year in which contracts to fill customer requirements will be awarded, articles from inventory will be released to common carriers/the Defense Transportation System, or DoD in-house services will be performed. The chapter also provides procedures covering issuance of obligational authority related to FMS case execution and FMS administrative and contract administration services.

020102. Responsibilities

A. Defense Security Cooperation Agency (DSCA). It is the responsibility of the DSCA to prepare annual budget requests for the FMS Trust Fund obligational and outlay authority necessary to support the FMS program. The DSCA reviews and approves budgets for the FMS administrative charge/logistics support charge and Security Assistance Organizations and target estimates for contract administration services.

B. Implementing Agency. It is the responsibility of the DoD Component that prepares individual LOAs, hereinafter referred to as the Implementing Agency, to assure: (1) estimated prices in LOAs meet DoD pricing requirements, (2) LOA payment schedules are accurate and meet DoD payment requirements, (3) a realistic time-phased plan is developed for execution of LOAs upon FMS customer acceptance, (4) a prepositioned request for the obligational authority -- which will be required to initiate performance of the LOA -- is submitted to the Deputate for Security Assistance, Denver Center (DFAS-DE/I), (5) sufficient anticipated appropriation/fund reimbursable authority is included in the Defense budget, and (6) appropriation/ fund budget execution records accurately reflect the status of the reimbursable FMS program.

C. The Deputate for Security Assistance (DFAS-DE/I). It is the responsibility of the DFAS-DE/I to: (1) record budget authority resulting from accepted LOAs in the FMS Trust Fund accounting system, (2) maintain FMS Trust Fund budget execution records, (3) approve DoD Component requests for FMS obligational authority in a timely manner, and (4) obtain cash advances from FMS customers necessary to liquidate obligations resulting from the use of the budget authority created by the FMS program.

020103. Source Documents. FMS Budget Authority is created through preparation and processing of three formats and two forms:

A. "United States of America Letter of Offer and Acceptance" (LOA). This format, or its equivalent when a deviation has been authorized by the DSCA, is the basic source document which may ultimately result in the creation of FMS budget authority. One of the more common equivalent documents is the Letter of Intent (LOI). The LOA does not in and of itself create budget authority in either the FMS Trust Fund or in a DoD appropriation/fund account. The LOA was revised effective June 1, 1992. The previous version of the form was the DD Form 1513, "United States Department of Defense Offer and Acceptance". Samples of both the old form and the new format are at Tables 2-1 and 2-2. Instructions for preparing the LOA are contained in the SAMM [reference (c)].

B. "United States of America Amendment to Letter of Offer and Acceptance" and "United States of America Modification to Letter of Offer and Acceptance." The amendment is designed to obtain FMS customer acceptance of a scope increase. The modification is a notification document to alert FMS customers of within-scope cost increases, cost decreases, or other minor changes to the program. These documents are used to modify the original LOA and provide the basis for creation of additional FMS Trust Fund budget authority. Samples of the new formats are at Tables 2-3 and 2-4. The old forms which were used prior to June 1, 1992, the DD Form 1513-1, "United States Department of Defense Amendment to Offer and Acceptance" and DD Form 1513-2, "United States Department of Defense Notice of Modification of Offer and Acceptance," are included at Tables 2-5 and 2-6. Amendments and modifications written in the new formats do not alter the terms and conditions of the original DD Form 1513.

C. DD Form 2061, "FMS Planning Directive." This form or automated equivalent is prepared and maintained by the installation tasked by the implementing agency to prepare a LOA. The form is a working paper which serves three major purposes: (1) it provides for the identification of all of the cost elements included in prices reflected on the LOA and thereby helps to assure the case is priced in accordance with DoD pricing policies, (2) it provides a time-phased plan for execution of the LOA upon FMS customer acceptance, and (3) it identifies the appropriations/funds which will be used to finance new procurement or which will realize earned reimbursements through delivery of items from inventory or provision of DoD in-house services. A sample form is at Table 2-7. Instructions for preparing and processing the forms are contained in section 202.

D. DD Form 2060, "FMS Obligational Authority." This form or automated equivalent is prepared based upon data reflected in the DD Form 2061. Part A of the form is prepared at the FMS case level and is the basis for case-level control of obligational authority. Part B of the form identifies the appropriations/funds which have been or will be used to finance the cases reflected in Part A. For reimbursable orders Part B is submitted to the DFAS-DE/I in accordance with paragraph 030301. The DD Form 2060 may be prepared on either an individual case basis or on a multiple case basis. The DD 2060 also is used to convey OA for DoD Components' FMS administrative expenses, logistics support expenses, and contract administration and audit expenses. A sample form is at Table 2-8. Instructions for preparing and processing the form are contained in section 202. Issuance of Budget Authority must be authenticated by manual or electronic signature.

020104. Recognition of Budget Authority by the FMS Trust Fund

A. Establishment of FMS Trust Fund Budget Authority. All accepted LOAs, amendments, and modifications are to be returned by FMS customers to the DFAS-DE/I. Upon receipt of a DD Form 2060 and within the time-frames established by paragraph 020105, the DFAS-DE/I shall review FMS case-level accounting records to determine that: (1) the case is valid, (2) the FMS customer has deposited necessary cash in advance to support the FMS case, and (3) the requested obligational authority does not exceed the dollar values established in the LOA and any applicable amendments or modifications. If these three requirements are met, the DFAS-DE/I shall create FMS Trust Fund budget authority, approve the DD Form 2060, and issue an RBF transaction.

B. Direct Citation. The DD Form 2060, or automated equivalent, shall be used to request commitment/obligation authority for direct cite of the FMS Trust Fund. The DD Form 2060 will be used as a control device, and commitments/obligations shall be limited to the dollar value of approved DD Forms 2060. The accounting procedures will vary depending upon whether detailed contract accounting is performed by the DSCA or by a Military Department.

020105. Recognition of FMS Reimbursable Budget Authority in DoD Appropriation/Fund Accounts

A. Trust Fund Orders for Reimbursable Work. The LOA, amendment, and modification or approved substitute documents do not represent reimbursable orders to performing DoD Components. The approved DD Form 2060, or automated equivalent, is the reimbursable order. The DD Form 2060, Part A, specifies the value of orders which may be credited to appropriations by a DoD Component for each case for a fiscal year. The obligation authority amount for each case may not be exceeded. Reporting violations of this administrative limitation will follow the procedures in DoD Directive 7200.1, "Administrative Control of Appropriations within the Department of Defense" [reference (d)], Volumes 4 and 14 of this Regulation, and section 212 of this Volume.

★ B. When authority to accept reimbursable orders is subject to apportionment, obligations on a reimbursable program may not exceed apportioned amounts of anticipated reimbursement. In the event any portion of approved DD Form 2060 reimbursable budget authority is in excess of apportioned amounts for anticipated reimbursable orders, the excess portion cannot be obligated until an additional apportionment of anticipated reimbursable orders is requested and received through the reapportionment process. A summary of accounts which are subject to apportionment follows:

1. Procurement Accounts - All reimbursable programs are specifically apportioned.
2. R&D Accounts - All reimbursable programs for the Air Force and the Defense Agencies are specifically apportioned. Army and Navy reimbursable programs are

automatically apportioned.

3. Military Pay Accounts - All reimbursable programs for the Army and the Air Force are specifically apportioned. The Marine Corps and the Navy reimbursable programs are automatically apportioned.

4. Operation & Maintenance Accounts - All reimbursable programs are automatically apportioned except for the Defense Agencies.

5. Military Construction Accounts - All reimbursable programs are specifically apportioned except for the Army and the Navy, which are automatically apportioned.

6. DoD Working Capital Funds - Reimbursable programs are partially apportioned. Consult OUSD(C) P/B Revolving Funds Directorate for further guidance.

C. Apportionments and reappportionments for reimbursable programs must be requested by appropriation accounts and fiscal year. An appropriation which is available for obligation for more than one year requires an apportionment for anticipated reimbursable orders in the first year of availability which is to be reduced to the value of orders actually received in the first year. In the subsequent years of availability, a reappportionment for anticipated reimbursable orders is required to accept customer orders which fund within-scope price increases. The reappportionment request for anticipated reimbursable orders in the final year of availability is especially critical because any unused amounts in the reappportionment are automatically available for acceptance of additional reimbursable orders necessary to fund within-scope price increases after the appropriation has lapsed. It should be noted that an apportionment or reappportionment for anticipated reimbursable orders does not constitute authority to incur obligations. The actual customer order must be received and recorded in appropriation accounting records before applicable budget authority may be used.

D. The process by which budget authority is generated is graphically displayed in Table 2-9. The table depicts the relationships among the forms and formats as discussed in the above paragraphs as well as relationships among organizations and the FMS customer at various stages of processing.

★ 020106. FMS Integrated Control System Documents. Table 2-15 is an example of the automated RBI/RBF interface transactions used to notify the DFAS-DE/I of budget authority (BA) request and approval. The DFAS-DE/I is authorized to establish budget authority up to 100 percent of cumulative value of the LOAs, amendments, and modifications. Authority for the contract administration services (CAS) charge and the logistics support charge (LSC) are not distributed to the IAs. Specific details on how to use these transactions are contained in the FMS Integrated Control System (FICS) document.

★

UNITED STATES OF AMERICA LETTER OF OFFER AND ACCEPTANCE

United States of America Letter of Offer and Acceptance (LOA) [BD-P-BLX]			
Based on [BANDEF ltr 2/265 of 10 Apr 92]			
Pursuant to the Arms Export Control Act, the Government of the United States (USG) offers to sell to [the Government of Bandaria, Office of the Naval Attache, 252 Massachusetts Ave., NW, Washington, DC 20036] the defense articles or defense services (which may include defense design and construction services) collectively referred to as "items", set forth herein, subject to the provisions, terms, and conditions in this LOA.			
This LOA is for [Technical Services for the Standard Missile Program.]			
Estimated Cost: [\$1,030,000]		Initial Deposit: [\$268,750]	
Terms of Sale: [Cash prior to delivery/dependable undertaking.]			
This offer expires on [22 July 1992]. Unless a request for extension is made by the Purchaser and granted by the USG, the offer will terminate on the expiration date.			
This page through page [4], plus Letter of Offer and Acceptance Standard Terms and Conditions attached, are a part of this LOA.			
The undersigned are authorized representatives of their Governments and hereby offer and accept, respectively, this LOA:			
_____ U.S. Signature	[30 May 92] Date	_____ Purchaser Signature	_____ Date
[A. R. Smith [Director]] _____ Typed Name and Title	_____ Typed Name and Title		
[Navy Intl Prgms Office] _____ Implementing Agency		_____ Agency	
_____ DSAA		_____ Date	
Information to be provided by the Purchaser:			
Mark For Code _____, Freight Forwarder Code _____, Purchaser Procuring Agency Code _____, Name and Address of the Purchaser's Paying Office			
_____ _____

**UNITED STATES OF AMERICA AMENDMENT TO LETTER OF
OFFER AND ACCEPTANCE**

United States of America

Amendment to Letter of Offer and Acceptance

[BD-P-BLX]

Based on [BANDEF ltr 2/343 of 12 Aug 92]

Pursuant to the Arms Export Control Act, the Government of the United States (USG) offers to amend the Letter of Offer and Acceptance (LOA) identified above for the purchase of defense articles, defense services, or both. Other provisions, terms, and conditions of the original LOA remain unchanged.

This Amendment is for: [Extends Basic LOA Item 1 period of availability . Purchaser request, extends period of performance for 12 months. Basic LOA accepted 18 Jul 92.]

Estimated Cost: [\$1,545,000] Initial Deposit: [\$134,375]
Terms of Sale: [Cash prior to delivery/dependable undertaking.]

This offer expires on [5 December 1992]. Unless a request for extension is made by the Purchaser and granted by the USG, this offer will terminate on the expiration date.

This page through page [3] attached are a part of this Amendment.

The undersigned are duly authorized representatives of their Governments and hereby respectively offer and accept this Amendment:

_____	[5 Sep 92]	_____	_____
U.S. Signature	Date	Purchaser Signature	Date

**UNITED STATES DEPARTMENT OF DEFENSE NOTICE OF MODIFICATION OF
OFFER AND ACCEPTANCE (DD FORM 1513-2, CONTINUED)**

(29) CONTINUATION

REMARKS

1. DD Form 1513-2 is utilized to record modifications to an existing DD Form 1513 and any related amendments thereto, but only for those modifications which do not constitute a change in scope. Modifications appropriate for DD Form 1513-2 include all notifications of price increases and related changes in payment schedules.
2. Changes in scope of a DD Form 1513 require a formal amendment, utilizing DD Form 1513-1. Such changes are those which affect the type or number of major items and/or services to be provided or which significantly alter system configuration or functions. Such changes must be made by utilization of DD Form 1513-1.
3. DD Form 1513-2 does not require acceptance by the recipient country (customer) but merely acknowledgement of receipt. (DD Form 1513-1 does require acceptance).
4. All terms and conditions of an existing DD Form 1513 and any related amendments thereto not specifically noted to be modified by a DD Form 1513-2 are understood to remain unchanged and in effect.

GENERATION OF BUDGET AUTHORITY (NEW CASES)

Table 2-9

0202 PREPARATION AND PROCESSING OF DD FORMS 2061 AND 2060 FOR OTHER THAN COOPERATIVE LOGISTICS SUPPLY SUPPORT ARRANGEMENTS (CLSSAs)

★ 020201. General. DD Forms 2061 and 2060 shall be prepared for each case and updated as necessary. The manual forms or automated equivalent are required for all cases in the process of implementation and for all new cases that have been submitted to FMS customers for acceptance. The DD Form 2061 reflects detailed pricing elements, planned financing appropriations (or direct citation), obligational authority required for the current year, and an estimate of obligational authority for the budget year. The DD Form 2061 and DD Form 2060 shall be developed initially at the time the LOA data is prepared. The DD Form 2060 shall be included with the LOA package and the DD Form 2061 retained by the implementing agency as work paper backup for the LOA package. Activities, from whom articles or services will be furnished in fulfilling case requirements, shall provide the case manager the necessary data to accomplish his or her responsibilities. The case manager must ensure that all applicable nonrecurring research, development and production costs are included in the LOA package and identified for reimbursement to the appropriate Miscellaneous Receipts Account in the DD Form 2060, Part B. The initial DD Form 2061 may be an abbreviated financial analysis. However, as execution begins the DD Form 2061 must be expanded to encompass all required cost elements and data. DD Forms 2061 and DD Form 2060 shall also be prepared:

A. In support of requests for amendments and modifications reflecting financial impact.

B. In support of price changes of less than 10 percent of the estimated cost of articles and services (utilizing the most recently approved document).

C. In support of significant variation in performing accounts discovered subsequent to case implementation. "Significant" will be interpreted as \$100,000 between reimbursable accounts or between direct cite and reimbursable accounts.

D. In support of changes in current year obligational authority (OA) requirements within the net case value as reflected on the most recently approved DD Form 2061 and DD Form 2060.

E. As necessary, to ensure adequate OA is available in the budget year before commencement of that year.

F. At case closure.

020202. Preparation of DD Forms 2061 and 2060. All DD Forms 2061 and 2060 or automated equivalents are cumulative documents. Therefore, case managers shall maintain an audit trail that will relate each form to its predecessor.

A. To ensure positive control over the flow of documentation, the case managers shall assign and maintain a system of control numbers, composed of the FMS customer

country code, case designator, Julian Date, and serial number; for example, BC-ADK-79181 03. Specific guidance on the construction of the control number is provided in Table 2-10.

B. All amounts on DD Form 2061 and DD Form 2060 will be in dollars and cents (United States currency).

C. Before the end of each fiscal year, unless real time DD Form 2060 procedures are in effect, the implementing agency shall submit a consolidated DD Form 2060 roll-up to the DFAS-DE/I requesting budget year obligational authority. This roll-up of case data will be based on information taken from Column 19 "Budget Year () Funding Plan," of the DD Form 2061 and is necessary to ensure that case execution is not delayed due to funding problems.

D. Each case manager preparing the year-end DD Form 2060 shall identify the obligational authority requirements through the end of the upcoming fiscal year. If it is determined that the sum of the budget year, current year, and prior year requirements exceed the case materiel value, the case manager shall initiate action for the processing of a case amendment, modification, or less-than-10 percent increase, as appropriate.

E. In addition, case managers shall scrutinize financial performance on a continuing basis to ensure the availability of sufficient obligational authority for both the current fiscal year and completion of the case.

F. Tables 2-10 through 2-14 provide procedural guidance and examples to be used preparing DD Form 2061 and 2060 or automated equivalent. Table 2-10 shows DD Form 2061 preparation procedures. The various pricing elements and related appropriations and funds required to prepare a DD Form 2061 are listed and explained in Table 2-11. Table 2-12 contains examples of DD Form 2061 pricing element and funding entries for typical FMS cases. Procedures for completing a DD Form 2060 are in Table 2-13 and an example of a completed DD Form 2060 is illustrated in Table 2-14.

G. Table 2-15 describes the automated RBI/RBF Interface Transaction used to report, request, and approve budget authority from the implementing agencies to the DFAS-DE/I. This procedure is the primary means of transmission of budget information ensuring positive control of data.

020203. Prior Versions of LOAs. Instructions on the following pages are for the illustrative DD Form 2061 used in this Volume and are keyed to the current versions of the LOA. When using older versions of the form, the block numbers will vary.

★ **DD FORM 2061 COMPLETION PROCEDURES** (Table 2-10)

Note: The term "LOA" as used herein refers to the most recent LOA, amendment, or modification accepted or acknowledged by the foreign government.

<u>Line/ Col.</u>	<u>Description</u>	<u>Procedures</u>
1	FMS Case Number BC-P-ADK	Perpetuate LOAs. Use the format in Table 2-12 or an automated equivalent.
2	Date LOA Submitted to Foreign Government	Obtain from date of LOA.
3	Date Offer Expires	Obtain from expiration date of LOA.
4	Date Case Accepted by Foreign Government.	Obtain from acceptance date of LOA.
5	Total Case Value	Must agree with total of Column 14 and "Estimated Total Costs" of LOA.
6	Control Number	Consists of country code, case designator, Julian date (YYDDD), and a two-digit sequential number. Initial DD Form 2061 will use sequential number 01, with each succeeding submission using 02, 03, etc. The Julian date must agree with the data entered on line 7. Use the format BD-ADK-79346 01.
7	Date Prepared	Date formally prepared. Must agree with Julian date used in control number. Use the format 12 Dec 1998.
8	DoD Component/ Case Manager	Enter the DoD Component, followed by the case manager's name, organization, and DSN number, that is, Navy, J. Smith, NAVAIR, 222-7890
9	Case Item Number	This entry must match the entries on the LOA.
10	Item Description	This entry must match the item description on the LOA. Abbreviated titles should be used. However, when information is classified, enter "Classified-Refer to LOA."
11	Quantity	This entry must match exactly the entries on the LOA. Columns 9, 10, and 11 should show no further breakdown than is or will be reflected on the LOA.
12	Pricing Elements	This column will be used to provide breakdown of the cost of the article or service by pricing element using codes provided by Table 2-11.
13	Financing Approp- riation	For each pricing element, Column 12, enter the first impacted appropriation (the financing appropriation) or

<u>Line/Col.</u>	<u>Description</u>	<u>Procedures</u>
		fund for reimbursable actions; or enter "DC" for Direct Citation (for example, when the FMS Trust Fund will be directly cited on obligation documents). More than one appropriation may be entered for some pricing elements. Annual appropriations will reflect the applicable fiscal year.
14	Estimated Cost	Enter the estimated cost (priced in accordance with Chapter 7) for each financing appropriation, Column 13. For each item number with multiple entries in Columns 13 and 14, enter "Item No. Costs" in Column 13 after the last entry and the sum (subtotal) of the estimated costs for that item in Column 14. This sum must equal the line item total cost to be reflected on proposed LOA, amendment, or modification. For less than 10% increases, this amount will reflect the adjusted cost of the article or service. For each item number citing a single financing appropriation, the entry in Column 14 should be the cost of the item.
15	Direct Cite/Obligational Authority received to date most recent prior fiscal year (e.g. FY97 during FY98)	Leave blank if case was not implemented in a prior fiscal year. Enter, by financing appropriation Column 13, the amount of obligational authority issued by the DFAS-DE/I through the end of the prior fiscal year. Column 15 should be adjusted for withdrawals of unused obligational authority at the end of the previous year.
16	Funding Required to Date (same fiscal year entered in Column 15)	Leave blank if case was not implemented in a prior fiscal year. Columns 16a, 16b, and 16c provide a horizontal breakdown of amounts entered in Column 16d.
16a	Obligations Incurred	
16b	Unobligated Commitments	
16c	Items from Stock	
16d	TOTAL	Enter, by financing appropriation in Column 13, the obligational authority committed through the end of the prior fiscal year.
<p><u>Note:</u> On successive DD Forms 2061 in the same fiscal year, Columns 15 and 16 are constant and reflect the status by financing appropriation as of September 30 of the prior fiscal year. These entries, in total, must agree with the entries in Columns 7 and 8, respectively, of the annual consolidated DD Form 2060.</p>		
17	Current FY () Funding Plan	Enter the current fiscal year in the parentheses, e.g., (1998). For a new case in which obligational authority will not be required until a subsequent fiscal year, Column 17 should

Table 2-10 (Continued)

<u>Line/Description</u> <u>Col.</u>	<u>Procedures</u>
	reflect that subsequent year as the current fiscal year. Enter, by financing appropriation, the current FY obligational authority requirements. On successive DD Forms 2061, these figures are cumulative.
18 Remaining Program Value	Enter, by financing appropriation, the result of Column 14 minus the "total" of Column 16 minus column 17. This entry must not be a negative amount.
19 Budget Year () Funding Plan	Enter the fiscal year following the year shown in Column 17. Enter, by financing appropriation, the budget year obligational authority requirements. Amounts shown in Column 19 must not exceed the amounts shown in Column 18.
SUBTOTALS	
If the DD Form 2061 is prepared in support of a request for an increase of less than 10%, the following two lines will also be entered.	
10 and Subtotal 14-19	Enter "Subtotal" and the vertical sums of Columns 14 through 19. Check sums horizontally. Columns 14=16+17+18.
10, 14, Less than 10% and 18 increase	Enter "Less than 10% increase." In Columns 14 and 18, enter the amount of the cumulative net increase in the total materiel/services value.
10 and Net Case Value 14-19	Enter "Net Case Value" and the vertical sums of columns 14 through 19. Column 14 should agree with the "Estimated Cost" of the LOA. Check sums horizontally. Columns 14=16+17+18.
10, PC&H (if applic- 12-14, able) and 18	Enter "PC&H (___%)," Pricing element "OS," and Financing Appropriation "TF." Columns 10, 14, and 18 should be completed with the proper rate and amount as computed in accordance with Chapter 7. PC&H charges were discontinued for DoD Working Capital Funds items effective October 1, 1990.
10, Admin (if applic- 12-14, able) and 18	Enter "ADMIN (___%)," Pricing element "OS," and Financing Appropriation "TF." Columns 10, 14, and 18 should be completed with the proper rate and amount as computed in accordance with Chapter 7.

Table 2-10 (Continued)

<u>Line/Col.</u>	<u>Description</u>	<u>Procedures</u>
10, 12-14, and 18	Transportation (if applicable)	Enter "TRANS (___%)," and/or Parc. Post (___%)," as appropriate, Pricing element "OS," and Financing Appropriation "TF." Columns 10, 14, and 18 should be completed with the proper rate(s) and amount(s) as computed in accordance with Chapter 7.
		<u>Note:</u> Different rates may be used if partial delivery was made prior to April 13, 1978. The rate to be charged is the rate in effect at the time of delivery.
10, 12-14, and 18	Stock issue asset use (if applicable) for cases implemented after Sep 30, 1979 and all DD Form 2060/2061 submissions subsequent to that date up to Nov 30, 1989)	Enter "SIAU (1%)," Pricing Element "AU," Financing Appropriation "TF." In Columns 14 and 18, enter the amount computed in accordance with Chapter 7. Discontinued November 30, 1989.
10 and 14-19	Total Case Value	Enter "Total Case Value" and the vertical sum of Columns 14 through 19 for "Net Case Value" and PCH&T, Admin, Storage, and SIAU. Check sums horizontally. Columns 14=16+17+18. Column 14 should match the "Total Estimated Cost" line of the LOA.
10	Summary	Enter "Summary:"
10, 14-19	Reimbursable Program	As applicable, enter "Reimbursable Program" in Column 10. Sum columns 14 through 19 for all entries with other than "DC" or "TF" in Column 13.
10, 14-19	Direct Cite Program	As applicable, enter "Direct Cite Program" in column 10. Sum columns 14 through 19 for all entries with "DC" in Column 13.

If the DD Form 2061 is prepared in support of a less than 10% increase, the following two lines will also be entered:

10, 14-19	Subtotal	Enter "Subtotal" in Column 10. Sum "Reimbursable Program" and "Direct Cite Program," Columns 14 through 19.
10, 14, and 18	Less than 10% increase	Enter "Less than 10% increase" in Column 10. In Columns 14 and 18, enter the negative amount of the cumulative net increase in the total materiel/services value.
10, 14-19	Net Case Value	Enter "Net Case Value" in column 10. Sum "Reimbursable Program" and "Direct Cite Program," or, if applicable, "Subtotal" and "Less than 10% increase," Columns 14 through 19.

Table 2-10 (Continued)

<u>Line/Col.</u>	<u>Description</u>	<u>Procedures</u>
------------------	--------------------	-------------------

10, 14, and 18	PCH&T, Admin, etc.	If applicable, enter "PC&H," "PCH&T," "Admin," "Trans," and "Storage" in Column 10. Sum Columns 14 and 18 for all entries with "TF" in Column 13.
10, 14-19	Total Case Value	Enter "Total Case Value" in Column 10. Sum "Net Case Value," "PC&H," "Trans," "PCH&T," "Admin," and "Storage" lines (as entered from above procedure) for Columns 14 through 19. Check sums horizontally. Columns 14=16+17+18. Check to insure that each column total matches the sum entered on the previous "Total Case Value" line.

Table 2-10 (Continued)

★ **PRICING ELEMENTS AND THEIR FINANCING APPROPRIATIONS (Table 2-11)**

<u>Pricing Element</u>	<u>Description</u>	<u>Appropriation or Fund</u>	<u>Description</u>
AT	Attrition 978242.8209	FMS Trust Fund	Funds collected to cover equipment damaged beyond repair by foreign students.
AU	Asset Use Charges/ Contractor Rental Payments	SDAF or Miscellaneous Receipt Account 3041, as applicable	Applied as a percentage of the direct costs being billed and is in lieu of separate computations for charges required to be applied in order to recover taxpayer investment (sunk cost) in inventory or facilities (see Chapter 7). Note: Discontinued effective with all deliveries reported to the DFAS-DE/I after December 1989.
CC	Contract Cost	Direct citation of FMS Trust Fund or applicable appropriation/fund symbol (see Chap 1)	Cost of defense articles or services being supplied from procurement.
CP	Services of Civilian Personnel	Applicable appropriation/fund (O&M, RDT&E, or DoD Working Capital Funds)	Cost of civilian personnel services (including cost of fringe benefits reimbursed to the performing account and accelerated for leave and holidays when applicable) (see Chapter 7).
CR	Civilian Retirement Funded by DoD	Applicable appropriation/fund (O&M, RDT&E, or DoD Working Capital Funds)	This is an optional code that identifies the cost of civilian retirement benefits reimbursable to the performing account. Computed on basis of prescribed acceleration factors (see Chapter 7). This cost element may be included as part of CP.
CD	Civilian Retirement Not Funded by DoD	Miscellaneous Receipt Account 3041	Cost of civilian retirement benefits not reimbursable to the performing account. Computed on basis of prescribed acceleration factors (see Chapter 7).
CS	Contract Audit Support (for FY of Performing 1980 and prior, applies to FMS and commercial contracts; after FY 1980, applies to commercial contracts only)	O&M Appropriation Activity	Audit costs incurred in the evaluation of a contractor bid proposal or the audit of claims for incurred costs.

Table 2-11

<u>Pricing Element</u>	<u>Description</u>	<u>Appropriation or Fund</u>	<u>Description</u>
CX	Contract Administration Service (in FY81, used in lieu of CS & QS)	Trust Fund (TF), centrally managed by the DFAS-DE/I	Cost of the contract administration tasks set forth in the FAR, subpart 42.3 [reference (g)] and audit.
EG	DoD Engineering Support	O&M Appropriation of Performing Activity	Government-provided engineering services that are required to solve problems encountered during the production run, or efforts to improve the item's capabilities to meet predetermined specifications.
FS	DoD Production, Testing, and Evaluation Support	O&M, RDT&E Appropriation, or DoD Working Capital Funds	Government production testing and evaluation costs to be recovered on a pro-rata basis over benefiting production run items.
LS	Logistics Support Charge (LSC)	Trust Fund (TF) centrally managed by the DFAS-DE/I	Cost of logistics support. Note: Discontinued for DoD Working Capital Funds items, on or after October 1, 1990.
MP	Services of Military Personnel	Military Personnel (MP) Appropriations	Cost of military personnel services based on standard composite pay rates (as accelerated for leave and holidays when applicable) (see Chapter 7). Includes retirement for FY 85 and subsequent.
MR	Retired Military Pay (Note: This pricing element applies to FY 84 and prior)	Miscellaneous Receipt Account 3041 FY 84 and prior. See MP for 85 and subsequent years	Cost of imputed military retirement determined by applying appropriate acceleration factor to military personnel services costs (see Chapter 7).
MX	Other Benefits (when applicable)	O&M Appropriation of Performing Activity	Cost for portion of quarters, subsistence, medical, and other personnel support costs not included in MP. Computed by applying appropriate acceleration factor to military personnel service costs (see Chapter 7).
OS	Other Support	"TF" for PCH&T, Storage and Admin. Other appropriations, as applicable.	Other costs not specifically defined. PCH&T does not apply to DoD Working Capital Funds items delivery reported on or after October 1, 1990.

Table 2-11 (Continued)

<u>Pricing Element</u>	<u>Description</u>	<u>Appropriation or Fund</u>	<u>Description</u>
QS	DoD Quality Assurance Support (For FY 1980 and prior, applies to FMS cases and to commercial contracts; after FY 1980 applies to commercial contracts only)	O&M Appropriation of Performing Activity	Government-applied quality assurance costs to be recovered either on the basis of individual items examined or on a pro-rata basis over benefiting production run items.
RD	R&D and non-recurring production recoupment	SDAF 11X4116 or Miscellaneous Receipt Account 3041, as applicable	Recovery of nonrecurring costs as specified by Chapter 7.
RF	Royalty Fees	SDAF 11X4116 or Miscellaneous Receipt Account 3041, as applicable	Collection of royalty fees.
RS	Special RDT&E	RDT&E Appropriation	Special RDT&E effort being accomplished specifically for the FMS customer.
SA	Articles obtained from inventory for SDAF	SDAF 11X4116	Sale SDAF items originally obtained from DoD inventories.
SD	Articles procured from contractors for SDAF	SDAF 11X4116	Sale of SDAF items obtained from procurement.
SF	Articles from Stock not requiring replacement	SDAF or Miscellaneous Receipt Account 3041, as applicable	Sale of assets not requiring inventory replacement.
SR	Articles from stock requiring replacement	Procurement Appropriation or DoD Working Capital Funds	Sale of materiel requiring inventory replacement as a result of sale.

Table 2-11 (Continued)

<u>Element</u>	<u>Description</u>	<u>Appropriation or Fund</u>	Pricing
			<u>Description</u>
TF	Charges applied by the DFAS-DE/I	Trust Fund (TF), centrally managed by DFAS-DE/I	Below-the-line cost on the LOA (PCH, administrative fee, transportation, etc.) PCH does not apply to DoD Working Capital Funds items delivery reported on or after October 1, 1990
TR	Training related expenses for formal training	Direct Cite or appropriation account	The expenses related to the conduct of formal training.
TX	Transportation	Applicable appropriation or fund	Costs for transportation when DTS is approved and used. The DFAS-DE/I applied transportation charges do not apply to DoD Working Capital Funds material effective October 1, 1990, for generic code L1A, and effective October 1, 1991, for generic code L1D and L1E.

Special Pricing Element Codes for Air Force Training Cases

AR	Air Force Reserve	Air Force Reserve Appropriation	That portion of training reimbursement passed to Air Force Reserve.
DM	Depot Maintenance	DoD Working Capital Funds	That dollar portion of training course cost identified for depot maintenance.
NG	Air National Guard	National Guard Appropriation	That portion of training reimbursement passed to National Guard.
PL	Aviation POL	DoD Working Capital Funds	That dollar portion of training course cost identified POL.
TC	Reimbursement to a Foreign Government	Country TF	Third Country training with reimbursement from the second country.
XN	Reimbursable Orders to Navy	Direct Cite or Navy Appropriation Account which accepted order	That portion of the training case passed to Navy for execution.
XA	Reimbursable Orders to Army	Direct Cite or Army Appropriation Account which accepted order	That portion of the training case passed to Army for execution.

Table 2-11 (Continued)

<u>Element</u>	<u>Description</u>	<u>Pricing</u>	
		<u>Appropriation or Fund</u>	<u>Description</u>
XX	Reimbursable Orders to Defense Agencies	Direct Cite or Agency Appropriation Account which accepted order	That portion of the training case passed to Defense Agency for execution.
DI	Reimbursable Orders to DISAM	Direct Cite or AF Appropriation Account which accepted order	That portion of the training case passed to DISAM for execution.
M2	Military Personnel PCS	Military Pay Appropriation	Military personnel PCS costs incurred to accomplish FMS training case.
IP	Information Program Funds	Direct Cite or Appropriation Account which accepted order	That portion of the training case which funds the information program.
ML	Minor Construction	O&M Appropriation	That portion of the training case applicable to minor construction.

DD FORM 2060 COMPLETION PROCEDURES (Table 2-13)

<u>DD Form 2060 Data Element</u>		<u>Information Source</u>	<u>Remarks</u>
<u>Line/Column # Description</u>			
	Type of Request	See remarks	Enter the designation of the document that occasioned the submission of the DD Form 2061 and 2060, e.g., LOA, modification, amendment, less than 10% increase, or DD Form 2061 Revision.
1	Performing Component	See remarks	Enter "Army," "Navy," or "Air Force."
2	Period Covered	Enter the fiscal year for which obligational authority is being requested, e.g., FY81	
<u>PART A</u>			
3	FMS Planning Directive Control No.	Obtain from line 6 of DD Form 2061	
4	Total Case Value	Obtain from "Total Case Value" line, Column 14, of "Summary" section of DD Form 2061. Also equals line 5, DD Form 2061.	
5	Amount to be Held in Trust Fund	Obtain from "PCH&T, Admin, and Storage, Column 14, in "Summary" section of DD Form 2061	PCH&T does not apply to DoD Working Capital Funds delivery reported on or after October 1, 1990. Storage charges do not apply to the FMSO I Part A on-hand DoD Working Capital Funds items.
6	Net Case Value	Computation: Column 4 - Column 5 = Column 6	This amount represents the total which will be provided the performing DoD Component for an FMS case.
7	Received	Obtain from "Net Case Value" line, Column 15, of the "Summary" section DD Form 2061	The entries in block 7, 8, and 9 are constant for a fiscal year and must agree with the entries on the annual consolidated DD Form 2060.

Table 2-13

DD FORM 2060 COMPLETION PROCEDURES (CONTINUED)

<u>DD Form 2060 Data Element</u>	<u>Information Source</u>	<u>Remarks</u>
<u>Line/Column # Description</u>		
8 Required	Obtain from "Net Case Value" line, Column 16 "Total," of the "Summary" section of the DD Form 2061	
9 Withdrawn	Computation: Column 7- Column 8= Column 9	Represents the amount of funds received in prior periods but not required for case performance. These amounts will be withdrawn from performing DoD Components.
10 & 11 Authority Required this Fiscal Year	Enter the fiscal year from line 2	
10 Reimbursable	Obtain from "Reimbursable Program" line, Column 17, of the "Summary" section of the DD Form 2061	Represents the amount of reimbursable obligation authority required for the current fiscal year.
11 Direct Cite	Obtain from the "Direct Cite" line, Column 17, of the DD Form 2061	Amounts in this column followed by a "(C)" represent direct citation delegation authority required for the current fiscal year. If blank, the request is for an allotment of funds for direct cite, with the implementing agency to be the accounting station.
12 Remaining Program	Computation: Column 6- [Column 8 + Column 10+Column 11]= Column 12. Should agree with "Net Case Value" line, Column 18, of the "Summary" section of the DD Form 2061	May be negative if type of request is for a less-than-10% increase.
13 Balance Brought Forward	N/A	
14 Case Total	N/A	

Table 2-13 (Continued)

DD FORM 2060 COMPLETION PROCEDURES (CONTINUED)

<u>DD Form 2060 Data Element</u>	<u>Information Source</u>	<u>Remarks</u>
<u>Line/Column # Description</u>		
15	Admin Expense	N/A
16	Total	Sum of entries by column
<u>PART B</u>		
17	Appropriation Title	Obtain from appropriate DoD Component directives Enter abbreviated title. Where the case is impacted by an increase of less than 10%, insert an additional line "Less-than-10% increase."
18	Account Symbol	Obtain from DD Form 2061, Column 13 Enter the first impacted (financing) appropriation or fund for reimbursement action; or enter "DC" where the Trust Fund is to be direct cited. Summarize into one line per account.
6	- Net Case Value	Obtain totals (by appropriation) from applicable column on DD Form 2061. Column 9 should be computed as Column 7-Column 8 Individual data under each column. Where the case is impacted by an increase of less than 10%, an appropriate negative entry will be shown in Column 6 and 12 as determined from Columns 14 and 18 of the DD Form 2061.
7	- Received	
8	- Required	
9	- Withdrawn	
10	- Reimbursable	
11	- Direct Cite	
12	- Remaining Program	
19	Balance Brought Forward	N/A
20	Obligational Authority	Enter totals (by column) for each applicable element Totals should reflect same data as DD Form 2060 summary data reflected in Part A.
21	Signature Block	To be completed by Appropriate DoD Component/Agency
22	Signature Block	To be completed by the DFAS-DE/I
23	Approval Control Number	To be completed by the DFAS-DE/I

Table 2-14 (Continued)

EXAMPLE OF RBI/RBF INTERFACE TRANSACTION DETAIL

Data Element Description and Element Abbreviation	Format/No. of Position	FICS TRC	Edit/Validations of: RBI Input--MILDEP to DFAS-DE/I RBF Feedback--DFAS-DE/I to MILDEP
Document Identifier Code (DIC)	X(3)	002	Must be RBI. If not, reject.
Case Budgetary Requirements (Input) Case Budgetary Requirements (Feedback)			"RBF" A machine generated mirror image of the RBI transaction appended by the Positive Transaction Reply Codes to become the RBF transaction.
Transaction Control No.(TCN) (YYMMDDNNNNNV)	X(13) 4-16	152	Must be numeric and equal to or less than the current date.
		249	Version Number (V) must be "0" if Action Code is "A" (add).
		248	Version Number (V) must be 1 thru 9 if Action Code is "C" (change) and must be one greater than suspense version number.
		251	If Action Code is "C" (change) or "D" (delete), Transaction Control Number (TCN)(excluding V). Must equal suspense file. (YYMMDDNNNNNV)
Action Code	X(1) 17	003	Must be "A", "C", or "D", otherwise invalid. A= Add; C= Change; D= Delete
Country Code (CC)	X(2) 18-19	037	Must equal 00 or 80 or must be on Country Code Table. If not reject.
Implementing Agency Code (IA)	X(1) 20	038	If Site Code = 5 or 6, IA code must be on IA Table.
Case Designator	X(3) 21-23	039	Must be a valid case; if not reject. If country code = 00 case must equal Axx, Mxx, or Lxx where A= ADM, M= MAG, L= LSC and "xx" is alpha-numeric characters equal to program year. If country code = 80 case must equal "CAS". Else case must be on the Active case control file (I) or closed (C) when case is a valid FMS case.
Amount OA Budgeted for Fiscal Year	S9(12) V99 24-37	160	Must be numeric (0-9). May be negative if making current year adjustment to a prior year, if not, reject.
FY Budgeted	X(2) 38-39	157	If country code = 80 or 00, FY budgeted must be alphanumeric. Spaces are not allowed.
		025	If country code not = 80 or 00, FY must be first prior (October only), current or first future (September only).
THE POSITIVE TRANSACTION CONTROL FEEDBACK CONTAINS THE ORIGINAL RBI TRANSACTION PLUS THE FOLLOWING DATA ELEMENTS FOR THE RBF TRANSACTION			
Transaction Reply Code (TRC)	X(15) 40-54		FEEDBACK TRANSACTIONS ONLY. This 15 character element is appended to the feedback format of all interface transactions by the recipient system. This area will contain 1 to 5, 3-digit transaction reply codes to communicate back to the originator system the results of processing the transaction. (Left justified/space filled).

Table 2-15

0203 PREPARATION AND PROCESSING OF DD FORMS 2061 AND 2060 FOR COOPERATIVE LOGISTICS SUPPLY SUPPORT ARRANGEMENTS

020301. General. Proper recognition and phasing of budget authority resulting from LOAs written to implement Cooperative Logistics Supply Support Arrangements (CLSSAs) create unique problems. Under these arrangements the customer funds the acquisition and maintenance of increments to normal DoD inventories and due-ins. Once these increments are established the customer is provided supply support with the same responsiveness as is provided to DoD military units. The applicable LOAs have the following three distinct financial subdivisions.

A. FMSO I, Part A. The FMSO I, Part A, represents the on-hand inventory level required in CONUS to support FMS requisitions to replenish in-country stocks. Normally, the on-hand level represents five months of demand. The cash necessary to establish on-hand inventory accompanies the accepted LOA.

B. FMSO I, Part B. The FMSO I, Part B, results in recognition of the contract authority necessary to award contracts for pipeline to support FMS customer demands. The concept is that the customer's requisition is filled from on-hand inventory acquired under the FMSO I, Part A. The inventory is then replaced by a delivery of a due-in from a contractor. Customer payments under the FMSO II provide the cash necessary to pay the contractor and establish new contract authority to award a contract for additional items--thus maintaining quantities in the pipeline. Because cash received from the FMSO II is used to pay for due-ins, the customer is not required to deposit cash in support of the FMSO I, Part B. However, billings against the FMSO I, Part B, are required if FMSO II demands are below expected levels. The FMSO I, Part B, normally represents 12 months of demand or the procurement lead-time whichever is greater.

C. FMSO II. The FMSO II is the annual consumption case. The FMSO II does not create budget authority until applicable requisitions are received (earned reimbursements) and customer cash is deposited in the financing appropriation account (collected). Upon shipment and collection, additional budget authority is recognized to maintain the pipeline created by the FMSO I, Part B.

020302. Preparation. The FMSO I is written in perpetuity and is modified only if the density of the end items to be supported changes or FMSO consumption patterns differ from expectations. The reimbursable budget authority resulting from acceptance of the FMSO I is credited to financing appropriations current at the time the contracts are awarded to increase on-hand and on-order quantities. The FMSO II is written annually, and the budget authority realized through operation of the FMSO II is credited to appropriations current at the time materiel is released from inventory in response to FMSO II requisitions. An example of an LOA written to implement a FMSO I and applicable DD Forms 2061 and 2060 are at Tables 2-16, 2-17, and 2-18, respectively. An example of an LOA written to implement a FMSO II and applicable DD Forms 2061 and 2060 are at Tables 2-19, 2-20, and 2-21, respectively.

DD Form 2060
1 Mar 79

Table 2-21

0204 PREPARATION AND PROCESSING OF DD FORMS 2060 FOR FMS ADMINISTRATIVE BUDGET AND LOGISTICS EXPENSE

★ 020401. General. A budget call for the FMS administrative charge will be issued by the DSCA. A DD Form 2060 requesting an allotment to fund actual FMS administrative expenses shall be prepared by a DoD Component upon receipt of the approved the DSCA budget for actual FMS administrative expenses. The initial DD Form 2060 shall request an allotment for the first quarter of the applicable fiscal year. Thereafter, DD Form 2060 shall be submitted prior to the start of each remaining quarter and at the end of the fiscal year. A total of five DD Forms 2060 are required. The deadline(s) for submission to the DFAS-DE/I of the DD Forms 2060 requesting allotment of administrative funds and logistics support funds is as follows: 10 September - 1st Quarter; 10 December - 2nd Quarter; 10 March - 3rd Quarter; 10 June - 4th Quarter; 20 October - End of Year Adjustment. The DSCA will then issue allocations of FMS administrative funds to DoD Components not later than the 20th day of the respective month. Administrative expenses shall be charged directly to the allotment received. Upon receipt of status of allotment reports, the DFAS-DE/I shall, based on organization code, debit the actual cost of administrative organizations to the FMS administrative charge account.

020402. Preparation. An example of the initial DD Form 2060 is contained in Table 2-22. The approved annual FMS Administrative Budget shall be entered in Part A, Column 6 for "Net Case Value." Column 11 shall reflect the allotment (OA/EA) required for the first quarter. Column 12 shall reflect the difference between Column 6 and Column 11. Table 2-23 contains an example of a follow-up DD Form 2060 (second quarter). Column 7, Part A, shall reflect the amount of OA/EA issued by the DFAS-DE/I in the first quarter; Column 8 the amount actually required; and Column 9, the difference between Column 7 and Column 8. The amount in Column 9 will be withdrawn and reissued as part of the second quarter's required allotment. Column 11 shall reflect the allotment (OA/EA) required for the current quarter (i.e., the second quarter). Column 12 is the difference between Column 6 and the sum of Columns 8 and 11 (i.e., total annual budget minus first quarter's actual OA/EA requirements and the second quarter's anticipated OA/EA requirements). For subsequent DD Forms 2060, Columns 7, 8, and 9 will represent cumulative amounts. The unobligated amount in Column 9 of the DD Forms 2060 for year-end will be available for withdrawal by the DFAS-DE/I.

020403. Year-End Report. Table 2-24 is an example of a completed year-end DD Form 2060. Part B of the second-through-fourth quarter DD Forms 2060, as well as the final DD Form 2060 at the end of the fiscal year (see Table 2-23 for the second quarter), also shall be completed. Part B shall contain the cumulative dollar amounts of the Trust Fund allotment used for issuing reimbursable order to appropriation accounts by appropriation and cumulative quarterly amounts directly cited to the FMS Trust Fund. Implementing agencies must ensure hardcopy reports agree with computerized submissions. No outstanding commitments should be reported.

Table 2-24

0205 PREPARATION AND PROCESSING OF DD FORMS 2060 FOR CONTRACT ADMINISTRATION SERVICES (CAS) PROVIDED BY DOD ON COMMERCIAL CONTRACTS

020501. General. New York Control Point of the Defense Logistics Agency (DLA-DCMC International) is the DoD central control point (CCP) for processing foreign country and international organization requests for DoD Contract Administration Services support of commercial contracts. The cases developed by the DoD Central Control Point (DoDCCP) are entered into the DFAS Program Budget and Accounting System (PBAS). The PBAS manages FMS cases and handles the issuances of obligational/expenditure authority. The DoDCCP also uses the PBAS for billing and collection purposes.

0206 PREPARATION AND PROCESSING OF DD FORMS 2060 FOR CONTRACT ADMINISTRATION COSTS INCURRED IN SUPPORT OF FMS CONTRACTS

020601. DD Form 2060 Processing. Paragraph 070405 prescribes a method for recovering the cost incurred in performing contract administration and contract audit on contracts awarded as a result of customer acceptance of an LOA.

★ A. Before actual contract administration and audit costs may be incurred, the DoD Component must establish a reimbursable order in the financing appropriation which will initially pay the actual cost of such services. DoD Components shall submit a letter to the DSCA Comptroller and to the DFAS-DE/I prior to start of the fiscal year. The letter shall specify the amount of anticipated reimbursements for services to be performed during the new fiscal year. The letter to DFAS-DE/I shall be accompanied by a DD Form 2060 which contains in Column 6, Part A, the amount of anticipated reimbursements specified in the letter. Part B of the DD Form 2060 shall list the appropriations and anticipated reimbursements to each. Upon approval of the budget estimate by DSCA, the DFAS-DE/I will approve the DD Form 2060.

B. The approved DD Form 2060 shall constitute the reimbursable order to perform contract administration (or audit) on FMS contracts. There will be no requirement to update this DD Form 2060 until the end of the fiscal year unless there is a change before that time. The year-end DD Form 2060 shall show the actual cost incurred by appropriation. The DFAS-DE/I will use this DD Form 2060 as the basis for withdrawing obligational authority for unobligated balances.

C. Tables 2-25 and 2-26 illustrate the initial and year-end DD Form 2060.

Table 2-26

0207 BUDGET EXECUTION

020701. Objectives. This section establishes the budget execution requirements which are applicable to the FMS program. Specific objectives are to assure that:

A. Mandatory budget execution reports are submitted to the Office of Management and Budget or the Department of the Treasury in a timely manner and that the reports accurately reflect data recorded in accounting records.

B. Unnecessary FMS Obligational Authority is officially withdrawn from all organizations participating in execution of FMS cases at the end of each fiscal year.

C. FMS case records maintained by implementing agencies are in agreement with the DFAS-DE/I throughout the life of an FMS case.

020702. Responsibilities

A. The DFAS-DE/I is responsible for providing accounting data on FMS Trust Fund operation to DoD Components.

B. The DSCA is responsible for monitoring the FMS program and submission of required FMS Trust Fund budget execution reports.

C. Implementing agencies and supporting DoD Components are responsible for:

1. Conducting year-end reviews of the unobligated FMS reimbursable program to assure unnecessary budget authority is identified and returned to the FMS Trust Fund.

2. Assuring that the FMS reimbursable program is properly reported in appropriation/Defense Working Capital Fund budget execution reports.

3. Submitting financial execution reports accurately and on a timely basis.

4. Reconciling implementing agency FMS case records to the DFAS-DE/I case level accounting records on a periodic basis.

5. Preparing Case Closure Certificates as soon as possible after the case is supply complete but no longer than 24 months after such occurrence.

0208 FMS TRUST FUND BUDGET EXECUTION REPORTS

★ 020801. Execution Reports. There are eight required reports on FMS Trust Fund operations: (a) a monthly SF-133, "Report on Budget Execution for 11X8242, Advances Foreign Military Sales Executive;" (b) a monthly SF-133, "Report on Budget Execution for 11X0085, Offsetting Trust and Receipts, Military Assistance, Executive;" (c) a monthly ACCT-RPT(M)1002, "Report on Appropriations Status by Fiscal Year Programs and Subaccounts;" (d) a semi-annual "Status of Contract Authority" report, TFS Form 7304 on 11X8242; (e) a quarterly "Report on Receivables Due From the Public" on 11X8242; (f) an annual "Analysis of Appropriation and Fund Balances," TFS Form 2108 on 11X8242; (g) appropriate sections of the annual Chief Financial Officer Financial Statements (see section 209); and (h) an annual Federal Agencies' Centralized Trial-Balance System (FACTS) report. Administrative instructions for all eight reports, e.g., the number of required copies and submission times are set forth in Chapter 5 of Volume 6 of this Regulation. Illustrations and specific information about these reports can be found in the same chapter.

0209 FINANCIAL STATEMENTS

★ 020901. Statements. For financial statement guidance concerning the reporting of Foreign Military Sales amounts, see Volume 6B of this Regulation; Chapter 2, paragraph 020104; Chapter 9, paragraph 090203; and Chapter 10, paragraph 101706.

0210 CASE EXECUTION

021001. Fiscal Year-end. At the end of each fiscal year, a review of the reimbursable obligational authority received to implement an FMS case shall be accomplished. The total amount of reimbursable budget authority received is reflected in Column 10 of the DD Form 2060. The review shall serve as the basis to withdraw any unnecessary unobligated balances. The withdrawal shall be accomplished through submission of a year-end DD Form 2060 or automated equivalent. See section 202 of this Volume for instructions on the preparation of the DD Form 2060.

A. Nonexpiring Accounts. At the close of each fiscal year, reimbursable FMS obligational authority shall be retained in a performing DoD account only to the extent that (1) the amounts are required to cover certifiable obligations incurred by the performing account as a result of performance of the order; (2) the amounts have been committed within a formal commitment accounting system, for example, to cover normal administrative lead-time on the next contract escalation clauses; or, (3) items have been delivered from inventory or applicable DoD services have been performed (cash earned reimbursement). Any reimbursable FMS obligational authority not required for these purposes shall be withdrawn from the performing accounts as of September 30 each year. It is recognized that year-end reviews must be made prior to the last day of the fiscal year. Therefore, the amount of obligational authority retained may be somewhat greater than the goal. However, it is expected that estimating procedures shall be improved continually until unnecessary unobligated balances are eliminated.

★ B. Expiring and Expired Accounts. As of the close of each fiscal year, reimbursable FMS obligational authority may be reflected in an expiring account only to the extent that the amounts are earned reimbursements or required to cover certifiable obligations incurred against the performing account. Any reimbursable FMS obligational authority not required to cover obligations in the expiring account shall be withdrawn as of September 30 each year. During the fiscal year, amounts required in expired accounts shall be transferred from the Trust Fund, as necessary, to cover upward obligation adjustments necessitated by within-scope changes to contracts or similar transactions.

★ 021002. Reimbursement of Appropriations and Accounts. Reimbursement to appropriations and accounts, including miscellaneous receipts accounts, upon delivery of items from inventory or performance of DoD services shall be accomplished within 30 days of occurrence (date of shipment or performance).

021003. DD Form 2061. The FMS case DD Form 2061 prescribed in section 202 of this Volume shall be updated as required. The updating of cost elements and financing accounts is necessary to: ensure full recoupment of the costs prescribed in Chapter 7 of this Volume, ensure timely identification of cost increases, and serve as the basis for preparation of all DD Forms 2060 during the life of the case.

021004. FMS Case Closure Procedures

A. General. DoD policy requires that all proper charges and credits be recorded against the applicable FMS case. Thus, case closure does not stop the billing/reporting process, rather it results in a recategorization of the case records from an active status to an inactive status to ensure accessibility for recording subsequent activity. In other words, a case never closes from a DoD accounting perspective.

★ B. Initiating FMS Case Closure. When all ordered items have been physically delivered, all ordered services performed (i.e., supply/services complete) or there is no activity on a blanket order case for 180 days, and all other conditions of the LOA are fulfilled, an FMS case is a candidate for closure. At this time, responsible DoD Components shall determine if there are any open items or Supply Discrepancy Reports (SDRs) and contracting officers shall review any contracts that have not been financially closed to determine if significant financial adjustments of open contracts may occur. The case manager shall ensure the following actions are taken:

1. Request an FMS case Financial Management Worksheet and a listing of historical billing transactions (FK History Listing) from the DFAS-DE/I, if necessary, to reconcile implementing agency records. The implementing agency work-in-progress account should agree with the delivered value. If not, the implementing agency must submit applicable reports to balance.

2. Submit a final DD Form 2061 or automated equivalent to the DFAS-DE/I.

3. Submit a final DD Form 2060 or automated equivalent to the DFAS-DE/I.

4. For all FMS cases **without** remaining unliquidated obligations:

a. The applicable DoD Component shall submit an FMS Case Closure Certificate (Table 2-27) within 24 months after an FMS case is supply complete.

★ b. A DoD Component that determines the final unresolved reconciliation issues for a case in the process of being closed amounts to less than a maximum of \$200 for that case may charge the FMS Administrative Charge Budget, object classification 42.3, "Supply Discrepancy Reports - Charges for Closed FMS Cases" for the amount required to effect final reconciliation and close the case. The DFAS-DE/I will provide the DSCA/COMPT-FMPD with a quarterly summary of certificates received in which amounts have been charged in accordance with this paragraph.

★ c. Should a DoD Component determine that, due to reconciliation issues, a case cannot be closed within 24 months of supply completion, the case, along with identification of the problem or cause believed to prevent case closure, shall be submitted to the DSCA for resolution with the OUSD(C). Such submissions shall be made within 24 months after an FMS case is supply complete and shall include an FMS Case Closure Analysis (Table 2-29) and a copy of the LOA and associated amendments/modifications.

5. For FMS cases **with** remaining unliquidated obligations:

a. For countries participating in accelerated case closure (ACC) procedures:

(1) ACC procedures shall only be used for those countries which explicitly elect such procedures. All countries that have cases financed with MAP/Grant Aid/FMF Credit (non-repayable) are mandatory participants in ACC procedures unless specifically excluded by DSCA.

(2) Once selected by a country, ACC procedures shall apply to all cases of that country.

(3) The applicable DoD Component shall submit an interim Case Closure Certificate, within 24 months after an FMS case is supply complete (see Table 2-28).

(4) The applicable DoD Component shall determine and report the value of any remaining unliquidated obligations. These amounts should be equal to those recorded by the DoD Component.

(5) Using the DoD Component's remaining unliquidated obligations (ULO), DFAS-DE/I shall bill the applicable country using normal billing procedures.

★ (6) The DFAS-DE/I shall record the billed (and subsequently, the collected) amounts in a summary account entitled "Case Closure Suspense Account." At the same time, applicable charges and credits shall be recorded, by country and by case, in subsidiary accounts which total to the case closure suspense account.

(7) When final costs are known and reported by the DoD Components, the DFAS-DE/I shall record such amounts against the Case Closure Suspense Account, and subsidiary account, by country and by case.

(8) Upon receipt and payment of final bills, the DoD Components shall submit final Case Closure Certificates.

(9) On a semi-annual basis, the DFAS shall submit, to the Deputy Chief Financial Officer, OUSD(C), and the DSCA Comptroller, a status report on the Case Closure Suspense Account and subsidiary accounts.

★ (10) Whenever a country's Case Closure Suspense Account has a negative balance of \$100,000 or more for a period of six consecutive months the DFAS-DE/I shall bill the country for the entire balance owed. For example, if the country's suspense account has negative balances of \$100,000 on December 31, \$250,000 on March 31, and \$175,000 on June 30, the DFAS-DE/I will bill the country \$175,000. Such billings should be through the country's omnibus quarterly billing statement and will cite the FMS case involved. DSCA should review the country's Case Closure Suspense account periodically to determine if any refund is warranted.

★ b. All countries that have cases financed with MAP/Grant Aid/FMF Credits (non-repayable) are included in the accelerated procedures, unless excluded by the DSCA.

c. For countries not participating in accelerated case closure procedures: The DoD Components shall submit Case Closure Certificates only after all applicable costs have been finalized.

★ 6. At case closure, the final closure certificate submitted to the DFAS-DE/I may be used in lieu of an LOA amendment or modification unless the FMS customer insists upon a formal amendment or modification.

C. Closure Certification. The FMS Case Closure Certificate (Table 2-27) alerts the DFAS-DE/I to initiate case reconciliation actions. When DoD Components and the DFAS-DE/I FMS case records are reconciled, the DFAS-DE/I shall proceed to reclassify the case to an inactive status and provide a final statement of account to the FMS customer for the DFAS-

DE/I recorded value billed. The implementing agency closes applicable case records. Certifications for case closure for shall be signed by the commander of the activity or his designated representative.

D. Billings After Case Closure

1. For those cases on which accelerated case closure procedures do not apply:

★ a. All cases must be reclassified to active status except for those with a transaction adjustment of \$200 or less. Such adjustments may be charged to the FMS Administrative Charge Budget, object classification 42.3, "Reports of Discrepancy - Charges for Closed FMS Cases." Otherwise, accounting records will be re-established at the amounts recorded at the time closure certification occurred. Reclassification to active status must occur in both the DoD Component and the DFAS-DE/I records.

(1) All post closure disbursements or credits shall be recorded in an undistributed account until case records are reactivated.

(2) Upon the FMS customer request, a modification may be issued to the country for cases with post-closure activity in excess of 10 percent of the net case value at the time of closure.

(3) When cases are reactivated, DoD Components will request additional obligational authority, commence reporting status of funds data, request expenditure authority, process disbursement/credit transactions, and report adjusted delivery information via the delivery transaction.

(4) Once the disbursement/credit and billing process is complete, the DFAS-DE/I will bill the FMS customer accordingly. Re-closure is accomplished in accordance with subparagraph 021004.C.

★ 2. For cases where accelerated case closure procedures apply:

★ a. When post-closure disbursements are reported by the DoD Components, DFAS-DE/I shall record such amounts against the Case Closure Suspense Account and subsidiary accounts by country and by case.

★ b. When post-closure disbursements exceed \$100,000 (in either direction) as a result of a verified pricing error, the applicable DoD Component shall submit a request to the DSCA, with an information copy to the DFAS-DE/I, that the case be reopened. Upon receipt of the DSCA approval to reopen the case, the applicable DoD Component will issue a modification to the foreign country. In any event, the DFAS-DE/I shall bill the country for the entire balance owed in accordance with established billing procedures.

★ c. When all post closure disbursements/credits have been reported and final costs determined, the DoD Component shall certify the case for finalized status utilizing the case closure certificate at Table 2-27.

FINAL FMS CASE CLOSURE CERTIFICATE

1. Date: _____.
2. Implementing Agency/Country/Case: _____.
3. Net Case Value: _____.
4. Case Canceled at FMS Customer's Request: _____.
5. Final delivered charges against net case value including CAS and LSC: _____.

A.____The net case value shown on line 3 agrees with implementing agency records and obligational authority released to this agency via DD Form 2060.

and

★ B.____The contracts awarded in connection with the FMS case are logistically and financially complete and included in line 5 (case closed). Total contract value subject to CAS charges:_____.

and

C.____All requisitions, reimbursable work orders, MIPR's and invitational travel orders that have been processed pursuant to this FMS case are accounted for and the costs thereof are included in line 5. Reimbursements from the DFAS-DE/I have been credited to the financing appropriation or Miscellaneous Receipt Account 3041, as applicable.

and

D.____All estimated deliveries have been converted to actual deliveries.

and

★ E.____All outstanding discrepancy reports against the case have been processed.

and

★ F.____Performance Reporting and Cash Disbursements have been reconciled with Implementing Agency accounting records and are equal in value. The value of unresolved reconciliation issues recorded in accordance with paragraph 021004.B.4.b.and c. is _____.

★6. Above-the-line disbursements net of CAS and LSC:_____.

Signature of Certifying Official

1. Date: _____.
2. Implementing Agency/Country/Case: _____.
3. Net Case Value: _____.
4. Case Canceled at FMS Customer's Request: _____.
5. Final delivered charges against net case value including CAS and LSC: _____.

A.____The net case value shown on line 3 agrees with implementing agency records and obligational authority released to this agency via DD Form 2060.

and

B.____Delivery of all articles and services is complete. Contracts remain open. The value of remaining unliquidated obligations attributed to open contracts has been verified and included in line 5.

and

C.____All requisitions, reimbursable work orders, MIPR's and invitational travel orders that have been processed pursuant to this FMS case are accounted for and the costs thereof are included in line 5. Reimbursements from the DFAS-DE/I have been credited to the financing appropriation or Miscellaneous Receipt Account 3041, as applicable.

and

D.____All estimated deliveries have been converted to actual deliveries.

and

★ E.____All outstanding discrepancy reports against the case have been processed.

and

F.____Performance Reporting and Cash Disbursements have been reconciled with Implementing Agency accounting records and are equal in value. The value of unresolved reconciliation issues recorded in accordance with paragraph 021004.B.4.b. and c. is _____.

6. Above-the-line disbursements net of CAS and LSC:_____.

7. Unliquidated obligation balance:_____.

A. CAS:_____.

B. LSC:_____.

Table 2-29

★0211 ANTIDEFICIENCY ACT VIOLATIONS AND ADVERSE FINANCIAL CONDITION REPORTS

★ 021101. Antideficiency Act Violations. For purposes of the Antideficiency Act, appropriated funds are not limited to those funds specifically appropriated by Congress to federal agencies from the general fund of the Treasury. Rather, funds available to agencies are considered appropriated, regardless of their source, if made available for collection and expenditure pursuant to specific statutory authority. Accordingly, in applying the Antideficiency Act, the FMS Trust Fund is considered to be, and is to be treated as, appropriated funds. Therefore transactions that involve the FMS Trust Fund can constitute violations of the Antideficiency Act.

★ A. Potential Types of Violations. Violations can occur under the FMS Trust Fund when: (1) obligational authority is approved without prior or proper FMS budget authority, (2) obligations or disbursements are incurred in excess of the regulatory limitation on amounts of an FMS account (e.g. a country level account or a surcharge account) that is to be used for a particular purpose, (3) funds are obligated on a contract without appropriate funds authority from the funds distribution systems included in the Service systems (MISIL, PBAS, CMCS, etc.) controlling the distribution of obligational authority issued against an FMS case, (4) FMS case funds are used in lieu of other DoD appropriations or funds for items outside the scope of an LOA, or (5) as otherwise applicable to FMS cases under DoDD 7200.1, “Administrative Control of Appropriations.”

★ B. Identifying and Reporting Violations. More detailed guidance for identifying and reporting violations under the Antideficiency Act is contained in DoDD 7200.1, “Administrative Control of Appropriations,” and in Volume 14, “Administrative Control of Funds and Antideficiency Act Violations,” of this Regulation.

★ 021102. Adverse Financial Conditions. A second group of reportable events occurs when FMS case records are out-of-balance, but these conditions do not necessarily meet the criteria of violations as listed above. These conditions are adverse financial conditions and occur when financial reports indicate that obligational authority exceeds case or line item-level values, that commitments or obligations exceed obligational authority at case or line item level, that total disbursements exceed obligations at case or line item level, or that expenditure authority is not requested prior to disbursing. Adverse financial conditions are reported using the same format as the Antideficiency violations, but are sent to the DFAS-DE/I for review unless exempt from reporting due to the exceptions described below.

A. Reporting Requirements for Adverse Financial Conditions. A report of adverse financial condition will be prepared in the format shown in DoDD 7200.1 and will be submitted to the DFAS-DE/I for review and evaluation within 60 days of discovery or being notified that the adverse condition has occurred. DFAS-DE/I has the responsibility for determining reportable conditions and for notifying implementing agencies of adverse conditions involving expenditure authority and obligations or expenditures of funds in excess of approved authority at the FMS case and country levels. The DoD Component has the responsibility for

determining reportable conditions and for notifying DFAS-DE/I of adverse conditions involving expenditure authority and obligations or expenditures of funds in excess of approved authority at the FMS case line level.

B. Exceptions to Reporting Adverse Financial Conditions. Reports need not be submitted for within-scope cost increases if either of the following circumstances occur:

★ 1. Obligation(s) in excess of the "Total Estimated Cost" shown on the LOA occurs, and a modification is prepared by the DoD Component and submitted to the purchaser through appropriate channels within 60 days of the date of the transaction which resulted in the unfavorable financial condition.

★ 2. Obligation(s) or expenditure(s) in excess of approved authority when the excess amount results from the posting of duplicate or erroneous obligation/expenditure transactions or from the posting of obligations from inventory systems and corrective action is taken within 60 days of the transaction date. However, these conditions could indicate weaknesses in internal controls and administrative action may be required to improve systems design or to prevent reoccurrence.

SUMMARY OF MAJOR CHANGES TO DoD 7000.14-R, VOLUME 15, CHAPTER 2 SECURITY ASSISTANCE POLICY AND PROCEDURES			
PAGE	PARA	EXPLANATION OF CHANGE/REVISION	PURPOSE
All	All	SAAC changed to DFAS-DE/I and DSAA changed to DSCA.	Update
All	All	Table numbering changed to conform with guidance.	Update
All	All	IF and DBOF changed to WCF (working capital fund).	Update
2-3	020105.B.	Appropriations subject to apportionment updated.	Update
2-6 & 2-9	T2-1 & T2-4	Since the dollar value of the LOA example and/or the items supplied don't meet the criteria of 36(b), the words "Congressional Notification 92-17" were removed.	Correction
2-19	20201	Reference to Financial Analysis Worksheet deleted.	Update
2-21	T2-10	Reference to P&A deleted and instructions improved.	Update
2-26	T2-11	Reference to cancellation of Attrition (AT) deleted	Correction
2-29	T2-11	Pricing element DM funds source corrected to DWCF.	Correction
2-53	020601.A.	Added instructions on processing budget estimates to clarify that only one DD Form 2060 is submitted.	Clarification
2-57	208	Section revised to reflect new reporting structure. Section 210 deleted and subsequent paras renumbered.	Update
2-57	209	Paragraphs modified to reference Vol 6B, involving treatment for financial statements (OMB, USD(C), DoDIG)	Update
2-58	021004.B.	Change 3 of the SAMM DoD 5105.38-M changed the period of inactivity on a blanket order case from 18 months to 180 days.	Update
2-59	021004.B. 4.c.	Deleted reference to DoD Executive Case Closure Board	Update
2-60	021004.B. 5.a.(10)	Clarification on use of suspense account.	Clarification
2-60	021004.B. 5.b.	Added change to cover exempted countries.	Update
2-60	021004.B. 6.	Language to allow use of final closure certificate in lieu of amendment or modification added.	Update

2-61	021004.D. 1.a.	FY 1993 deleted allowing adjustments to continue.	Update
2-61	021004.D. 2.	Section clarified for post-closure disbursements.	Update
2-62	021104.E.	Deleted DoD Executive Case Closure Board in its entirety.	
2-63	T2-27	Requirement to specify basis for CAS charges added; also #5 changed to include word "delivered" after final; #6 added for clarification.	Update to facilitate reconciliation.
2-64	T2-28	In #5, "delivered" added after "final".	Clarification
2-66 and 2-67	211	Section re-written to distinguish between Anti-deficiency violations and adverse financial conditions. Changed reporting to DFAS-DE/I as requested by DFAS Headquarters. Identified additional reportable violations.	Internal control

CHAPTER 03

ACCOUNTING**0301** INTRODUCTION

030101. Objectives. The objectives of this chapter are to prescribe accounting requirements which:

A. Assure proper implementation of the DoD fiduciary responsibilities resulting from acceptance of an FMS case.

B. Provide accounting information which can be used for preparation of financial statements to FMS customers and financial status reports to DoD case managers.

C. Are fully integrated with physical delivery (logistics) reporting systems.

D. Serve as a basis for timely identification and reporting of financial management problems.

E. Establish internal controls to assure compliance with the payment requirements of the AECA [reference (a)].

030102. Accounting Characteristics

A. Each FMS case is an accounting unit similar to a commercial job order. Budget authority necessary to implement a case is released by case designator; cash collections and disbursements are recorded by case designator, all requisitions for materiel or services contain a case designator; accrued costs are reported by case designator, etc. This case level accounting information is then accumulated and reported to FMS customers and DoD case managers to allow proper monitoring of case execution.

B. For DoD purposes, there is a requirement for summary level information. Country level cash summary accounts must be maintained to facilitate the calculation of Section 21(d) interest charges. A cumulative (all country) summary cash account is necessary to allow

reconciliation with Department of the Treasury cash records. Cumulative summary accounts reflecting budget authority, commitments, obligations, accounts payable, accounts receivable, and accrued expenditures, etc., are required in order to complete required budget execution reports on the FMS trust fund account.

C. DoD case management entails obtaining necessary budget authority, releasing requisitions or procurement work orders, and physical delivery of required items. The first two actions require efforts directed through the accounting system. Good management and control require that the same source document be used for reporting to both the financial system and the logistical systems (including delivery reporting).

030103. Responsibilities

A. Security Assistance Accounting Center (SAAC). It is the responsibility of SAAC to:

1. Maintain the centralized FMS case level accounts prescribed in this chapter and use information accumulated in the accounts when preparing statements to FMS customers and financial management reports to DoD case managers.

2. Summarize case level cash accounts at the country level to determine the necessity for charging Section 21(d) interest.

3. Summarize all case level accounts at the Trust Fund level, reconcile the summary cash accounts to Treasury records on a monthly basis and use the summary accounts as the basis for required reports on trust fund operations.

4. Maintain audit trails between source documents and entries to the mechanized accounting system.

B. Implementing Agencies. Performance of FMS orders is accomplished through one of three possible financing techniques: (1) issuance and acceptance of reimbursable orders into a financing appropriation/Defense Business Operations Fund account, (2) issuance of allotments of the FMS trust fund to performing DoD Components, or (3) issuance of authorization to directly use the FMS trust fund (11X8242). Each of these three financing variations results in unique accounting responsibilities as described below.

1. Performance under Reimbursable Orders. The accepting DoD Component is required to use the DD Form 2060 as the basis for recording an FMS order in the financing appropriation/fund account and to use status-of-allotment reports to notify SAAC of accrued expenditures. Except for these requirements, the normal accounting system of the financing appropriation/fund account will accomplish the detailed accounting requirements associated with performance of the DD Form 2060 order.

2. Performance under Allotments for Direct Cite Execution. A DoD Component which receives a DD Form 2060 allotment of FMS case funds is responsible for establishing and maintaining the unique FMS accounts necessary to support preparation of the FMS case level status-of-allotment report. Their accounts will be subsidiary to the case level accounts maintained at SAAC, and the current accounting period status-of-allotment report will be put into the SAAC accounts.

3. Performance under Authority to Directly Obligate the FMS Trust Fund. The DoD Component which receives this authority is responsible for promptly providing SAAC with basic source documents. The SAAC is responsible for detailed accounting requirements.

C. Holders of Allotment for Actual FMS Administrative Expenses. A DoD Component which receives DSAA allotments for FMS administrative expenses is responsible for maintaining obligations and expenditures within the limitations of the allotment and assuring that the source documents supporting obligations and accrued expenditures against the allotment meet

the requirements of this Volume. At the end of each fiscal year unobligated OA will be returned to DSAA.

030104. Source Documents. The basic source documents to be used for accounting entries to the FMS case level accounts follow:

A. "United States of America Letter of Offer and Acceptance". This document, or its equivalent when a deviation has been authorized by DSAA, is the basic source document for entries to accounts which record the dollar value of the customer order (see paragraph 020103.A.).

B. Amendments and Modifications. The amendment is designed to obtain FMS customer acceptance of a scope increase. The modification is a notification document to alert FMS customers of within-scope cost increases. These documents are used to modify the original LOA and serve as additional sources of entries to accounts which record the dollar value of the customer's order (see paragraph 020103.B.).

C. DD Form 2061, "FMS Planning Directive". This form is the basic source document used in preparation of the DD Form 2060, which requests case obligational authority (see paragraph 020103.C.).

D. DD Form 2060, "FMS Obligational Authority". This multipurpose form is the basic source document for entries to accounts which recognize the budget and program authority necessary for FMS case performance. The form also serves as the basis for recording Trust Fund obligations and withdrawals of Trust Fund budget authority (see paragraph 020103.D.).

E. DD Form 645, "Foreign Military Sales Billing Statement". This form, when properly signed, represents the U.S. Government's official claim for payments to FMS purchasers. As such, the DD Form 645 serves as the source for entries into the accounts receivable general ledger account of the SAAC. In addition, it serves to provide an accounting to the FMS purchasers of costs incurred and costs accrued on behalf of those purchasers.

F. LOA Payment Schedule. The payment schedule attached to the DD Form 1513 is normally used as the basis for DD Form 645, Column 11, billings for additional cash advances from the customer (for exception, see subparagraph G. below). When the case value is \$25 million or over, a subsidiary schedule (which is not provided to FMS customers) is attached to identify the amount of each scheduled payment which is applicable to potential termination costs. When case value is under \$25 million, potential termination cost is included in the scheduled payment and a subsidiary schedule is not required.

G. "Quarterly Forecast of Financial Requirements for In-Process Cases". This computer input is submitted on an as-required basis and when LOA payment schedules will not provide adequate advance cash collections. The input is a basis for DD Form 645, Column 11, billings for additional cash advances and identifies the cash required for (1) disbursing demands on earned reimbursement, (2) contractor holdbacks, and (3) potential termination costs. This report is exempt from licensing per paragraph E.4.f. of DoD 7750.5-M [reference (h)].

H. Incoming FMS Customer Checks or Treasury Notification of Receipt of Funds Via Electronic Transfer. These data are the basis for entries to cash collected accounts.

I. SF Form 1080, "Voucher for Transfers between Appropriations and/or Funds". This form is prepared in two variations: (a) check required, and (b) no check required. When a check is required, the form serves as the basis for entries to accrued expenditures and accounts payable or cash disbursements as applicable. The "no-check-required" variation is used as the basis for liquidation of advances or to record accrued expenditures and accounts payable or disbursements as applicable.

J. Contracts. When direct cite procedures are used, copies of signed contractual documents serve as the basis for entries to Account 4811, "Undelivered Orders - Without Advance - Direct Program" (See Section 302).

K. "DoD Status-of-Allotment Reports". When allotment procedures are used, status-of-allotment reports serve as the basis for monthly entries relative to order performance in the FMS Trust Fund case level accounts. This report is exempt from licensing per paragraph E.4.f. of DoD 7750.5-M [reference (h)].

L. "Delivery Transactions." These serve as the basis for accrued expenditures and physical deliveries entries to the FMS case level accounting system. The report is used in lieu of an SF Form 1080 for most FMS transactions. This report is exempt from licensing per paragraph E.4.f. of DoD 7750.5-M [reference (h)].

M. Mechanical FK Computations. The SAAC mechanically computes the following accrued expenditures (See Chapter 8):

1. FMS Administrative Surcharge
2. Contract Administrative Surcharge
3. Packing, Crating, and Handling Charge (except for deliveries of stock fund/Defense Business Operations Fund items reported after October 1, 1990.
4. Transportation Charges (unless case header information requires actual)

N. Expenditure Authorization. Country level expenditure authorizations are issued by SAAC. Issuance is either via the FMS accounting system network or via a message. If the message is through electronic means there must be internal controls installed to ensure the message was authenticated and was in fact released. The message is the basic source document for entries to the cash accounts to formally reserve applicable customer cash (See Chapter 4).

0302 FMS TRUST FUND ACCOUNTING REQUIREMENTS

030201. FMS Trust Fund. The FMS Trust Fund is a single account that is authorized to be credited with receipts and to incur obligations

and expenditures in accordance with the provisions of the Arms Export Control Act (AECA)[reference (a)], and 82 Stat 1323 (22 U.S.C. 2762)[reference (i)]. FMS Trust Fund receipts are available for obligation and expenditure without further action by Congress. The Trust Fund is exempted from apportionment on DD Form 1105 in accordance with paragraph 412.2B.5. of DoD 7110.1-M [reference (d)]. Accounting for the FMS Trust Fund is accomplished at the Defense Finance and Accounting Service - Denver Center referred to as the central site.

030202. FMS Chart of Accounts. All financial accounting data applicable to the FMS Program shall be recorded in the Uniform Chart of FMS Trust Fund level General Ledger Accounts (GLAs) maintained by the central site as set forth in this Chapter. These requirements are consistent with the DoD Uniform Chart of General Ledger Accounts described in other volumes of this Regulation. Subsidiary ledgers are used where necessary to provide accounting control and management reports. Dollar amounts reflected in the accounts shall be used in statements and bills to FMS customers, monitoring compliance to the cash requirements of the AECA, financial management reports to implementing agencies, identification of adverse financial conditions, and required budget execution reports. No other General Ledger Trust Fund accounts will be used without the written approval of DFAS-HQ. A description of each account is at Appendix A. The accounts are in Table 302-1. Table 302-2 is a concept of pro forma entries illustrating typical accounting entries that occur during execution of an FMS case.

030203. Contract Authority. Contract authority is statutory authority to incur obligations prior to an appropriation (or realization of revenues) for the future payment of obligations. Procurement for FMS under 82 Stat 1323 (22 U.S.C 2762)[reference (i)] is one of the major permanent indefinite authorities at departmental level within the DoD. FMS orders create contract authority. New contract authority reported in the ACCT-RPT(M) 1176 is the value of FMS orders accepted for performance during the current fiscal year for which budget authority

has been approved in the current year in accordance with the requirements of paragraph 020104.A. Funds appropriated by the Congress for defense purposes cannot be used to liquidate obligations resulting from the use of FMS contract authority. FMS customer cash deposits liquidate these obligations and unfunded contract authority. Below departmental-level, contract authority loses its unfunded identity and is treated in the same way as other budgetary resources available for obligation. Allocations from the Departmental-level accounting system are issued as Direct Program. Procurements for FMS customers are accomplished citing the FMS Trust Fund in applicable documents. According to a Comptroller General Decision amounts in the FMS Trust Fund are, in a technical sense, appropriated funds, even though they are not annually appropriated by Congress and are not subject to direct Congressional control. Accordingly, accounting for commitments, obligations, and accrued expenditures in the FMS Trust Fund is accomplished as direct program.

030204. Accounting for Obligations. Budget Authority required to execute an FMS case is requested by Military Departments by entering a computerized three position alpha format, RBI transaction into the computerized FMS accounting network. SAAC's approval of the request for authority is based on having, in hand, the requirements to establish contract authority as described in the previous paragraph. The RBI is used for each new case and at the beginning of each new fiscal year to request approval of budgeted requirements for the fiscal year. The "R" in the transaction designates the series of FMS Integrated Control System (FICS) formats. The "B" stands for budget authority and the "I" indicates the transaction is an input. Receipt of an RBI for a FMS case for which SAAC has also received a signed letter of offer and, if applicable, an initial deposit, is recorded in GLA 4131. Approval of a request for an annual requirement of budget authority in a computerized format is recorded by SAAC entering a RBF into the FMS accounting network and recording a debit in GLA 4516 and credit in 4541. The "F" in the RBF transactions indicates the transaction is a feed back and signifies certified approval of the request. Sound financial management of the FMS program requires that the amount of au-

thority requested be limited to the amount expected to be obligated in the current fiscal year. Under no circumstances is SAAC authorized to issue budget authority in excess of total case value without the appropriate amendments or modifications which formally increase the value of the case. The status of commitments, obligations and accrued expenditures is reported to SAAC via the REI format. The "E" stands for execution. SAAC acknowledges receipt with a REF and makes the appropriate entries in GLAs 4710, 4811, and 4931 as applicable. At the end of each fiscal year SAAC reduces budget authority to the cumulative from exception value of commitments, obligations, and accrued expenditures reported by REI transactions. Following the year end closing entries reversal entries restore budget authority values for the new year.

030205. Accounting for Receivables

A. General. Accounts receivable ledgers for each FMS country program accounted for in the FMS Trust Fund are subsidiary to General Ledger Account 1313, "Accounts Receivable-Public-Current." The amounts recorded in the FMS Trust Fund accounts are based on the FMS billing statements and DSAA supplementary billing statements and are in accordance with paragraph 050301. Cash in advance of performance is required for FMS customers unless a written determination is made pursuant to legal authority (see paragraph 070104.D., "Payment Terms"). Therefore, in the FMS program, a delinquent accounts receivable is an exceptional event. If a delinquency occurs, follow-up is pursued in accordance with Volume 6, Chapter 12 of this Regulation and paragraph 050201 of this Volume. Aging of accounts receivable will be in accordance with paragraph 50302.B. and Table 502-1 and commences with the beginning of the month following the date the payment was due and continues until paid according to the following schedule:

1-30	days delinquent
31-60	days delinquent
61-90	days delinquent
91-180	days delinquent
181-360	days delinquent
over 360	days delinquent

B. Application of Interest Charges. Interest charges on FMS country-level arrearages shall be assessed in accordance with the provisions of the affected country's active Letters of Offer and Acceptance and Chapter 5 of this Regulation. The interest rate to be charged by the Department of Defense on delinquent payments due on Foreign Military Sales under the provisions of Section 21 and 22 of the AECA (22 U.S.C. 2761 and 2762) will be prescribed by the Department of the Treasury.

030206. Accounting for Inventory. Assets--equipment and related software, amounts invested in inventories and work-in-process at contractor's plants--are controlled by, and should be reported on, the financial statements of the Military Departments or Defense Agencies.

030207. Accounting for Trust Fund Equity. The Arms Export Control Act requires that the FMS program be operated at no cost to the U.S. Government. The provisions of the Letter of Offer provide that the USG will execute the Offer and Acceptance on a non-profit basis. Therefore, recognition of an equity balance in the FMS Trust Fund is prohibited. The Foreign Military Sales Trust Fund Financial Statements will not include equity, revenue or expense accounts.

A. Accounting for FMS Surcharges. Surcharges established in accordance with the requirements of the AECA to insure full recovery of costs incurred in operating the FMS program are accounted for as operating expenses. The principle surcharge, the Administrative Surcharge, was established in accordance with Sections 21 and 43 of the AECA [reference (a)]. The Contract Administration Services (CAS) surcharge applied to new procurement may be waived under certain conditions detailed in Section 21 of the AECA [reference (a)]. The transportation surcharge is intended to recover costs involved in transferring FMS material to FMS customers where that cost is not included in the cost of the material. These expenses are recorded as implementing activities are reimbursed from surcharge accounts in response to SF 1080 bills. Revenues to fund these expenses result from the application of surcharge rates to delivered values reported by the implementing

activities. Ledgers for each of the categories of surcharges are maintained as subsidiary to the control account "Unearned Revenue - Advances from Public," GLA 2312.

B. Accounting for Bad Debts. Policy and procedures concerning compromise, termination, or suspension of collection actions of a country-level bad debt are in paragraph 120207 of Volume 6 of this Regulation. Resolution of all foreign indebtedness resulting from FMS transactions will be staffed with the Department of State by DSAA via the Assistant Secretary of Defense, International Security Affairs (ASD)(ISA). Within 30 days of a determination that a debt is uncollectible, DSAA will provide direction to the DFAS - Denver Center to record the amount owed including accrued interest in General Ledger Account 1313.3, Accounts Receivable-Public-Current-Uncollectible. The following procedures will be followed when a country is in arrears and the debt is confirmed to be uncollectible; (1) All available funds for the effected country will be utilized to satisfy outstanding liabilities according to a priority recommended by the Denver Center Deputy Director for Security Assistance Accounting and approved by the DSAA Comptroller, (2) The Denver Center, in accord with DSAA, will contact all applicable case managers to request all outstanding commitments be canceled and all outstanding obligations be adjusted to include an amount for termination cost. The residual amount of the debt reflected will be transferred to GLA 1313.3, Accounts Receivable-Public-Current-Uncollectible for the affected country to coincide with termination of the customer order based on the determination that the country account is uncollectible. Aging of amounts recorded will continue. The accumulation of interest, in accordance with the Arms Export Control Act and other applicable authorities, should be accrued monthly on the balance in this subaccount. The amount recorded in the account will include the amount of the arrearage, termination liability costs, and accrued interest.

030208. General Procedures for Processing Accounting Transactions. The Defense Integrated Financial System (DIFS) is the departmental level central accounting system used at SAAC to account for the FMS Trust Fund. Information

entered into the central accounting system in the form of accounting transactions is based on a combination of transactions received from installation level FMS Integrated Control Systems (FICS) and vouchers recorded at SAAC as a result of billing/collection and disbursement activity. Accounting transactions are recorded in applicable proprietary, departmental level and installation level general ledger accounts. This enables SAAC to prepare required accountability, and fund status reports for the FMS Trust Fund.

A. Source Transactions. Source transactions contain all the information required to update general ledger accounts and enable the SAAC to prepare the reports required for accounting control and financial management. Source transactions are the lowest level information in the system. Every transaction has a date identifying the appropriate accounting month for reporting to the U.S. Treasury. Source transactions are registered in automated journals and then posted to appropriate subsidiary ledgers within the central accounting system. Equality of the general ledger accounts is ensured through the use of the program developed for that purpose for the general ledger. Posting of source transactions updates applicable subsidiary ledgers as well as FMS Trust Fund general ledger accounts. Posting occurs daily. Source transactions are maintained in the system data base for future balancing and reconciling in addition to being the primary audit trail for all posting to the central system.

B. Subsidiary Ledgers. Due to the magnitude of the FMS program there is a substantial number of individual accounts with common characteristics. As a result, subsidiary ledgers have been established to provide control. Updated subsidiary ledgers are an integral part of the DIFS data base and part of the general ledger structure wherever accounting information must be accumulated by country or program within a general ledger account (GLA). Subsidiary ledgers are maintained for FMS surcharge accounts. Subsidiary ledgers provide a continuous record of transactions by accounting month for the FMS Trust Fund general ledger. A monthly trial balance of the FMS Trust Fund, accomplished after all balancing and reconciling for the month is completed, verifies the equality

of the subsidiary ledgers and general ledger accounts. The subsidiary ledgers are maintained in the system for reconciliation in addition to providing an audit trail of all postings in the system. Extracts of these ledgers are made available to the Security Assistance Program Manager as necessary for management purposes.

C. General Ledger. The general ledger is updated from the subsidiary ledgers. The general ledger is maintained by accounting month at appropriation level. A trial balance is prepared from the general ledger on a monthly basis. The trial balance is used for the preparation of reports to the U.S. Treasury, DSAA, or other required reports related to the general ledger.

1. The general ledger subsidiary ledgers are to be posted and reconciled to the posting medium (financial transactions) on a daily basis. These subsidiary ledgers will be totaled and posted monthly to general ledger accounts with a trial balance prepared monthly. The general ledger must be reconciled to the financial transactions, resource balances, and subsidiary ledgers and records to ensure general ledger control. This general ledger will be reconciled with the subsidiary ledgers on a monthly basis. The primary selection criteria will be the accounting month that is maintained on both the subsidiary ledgers and the general ledger. The internal DIFS data directory will provide the translation between the chart of accounts prescribed by this Volume, with pertinent subsidiary ledgers necessary to meet specific FMS financial management requirements. The subsidiary ledgers, reconciled to the general ledger on a monthly basis are Case Control, Cash Master, Accounts Receivable, Accounts Payable, and Status of Funds.

2. The general ledger developed for the DIFS is based on the DoD chart of accounts found in Chapter 7 of Volume 1 of this Regulation which complies with the U.S. Government Standard General Ledger (SGL) chart of accounts. The audit trails are accomplished using the internal DIFS data directory (which) will provide the translation between the chart of accounts found in this Volume, with pertinent subsidiary ledgers necessary to meet specific

FMS financial management requirements. A program in DIFS generates the general ledger balances directly from the subsidiary ledgers for the FMS Trust Fund (appropriation 8242).

3. The financial reports are prepared based on the cumulative values recorded in the general ledger or the subsidiary ledgers that are controlled by the general ledger, reconcilable to the account balances in the general ledger.

030209. SAAC Analysis of FMS Case Accounting Data. It is important that the SAAC continuously analyze case level accounting data to identify developing financial problems and alert implementing agency case managers and other concerned DoD officials of the necessity for corrective action. The types of analysis to be performed follow:

A. Adequacy of Cash Deposits. Compare net unreserved cash balance to accounts payable case level accounts. If accounts payable balance is greater, request implementing agency review of the priority of case payment schedules.

B. Timely Payments to DoD Components and Contractors. Balances in accounts payable, shall be aged to assure timely payments are being made. If payments are untimely, SAAC should review internal payment procedures and implement necessary corrective action.

C. Timely Case Closure Actions. When the expenditures equal budget authority, SAAC should request implementing agency review to determine if the case should be closed.

030210. SAAC Postings to Surcharge Subsidiary Ledgers

A. Administrative Fee and Logistics Support Surcharge Account.

1. Accrual of Earned Surcharge. As accrued expenditures are recorded pursuant to FMS orders, the amount of administrative surcharge applicable thereto will be determined and credited to the administrative fee account.

2. Actual FMS Administrative/Logistics Expense. Accounting entries reflecting actual expenses will be posted based upon accrued expenditures reported in the DoD status-of-allotment reports for FMS (see paragraph 030401 of this Volume).

B. Transportation Surcharge Account.

1. Accrual of Earned Surcharge. When items are reported as physically delivered, applicable transportation surcharges are earned and credited to the "Transportation Account."

2. Actual Transportation Expense. Accounting entries reflecting actual transportation cost will be posted as debits to the "Transportation Account," based upon receipt of carrier bills.

3. Year-End Balance. Amounts in the transportation account in excess of \$15 million at the end of a fiscal year will be transferred to other clearing accounts with deficit balances. Such transfers must be approved by the Office of the DoD Comptroller in coordination with the DSAA Comptroller as manager of the FMS Trust Fund.

C. Contract Administration Surcharge Account.

1. Accrual of Earned Surcharge. When payments are made to contractors--either progress payments or bills for incurred costs--applicable contract administration surcharges are earned and credited to "Contract Administration Expenses."

2. Actual Contract Administration Expenses. Accounting entries reflecting actual contract administration costs will be posted as "Contract Administration Expenses," based upon receipt of SF 1080 billings from performing DoD Components (see paragraph 070405).

D. Attrition Expense Surcharge Account. For applicable training cases, 4% for flying training and 1% for non-flying training, the earned amounts will be identified by the IAs as they distribute collections for tuition charges.

That portion identified as attrition will be credited to the SAAC. Expenditures from this account represent orders to DoD Components to fund the cost of replacing equipment which has been destroyed as a result of student training.

E. Month-End and Year-End Surcharge Account Closing. The data contained within the accounting system will support end of period closing, updating of the general ledger and the production of required end of period financial reports. End of period procedures will be in accordance with DSAA reporting requirements. Open periods will be closed in sequence when transactions are concurrently processed for multiple periods. During the closing process, the current period (the first one among all open periods), General Ledger account balances will be closed and carried forward to the next period. The beginning surcharge account balances for the next period should be computed from the carried forward amounts previously passed and month-to-month activity.

F. Year-End Certification. After the close of each fiscal year, the SAAC will provide a certified financial statement to the Office of the Comptroller, DoD. This is the Statement Of Financial Position for the year just ended versus the prior year (see Table 302-3).

G. Year-End/Periodic Analysis of Surcharge Accounts. Activity in the surcharge accounts will be analyzed by SAAC and serve as a basis for recommendations to the DSAA Comptroller for coordination with the DoD Comptroller on rate changes and redistribution of surcharge account balances.

TABLE 302-2 ILLUSTRATION OF PRO FORMA ENTRIES FOR THE FMS TRUST FUND

The pro forma entries in this table illustrate the accounting entries recorded within the FMS Trust Fund General Ledger during execution of a hypothetical FMS case. The variety, number and timing of the entries may differ according to type of case and circumstances being recorded. FMS Trust fund accounting by the central site, in accordance with the provisions of this chapter is at Trust Fund level. Entries 8 and 9 illustrate entries required to record reimbursement of Administrative Surcharge expenses to a Military Department.

Given:

Contract Value (2 units)	\$100,000
Total Nonrecurring Cost	\$20,000
Estimated Cost (line 21)	<u>\$120,000</u>
Administrative Fee (line 23)	\$3,600
Total Case Value (line 26)	<u>\$123,600</u>
Initial Deposit	\$35,000
Administrative expense disbursed at Trust Fund level to a Military Department with revenues from several cases.	\$4,000

- FMS Customer Country provides SAAC with a signed Letter Of Acceptance (DD Form 1513) and the initial deposit. SAAC records receipt and changes the status of the case from Offered to Implemented.**

1011	Funds Collected	\$35,000	
2312	Unearned Revenues-Advances From Public		\$35,000
4150	Other New Budget Authority (Uncommitted Acceptances)	\$123,600	
4450	Authority Available		\$123,600
4132	Contract Authority With Liquidating Appropriation	\$35,000	
4131	Contract Authority Without Liquidating Appropriation		\$35,000

- The Implementing Agency submits a DD Form 2060 or automated equivalent (RBI) requesting obligation authority.**

4131	Contract Authority Without Liquidating Appropriation	\$100,000	
4150	Other New Budget Authority		\$100,000
4450	Authority Available	\$100,000	
4516	Unallocated Unfunded Contract Authority		\$100,000

**TABLE 302-2 ILLUSTRATION OF PRO FORMA ENTRIES FOR THE FMS TRUST FUND
(CONTINUED)**

3. SAAC approves the request for obligation authority from the Implementing Agency. (Part A of DD Form 2060 or automated equivalent (RBF)).

4516	Unallocated Unfunded Contract Authority	\$100,000
4541	Allocations Issued-Direct Program-Current Period	\$100,000
4580	Allotments Received (Recorded by the IA)	\$100,000
4611	Uncommitted/Unobligated Allot.-Direct Program	\$100,000

4. The Implementing Agency reports commitments equal to estimated contract value using the REI transaction.

4611	Uncommitted/Unobligated Allot.- Direct Program.	\$100,000
4710	Outstanding Commitments Direct Program	\$100,000

5. The Implementing Agency reports Obligations equal to contract value via a REI transaction.

4710	Outstanding Commitments Direct Program	\$100,000
4811	Undelivered Orders - Direct Program	\$100,000

6. SAAC generates the quarterly FMS Billing Statement, DD Form 645.

1313.1	Accounts Receivable-Public Current	\$88,600
2411	Deposit Fund Liabilities	\$88,600

7. SAAC receives payment of amount due on the quarterly FMS Billing Statement, DD Form 645.

1011	Funds Collected	\$88,600
2312	Unearned Revenues-Advances from Public	\$88,600
2411	Deposit Fund Liabilities	\$88,600
1313.1	Accounts Receivable-Public Current	\$88,600
4132	Contract Authority With Liquidating Appropriation	\$88,600
4131	Contract Authority Without Liquidating Appropriation	\$88,600

**TABLE 302-2 ILLUSTRATION OF PRO FORMA ENTRIES FOR THE FMS TRUST FUND

8. The entries to record the issuance of an allotment for the administrative surcharge budget:			
4131	Contract Authority without Liquidating Appropriation	\$4,000	
4150	Other New Budget Authority		\$4,000
4450	Authority Available	\$4,000	
4516	Unallocated Unfunded Contract Authority		\$4,000
4516	Unallocated Unfunded Contract Authority	\$4,000	
4541	Allocations Issued-Direct Program		\$4,000
4580	Allotments Received	\$4,000	
4611	Uncommitted/Unobligated Allot-Direct Program		\$4,000
9. SAAC records the obligation and reimbursement for administrative surcharge expenses:			
4611	Uncommitted/Unobligated Allot.- Direct Program	\$4,000	
4931	Accrued Expenditures-Paid Direct Program		\$4,000
2312	Unearned Revenue - Advances from Public	\$4,000	
2111	Accounts Payable-Government Current		\$4,000
2111	Accounts Payable-Government Current	\$4,000	
1012	Funds Disbursed		\$4,000
10. The Implementing Agency reports accrued expenditures unpaid via a Status of Direct Cite Allotment (REI) transaction.			
2312	Unearned Revenue - Advances from Public	\$100,000	
2113	Accounts Payable-Public		\$100,000
4811	Undelivered Orders-Direct Program	\$100,000	
4910	Accrued Expenditures-Unpaid Direct Program		\$100,000
11. The Implementing Agency reports payment to the Defense Contractor via a SDI transaction.			
2113	Accounts Payable-Public	\$100,000	
1012	Funds Disbursed		\$100,000
4910	Accrued Expenditures-Unpaid Direct Program	\$100,000	
4931	Accrued Expenditures-Paid Direct Program		\$100,000

TABLE 302-2 ILLUSTRATION OF PRO FORMA ENTRIES FOR THE FMS TRUST FUND (CONTINUED)

12. The Implementing activity reports the obligation for nonrecurring costs via a DD Form 2060 or REI transaction.

4131	Contract Authority without Liquidating Appropriation	\$20,000	
4150	Other New Budget Authority		\$20,000
4450	Authority Available	\$20,000	
4516	Unallocated Unfunded Contract Authority		\$20,000
4516	Unallocated Unfunded Contract Authority	\$20,000	
4541	Allocations Issued-Direct Program	\$20,000	
4580	Allotments Received	\$20,000	
4611	Uncommitted/Unobligated Allot.- Direct Program		\$20,000
4611	Uncommitted/Unobligated Allot.- Direct Program	\$20,000	
4811	Undelivered Orders-Direct Program		\$20,000

13. The Implementing Agency reports self-reimbursement for nonrecurring costs using a SDI transaction.

2312	Unearned Revenue - Advances from Public	\$20,000	
1012	Funds Disbursed Allot.- Direct Program		\$20,000
4811	Undelivered Orders-Direct Program	\$20,000	
4931	Accrued Expenditures-Paid Direct Program		\$20,000

14. The Implementing Agency reports completion of work on the FMS customer order and delivery of the systems ordered to the customer. SAAC records the administrative surcharge revenue applicable to the delivered value. Offsetting entries are recorded in subsidiary accounts within GLA 2312, "Unearned Revenue - Advances from Public."

TABLE 302-2 ILLUSTRATION OF PRO FORMA ENTRIES FOR THE FMS TRUST FUND
(CONTINUED)

15. The entries required to record case closure based upon the Military Activity sending SAAC a case closure certificate and SAAC sending the FMS customer a Final Statement of Account. (These entries are not recorded until the end of the fiscal year for cases closed during the year to provide visibility of activity in these accounts during the year):

1012	Funds Disbursed	\$123,600
1011	Funds Collected	\$123,600
4541	Allocations Issued-Direct Program	\$123,600
4132	Contract Authority-With Liquidating Appropriation	\$123,600
4931	Accrued Expenditures Paid Direct Program	\$123,600
4580	Allotments Received	\$123,600

0303 IMPLEMENTING AGENCY ACCOUNTING REQUIREMENTS

030301. Reimbursable Orders. Amounts in Column 10 of the DD Form 2060 (or automated equivalent), "FMS Obligational Authority," represent the portion of the FMS order that will be accomplished on a reimbursable basis. The applicable DoD appropriation or fund accounting system must maintain an audit trail between the applicable DD Form 2060 and appropriation or fund accounting records. DD Form 2060, Part B or automated equivalent, must arrive at the SAAC by the 20th calendar day following the close of each accounting month. The report format is in Table 202-5. Preparation and processing instructions are outlined in Section 202. Performance within the financing appropriation or fund account will be controlled in accordance with the accounting system established for the particular appropriation or fund account. Pro forma entries to a procurement appropriation account using the DoD Uniform Chart of Accounts (UCA) are illustrated in Tables 303-3, 303-4, and 303-5. Table 303-3 illustrates accounting entries for replacement transactions. Table 303-4 illustrates accounting entries when procurement action is taken on behalf of the customer. Table 303-5 illustrates accounting entries when amounts are collected for deposit to Miscellaneous Receipts Account 3041. Appropriation or fund bills for earned reimbursements shall be processed in accordance with Chapter 8 of this Volume. Thus, the FMS accounting system tracks orders into and out of the normal appropriation or fund accounting systems. The FMS accounting system is not intended to track the financial status, obligation, etc., while reimbursable performance is in process. The status of specific customer requisitions can be obtained through logistical system inquiries. Applicable logistics status reports are provided to case managers and to FMS customers and are not to be confused with financial status reports.

030302. Allotments for Direct Citation. Amounts in Column 11 of the DD Form 2060 which are coded "(A)" represent allotments of case contract authority. Allotment holders must request expenditure authority (EA) from the SAAC prior to processing the disbursements against the contract authority. Expenditure

authority is provided by SAAC from the FMS Trust Fund incrementally based upon the allottee's need to disburse funds. The allotment holder is responsible for detailed case level accounting records and for providing a monthly status-of-allotment report on each applicable FMS case that is entered into the FMS Trust Fund accounting records. Specific requirements:

A. The DoD Component which holds an allotment of the FMS Trust Fund for direct citation on contracts shall maintain detailed commitment, obligation, and expenditure records on an FMS case-by-case basis and shall provide to the SAAC a monthly status-of-allotment input reflecting these case level data. The status of expenditures shall be supported by delivery transactions in an amount equal to the current month's net change in accrued expenditures or cash advances to contractors. A manual status-of-allotment format is illustrated in Table 303-1. Automated equivalents (RE Transactions) are described in Table 303-2.

B. Monthly status-of-allotment information and associated reports of reconciliation must be submitted to arrive at the SAAC by the 20th calendar day following the close of each accounting month. This information, with detailed supporting documentation, shall be used as the basis for SAAC entries to case level accounting records and overall Trust Fund reconciliation with the U.S. Treasury. The manual format is in Table 303-1. Instructions for completion of the report follow:

1. From. Enter the name and address of the agency preparing the report.
2. To. Enter DFAS-DE/I (SAAC), 6760 East Irvington Place, Denver, Colorado 80279-2000.
3. For Authorization Issued to. Enter the name of the implementing agency and office designation.
4. Reporting Fiscal Officer. Enter the signature and rank of the reporting fiscal officer. Signature represents certification that the report is accurate and complete to the best knowledge of the fiscal officer.

5. For Period Ended. Enter the last day of the reporting month.

6. Report Project No.: For direct cite list each active FMS case for which direct cite obligational authority has been obtained (see Chapter 2). Cases shall be grouped by country and in sequence of date accepted. Provide country and agency totals. For the administrative fund allotment report break out the data by object class.

7. Annual Approved Authority. The direct cite obligational authority for each FMS case shall be obtained from Column 11 of the current year DD Form 2060.

8. Current Month Commitments. Dollar amounts shall be reported on a case basis from an FMS Trust Fund accounting subsystem. The reporting DoD Component shall retain basic source documents supporting reported amounts.

9. Cumulative Commitments to Date. This dollar amount shall be reported on a case basis and represents the total dollar value of outstanding commitments against Column 7 authority received for each case. At year end commitments shall be zero because applicable obligational authority is returned to the FMS Trust Fund.

10. Current Month Obligations. This amount shall be reported on a case basis and obtained from an FMS Trust Fund accounting subsystem. The reporting DoD Component shall retain basic source documents supporting reported amounts.

11. Cumulative Obligations to Date. This dollar amount shall be reported on a case basis and represents the total dollar value of obligations incurred in the current fiscal year.

12. Accrued Expenditures Unpaid. Dollar amounts shall be reported on a case basis and obtained from an FMS Trust Fund accounting system.

13. Cash Disbursements. Report amounts of disbursements in the current month. Disbursements shall be reported on a case basis

and obtained from an FMS Trust Fund accounting subsystem. The reporting DoD Component shall retain basic source documents supporting reported amounts. When a portion or all of the amounts previously reported are earned, show a minus figure with a corresponding entry in the disbursement column. Progress payments or advances to contractors should be broken out where available from the accounting system.

030303. Supporting DoD Components. Those DoD Components which are not implementing agencies but support the FMS program in response to implementing agency work requests must carefully review applicable work requests to determine the financing source. If the financing source is one of the implementing agency appropriation accounts, the request shall be recorded and processed as an internal DoD order. If the recipient is a suballocation holder, the required allotment status report shall be provided to the allotment holder and consolidated into the allotment status report to SAAC.

030304. Fiscal Year-End Reporting Requirements. DoD Components are required to submit certified final fiscal year consolidated hard copy DD Form 2060, Part B, and DoD Status-of-Allotment information for direct cite funds, to the SAAC. Submission dates will be established in accordance with special instructions issued by DFAS. The forms submitted may be manual forms or automated equivalents.

A. Final DD Form 2060, Part B, will contain the following certification:

"I hereby certify that this report reflects FMS Obligational Authority as required by DoD 7000.14-R, Volume 15, paragraph 020105.A."

B. Final status-of-allotment report must contain the following signed certification:

"I hereby certify that the amounts shown in this report are correct. All known transactions meeting the criteria of 31 U.S.C.1501(a) have been obligated and are so reported."

TABLE 303-1 FORMAT FOR THE DOD STATUS-OF-ALLOTMENT REPORT

[illegible]

TABLE 303-2 STATUS OF DIRECT ALLOTMENT "RE" TRANSACTION

Data Element Description and Element Abbreviation	Format/ No. of Position	FICS TRC	Edit/Validations of: REI Input--MILDEP to SAAC REF Feedback--SAAC to MILDEP
Document Identifier Code (DIC)	X(3)		
Direct Status (INPUT)	'1-3	'002	Must be "REI", if not reject.
Direct Status (FEEDBACK)	'1-3		"REF" is a machine generated duplicate of the REI transactions and appended by the Positive Transaction Control (PTC) to become the REF transactions
Transaction Control No. (YYMMDDNNNNNV)	X(13) '4-16	'152	Must be numeric (0-9)
		'152	YYMMDD must be equal to or less than current date
		'249	Version Number (V) must be "0" if Action Code is "A" (add)
		'248	Version Number (V) must be 1 thru 9 if Action Code is "C" (change) and must be one greater than suspense version No.
		'251	If Action Code is "C" (change) or "D" (delete), Transaction Control number (TCN)(excluding V) must equal suspense file. (YYMMDDNNNNNV)
Action Code	X(1) 17	'003	Must be "A", "C", or "D", otherwise invalid. A=Add; C=Change; D=Delete
Country Code (CC)	X(2) 18-19	'037	Country code MUST match SAAC Country code Table
Implementing Agency Code (IA)	X(1) 20	'038	If Site Code equals "5" or "6", IA code must be on IA Table.

TABLE 303-2 STATUS OF DIRECT ALLOTMENT "RE" TRANSACTION (CONTINUED)

Data Element Description and Element Abbreviation	Format/ No. of Position	FICS TRC	Edit/Validations of: Transactions REI Input--MILDEP to SAAC REF Feedback--SAAC to MILDEP
Case Designator	X(3) 21-23	'041	MUST match the Active Case control file or match on Case Control History.
		'031	Case status must equal "I" (Implemented) or "C" (Closed).
Amount Commitments Cumulative from Inception (CFI)	S(12)V99 24-37	156	MUST be numeric (0-9).
		310	MUST be positive amount except country Iran can be negative.
Amount Obligations (OA) Cumulative from Inception (CFI)	S(12)V99 V99 38-51	156	MUST be numeric (0-9).
		311	Must be positive amount, except country Iran can be negative.
Unpaid Government End of Period	S9(12) V99 52-65	156	MUST be numeric (0-9); may be negative.
Unpaid non-government End of Period	S9(12) V99 66-79	156	MUST be numeric (0-9); may be negative.
Date Accounting Month (YYMM)	X(4) 80-83	'016	YYMM must equal current month or one month prior.
THE POSITIVE TRANSACTION CONTROL FEEDBACK CONTAINS THE ORIGINAL REI TRANSACTION PLUS THE FOLLOWING DATA ELEMENTS FOR THE REF TRANSACTION			
Transaction Reply Code (TRC)	X(15) 84-98	FEEDBACK TRANSACTIONS ONLY. This 15 character element is appended to the feedback format of all interface transactions by the recipient system. This area will contain 1 to 5, 3-digit transaction reply codes to communicate back to the originator system the result of processing the transaction. (Left justified/space filled).	

TABLE 303-3 REPLACEMENT TRANSACTIONS

Items Sold from Inventory Entries in Procurement Appropriation Accounts
in Terms of DoD UCA (Replacement - Tank Valued at \$500,000)

1. Allotted Reimbursable Program - Current Period	\$500,000	
Customer Orders Accepted - Specific Apportionment		\$500,000
Unfilled Customer Orders - Specific Apportionment	\$500,000	
Uncommitted or Unobligated Allotments - Reimbursable Program - Current Year		\$500,000
To record receipt of DD Form 2060		
2. Cost of Sales	\$500,000	
Equipment Not in Use		\$500,000
Reimbursements Earned - Uncollected - Specific Apportionment	\$500,000	
Unfilled Customer Orders - Specific Apportionment		\$500,000
Accounts Receivable - Government (SAAC)	\$500,000	
Revenue - Reimbursable Sale of Property		\$500,000
To record shipment of tank from inventory		
3. Reimbursements Earned - Collected	\$500,000	
Reimbursements Earned - Uncollected		\$500,000
Funds Collected (Cash)	\$500,000	
Accounts Receivable - Government (SAAC)		\$500,000
To record collection from FMS Trust Fund		
4. Uncommitted or Unobligated Allotments - Reimbursable Program - Current Period	\$500,000	
Undelivered Orders - Reimbursable Program		\$500,000
To record award of contract to replace tank		
5. Equipment Not in Use	\$500,000	
Accounts Payable - Public		\$500,000
Undelivered Orders - Reimbursable Program	\$500,000	
Accrued Expenditures - Unpaid - Reimbursable Program		\$500,000
6. Accounts Payable - Public	\$500,000	
Funds Disbursed		\$500,000
Accrued Expenditures - Unpaid - Reimbursable Program	\$500,000	
Accrued Expenditures - Paid - Reimbursable Program		\$500,000
To record payment to contractor		

TABLE 303-4 NEW PROCUREMENT TRANSACTIONS

Items Procured on Reimbursable Basis Entries in Procurement Appropriation Accounts
in Terms of DoD UCA (New Procurement - Tank Contract Cost \$500,000)

1. Allotted Reimbursable Program - Current Period	\$500,000	
Customer Orders Accepted - Specific Apportionment		\$500,000
Unfilled Customer Orders - Specific Apportionment	\$500,000	
Uncommitted or Unobligated Allotment - Reimbursable Program - Current Period		\$500,000
To record receipt of DD Form 2060		
2. Uncommitted or Unobligated Allotment - Reimbursable Program - Current Period	\$500,000	
Undelivered Orders - Reimbursable Program		\$500,000
To record award of contract to procure tank		
3. Equipment Not in Use	\$500,000	
Accounts Payable - Public		\$500,000
Undelivered Orders - Reimbursable Program	\$500,000	
Accrued Expenditures - Unpaid - Reimbursable Program		\$500,000
To record delivery of tank to Army by contractor		
4. Accounts Payable - Public	\$500,000	
Funds Disbursed		\$500,000
Accrued Expenditures - Unpaid - Reimbursable Program	\$500,000	
Accrued Expenditures - Paid - Reimbursable Program		\$500,000
To record payment to contractor		
5. Cost of Sales	\$500,000	
Equipment Not in Use		\$500,000
Reimbursements Earned - Uncollected - Specific Apportionment	\$500,000	
Unfilled Customer Orders - Specific Apportionment		\$500,000
Accounts Receivable - Government (SAAC)	\$500,000	
Reimbursable Sales of Property		\$500,000
To record shipment of tank from Army to Customer		

TABLE 303-4 NEW PROCUREMENT TRANSACTIONS (CONTINUED)

6. Reimbursements Earned - Collected	\$500,000	
Reimbursements Earned - Uncollected		\$500,000
Funds Collected (Cash)	\$500,000	
Accounts Receivable - Government (SAAC)		\$500,000
To record collection from FMS Trust Fund		

NOTE: Reimbursable procurements for FMS are an exception to DoD Policy. See paragraph 070101.F.

TABLE 303-5 ITEM NOT TO BE REPLACED TRANSACTIONS

Items Sold from Inventory
 Entries in Procurement Appropriation Accounts
 in Terms of DoD UCA
 (Item Not To Be Replaced - Tank Valued at \$500,000)

1. Cost of Sales	\$500,000	
Equipment Not in Use		\$500,000
Accounts Receivable - Government (for Treasury Account 3041)	\$500,000	
General Fund Sales of Property		\$500,000
To record shipment of tank from inventory		
2. Funds Returned to the Treasury	\$500,000	
Accounts Receivable - Government (for Treasury Accounts 3041 or 4116)		\$500,000
To record the transfer of free assets to Miscellaneous Receipts Account 3041.		

NOTE: In the event entries were made to budgetary accounts to record the order against the Allotted reimbursable Program, Current Period or Unfilled Customer Orders or Specific Apportionment, the reversing of entries shall be required. There shall be no obligation recorded in the procurement accounts when proceeds from free assets are transferred to Miscellaneous Receipts Account 3041.

0304 ACTUAL ADMINISTRATIVE EXPENSE ACCOUNTING REQUIREMENTS**030401. Reimbursement for FMS Administrative Expenses**

A. Administrative expenses shall be priced in accordance with Section 706 of this Volume and charged directly to the allotment received from the SAAC for actual FMS administrative expenses. Status-of-allotment information shall be submitted in the DoD standard format prescribed in Table 303-1 and completed according to instructions in paragraph 030302.B. and 030401.C. below. In the event the allotment is used as the basis for issuing reimbursable orders to appropriation accounts, a schedule reflecting the dollar value of orders released to each appropriation shall be attached to the status-of-allotment format. Administrative expenses may not be incurred in excess of the allotment nor are DoD Components authorized to incur obligations against appropriated fund operation accounts to finance FMS administrative budgets. To summarize, appropriated funds shall not be utilized to subsidize FMS administrative operations.

B. Upon review of the budget requests submitted in response to its administrative budget call, DSAA will approve a single budget amount and SAAC will issue an allotment providing funding in the amount of the approved budget. The recipient will prepare an allotment report showing actual uses for either administrative expense. The information shall be based upon the organization designation in the DSAA budget call. Allotments for administrative expenses shall be fully funded for obligations. Receiving DoD Components shall use "no-check SF 1080" self-reimbursement procedures to reimburse appropriation accounts. Reimbursable procedures apply when the Trust Fund is not directly cited as the financing source of payrolls, contracts, or travel orders.

C. Additional instructions for completing the status-of-administrative-expense-allotment format follow:

1. Budget Project No. The status-of-allotment for administrative expenses is provided by object class:

- 11.1 Permanent civilian positions
- 11.3 Civilian positions other than permanent
- 11.5 Other civilian compensation
- 11.8 Special personnel services payment
- 12.1 Personnel benefits - civilian
- 12.2 Personnel benefits - military personnel
- 21.0 Travel and transportation of persons
- 22.0 Transportation of things
- 23.1 Rent, communications and utilities (excluding ADP)
- 23.2 ADP rent, communications and utilities
- 24.0 Printing and reproduction
- 25.1 Other services excluding ADP and BOS
- 25.2 Other services, ADP
- 25.3 Base Operations Support
- 26.0 Supplies and materials
- 31.0 Equipment-Non ADP
- 31.1 Equipment-ADP
- 42.1 Reports of Discrepancy without Transportation
- 42.2 Unfunded civilian retirement

2. Authorizations, Allotments Received to Start of Period. This column includes all current fiscal year DSAA allotments for actual FMS administrative expenses which were received to the start of the current reporting period.

3. Authorizations, Changes this Month. This column includes DSAA allotments for actual FMS administrative expenses which were granted during the reporting month.

4. Commitments, Obligations, and Disbursements. The dollar value of commitments, obligations, and disbursements shall be obtained from allotment ledgers. See paragraph 030104 for guidance on source documents required to support entries to allotment ledgers.

D. Status of Administrative Expense Allotment reports shall be supported by subsidiary allotment status reports for organizations set forth in this paragraph. Subsidiary reports shall follow this format with one exception; Block 1

shall be annotated "Subsidiary report-(Name of organization)."

1. U.S. Army Activities

- a. Army Materiel Command (AMC).
- b. Chief of Staff - Army (CSA).
- c. Surgeon General (SUR GEN).
- d. Army Adjutant General (TAG).
- e. Health Services Command (HSC).
- f. Army Training and Doctrine Command (TRADOC).
- g. U.S. Army Forces Command (FORSCOM).
- h. Information Systems Command (ISC).
- i. U.S. Army Europe (USEUR).
- j. U.S. Army Western Command (WESTCOM).
- k. Army Corps of Engineers (COE).
- l. Army-All Other.

2. U.S. Navy Activities

- a. Assistant Under Secretary of Navy (AAUSN).
- b. Navy International Program Office (Navy IPO).
- c. U.S. Marine Corps (USMC).
- d. Bureau of Naval Personnel (BUPERS).
- e. Chief, Naval Education Training Security Assistance Field Activity (NETSAFA).
- f. Naval Security Group (NSG).
- g. Commander-in-Chief Atlantic Fleet (CINCLANTFLT).
- h. Commander-in-Chief Pacific Fleet (CINCPACFLT).
- i. United States Coast Guard (USCG).
- j. Navy Supply Systems Command (NAVSUP).
- k. Naval Air Systems Command (NAVAIR).
- l. Naval Seas Systems Command (NAVSEA).
- m. Space and Naval Warfare Systems Command (SPAWAR).
- n. Navy-All other.

3. U.S. Air Force Activities

- a. Air Force Materiel Command (AFMC) (AFLC combined with AFSC).
- b. Air Force Communications Command (AFCC).
- c. Air Training Command (ATC).

- d. Pacific Air Force (PACAF).
- e. Air Mobility Command (AMC) (TAC combined with SAC and MAC).
- f. U.S. Air Force Europe (USAFE).
- g. Electronic Systems Command (HQ ESC).
- h. HQ U.S. Air Force (HQ USAF).
- i. Air Force-All other.

4. Defense Finance and Accounting Service

- a. Cleveland Center.
- b. Columbus Center.
- c. Denver Center.
- d. Indianapolis Center.
- e. Kansas City Center.

0305 INTERNAL CONTROL

030501. Objectives. This section contains, in part, the Comptroller General's internal control standards to be followed by executive agencies (to include FMS implementing agencies and SAAC) in establishing and maintaining systems of internal control as required by the Federal Manager's Financial Integrity Act of 1982 [31 U.S.C. 3512(b)][reference (j)]. Internal control systems are to reasonably ensure that the following objectives are achieved:

A. Financial management of the FMS program complies with this Volume.

B. All assets are safeguarded against waste, loss, unauthorized use, and misappropriation.

1. FMS Trust Fund monies are subject to the same basic controls as appropriated funds.

2. DoD activities must insure that FMS-related management efforts (e.g., manpower, equipment support costs, etc.) are charged to the proper reimbursable order or allotment as applicable. There must also be controls to ensure these reimbursable orders or allotments are not exceeded. If they are exceeded, a report must be submitted under the provisions of paragraphs 021201 and 021203 and internal control procedures must be reviewed to prevent recurrence.

C. Revenues and expenditures applicable to the FMS program are recorded and accounted for properly so that accounts and reliable financial and statistical reports may be prepared and accountability of the assets may be maintained.

030502. Internal Control Standards. The following internal control standards define the minimum level of quality acceptable for internal control systems in operation and constitute the criteria for financial management of the FMS program to be evaluated.

A. General Standards.

1. Reasonable Assurance. Internal control systems are to provide reasonable assurance that the objectives of this Volume will be accomplished.

2. Supportive Attitude. Managers and employees are to maintain and demonstrate a positive and supportive attitude toward internal control at all times.

3. Competent Personnel. Managers and employees are to have personal and professional integrity and are to maintain a level of competence that allows them to accomplish their assigned duties, as well as understand the importance of developing and implementing good internal controls.

4. Control Techniques. Internal control techniques are to be effective and efficient, and in accordance with the overall requirements of this Volume.

B. Specific Standards.

1. Documentation. Internal control systems and all transactions and other significant events are to be clearly documented, and the documentation is to be readily available for examination.

2. Recording of Transactions and Events. Transactions and other significant events are to be promptly recorded and properly classified.

3. Execution of Transactions and Events. Transactions and other significant events are to be authorized and executed only by persons acting within the scope of their authority.

4. Separation of Duties. Key duties and responsibilities in authorizing, processing, recording, and reviewing transactions should be separated among individuals.

5. Supervision. Qualified and continuous supervision is to be provided to ensure that the pricing and reporting requirements established in this Volume are achieved.

6. Access to and Accountability for Resources. Access to resources and records is to be limited to authorized individuals, and accountability for the custody and use of resources is to be assigned and maintained. Periodic comparison shall be made of the resources with the recorded accountability to determine whether the two agree. The frequency of the comparison shall be a function of the vulnerability of the asset.

C. Audit Resolution Standard. Managers are to (1) promptly evaluate findings and recommendations reported by auditors, (2) determine proper actions in response to audit findings and recommendations, and (3) complete, within established time-frames, all actions that correct or otherwise resolve the matters brought to management's attention. For additional guidance, see the SAMM, Chapter 13 [reference (e)].

030503. Annual Statement of Assurance

A. SAAC will be responsible for the conduct of annual review of the DoD Security Assistance accounting system. As part of the review, system managers within DoD Components which feed the SAAC central Security Assistance accounting system are required to submit to SAAC annual certifications. The feeder system certifications must contain a statement on the adequacy of feeder systems internal controls and compliancy with Comptroller General accounting principles and standards. See Table 305-1.

B. The results of the review will provide SAAC the basis for preparing the annual Statements of Assurance required under Sections II and IV of the Federal Manager's Financial Integrity Act (FMFIA) of 1982 [reference (j)].

030504. Memorandums of Agreement. Memo

randums of agreement will be negotiated between the Military Departments and DFAS for integrated security assistance systems. These MOAs will assure that DFAS identify and define accounting segments that will be under the control of DFAS and ensure compliance with accounting standards and principles.

**TABLE 305-1 ANNUAL STATEMENT OF ASSURANCE FORMAT FOR
CERTIFICATION OF FEEDER SYSTEMS**

MEMORANDUM FOR DFAS-DE/IQ

SUBJECT: Federal Managers' Financial Integrity Act (FMFIA) FY 9X Annual Certification of Feeder Systems

The (Name of System), taken as a whole, does/does not conform to the accounting principles and standards prescribed by the Comptroller General in the General Accounting Office (GAO) Policy and Procedures Manual for Guidance of Federal Agencies, Title 2 - Accounting. All systems reviewed were/were not deemed to be in substantial compliance with the Comptroller General accounting principles and standards. Instances of nonconformance were/were not detected. (If major nonconformances exist, attach a statement explaining the nature and planned corrective action for each instance.)

Point of contact is (name) DSN (number) or commercial (number).

CHAPTER 04

CASH MANAGEMENT**0401** INTRODUCTION

040101. Objectives. The objective of this chapter is to set forth procedures which will assure that cash necessary to liquidate obligations resulting from the FMS program is available when the need for disbursement arises. FMS orders create contract authority. Funds appropriated by the Congress for defense purposes cannot be used to liquidate obligations resulting from the use of the contract authority. The cash requirements (outlay authority) of each FMS customer must be met by that customer.

040102. Cash Management Characteristics

A. FMS customer cash deposits into the FMS Trust Fund for defense articles and services sold under Sections 21 and 22 of the AECA shall be made in advance of delivery, performance, or progress payments to contractors except as provided in paragraph 040102.A.1. and 2. below. Such advance cash collections to the FMS Trust Fund must also be made from Foreign Military Financing (FMF) appropriations used to finance a sale or special emergency appropriations obtained to finance deliveries under FMS orders when billing upon delivery and payment within 120 days after the date of billing is considered in the national interest.

1. Payment after delivery of defense articles from stock or rendering of in-house defense services, as authorized by Section 21 of the AECA, requires a specific determination by the Director, DSAA, that delayed payment is in the national interest.

2. All cash disbursements for a foreign country or international organization shall be identified by FMS case and shall not exceed the customer's cash deposits. A specific case may be in a deficit cash position with the deficit being funded by the customer's cash

advances on other cases. However, the cash deposited by country "X" shall not be used to liquidate obligations incurred on behalf of country "Y." A reportable adverse financial condition exists when a single FMS customer level cash summary account is in a deficit position (a credit balance).

3. There are two exceptions to the provisions of subparagraph 2. above.

a. Customer Authorization to Use Cash for Third Party. When a customer has authorized the use of its excess cash deposits to meet the cash requirements of another country an adverse financial condition exists only if the cumulative cash balance of both countries is in a deficit position.

b. Customer or DSAA Direction to Disburse Cash on a Case Basis. When a customer or DSAA has directed that cash be used only to meet disbursement demand of specific cases, then an adverse financial condition exists for each such case that is in a deficit cash position.

4. An initial deposit shall accompany FMS cases to provide the cash advance required to cover disbursements from the time the case is accepted until the first billing due date. FMS bills are prepared on a quarterly basis in January, April, July, and October. The bill includes the cash requirements for the calendar quarter following the quarter in which the bill is mailed. For example, a bill prepared in January (December cutoff, payment due March 15) is to project cash requirements through June. Thus, the initial deposit for a case accepted in December would be the cash required through June, or six (6) months of advance cash requirements. Chapter 8 contains a full discussion of the FMS billing process.

B. The FMS Trust Fund corpus is managed as a single cash entity, as outlined in

subparagraph A above, regardless of the source of the deposits; however, all FMS Trust Fund deposits are accounted for at country and FMS case level by source of financing (MAP Merger, FMS Credit, Foreign Military Financing Credit, non-repayable, or customer national funds).

C. Since the United States Government finds it in its best interest to provide Security Assistance funds annually to selected friends and allies to finance the purchase of U.S. articles and services, it is therefore in the United States Government's interest to properly utilize and manage these limited funds as effectively as possible.

1. In determining the order of funds to be paid into the FMS Trust Fund, DSAA may draw down MAP Merger funds (while available), up to the amount reserved for each case, prior to requesting the FMS customer to draw down FMS credit funds or national funds. Likewise, MAP funds on deposit in the FMS Trust Fund will be accounted for as expended prior to FMS credit or national funds deposits, and credit funds will be considered expended before national funds.

2. Security Assistance funds (MAP Merger/FMS Credits/Foreign Military Financing grants or loans) that become excess due to FMS case reduction or closure may be reapplied to other FMS cases, with DSAA approval, but may not be refunded to the FMS customer.

3. An FMS customer country, with prior DSAA approval, may provide DSAA with a properly executed, separate FMS credit drawdown letter to cover uncollected termination liability for a billing quarter. In such event, it will be necessary to deposit into the FMS Trust Fund only the amount of funds needed to cover contractual progress payments and reimbursements to Implementing Agencies during the billing quarter.

D. The DSAA is authorized to enter into a national funds investment account agreement (Tripartite Agreement) with an FMS customer and the Federal Reserve Bank of New York (FRBNY) for any country which finances all

or a significant part of its FMS programs with national funds.

1. To be eligible, the customer's FMS program must be large enough that the total amount of advance cash deposits anticipated to remain in the FRBNY account will exceed the minimum amount required for investment in short-term, 3-6 month Treasury bills. FRBNY accounts will not normally be considered for a country which finances FMS programs primarily with U.S. Security Assistance funds.

2. Subsequent to the establishment of the investment account, the customer is directed to remit all national funds payments to the FRBNY, identified to specific FMS cases. (Note: payments made from U.S. Security Assistance funds normally will not be remitted to the FRBNY account, but will be made directly to the FMS Trust Fund (unless otherwise specified in U.S. law).

3. The SAAC is authorized by the account agreement to make periodic draw-downs, usually monthly, from the FRBNY account into the FMS Trust Fund as needed to provide at all times sufficient funds to make payments during the next thirty days.

040103. Responsibilities

A. Security Assistance Accounting Center (SAAC). The SAAC is responsible for:

1. Timely posting of customer cash deposits and disbursements thereof to FMS case accounting records.

2. Reconciling summary Trust Fund level cash account balances (balance per books) to the Department of Treasury balance (balance per bank).

3. Assuring that approved cash expenditure authorities do not exceed FMS customer cash balances.

4. Identifying developing cash flow problems and alerting OSD management and implementing agencies in a timely manner.

B. Implementing Agencies. The implementing agency is responsible for:

1. Preparing and updating case payment schedules.

2. Systematically developing historical cost curves for DoD major weapon systems obtained through procurement, for use in preparing case payment schedules; and reviewing the curves periodically for validity.

3. Continually reviewing case level cash balances to assure that the payment schedule is accurate and cash is available to support any outlay requirements that may materialize for the case. This includes disbursements to reimburse DoD accounts for earned reimbursements and disbursements to contractors for billed costs, contract holdbacks and potential contract termination costs.

a. In the event payment schedules do not adequately meet the cash needs, promptly notifying SAAC of the necessity to bill and collect additional cash advances, and following up this notification by issuing a revised payment schedule via an LOA modification.

b. In the event payment schedules overstate the cash needs, due to delays in contract award, delivery slippages, or other reasons, issuing a revised payment schedule via an LOA modification.

4. Ensuring receipt of expenditure authority prior to processing a disbursement citing the FMS Trust Fund.

0402 ESTIMATING CASH ADVANCE REQUIREMENTS

040201. Method for Calculating Requirements

A. Calculation of Initial Estimate. Calculation of the cash requirements for a specific FMS case requires that case costs be subdivided into two broad cost categories. The first category is the portion of case value to be provided under authority of Section 21 of the AECA, sales from DoD inventories and the

services of DoD personnel. The second category is the portion of case value to be provided under authority of Section 22 of the AECA, procurement of hardware or contractor services for the FMS customer. The cash advance for the portion of the case classified as a Section 21 sale shall include the estimated earned reimbursements to be realized by DoD appropriation/fund accounts during the three-month period subsequent to the payment due date of the billing statement issued by SAAC. The cash advance for the portion of the case classified as a Section 22 sale shall include estimated disbursements to contractors for contractor invoices and potential disbursements to contractors if additional cash deposits are not made by the customer in a timely manner or the case is unilaterally canceled by the customer. Potential disbursements to contractors include payment of contract holdbacks and termination costs which would result if work were stopped when the cash advance available to pay contractor invoices is exhausted. The time period covered by the estimate of advance cash required is the three-month period subsequent to the payment due date of the billing statement issued by SAAC.

B. Initial Estimates of Cash Required in Support of Section 21 Effort.

1. Sales from Inventory. Estimates of earned reimbursements for inventory items shall be on the basis that requisitioned items will be dropped from inventory within 30 days after a requisition for a stocked item is issued. The drop from inventory creates the earned reimbursement. Therefore, the applicable FMS case manager will develop this portion of estimated cash requirements based upon anticipated requisition release dates.

2. Sales of DoD Services. Estimates of earned reimbursements for DoD services provided directly to the FMS customer or in support of a Section 22 contract shall be based on the estimated portion of the services which will be provided in the applicable billing period. Services also include applicable administrative and accessorial surcharges.

3. Recoupment of Nonrecurring Charges. Charges for nonrecurring costs are

earned as items are physically delivered to the FMS customer. Therefore, the cash to be collected for these charges should be based upon item delivery schedules.

C. Initial Estimates of Cash Required in Support of Sections 22 and 29 Effort.

1. Cash advances required to support procurements for FMS customers shall be based upon normal administrative and procurement lead-times for the type of commodity being procured. Table 402-1 illustrates, in terms of percentage of contract costs, the total required cash advance necessary to support contracts for aircraft and related equipment; the percentages are a function of procurement lead-times. The Table also illustrates the amount of contract value which is being collected as a reserve for potential termination costs and contractor holdback.

a. Potential termination costs or "bailout" costs represent the liability DoD has to contractors in the event termination occurs. Generally, such costs include all accrued direct and indirect costs and profits and subcontracts not covered by progress payments to the contractor, plus any penalty contract termination charges that might be realized. Potential termination costs do not include price increases to other ongoing contracts resulting from reductions in procurement quantities.

b. Contractor holdback represents amounts earned by contractors or suppliers, but held back to ensure future performance. (Normally the result of progress payments authorized at less than 100 percent.)

c. In the absence of a procurement history for a particular system, or a similar system, or cost curves obtained from a prime contractor, Table 402-1 may be used. The percentages in Table 402-1 are for procurement lead-times ranging from 6 months to 60 months. This table may be used for the development of payment schedules included in the LOA. The percentage figures shown in Table 402-1 include all applicable costs, i.e., progress payment amounts, contractor holdback, and potential termination liability. The amount of the cumula-

tive monthly payment applicable to the termination liability and contractor holdback reserve is shown in the second column (% TL) for each procurement lead-time.

2. Table 402-2 illustrates the development of a payment schedule based upon Table 402-1 percentages for the bombs under example C of the DD Form 2061 illustrated in Table 202-3. The percentages in Table 402-1 are applied only to pricing element "CC" or the new procurement value of \$800,000.

a. The figures in Table 402-2 are based on an assumed procurement lead-time of 36 months. Although assumed for the purposes of illustration, in actual practice this lead-time must be furnished by the procuring activity.

b. For purposes of illustration, the table assumes that the Letter of Offer was signed at the end of the quarter after the billing cut-off date, e.g., December 20. The table further assumes an administrative lead-time of three months to go on contract, although it is recognized that many contracts will not be let until much later. Implementing agencies should insure that realistic contract administrative lead-times are used in preparing payment schedules.

c. The initial deposit to accompany the Letter of Offer must include 50 percent of the administrative surcharge expense and the cash advance required between LOA acceptance and the first payment due date. Since the LOA illustrated in Table 402-1 was signed after the billing cut-off date, the time period between acceptance and payment due date will approximate six months (e.g. for a December 20th acceptance, SAAC would not bill until April for a due date of June 15th). Because of the 3-month administrative lead-time, no contract cost will be incurred until April. The initial deposit, therefore, will be necessary only to cover the months of April, May, and June. The cumulative percentage of contract cost for this 3-month period is 1.1%. Applying this percentage to the contract cost yields an initial deposit of \$8,800-due upon acceptance.

d. The April billing would show \$21,600 (\$30,400 - \$8,800) as the amount due on June 15 to cover the months, July, August, and September; the July billing (June cut off) would show \$34,400 (\$64,800 - \$30,400) due on September 15 and so on. The payment schedule would reflect these due dates.

e. The amount of the initial deposit to be reserved for termination liability and contractor holdback is \$352. The amount of the first bill (\$21,600) to be reserved for termination liability and contractor holdback is \$8,768 (\$9,120 - \$352) and for the second bill \$13,560 (\$22,680 - \$9,120).

f. Table 402-3 displays this payment schedule example in the standard Termination Liability Worksheet format. Table 402-1 illustrates a payment schedule that includes Section 21 sales in addition to the procurement items.

15 Dec 87	20,800	800,000	20,800	800,000	0	0

Notes:

1. Columns a and b should be identical to payment schedule in the LOA.
2. Column a = c+e.
3. Column b = d+f.
4. At end of schedule, column b = column d; column f must be zero.
5. This analysis of TL must be performed for all contracts regardless of value and must be part of a case file but need not be submitted to DSAA unless case value is over 7 million dollars. (See SAMM, Chapter 7 [reference (e)] for guidance regarding submission of Termination Liability Worksheets).

Notes:

1. Columns a and b should be identical to payment schedule in the LOA.
2. Column a = c+e.
3. Column b = d+f.
4. At end of schedule, column b = column d; column f must be zero.
5. Reserves are the same as Table 402-3 schedule; however, total payment and estimated disbursements are greater due to Sec 21 articles/services in case.
6. This example only requires an initial deposit for one quarter (reference paragraph 040302 of this Volume).

0403 PAYMENT SCHEDULES

040301. Policy. It is DoD policy that FMS purchasers be requested to pay amounts reflected in LOA payment schedules--except in those instances where potential cash disbursements are anticipated to exceed the current payment schedule. Assurance that cash is available when the necessity for disbursement arises requires that implementing DoD Components continually monitor case level cash advances and validate the accuracy of payment schedules.

040302. General. Payment schedules are a consolidated formal presentation to the FMS customer of the estimates of cash requirements resulting from application of the procedures contained in Section 402. If initial deposits are required upon acceptance of a sales agreement, the amount of initial deposits should be equal to one half of the administrative surcharge plus sufficient funds to cover all costs and contingencies (e.g., contract holdback, potential termination liability) anticipated to be incurred until the first billing statement can be rendered and monies collected. As a standard, new sales agreements can enter the billing system at the SAAC through the 10th day of the last month of the calendar quarter. Therefore, if a new agreement is anticipated to be accepted by the purchaser and received by the SAAC after the 10th day of the last month of the quarter, then the DoD Component should require an initial deposit for the first two calendar quarters of the agreement.

040303. LOA Payments

A. LOA Payment requirements will be included in each LOA in the format required by the SAMM [reference (e)]. The payment schedule portion of the LOA should be reissued via a modification when costs are expected to vary more than \$500,000 during any 12-month period covered by the payment schedule. Smaller thresholds should be established where total case value warrants.

B. Termination Liability Worksheets will be furnished to DSAA in accordance with the SAMM [reference (e)]. DSAA will retain one

copy and forward one copy to the SAAC. SAAC will record the amount of termination liability specified on the worksheets.

040304. Preparation. Any revision to the LOA payment schedule shall be prepared in the manner prescribed in this Volume.

A. It is essential that payment schedule revisions be prepared in such a manner that they are consistent with the parameters of the FMS billing cycle and their contents are clearly understood by the implementing agency, SAAC, and the FMS customer. Since the payment schedule is used by SAAC as the basis for billing the FMS purchaser, there must be an "audit trail" between the original payment schedule and any revision(s).

B. The payment dates shown on the revised payment schedule must be compatible with the FMS billing cycle. The following guidance is applicable:

Anticipated expiration/ implementation date	Earliest payment date shown in payment schedule	For costs to be incurred in
11 Mar-10 Jun	15 Sep	Oct-Dec
11 Jun-10 Sep	15 Dec	Jan-Mar
11 Sep-10 Dec	15 Mar	Apr-Jun
11 Dec-10 Mar	15 Jun	Jul-Sep

On an emergency basis, a revised payment schedule may be provided to SAAC by message or the committed values for requisition cases report (see paragraphs 040308 and 080102). However, this means of notification should be used only if a properly executed modification cannot reach SAAC within the above timeframes. Message notification must be immediately followed by a payment schedule modification.

C. In as much as payment schedules are intended to reflect "financial requirements" (which in turn relate to Column 12, Total Financial Requirements, of the DD Form 645), cumulative collections/actual payments received from the FMS purchaser (as reflected in Column 13 of

the DD Form 645) should not be used in the preparation of revised payment schedules. This caveat is especially pertinent since the FMS purchaser may over or under pay its financial requirements for a given FMS case. In the process of preparing the revised payment schedule, the following guidelines regarding specific entries are applicable (refer to the illustration in Table 403-2):

1. The "Cumulative to Date (with date specified)" entry is mandatory and must correspond with the original payment schedule in the absence of a prior revision; otherwise, the "Cumulative to Date" entry should correspond to the last revision. This entry ensures that all concerned (i.e., implementing agency, SAAC, FMS customer) have a clear understanding of the relationship between the original and revised payment schedules.

2. In the event the implementing agency desires to decrease the existing total financial requirements of the FMS case, the "Revised Cumulative to Date" entry is used. This entry will adjust the amount reflected in Column 12 (Total Financial Requirements) of the DD Form 645.

3. If an "Initial Deposit" is appropriate, such as in the instance of an amendment which increases the number of items being sold, this entry should also be shown.

4. The remaining payment date entries and associated quarterly and cumulative amounts are shown, as necessary. The implementing agency should ensure that these final entries correspond to the revised total case value (i.e., Block 13 of amendments and modifications.

040305. Forecasting Procedures. Exceptional forecasting procedures will be used for requisition cases (i.e., Supply Support Arrangement, FMSO II, and other repair parts cases). Experience has shown that most payment schedules for these cases tend to be overstated because of variations in both requisitioning and supply actions. Therefore, to preclude substantial over-billing, each implementing agency shall provide the SAAC with a "Quarterly Forecast of Financial Requirements for In-Process Cases" report and

cards (or card images). These inputs are submitted to the SAAC by the 15th day of the last month of each calendar quarter (i.e., March 15, June 15, September 15, and December 15), and reflect the most recent status of logistical commitments (on-hand unfilled requisitions). If there are no unfilled orders on the requisition case, the implementing agency should report "zero" commitment value-- a report should be submitted for all requisition cases. See Table 403-1 for instructions for preparing the FICS "BK" transaction used for the report.

040306. Committed Values. The committed (unfilled order) values for requisition cases is compared by the SAAC to the case payment schedule quarterly amounts. If the committed value for the case is less than the quarterly amount from the payment schedule, the committed value is used for the forecasted requirement in Column 11 of the DD Form 645 in lieu of the payment schedule amount.

040307. Accurate Payment Schedules. This procedure does not preclude the requirement for an accurate payment schedule to be included in the LOA for a requisition type case. If an out-of-balance condition continues to exist between quarterly payment schedule amounts and the committed value provided each quarter, a new payment schedule should be issued by the implementing agency.

040308. Delivery Status. It is a requirement that the financial and delivery status of each FMS case be reviewed periodically by the implementing agency. This review is to ascertain whether the payment schedule will provide sufficient cash to meet the requirements established in paragraph 040102 of this Volume. If not, it shall be necessary to provide SAAC a quarterly forecast of fund requirements that contains the case level data normally required as back-up to the payment schedule.

040309. Revising Case Payment Schedules. Implementing agencies will establish formal procedures for the review and revision of FMS case payment schedules as follows:

A. The payment schedule should be evaluated each time an amendment or modification is issued that affects case or line values.

B. Payment schedules for cases with performance extending beyond two years should be reviewed as indicated below:

<u>Total Case Value</u>	<u>Review Frequency</u>
1. \$100 million or less	Annually
2. \$100-\$500 million	Semi-annually
3. \$500 million and above	Quarterly

C. If the review discloses that actual disbursements and payables (see Table 402-2 column "Amount of Contract Cost") vary from estimated disbursements by more than 10%, implementing agencies should give priority to revising applicable payment schedules.

TABLE 403-2 ILLUSTRATIONS OF PAYMENT SCHEDULE REVISIONS**A. Original Estimated Payment Schedule**

<u>Payment Date</u>	<u>Quarterly</u>	<u>Cumulative</u>
Initial Deposit	\$100,000	\$100,000
15 Mar 198X	90,000	190,000
15 Jun 198X	80,000	270,000
15 Sep 198X	70,000	340,000
15 Dec 198X	60,000	400,000
15 Mar 198Y	50,000	450,000
15 Jun 198Y	40,000	490,000
15 Sep 198Y	30,000	520,000
15 Dec 198Y	20,000	540,000

B. Revision No. 1 - Upward Adjustment (Note 1)

<u>Payment</u>	<u>Quarterly</u>	<u>Cumulative</u>
Cumulative to Date (15Sep198X)	N/A	\$340,000
Initial Deposit (this amendment)	85,000	425,000
15 Dec 198X	65,000	490,000
15 Mar 198Y	55,000	545,000
15 Jun 198Y	45,000	590,000
15 Sep 198Y	35,000	625,000
15 Dec 198Y	25,000	650,000

C. Revision No. 2 - Downward Adjustment (Note 2)

<u>Payment</u>	<u>Quarterly</u>	<u>Cumulative</u>
Cumulative to Date (15Jun198Y)	N/A	\$590,000
Revised Cumulative to Date	N/A	550,000
15 Sep 198Y	15,000	565,000
15 Dec 198Y	10,000	575,000

Notes:

1. In Revision No. 1 (due at SAAC not less than 10 Sep 198X), the Cumulative to Date amount of \$340,000 corresponds to the 15 Sep 198X cumulative amount on the original payment schedule. Since there is no adjustment to the Cumulative to Date amount, there is no need for a Revised Cumulative to Date entry. However, an initial deposit (reflected on the DD 1513-1) is requested and is therefore shown.

2. In Revision No. 2 (due at SAAC not later than 10 Jun 198Y), the Cumulative to Date amount of \$590,000 corresponds to the 15 Jun 198Y entry contained in Revision No. 1. Since the implementing agency desires to reduce this amount by \$40,000, a Revised Cumulative to Date entry (\$550,000) is shown.

0404 CONTRACTOR REQUEST FOR PROGRESS PAYMENTS AND REIMBURSEMENT OF COSTS UNDER CONTRACTS INCLUDING FMS REQUIREMENTS

040401. General. Current contracting procedures permit the consolidation of DoD and FMS customer(s) requirements into a single contract. To implement FMS cash flow requirements it is necessary that an allocation be made of the amount billed to DoD and to each FMS customer. The portion of the bill which is applicable to an FMS customer can be paid only to the extent that the specific customer has deposited a cash advance into the Department of the Treasury.

040402. Contractor Allocations. The DoD FAR Supplement Clause 252.232-7002, Progress Payments for Foreign Military Sales Acquisitions, requires that if DoD contracts include FMS requirements that the contractor shall:

A. Submit a separate progress payment request for each progress payment rate; and

B. Submit a supporting schedule showing:

1. The amount of each request distributed to each country's requirements; and

2. Total price per contract line item applicable to each progress payment rate.

C. Identify in each progress payment request the contract requirements to which it applies (i.e., FMS or U.S.);

D. Calculate each request on the basis of the prices, costs (including costs to complete), subcontractor progress payments, and progress payment liquidations of the contract requirements to which it applies; and

E. Distribute costs among contract line items and countries in a manner acceptable to the Administrative Contracting Officer.

040403. Administrative Contracting Officer Allocations. To the extent that a contractual

requirement has not been established and the contractor does not allocate costs to the foreign countries or international organization, the administrative contracting office shall make such allocations before approving payment. When allocations are required, such allocations should normally be on the basis of actual performance. If it is impractical to estimate actual performance, the allocation shall be on the basis of simple dollar relationships as described in subparagraphs A. through C. below.

A. The authorized progress payment percentages will be applied to the overall contract cost to determine the amount of permissible progress payments. This amount will not be exceeded.

B. Determine the percentage relationship of the unliquidated obligations (ULO) of each accounting classification reference number (ACRN) to the total ULO of the contract. Progress payments will be allocated among the various funds based upon these percentages.

1. For example, contract has a ULO of \$600,000. ULO of ACRNs assigned are as follows:

AA	\$ 50,000
AB	50,000
AC	100,000
AD	100,000
AE	300,000

2. The applicable percentages to be used are:

AA	50/600	or	8.3%
AB	50/600	or	8.3%
AC	100/600	or	16.7%
AD	100/600	or	16.7%
AE	300/600	or	50.0%

3. Contract has a progress payment percentage of 90%. The contractor requests a payment in the amount of \$54,000 based on accrued costs of \$60,000. The payment would be processed as follows:

AA	\$54,000 x 8.3%	=	\$ 4,500
AB	54,000 x 8.3%	=	4,500

AC	54,000 x 16.7% =	9,000
AD	54,000 x 16.7% =	9,000
AE	54,000 x 50.0% =	27,000

C. Recoupment will be applied first against the line the deliveries are applicable to and the remainder against the outstanding work in process (WIP) on a percentage basis. For example, using the figures above an assuming the recoupment percentage is 90%, the contractor ships and invoices for \$30,000; \$20,000 is applicable to ACRN AD and \$10,000 is applicable to ACRN AE. As 90% of \$20,000 or \$18,000 exceeds the outstanding WIP on ACRN AD, only \$9,000 can be recouped against ACRN AD. Ninety percent of \$10,000 for ACRN AE or \$9,000 for AE can be recouped. The remaining \$9,000 to be recouped is prorated against the ACRNs with outstanding WIPs on a percentage basis as follows:

ACRN	Original WIP Less Initial Recoupment	WIP Remaining
AA	4,500 less 0 =	\$ 4,500
AB	4,500 less 0 =	4,500
AC	9,000 less 0 =	9,000
AD	9,000 less 9,000 =	0
AE	27,000 less 9,000 =	<u>18,000</u>

Computation of Percentages

AA	4,500/36,000 =	12.5%
AB	4,500/36,000 =	12.5%
AC	9,000/36,000 =	25.0%
AD	0/36,000 =	0.0%
AE	18,000/36,000 =	50.0%

The total recoupment for this transaction would be as follows:

AA	12.5% of 9,000 =	\$ 1,125
AB	12.5% of 9,000 =	1,125
AC	25.0% of 9,000 =	2,250
AD	0.0 + 9,000 =	9,000
AE	50.0% of 9,000 +9,000 =	<u>13,500</u>
Total		\$27,000

0405 DEPOSIT OF CUSTOMER CASH INTO TREASURY ACCOUNTS

040501. General. DD Form 645 and LOA financial instructions direct that foreign customer's payments (initial deposits or billing statement payments) be forwarded by wire transfer or check to the Security Assistance Accounting Center (SAAC), Defense Finance and Accounting Service-Denver Center, Denver, CO 80279-5000. However, these payments are sometimes misrouted to Office of the Secretary of Defense, Military Departments' headquarters, international logistics centers, commodity commands, etc.

040502. Receipt of Checks. Any recipient of a check from an FMS customer is responsible for depositing the check into a Treasury account within one working day after receipt. When a recipient other than SAAC is making the deposit, the deposit shall be processed as a courtesy deposit for SAAC. The following procedures apply:

A. Prepare a Treasury Deposit SF 215 deposit ticket using DSSN 3801 in block 3, Disbursing Office Symbol (example is at Table 405-1).

B. Notify the SAAC Reports and Cash Management Division (IR), DSN 926-6006, that a courtesy deposit is being accomplished. Provide the money amount, paying FMS customer (for example, Germany), and FMS case number (if available).

C. Process the deposit through a Federal Reserve Bank or supporting member bank. (Note: Endorse the check showing DSSN 3801 as the collecting organization.)

D. Send a copy of the "confirmed copy" of the SF 215 to DFAS-DE/I (SAAC), 6760 East Irvington Place, Denver, CO 80279-2000. Attach supporting documentation that was received with the misrouted payment.

E. SAAC shall voucher the collection into the FMS Trust Fund upon receipt of the SF 215.

040503. Wire Transfers. In the event inquiries are received regarding wire transfer of funds to SAAC or misrouted funds to be wire transferred, the following information pertains:

A. Wire transfers should be sent to the Department of Treasury Account at the Federal Reserve Bank of New York City, using the standard Federal Reserve Funds Transfer (FRFT) format. Wire transfers shall be accepted by the Federal Reserve System (FRS) only from banks that are members of the FRS. Foreign banks must go through a U.S. correspondent bank that is a member of the FRS.

B. The member bank shall prepare the FRFT form as outlined in Table 405-2. This information shall be provided to ensure prompt and correct application of the remittance.

C. SAAC retrieves wire transfers daily from the Treasury Financial Communications Systems (TFCS) and prepares collection vouchers from this data for crediting FMS customers.

FORMAT FOR FEDERAL RESERVE FUND TRANSFER

Detailed below are the critical data (items 2, 6, 8, 9, 10, 11) the FMS customer or its local bank must supply to the member bank. It is also shown in the exact way it must appear on the standard FRFT format. Items 1, 3, 4, 5, and 7 will be completed by the member bank in accordance with accepted Federal Reserve fund transfer procedures.

- Item 1.** Priority Code The priority code will be provided by the member bank.
- Item 2.** Treasury Department Code
The nine-digit identifier, 021030004, is the symbol of the Federal Reserve Bank of New York City.
- Item 3.** Type Code The type code will be provided by the member bank.
- Item 4.** Sending Bank Code This nine-digit identifier will be provided by the member bank.
- Item 5.** Reference Number
The reference number may be inserted by the member bank to identify the transaction.
- Item 6.** Amount
The amount will include the dollar sign and the appropriate punctuation, including cents digits.
This item will be provided by the FMS customer or its local bank.
- Item 7.** Sending Bank Name
The telegraphic abbreviation which corresponds to item 4 will be provided by the sending bank.
- Item 8.** Treasury Department Name
The telegraphic abbreviation, TREAS NYC, is a constant and is required for all funds transfer messages sent to Denver. This item must be followed by a slash (/).
- Item 9.** Agency Location Code
This code refers to a numeric symbol used to identify Federal Government entities (e.g., accounting offices, disbursing, and collecting offices).
The agency's unique code must be specified in the funds transfer message in order for the funds to be correctly classified to the respective agency. The code for SAAC is:
(3801) Defense Finance and Accounting Service.
- Item 10.** Agency Name
Enter: DFAS-DE/IR immediately after the Agency Location Code.
- Item 11.** Third Party Information
The appropriate information to identify the reason for the funds transfer should be provided by the member bank to the FRB. This data must be provided the member bank by the customer or its local bank.
For the USAF F-16 program, incoming wires for currency exchange transactions should also show the originating contractor and what organization is to receive exchange proceeds.

0406 **EXPENDITURE AUTHORITY**

040601. General. Any disbursement of Trust Fund cash by an organization other than the Security Assistance Accounting Center (SAAC) shall be made only pursuant to an expenditure authorization issued by SAAC. When SAAC issues an expenditure authorization, the cash necessary to liquidate the expenditure authorization is formally segregated in the SAAC accounting records and the cash is available for no other purpose. Normally, procurements accomplished on a reimbursable basis shall be supported by a self-reimbursement expenditure authorization. However, a cash advance to an appropriation account must be obtained when a cash disbursement for an FMS contract would, if made, result in the applicable appropriation account being placed in a negative cash position.

040602. Self-Reimbursement Expenditure Authorizations

A. The SAAC shall issue expenditure authorizations to disbursing activities when authorization to self-reimburse an appropriation fund account has been requested and approved. Each disbursing activity shall establish internal controls to ensure that reimbursable payments from the financing appropriation do not exceed the current self-reimbursement expenditure authorization. If an invoice applicable to FMS requirements is to be processed as a "transaction for others," expenditure authority shall be obtained by the disbursing activity. Accumulate and summarize all FMS payments for reimbursable work from each financing appropriation account through the use of "no check SFs 1080." Forward disbursement and supporting delivery transactions to SAAC not later than 16 days after the last day of the month in which self-reimbursement occurs.

B. Each DoD Component receiving contractor invoices shall establish internal controls to ensure that payments to contractors from the financing appropriation account do not exceed the current country-level self-reimbursement expenditure authorization. If an invoice applicable to FMS requirements is to be processed as a "transaction for others," expenditure authority must be obtained from the

holder of the self-reimbursement expenditure authorization before disbursement.

040603. Direct Cite Expenditure Authorizations

A. The SAAC shall issue expenditure authorizations to the disbursing activity. Any unused expenditure authority shall be returned to SAAC by the third work day of the following month. Each DoD Component receiving contractor invoices for contracts which reflect the FMS Trust Fund as the financing source shall establish internal controls to ensure that payments do not exceed the current country level expenditure authorization. If the invoice is to be processed as a "transaction for others," expenditure authority must be obtained from the holder of the expenditure authorization prior to disbursement.

B. The status-of-allotment report to be submitted by holders of an allotment for direct cite of the FMS Trust Fund (11X8242) on contractual documents provides for the identification of disbursements by FMS case and is to be supported by delivery transactions. A reconciliation statement must accompany the status-of-allotment report to identify disbursements that have been made but not included in the status-of-allotment report.

040604. Procedures. As a minimum, when expenditure authorization procedures are used, Heads of DoD Components shall:

A. Ensure procurement instruments state that disbursement of funds is not authorized until clearance has been obtained from the holder of the expenditure authorization.

B. Identify the holder of the expenditure authorization in the procurement instrument or other correspondence, if payments are processed on a "transaction for others" basis.

C. Ensure that paying activities request authorization prior to making FMS-related disbursements. Telephone clearance may be used provided the holder of the expenditure authorization formally confirms the authorization within 48 hours. Formal confirmation includes memoranda, electronic message, data fax, or overnight mail.

D. Establish internal controls to ensure that payments (direct citation or reimbursable financing) do not exceed the current country (customer) level authorization.

E. Identify disbursements to a specific FMS Case, reimbursement code, record serial number, dollar value and such other information as necessary to match disbursements to the applicable delivery transactions.

F. Ensure that procurement accounts are reimbursed within 10 working days after the disbursement has been recorded in the accounting activity's official expenditure records.

040605. Cash Advances. When cash advances are required, they shall be processed on an "as required" basis. The amount requested shall be equal to anticipated disbursing demands for a 30-day period. Liquidation of outstanding advances (earning the advance through payment to contractors) shall be reported to SAAC monthly. The objective is to limit the amount and length of time that outstanding advances remain against the Trust Fund.

040606. Cash Flow Problems. In the event a cash flow problem results in SAAC's inability to provide cash advances or expenditure authorizations and contractor billings cannot be paid by the due date, the provisions of paragraph 070403.B. of Chapter 7 of this Volume shall be followed.

040607. Automated Formats. Table 406-1 is an example of the automated format used to request/authorize expenditure authority. The "SZF" (feedback) provides positive transaction control. Other "S" formats in the series are used to process and control disbursement data. Included in Table 406-1 are particulars of the edits performed on the data. Specific details and instructions on how this format is used are contained in the FMS Integrated Control System (FICS) document.

**TABLE 406-1 EXAMPLE OF NOTIFICATION OF

CHAPTER 05

COLLECTING AND REPORTING FMS INDEBTEDNESS AND ARREARAGES**0501** INTRODUCTION

050101. Objective. The objective of this chapter is to establish procedures to be used for the collecting and reporting of FMS foreign indebtedness. It incorporates pertinent portions of Volume 6, Chapter 12, [see reference (k)], relating to foreign military sales indebtedness. If there is a conflict between this Chapter and Volume 6, the latter will be used as the source of authority.

050102. Responsibilities

A. The Defense Finance and Accounting Service is the DoD point of contact for matters concerning foreign indebtedness (non-FMS) requirements imposed on DoD from outside the Department, such as by the Congress, the Treasury Department, or the National Advisory Council (NAC) on International Monetary and Financial Policies.

B. DSAA is responsible for coordinating FMS feeder arrearage reports submitted by the SAAC. These FMS reports will be incorporated into the single consolidated DoD arrearage report submitted to the Treasury Department in accordance with reference (k). DSAA shall also monitor FMS collection actions and follow up when initial collection actions have been unsuccessful.

C. The SAAC is responsible for taking initial collection action, accounting for indebtedness, preparation of feeder arrearage reports, and providing copies of the arrearage reports to the DSAA.

0502 COLLECTION PROCEDURES

050201. Initial and Follow-Up Actions. SAAC is responsible for taking timely and aggressive

billing and follow-up collection action to obtain advances required from FMS customers pursuant to authorized programs as follows:

A. Initial Billing. Billings for advances required under the FMS program shall be initiated by using the DD Form 645 (Foreign Military Sales Billing Statement) or Defense Security Assistance Agency supplementary billing statements in accordance with Chapter 8 of this Volume. Since the amounts not paid on individual cases may ultimately result in a country-level arrearage, follow-up actions shall be taken for non-payment of amounts due at case-level by the due date in accordance with procedures in paragraph B below. Country-level follow-up actions, described in subparagraph C, shall be taken for non-payment of total amounts due at country-level by the due date on a net basis (considering all sources of available funds). Arrearages and interest penalties are determined at country level. See Table 503-1 for the timing of these actions.

B. Case-Level Follow-Up Actions. Based on the payment due date in the applicable billing statement, SAAC shall take initial written follow-up action in the following circumstances:

1. For cases when the payment due is \$1 million or more or where the case closure is pending receipt of customer funds, written follow-up action should be taken 30 days after the payment due date to notify the country that payment has not been received. If no response is received, additional written follow-up action shall be made 60 and 90 days after the payment due date. SAAC will refer case-level late payments more than 120 days after payment due date to DSAA for further action. A sample format for the three follow-up actions is contained in Table 502-2.

2. Where the full or partial non-payment of the amounts due would place the

FMS customer's Trust Fund balance in an arrearage position (per paragraph 050302), follow-up action should be taken on an individual case 30 days after the payment due date. If no response is received, additional written follow-up action shall be made 60, 90, and 120 days after the payment due date. A sample format for the three follow-up actions is contained in Table 502-2.

3. For cases where the payment due is less than \$1 million, and the lack of payment would have no significant impact on the FMS customer's Trust Fund balance, written follow-up action will be taken 60 days after payment due date. A sample format for this follow-up action is contained in Table 502-2.

4. If payments on loan-financed cases have not been received 30 days after the payment due date, SAAC should determine the status of any loan drawdown letters that may be in preparation or have not as yet been executed. For any amounts still not covered, SAAC should immediately initiate written follow-up action to the customer, citing the unpaid amount by case, and requesting the customer to prepare a loan drawdown letter or to make cash payments to cover the amounts due. These letters should be coordinated with DSAA/COMPT-FMD prior to dispatch. If the payments due remain unpaid 60 days after the payment due date, refer the matter to DSAA Comptroller for further action.

C. Country Level Follow-Up Actions. Based on conditions 3 and 4 shown in Table 502-1, SAAC shall take initial written follow-up action using the following procedures:

1. All country-level unpaid accounts receivable and arrearages (see paragraph 050302) require written follow-up action by SAAC should payment for billings not be received by the required date. The initial written follow-up actions will be taken 30 days after the payment due date.

2. If no response is received, additional written follow-up action will be made 60, 90, and 120 days after the payment due date.

3. The fourth follow-up letter is prepared by DSAA.

4. A copy of all follow-up actions will be maintained by SAAC until final disposition of the bill. Copies of follow-up letters prepared by SAAC will be sent to DSAA. A sample format for the follow-up actions is contained in Table 502-3.

050202. Referral of Unpaid Bills. All country-level foreign indebtedness (arrearages) not collected within 90 days after the due date will be reported to the Treasury (see Section 1203 of Volume 6). When reporting arrearages for the first time, SAAC will include copies of the previous follow-up letters along with any responses received. SAAC will assure that DSAA is immediately notified of any payment received after referral. This is essential to preclude unnecessary and possibly embarrassing diplomatic collection actions being continued after payment has been received. Detailed directions for reporting these arrearages are prescribed in Sections 1203 and 1204 of Volume 6.

050203. Collection of Unpaid Bills

A. DSAA will prepare a fourth follow-up letter on arrearages and will use all available means to effect collection of the foreign arrearages within 60 days of initial referral of the reported arrearages. A copy of this follow-up letter will be provided to SAAC.

B. After the 60 days have elapsed, all arrearages from foreign countries and international organizations which cannot be collected through DoD efforts and are not compromised, terminated, or suspended in accordance with paragraph 120207 of Volume 6, shall be referred to the Department of State via the Assistant Secretary of Defense (International Security Affairs)(ASD(ISA)), with a request for diplomatic assistance to effect settlement. Data provided to the State Department will include a listing of delinquent billings to country. The State Department will provide appropriate listings to the American Embassies, whose personnel will contact the appropriate officials in their respective countries to assist in any follow-up action.

050204. Identification of Arrearages. An arrearage represents a past due amount for materiel which have been delivered, services which have

been performed, and for progress payments to contractors on behalf of a customer. Cash in advance of such performance is required for FMS customers unless a written determination has been made pursuant to legal authority; see paragraph 070104.D., "Payment Terms." There

fore, in the FMS program, an arrearage is an exceptional event. If an arrearage does occur, it is on a net country basis (considering all sources of funds) and followed up in accordance with procedures set forth in Volume 6, Chapter 12 of this Volume.

TABLE 502-1 ANALYZING THE STATUS OF COUNTRY DEPOSITS

CONDITIONS	CASH POSITION (ALL SOURCES)	BILLING DUE/ PAYMENT STATUS	ACCRUED EXPENDITURES	DEBT OR ARREARAGE STATUS
1*	6 Months or more cash available	Billed per schedule Unpaid after due date	Less than cash available from all sources	No Debt
2*	6 Months or less cash available	Billed per schedule Paid on due date	Less than cash available from all sources	No Debt
3**	Less than 6 months cash available	Billed per schedule Unpaid after due date	Less than cash available from all sources	Debt
4***	Less than 6 months cash available	Billed per schedule Unpaid after due date	More than cash available from all sources	Arrearage
<p>*No country-level follow-up required - no current accounts receivable.</p> <p>**Country-level follow-up is required. This accounts receivable will be aged (see paragraph 050302 of Volume 15 of this Regulation. Termination liability is a component of debt but not arrearage.</p> <p>***Country-level follow-up is required. This accounts receivable will be aged and the country will be reported to the Treasury on TFS Form 4503.</p>				

TABLE 502-2 CASE-LEVEL FOLLOW-UP EXAMPLE LETTER

[Country/Organization Address]

Dear [Mr/Ms Addressee]:

Records of this activity reflect that payment has not been received to date for statement _____ covering (services/support/ material) furnished in accordance with the contractual agreement between the U.S. (Military Service) and the Government of _____ (for Foreign Military Sales Case _____) dated _____.

A copy of the original bill (or a list of cases) is attached.

If you have any questions concerning the statement of this letter, please contact (name/symbol/phone) for assistance.

An early response will be appreciated.

Sincerely,

Signature

TABLE 502-3 COUNTRY-LEVEL FOLLOW-UP EXAMPLE LETTER

[Country/Organization Address]

Dear [Mr/Ms Addressee]:

Records of this activity reflect that payment has not been received to date for statement _____ covering purchases furnished in accordance with the contractual agreements between the U.S. Military Services and the Government of _____. Interest will be charged for all disbursements not covered by cash deposits. In addition, we are required to report to the Department of Treasury indicating an arrearage position for your [country/organization] in the FMS Trust Fund account.

A copy of the original bill (or a list of cases) is attached.

It is requested that an immediate response be made in order to preclude alternative actions which might result from further delay in payment.

Sincerely,

Signature

0503 REPORTING OF FMS ACCOUNTS RECEIVABLE

050301. General. According to the AECA the DoD may enter into contracts for the procurement of defense articles or services for sale to any foreign country if such country agrees (1) to pay the full amount of such contract which will assure the USG against any loss on the contract, and (2) to make funds available in such amounts and at such times as may be required to meet the payments required by the contract and any damages and costs that may accrue from the cancellation of such contract (termination liability), in advance of the time such payments, damages, or costs are due. Accordingly, amounts payable to SAAC for sales of defense articles and services under these terms which require payment in advance of delivery/performance, or within 60 days thereof, will be classified as accounts receivable when the aggregate amount of available cash is less than required to support six months of average disbursements (see paragraph 030205). The six months rule may be revised based on evaluation by DSAA or official agreements executed with the country. Unpaid amounts on bills rendered when available cash exceeds the six months rule are for the convenience of the FMS customer, thus follow-up and aging of accounts receivable are not required. SAAC, with DSAA coordination, shall submit reports of foreign indebtedness related to FMS sales to the Treasury on TFS Form 4503 when conditions cited in paragraph 050302 occur.

050302. Basis for Reporting Arrearages on Accounts Receivable. A delinquent receivable is defined as a receivable that remains unpaid after its due date (see condition 3 in Table 502-1). A country-level arrearage on a delinquent accounts receivable occurs when total accrued costs exceed total available cash (see condition 4 in Table 502-1). Amounts to be reported shall be determined by analyzing unpaid bills using the criteria and definitions contained in Volume 6, Chapter 12 [see reference (k)] and the following supplementary guidance. The "total amount outstanding" and the "amount due and unpaid 90 days or more" will be determined as follows:

A. Countries will be reported as having a "total amount outstanding" (arrearage) in column 3 of the TFS Form 4503 based upon DSAA review of reports submitted by DFAS-DE. DFAS-DE will report using the following criteria:

1. The accrued expenditures recorded in Column 10 exceeds (a) the total in column 13 of the DD Form 645 on a net country basis (adjusted for over-collected cases) plus the country's cash resources (including holding accounts, interest-bearing accounts, and undisbursed FMF) or, (b) the total of the amount paid on the DSAA supplementary bill plus the country's cash resources (including holding accounts, interest-bearing accounts, and undisbursed FMF).

2. When column 13 exceeds the accrued expenditures in column 10 and/or the cash resources exceed a six months' supply, no accounts receivable exists; therefore, the DFAS-DE will not report the country.

3. DSAA will review the DFAS-DE reports in the context of paragraph 050204 of this Volume to determine the values to be reported in column 3 of the TFS Form 4503.

B. Entries to column 5 of the TFS Form 4503 will be the amounts reported for the previous quarter less collections received during the current period.

050303. Reports Required

A. Report Preparation. Instructions for the preparation of TFS Form 4503 is contained in paragraph 120307 of Volume 6 of this Regulation [also see reference (k)]. To facilitate preparation of the consolidated Department of Defense report by DFAS, data for the military sales portion of the TFS Form 4503 shall be determined by DSAA. Instructions are provided in Sections 1205 and 1206 of Volume 6 of this Regulation. Country codes currently published in the Security Assistance Management Manual [reference (e)] shall be cited on the TFS Form 4503. Conversion of the data to the Treasury Country Codes as contained in Appendix 8 of the Treasury Fiscal Requirements Manual [reference (l)] shall be made by DFAS.

B. Submission. The Treasury Department requires the submission of FMS and non-FMS indebtedness reports within 30 days after the end of the quarter. DFAS-DE shall provide the report to DSAA within 20 days after the end of the quarter. DSAA will respond to DFAS-DE within five working days. One copy of the report shall also be provided to the Comptroller, DoD and ASD(ISA). Copies of the reports may be distributed within the Military Departments as desired

C. Flash Report of Major Foreign Debt Arrearages. Major foreign debt arrearages are monitored by the NAC. Therefore, periodically DSAA will request flash reports from SAAC to satisfy NAC requirements for information on major FMS debt arrearages. For this purpose, a "major" FMS debt arrearage is any program arrearage which involves the sum of \$250,000 or more. Flash reports will be submitted directly to DSAA in message form. The report shall reflect any significant changes in major FMS debt arrearages from the quarterly FMS indebtedness report submitted in accordance with Section 502. Collections, information on increased indebtedness, problems encountered in unsuccessful collection attempts, or country circumstances which may adversely affect collection are examples of the information which should be included in the flash reports.

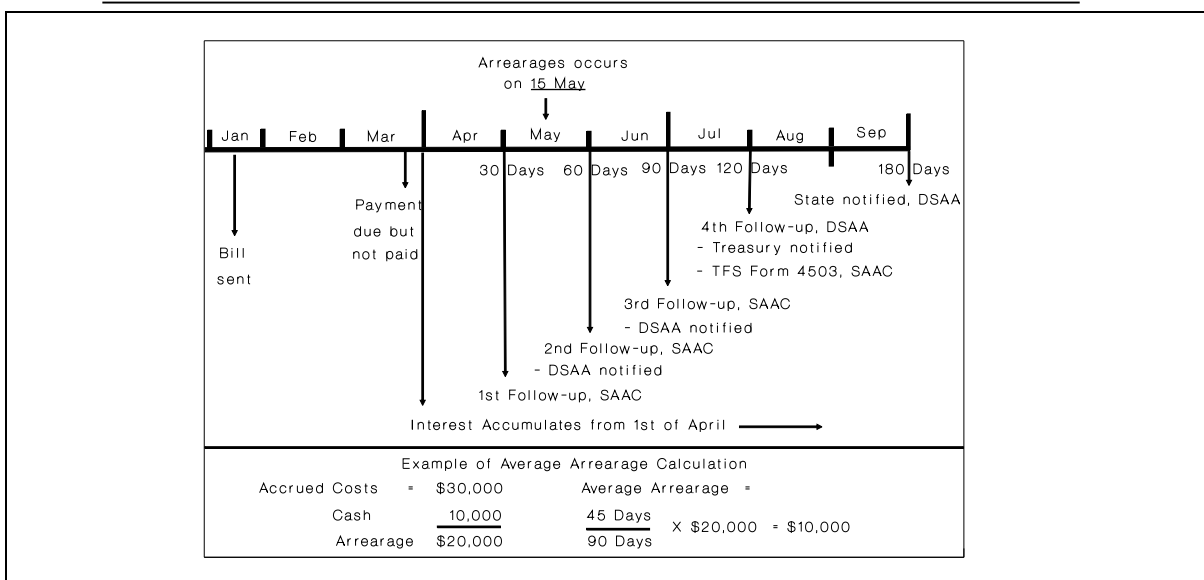

050304. Interest Charges on FMS Accounts Receivable Arrearages. SAAC shall analyze arrearages to determine if the interest charges set forth in paragraph 070104.B.5. must be assessed. Amounts subject to interest shall be determined by following the procedures set forth in paragraph 050302.A. Interest shall accumulate from the due date of the billing statement for the period during which accrued expenditures exceeded customer deposits. For example, a billing statement with a due date of March 15, is for funds to be disbursed during April, May, and June. Interest shall accumulate from the 1st of April if expenditures exceed customer deposits during the April/June quarter. Interest will be assessed based on the average arrearage during the month. See Table 503-1.

050305. Information Requirements. The requirements prescribed by Volume 6, Chapter 12 of this Regulation have been assigned the following reporting control numbers:

A. TFS Form 4503, "Current Status Accounts Receivable (Original Maturity of Less than 90 Days) from Foreign Obligors, "Interagency Report Control Number 0105-TD-QU.

B. Flash Report of Major Foreign Debt Arrearages, RCS: DSAA (AR) 1122.

TABLE 503-1 ILLUSTRATION OF THE TIMING OF FOLLOW-UP ACTIONS

CHAPTER 06

CASE FILES**0601** INTRODUCTION

060101. Objective. As an FMS case is never formally closed from a DoD accounting perspective, all supporting documentation should be retained for an indefinite period. Therefore, the objective of this chapter is to establish guidance as to those documents to be maintained as part of the FMS case file. The guidance is designed to facilitate uniformity of FMS case file maintenance and insure that necessary documentation is readily available and retrievable by the appropriate activities. The "total file" of each FMS case, although maintained in a decentralized manner by the various activities having responsibility for certain phases or actions associated with the case, must be able to stand as a comprehensive record of all relevant correspondence, worksheets, officially-prepared forms, etc., thus constituting a complete audit trail from the time of case initiation to case closeout/retirement. The case manager should maintain a directory of supporting documentation locations.

060102. Concepts and Requirements

A. FMS case files shall, to the extent practicable, be maintained in legal-sized folders, uniformly tabbed (e.g., Tab A, Tab B, etc.), in the manner discussed in Section 602. In those instances when more than one file folder is required, the folders shall be appropriately numbered (e.g., 1 of 2, 2 of 2, etc.). The documents/data placed in each folder shall be maintained in chronological sequence by tab.

B. It is neither necessary nor intended that each activity, e.g., NAVILCO, possess and file all the documents associated with a given FMS case. Rather, it is sufficient that each DoD implementing Component be able to identify which activities are to file what kinds of documents, so that in the event of an audit it is clear from the beginning what organizational entities

are responsible for preparation and/or filing of such documents. For example, the LOA is likely to be on file at several activities, e.g., Navy IPO, NAVILCO, SAAC, etc.; however, the quarterly requisition report (QRR) applicable to that case would likely have more limited distribution.

C. It is recognized that certain records associated with a case are in the form of bulky computer listings, etc., and are not conducive for placement in legal-sized folders. In such instances where a "tab" relating to such information has been identified in Section 602, it is sufficient to indicate in a general written procedure, on the case cover sheet, or within the tab itself, where such information can be located. The purpose for including such documents, or cross reference notes to such documents, is to ensure that the integrity of the case audit trail is maintained and that sufficient information is not overlooked at time of case execution/closure.

D. The uniform FMS case folder, as outlined in Section 602, depicts those documents considered to be of primary relevance on a DoD/joint-service basis. It is recognized that there may be additional documents which a DoD Component may want included as part of the case file. The inclusion of such documents is encouraged and it is recommended that the documents be filed in the form of numbered appendices following in sequence after the lettered tabs.

E. The value of the uniform FMS case folder, aside from the limited audit aspect, is that it ensures a uniform and systematic approach to case file maintenance and, with the proper management attention, can serve as a checklist of planned and completed actions and thereby facilitate the case management/closure process. Further, the existence of such a file would facilitate supervisory reviews and should ease the transfer of ongoing FMS case management responsibilities, e.g., during time of personnel transfers and internal workload realignments.

060103. Responsibilities. Each DoD implementing agency and the Security Assistance Accounting Center shall be responsible for maintaining their respective portions of the FMS case file in the manner prescribed in Section 602.

0602 UNIFORM FMS CASE DOCUMENTATION

060201. Documentation Requirements. The documentation outlined in the following tabs is the minimum required for complete and efficient FMS case management.

A. Tab A (General Information Cover Sheet). Contents:

1. Case identifier.
2. Cognizant personnel (names and phone numbers for ease of reference. Show dates of tenure if responsibilities shift from one individual to another during the life of the case).

a. Case negotiation action officer at:

b. Country/case manager at:

(1) Systems Command HQ, e.g., the Case Administering Office.

(2) International Logistics Control Office (ILCO).

(3) Security Assistance Accounting Center.

c. Others (as required).

(1) Inventory/Item Manager focal point.

(2) Procurement Office focal point.

3. Key case planning milestones are shown in Table 602-1.

B. Tab B (Letter of Request Information). Contents:

1. Letter of Request (LOR) for Price and Availability (P&A) Data--if relevant to the eventual Letter of Offer and Acceptance (LOA).

2. Pricing data used in the preparation of an LOA.

3. Information/correspondence relative to any preliminary inquiry.

C. Tab C (Planning Information). Contents:

1. P&A Data--relative to the FMS case.

2. LOA Data used to prepare the LOA format.

a. Tasking letters.

b. Internal memoranda/worksheets.

c. Financial Analysis and Termination Liability Reserve Data, if applicable.

d. Methodology of computing the payment schedule reflected in the LOA.

3. Response(s) to foreign purchaser--if initially presented in a format other than a DD Form 1513.

D. Tab D (Security Assistance Survey Documentation). Contents:

1. Defense Requirements Survey Report (or cross-reference to where such report is located).

2. Site Survey Report (or cross-reference thereto).

E. Tab E (FMS Contractual Instruments). Contents:

1. Letter of Intent (DD Forms 2012 and 2012-1).

2. Letter of Offer and Acceptance (LOA).

3. Amendment to Offer and Acceptance.

4. Modification of Letter of Offer and Acceptance.

5. Any Memoranda of Understanding (MOU) or Memoranda of Agreement (MOA) relating to the above instruments.

6. Correspondence relative to internal review/coordination.

a. Congressional notification documentation.

b. Letter forwarding advance, unsigned LOA to purchaser while awaiting Congressional review.

c. Letter of Transmittal of counter-signed LOA.

7. Correspondence/letters of transmittal to purchaser and acceptance of DD Form 1513.

F. Tab F (Credit/Loan Arrangements). Contents: Include, as necessary, for FMS case management, copies of Loan Agreements, requests for special waivers from routine loan conditions, etc.

G. Tab G (Financial Control Documents). Contents:

1. Request/Approval of FMS Obligational Authority (DD Form 2060, or automated system equivalent).

2. FMS Planning Directive (DD Form 2061, or automated system equivalent).

3. Expenditure Authorizations.

4. Documentation concerning DoD Component internal delegations of obligatory and expenditure authorizations.

5. Final DIFS Financial Management Worksheet.

H. Tab H (Implementation Directives). Contents:

1. FMS Program/Case Directives, Program Management Plans, Implementing Project Directives, Implementation Letters, etc.

2. Amendments/updates to the above documents.

I. Tab I (DSAA 1200 System Updating Documents). Contents: Include copies of worksheets or other evidence that the DSAA 1200 System has been updated at the appropriate times.

J. Tab J (Execution Documentation). Contents:

1. Purchase Requests.

2. USG contracts with commercial vendor.

3. Work requests.

4. Military Interdepartmental Purchase Requests (MIPRs).

5. Internal billing documentation, e.g., Standard Form (SF) 1080, DD Form 250, TDY orders/vouchers, etc.

6. Requisition/document control listings, e.g., Quarterly Requisition Report (QRR), etc.

7. Invitational Travel Orders.

K. Tab K (Special Logistics Documents). Contents:

1. Cooperative Logistics Supply Support Arrangements (CLSSA)--Foreign Military Sales Order (FMSO) I Equity Listing.

2. Concurrent Spare Parts (CSP) Listing.

3. Other, e.g., USAF AFLC SAMIS local management reports, etc.

L. Tab L (Accessorial Charges). Contents: Include applicable documentation to substantiate the reporting of actual, in lieu of using the estimated percentage, PCH&T rates.

M. Tab M (Government Furnished Materiel). Contents:

*Note: The inclusion of government furnished materiel (GFM) as part of an FMS case requires special attention from a financial standpoint inasmuch as the GFM becomes a part of the major item being procured. Accordingly, unless this information is included as part of another tab, this tab should contain documentation as follows.

1. Listing by contract number of contracts under which GFM can be requisitioned by contractors.

2. Listing, by requisition/document numbers, of GFM.

3. Worksheets/back-up data showing that Defense Transportation System (DTS), and Packing, Crating and Handling (PCH&T) for other than stock fund/Defense Business Operations Fund items have been added to the base price of GFM.

N. Tab N (FMS Billing Documentation). Contents:*

1. FMS Billing Statement (DD Form 645), and FMS Delivery Listing and financial forecast attachments. (Note: Reply to customer requests for adjustments filed in subsequent tab.)

2. SAAC-prepared Command Pay Listing (if and when filed in case file folder).

3. SAAC-prepared Financial Management Worksheets.

4. Documentation/Listings relating to delivery transactions.

5. Local SAAC worksheets/correspondence: in SAAC-maintained case file folder appendices.

6. Correspondence related to DFAS authorized exceptions to normal billing procedures.

*Note: The detailed nature and size of these and other listings may make their filing in the case folder impractical. In such instances, it is sufficient to have a local record/checklist, showing that the listings have been reviewed as necessary to monitor progress, detect errors, etc.

O. Tab O (Discrepancy Reports). Contents:

1. Reports of Discrepancy (SF 364).

2. Correspondence/documentation relative to such discrepancies.

3. SAAC-prepared reply to customer requests for adjustments listing.

P. Tab P (Management Reviews). Contents: Include the minutes and other correspondence stemming from an FMS Implementation Review, Country Program/Case Review, FMS Financial Management Review, etc.

Q. Tab Q (Case Closure Documentation). Contents:

1. DoD Component's case closure certification to SAAC. (Note: Final DD Forms 2060/2061 should be on file in "Financial Control Documents" tab.)

2. Correspondence with SAAC or other organizations relative to above certification.

3. Final Billing Statement (DD Form 645).

4. Correspondence resulting from the Case Closure Board.

5. Case Closure Checklist Sheet (for DoD implementing agencies) shown in Table 602-2.

6. Case Finalization Certificate for cases using the accelerated case closure procedures.

7. Directory for location of stored case records.

R. Tab R (Reopened Case Documentation). Contents:

Note: This tab is only operative if the case, once officially closed, must be reopened.

Documentation would include:

1. Correspondence/data as to why the case had to be reopened.

2. Refinalized DD Forms 2060/2061 (filed in "Financial Control Documents" tab).

3. Closure Certification.

4. Final Statement (DD Form 645).

060202. Documentation Maintenance and Disposition. The documentation will be accumulated throughout the life of the case as events occur (e.g., P&A completed, LOA accepted, contract signed, etc.) through case closure. Military Departments can retire, not destroy, closed case file records to record holding areas upon receiving a copy of SAAC's final statement (DD Form 645) to the FMS customer and the case is closed by SAAC and the MILDEP. SAAC can retire, not destroy, closed case file records no earlier than three years from the date of last correspondence with the customer.

CHAPTER 07

PRICING**0701** INTRODUCTION

070101. Objectives. The objective of this chapter is to establish policies and procedures that shall ensure that DoD Components uniformly and consistently apply pricing principles and methodologies that recoup current period costs and a reasonable contribution to sunk investment costs. Sunk investment costs represent historical decisions to expend R&D funds to develop new equipment or to purchase assets or facilities. Although the original investment decision was based entirely on DoD requirements, FMS customers benefit from the investment decision when they purchase related equipment, or use of the assets and facilities is necessary in order to provide ordered services or to deliver ordered materiel. Questions concerning Chapter 7 should be referred to DoD Deputy Comptroller (Management Systems).

070102. Responsibilities. DoD Components selling materiel or services under authority of the AECA [reference (a)] shall:

A. Ensure that materials and services provided to FMS customers are priced in accordance with the policies established in this chapter.

B. Make reasonable effort to ensure that price estimates provided to FMS customers are a reasonable approximation of the final price. However, the fact that an estimate is not consistent with the final cost accumulation does not negate the requirement to establish a final price (actual cost) in accordance with this chapter.

C. Establish a single selling price for any item sold, unless DSAA has authorized provision of more detailed cost information to an FMS customer. When appropriate, the item price shall include the additive charge for nonrecurring RDT&E and production costs, recurring procurement support efforts, transportation costs when the DTS is approved and used, etc.

D. Present prices of defense articles and services to FMS customers in the format of FMS Letters of Offer and Acceptance and, in general, use the LOA unless a waiver is obtained from the Director, DSAA, to use a suitable substitute instrument. Any substitute instrument should contain the same cost elements as those identified on the LOA. The administrative surcharge percentage prescribed in this chapter is subject to change without prior approval of the customer; therefore, the percentage (for example, 3 percent) should not be indicated on the LOA.

E. Cite directly the FMS Trust Fund (97-11X8242) on contractual documents for new procurements initiated as a result of FMS orders, unless the provisions of paragraph 010402 apply. In the event it is necessary to accomplish new procurement on a reimbursable basis, the procuring DoD Component shall obtain obligational authority from the FMS Trust Fund. Payment to contractors for the FMS portion of contracts may not exceed the amount of cash deposited by the FMS customer in the FMS Trust Fund in advance of the payment.

F. The direct cite procedures set forth in subparagraph E., above, shall be used when major items are procured for FMS customers, unless an exception has been granted by the Comptroller, DoD.

G. For other than Defense Business Operations Fund materiel, ensure that transportation of materiel sold to FMS customers is accomplished through the use of collect commercial bills of lading to the maximum possible extent. When transportation is accomplished through the use of Government Bills of Lading (GBLs) including Defense Business Operations Fund materiel, the GBL shall be annotated to show that Section 10721 of the Interstate Commerce Act of 1887 [reference (m)] is not applicable and that normal commercial rates shall be billed to the U.S. Government for the shipment.

H. Assign a case manager to each active FMS case. This case manager shall be responsible for the total financial and logistical aspects of a case. This includes ensuring that prescribed pricing policies are followed and that delivery transactions have been processed to SAAC. The case manager's authority to direct shall be commensurate with these responsibilities. The case manager shall be located at a national inventory control point or command having the primary responsibility for implementing the case. Refer to Chapter 7 of DOD 5105.38-M [reference (e)] for additional discussion on case management responsibilities.

I. Price sales to the Special Defense Acquisition Fund (SDAF) in accordance with the provisions of this chapter with the exception of the charge for nonrecurring costs. Activities reporting the sale of SDAF assets to SAAC will apply nonrecurring recoupment costs to the FMS price charged to the SDAF at the time of sale to a foreign purchaser (see Section 717)

J. Those situations in which the USG "buys back" items from foreign nations initially sold under FMS programs are not considered FMS transactions. Once items are sold, any "buy back" is outside of the FMS program and must be conducted in accordance with procurement rules involving the obligation of DOD appropriations. Monies due as a result of such procurement may be paid by the DOD paying office into the Trust Fund in accordance with the foreign country's instructions.

070103. Estimating Prices for a Letter of Offer and Acceptance

A. The pricing policy of this chapter specifies how costs are to be determined at the time the FMS customer is billed. This policy also provides an indication of how a price estimate is to be developed for the Letter of Offer and Acceptance. An essential difference between the billed price and the estimated price on an offer is the degree of firmness associated with each. On the FMS Billing Statement (DD Form 645), the price, particularly at that point in time in which actual costs are known and reported to SAAC, should be firm and exact (the exception being "E" (Estimated) price code transactions).

The billed cost (except when a rounded dollar indicator code is utilized) is detailed in dollars and cents. On the LOA, it is to be a reasonable approximation of the amount which will ultimately be billed, with OSD inflation indices and other factors considered. Typically the analyst must make certain assumptions in order to develop an estimated price. Amounts to be placed on the LOA will be rounded to the next dollar. Cases are written as either defined order, blanket order, or Cooperative Logistics Supply Support Agreement (CLSSA). Pricing for each requires special treatment. Moreover, a case may involve lines which are defined order or blanket order while CLSSA cases have no other lines.

1. Defined Order. Cases for specified items, services, or training usually are written with regard to systems which the U.S. forces are procuring or have procured. Agencies involved in procuring these systems should have available estimates of the expected costs. These estimates may be used as the basis for developing the FMS price, but must be validated for configuration and for delivery. Applicable additives detailed in other sections of this chapter must be applied. When a price estimate must be inflated for delivery of a weapon system several years in the future, use OSD published inflation indices. If other factors apply, those factors must be documented in case files and justified for Comptroller, Department of Defense approval when submitting Letters of Offer to the Defense Security Assistance Agency for counter signature. When developing an estimate for weapon systems in different configurations than those for which service estimates are available, it is advisable to try to obtain contractor estimates at the contract level required to identify the difference. See "Military Standard 881A Work Breakdown Structures for Defense Materiel Items" for the definition of these levels.

2. Blanket Order. These dollar-value cases (or lines incorporated in system sales cases) are written for a category of materiel or services with no definitive listing of items or quantities. For hardware support items, the price developed may be based on either a computer listing of specific parts, or a percentage of the cost of the major system to be supported. In other instances, the price on the LOA may

simply be a dollar-value line to enable the customer to requisition such items as publications. In this latter case, the amount written into the offer will be dependent on the estimated activity in the country's program. In developing a price for LOA purposes where a blanket order is involved, the source of supply may not be known. In this case, certain assumptions must be made. For example, in writing a blanket order case for spare parts for an aircraft, an agency may have to assume that all items will come from stock and each item will be less than \$10,000. Except for stock fund/Defense Business Operations Fund items, this may allow the analyst to apply the full packing, crating, and handling, and transportation charges (NOTE: These two charges are already included in the standard price for stock fund/Defense Business Operations Fund items). However, at the time of the billing for delivery of an item charged to the case, the appropriate surcharge will be applied in accordance with Chapter 8. Those agencies that have developed an ordering history for certain countries or weapon systems may be able to develop a ratio of items from procurement and items from stock which enables a more precise application of surcharges for the estimate. When developing a price for items to be delivered beyond the period for which pricing data is available, it will again be necessary to apply inflation factors as in defined order cases. One exception to consider is that once the inflated item price is developed, then apply the FMS replacement surcharge for annual procurement appropriation items to insure that the estimate foresees all additives.

3. Cooperative Logistics Supply Support Arrangement cases may be priced as in subparagraph B. See Section 707 of this Volume for specific guidance.

B. Individuals involved in preparing LOAs must keep in mind how performance or a request for reimbursement is going to be reported to SAAC following acceptance of the offer by the FMS customer. The implementing agency must be able to determine the cost to be billed based on the provisions of this chapter. This task can be particularly difficult when more than one activity is involved in fulfilling the requirements of a line or Record Serial Number (RSN)

of a case. The activity preparing the delivery transactions must be aware of all of the costs they are to report and also the costs that will be added by SAAC in accordance with paragraph 080501 of this Volume. Cases involving items which must be shipped to one or more activities before final shipment to the FMS customer can require several delivery transactions in order to account for all costs. Cases involving major procurements may result in a large volume of progress payments being submitted. These are necessary to ensure that the cost balances are adequate to cover costs as they are incurred. The tables in this chapter and Chapter 8 illustrating these reports must be studied carefully to insure all costs are correctly reported.

070104. Legal Background

A. General. Section 1 of the AECA [reference (a)] provides that sales are approved only when they will further the security objectives of the United States and the purpose and principles of the United Nations Charter.

B. Pricing Requirements

1. Price of Services and Stock. Section 21(a) of the AECA [reference (a)] provides that a foreign country or international organization pay in U.S. dollars:

a. In the case of a defense article not intended to be replaced at the time a sales agreement is entered into, not less than the actual value thereof.

b. In the case of a defense article intended to be replaced at the time a sales agreement is entered into, the estimated cost of replacement of such article, including the contract or production costs less any depreciation in the value of such article.

c. In the case of a sale of a defense service, the full cost to the United States Government of furnishing such service, unless the service is training provided under the terms in subparagraph 3.a. below in which case, only the additional costs that are incurred in furnishing such assistance are to be recovered.

2. Charges Applicable to Services, Stocks, and New Procurements. Section 21(e) of the AECA provides that the selling price shall include appropriate charges for:

a. Administrative services, calculated on an average percentage basis to recover the full estimated costs (excluding unfunded civilian retirement costs, military salaries and a pro-rata share of fixed base operations costs) of administration of sales made under the Act to all purchasers of such articles and services.

b. A proportionate amount of any nonrecurring costs of research, development and production of major defense equipment, except of equipment wholly paid for either from U.S. military assistance funds, Section 503(a)(3) of the Foreign Assistance Act of 1961, or from U.S. credit funds made available on a non-repayable basis under Section 23 of this Act.

c. The recovery of ordinary inventory losses associated with the sale of defense articles that are being stored at the expense of the purchaser of such articles.

3. Training Price Exceptions to Section 21(e). Under certain conditions less than the full cost of training may be charged:

a. In the case of training sold to a purchaser who is scheduled to receive International Military Education and Training (IMET) during the same fiscal year in which the sale of training is made, only those additional costs that are incurred by the United States Government in furnishing the training shall be charged.

b. Section 21(g) of the AECA [reference (a)] authorizes the President to enter into North Atlantic Treaty Organization standardization agreements in carrying out Section 814 of the Act of October 7, 1975, (P. L. 94-106), and to enter into similar agreements with Japan, Australia, New Zealand, and with other countries which are major non-NATO allies for the cooperative furnishing of training on a bilateral and multilateral basis, if the financial principles of such agreements are based on reciprocity.

Such agreements shall include reimbursement for all direct costs but may exclude reimbursement for indirect costs, administrative surcharges, and costs of billeting of trainees (except to the extent that members of the United States Armed Forces occupying comparable accommodations are charged for such accommodations by the United States). Each such agreement shall be transmitted promptly to the Speaker of the House of Representatives and the Committees on Appropriations, Armed Services and Foreign Relations of the Senate.

4. Price of New Procurement. Section 22(a) of the AECA [reference (a)] requires eligible countries or international organizations to pay the full amount of the contract and any damages and costs that may accrue due to the cancellation of such contracts when the U.S. Government enters a contract for a new procurement on their behalf. Payment to the USG by the foreign country or international organization is to be in U.S. dollars.

5. Interest. Section 21(d) and 22(a) of the AECA [reference (a)] require that interest be charged on any net amount by which a country or international organization is in arrears under all of its outstanding unliquidated dependable undertakings considered collectively. The interest charged shall be at a rate not less than a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding short-term obligations of the United States as of the last day of the month preceding the net arrearage and shall be computed from the date of net arrearage.

6. Price of Design and Construction Services. Section 29 of the AECA [reference (a)] requires foreign countries or international organizations to pay the full cost of design and construction services and any damages and costs that may accrue due to the cancellation of such contracts when the U.S. Government enters into a contract for design and construction services on their behalf.

C. Cost Recoupment Waivers and Exclusions

1. Waiver of Nonrecurring Cost Recoupment Charges. Section 21(e)(2) of the AECA [reference (a)] provides the President may reduce or waive the charge or charges which would otherwise be considered appropriate under paragraph 070104.C.2 for particular sales that would, if made, significantly advance United States Government interest in North Atlantic Treaty Organization standardization with the Armed Forces of Japan, Australia, or New Zealand, in furtherance of the mutual defense treaties between the United States and those countries, or foreign procurement in the United States under coproduction agreements. This authority has been delegated to the Director, Defense Security Assistance Agency (DSAA).

2. Special Waiver Authority for NATO E-3A. 10 U.S.C. 2350e [reference (n)] provides that the Secretary of Defense, in carrying out the Multilateral Memorandum of Understanding (MMOU) between NATO Ministers of Defense on the NATO E-3A Cooperative Programme, signed by the Secretary of Defense on December 6, 1978, the MOU for operation and support of the NATO Airborne Early Warning and Control Force signed by the US Ambassador to NATO on September 26, 1984; the addendum to the MMOU dated December 7, 1990; and any follow-on support agreement to the NATO E-3A Cooperative Programme may waive reimbursement for:

a. Personnel cost applicable to services performed by personnel other than personnel employed in the Airborne Warning and Control System (AWACS) program office for:

- (1) Auditing
- (2) Quality assurance
- (3) Codification
- (4) Inspection
- (5) Contract administration
- (6) Acceptance testing
- (7) Certification services

(8) Planning, programming, management services

b. Any surcharge for administrative services otherwise chargeable. The law also authorizes the Secretary to assume contingent liability for:

(1) Any program losses resulting from the gross negligence of any contracting offices of the United States.

(2) Identifiable taxes, customs duties, and other charges levied within the United States on the program.

(3) The United States' share of unfunded termination liability. The authority contained in section 2350e currently expires on September 30, 1993. DoD will continue to seek extension of that authority in accordance with the provisions of the MMOU.

3. Waiver of Contract Administration Services (CAS). Section 21(h) of the AECA [reference (a)] provides that the President is authorized to provide (without charge) quality assurance, inspection, contract administration services, and contract audit defense services in connection with:

a. The placement or administration of any contract or subcontract for defense articles, defense services, or design and construction services entered into after October 29, 1979, by, or under the AECA [reference (a)] on behalf of, a foreign government which is a member of NATO, if such government provides such services in accordance with an agreement on a reciprocal basis, without charge, to the United States Government.

b. The placement or administration of any contract or subcontract for defense articles, defense services, or design and construction services pursuant to the NATO Infrastructure Program in accordance with an agreement under which the foreign governments participating in such a program provide such services, without charge, in connection with similar contracts or subcontracts.

c. In carrying out the objectives of subsection 21(h) cataloging data and cataloging services may be provided to NATO or to a member government of NATO, if NATO or the member government provides such services without charge to the United States on a reciprocal basis.

d. The authority set forth in (a) and (b) to negotiate and conclude such agreements has been delegated to the Assistant Secretary of Defense (Acquisition & Logistics).

e. When a waiver has been approved, the cost of contract administration in support of the applicable effort shall be funded by a DoD appropriation. Billings for such actual costs shall not be submitted against the FMS Trust Fund.

f. Countries with waivers are listed in DoD 5105.38-M, Security Assistance Management Manual (SAMM)[reference (e)], Figure 1301-1.

4. Special Waiver Authority for NATO Cooperative Projects.

a. Section 27 of the AECA [reference (a)] provides that the President may reduce or waive the charge or charges in connection with cooperative projects or agreements entered into under the authority of that section. The charges that may be reduced or waived are those that are otherwise considered appropriate under section 21(e) of the Act (see paragraph 070104.B.2. "Charges Applicable to Services, Stocks, and New Procurements", above) in connection with sales of defense articles and services from stocks or new procurements when the other participants agree to waive or reduce such charges.

b. Waiver authority of the President under section 27 has been delegated to the Director, DSAA.

c. Administrative surcharges shall not be increased on other sales made under the AECA [reference (a)] in order to compensate for any cost waivers which are granted pursuant to Section 27 of the Act. Funds

received pursuant to such other sales shall not be available to reimburse the costs incurred by the United States Government for which waiver or reduction is approved by the President under Section 27 of the Act.

5. Waiver of Cost of Military Pay and Entitlements for Defense Services Funded by the Military Assistance Program (MAP) or Non-Repayable FMS Credit.

a. Section 503(a) of the FAA [reference (a)] of 1961, as amended, provides for elimination of the cost of military pay and entitlements if the sales case for defense services (including training) or for design and construction services is totally financed by the Military Assistance Program (MAP) or by non-repayable FMS credit.

b. Services provided under Sections 21, 22, or 29 of the AECA [reference (a)] shall be priced to exclude military pay and entitlements (including retired pay accrual) only for those cases citing MAP funds and/or FMS Credit (Non-repayable) as the exclusive method of funding on the LOA. This pricing applies when services are performed regardless of the date of the LOA. For MAP, the pricing applies to services provided after September 30, 1985; for non-repayable credit, the pricing applies to services provided after September 30, 1989. DSAA will commit MAP funds and non-repayable credits on all service cases that cite such funding prior to release to the country. Any subsequent amendment/modification serving to reduce the MAP or non-repayable credit funding below 100 percent shall require repricing to add military pay and entitlements to the entire case.

6. Exchange of Training and Related Support. Section 30.A. of the AECA [reference (a)] empowers the President to provide training and related support to military and civilian defense personnel of a friendly foreign country or an international organization. Such training and related support is specifically to be provided by a Secretary of a Military Department and only when the recipient foreign country or international organization agrees, pursuant to an agreement or other arrangement, to pro-

vide comparable training and related support on a reciprocal basis to personnel under the jurisdiction of the Secretary providing the training. The reciprocal training must be provided within a reasonable period of time which may not be more than one year. If such training is not provided, then the country or international organization receiving such training shall be required to reimburse the United States for the full costs of the training and related support provided by the United States.

7. Special Authorities. In connection with the administration of the European Air Defense Agreements, the Secretary of Defense is authorized under Section 132 of the International Security and Development Cooperation Act of 1985 [reference (a)] to (1) waive any surcharge for administrative services otherwise chargeable under Section 21(e)(1)(A) of the AECA [reference (a)], and (2) waive any charge not otherwise waived for services associated with contract administration for the sale under the Act of Patriot air defense missile fire units to the Federal Republic of Germany (FRG) contemplated in the agreements.

8. Fair Pricing. Under sections 21 and 43 of the Arms Export Control Act, charges for non-recurring costs are not required for foreign military sales cases wholly funded with MAP or non-repayable FMS credits. In addition, asset use charges are no longer applicable to FMS transactions. In addition, military salaries and unfunded costs of civilian retirement and other benefits are not included in the FMS administrative account. However, when such expenses are included in, or are a part of, the standard prices charged for goods and services furnished by working capital funds, a separate price shall not be established for sales from, or services furnished by, working capital funds in connection with FMS cases and the standard price shall be charged as is the case with all other sales and services furnished by working capital funds.

D. Payment Terms

1. Sales from Stock of Defense Articles and Services. Payment shall be made in advance, or if the President determines it to be

in the national interest, upon delivery of the defense article or rendering of the defense service. The authority to determine that payment upon delivery is in the national interest has been delegated to the Director, DSAA. If billings are made at delivery, they shall be due and payable upon receipt. Interest shall be charged on any net amount due and payable which is not paid within 60 days. The period may be extended to 120 days if a determination is made that emergency requirements of the purchaser for acquisition of defense articles or defense services exceed the ready availability to the purchaser of funds sufficient to pay in full for them within the 60 day period. If this is done, the determination must be submitted to the Congress along with a special emergency request for the authorization and appropriation of additional funds to finance such purchases.

2. Sales of New Procurement Items and Construction Services. Payment shall be made in advance of the need to meet contract payments required by the contract and any charges and costs that may occur from the cancellation of a contract.

3. Authorization and Appropriation of Emergency Funds. The President may issue letters of offer which provide for billing upon delivery of the defense article or rendering of the defense service and for payment within 120 days after the date of billing. This authority may be exercised, however, only if the President also determines that the emergency requirements of the purchaser for acquisition of such defense articles and services exceed the ready availability to the purchaser of funds sufficient to make payments on a dependable undertaking basis and submits both determinations to the Congress together with a special emergency request for authorization and appropriation of additional funds to finance such purchases under the Act.

4. Special Instructions Applicable to Section 23 (Credit Sales) and Section 24 (Guaranties) of the AECA [reference (a)]

a. Section 23 of the Act provides the authority to finance sales of defense articles and defense services to friendly countries and international organizations, subject to the

availability of appropriations for such purpose. The authority is a method for financing the payment terms set forth in 1 and 2 above. The customer must repay principal used within 12 years after the delivery of applicable articles or the rendering of the service. The interest charged shall be at a rate determined by the President, except that it may not be less than 5 per cent. Currently, such interest on any unpaid balance is paid at a rate equivalent to the current average interest rate, as of the last day of the month preceding the financing of such procurement, that the United States Government pays on outstanding marketable obligations of comparable maturity.

b. Section 24 of the Act provides the President may guarantee loans made by any individual, corporation, partnership, or other juridical entity doing business in the United States (excluding United States Government agencies other than the Federal Financing Bank) to finance FMS purchases or direct commercial purchases by friendly countries and international organizations. Funds previously obligated under Section 24(c) constitute a single reserve for the payment of claims under such guaranties. A fee of 1/4 of 1 percent is charged on each loan guaranteed.

070105. Crediting of Earned Reimbursements

A. General. DoD appropriation/fund accounts or Miscellaneous Receipts Account 3041, "Recoveries Under the Foreign Military Sales Program," are entitled to reimbursement when DoD services or inventory items are sold under Section 21. An entitlement to reimbursement also results from Section 22 procurement actions if direct cite procedures for financing applicable contracts are not used. The general rule applicable to the sale of DoD services is that the financing account current at the time of performance is credited with applicable budget authority and subsequent cash collections. When items are sold from inventory, the financing account current at the time items are dropped from inventory is credited with applicable budget authority and subsequent cash collections. When appropriation/fund accounts are used to finance FMS procurements, the account current at the time the order is accepted is credited with

budget authority and subsequent cash collections.

B. Elements. The various cost elements which may be involved in performance of an FMS order and the accounts which are to be credited are shown in Table 701-1.

C. Special Defense Acquisition Fund

1. The International Security and Development Cooperation Act of 1981 enacted on December 29, 1981, [reference (a)] authorizes the establishment of a Special Defense Acquisition Fund (SDAF). The SDAF is capitalized by collections that normally would be deposited into Miscellaneous Receipts Account 3041. Deposits may consist of:

a. Collections made from sales under letters of offer issued pursuant to Section 21(a)(1)(A) of the AECA [reference (a)] representing the actual value of defense articles not intended to be replaced in stock under the terms and conditions of section 114(c)(2) of title 10 United States Code, which provide for the deposit of such collections provided that the deposit does not cause the amount in the SDAF to exceed \$1,070,000,000.

b. Collection from sales representing the value of charges for the proportionate recoupment of nonrecurring research and development and production costs.

2. The SDAF has been assigned account symbol 11X4116. A monthly report of disbursing officer credits to 11X4116 shall be provided to DSAA. Separate subheads shall be used under 11X4116 to identify the source of the collections. The subheads that apply are as shown in Table 701-2.

TABLE 701-1 COST ELEMENTS

<u>Cost Element</u>	<u>Account Credited</u>
A. Services of military personnel:	
(1) Composite standard military pay rate	Military Personnel (MP) Appropriation
(2) Leave and holidays factor when applicable. See paragraph 070203.	Military Personnel (MP) Appropriation
(3) Personnel support costs Appropriation	Operations and Maintenance (O&M)
(4) Retirement cost prior to 1 Oct 84	Miscellaneous Receipts Account 3041
B. Services of Civilian Personnel:	
(1) Salary cost and wages	O&M Appropriation; Research, Development, Test, and Evaluation (RDT&E) Appropriation; Industrial Fund (IF)/Defense Business Operations Fund, as applicable
(2) Leave and holidays factor when applicable. See para 070102	O&M, RDT&E, IF, as applicable
(3) DoD funded civilian retirement cost	O&M, RDT&E, IF, as applicable
(4) Health and life insurance and other employee e.g., fringe benefits	O&M, RDT&E, IF, as applicable
(5) Civilian retirement cost not funded by DoD appropriations	Miscellaneous Receipts Account 3041
C. Inventory Items:	
(1) Nonexcess Procurement Funded item which requires replacement	Financing procurement appropriations as applicable, current at the time items dropped from inventory
(2) Nonexcess Procurement Funded item that will not be replaced within the obligation availability of current procurement appropriations	Miscellaneous Receipts Account 3041 or Special Defense Acquisition Fund 11X4116.1, as applicable, see para. 070105.C.1.
(3) Excess and Nonexcess Stock Fund/Defense Business Operations Fund items	Defense Business Operations Fund
(4) Excess procurement funded principal items	Miscellaneous Receipts Account 3041 or 11X4116.2, as applicable, see para. 070105.C.1.

TABLE 701-1 COST ELEMENTS (CONTINUED)

D. Nonrecurring cost recoupment charges (Collected as a result of Foreign Military Sales or direct commercial sales)	Miscellaneous Receipts Account 3041 or 11X4116.3, as applicable, see para. 070105.C.1.
E. Transportation	Financing appropriation/fund current at the time transportation is provided
F. Logistics Support Charge	MP, O&M, RDT&E, or Defense Business Operations Fund current at the time services are performed or Miscellaneous Receipt Account 3041, as applicable.
G. Royalty fee charges	Miscellaneous Receipts Account 3041 or 11X4116.3, as applicable, see para. 070105.C.1.
H. Charges for the use of DoD assets (includes depreciation on purchased equipment)	Miscellaneous Receipts Account 3041 or 11X4116, as applicable, see para. 070105.C.1. Depreciation which is included in Industrial Fund (IF)/Defense Business Operations Fund shop rates shall be retained by the IF/Defense Business Operations Fund
I. FMS contract costs financed by DoD appropriation or fund accounts	Financing procurement appropriation or Defense Business Operations Fund as applicable
J. TDY costs financed by appropriation or fund accounts	O&M and RDT&E appropriations cur- rent at the time travel is performed, or IF, as applicable
K. Accessorial Surcharge:	
(1) Packing, crating, and handling (PC&H)	O&M appropriation current at the time services are performed, or IF, as applicable
(2) Transportation	O&M appropriation current at the time transportation is provided, or IF, as applicable
L. FMS administrative surcharge (This is a combination of cost elements A., B., and J.)	MP, O&M, RDT&E, or IF current at the time services are performed or Miscellaneous Receipts Account 3041, as applicable
M. Contract Administration Services (This is a combination of cost elements A., B., and J.)	MP, O&M, IF, or Miscellaneous Receipt Account 3041, as applicable

TABLE 701-1 COST ELEMENTS (CONTINUED)

N. Interest charge resulting from late payment of billings (DD Form 645, "Foreign Military Sales Billing Statement") for accrued expenditures	Miscellaneous Receipts Account 3210, General Fund Proprietary Receipts, Defense Military not otherwise classified
O. Mailing fee, storage and publications	O&M or revolving fund, as applicable
P. Inventory losses	Applicable procurement or revolving fund, as applicable

Note: DoD Components shall maintain internal records of the dollar amounts applicable to each category of collections deposited into Miscellaneous Receipts Account 3041. One decimal subaccount will be required for each type of collection. For example 3041.3 might be used to designate dollar amounts applicable to nonrecurring cost recoupment, including royalty fees, as a result of direct commercial sales.

TABLE 701-2 SPECIAL DEFENSE ACQUISITION FUND ACCOUNT SYMBOLS

<u>Basic Symbol/Limit</u>	<u>Source of Collections</u>
11X4116.1XXX	Nonexcess procurement funded items which will not be replaced within the obligation availability of current procurement appropriations. (See paragraph 70105.C.1.a., this Volume, which pertains.)
11X4116.2XXX	Excess stock fund/Defense Business Operations Fund and procurement funded items. (See paragraph 070105.C.1.a., this Volume, which pertains.)
11X4116.3XXX	Nonrecurring RDT&E and production charges, including royalty fees.
11X4116.7XXX	Payments from FMS or MAP funds for sale of SDAF equity in contracts and inventories.
11X4116.8XXX	Payments from MILDEP appropriations for SDAF items transferred to the MILDEP for temporary use and which are not returned to SDAF.

0702 **PRICING OF PERSONNEL SERVICES**

070201. General. Except for those costs which may be excluded from charges in certain cases which were discussed in preceding paragraphs, charges to the FMS program for DoD personnel, except for those assigned to DoD training installations or performing contract administration, shall be computed in accordance with this section. This includes personnel costs recouped as direct charges, that is, special management services, mobile training teams (MTTs), technical assistance teams (TATs), or technical assistance field teams (TAFTs). It also includes personnel costs that are recouped indirectly through the administrative surcharge. The calculation of personnel costs shall include travel time, both temporary duty travel and permanent change of station, when the travel directly results from performance of an FMS case. The actual hours of personnel supporting foreign commercial contracts shall be accumulated and priced at the hourly FMS rates prescribed annually by the Office of the Comptroller, DoD memorandum. This memorandum is usually issued in October or November. When industrially funded/Defense Business Operations Fund personnel are utilized other than at the industrial fund site, price civilian personnel using the current annual salary and appropriate acceleration factors without overhead costs.

070202. Civilian Personnel. Services performed by DoD civilian personnel shall be priced at standard pay rates in effect at the time the services are performed. Tables in Appendix C contain the general schedule pay rates. The standard pay rates shall be accelerated to recover the funded cost of the U.S. Government's contribution for civilian employee benefits, such as retirement, insurance and health plans, cash awards, and, where applicable, the U.S. Government's share of social security taxes and leave and holidays. Acceleration factors are reviewed by the Office of the Comptroller, DoD and adjusted as appropriate through memoranda. Factors in effect at the date of this publication are listed on the pay tables at Appendix C. Civilian personnel costs shall be based on an average work week of 40 hours. The indicated percentages at the bottom of the tables (or the factors in effect at the time of services, if not in

those tables inclusive time periods) shall be used for acceleration factors. The acceleration factor for leave and holidays shall be applied only when reimbursements are based on time actually worked, that is, when the foreign country does not otherwise pay for costs incurred during leave or holiday periods. See paragraph 070104.C.8. for the impact of "Fair Pricing" legislation on civilian personnel services in calculating charges for administrative services under section 21(e) of the Arms Export Control Act [reference (a)]. Pricing is illustrated in Table 702-1.

070203. **Military Personnel**

A. Military personnel services shall be priced using the composite standard pay rates current at the time services are performed. Tables in Appendix C contain the annual pay rates. Monthly, daily, or hourly rates can be obtained by multiplying the annual rate by the applicable factors shown at the bottom of the table.

B. Since fiscal year 1985, the annual composite standard military rates include the cost of retirement. However, these composite rates must be accelerated to recover the cost of other benefits. Leave and holiday costs are added when reimbursements are based on time actually worked, such as when the foreign country does not otherwise pay for the personnel costs incurred by the Department of Defense during leave and holiday periods. The additive amounts for retirement, leave and holidays, and other benefits are expressed as percentages of the composite standard pay rate and are listed as the acceleration factors beneath the composite rates in each table. Pricing computations are illustrated in Tables 702-2, 702-3, and 702-4.

C. For FY 1980 and the prior fiscal year, the composite standard rate shall also be increased by the appropriate permanent change of station (PCS) costs. PCS costs for these years are additive after any other increases for retirement, leave and holidays, and other benefits.

D. Beginning in FY 1981, PCS costs are included in the composite standard pay rates in the appropriate tables in Appendix C and are subject to the acceleration factors beneath the

pay tables. In situations where military personnel are required to make a PCS move to support an FMS case, the PCS rate shall be deleted from the composite rate and the actual PCS cost charged to the case. In the latter situation, the actual PCS cost is not subject to acceleration.

E. FMS cases which are fully financed with MAP funds and/or non-repayable FMS credits shall be priced to exclude the cost of salaries and entitlements of military members. This is effective in FY 86 for MAP-financed cases and in FY 90 for cases financed by non-repayable credits. This exclusion applies only to above-the-line costs and not to associated surcharges, e.g., military salaries included in the administrative surcharge, and the contract administration surcharge.

070204. Indigenous Personnel. Indigenous personnel services shall be priced at actual costs or at standard pay rates. Standard pay rates shall not be used when known to be less than actual costs. Both actual cost and the standard pay rate shall include an estimated amount to cover such benefits as sick leave, maternity leave, death, accident, unemployment, and retirement (separation) when such benefits are paid to indigenous employees or specifically required by the laws of the foreign government.

070205. Travel and Living Allowances. Travel, per diem, living allowance payments, and other entitlements to DoD personnel working on FMS cases shall be identical to the payments and entitlements of DoD personnel working on direct DoD mission assignments at similar locations. The FMS case shall be priced to include the amount paid to employees or centrally funded through authorized DoD entitlement programs.

070206. Special Instructions Applicable to Industrial Funds/Defense Business Operations Funds. Industrial fund/Defense Business Operations Fund facilities will charge applicable approved non-DoD stabilized inventory rates and prices for services in support of FMS cases except where special rates may be applicable.

TABLE 702-1 CIVILIAN PERSONNEL SERVICES PRICE COMPUTATION EXAMPLE

100 HOURS OF CIVILIAN EFFORT (GS-12)
AT NAVY INSTALLATION IN JANUARY 1989

Direct Labor Hours	100
FY 89 Hourly Rate (Fourth Step) (\$38,039/2087) ¹	<u>\$18.23</u>
Direct Labor	\$1,823.00
Leave and Holiday Acceleration Factor (18%)	<u>328.14</u>
Subtotal	\$2,151.14 =====
Unfunded Retirement Factor (14.7%) ²	316.22
Fringe Benefits Factor (15.8%) ³	<u>339.88</u>
Pay Cost and Cost of Acceleration Factors	\$2,807.24
4% Asset Use Charge ⁴	<u>112.29</u>
FMS Selling Price ⁵	\$2,919.53 =====

¹ To compute the hourly pay rate for FY 84 and beyond, divide the general pay by 2087 hours. For prior years, use 2080 hours.

² Credit the unfunded portion of civilian retirement to Miscellaneous Receipts Account 3041.

³ The fringe benefits factor includes the employer's share of retirement, health benefits, life insurance, etc.

⁴ Credit to Special Defense Acquisition Fund or Miscellaneous Receipts Account 3041 as appropriate. Note: Asset use was canceled November 30, 1989.

⁵ Administrative surcharge is additive to the selling price.

NOTES:

- A. See Table 804-5 for billing.
- B. For illustrative purposes the above example is based on costs and acceleration factors in effect for FY 1989. Refer to Appendix C or current Comptroller, DoD guidance for costs and acceleration factors to be used in the current year.

TABLE 702-2 MILITARY PERSONNEL SERVICES PRICE COMPUTATION EXAMPLE

200 HOURS EFFORT BY NAVY MILITARY PERSONNEL (O-4 AND E-7)
AT CUSTOMER LOCATION IN JUNE 1984

		<u>O-4</u>		<u>E-7</u>		<u>TOTAL</u>
Direct Labor Hours		100		100		
Hourly Composite Pay Rate (FY 1984)						
O-4 (\$47,040/2080)		22.62				
E-7 (\$27,948/2080)		X		X	13.44	
Composite Pay Cost		\$2,262.00		\$1,344.00		
Leave and Holidays ¹	18.0%	<u>407.16</u>	18.0%	<u>241.92</u>

Temporary Duty (TDY) costs (includes per diem and transportation)				200.00	
Total Costs		<u>\$3,763.51</u>		<u>\$2,674.03</u>	<u>\$6,437.54</u>
4.0% Asset Use Charge ³					257.50
FMS Selling Price					<u>\$6,695.04</u>
					=====

¹ Before September 9, 1983, the method of applying acceleration factors was to add all factors and apply a single percentage to pay cost. Refer to Appendix C or current Comptroller, DoD guidance for costs and acceleration factors to be used in current year.

² Credit to O&M or RDT&E, as applicable.

³ Credit to SDAF or Miscellaneous Receipts Account as appropriate. Note: Asset use was canceled November 30, 1989.

⁴ For purposes of charging asset use, the service location may be a CONUS/overseas USG-owned activity. Asset use applies to both personnel services and associated TDY costs in this example.

TABLE 702-4 MILITARY PERSONNEL SERVICES PRICE COMPUTATION EXAMPLE

1 YEAR OF ARMY MILITARY PERSONNEL (O-4 AND E-7) TO
FMS CUSTOMER INSTALLATION (ALL PCS IN FY 86)

	<u>O-4</u>	<u>E-7</u>	<u>TOTAL</u>
Yearly Composite Pay Rate ¹ (FY1986)	\$66,137.00	37,241.00	
Applicable Acceleration Factors ²			
Other Personnel Cost ³	6.0%	18.0%	
Cost of Acceleration Factors (less PCS Factor)	3,968.22 <u>(2,928.00)</u>	6,703.38 <u>(1,065.00)</u>	
	1,040.22	5,638.38	
Actual PCS to Installation - Round Trip Transportation of Member and Family	10,000.00	10,000.00	
Round Trip Movement of Household goods	5,000.00	5,000.00	
Living Allowances	6,000.00	6,000.00	
FMS Selling Price ⁴	<u>\$88,177.22</u>	<u>\$63,879.38</u>	\$152,056.60 =====

¹ Beginning in FY 1981, PCS costs were included in the composite standard pay rate and must be deleted when actual PCS costs are applied. Beginning in FY 1985 military retirement was included in the composite pay rate.

² Refer to Appendix C or current Comptroller, DoD guidance for costs and acceleration factors to be used in current year.

³ Credit to O&M or RDT&E, as applicable.

⁴ Administrative Surcharge is additive to selling price.

0703 CASH SALES OF DEFENSE ARTICLES
ISSUED FROM STOCK

070301. General. Section 21 of the AECA [reference (a)] authorizes the sale of defense articles from stock to eligible foreign governments and international organizations. These sales include all sale of items from DoD inventories, whether delivered from storage or from procurements that were initiated to maintain adequate DoD inventory levels. Procurements specifically for FMS requirements (excluding cooperative logistics supply support arrangements) may not be considered a sale from stock. Procurements initiated to replace stocks sold from DoD inventories are not FMS new procurements.

070302. Sale Price of Nonexcess Materiel

A. Nonexcess defense articles are assets within the approved force acquisition objective and approved force retention stock of all DoD Components as defined in DoD Directive 4100.37 [reference (o)]. Also included in the nonexcess category are articles procured in anticipation of military assistance or sales requirements as a result of cooperative logistics supply support arrangements, or pursuant to a military assistance or sales order. The selling price shall be determined when (1) a requisition is edited for shipment by the shipping activity, or (2) the Letter of Offer is prepared, if a firm price is determined in accordance with the provisions of paragraph 070303.

B. Sale of Defense Business Operations Fund Items

1. The selling price of Defense Business Operations Fund issues to FMS customers shall be the current Defense Business Operations Fund price. Shipments from inventory to non-Cooperative Logistics Supply Support Arrangement (non-CLSSA) customers and to CLSSA customers where requisitions are received in advance of achieved inventory stock levels shall be made only when on-hand serviceable inventories of the items being sold are above the item's reorder point on the day the item is dropped from inventory, except as indicated below (see Table 703-1).

2. The inventory manager with first level supervisor coordination may approve the issue of stocks below the reorder point to non-CLSSA customers when directed by the Director, DSAA, or when he or she determines that there will not be an unacceptable impact on U.S. forces or CLSSA customers.

a. If issuance was directed by DSAA and would impact adversely U.S. Armed Forces or CLSSA customers, the ICP shall identify the need for diversion and provide impact data through appropriate DoD Component channels to the Director, DSAA. DoD 5105.38-M, Paragraph 60003.E [reference (e)] provides additional details on processing such impact statements.

b. If it is imperative that stock be replaced through accelerated procurements and normal pricing policies will not adequately recoup replacement costs, an exception to DoD pricing policies shall be requested from Comptroller, DoD. Section 719 of this Volume provides guidance on exception requests. Normally, the exception would be to either add a replacement factor or delay final pricing until the contract for replacement items is financially complete.

3. Each Defense Business Operations Fund organization shall review annually the items under its control to determine if silver or other reclaimed precious metals were provided to the contractor as government-furnished materiel (GFM). A special FMS pricing table shall be established for those items that contain reclaimed precious metals. The price in the FMS pricing table shall be increased annually to reflect the June 30 market price of the precious metal. For example, if an item contains 10 ounces of reclaimed silver and the market price of silver on June 30 increased by \$6.00, then the item's selling price shall be increased by \$60.00.

4. If a customer returns a repairable Defense Business Operations Fund item for repair or replacement, overhaul service shall be priced in accordance with paragraph 070802. Under no conditions shall the customer be

granted a credit for this carcass which is to be applied against the selling price determined in subparagraph B.1, above. Credit would represent U.S. procurement of FMS customer-owned assets, and such procurements cannot be mingled with the FMS program.

5. As an invested participant, a CLSSA customer may return a fully serviceable reparable item to the Defense Business Operations Fund for credit, when the item is within the approved acquisition objective (AAO), providing the requirements of paragraph 070102.J. are met. The credit will only be issued after the item is received at the depot. Funds credited may be paid by the DoD paying office into the Trust Fund in accordance with the foreign customer's instruction.

C. Sale of Investment (Procurement Funded) Items. As indicated previously, when an item is sold from the stocks of the Department and that item is not intended to be replaced, except for amounts which may be credited to the Special Defense Acquisition Fund, the amounts received as payment for that item from the FMS customer are required to be deposited into the miscellaneous receipts of the Treasury under the provisions of 10 U.S.C. 114(c)(2). Therefore, in the case of such sales, it is necessary to decide whether an item will be replaced or not. An item may be replaced either "in kind" or with an improved model of the item sold. Thus, the sale of a C-130B and the replacement of that aircraft with a C-130B would be an "in-kind" replacement. The replacement of the aircraft with a C-130E would be a replacement with an improved model. Both of the cases would be a replacement. On the other hand, the sale of a C-130B and the substitution of a totally different kind of aircraft would not be a replacement. Similarly, the purchase of an upgrading or modification kit, would not be a replacement, even though the upgrade or modification would result in an end-item similar to ones being acquired or that could be acquired. For instance, the procurement from the proceeds of the sale of an M-1 Tank in the inventory of a modification kit to an M-1 Tank currently in the inventory to upgrade an existing M-1 to an M-1A Tank would not be a replacement even though the procure

ment of a new M-1A tank to replace the M-1 sold would be a replacement.

1. Investment Item Not to be Replaced. When an item is not to be replaced, the price of the item is not less than the actual value of the article. Except as provided in subparagraph b., this price is determined as follows:

a. When a determination is made that a procurement funded item will not be replaced, the price of the item shall be the most recent actual procurement cost of the "series" and "model" being sold, plus the cost of any modifications or improvements incorporated after production. Reductions to the sale price may be made when there is an actual difference in utility or desirability among units of issue of an item due to age or condition. The cost of the last major overhaul or outfitting accomplished before the sale date is added to the calculated price and is not reduced for age or condition. The overhaul costs will be pro-rated over the interval between the last actual overhaul and the next scheduled overhaul. If a future overhaul is not scheduled, the cost of the last overhaul will be prorated over the normal average interval between overhauls. If an overhaul schedule is not available, the most appropriate time span for that series and model should be used. In the case where actual costs are not available for the last overhaul, a reasonable estimate from the facility normally performing overhauls for the type of item to be sold may be used. In the case where a maintenance schedule has not been established, a period of at least five years should be used. An illustration of price computation is at Table 703-2. A request for waiver of the overhaul cost may be submitted to Comptroller, DoD, Accounting Policy, with a copy to the Comptroller, DSAA.

b. In the case of a naval vessel that is 20 or more years old, and 3,000 tons or less, section 21(a)(2) of the AECA [reference (a)] provides that the actual value is not less than the greater of the scrap value or the fair value (including conversion costs) as determined by the Secretary of Defense.

2. Investment Item to be Replaced. When a determination is made that an item is to be replaced, the price of the item is to be the estimated cost of the replacement, including the contract or production costs of the article less any depreciation in the value of the article. This price is determined as follows:

a. Determine the normal useful peacetime life of the item or equipment to be sold.

b. Determine the percentage of useful life remaining on the item.

c. Apply the percentage developed in paragraph C.2.b., above, to the estimated (or actual) cost of the replacement item. The resultant amount is the base cost to be used in the sale price calculation. Under no condition shall the sale price be lower than the scrap value plus the cost of the last major overhaul or outfitting accomplished within 24 months before the sale.

d. Examples of price computations are shown at Tables 703-3 and 703-4.

3. When a determination is made under subparagraph C.2, above, the FMS selling price on the Letter of Offer to the Purchaser shall be the best estimate available. However, once the item is dropped from inventory, a final bill shall be assessed the purchaser utilizing the best pricing information available if actual replacement procurement cost is not known. This shall be the final cost to the purchaser regardless of the actual cost of final replacement procurement. Inventory managers must realize that this prescribed pricing methodology may not result in a one for one replacement. If exact quantities are needed in inventory in order to maintain readiness, then the inventory manager must recommend FMS procurement and not approve a shipment out of stock.

D. Sale of Ammunition. The selling price of an ammunition item shall be the current standard price and any applicable nonrecurring cost recoupment charge for the item being shipped to the customer.

070303. Quotation of Firm Prices

A. DoD Components are authorized to quote firm prices for items to be sold from stock and for in-house services to be furnished, pursuant to Section 21 of the AECA [reference (a)]. Such prices are not subject to further adjustment, provided the purchasing nation accepts the LOA before the expiration date. A firm price may be quoted only for:

1. An actual or estimated replacement price for a procurement funded end item, including ammunition, or major items to be sold from inventory as authorized in paragraph 070302.C.2, provided the price is based on budgetary data or contractor quotation.

2. A price for a procurement funded or major item developed under provisions of paragraph 070302.C.1. and 070304.

3. Training tuition rates (only for current year).

B. The objective of quoting firm prices is to minimize difficulties that might arise should prices undergo several revisions, due to budgetary decisions made subsequent to country acceptance of Letters of Offer. Firm prices may be quoted only after careful and coordinated development of such pricing data. Letters of Offer (other than for training) which specify firm pricing must be coordinated, at a minimum with the Military Comptrollers, DSAA, and the Office of the Comptroller, DoD.

C. All Letters of Offer authorized to be on a firm price basis shall include a note which specifies that pricing data presented are firm (except for changes authorized in paragraph 071006) and will not be changed, provided the country accepts the Letter of Offer before its expiration date.

070304. Excess Materiel

A. Excess equipment shall be sold in an "as is" condition. Excess defense articles are assets in excess of the approved force acquisition objective and approved force retention stock of all DoD Components (see paragraph 070302 for

additional discussion). The cost of repairing, rehabilitating, or modifying such articles shall be computed in accordance with paragraph 070802. The selling price of excess materiel, exclusive of repair or modification costs, shall be the highest of (1) its market value (which includes nonrecurring costs as computed in paragraph 070305) as hardware, or (2) its scrap value plus nonrecurring costs and the last major overhaul costs incurred (the overhaul costs will be pro-rated over the interval between the last actual overhaul and the next scheduled overhaul. If a future overhaul is not scheduled, the cost of the last overhaul will be pro-rated over the normal average interval between overhauls. In the case where actual costs are not available for the last overhaul, a reasonable estimate from the facility normally performing overhauls for the type of item to be sold may be used. In the case where a maintenance schedule has not been established, a period of at least five years should be used. An example of computing these costs is illustrated at Table 703-5), or (3) its fair value (plus nonrecurring and pro-rated major overhaul costs) computed using the fair value rates contained in this subsection. A request for waiver of the overhaul cost may be submitted to the Office of the Comptroller, DoD (Accounting Policy), with a copy to the Comptroller, DSAA. Fair value rates are applied to the established inventory price and follow:

Federal Condition Code (See DoD 4160.21-M [reference (p)] for specific definitions)	Percent of Inventory Price of Materiel
A-1 (serviceable, unused - good)	50
A-4 (serviceable, used - good)	40
A-2, A-5, B-1, C-1, D-1, B-4, C-4, D-4 (serviceable with qualification, materiel is either unused in fair condition; if used, in good condition).	30
B-2, C-2, D-2, B-5, C-5, D-5, D-7, E-7, F-7, G-7 (serviceable with qualification, if unused in fair condition; if used, in good condition). (Also includes unservice- able items that are in good condition but require minor repairs.)	20

A-3, B-3, C-3, D-3, A-6, B-6, C-6, H-7, 10
F-8 (serviceable, in poor condition;
unserviceable, in poor condition; or
unserviceable because item requires
minor repairs).

D-8, H-8, D-9, H-9, F-9, F-X, G-X, 5
H-X (unserviceable, requiring major
repairs).

B. Illustrations of price computations
are at Table 703-6, 703-7, and 703-8.

C. When accountability for excess
items has been transferred to "Property Dispos-
al," the provisions of DoD Instruction 7310.1
[reference (q)] shall apply. This Instruction
provides specific guidance in the disposition of
amounts realized from the sale of such equip-
ment.

D. A request for exception to estab-
lished pricing policy of excess material for
Foreign Military Sales will be submitted to the
DoD Comptroller for approval with a copy to
the Defense Security Assistance Agency. The
request must address the following:

1. Whether the item has been
screened for potential sale to customers and
whether there is any existing customer interest at
the price determined in accordance with the
established pricing policy;

2. Whether the alternative
proposed price is equal to or greater than the
scrap value plus the established recoupment
charge for DoD's nonrecurring costs;

3. Whether demilitarization costs
will be incurred by the DoD if the item is sold
and, if so, the estimated amount of such demili-
tarization costs;

4. What the price to repair the
item would be and its relationship, as a percent-
age, to the original acquisition cost of the item;
and

5. Whether the proposed sale has any other economic or political benefit to the DoD and/or the United States Government.

070305. Charges for Nonrecurring Cost

A. Non-USG purchasers shall pay a fair price, determined in accordance with DoD Directive 2140.2 [reference (r)], for the values of the DoD nonrecurring investment in the development and production of Major Defense Equipment, as required by law, unless a nonrecurring cost (NC) recoupment charge waiver has been approved by the DoD official designated in Section E of DoD Directive 2140.2. The policy in DoD Directive 2140.2 applies to Major Defense Equipment developed with U.S. Government funds. For FMS, an NC recoupment charge is applicable to all MDE. Major Defense Equipment is any item of Significant Military Equipment (SME) listed on the United States Munitions List having a DoD nonrecurring Research, Development, Test and Evaluation (RDT&E) cost accumulation of \$50 million or a total DoD production cost of more than \$200 million.

B. For determining the pro rata share of NC to be recouped, a cost pool methodology is used. The NC recoupment charge computation (nonrecurring RDT&E and nonrecurring production cost pools divided by benefiting units) are submitted to the Director, DSAA, for approval. The NC recoupment computation shall be supported with the MDE calculation worksheet illustrated at Table 703-9. A summary report on each MDE item shall be provided to DSAA following the report format at Table 703-10. The Director, DSAA, will review each DoD Component's calculations and publish the charge in the SAMM [reference (e)].

C. Each DoD Component shall establish a system to accumulate cost pools, recognize when a cost pool meets recoupment thresholds and calculate an NC recoupment charge for items releasable to foreign countries and international organizations when FMS sales are anticipated. The NC recoupment charge shall be based upon information recorded in DoD accounting records or DoD budget justification documents. Cost estimates may be used to determine the NC expected to be incurred in

periods not covered by budget justification documents.

D. The costs to be included in the nonrecurring RDT&E investment cost pool shall be determined on the budget and accounting classifications established for research, development, test and evaluation appropriations in DoD 7110.1-M [reference (d)]. Paragraph 516.2 of reference (d) establishes the following research and development (R&D) categories:

1. Research 6.1. Includes all efforts of scientific study and experimentation directed toward increasing knowledge and understanding in those fields of the physical, engineering, environmental, and life sciences related to long term national security needs. It provides fundamental knowledge required for the solution of military problems. It forms a part of the base for (a) subsequent exploratory and advanced development in DoD-related technologies and (b) new and improved military functional capabilities in areas such as communications, detection, tracking, surveillance, propulsion, mobility, guidance and control, navigation, energy conversion, material and structures, and personnel support.

2. Exploratory Development 6.2. Includes all efforts directed toward the solution of specific military problems, short of major development projects. This type of effort may vary from fairly fundamental applied research to quite sophisticated "breadboard" hardware, study, programming, and planning efforts. It would thus include studies, investigations, and minor development effort. The dominant characteristic of this category of effort is that it is pointed toward specific military problem areas with a view toward developing and evaluating the feasibility and practicability of proposed solutions and determining their parameters. Program control of the exploratory development element shall be exercised normally at a general level of effort.

3. Advanced Development 6.3. Includes all efforts directed toward projects that have moved into the development of hardware for tests. The prime result of this type of effort is proof of design concept, rather than the devel-

opment of hardware for service use. Projects in this category have a potential military application.

4. Engineering Development 6.4.

Includes all projects in full-scale engineering development for service use that have not yet received approval for production or had production funds included in the DoD budget submission for the present budget or subsequent fiscal year. This area is characterized by major line item projects, and program control shall be exercised by review of individual projects.

5. Management and Support 6.5.

Includes research and development efforts directed toward support of installations or operations required for general research and development use. Included would be test ranges and maintenance of test aircraft and ships, and studies and analyses in support of the R&D program. Cost of laboratory personnel, either in-house or contract-operated, would be assigned to appropriate projects or as a line item in the research, exploratory development, or advanced development program areas, as appropriate. Military construction costs directly related to a major development program shall be included in the appropriate element.

6. Operational System Development.

Includes those projects still in full-scale engineering development that have received approval for production through the Defense Systems Acquisition Review Council (DSARC) or other action, or production funds have been included in the DoD budget submission for the present budget or subsequent fiscal year. All items in this area are major line item projects that appear as RDT&E costs of weapon system elements in other programs. Program control shall be exercised by reviewing projects individually. The costs incurred for nonrecurring R&D in the first two budget and accounting classifications (6.1 and 6.2) may not be included in the nonrecurring RDT&E cost pool. The advanced development (6.3) budget and accounting classifications is sometimes further broken down into 6.3A and 6.3B. Although both types of effort are a "proof-of-design" concept rather than the development of hardware for service use, the 6.3A classification is tied strictly to research efforts

that involve the production of breadboards or brassboards to model all or part of a design. The 6.3B classification may be applied to projects to produce a prototype which, although not suitable for fielding, is closer to representation of an end item for military application. Therefore, costs incurred for nonrecurring R&D in classification 6.3A may not be included in the nonrecurring RDT&E cost pool. However, costs in classification 6.3B and the remaining R&D classifications are subject to recoupment and shall be included in the nonrecurring R&D cost pools upon which the pro rata charge is calculated.

E. All applicable NC efforts, including in-house or multiple contractors shall be included in the NC cost pool. In other words, the source of the NC effort to develop a product is not relevant to the calculation of the NC recoupment charge. The costs of improvement programs that are designed to continuously improve the safety, reliability, availability, and maintainability of an end item or major component over the projected life of the item will be shared equitably by all users of the item. Normally, each user will pay a share of the total annual cost through a Component Improvement Program (CIP) or comparable program. All users are expected to participate in such a program. The cost sharing calculation will be established at the time the NC cost pool is established and the NC recoupment charge is approved. First, the total life of the item will be projected, then the point in time when half of all projected deliveries to non-DoD customers will occur will be estimated. Using actual cost data and data from historical files for similar CIP or comparable programs, the total U.S. investment costs over the life of the program will be estimated. The amount of U.S. investment projected to be incurred up to the previously determined point of half of the deliveries to non-DoD customers will be included in the weapon system NC cost pool. The annual cost of operating the CIP or comparable program will be shared in proportion to the number of items in the possession of each user. This will ensure that the remaining costs of operating the CIP or comparable program will be shared equally by all users of the item.

F. The costs to be included in the nonrecurring production cost pool are those financed by, or to be financed in the future by, procurement or operations and maintenance appropriations that benefit current and future production runs. DoD Directive 2140.2 [reference (r)] provides that the pool shall capture such costs as preproduction, special tooling, special testing equipment, production engineering, product improvement, destructive testing and product model production, and testing and evaluation. Other costs may be included if they benefit both current and future production runs. Descriptions of the major categories of costs to be accumulated in this nonrecurring cost pool are as follows:

1. Preproduction Cost refers to cost of such activities as tool manufacture and tryout (such as jigs, dies, and fixtures) and the implementation of layout plans. Also, see item 8, License Cost. A lump sum payment is part of preproduction cost.

2. Special Tooling Cost refers to the costs of all jigs, dies, fixtures, molds, patterns, taps, gauges, other equipment and manufacturing aids, and replacement thereof, that are of such a specialized nature that substantial modifications or alternation of their use is limited to the development of production of particular supplies or parts thereof, or the performance of particular services. The term includes all components of such items, but does not include: (a) material; (b) special testing equipment, or (c) building and nonserviceable structures (except foundations and similar improvements necessary for the installation of special tooling), general or special machine tools, or similar capital items.

3. Special Test Equipment Cost refers to the cost funded by procurement appropriations for either single or multipurpose integrated test units engineered, designed, fabricated, or modified to accomplish special purpose testing in the performance of the contract. Such testing units comprise electrical, electronic, hydraulic, pneumatic, mechanical, or other items or assemblies of equipment that are mechanically, electrically, or electronically interconnected so as to become a new functional entity, causing the individual item or items to become interdepen-

dent and essential in the performance of special test equipment procured with RDT&E appropriations.

4. Developmental Production Engineering Cost includes the cost of product design improvement intended to enhance producibility of an item; and examination of available manufacturing processes to determine the need for new techniques (and their development, if necessary); the optimum marshalling of resources for efficient manufacturing (such as optimum lot size, scheduling, production control, production line design and balancing and plant layout); and tool design and detailed manufacturing planning. Although a continuing activity, most of this effort is rightfully considered a nonrecurring production cost.

5. Product Improvement is subdivided into six distinct types of effort: (a) safety; (b) cost reduction; (c) reliability, availability, and maintainability; (d) deficiency corrections; (e) compatibility standardization, and simplification; and (f) new or improved operational capability. Categories (a) through (e) are to be included in the end item nonrecurring production cost pool, even though a participating product improvement program has been established that pro rates annual cost of the program based upon worldwide asset position (both U.S. and foreign-owned end items). The DoD cost of category (f) shall be recovered as part of the selling price of a modification kit, if the kit is an MDE. Product improvement programs may be accomplished by contractors as an engineering change proposal (ECP), modification work order (MWO), or an in-house project.

6. Destructive Testing is a technique for performing tests on a component, assembly, or an end item. It involves the testing of an article beyond its design limits (and ultimately its destruction), or the actual consumption of the article to determine if it is performing to design specifications.

7. Pilot Model Testing includes the following effort:

a. Qualification Testing is a very severe testing to determine if a product will

do what it is designed to do. It usually involves the testing of a product to the limits of its performance. It is often destructive and the test articles are not intended to be used operationally.

b. First Article Testing Cost is the cost of testing to evaluate a new manufacturer's ability to produce a specified design (could be the new manufacturer's design or that of another manufacturer). It is normally more stringent and costly than routine acceptance testing, but less stringent and costly (and less destructive) than qualification testing.

8. License Cost refers to the cost of the license DoD shall obtain to allow competitive awards for production of an item when its design is owned by a contractor. In effect, the Department of Defense buys the rights to allow other contractors to produce an item for DoD purposes through the payment of royalties or a lump sum fee. These royalties are customarily on a per-item basis and should be charged as recurring production costs. The lump sum fee is a nonrecurring production cost.

G. In computing nonrecurring cost pools for items to be sold under FMS, nonrecurring costs for major components that are restricted to U.S. Government use only shall not be included. For example, the costs of nuclear devices and features, countermeasure devices and features, security devices (black boxes), carrier-peculiar adaptations, and special fuel tank devices shall be excluded. Estimates may be used if accounting records do not identify associated costs.

H. The number of items that shall include all known or projected DoD production quantities shall be determined as follows.

1. The production quantities of end items required by the Department of Defense shall be obtained from either Selected Acquisition Reports (SARs) or the Five Year Defense Program (FYDP), Procurement Annex.

2. The production quantities of end items to be procured for foreign countries or international organizations under security assistance programs shall be obtained from DoD

Component security assistance plans.

3. The production quantities of end items to be produced by contractor for commercial sales may be obtained from the contractor and validated by contracting officers. The contractor's estimate shall be required only if the applicable commodity manager determines that a potential exists for significant commercial sales.

4. In the event end item data is not available from any of these sources, the developing command shall estimate the total number of end items to be produced.

5. The production quantities of systems components that meet the investment threshold shall be derived from the number of end items to be produced. For example, if 100 aircraft shall be produced (including engines) and spare part support requires 150 engines, the production quantity of engines is 250.

I. In the event of a disagreement on the production quantity and sales projections, the Director, DSAA, shall make the final determination, in coordination with the Office of the Comptroller, DoD, and OUSD(A), as to the production estimates to be used for determining the NC recoupment charge.

J. The approved pro rata charge shall be recouped, unless a waiver is authorized. When nonrecurring cost recoupment is applicable, the price in a Letter of Offer and Acceptance shall provide for the specific recoupment charge. In instances where the initial rate has not yet been approved, DoD Components shall provide for an initial rate based on an estimation of the best information available to the DoD Component. The LOA shall be modified to provide for the subsequently approved rate and only that approved rate is to be billed. When a recoupment charge is revised, the previous value is retained in the appendix for information. Subsequent revisions to the pro rata charge shall be applied to new LOAs and shall not be retroactive.

K. When the price is reduced because of age, condition, or supply status (excess), the same percentage reduction shall be made to the pro rata share of nonrecurring costs.

L. DoD Directive 2140.2 [reference (r)] requires a biennial review of approved MDE charges to determine if there has been a significant change in factors or assumptions used to compute the currently approved recoupment for a model. A significant change occurs when (1) a new calculation shows a change of 30 percent of the current system NC charge for an MDE item or (2) the NC unit charge increases or decreases by \$50,000 or more or (3) where the potential for a \$5 million change in recoupment exists or (4) for ammunition items, the potential exists for additional recoupment of over \$100,000 or more. A revision to the NC recoupment for MDE will not be applied retroactively to signed LOAs. Rather, the new charge applies to all sales following the date of approval.

M. When a model change occurs, the NC recoupment charge shall be recalculated. That portion of the NC which benefits only one model shall be allocated only to that model. That portion of the NC that benefits old and new models shall be prorated between cost pools related to the old and new model items. Commonality between old and new models may be determined either on the basis of the ratio of old model parts in the new item or on some other common acceptable basis for allocation of costs between the models, i.e., engineering analysis or technology analysis, as appropriate. Sample calculations are illustrated at table 703-13.

N. While a change may be submitted at any time by a DoD Component, it is mandatory that a modification be submitted when a significant change occurs.

O. Reporting Nonrecurring Cost Recoupment Collections.

1. Funds collected for NC recoupment charges shall be disposed of in accordance with paragraph 070105 of this Volume.

2. DoD Components shall

provide a quarterly report on the status of nonrecurring cost collections. The format is at Table 703-12. The report shall be forwarded to the DSAA Comptroller within 45 days following the close of each fiscal quarter, with a copy furnished to the Defense Finance and Accounting Service (DFAS-HQ/ARS). DoD Components shall maintain records of anticipated and actual nonrecurring cost collections for FMS cases and known direct commercial sales (prior to October 7, 1992). Data on direct commercial sales may be obtained from export licenses or from other information provided by DSAA. Reports should be in agreement with amounts deposited to the Treasury miscellaneous receipts account.

P. Waivers.

1. The Director, DSAA, is the waiver approval authority and will state in writing any approvals granted for waivers associated with FMS. A notification of each approved waiver will be forwarded to the Comptroller, DoD and to the concerned DoD Component by the approving authority.

2. The decision on any waiver requires the concurrence of the Director, DSAA; the Comptroller, DoD; and the USD(Acquisition). If an issue concerning the waiver request cannot be resolved, the Director, DSAA, shall prepare an action memorandum on the waiver request to the Deputy Secretary of Defense for final determination. The action memorandum to the Deputy Secretary of Defense shall be coordinated with the Director, DSAA, the Comptroller, DoD, and the USD(Acquisition).

Q. Articles delivered after November 30, 1989 under FMS cases fully financed with MAP funds and/or nonrepayable FMS credit funds shall be priced to exclude the NC charge.

R. The established NC recoupment charge shall be included in the FMS unit price.

S. The Director, Defense Contract Audit Agency, shall ensure that any evaluation of a contractor accounting system includes an analysis of the internal controls established to ensure compliance with the requirement to pay

NC recoupment charges for sales made prior to October 7, 1992. If DCAA audit work on a bid proposal, claim for incurred costs, etc., discloses contractor noncompliance with the requirement

to pay an NC recoupment charge, an audit report shall be issued promptly to the cognizant DoD contracting officer, with a copy of the report submitted to the DFAS-HQ/ARS and DSAA(COMPT).

18	.125	.090395
19	.125	.079096
20	.125	.069209

TABLE 703-5 PRICE COMPUTATION OF OVERHAUL COSTS PREVIOUSLY INCURRED FOR A PROCUREMENT FUNDED ITEM SOLD TO FOREIGN MILITARY SALES CUSTOMERSAssume the following:

1. Aircraft A, tail number 26 is to be sold in May 1991. The last overhaul for that aircraft was accomplished in August 1990 at a cost of \$640,000.
2. The normal interval between overhauls for aircraft A is 60 months.

The price is computed using the following steps:

1. Determine the actual interval since the last overhaul in terms of months:

August 1990 to May 1991 equals 9 months.
2. Determine the percentage of overhaul costs applicable to the DoD by comparing the actual interval since the last overhaul with the normal interval between overhauls.

$$\frac{\text{Actual Interval} = 9 \text{ months}}{\text{Normal Interval } 60 \text{ months}} = 15\%$$

3. Determine the amount of the costs to be charged to the customer by subtracting the resulting percentages in step 2 from 100 percent and applying the result to the overhaul costs. If actual overhaul costs are not known, a reasonable estimate should be obtained from the facility normally performing overhauls for the type of item that is to be sold.

$$100\% - 15\% = 85\% \times \$640,000 = \$554,000$$

**TABLE 703-6 PRICE COMPUTATION EXAMPLE EXCESS DEFENSE BUSINESS
OPERATIONS FUND ITEM**

	<u>NON-FMSO</u>	<u>FMSO II</u>

Adjustment for condition (A-1 and serviceable, unused, good condition - 50% reduction)	<u>250.00</u>	<u>N/A</u>
	\$250.00	\$500.00
Reimburse to Defense Business Operations Fund Account	<u>250.00</u>	<u>\$500.00</u>
FMS Selling Price	\$250.00 ¹	\$500.00 ¹

¹ Administrative Surcharge is additive to the selling price.

**TABLE 703-7 PRICE COMPUTATION EXAMPLE EXCESS PROCUREMENT FUNDED
ITEM FROM STOCK**

Standard Price	\$50,000.00
Pro rata nonrecurring charges	2,000.00
Pro rata overhaul costs before sale date (see Table 703-10)	3,000.00

Condition - A-3 (serviceable, unused, poor) 10%

Standard Price x 10%	5,000.00
Pro rata nonrecurring charge x 10%	200.00
Pro rata overhaul costs before sale date	<u>3,000.00</u>
FMS Selling Price	\$8,200.00 ^{1,2,3} =====

¹ The FMS selling price must be increased if the market price or the scrap value plus the nonrecurring cost recoupment charge and the prorated value of the last major overhaul costs incurred are higher than the fair value FMS selling price. The market price is defined as a commercial catalog price or quoted price from a commercial vendor, if readily available. The fair value price is determined by the Federal Condition Code.

² Credit to SDAF or Miscellaneous Receipts Account 3041, as applicable.

³ PCH and Administrative Surcharge are additive to the selling price. Credit collections for nonrecurring costs to SDAF or Miscellaneous Receipts Account 3041, as applicable.

TABLE 703-8 PRICE COMPUTATION EXAMPLE SALE OF EXCESS SHIP

Value of ship where fair value computation is applicable per para. 070304.A. Fair value is 10% of original cost.	\$2,250,000.00 ¹
Nonrecurring cost recoupment charge (10% of established charge)	50,000.00 ²
Pro-rated overhaul costs (See Table 703-10)	<u>1,500,000.00¹</u>
FMS Selling Price	\$3,800,000.00 ^{3,4,5} =====

¹ Credit to Miscellaneous Receipts Account 3041.

² Credit to SDAF or Miscellaneous Receipts Account 3041, as applicable.

³ Administrative Surcharge is additive to the selling price.

⁴ See Table 804-9 for billing.

⁵ If the item is sold at market value the entire proceeds will be deposited to Miscellaneous Receipts or SDAF as applicable as the sale of an item that does not require replacement.

OR LICENSING OF U.S.G. ITEMS**

RECOUPMENT OF NONRECURRING COSTS ON SALES OR LICENSING OF U.S.G. ITEMS (\$ Thousands)							Department of the Navy Report Preparation Date: 10 Oct 92 Report Cutoff Date: 30 Sep 92		
Case Designator(1)	Purchaser(2)	Item	Quantity	Fiscal Year of Sale	Delivery Date(3)	Total Anticipated NC Charge(4)(5)	Actual Collections		Cumulative Collections(6)
Part 1. Recoveries on USG sales to foreign governments and international organizations (7).							Amount Collected This Quarter	Amount Collected This Fiscal Year	
AT-P-AAA BE-P-LAL	AUSTRALIA BELGIUM	MISSILE AIM-7C GUIDED BOMB	70 40	1990 1991	943 933	\$191 \$247	\$27 \$19	\$54 \$62	\$137 \$155
Part 2. Recoveries on commercial sales to foreign governments, international organizations, and foreign commercial firms (7)(8).									
AB3456 SP-P-001	IHI HEAVY/Japan NAVAL MATL CMD/Spain	T-700-GE-401 TF-34 ENG	100 10	1989 1992	953 924	\$2,970 \$207	\$89 \$21	\$1,070 \$104	\$1,841 \$166
Part 3. Recoveries on sales to domestic commercial firms (7)(8).									
USA CH	GEN ELECTRIC SIKORSKY	T-64 ENGINES T-2 HELICOPTER	50 75	1992 1990	924 943	\$1,929 \$2,998	\$116 \$400	\$386 \$999	\$1,929 \$1,999

Notes:

- (1) Applicable to USG sales to foreign governments and international organizations. For commercial direct sales, use the license number. For domestic sales, establish a "dummy" case number for control purpose.
- (2) When a license number or "dummy" case number is shown in the case designator column, then the purchaser column should also reflect the name of the contractor who is liable for the payment in addition to the purchaser (country).
- (3) For proposed or pending direct commercial sales, place a "P" in this column.
- (4) When collection results from the use of a TDP, place a (T) after the anticipated charge.
- (5) Place an asterisk after charge when collection is completed.
- (6) Collections that are completed during the fiscal year will be dropped on the first quarterly report of the subsequent fiscal year.
- (7) If payment of a NC recoupment charge is withheld or otherwise not collected, for any reason, the entry, along with the amount of the NC recoupment collection, shall be reported and footed to indicate the reason. If, at a subsequent time, there is a determination, or other determination by the Office of the Comptroller, DoD, that the NC recoupment charge will not be collected, the entry shall be deleted from the first quarterly report of the subsequent fiscal year.
- (8) Recovery not required on sales on or after date of this Directive for items with non-military purpose.

**TABLE 703-13 RECOUPMENT OF NONRECURRING CHARGES FOR MAJOR DEFENSE
EQUIPMENT, NEW MODELS DERIVED FROM EXISTING MODELS**

RECOUPMENT OF NC CHARGES FOR MAJOR DEFENSE EQUIPMENT, NEW MODELS DERIVED FROM EXISTING MODELS					
EXAMPLE 1					
FACTS:					
1.	MODEL A(OLD) B(NEW)	COST POOL \$500,000,000 \$100,000,000	QUANTITY 1,000 1,000	OLD CHARGE \$500,000	
2.	OLD MODEL 1,000 Parts	NEW MODEL 1,200 Parts			
(NOTE: 900 parts are common to both models)					
Step 1:	Determine commonality: Commonality is the percentage of the parts in the new model that are common to the old model.				
COMMONALITY	900 1,000	= 90%			
Step 2:	Determine the amount of the old item cost pool which benefits both old and new items.				
	\$500,000,000 90% \$450,000,000	Old Item Cost Pool Commonality Common Cost Pool			
Step 3:	Calculate NC charge for new item.				
a.	Common Cost Pool \$450,000,000	divided by	Benefiting Units 2,000	=	\$225,000.00
b.	New Item Cost Pool which does not contain commonality with the old item \$100,000,000	divided by	Benefiting Units 1,000	=	\$100,000.00
UNIT CHARGE FOR NEW MODEL					
				=	\$325,000.00
Step 4:	Determine cost pool of non-common items related to the old item.				
a.	Old Item Cost Pool Less: Common Cost Pool	\$500,000,000 \$450,000,000			
b.	Remainder: Old item cost pool which does not contain commonality with the new item.	\$50,000,000			
Step 5:	Recalculate old item NC charge and determine if changed rates should be submitted to DSAA.				
a.	Old Item Cost Pool \$50,000,000	1,000	= \$50,000		
b.	Common Cost Pool \$450,000,000	2000	= \$225,000		
	Recalculated charge for old item:				
c.	Comparison of previous old item NC charge with recalculated NC charge for old item.				
	Recalculated Old Item Charge \$275,000	divided by	Old Item Charge \$500,000	=	55 percent, a 45 percent decrease and \$225,000 NC Unit Charge decrease.
Step 6:	Action Required.				
a.	Submit request to Director, DSAA for consideration of change of NC rate on old item.				
b.	Prepare DSAA package because the change in the NC rate in Step 5 Step 5 exceeds 30% and the unit charge decreases by more than \$50,000.

RECOUPMENT OF NC CHARGES FOR MAJOR DEFENSE EQUIPMENT, NEW MODELS DERIVED FROM EXISTING MODELS									
EXAMPLE 1 (Continued)									
Step 7:	Proof: Verify that cost pool has been fully allocated.				Step 2: Determine the amount of the old item cost pool which benefits both old and new items.				
	Old item 1,000 QTY X \$275,000 (Old Item Charge) = \$275,000,000 New item 1,000 QTY X \$325,000 (New Item Charge) = \$325,000,000 Total \$600,000,000				\$400,000,000 Old Item Cost Pool 60% Commonality \$240,000,000 Common Cost Pool				
	Cost Pool Old Item \$500,000,000 New Item \$100,000,000 Total \$600,000,000 Difference -0-								
NOTE:	The proof is designed only to show that costs are evenly distributed to all units, and the fact that there may have been previous charges at the old rate is to be disregarded for purposes of the calculation.				Step 3: Calculate NC charge for new item.				
					a. Common Cost Pool \$240,000,000 divided by 3,500 = \$ 68,571.00				
					b. New Item Cost Pool which does not contain commonality with the old item \$200,000,000 divided by 2,500 = \$ 80,000.00 UNIT CHARGE FOR NEW MODEL \$ 148,571.00				
EXAMPLE 2									
FACTS:									
1.	MODEL A(OLD) B(NEW)	COST POOL \$400,000,000 \$200,000,000 \$600,000,000	QUANTITY 1,000 2,500 3500	OLD CHARGE \$400,000					
2.	OLD MODEL 1,000 Parts	NEW MODEL 1,200 Parts							
NOTE:	600 parts are common to both models.								
Step 1:	Determine commonality: Commonality is the percentage of the parts in the new model that are common to the old model.								
COMMONALITY	$\frac{600}{1,000} = 60\%$								
	a. Old Item Cost Pool \$400,000,000 Less: Common Cost Pool \$240,000,000 Remainder: Old item cost pool which does not contain commonality with the new item. \$160,000,000								

TABLE 703-13 RECOUPMENT OF NONRECURRING CHARGES FOR MAJOR DEFENSE EQUIPMENT, NEW MODELS DERIVED FROM EXISTING MODELS (CONTINUED)

RECOUPMENT OF NC CHARGES FOR MAJOR DEFENSE EQUIPMENT, NEW MODELS DERIVED FROM EXISTING MODELS			
EXAMPLE 2 (Continued)		NOTE: The proof is designed only to show that costs are evenly distributed to all units, and the fact that there may have been previous charges at the old rate is to be disregarded for purposes of the calculation.	
Step 5:	Recalculate old item NC charge and determine if changed rates should be submitted to DSAA.		
a.	Old Item Cost Pool	Divided by Benefiting Units	
	\$160,000,000	1,000	= \$160,000
b.	New Common Cost Pool		
	\$240,000,000	3500	= \$ 68,571
	Recalculated charge for old item: = \$228,571		
c.	Comparison of previous old item NC charge with recalculated NC charge for old item.		
	Recalculated Old Item Charge	Old item Charge	
	\$228,571 divided by	\$400,000	= 57 percent, a 43 percent decrease and \$171,429 NC Unit Charge decrease.
Step 6:	Action Required.		
	Prepare DSAA package because the change in the NC rate in Step 5 Step 5 exceeds 30% and the unit charge decreases by more than \$50,000.		
Step 7:	Proof: Verify that cost pool has been fully allocated.		
	Old item 1,000 QTY X \$228,571 (Old Item Charge) =		\$228,571,000
	New item 1,000 QTY X \$148,571 (New Item Charge) =		\$371,430,800
	Total		\$600,001,800
	Rounded to: Total		\$600,000,000
	Cost Pool

0704 CASH SALES OF DEFENSE ARTICLES FROM NEW PROCUREMENT FOR DIRECT DELIVERY AND PARTICIPATION IN NEW PRODUCTION

070401. General. Defense articles procured for cash sales to an eligible foreign government or international agency, pursuant to Section 22 of the AECA [reference (a)], for direct delivery shall be priced to recover full contract cost to the Department of Defense, DoD recurring contract support costs, and applicable DoD surcharges. Revised costs may need to be reflected from time to time in order to indicate increases due to escalation of labor and materials or to reflect other changes in production and procurement costs. The purchaser shall be obligated to pay any damages or costs that may accrue from the purchaser's cancellation of the contract. The administrative charge (see paragraph 070602) shall be added to the contract cost and included in billings for incurred costs. An illustration of the price computation is at Table 704-1.

070402. Items to be Replaced by Later Production (Diversions). Sale of items from new production and procurement, when such items are diverted from Military Department delivery schedules to be replaced by later production, shall be priced at current production cost or replacement production cost, whichever is higher.

070403. Cost Principles

A. In general, DoD articles shall be priced on the basis of the same cost principles as are used in pricing DoD contracts covering items for DoD use. However, recognition shall be given to other reasonable and allocable contractor costs and risks to the extent permitted in the Federal Acquisition Regulation (FAR) [reference (g)].

B. Unless the provisions of Section 22b of the AECA are involved, when insufficient funds are available in the FMS Trust Fund account of a foreign government to meet current cash requirements, DSAA shall initiate, through the responsible DoD Component, terminations for convenience or other adjustments to selected

contracts that will balance current cash requirements with available funds. Special attention is directed to Section 502 of this Volume. This condition should not occur without notification to the FMS Customer. Before terminating under these conditions, the contracting officer shall determine whether or not the contractor is willing to continue performance at his or her own risk. If the contractor is so willing, an appropriate contractual agreement shall be bilaterally signed so as to (a) limit the government's contractual liability to the available funds; (b) provide for appropriate passage of title to the FMS customer for any materials or services that have not been accepted but may be covered by progress payments, partial payments, or reimbursed costs; and (c) provide for an equitable adjustment in the event the termination for convenience is not issued in favor of continued performance. When other forms of contractual adjustments are used, they shall provide for equitable adjustment as appropriate and as permitted by reference (g).

070404. Recovery of Nonrecurring RDT&E and Nonrecurring Production Costs. The price shall include recovery of nonrecurring research and development test and evaluation, and nonrecurring production costs as specified in DoD Directive 2140.2 [reference (r)]. Paragraph 070305 contains further discussion of these costs.

070405. Recovery of Contract Administration Services Costs Incurred in Support of New Procurements for FMS

A. General. The cost of contract administration services functions as identified in the FAR [reference (g)] and contract audit shall be recovered through the application by the SAAC of a percentage surcharge to the delivery transactions reflecting disbursements to contractors for FMS procurements on which applicable contract administration services have not been waived. This surcharge is subject to waiver in whole or in part under Section 21(h) of the AECA [reference (a)](see paragraph 070104.C.3. of this Volume), and is waived in its entirety for the NATO E3A Cooperative Program (see paragraph 070104.C.2.). A listing of waived programs is included in Section 1301 and Table 1301-1 of DoD 5105.38-M [reference (e)]. The

surcharge shall be reviewed annually by the Office of the Comptroller, DoD to determine if it should be changed. The amounts collected as a result of the application of the surcharge shall be credited to a surcharge account maintained by the SAAC and used to reimburse DoD Components for contract administration services performed.

B. Responsibilities.

1. The Office of the Comptroller, DoD shall review annually the contract administration surcharge and revise as necessary.

2. The Security Assistance Accounting Center (SAAC) shall:

a. Establish and maintain the contract administration services account.

b. Maintain a list of FMS cases for which complete or partial waivers of the contract administration costs have been granted.

c. Apply the prescribed surcharge, or the applicable portion in the case of partial waivers, to reported disbursements from delivery transactions received on or after October 1, 1980, for all FMS cases that are not included on the waiver list (see subparagraph B.2.b., above) with delivery source codes BB, DA, DB, DC, DD, DE, DK and ED and price code N (see paragraph 080402).

d. Pay DoD Components for billing of actual contract administration services costs.

e. Increase the amount billed to FMS customers as a result of disbursement to contractors by the amount derived by applying the surcharge percentage to these disbursements.

C. Prescribed Contract Administration Services Surcharge.

1. The following surcharges are prescribed for SAAC application to disbursement with reimbursable codes and delivery source

codes described in subparagraph B.2.c., above (NATO E-3A Program is exempt):

Quality Assurance and Inspection	0.5%
Other Contract Administration Services	0.5%
Contract Audit	<u>0.5%</u>
Total	1.5%

2. If no waiver has been granted pursuant to Section 21(h) of the AECA [reference (a)], SAAC shall apply the full 1.5 percent surcharge. Waiver of the charges for either the quality assurance and inspection, contract administration services, or contract audit under Section 21(h) of reference (a) shall result in the SAAC application of the remaining surcharges. For example, if quality assurance, inspection, and contract audit costs are waived, SAAC shall apply the 0.5 percent surcharge for "other contract administration services." SAAC shall use the list referenced in paragraph B.2.b., above, as a basis for determining charges. Any cases not on this list shall be assessed the full amount of the surcharge. The waived contract administration cost for FMS cases included on the list shall be charged to DoD appropriations. SAAC shall reject billings from DoD Components for charges that have been waived.

070406. Recovery of Contract Administration Services Costs Incurred in Support of Foreign Country Commercial Contracts. DoD support of commercial contracts awarded by foreign countries and international organizations represents an FMS sale of services. The manhours expended in support of these commercial contracts shall be accumulated and billed at an FMS contract administrative hourly labor rate published each fiscal year by the Office of the Comptroller, DoD. The hourly rate shall include appropriate charges for TDY, use of DoD assets, and unfunded civilian retirement costs. For further discussion on foreign country commercial contracts, see Section 205 of this Volume.

070407. Recovery of Costs for Government-Furnished Materiel (GFM)

A. GFM provided from inventory shall be billed to the FMS case as "work in process" when the GFM is shipped from a depot to a contractor (see Table 804-13). The billing

price shall be the same as a direct sale to an FMS customer, plus applicable accessorial costs. The various categories of accessorial costs and the method of calculating them are set forth in Section 705.

B. GFM provided from another contractor shall be billed to the FMS case as "work in process" when payments are made to the contractor supplying the GFM. In the event shipment is through a Government Bill of Lading (GBL), the applicable transportation accessorial charge, as set forth in paragraph 070503, should also be billed as "work in process." Contracts with contractors providing GFM directly cite the FMS Trust Funds as the financing source to the maximum extent possible.

C. When precious metals recovered under the precious metals recovery program are provided as GFM to a contractor, the materiel shall be valued at the market price on the date it is provided to the contractor. Market price shall be determined from any authoritative publication, such as *The Wall Street Journal*.

070408. Recovery of Other DoD-Funded Services in Support of FMS Procurements

A. The cost of DoD-provided or-funded engineering services that are required to solve problems encountered during the production run shall be allocated to FMS customers based upon the number of their items that are in the production run.

B. If components are procured for an FMS customer and assembled by DoD personnel, assembly labor costs shall be assessed in accordance with paragraph 070802.

C. If a contractor is designated as the source of supply for nonstandard items to be procured for FMS customers, the contract price for applicable items will normally include the additional cost incurred to research, and procure the nonstandard items. Any reasonable method of allocating these additional costs is acceptable. The test of the reasonableness of the contractor's costing allocation would be acceptance of the method by the Defense Contract Audit Agency.

070409. Special Considerations. Cost of deviations from U.S. Government configuration and special technical data desired by a foreign government shall be included as a charge to the foreign governments.

0704010. Production by a Foreign Government. When a portion of the production quantity is to be produced by the purchasing foreign government, costs shall be computed separately, in accordance with cost methods established by the foreign government and accepted by the U.S. Government.

0704011. Recoupment of Interest Penalties Due to "The Prompt Payment Act of 1982" [reference (s)]. Interest penalties incurred on FMS procurements will be initially financed from funds of the paying activity. An analysis of FMS interest payments will be prepared and submitted to the Security Assistance Accounting Center (DFAS-DE/IR (SAAC)) monthly and will identify the country, case, contract number, and reason for late payment. See paragraph 021102 of this Volume.

A. Any interest penalties incurred under "The Prompt Payment Act of 1982" [reference (s)] will be included in delivery transactions to SAAC. See Table 804-19.

B. Within 50 days after the fiscal year ends, DoD Components shall submit to DSAA a report of Prompt Payment interest penalties which have been included in delivery transactions.

0704012. Contract Review. The DoD Components will make every effort to obtain the final price for contract provided items within 180 days of reported delivery.

TABLE 704-1 PRICE COMPUTATION EXAMPLE NEW PROCUREMENT

Contract Price (See paragraph 070401)	\$1,000,000.00
Pro Rata Share R&D ¹ (\$2500 each X 20 items)	50,000.00
Contract Administration Services (1.5%)	15,000.00
Government-Furnished Equipment (GFE)	25,000.00
Packing, Crating, and Handling of GFE (3.5%) ³	875.00
Transportation of GFE from Depot to Contractor Plant ³	<u>938.00</u>
FMS Selling Price (20 items)	\$1,091,813.00 ^{1,2}
FMS Unit Selling Price	\$54,590.65 ^{1,2}

¹ Transportation of end item, if applicable, and administrative surcharges are additive to the selling price.

² See Tables 804-10 through 804-14 for billing. Note that in the billing example, the extended value shown in Table 804-10 does include the contract administrative services surcharge, applied by SAAC against contract payments.

³ PC&H and CONUS transportation are applicable if the GFE are purchased from procurement citing the case funds. For the purpose of this example, the GFE (\$25,000) are considered to be all procurement-funded items with unit costs of less than \$10,000. PC&H and Inland CONUS Transportation are not applicable if the GFE is shipped from inventory by the Defense Business Operations Fund, as the cost is included in the standard price of the item.

0705 ACCESSORIAL COSTS

070501. General. Accessorial costs represent certain expenses incident to issues, sales, and transfers of materiel which are not included in the standard price or contract cost of materiel. A description of the various types of accessorial costs which may be applicable to FMS shipments follows:

A. Packing, Crating and Handling (PC&H) Costs. The costs incurred in DoD facilities for labor, materials, or services in removing requisitioned articles from storage locations, preparing them for shipment from the storage or distribution points, and processing necessary materiel release confirmation documents. The costs are incurred on all articles sold from stock to FMS customers. (Note: Not applicable to delivery of stock fund/Defense Business Operations Fund items reported after October 1, 1990)

B. Transportation Costs. The cost of DoD-provided or financed inland transportation (L1A)(land, air, inland and coastwise waterways) in the United States and outside the United States, and overseas transportation by vessel or air; includes parcel post (L1D) via surface or air. (Note: Inland CONUS (L1A) not applicable to delivery of stock fund/Defense Business Operations Fund items reported after October 1, 1990; Parcel post (L1D) and commercial package carrier (L1E) charges are not applicable after October 1, 1991).

C. Port Loading and Unloading Costs. The cost of DoD-provided or financed labor, materials or services for loading, unloading and handling at ports of embarkation or debarkation. Transportation charges for the use of the DoD transportation system, as set forth in paragraph 070503 below, include applicable loading and unloading costs.

070502. Packing, Crating, and Handling. Standard PC&H rates will be applied to the selling price of materiel sold from DoD inventories to recover the cost described in paragraph 070501.A., above. The PC&H rate will not be assessed on DoD stock fund/Defense Business Operations Fund items delivered after October 1,

1990 since the costs for PC&H are included in the standard stock fund/Defense Business Operations Fund price. Additionally, PC&H will not be assessed on articles shipped directly from the manufacturer since no in-house DoD labor, material, or services are involved. Prescribed PC&H rates are:

A. A PC&H rate of 3.5 percent will be added to the selling price of materiel with a unit price of \$50,000 or less.

B. An additional charge will be added equal to one percent of that portion of the selling price of materiel over \$50,000.

C. Examples of PC&H price computations follow:

1. Item with a unit price of \$8,500:

$\$8,500 @ 3.5\% = \297.50 PC&H charge

2. Item with a unit price of \$62,000:

$\$50,000 @ 3.5\% = \$1,750.00$

$\underline{\$12,000 @ 1.0\% = 120.00}$

$\$62,000 \qquad \qquad \$1,870.00$

D. The PC&H charge for service/maintenance cases is applied to the unit cost of the item (or items) sold or serviced, not the cost of the service. The rate in subparagraphs A and B above apply.

070503. Transportation. For other than Defense Business Operations Fund materiel, transportation of FMS materiel shall be on collect commercial bills of lading. When transportation shall be accomplished through a GBL, the GBL shall be annotated to show that normal commercial rates will be billed to the U.S. Government for the shipment. Section 10721 of the Interstate Commerce Act of 1887 [reference (m)] is not applicable to FMS shipments, including "stock fund" items shipped from the Defense Business Operations Fund.

A. DoD Components shall apply rates contained in Table 705-1 to the selling price of materiel with a unit price of \$10,000 or less to

calculate the cost for billing customers for the use of the DoD Transportation System. When an item has a unit selling price over \$10,000, the applicable rate from Table 705-1 shall be applied to the first \$10,000 of the item's unit cost and 25 percent of the same rate to the remainder of the unit price, to estimate a price for the use of the DOD transportation system. For example, an item priced at \$50,000 with a delivery code to Newfoundland would require a transportation charge of \$3,249 (\$10,000 at 16.25 percent and \$40,000 at 4.06 percent).

B. Costs for the staging of materiel in CONUS DOD (non-Defense Business Operations Fund owned/operated) facilities are additions to DOD transportation system costs, and a 3 percent staging charge is applicable, if DSAA has authorized "below-the-line" recoupment of staging. Defense Business Operations Fund owned/operated facilities shall bill actual costs incurred as an "above-the-line" service. Normally, the actual costs of staging shall be recovered as part of an "above-the-line" service charge. Such charges shall not be duplicative of any other accessorial cost. When nonexcess materiel is provided from DOD storage points located outside CONUS, the applicable rates (see Table 705-1) shall be charged as a prepositioning cost. For example, if the materiel being sold is stored in Germany and costs \$10,000 or less, a 14.25 percent prepositioning charge would be applied. If transportation to the FMS customer is necessary, it normally shall be accomplished through the use of collect commercial bills of lading. If DOD transportation is used to move articles from an overseas storage location to a point designated by the FMS customer, actual or estimated transportation costs shall be billed to the FMS customer. In estimating the cost of overseas DOD transportation, a 3 percent factor shall be used for overseas land transportation, 1 percent for overseas port loading, and 1 percent for overseas port unloading. An actual dollar amount shall be determined by the supplying DOD Component to recoup the cost of ocean or air transportation.

C. The use of estimated actual charges is authorized for certain items approved in advance by OASD(C) and DSAA when the established percentages for use of the DTS are

significantly different from the estimated actual charges. DSAA will establish and maintain a look-up table to reflect the estimated actual transportation charges for the DTS shipment of approved items. Only items on this look-up table qualify for the billing of estimated actual rates, unless approval is received from DSAA with OSD(C) concurrence. See Section 805 of this Volume for detailed procedures.

TABLE 705-1 STANDARD TRANSPORTATION PERCENTAGES

	<u>Percentages Used When Shipped by the Defense Business Operations Fund</u>	<u>Percentages Used When Shipped by Other Than the Defense Business Operations Fund</u>
1. <u>Delivery Term Code 2</u>		
a. FOB Destination - inland origin to inland destination within CONUS/Canada (except Newfoundland and Labrador).	0.00	3.75
b. FOB destination- inland origin to inland destination in a foreign country other than Canada.	0.00	3.00 + delivery code 7 charges if material is to be replaced (see subparagraph 070503.C.)
2. <u>Delivery Term Code 4</u> - Recipient Country is responsible for the cost of CONUS transportation and subsequent arrangement for onward movement or when transportation is provided as a case line such as high flight or special assignment airlift mission.	0.00	0.00
3. <u>Delivery Term Codes 3 and 5</u> - DOD movement for FMS customer in CONUS/Canada (except Newfoundland and Labrador).	0.00	3.75
4. <u>Delivery Term Code 6</u> - DOD movement from point of origin to and including ocean transportation to overseas port of discharge:		
a. To Europe, Hawaii, Latin America (Central America and Caribbean Basin) and Mediterranean Ports	6.50	10.25
b. To Newfoundland, Labrador, Thule, Iceland, South America (East and West Coasts), Far East, African ports (other than Mediterranean), and Near East	8.50	12.25
5. <u>Delivery Term Code 7</u> - DOD movement from point of origin to, and including, inland carrier delivery to the specified inland location (includes overseas movement of parcel shipments via the Military Postal Service through APO/FPO channels):		
a. To Europe, Hawaii, Latin America (Central America and Caribbean Basin) and Mediterranean Ports	10.50	14.25

TABLE 705-1 STANDARD TRANSPORTATION PERCENTAGES (CONTINUED)

	<u>Percentages Used When Shipped by the Defense Business Operations Fund</u>	<u>Percentages Used When Shipped by Other Than the Defense Business Operations Fund</u>
b. To Newfoundland, Labrador, Thule, Iceland, South America (East and West Coasts), Far East, African ports (other than Mediterranean), and Near East	12.50	16.25
6. <u>Delivery Term Code 8</u> - DOD movement from point of to , and including, unloading, handling, and storage aboard vessel at port of exit	2.50	6.25
7. <u>Delivery Term Code 9</u> - DOD movement from point of origin to, and including, vessel discharge at the point of discharge:		
a. To Europe, Hawaii, Latin America (Central America Caribbean Basin) and Mediterranean Ports	7.50	11.25
b. To Newfoundland, Labrador, Thule, Iceland, South America (East and West Coasts), Far East, African ports (other than Mediterranean), and Near East	9.50	13.25

Note: At the time of preparation of the LOA if it is known and authorized that materiel will be shipped via Special Assigned Airlift the cost should be a line on the case and will be priced as an estimate of cost. This shipment will cite the line on the case for reimbursement.

0706 ADMINISTRATIVE CHARGES

070601. General. An administrative surcharge shall be added to all FMS cases (unless the recoupment of administrative expenses has been waived pursuant to legal authority, see Paragraph 070104) to recover DoD expenses related to the functions of sales negotiations, case implementation, procurement, program control, computer programming, accounting and budgeting, Reports of Discrepancy (RODs) administration, and administration of FMS training cases at command headquarters and higher levels. Applicable DoD Component costs are recouped in accordance with paragraph 070603. The Letter of Offer and Acceptance payment schedule shall include, as a part of the required initial deposit, an amount equal to 50 percent of the administrative charge applied to the basic sale price as specified in paragraph 070602. The remaining 50 percent of the administrative charge shall be included as equal percentage installments within each of the estimated payments.

070602. Prescribed Standard Administration Charges

A. Supply Support Arrangements. An administrative charge of 5 percent shall be added to the basic sales price on the initial on-hand portion of Cooperative Logistics Supply Support Arrangements (CLSSA) (See paragraph 070708 for detailed instructions).

B. FMS Orders for Nonstandard Articles and Services. An administrative charge of 5 percent shall be added to the basic sale price of FMS orders for nonstandard articles and services. However, the 3 percent administrative charges shall be applied under the following two conditions:

1. A contractor is designated as the source of supply in lieu of a DoD Component performing additional work for the nonstandard articles and services. (See paragraph 070408.)

2. A case management line is included in the Letter of Offer and Acceptance that specifically recovers costs associated with

the tasks performed in support of the sale of nonstandard articles or services.

C. All other FMS Orders. Administrative charges for FMS cases not included in Section A above, are dependent upon the date the applicable LOA or amendment is signed out by the cognizant Military Department or Defense Agency. For cost increases within the scope of the LOA, modifications retain the administrative rates current at the time the applicable LOA or amendment was signed out. While the following administrative rates are applicable for the periods shown below, if an amendment adds a new line to an FMS case implemented prior to October 1, 1977, the 3 percent administrative rate is applicable to the new line:

1. January 29, 1970 - March 9, 1977. A 2 percent administrative rate, unless the supplying Military Department had determined that the rate was either insufficient or in excess of actual administrative expense for any single FMS case. The use of actual FMS case administrative expense was authorized.

2. March 10, 1977 - September 30, 1977. A uniform 2 percent administrative rate for offers signed out during this period.

3. October 1, 1977 - Present. A uniform 3 percent administrative rate for offers signed out after October 1, 1977.

070603. Actual Administrative Expenses. Those DoD organizations which provide general administrative support of the FMS program shall recoup the full cost (excluding a pro rata share of fixed base operations costs) of providing such support. Costs charged in connection with administrative support shall not include costs which are prescribed in this Volume as above-the-line costs. Above-the-line costs include (1) contract administration services, see Section 704; (2) case management, see Section 718; (3) recurring contract support costs, see paragraph 070408, and (4) administration of FMS training cases at the installation level which are to be included in the tuition rates. Administrative support cost also does not include the cost of calculating nonrecurring recoupment charges and royalty fees which is a DoD mission cost.

A. The personnel portion of actual administrative expenses shall include a pro rata share of those personnel who spend 10 percent or more of their time performing FMS duties. If an organization's manpower staffing is based upon routinely maintained workload statistics (such as the number of travel orders processed), the FMS administrative personnel expense shall be determined from equivalent FMS workload statistics. In other words, if FMS workload is 25 percent of total workload, then 25 percent of the organization's payroll cost shall be funded through FMS administrative surcharges. Identification of chargeable personnel in base support activities (such as security and civilian personnel specialists) is determined by the incurrence of additional cost to support non-Base Operations Support (BOS) FMS administrative activities, and not by the criteria used in performing an operational audit (e.g., activity frequency, frequency conversion factor, frequency per month, allowed manhours per accomplishment, allowed manhours per month, etc.). These elements which are used in measuring manpower requirements do not in and of themselves prove that incremental costs have been incurred. Thus, there is a different standard for charging BOS personnel, i.e., conclusive demonstration that actual additional costs are being incurred to support non-BOS FMS administrative activities versus charging non-BOS personnel a pro rata share of those personnel who spend 10 percent or more of their time performing (hands-on) duties. The cost of identified personnel shall be computed in accordance with paragraph 070201.

B. Other actual or estimated actual administrative costs include:

1. Travel costs, including per diem and transportation, incurred in the administration of the FMS program which cannot be directly related to mission requirements of a single case or program. (Special care is required in this area. See Section 718.)

2. Automatic data processing costs, excluding equipment cost or depreciation charges, to support FMS workload based on proration of machine time required to produce general FMS reports or transactions.

3. Printing and reproduction costs incurred primarily for the benefit of the FMS program.

4. Communications, utilities, and office supply costs incurred primarily for the general administration of the FMS program.

5. Equipment costs, both purchased and rental, when such costs are specifically incurred to support the administration of the FMS program.

6. Rental charges at fully dedicated FMS activities for floor space rental.

7. Administrative costs of Reports of Discrepancy (RODs). This cost includes the "net cost" to the Department of Defense for processing RODs for overage, shortage, damage, item deficiency, and duplicate billing. Such costs exclude discrepancies that are attributable to damage or loss, occurring after passage of title. Normally, FMS shipments move from the depot or vendor's plant on collect commercial bills of lading with title passed at point of origin. However, occasionally shipments move under Government Bills of Lading. Under either of these conditions, title passes at the point of origin and if damage or loss occurs subsequent to title passage, payment is not to be made from the administrative fund (this is, claims should be submitted against the common carrier). See Chapter 8, Section 802 of DoD 5105.38-M [reference (e)], for more detailed information.

C. DSAA shall ensure that an appropriate share of the cost of Military Assistance Advisory Groups and military missions shall be charged to administrative expense.

070604. Administrative Charges on Canceled Cases

A. Earned reimbursements for administrative surcharges are normally not refundable, i.e., the 50 percent that is earned when the case is accepted.

B. The administrative surcharges may be charged in accordance with the following guidance:

1. For cases under \$25 million that are canceled, SAAC shall retain a portion of the administrative surcharge that equals one-half of the applicable administrative percentage of the estimated articles/services ordered value, or the administrative rate times the actual articles/services delivered at closure, whichever is higher.

2. For cases over \$25 million that are canceled, DSAA Comptroller shall determine the appropriate administrative charge; however, the charge shall normally be at least \$250,000.

C. DSAA may approve waivers or reductions outside of the above parameters if circumstances dictate. Such waivers or reductions shall be fully documented and demonstrate that estimated administrative costs incurred on the case have been recouped.

D. Cases canceled for the convenience of the U.S. Government will not incur an administrative cancellation fee. DSAA shall make this decision.

070605. Waived Administrative Charges

A. General. Cost of administrative effort applicable to FMS cases on which the normal administrative surcharge has been waived or reduced, pursuant to statute, must be reimbursed to the FMS administrative surcharge account. Therefore, the IA which is the proponent of the case on which the charge has been waived shall obligate its current operation and maintenance appropriations for the full amount being waived annually. The amount of the earned administrative charges, which is the value of the administrative charge (currently 3 percent) is to be charged to Program 10. The SAAC shall then apply the established FMS administrative surcharge to accrued expenditures recorded against the case on which the normal administrative surcharge was waived and submit quarterly SF 1080 "Voucher for Transfer Between Appropriations and/or Funds" billings to the

appropriate IA for the amount that would normally be payable by the FMS customer.

B. Fund Control. A recommendation to approve a waiver of the normal administrative surcharge shall be accompanied by a miscellaneous obligation document which identifies the financing appropriation and the dollar value of the waiver. The IA shall certify that funds are available. The approving officials shall sign the obligating document. The provisions of DoD Directive 7200.1 [reference (f)], "Administrative Control of Appropriations," are applicable.

0707 COOPERATIVE LOGISTICS SUPPLY SUPPORT ARRANGEMENTS

070701. General. DoD Directive 2000.8 [reference (t)] prescribes the policies and criteria for establishing cooperative logistics supply support arrangements. These cooperative logistics supply support arrangements provide for the execution of Foreign Military Sales Orders (FMSOs) covering stockage, consumption, and storage (Note: There is no annual inventory maintenance and storage charge for stock fund/Defense Business Operations Fund items for CLSSAs as the stock fund/Defense Business Operations Fund standard price recoups all costs). Two FMS cases are required for supply support arrangements: the FMSO I and the FMSO II. Both cases shall be executed in order for FMS requirements to be anticipated and to be satisfied on an equal footing with U.S. requirements.

A. The FMSO I case is subdivided into two parts: Part A represents the on-hand portion of the inventory (normally 5 months) and Part B represents an on-order dependable undertaking (normally a 12 month period). Both parts of the FMSO I provide obligational authority equal to its value in the DoD Component activity providing the supply support to the customer. Cash paid on acceptance of the FMSO I is to equal the Part A on-hand portion of the inventory and administrative surcharge. The cash required to liquidate obligations incurred with suppliers for the on-order portion is the cash paid by the customer in connection with the FMSO II case, and in turn creates a new order received and recreates obligational authority back to the FMSO I.

B. The FMSO II case represents the foreign customer's anticipated yearly consumption under the cooperative logistics supply support arrangement. Cash to cover requisitions is paid in advance of each quarter covered by the case.

The cycle of obligation, acquisition, requisition, issuance, and payment can be summarized as follows:

1. FMSO I, Parts A and B, give the DoD Components obligational authority up to the case amount.
2. The cash provided under FMSO I, Part A, finances the on-hand inventory.
3. Requisitions made by the customer are filled from the on-hand inventory.
4. Replenishment of on-hand inventory is made from contracts awarded under obligational authority granted by FMSO I, Part B.
5. Payments to contractors are made from funds provided in accordance with FMSO II terms.
6. Liquidation of obligations by payment to contractors in effect recreates obligational authority granted by FMSO I, Part B, and the cycle commences again.

C. In accordance with the concept, the entire amount of the FMSO I case represents obligational authority. Normally, no cash billings are required against the FMSO I, Part B, unless the cooperative logistics supply support arrangement is either partly or wholly terminated. The FMSO II case provides obligational authority only to the extent that cash is received. Thus, proper working of the FMSO I and II should result in a constant 12 months of obligational authority in the applicable appropriation or fund account, never more or less, after the on-hand inventory of FMSO I, Part A, has been acquired.

D. The cash and obligational authority derived from the FMSO I and FMSO II are to be transferred to the Commodity Command or Supply Agency that is expected to provide

supply support to the foreign country. This Command or Stock Agency shall use such cash and obligational authority to increase stock and on-order quantities in anticipation of requisitions from the country which entered into the supply support arrangement.

E. In unusual circumstances, it may be determined that the 5-month on-hand and 12-month on-order levels are inappropriate for the particular equipment being supported. In these circumstances, the on-hand and on-order requirements may be adjusted to more realistically reflect the DoD on-hand and on-order levels for the items being supported. Documentation in support of such determinations shall be retained by the office that developed the supply support arrangement.

070702. Customer Equity. Supply support arrangements are written in terms of an absolute dollar amount of support to be provided under the arrangement. A listing of the specific items required to support the weapon system is not developed. Under this "dollar value" concept, the FMS customer's equity shall remain valued at the cash deposited for the FMSO I. Upon termination, a review shall be made of the foreign country's demand data for specific items. When these demand data result in the procurement of stock above the DoD-approved retention levels, the foreign country shall be informed that applicable stocks owned by that country must be drawn down or that a settlement agreeable to both parties must be reached.

070703. Pricing. Paragraph 070302.B sets forth the pricing requirements.

070704. Storage Costs. Storage fees shall be charged based on the on-hand portion of the FMSO I. Normally, the on-hand portion represents 5/17 of the total case value. The annual storage fee is 1.5 percent. For cases not remaining open a full year, a fee of .125 percent a month shall be charged. (Note: There is no annual inventory maintenance and storage charge for stock fund/Defense Business Operations Fund items for CLSSAs as the stock fund/Defense Business Operations Fund standard price recoups all costs).

070705. Obsolete Materiel. If an item becomes obsolete or excess to the United States but not to the foreign government, the United States may request the foreign government to withdraw its undelivered quantity of the item. Additional quantities may be offered to the foreign government at fair value prices (Paragraph 070304.A., above). If items become obsolete or excess to the requirements of the foreign government but not to the United States, the foreign government may request the United States to consider cancellation of its order and to apply its equity in the undelivered quantity to subsequent orders for other items. If cancellation is not agreed to, arrangements shall be made for the United States to dispose of the materiel and credit the net proceeds to the foreign government. If the United States has a need for the materiel, appropriate credit to the stock level case for return of the materiel to stocks of the United States shall be made in accordance with the departmental procedures for credit allowance for return of materiel [see DoD 7420.13-R, reference (u)]. If items become obsolete or excess to the requirements of both the United States and the foreign government, arrangements shall be made for the United States to dispose of the materiel and the proportional share of the net proceeds of sale shall be credited to the foreign government.

070706. Unusual Inventory Loss. Stock losses due to enemy action, major disaster, or other casualty from a natural phenomenon shall be assessed against the foreign government in an amount proportionate to the ratio that the value of its stock case bears to the total value of stocks in storage.

070707. Normal Operating Inventory Loss. The standard prices paid by the foreign government for stock level of stock fund/Defense Business Operations Fund items already include in a surcharge for estimated normal operating losses in storage.

070708. Administrative Surcharge

A. A one-time nonrefundable, administrative surcharge of 5 percent shall be charged on the on-hand portion (Part A) of the FMSO I case. For amendments that decrease the

value of the on-hand portion (Part A), there shall be no adjustment made to the administrative surcharge. However, for amendments that increase the value of the on-hand portion (Part A), the 5 percent nonrefundable administrative surcharge shall be charged on the total value of the amendments. Table 707-1 illustrates the 5 percent administrative fee computation.

B. No administrative surcharge shall be charged on the on-order portion (Part B) of the FMSO I case. A 3 percent administrative surcharge shall be charged on requisitions processed under FMSO II cases. If an FMSO I agreement is terminated, an administrative surcharge of 5 percent shall be charged for the inventory over and above the on-hand portion of the case. There shall be no additional surcharge on the on-hand portion of the case, since the customer has made advance payment of the administrative charges applicable to this portion of the case.

TABLE 707-1 FIVE PERCENT ADMINISTRATIVE FEE COMPUTATION
FMSO I - ON-HAND MATERIEL (PART I)

<u>Amendment</u>	<u>Revised On-Hand Materiel Value</u>	<u>Increase or Decrease to Previous On-Hand Materiel Value</u>	<u>5% Admin Fee Charge on Increase</u>	<u>5% Admin Fee Accrued Exp.</u>
Basic LOA	\$3,000,000	\$3,000,000	\$150,000	\$150,000
Amend 1	4,000,000	1,000,000	50,000	200,000
Amend 2	2,000,000	(2,000,000)	0	200,000
Amend 3	3,000,000	1,000,000	50,000	250,000
Amend 4	5,000,000	2,000,000	100,000	350,000
Amend 5	4,000,000	(1,000,000)	0	350,000

0708 STORAGE, REPAIR AND/OR MODIFICATION OF CUSTOMER-OWNED MATERIEL

070801. Storage. Costs applicable to storage of customer-owned articles include the functions of receiving, care and preservation in storage, set assembly and related other storage activities, and overhead in storage operations, such as re-warehousing, maintenance of operating equipment, physical inventories, and cleaning storage areas. Storage charges are applicable to the on-hand portion of FMSO I cases and to cases on which DoD is ready to deliver applicable items but has been requested by the customer to delay delivery (Note: There is no annual inventory maintenance and storage charge for stock fund/Defense Business Operations Fund items for CLSSAs as the stock fund/Defense Business Operations Fund standard price recoups all costs). A uniform DoD annual rate of 1.5 percent or .125 percent monthly of the average monthly value of customer-owned materiel will be charged to applicable FMS cases to recover an activity's costs of storage. An illustration of billing for storage, other than FMSO, is at Table 804-17.

070802. Repair or Modification. When a foreign government requests the repair and/or modification of items, the actual or estimated cost of the work will be priced on a job order basis. An illustration of price computation is at Table 708-1.

A. Labor cost will be computed in accordance with Section 702 of this Volume.

B. Materials and supplies obtained from the military supply system stocks will be priced in accordance with Section 703 of this Volume.

C. Materials, supplies, or services obtained directly from contractors will be priced in accordance with Section 704 of this Volume.

D. Transportation and related costs incurred in movement of the materials and supplies used incident to repair and/or modification will be priced in accordance with Section 705 of this Volume. (See paragraph 070501.B. for treat-

ment of stock fund/Defense Business Operations Fund materiel).

E. Indirect labor, material, and contractual services will be costed in accordance with the guidance in this Chapter and allocated to job orders.

F. Incoming and outgoing transportation costs related to FMS equipment/materiel processed by repair or overhaul facilities will be paid by the FMS customer. If uniform DoD accessorial rates are used, they should be applied to the DoD standard prices of the items being serviced.

070803. Administrative Surcharge. The administrative charge will be applied to all direct and indirect costs which are billed in connection with storage, repair and/or modification.

070804. Special Instructions Applicable to Industrial Funds/Defense Business Operations Funds. Industrial fund/Defense Business Operations Fund facilities will charge applicable approved non-DoD stabilized rates and prices for services in support of FMS cases. Stock fund/Defense Business Operations Fund materiel, including depot level reparable, will be priced at the standard price in effect at the time of the drop from inventory.

TABLE 708-1 PRICE COMPUTATION EXAMPLE OVERHAUL OF CUSTOMER-OWNED MATERIEL³

Direct materiel consumed or incorporated (does not include customer-owned materiel)		\$ 1,000.00
Direct labor hours of "funded" civilian personnel	500	
Direct labor hourly rate (employee salary and pro rata overhead)	<u>\$ 20.00</u>	
Direct civilian labor cost recouped (including unpacking and packing, crating and handling)		<u>10,000.00</u>
Funded cost recouped		\$ 11,000.00
"Unfunded" military labor (composite rate, retirement, ¹ other personnel costs, leave/holiday & PCS charge)--E-7, 100 hours		<u>1,472.00</u>
FMS Selling Price		\$ 12,472.00 ²

¹ The administrative surcharge is additive to the FMS selling price.

² See Table 804-15 for billing.

³ This table is general in nature and does not show all costs that may be included. For example, "direct materiel consumed or incorporated. . ." should include transportation, replacement prices and surcharges as appropriate. Also, PCH and transportation charges for the direct material consumed in overhaul items are included in the total overhaul price. (See paragraph 70501.B. for treatment of stock fund/Defense Business Operations Fund materiel). This example assumes that inbound and outbound transportation is paid by the FMS customer. See paragraph 70802.F. If the customer does not pay, the calculation for transportation would be, assuming a \$20,000 item's standard price and the item is not from the Defense Business Operations Fund, is as follows:

$$\$10,000 \times .0375 + \$10,000 \times \underline{.0375} = \$468.75 \text{ for a shipment to a freight forwarder.}$$

0709 COSTS ALLOCABLE FOR JOINTLY USED FACILITIES

070901. General. When specific agreements or arrangements are made for the joint use of USG facilities (that is, sharing of storage spaces, dedicated training facilities, etc.), a pro rata share of the operating cost initially financed by operating appropriations shall be charged to the foreign customer.

A. When jointly used storage or office space is involved, the pro rata share of operating costs shall be determined on the basis of space assigned to the foreign government versus total space available for assignment.

B. Operating costs shall include, but are not necessarily limited to, cost of maintenance and upkeep of facilities including access roads, security, communications, utilities, and rent, if the U.S. Government must make rental payments under lease agreements.

070902. Joint Use of Satellites. When jointly used satellites are involved, the launch cost shall be allocated to each participant based on pre-launch negotiations that consider the expected benefits accruing to each participant. Recurring operating costs shall be pro rated on the basis of time each participant actually uses the satellite.

0710 TRAINING OF FOREIGN NATIONALS

071001. General. Tuition rates for training shall be based on the costs of providing the training. Detailed instructions to be followed in developing the tuition rates are included in Sections 711 and 712 of this Volume. Any special requirement for the exclusive use of a foreign student shall be reimbursed in full.

071002. Observers. Observers auditing a course shall be charged the same price as an enrolled student.

071003. Pricing Military Pay. Price military pay using the composite standard rates and acceleration factors published in Appendix C.

Price civilian pay using the current annual salary and acceleration factors in Appendix C.

071004. DoD Course Cancellations. A charge of 50 percent of the tuition rate for the course or course phase shall be made for a student who is canceled or rescheduled within 60 days before the starting date of the course or phase. For sequential training, the cancellation charge shall apply only to courses or phases scheduled to start within the 60-day period. No charge shall be made for withdrawal from follow-on training when course cancellations or reschedulings are caused by the U.S. Government or for students who attrit due to academic failure beyond the control of the student, injury or illness incurred during training. Cancellations or reschedulings shall be effective on the date notice is presented in writing to the U.S. overseas security assistance organization (SAO) or other duly appointed and recognized U.S. Government representative. Charges for attrited (separated) students shall not be less than 50 percent of the tuition rate. Further, if the student completes more than half of the course, the cost shall be assessed on a pro rata share (e.g., 70 percent) of the tuition rate, or 100 percent of the tuition rate if a pro rata computation is not practicable. The provisions of this paragraph shall be included on any LOA that covers training. For contractor provided courses, the cancellation fee will be 100 per cent of the course cost. The 60 day limitation for DoD courses does not apply to contract provided courses. No cancellation fee will be assessed when the quota for the contractor provided course is filled by another student.

071005. Inflation Factors. Tuition rate estimates for future years shall be adjusted for inflation. The Office of the Comptroller, DoD shall provide factors to be used for this purpose.

071006. Annual Publication of Rates. Tuition rates shall be computed annually by the Military Departments and published in the Military Articles & Services List (MASL)[see Section 1503 of reference (e)]. Tuition rates shall be those in effect for the year in which the student enters the course or phase of a course. Approved rates shall remain constant for the year. Adjustments shall be made only to correct significant errors in computation, change in syllabus, or major unan-

anticipated increases or decreases in the cost of such items as POL and salaries. The foreign country shall be billed for the actual time the student is in training when it varies from the scheduled length of the course. Any adjustments shall be made as soon as possible but not later than 90 days after completion of the course.

071007. NATO Rates

A. Training course tuition rates under North Atlantic Treaty Organization Standardization Agreements ratified by the U.S. Government and for Australia, New Zealand, Japan, and with other countries which are major non-NATO allies if based on similar reciprocity agreements, shall include reimbursement for all direct costs, but will exclude:

1. Indirect costs.
2. Administrative surcharges.
(However, see paragraph 070605.)
3. Cost of billeting trainees
(except to the extent that members of the U.S. Armed Forces occupying comparable accommodations are charged for such accommodations by the United States).

B. The above exclusions do not apply for dedicated training, e.g., contractor training, dedicated training courses, mobile training teams (MTT's), and extended training services specialists (ETSS).

C. For training at industrial fund/Defense Business Operations Fund activities, direct costs shall be defined for the purpose of these regulations as including a pro rata share of overhead costs distributed in accordance with the prescribed costing procedures for industrial funds/Defense Business Operations Funds. When industrially funded/Defense Business Operations Fund personnel are utilized other than at the industrial fund/Defense Business Operations Fund site, price civilian personnel using the current annual salary and appropriate acceleration factors without overhead costs.

D. NATO countries who are eligible for IMET shall be charged the incremental FMS

prices instead of NATO prices for training (see paragraph 071008).

071008. IMET Rates. Effective October 1, 1985, any student from an IMET-eligible country who is currently receiving IMET funds and who is buying FMS training shall be charged for any incremental cost (additional cost) to the U.S. government for providing the training. Detailed instructions to be followed in developing incremental rates are included in Section 712 of this Volume.

071009. Liability for Damages. Training cases that involve the use of U.S. equipment (such as aircraft, trucks, etc.) and that do not include charges for attrition shall include a statement regarding liability for damages. This statement shall state that the foreign government shall be liable for any damage to such equipment due to negligence on the part of the student. The cost of replacing equipment which is destroyed as a result of student negligence shall be reimbursed in full. See Section 703 of this Volume for instructions on pricing replacement equipment.

071010. Elimination of the Cost of Military Pay and Entitlements. Public Law (P.L.) 99-83 and P.L. 100-461 amend Sec 503(a) of the FAA [reference (a)] of 1961, as amended, and provide for elimination of the cost of military pay and entitlements if the FMS training case is totally financed by the Military Assistance Program (MAP) and/or by non-repayable FMS credits. Training cases shall be priced to exclude military pay and entitlements (including retired pay accrual) only for those cases citing MAP funds and/or FMS Credit (non-repayable) as the exclusive method of funding on the LOA. The exclusion for non-repayable FMS Credit cases is applicable beginning FY 1990. DSAA will commit MAP funds and non-repayable credits on all FMS training cases excluding military pay and entitlements (including retired pay accrual) prior to FMS training cases being offered to a country. Any subsequent amendment/modification serving to reduce the MAP and/or non-repayable credit financing below 100% shall require repricing to add military pay and entitlements to the entire case. The following additional clarification is offered.

A. A country's IMET training program will be charged on an incremental basis. Furthermore, military salaries and entitlements will be excluded for IMET funded assistance.

B. A country receiving assistance under the IMET program that decides to purchase additional training under a totally MAP funded FMS case will be charged on an incremental basis which will exclude military salaries and entitlements.

C. In the event that the purchaser is a NATO member, Japan, Australia, New Zealand, or major non-NATO ally, and has a reciprocal pricing agreement with the USG, the purchaser will be charged full direct costs less reimbursement for indirect costs, administrative surcharges, costs of billeting trainees (except to the extent that members of the United States Armed Forces occupying comparable accommodations are charged for such accommodations by the United States). See paragraph 071007.A.2.

D. If a country is a MAP but not an IMET recipient, and the country purchases training under a totally MAP funded case, the purchaser will be charged at full cost (i.e., includes both direct and indirect costs) less military salaries and entitlements.

TABLE 710-1 PRICING MATRIX FOR TRAINING

[Effective October 1, 1985 (FY86)]

	FMS	FMS NATO	MAP/IMET	IMET
<u>PAY & FRINGE BENEFITS</u>				
<u>Direct Cost</u>				
Civilian Pay ⁵	X	X	I	I
Civilian Fringe Benefits ¹	X	X	X	X
Civilian Unfunded Retirement ^{1,2}	X	X	-	-
Military Pay ^{4,5}	X	X	I	-
Military Fringe Benefits ^{1,4}	X	X	X ³	-
<u>Indirect Cost</u>				
Civilian Pay ⁵	X	-	I	I
Civilian Fringe Benefits ¹	X	-	X	X
Civilian Unfunded Retirement ^{1,2}	X	-	-	-
Military Pay ^{4,5}	X	-	I ⁴	-
Military Fringe Benefits ^{1,4}	X	-	X ³	-
<u>CHARGES FOR USE OF DOD ASSETS</u>				
<u>Attrition</u>				
Insurance Factor	X	-	-	-
Replacement cost of equipment lost as a result of student negligence (not included in training course cost-specific bill will be provided if loss occurs)	-	X	X	-
<u>NON-PERSONNEL COSTS</u>				
<u>Direct Material/Other Costs</u>	X	X	X	X
<u>Indirect Material/Other Costs</u>	X	-	I	I
<u>INFORMATIONAL PROGRAM</u>	X	X	X	X
<u>MAILING FEE</u>	X	X	X	X
<u>ADMINISTRATIVE SURCHARGE</u>	X	-	X	-

Legend: X = Full Cost
I = Incremental

Notes:¹ Applied as a percentage of labor cost.² U.S. Government contribution which is not included in DoD appropriations.³ The full fringe benefit rate is applied to incremental payroll cost.⁴ Not charged when case is 100 percent financed by MAP and/or non-repayable FMS credits.⁵ See paragraph 070202 and 070203 relative to leave and holidays as part of civilian or military pay.

0711 INSTRUCTIONS FOR COMPUTING FMS TRAINING COST

071101. Personnel Costs. Certain costs associated with support of the foreign students or their dependents are considered to be a responsibility of the foreign government but are not included in the tuition rate for training course. Compute and bill these costs as follows:

A. The students pay for meals in the base mess at the rates established in DoD 1338.10-M [reference (v)].

B. Medical care (including outpatient) for students and dependents shall be charged at the rate prescribed by the Office of the Comptroller, DoD. This cost shall be shown as a separate line on the LOA and billed to the foreign country.

C. Normally, student travel and related costs shall be paid to the commercial carrier, etc., by the foreign country or student. For any U.S. services provided, such as, MAC transportation, the nongovernment rate shall be applied and billed to the foreign country or student, as appropriate.

D. DoD policy concerning occupancy of student family housing by foreign students is that they may occupy family housing only after a determination has been made that U.S. student requirements are satisfied and shall be satisfied for the projected duration of the foreign student's occupancy. Under these circumstances, the amount to be charged shall be the cost incurred by the Department of Defense, incident to operation and maintenance of family housing units. Table 711-1 provides guidance for calculating the monthly rental charge for FMS student occupancy of DoD family housing. When foreign students occupy family housing that is not excess to U.S. Military Service needs, the amount to be charged shall be equal to the cost of housing U.S. Military Service personnel on the economy (BAQ and VHA).

E. When foreign students occupy the BOQ/BEQ/VOQ/VEQ, the students shall be required to pay only the local custodial and nonappropriated fund fees.

071102. Direct Cost and Training Overhead

A. Certain costs can be directly identified to training courses. Once identified, divide the direct cost by the total number of students enrolled in a course to arrive at a cost per student. In turn, add all of the direct costs per student to be included in the tuition rate.

B. Compute the cost of salaries, allowances, etc., of instructors by dividing the annual instructor cost (see paragraph 071003) by 52 weeks and multiplying the result by the number of weeks in the applicable course. Divide this cost by the average number of students in the class to develop a per-student rate. Alternatively, instructor costs may be allocated on a instructor contract hours basis (that is, total instructor costs divided by total platform man-hours) that allows for a more equitable distribution. Compute the costs of salaries, allowances, etc., of administrative and other personnel supporting training by dividing the total annual cost by total course weeks of training and multiplying result by the number of weeks in the applicable course. Divide this cost by the average number of students in the class to develop a per-student rate.

C. The cost of TDY shall be allocated to courses on the basis of a casual or beneficial relationship. Accordingly, TDY must be segregated into two categories: one for TDY that is caused by or benefits a specific course or courses and the other for TDY that benefits the training operation as a whole. TDY that is directly related to (benefits) one or more courses shall be directly allocated to those courses. In order to preclude "double charging" a course for TDY, care must be taken to ensure that all directly allocable travel is eliminated from the TDY included in the indirect cost pool. TDY that benefits the training operation as a whole shall be allocated to sources by dividing the total indirect TDY costs by total number of students and then multiplying the results by the number of students enrolled in each course to arrive at a course cost.

D. Cost for training U.S. instructor pilots, including proficiency and continuation training, shall be limited to special aircraft not in

the active U.S. aircraft inventory. Divide these costs by the normal tour of duty for an instructor pilot to arrive at an annual cost that shall be distributed to courses in the same manner as instructor salaries and allowances.

E. Cost of training materials, equipment, supplies, aids, munitions, flight clothing, and personal equipment shall be charged to the applicable course. Training material and aids prepared above base level, that are readily identifiable to a course, shall be included as a direct cost of the course. If not readily identifiable to a specific course, distribute these costs to courses in the same manner as indirect TDY costs. Care must be taken to ensure against "double charging" a course.

F. Compute the POL cost for aircraft (rotary/fixed wing), motorized equipment, ships, landing craft, etc., using the equipment hourly cost of POL times the number of operating hours for the course.

G. Depot level maintenance cost of aircraft, engines, motorized vehicles, and equipment shall be charged to the applicable course at the budgeted average hourly item repair cost that includes civilian pay, contractual effort, and supplies. These costs shall be adjusted to include military pay and centrally procured equipment and parts. Multiply this average hourly cost by the hours programmed for use in the specific course.

H. Base level aircraft and equipment maintenance costs (including munitions maintenance) shall be allocated to courses on the basis of total maintenance costs divided by the total training hours supported, if not identifiable and chargeable on a job order basis. Costs shall include military and civilian pay, supplies and equipment (including replenishment spares), and contractual support. If there are a significant number of transit or nontraining aircraft at the base, aircraft operating costs shall be distributed initially between training and nontraining on the basis of percentage of number of takeoffs, number of sorties per year, or maintenance direct labor hours, whichever results in the best allocation of costs in relation to the benefits received. For this purpose, aircraft used by personnel

supporting training for proficiency flying shall be classified as training aircraft.

I. Simulator costs shall include pay of the operators, supplies, and equipment maintenance. Simulator costs shall be allocated to the course in the same ratio as hours used bears to the total hours available.

J. Civil Engineer (Public Works) and other directly relatable support costs allocable to training operations shall be distributed to courses on the basis of total training hour support or any other logical method of measurement; for example, square footage of buildings, etc., (see subparagraph H., above). This category includes: the cost of air operation department; squadron command administration; crash/fire department; maintenance of hangars and airfield pavements and marking; operation and maintenance of communications, navigation aids, airfield lighting, control tower, training facilities, and ground support and refueling equipment. Costs in this category shall include only those that would not be required if the training mission were removed from the installation. If they would remain, were the training mission removed, they shall be combined and allocated along with the other indirect base operating costs in paragraph 071103.

K. Range maintenance and operating costs shall be computed and allocated to courses based on the percentage of sorties or rounds fired in the course compared to the total sorties or rounds fired or any other basis that results in an equitable allocation of these costs.

L. Tuition rates shall include the costs of information programs, including transportation, meals, lodging, admission, programs, and incidental costs thereof. The student assumes the personal costs for laundry, cleaning, telephone service, and all other costs not directly associated with the programmed tour.

M. Include attrition rate of 4% for flying training and/or 1% for non-flying training. There will be a year-end analysis of account activity in accordance with paragraph 030210.G. of this Volume.

071103. Indirect Base Operating Costs

A. All other indirect base operating costs shall be allocated initially to major claimants (training, tenants, etc.). The amount allocated to training shall then be distributed to areas of training that are significantly different (flying operations, classroom training, equipment maintenance, etc.). All allocations shall be made at the installation level using engineering estimates or some other basis to ensure that allocations are commensurate with the benefits received. Costs to support or operate quarters, a family housing complex, and food service activities that are applicable to instructors and training support personnel may not be allocated to tuition rates if these costs are recouped in base personnel salaries. The amount allocated to each area of training shall then be distributed to the tuition rate by dividing the amount allocated by the annual estimated student weeks of training. Reduce by 5 percent the amount allocated to foreign students to allow for costs considered inappropriate for allocation, for example, chapel, equal rights office, alcohol treatment, special services, etc.

B. Exclude costs associated with combat development, training development (less course development), nonresident instruction, or other activity that offers no support to the training mission and a pro rata share of school overhead costs to support these elements.

C. Exclude costs associated with units attached to the training activity with duty stations at another location that are not involved in the training of foreign students.

D. Costs related under-utilized capacity and mobilization requirements, when specifically identified and documented, shall be excluded from these allocations.

071104. Administrative Surcharge. Apply an overall administrative surcharge of 3 percent to the case cost.

071105. Shipment of Instructional Materials

A. Effective October 1, 1983, the shipment of instructional materials shall be

included in the tuition rates for all IMETP/FMS courses based on standard rates. The rates are \$265 for Professional Military Education Courses (Military Articles and Services List, Item identification in the 171 series) and \$65 for all other courses.

B. This material is to be packed and labeled at the training installation and shipped to the Security Assistance Organization (SAO) of the country for delivery to the FMT. A copy of the student's ITO shall be placed inside the package.

C. The training installation shall ensure that no personal baggage or other unauthorized matter is shipped with the instructional material.

TABLE 711-1 DEVELOPMENT OF FAMILY HOUSING CHARGES FOR FMS STUDENTS

This table provides guidelines for calculating charges for family housing provided to FMS students. The guidelines shall be used only after a determination has been made that U.S. students' requirements have been satisfied and shall be satisfied for the projected duration of the foreign student's occupancy.

A. Steps to be followed in calculating the monthly rental charges to FMS students are as follows:

Step 1. Use the most recent annual installation family housing cost report to identify the costs incurred in operation and maintenance of installation family housing units.

Step 2. Inflate the annual cost report by the operation and maintenance inflation factor published each year by the Office of the Comptroller, DoD as part of Program Objectives Memorandum and budget guidance.

Step 3. Divide the sum of the amounts determined in Steps 1 and 2 by the number of family housing units located on the installation.

Step 4. Divide the annual average cost to operate and maintain a family housing unit by 12, to arrive at average monthly costs.

Step 5. Add \$100 to the results of Step 4. The \$100 is predicated on average charge for Wherry Housing mortgage amortization and is in lieu of depreciation and interest on investment.

B. A price illustration of the FMS student family housing calculation follows:

1. Total FY 1980 cost incurred by installation in operating and maintaining family housing units	\$ 998,586.00
2. Addition of FY 1981 inflation factor (11.27%)	<u>112,541.00</u>
Subtotal	\$1,111,127.00
3. Annual cost per family unit (449 units).	2,474.67
4. Monthly cost per family housing unit.	206.22
5. Monthly mortgage amortization charge.	<u>100.00</u>
Monthly rental charge to FMS student.	\$306.22

0712 INCREMENTAL COSTING OF TRAINING

071201. Instructors and School Support Staff. Courses shall be reviewed to determine if the incremental cost should be developed for a specific course (for example, pilot training) or a group of courses. For classroom or technical courses that are similar or that utilize instructors who teach more than one course, such courses may be grouped for computation purposes. When there is a one-for-one or one-for-two relationship of instructor to student, the instructor in all cases shall be considered incremental. If the entire class is composed of foreign students, the instructor and staff shall always be considered incremental.

A. It is anticipated that the incremental cost charged to IMET for instructors shall be minimal for courses or groupings of courses when either the ratios of students to instructors or U.S. students to IMET students is high.

B. For these latter courses (or groups of courses), a projection shall be made as to the estimated number of U.S. students who shall be in the course and the number of instructors and staff required. A second projection shall be made of the total number of students estimated, both U.S. and foreign, and the number of instructors and staff required. Both projections shall be based on the maximum number of students who can be taught by instructors or staff rather than on optimum class size. The difference in instructor and staff between the two projections represents the incremental costs. This value, divided by the total number of foreign students, represents the incremental cost per student for the course (or courses). Although used in the computation to derive incremental IMET costs, FMS students shall still be priced at full cost in accordance with other provisions of this Chapter. In computing full cost for the FMS student, care shall be taken to ensure that the incremental cost charged to IMET students is not included in the FMS computation.

071202. Travel and Per Diem. All student travel and per diem associated with the training shall be considered incremental. All travel, per diem, and allowance paid to members of Techni-

cal Assistance Field Teams (TAFTs) and similar teams, established to conduct in-country training, shall be considered incremental.

071203. Equipment Overhaul and Maintenance. The overhaul and maintenance of major items of equipment, when computed on an hourly use basis, shall be incremental to a course based on estimated utilization hours.

071204. Simulators. Simulator hours shall be incremental. See paragraph 071102.I.

071205. Supplies, Materiel, Training Aids, and Ammunition. Incremental cost shall be the replacement price of items that are not returned or reusable (including POL) used in conducting the training. If discrete pricing is not or cannot be developed for publications and Table 716-3 is used, determine IMET pricing at 10 percent of the costs shown in the table.

071206. Base Support Cost (i.e., Indirect Costs). Standard weekly rates shall be charged for IMET and IMET(FMS) training. The FY 1981 rates are \$15 per week for IMET and \$18 per week for IMET(FMS). In FY 1984, rates were \$17 and \$19. The rates for FY 1986 are \$22 for IMET and FMS/IMET. These rates shall be adjusted annually for inflation. Once every three years, these rates shall be validated by each Military Service and adjusted by the Office of the Comptroller, DoD as appropriate.

071207. Instructor Training. The training of U.S. instructors or other personnel for special courses normally not conducted for U.S. personnel shall be considered incremental. When the required training is conducted at a U.S. training facility, the benefiting country will be charged the course cost established in accordance with Sections 711 and 712 instructions for computing training costs. When the special course is conducted by a Management Service Team (MST) away from the normal training institution, the services of the MST will be treated as a service and priced in accordance with paragraphs 070202 and 070203.

071208. Facilities and Equipment. Any facilities or equipment acquired primarily for the support

of foreign students shall be considered incremental.

071209. Information Program. The full cost of the information program to the U.S. Government shall be incremental.

071210. Administrative Surcharge. The administrative surcharge shall be charged on FMS training sold to IMET-recipient countries, and shall also be charged to cases financed with MAP funds.

071211. Exclusions. The unfunded civilian retirement charge that is deposited to the Miscellaneous Receipts Account shall be considered a fixed cost and not included in the FMS training rates for IMET-recipient countries. This exclusion also applies to TAFTs established to conduct in-country training and mobile training teams (MTTs).

0713 OTHER CASH SALES AND LEASING OF DEFENSE ARTICLES

071301. General. Cash sales of Defense services other than those heretofore covered specifically in this Chapter shall be priced to recover all elements of identifiable costs.

071302. DoD Support Costs. A separate FMS case shall be established to recoup DoD support costs such as those defined in paragraph 070406 when support is furnished by Department of Defense to facilitate direct sales by a U.S. contractor to a foreign government.

071303. Administrative Surcharge. The administrative surcharge prescribed in Section 706 shall be applied to identifiable costs.

071304. Pricing. When defense articles is leased to a foreign country or international organization under authority of AECA [reference (a)], inspection, restoration, maintenance, and accessorial costs incurred in connection with the lease shall be priced in accordance with paragraph 070802. In addition, depreciation charges on the leased items may be applicable. A worksheet to determine the applicability of depreciation charges and the amount thereof is

contained at Table 713-1. In the event leased defense articles are damaged beyond repair or is not returned, replacement costs calculated in accordance with paragraphs 070302.B. and C., as applicable, shall be collected from the foreign country or international organization. Replacement cost shall be estimated when the equipment is placed on lease and set forth in the lease agreement. Refer to Chapter 12 of DoD 5105.38-M [reference (e)] for procedures on leasing arrangements. Charges for repair or other support of these items will not be made part of this monthly lease payment.

**TABLE 713-1 CALCULATION OF DEPRECIATION CHARGES FOR LEASED
DEFENSE ARTICLES WITH ILLUSTRATIVE ENTRIES**

STEP 1: Determine purpose of lease.

	Yes	No
a. Cooperative research or development project	()	(x)
b. Military exercise	()	(x)
c. Electronics interface project	()	(x)

(If "yes" is checked on items a., b., or c., depreciation is not applicable and it is not necessary to complete remaining steps.)

STEP 2: Determine service life.

a. Date to be leased	June 1982
b. Date item first fielded or actual acquisition date of specific item (if known)	June 1972
c. Calculate age in months of item on lease date	120
d. Number of months to be leased	12
e. Estimated months of service life remaining at conclusion of lease	144
f. Total months of service life (c. + d. + e.)	276
g. Calculate item c. as a percentage of item f.	43%

(If result of step 2.g. is 75 percent or more, depreciation is not applicable and it is not necessary to complete remaining steps.)

STEP 3: Determine cost of defense articles leased.

a. Original acquisition cost	\$1,000,000
b. Pro rata share nonrecurring R&D or production costs	100,000
c. Capital improvements	
(1) Major overhauls ²	\$500,000
(2) Modifications net of retirements ¹	<u>\$300,000</u>
Total Cost	\$1,900,000
Less residual value	<u>(100,000)</u>
Amount subject to depreciation	\$1,800,000

STEP 4: Calculate monthly depreciation charge.

Divide results of Step 2.F. into results of Step 3	
(\$1,800, 000/276) =	\$ 6,522

¹ Retirements represent serviceable components and weapons that are replaced by a modified version and that are returned to inventory upon removal. Normally, retired items are valued at standard inventory price, if repair is not necessary. If repair is required before the item may be reissued, the retirement item is valued at standard inventory price less estimated repair cost.

² The overhaul costs will be pro-rated over the interval between the last actual overhaul and the next scheduled overhaul. If a future overhaul is not scheduled, the cost of the last overhaul will be prorated over the normal average interval between overhauls (see paragraph 70302.C.1.).

0714 EXPANSION OF FACILITIES

071401. General. All costs of construction or expansion of facilities desired by and for the exclusive use of the foreign government shall be financed and funded by the foreign government. Charges by the U.S. Government for labor, materiel, or services shall be reimbursed in accordance with the provisions of Sections 702 and 703 of this Volume. When expansion is required for DoD use but may also be available for FMS, the cost shall be funded through the normal DoD budget process.

071402. Reimbursement of Proportionate Share. In addition to the costs as above, a proportionate share of operating costs shall be reimbursed.

0715 PRICING FOR USE OF TECHNOLOGY

071501. General. A Technical Data Package (TDP) encompasses production designs, drawings, specifications, models, manufacturing techniques and details, and similar information (but excludes information associated with the RDT&E stage) necessary to enable a foreign government to manufacture or have manufactured items of military equipment and repair parts. It does not include technical assistance or know-how by U.S. Government personnel; however, such assistance may be provided at additional cost.

071502. Pricing of Technical Data Packages. The Defense Security Assistance Agency (DSAA) may authorize release of a TDP to a foreign government for in-country manufacture of military equipment and repair parts. Costs incurred in the preparation, reproduction, and handling of the TDP shall be priced in accordance with the pricing policies set forth in paragraph 071301. When the pricing of the TDP is subject to an international agreement of which the DoD is a party or is otherwise bound, the sale will be determined consistent with the terms of the agreement.

0716 PUBLICATION PRICING

071601. General. This section prescribes the method which will be used to determine the

price of DoD publications when they are sold to FMS customers. The term "publications" includes technical orders, technical manuals, supply catalogs, training publications, administrative publications, engineering drawings, and associated documents, Integrated Logistics Support publications and associated documents, equipment component lists, special file extracts, decals, forms, and audio-visual products. A publication may be bound or loose-leaf, imprinted form, ADP listing, operator's card, microfilm, slide, motion picture film, etc. Engineering drawings and associated documents will be reviewed to determine if a technology charge is appropriate.

071602. Publication Pricing Factors. The following costs shall be included in the development of FMS prices for publications:

A. Acquisition Cost (AC). The contractual and in-house DoD cost required to deliver a reproducible master including, but not limited to, the amounts paid for technical or administrative writing, editing, illustrating, animation, and copy preparation.

B. Copy Production Cost (CPC). The copy production costs incurred in printing or reproduction of copies from the reproducible master.

C. Special Cost (SC). The cost incurred in the sanitization (elimination of nonreleasable information from a DoD publication prior to release to a foreign government), classified handling, development, and maintenance of country-peculiar publications.

071603. Development of a Per Copy Selling Price

A. The total cost of a publication is the sum of the costs identified in B., above. The total cost will be reduced to a per-copy expression by dividing the cost by the quantity produced (Q) as per the following formula:

$$\frac{(AC + CPC + SC)}{Q} = \text{Price per copy}$$

B. Recorded actual costs will be used when available. When actual costs for individual publications cannot be readily determined, a factored expression of historical costs will be developed from the most current cost records available. Uniform pricing tables can be developed from the cost per "unit" ("unit" being either a page, a roll of microfilm/microfiche page, or a running foot of tape or motion picture film). Table 716-1 provides guidance for developing publication pricing tables. Table 716-2 is a sample pricing guide developed in accordance with this guidance.

C. In the event there is an immediate need for pricing existing inventories of publications, and discrete pricing is not or cannot be developed, Table 716-3 may be used. The pricing in Table 716-3 shall not be used for constant pricing of publications. It is to be used to fill an immediate need when actual or estimated prices cannot be determined. Its design allows a price definition that recognizes the cost of each publication in relation to its unit count, without the need for performing a separate price calculation for each publication. In recognition of the higher per-unit acquisition and copy production cost that occurs in low unit count publications, a minimum price is set to effect related cost recoveries.

071604. Other Applicable Costs.

A. A technology charge that shall be collected in accordance with DoD Directive 2140.2 [reference (r)] and Section 715 of this Volume shall be an additional charge when applicable.

B. The standard administrative and accessorial charges prescribed in this Chapter shall be recouped as a percentage of publication prices. These charges are not included in the per copy selling price.

C. The FMS price for a joint Military Service publication shall be established by the Military Department responsible for its acquisition and management. That Military Department shall notify the other participating DoD Components of the established FMS price.

TABLE 716-1 DEVELOPMENT OF FMS PUBLICATION PRICING TABLES

This table provides instructions for constructing and using publication pricing tables based on factored costs when actual publication costs cannot be readily determined.

A. Using a representative sample of the various types of publications, develop unit prices for each publication category (such as, technical, supply, administrative, training, and engineering drawings) as follows:

Step 1: From reproducible master procurement or production records, determine the average acquisition cost within the category.

Step 2: From copy production records, determine the average copy production cost within the category.

Step 3: Add the results of Steps 1 and 2.

Step 4: Estimate the "typical quantity," as derived from a representative sample of actual usage or from forecasted requirements for publications within the category

Step 5: Divide the total from Step 3 by the estimated number of copies to be produced to derive the price per unit.

Step 6: To determine the selling price of a single copy of the publication, multiply unit or page cost by number of units or pages in the publication.

B. An example of the steps above is shown for a sample of X number of publications in paper form as follows:

Step 1:

$$\frac{\text{Acquisition Cost of} \\ \text{Producible Master Samples} \\ \text{Total Reproducible Masters} \\ \text{Sampled}}{1,000} = \text{Average Acquisition Cost} \\ \text{Per Reproducible Master}$$

$$\frac{\$234,000}{1,000} = \$234$$

Step 2:¹

$$\frac{\text{Actual Copy Production Cost} \\ \text{Incurred in Reproduction of} \\ \text{Reproducible Masters Sampled} \\ \text{Total Production Runs Sampled}}{2,000} = \text{Average Copy Production Cost}$$

$$\frac{\$52,000}{2,000} = \$26$$

TABLE 716-1 DEVELOPMENT OF FMS PUBLICATION PRICING TABLES (CONTINUED)Step 3:

$$\begin{array}{rcl}
 \text{Average Acquisition Cost (AC)} & & \\
 \text{plus} & = & \text{Total Average Cost} \\
 \text{Average Copy Production Cost (CPC)} & & \\
 \$234 + \$26 & = & \$260
 \end{array}$$

Step 4:

$$\begin{array}{rcl}
 \text{Actual Number} & & \\
 \text{of Units or Pages Produced} & = & \text{Typical Quantity (Q)} \\
 \text{Total Reproducible Masters} & & \\
 \text{Sampled} & & \\
 \frac{100,000}{100} & = & 1,000
 \end{array}$$

Step 5:

$$\begin{array}{rcl}
 \frac{AC + CPC}{Q} & = & \text{Price Per Unit} \\
 \frac{\$260}{1,000} & = & \$0.260 \text{ Per Unit or Page}^2
 \end{array}$$

Step 6:

$$\begin{array}{rcl}
 \text{Unit or Page Price Multiplied by} & & \\
 \text{Unit or Page Count of Publication} & = & \text{Selling Price Per Copy} \\
 \text{Plus} & & \\
 \text{Special Cost (if any)} & & \\
 \$0.260 \times 20 \text{ (pages)} + 0 & = & \$5.20
 \end{array}$$

¹ The relationship between Acquisition Cost vs. Copy Production Cost is approximately 90% vs. 10%.

² See Table 716-3 for application.

TABLE 716-2 SAMPLE PRICING GUIDE FOR TECHNICAL PUBLICATIONS
 (SUBCATEGORY TITLE, WHEN DESIRED)

UNITS	All pubs 100 Units or Less
PRICE PER COPY	\$16 (based on a 60-unit count average)

UNITS	All pubs over 100 Units
PRICE PER COPY	Extrapolate from below

UNITS	1	2	3	4	5	6	7	8	9	10
PRICES (\$)	0.26	0.51	0.78	1.04	1.30	1.55	1.81	2.08	2.34	2.59

UNITS	50	60	70	80	90	100	200	300	400	500
PRICES (\$)	12.80	16.00	17.60	20.80	24.00	25.60	51.20	78.40	104.00	129.60

INSTRUCTIONS

1. Determine unit cost of publication.
2. If unit count is at or below the minimum, set price at \$16.00.
3. Extrapolate when unit counts are above the minimum. For example, the calculation for a unit count of 382 would be computed from the table as follows:

	<u>Units</u>	<u>Price</u>
	300	\$78.40
	80	20.80
	<u>2</u>	<u>.51</u>
Total	382	\$99.71

Rounding to the nearest dollar, the price charged to the FMS customer would be \$100.00.

4. Add 20% to price for classified publications.

TABLE 716-3 GUIDE FOR PUBLICATIONS PRICING (PER COPY)

CATEGORIES OF PUBLICATIONS (PRICE PER COPY ²)					
<u>NO. UNITS¹</u>	<u>TECH</u>	<u>TRNG</u>	<u>ADMIN</u>	<u>SUPPLY</u>	<u>OTHER³</u>
1-100	\$ 16.00	\$10.00	\$ 5.00	\$ 5.00	
101-200	\$ 38.00	\$22.00	\$11.00	\$11.00	
201-300	\$ 66.00	\$38.00	\$19.00	\$19.00	
301-400	\$ 91.00	\$54.00	\$27.00	\$27.00	
401-500	\$117.00	\$67.00	\$34.00	\$34.00	
Engr Drawings	All Categories: Aperture or copy cards @ \$.88 per copy Hard copy - \$3.20 per copy				
Letter Type Bulletins and Directives	All Categories: \$3.20 per copy				
Forms	All Categories: \$.08 per copy with a minimum charge of \$3.20. If standard inventory price available, use standard price.				

¹ Unit: A page, a role of microfilm, a microfiche frame, or a running foot of tape or motion picture film.

² An additional charge of 20% is added for classified items.

³ Other selected categories of publications, such as audiovisual products, decals, etc.

0717 SPECIAL DEFENSE ACQUISITION FUND (SDAF)

071701. General. The Special Defense Acquisition fund was authorized in 1981 by an amendment to Chapter 5 of the AECA to fund the procurement of defense articles in anticipation of their sale or transfer to foreign governments. The basic objective of the fund is to facilitate delivery of materiel in advance of normal procurement lead-times. The detail requirements of the fund are discussed in Chapter 14 of the Security Assistance Management Manual (SAMM)[reference (e)].

071702. Sales Involving the Special Defense Acquisition Fund

A. Sales to the Fund. Sales of materiel and recurring services in support of purchases to the SDAF will be priced according to the requirements of this section. These pricing elements represent SDAF obligations. Therefore, care must be taken to record and obligate transactions in a timely manner. Over-obligations shall be reported in accordance with DoDD 7200.1 [reference (f)]. The DoD Component with custody of the SDAF asset being purchased will maintain identity of the related unfunded costs until the respective asset is sold to an FMS customer. The following additional guidance on pricing sales to the SDAF is provided to address specific problems:

1. Accessorial costs as prescribed by Section 705 of this Chapter will be charged to the fund only if applicable; e.g., PC&H and transportation will not be charged for shipments in place to change the commodity manager's ownership/purpose code assigned to the asset in stock.

2. Contracts awarded to meet SDAF requirements shall not provide for rental charges under provisions of the Federal Acquisition Regulation (FAR)[reference (g)].

3. The actual CAS cost applicable to procurements for the SDAF shall be included in Standard Form 1080 for billing FMS costs from the DoD Components to the clearing account maintained by the SAAC. The normal

CAS surcharge will be added to billings for contract cost for the purpose of inventory valuation.

4. All unfunded costs other than nonrecurring charges will be charged for sales to the fund. These charges include military and civilian pay for services such as engineering changes, personnel acceleration factors and secondary item replacement factors. Nonrecurring cost recoupment charges will be collected from FMS customers when the materiel is sold from the fund and deposited to the appropriate accounts identified in paragraph 070105.

B. Sales from the Fund. Sales of materiel from the fund will be classified as sales from SDAF stock. This is distinguished from sales of DoD stocks or sales from procurement and is consistent with normal definition of Defense Stocks.

C. Sales to Foreign Governments. The selling price for SDAF items sold to foreign governments will be computed by establishing a base acquisition price as outlined in subparagraph 1 below. Applicable charges for nonrecurring costs will be added to the base price to arrive at the SDAF selling price. PC&H and transportation, and FMS administrative surcharges are additive to and not a component of the item selling price.

1. The SDAF full value base price will be the higher of the SDAF procurement price or the current DoD contract price, if the item is on a contract signed subsequent to the SDAF contract at the time of preparation of an LOA for the sale.

a. The SDAF procurement price is the total estimated unit price as reflected on SDAF procurement requests (direct cite and reimbursable) for the item being priced.

b. The current DoD contract price will be estimated by the DoD Component involved as prescribed in Section 704 of this Volume with identification of all appropriate add-on charges.

2. If the DSAA determines an SDAF item to be of reduced utility, an appropriate reduction to the price may be made in accordance with paragraph 070302.C.1. Such a reduction could conceivably lower the selling price to below the SDAF cost.

D. Sales to a Military Department. The selling price of an item sold to a Military Department will depend on whether the item is in turn sold to an FMS customer or is used by the Military Department.

1. If an SDAF item is sold to a Military Department for further sale to an FMS customer, the selling price for both transactions will be the FMS price prescribed in subparagraph C.1., above.

2. A sale to a Military Department for its own use will be priced to recover the cost incurred by the SDAF. DoD Components are not authorized to pay higher prices than actual DoD contract prices.

071703. Quotation of Stabilized Prices. Sales of SDAF items will be quoted as firm prices and LOA will be annotated accordingly. The DSAA is responsible for reviewing SDAF prices to assure full cost recovery and for changing any proposed SDAF prices to achieve that objective.

071704. Charges for Nonrecurring Costs

A. Nonrecurring cost will not be charged the SDAF on sales to the fund.

B. Nonrecurring costs will be determined according to paragraph 070305 and collected on sales from the SDAF to a foreign customer.

071705. Recovery of Contract Administration Costs Incurred in Support of New Procurements for the Fund. SDAF pays the normal CAS surcharge at the time of procurement and this cost is included as part of the SDAF acquisition cost (see Table 717-1). Therefore, when an SDAF-owned item is sold, it is considered to be a sale from inventory and no additional CAS charge is applied.

071706. Special SDAF Surcharge. The purpose of this surcharge is to maintain the solvency of the SDAF account; i.e., the SDAF corpus cannot gain or lose monies as a result of inventory/sales transactions. Accordingly, a special SDAF surcharge will be applied, as necessary, to recover the cost of SDAF inventory losses, pilferage, obsolescence, and any loss of SDAF proceeds resulting from sales at reduced prices. The surcharge percentages will be determined annually by DSAA and applied to the SDAF acquisition cost by SAAC.

071707. Exceptions. Requests for exceptions to the preceding pricing policies will be submitted in accordance with Section 719 of this Volume.

TABLE 717-1 SPECIAL DEFENSE ACQUISITION FUND (SDAF) PRICE COMPUTATION EXAMPLES

	<u>Sale to SDAF</u>	<u>Sale of Same SDAF Asset to FMS Customer</u>
1. <u>Example-Item Procured for SDAF</u>		
Contract Cost	\$60,000.00	
Contract Administration services (1.5%)	900.00	
Recurring Contract support cost	1,000.00	
GFM (including associated transportation and PCH)	500.00	
SDAF Acquisition Cost	<u>\$62,400.00</u>	<u>\$62,400.00</u>
Pro rata nonrecurring charges		2,000.00
Special SDAF Surcharge		<u>XX¹</u>
FMS Unit Selling price		<u>\$64,400.00²</u>
2. <u>Example-Item provided to SDAF from DoD Stock</u>		
Nonexcess procurement funded item (to be replaced shown in Table 703-3)	\$50,000.00	
SDAF Acquisition cost	\$50,000.00	\$50,000.00
Pro rata nonrecurring charges (50% of \$2,000; See table 703-3)		1,000.00
Special SDAF Surcharge		<u>XX¹</u>
FMS Unit Selling Price		<u>\$51,000.00³</u>

¹ The Special SDAF Surcharge is applied, as necessary, by SAAC based on DSAA guidance. See paragraph 071706.

² Apply applicable PCH, administrative fee, and applicable transportation surcharges to the FMS unit selling price. Note that a PCH charge is not applied to items procured by the SDAF for direct shipment to an FMS customer.

³ Apply PCH, if applicable, and the administrative fee to the FMS unit selling price.

0718 CASE MANAGEMENT LINE

071801. General. DoD Components shall assure that each type of cost is allocated only once and only on one basis to an FMS Case. Additional discussion on consistency in allocating costs incurred for the same purpose is contained in Volume 4 of this Regulation.

A. A case management line shall be included in FMS cases when there will be provision of non-routine levels of DoD case management effort in support of a case. Non-routine effort may be provided only if a case management line (L8A) has been accepted by the FMS purchaser.

B. Program management lines, as opposed to case management lines, are intended to be used in those instances where it is necessary that the implementing agency undertake some system or program management effort in order to successfully deliver the item that has been ordered by the FMS customer. The costs to be recovered by program management lines differ from those covered by case management lines in that they are directly related to the item or service being delivered as opposed to an extraordinary FMS case management expense associated with the implementation of a specific complex FMS case.

C. Table 718-1 provides a funding matrix of the appropriate funding sources for the cost of various types of activities/functions involved in FMS case implementation. While not all inclusive, it aids in differentiating activities and functions to be funded by FMS administrative funds, hardware or service lines, case management lines, or program management lines."

D. Costs incurred for communications, utilities, automatic data processing, office supplies and equipment, and rental charges are normally recouped as administrative expenses. However, when a case management or program management line has been established, these types of costs shall be charged directly to that line, as appropriate.

TABLE 718-1 CASE FUNDING MATRIX

0719 EXCEPTION TO PRICING POLICIES AND COST RECOUPMENT WAIVERS

071901. General. An exception to prescribed pricing policies refers to approval of an alternative method of identifying applicable cost. A cost recoupment waiver refers to the exercise of legal authority to partially or totally waive recoupment of incurred costs.

071902. Request for Exception to Policies or Directives. Requests for exceptions to the policies prescribed herein or waivers of DoD costs shall be submitted to the Office of the DoD Comptroller with a copy to the DSAA Comptroller. Sufficient data shall accompany the request to enable the Comptroller, DoD to evaluate the merits of the proposed deviation. When deviations or waivers are requested, it shall be shown that such deviations or waivers are consistent with statutory requirements and are in the best interest of the U.S. Government. No charges or surcharges based on a percentage rate shall be made to recover any element of cost unless (1) the percentage charge or surcharge is expressly prescribed in this Volume, or (2) the percentage rate is proposed in writing to and is approved by the Office of the Comptroller, DoD.

0720 PERIODIC REVIEW AND UPDATING OF RATES

072001. General. Rates that may be developed to recoup accessorial costs (Section 705) and administrative costs (Section 706) are subject to review. The Office of the Comptroller, DoD, should notify applicable DoD Components when such reviews are being made and request appropriate DoD Component participation. Beginning in FY 1993, the rates for PC&H will be reviewed every two years by the DFAS.

072002. Revising Rates. Whenever a Department believes that a prescribed rate should be revised, it should submit an appropriate request to the Office of the Comptroller, DoD with supporting data.

0721 FINAL ACCOUNTING

072101. General. Once a final statement has been sent for an FMS case, the case shall be reclassified by the IA from active to inactive status in accordance with paragraph 021104. Effective October 1, 1992, all closed cases with post closure activity, not subject to accelerated closure procedures, will be reopened to report execution and will be recertified prior to closure.

0722 LOGISTICS SUPPORT CHARGE

072201. Applicability. The logistics support charge is applicable to other than Defense Business Operations Fund materiel.

072202. Purpose. A logistics support charge shall be added to FMS case lines for spare parts, supplies, and maintenance of customer owned equipment to recoup an appropriate share of the cost incurred in the logistics support area. The logistics support charge shall be a part of the cost of the item supplied and shall not be shown as a separate add-on charge to the FMS customer in the delivery listing or the DD Form 645, "Foreign Military Sales Billing Statement," provided to the FMS customer. The functions performed in the logistics support area include production control, requisition processing, inventory maintenance, administration of Reports of Discrepancy (RODs), and logistics management.

072203. Actual Logistics Support Expenses. Those DOD organizations which provide general logistic support of the FMS program shall recoup the full cost of providing such support. Costs charged in connection with logistic support shall not include costs which are prescribed in this manual for alternative recoupment methods.

A. The personnel portion of the budget for actual logistics support expense shall include a pro rata share of those personnel performing logistics support duties. If an organization's manpower staffing is based upon routinely maintained workload statistics (such as the number of requisitions processed), the cost allocable as a actual logistics support expense shall be determined on a pro rata basis from workload statistics. For example, if the FMS logistics workload is 25 percent of the total workload, then 25 percent of the organization's

payroll shall be funded through FMS logistics support expense charges. If routinely maintained statistics are not available, the costs will be determined based on cost finding techniques or other methods which are appropriate in determining the cost of maintaining the FMS program.

B. Other actual or estimated actual logistics support costs include:

1. Travel costs, including per diem and transportation incurred in the logistics support of the FMS logistics program.

2. Automatic data processing costs to support FMS logistics workload based on proration of machine time required to produce FMS logistics reports, requisition history status, or other transactions.

3. Printing and reproduction cost incurred primarily for the benefit of the FMS logistics program.

4. Communications, utilities, and office supply costs shall be allocated as logistics support expense, on a pro rata basis i.e., a proration of number of phone instruments, etc.

5. Equipment costs, both purchased and rental, when such costs are specifically incurred to support the FMS logistics program.

6. Rental charges at fully dedicated FMS logistics activities for floor space rental, and certain other support services.

7. The "net cost" to the Department of Defense for processing RODs for overage, shortage, damage, item deficiency, and duplicate billing. Such costs exclude discrepancies that are attributable to damage or loss occurring after passage of title. Normally, FMS shipments move from the depot or vendor's plant on collect commercial bill of lading with title passed at point of origin. However, occasionally shipments move under Government Bills of Lading. Under either of these conditions title passes at the point of origin and if damage or loss occurs subsequent to title passage, payment

is not to be made from the administrative fund (that is, claims should be submitted against the common carrier). See Chapter 8, Section IV.F of DOD 5105.38-M [reference (e)], for more detailed information.

8. Materiel costs included in actual logistics support expenses should be the net value of the returned materiel. There is no "net cost" to the Department of Defense in canceling duplicate billings or in shipping an item for which a country had been billed but the Department of Defense cannot confirm it has been shipped.

C. Funded cost must be accelerated to recover unfunded cost where appropriate, i.e., personnel cost must be accelerated for unfunded civilian retirement.

072204. Prescribed Logistics Support Charge

A. The SAAC shall recover the earned logistics support expenses by applying a 3.1 percent factor to delivery transactions on FMS case lines with the following specific generic codes:

<u>Generic Code¹</u>	<u>Description</u>
<u>SPARES:</u>	
A9C	Aircraft Components Parts and Accessories
B9A	Guided Missile Parts, Components
B9C	Free Missile Parts, Components
C9A	Ship spare parts
F9A	Other Weapons Spare Parts
F9B	Naval Ordnance Spare Parts
F9C	Nonstandard Weapon Spare Parts, Components and Accessories
H9A	Communication Equipment Spare Parts Equipment
<u>EQUIPMENT MODS:</u>	
A6A	Class IV MOD-Navy/USAF Aircraft
B6A	Missile MOD, Test Equipment and Services
<u>MAINTENANCE:</u>	
M2A	Aircraft Repair and Rehabilitation and Engine Overhaul

M2B	Ship Overhaul
M2C	Other Repair and Rehabilitation
M2D	Combat Vehicle Repair and Rehabilitation
M2E	Tactical/Support Vehicle Repair and Rehabilitation
M2F	Weapons and Support Equipment
M2G	Ammunition Repair and Rehabilitation
M2H	Communication/Electronic/Metero Repair and Rehabilitation
M2J	Support Equipment Repair and Rehabilitation
M2K	Missiles Repair and Rehabilitation

SECONDARY SUPPORT EQUIPMENT:

A7A	AGE Follow-on, including Components and Accessories
A7B	Barricade and Equipment, Follow-on
A7C	Launching Equipment, Follow-on
A7D	Special Trucks/Trailers, Follow-on
B1	Ground Launched Missile Support Equipment ²
B2	Air Launched Missile Support Equipment ²
B3	Sea Launched Missile Support Equipment ²
F4A	Chemical Weapons and Equipment
F4B	Camouflage and Deception Equipment
F4D	Fire Control Equipment
F4Z	Miscellaneous
J	Support Equipment

SUPPLIES:

K	Supplies
---	----------

NOTES:

¹The LSC will not normally be applied to Generic Codes for stock numbers which have an MDE indicator listed in the MASL.

²Applies only to the numbers listed in paragraph 72204.B. below.

B. Specific generic codes and Military Articles and Services List (MASL) numbers identified for application of the Logistics Support Charge as cited in codes B1, B2 and B3, above.

072205. Administration of the Logistics Support Charge.

A. Obligational Authority. At the time of case implementation, the SAAC shall retain 3.1% of the customer ordered value (Obligational Authority) by the designated generic codes in paragraph 072204. The amount of obligational authority retained by the SAAC shall be provided to the applicable IA for information purposes only. Actual logistics support expense will be in accordance with section 030211.A. and 080601.A. Future logistics support charge percentage rates will be determined in accordance with paragraph 030211.G.

B. Billing. The SAAC shall compute and charge the logistics support charge based on the IA delivery reports and header information contained in the SAAC data file. The SAAC shall provide the Logistics Support disbursement and the applicable delivery feedback to the IA's in accordance with Section 809 of this Volume for inclusion in the FMS case closure certificate.

C. Reports of Discrepancy. The SAAC will credit the LSC included in the billed price of any item being credited on an approved Report of Discrepancy. The inclusion of the credit LSC will be accomplished at the time an adjusting delivery "NZ" transaction is processed. Implementing activities must insure that the

original ship date of the article being credited is reported in positions 61-64 of the transaction.

D. FMS Case Closure. At the time of case closure, the IAs shall be responsible for determining from the SAAC the total amount of the SAAC Logistics Support Charge for each implemented FMS case. This charge shall be included within the IA's FMS case closure certificate to be submitted to SAAC.

TABLE 722-1 PRICE COMPUTATION EXAMPLES - LOGISTICS SUPPORT CHARGE (LSC)

Example #1:

Given: Materiel selling price is \$1,000
Sale is I.A.W. Section 21, AECA

Calculation:

Material Selling Price	\$1,000.00	
Logistics Support Charge (3.1% x \$1,000)	<u>31.00</u>	(credit Acct 5060)
FMS SELLING PRICE	\$1,031.00 ³	

Example #2:

Given: Materiel selling price is \$20,000, EACH
Sale is for 2 items IAW Section 22, AECA
Delivery to Europe
NC is \$200.00 per item

Calculation:

(a)	Four Progress payments \$10,000 report as WIP (N price Code) (4 x 10,000)	\$40,000.00	
	SAAC Applied CAS (1.5% x \$10,000 x 4) ¹	<u>600.00</u>	(credit Acct 5020)
	NC reported as WIP with "A" price code	<u>400.00</u>	
	TOTAL WIP	\$41,000.00	
(b)	Delivery of 2 items ("E" Price Code)		
	Materiel Cost (2 X \$20,000)	\$40,000.00	
	CAS (applied by SAAC to W.I.P.) ²	<u>600.00</u>	
	NC (2 x \$200)	<u>400.00</u>	
	Value of the delivery transactions	\$41,000.00	
	Logistics Support Charge (3.1% x \$41,000) ¹	<u>1,271.00</u>	
	FMS SELLING PRICE	\$42,271.00 ³	
(c)	Final Price Revision with Increase ("A" Price Code)		
	Requires a credit delivery with values from "b" above followed by:		
	Materiel Cost (2 x \$21,000)	\$42,000.00	
	CAS (1.5% x \$42,000)	<u>630.00</u>	
	NC (2 x \$200)	<u>400.00</u>	
	Value of the delivery transactions	\$43,030.00	
	Logistics Support Charge (3.1% x \$43,030)	<u>1,333.93</u>	
	FMS SELLING PRICE	\$44,363.93 ³	
(d)	WIP report required as a result of price increase		
	Revised WIP ("N" price Code)	\$2,000.00	
	CAS applied (1.5% x \$2,000) ¹	<u>30.00</u>	(credit Acct 5020)
	TOTAL WIP	\$2,030.00	

TABLE 722-1 PRICE COMPUTATION EXAMPLES - LOGISTICS SUPPORT CHARGE
(LSC)(CONTINUED)

Notes:

¹These costs are calculated and transferred to applicable surcharge accounts based upon performance reported as work-in-process ("N" price code reports).

²IAS may use any reasonable allocation procedure to spread the cumulative CAS value among the delivered items.

³PCH&T. 1% Asset Use Charge and Administrative Surcharge are additive to the selling price as applicable. Transportation charges for reports "b" and "c" are computed as follows:

(b) Transportation Charge
$$[(14.25\% \times \$10,000) + (14.25\% \div 4 \times 11,135.50)] \times 2 = 3,643.40$$

(c) Transportation Charge
$$[(14.25\% \times \$10,000) + (14.25\% \div 4 \times 12,181.97)] \times 2 = 3,717.97$$

CHAPTER 08

BILLING AND REIMBURSEMENT**0801** INTRODUCTION

080101. Objectives. This Chapter establishes the standard procedures to be used when:

A. The Security Assistance Accounting Center (SAAC) bills foreign governments and international organizations (hereinafter called FMS customers) for costs related to defense articles and services that have been sold pursuant to the Arms Export Control Act, as amended.

B. DoD Components report FMS deliveries of materiel and services, contractor progress payments, and other related costs to the SAAC for the purpose of obtaining reimbursement or reporting performance under an allotment of Trust Fund budget authority.

C. DoD Components request reimbursement from other DoD Components for costs associated with interservice support of FMS cases.

080102. Responsibilities

A. Security Assistance Accounting Center (SAAC). The SAAC shall issue quarterly billing statements to FMS customers based upon payment schedules attached to the Letter of Offer and Acceptance by the applicable implementing agency. Exceptions to this policy shall be made when an implementing agency has submitted a "Quarterly Forecast of Financial Requirements for In-Process Cases," or when the committed values for requisition cases (see paragraph 040305) indicates performance on a requisition case is behind or ahead of schedule. In the latter cases the SAAC shall bill based upon the report or the committed value of requisitions.

B. Implementing Agencies (IAs). IAs shall report accrued expenditures (work in process) and physical deliveries to the SAAC

through use of a billing and reporting procedure prescribed in this chapter and within 30 days of occurrence (date of shipment or performance).

C. Supporting DoD Components. Supporting DoD Components shall request reimbursement from other DoD Components through the use of billing and reporting procedures prescribed in this chapter.

1. Requesting Activities. Requesting activities are responsible for notifying the performing activities, when an order is placed to satisfy an FMS demand. The notification, as a minimum, must consist of the country, case designator, and RSN/line item.

2. Performing Activities. Upon notification that a customer order to be completed is for an FMS customer, performing activities are responsible for notifying the requesting activity whether the order has been accepted on a reimbursable or direct cite basis and for preparing internal billings which include total cost to accomplish the order. This total billing shall include both funded and unfunded costs. The performing activity shall deposit amounts collected to the appropriate accounts, including Miscellaneous Receipt Accounts.

0802 FMS BILLING STATEMENT

080201. General. The DD Form 645, "Foreign Military Sales Billing Statement," (or automated equivalent) and Defense Security Assistance Agency supplementary billing statements represents the official claim for payment by the U.S. Government. In addition, it furnishes an accounting to the FMS purchaser for all costs incurred under each agreement. Detail on the face of the billing statement segregates the cost elements in a manner parallel to the presentation of line item detail on the Letter of Offer and Acceptance (LOA). Physical performance of services, delivery of materiel, and progress payments is shown against the line item detail (Record Serial Number) of the LOA. Adminis-

trative surcharges and accessorial costs are separately listed. The DD Form 645 is prepared on a quarterly basis in January, April, July, and October. The January bill reflects physical deliveries and performance of services and progress payments through 31 December and cash collections recorded for the FMS case through the preparation date of the billing statement. It also contains a forecast of estimated advance cash requirements through the month of June. A January bill is mailed on or about January 15, with a due date for payment of March 15. The April, July, and October statements follow the same basic time-frames. An example of a DD Form 645 prepared by SAAC is at Table 802-1.

080202. Final Statement

A. A case "final statement" shall be given to a customer at the end of the calendar quarter in which the case is closed, recategorized from an active status to an inactive status (see paragraph 021104). Table 802-3 is an example of a Final Statement of Account. Final statements shall be annotated, either through use of a rubber stamp or computer printing to:

1. Notify the FMS customer of this reclassification;
2. Identify the conditions under which the case records may be reactivated (see Section 721 of this Volume).
3. Indicate that additional charges will be processed and reported to the purchaser by means of an "Omnibus Statement of Account."

B. An "Omnibus Statement of Account" is the means of reporting additional charges or credits to cases that have been recategorized from active to inactive status. It may also be used for additional charges or credits directed by the Defense Executive FMS Reconciliation and Case Closure Board on inactive cases. An example of this statement and the accompanying Delivery Listing is at Table 802-4 and 802-5. Further discussion of this procedure is contained in paragraph 021104.

080203. DD Form 645 Entries. An explanation of the entries on the DD Form 645 follows:

A. Upper right-hand corner. Identifies the DoD Component acting as implementing agency for the cases shown on the statement. For example, Department of Defense/Army, Department of Defense/Air Force, etc.

B. Block 1. Identifies the recipient of the statement: full country/activity name followed by Service within country or special paying office designation.

C. Block 2. Identifies the statement as a "billing statement based on cash requirements" or a "final statement of account," or an "Omnibus Statement of Account," whichever is applicable. If the statement is a billing statement, this block also indicates the date payment is due. Normally, the due date is 60 days after the preparation date in block 5.

D. Block 3. Statement number is assigned mechanically and is composed of the numeric year and month representing the period ended followed by an alphabetic management code assigned by SAAC. The management code is used to sequence cases for distribution and normally identifies the paying office, unless the foreign customer has requested that cases be sequenced in some other manner.

E. Block 4. Contains the last calendar day of the period for which the statement is prepared. Normally, the last day of the month at the end of each calendar quarter.

F. Block 5. Reflects the date on which the statement was prepared, and is the official date of billing.

G. Case Identification and Delivery Status (Columns 6, 7, 8, and 9).

1. Column 6.

a. Identifies the FMS case identifier and line item identification (Record Serial Number (RSN)) from the LOA.

b. Additionally, this column contains identification of administrative

surcharges (L6A), accessorial costs (L00), and work-in-process (WIP) related to the case.

c. An asterisk (*) preceding the case designator indicates a closed/inactive case. A case which has been closed since the previous billing statement was issued will appear on the current billing statement with an asterisk. Concurrently, a final statement of account is prepared mechanically for the case and presented following the billing statement.

2. Column 7. Contains the value of articles/services for each RSN, administrative surcharges, or accessorial costs as shown on the LOA, or most recent amendment or modification. Immediately below the value is the short title identifying the articles/services as described in the Security Assistance Management Manual, Appendix D. [reference (e)].

3. Column 8. Value of total delivery costs reported at the end of the prior statement period. No value is shown in this column for progress payments applicable to undelivered items.

4. Column 9. Value of delivery costs reported since the end of the prior statement period. Values shown in this column are supported in detail by the FMS Delivery Listing (see paragraph 080204). No value is shown in this column for progress payments applicable to undelivered items.

H. Financial Status (Columns 10, 11, 12, 13, and 14).

1. Column 10. This column contains the totals of values shown in Columns 8 and 9, plus work-in-process applicable to undelivered items. The value in Column 10 for work-in-process represents accrued costs incurred on behalf of the FMS purchaser which are not yet supported by physical or constructive deliveries. These costs include contractor holdbacks (normally 10%) on progress payments made to contractors, potential termination liabilities, and any other applicable add-on costs.

2. Column 11. Contains the forecasted requirements for the case, i.e., the

value of potential costs to be incurred during the calendar quarter following the payment due date of the current statement plus any prior period amounts representing unearned advances, potential termination liabilities and contractor hold-back. This value appears on the "Case Total" line only and may be derived from one of two different sources.

a. The quarterly deposit identified in the payment schedule from the Financial Annex for the case which has a due date that coincides with the payment due date of the current statement.

b. For all requisition type cases, i.e., supply support arrangement, FMSO II, and other repair part cases, the DoD Component will provide the SAAC with a "Committed Values for Requisition Cases" report. This report reflects the current value of on-hand, unfilled requisitions for each case. The report will be accompanied by cards or card images for use in the automated SAAC system. Section 403 of this Volume contains instructions for preparing this report and cards. These inputs will be submitted to SAAC by the 15th day of the last month of each calendar quarter (i.e., by March 15, June 15, September 15, and December 15) reflecting the most recent status for each case.

c. The committed value will be used as the forecasted requirements in Column 11 for the case in lieu of the quarterly deposit in the payment schedule when the committed value is less than the payment schedule quarterly deposit.

3. Column 12. A value appears in this column on the "Case Total" line only. It represents the total of the Column 10 and Column 11 values for the case.

4. Column 13. A value appears in this column on the "Case Total" line only. It represents the total amount of cash payments received from the customer through the official date of billing in Block 5.

5. Column 14. A value appears in this column on the "Case Total" line only. It represents a calculation, Column 12 value minus

Column 13 value, and is the additional cash payment which is due from the customer. In the event the calculation shows a negative amount due, the negative amount will not be shown.

080204. FMS Delivery Listing. An FMS Delivery Listing is prepared in support of entries to Column 9, "Current Period Delivery Costs," of the DD Form 645. This listing is illustrated at Table 802-2 and prepared based upon implementing agency delivery transactions that have an "E," or "A" price code in position 7. An "N" price code does not increase amounts reported in Column 9. Only price codes "E" or "A" are perpetuated to the Delivery Listing sent to the purchaser. Section 804 contains detailed procedures for completion and submission of the delivery transactions. The Delivery Listing is an itemized listing of all items physically delivered and services performed during the reporting period. It is cross referenced to specific document numbers and allows FMS customers to validate receipt of the materiel or services. This Delivery Listing also includes SAAC computations of surcharges applied by that organization in accordance with Chapter 7 of this Volume. In the first DD Form 645 submitted to the FMS customer, the statement will recognize 50% of the administrative fee as earned (Column 9 of the DD 645). The remaining 50% of the administrative charge will be billed as progress payments or as deliveries are reported.

A. An explanation of the content of columns in the FMS Delivery Listing follows:

1. Headings are the same as shown on the DD Form 645.

2. The first column titled "DOC ID" is the Document Identifier Code assigned by SAAC to identify Delivery Listing transactions and whether the transaction is a debit or credit. Codes assigned by SAAC to the Delivery Listing transactions follow:

a. FKA - Articles/Service Transactions (Debit).

b. FKB - Articles/Service Transactions Adjustments (Credit).

c. FKC - Administrative Costs (Debit).

d. FKD - Administrative Cost Adjustments (Credit).

e. FKE - Accessorial Costs (Debit).

f. FKF - Accessorial Cost Adjustments (Credit).

g. FKG - Reply to Customer Request for Adjustments (Debit or Credit).

3. Remaining columns of the FMS Delivery Listing perpetuate information in the delivery transactions. For example, the second field is the routing identifier code contained in positions 4-6 of the delivery transaction and the third field is the price code contained in position 7 of the transaction report. However, transactions do not contain unit price information. Therefore, the 16th column of information, "unit price," is computed by SAAC by dividing extended value by quantity shipped. If the division does not result in an even number (that is, there is a remainder), a rounded unit price will be printed followed by an asterisk (*). Where the unit price exceeds \$9,999,999, an asterisk(*) will be printed in the unit price field. Instructions for preparation of the delivery transaction are in Section 804.

4. An explanation of the SAAC totals follows:

a. FKA ARTICLES/ SERVICES COST. Total of detail FKA (Debit) transactions.

b. FKB ARTICLES/SERVICES COST. Total of detail FKB (Credit) adjustment transactions.

c. NET TOTAL OF ARTICLES/SERVICES COST. All FKA and FKB transactions equal the net total of articles/services cost.

d. FKC ADMINISTRATIVE COSTS and FKD ADMINISTRATIVE COST ADJUSTMENTS.

(1) If the cost is computed by SAAC, the value against which the percentage (%) factor is applied, the percentage factor used, and the applied charge (under ADMIN/ACSRL COST) are shown. The charge is shown as a debit (FKC) or credit (FKD) amount.

(2) If actual costs have been applied, the words "ACTUAL CHARGE" are shown as Type of Cost. FKC (Administrative Costs) transactions are applied against FKA (Materiel/Services debit) transactions. FKD (Administrative Cost Adjustments) transactions are applied against FKB (credit Materiel/Service).

e. NET TOTAL OF ADMINISTRATIVE COSTS. All FKC and FKD transactions equal the net administrative costs.

5. FKE ACCESSORIAL COSTS and FKF ACCESSORIAL COST ADJUSTMENTS.

a. FKE transactions are applied against FKA (Materiel/Services debit) transactions; FKF transactions are applied against FKB (Materiel/Services credit) transactions.

b. Each below-the-line cost applied is identified by Generic Code and description of cost below the FKE/FKF headings. For example:

Gen Code	Long Title	Short Title
(1) L1A	INLAND TRANSPORT CONUS ¹	CONUS TRANS
(2) L1B	OCEAN TRANSPORTATION	OCEAN TRAN
(3) L1C	AIR TRANSPORTATION	AIR TRANS
(4) L1D	PARCEL POST ²	PARCEL POST
(5) L1E	COMMERCIAL PKG CARRIERS ²	COMM PKG
(6) L1F	INLAND TRANS OVERSEAS	OS INLAND
(7) L1O	TRANSPORTATION COSTS	TRANS COST
(8) L2A	PACKING CRATING & HANDLING	PCH
(9) L2B	CONUS PORT HANDLING	CONUS PORT
(10) L2C	OVERSEAS PORT HANDLING	OS PORT
(11) L4A	STORAGE	STORAGE
(12) L4O	STAGING	STAGING

(13) L6A	ADMINISTRATIVE COSTS	ADMIN COSTS
(14) N7E	MEDICAL	MEDICAL
(15) N7F	QUARTERS	QUARTERS
(16) U1O	NORMAL INVENTORY LOSS	INV LOSS

Notes:

¹L1A does not apply to stock fund/Defense Business Operations Fund items on/after October 1, 1990.

²L1D/L1E does not apply to stock funded items on or after October 1, 1991.

c. NET TOTAL ACCESSORIAL. All FKE (debit) transactions and FKF (credit) transactions equal the net total accessorial costs.

d. TOTAL DELIVERY COSTS. Sum of net totals of article/service costs, administrative costs and accessorial cost equals total delivered costs.

080205. Magnetic Tapes. The customer may request SAAC provide magnetic tapes to support the FMS Delivery Listings. The specific transaction formats prepared by SAAC based upon DD-COMP(M) 1517 transactions are shown in Tables 802-6 through 802-9 for the following transactions.

A. Materiel/Service Transaction - Table 802-6.

B. Training Transaction - Table 802-7.

C. Administrative Cost Transaction - Table 802-8.

D. Accessorial/Additional Cost Transaction - Table 802-9.

TABLE 802-6 MATERIEL/SERVICE TRANSACTION¹

Transaction	
<u>Position</u>	<u>Field Contents</u>
1-3	Document Identifier Code ²
4-6	Routing Identifier Code
7	Price Code
8-22	Stock or Part Number/ROD Response/Narrative Description
23-24	Unit of Issue
25-29	Quantity Shipped ³
30-43	Document Number
44	Suffix Code
45-50	Supplemental Address
51	Mode of Shipment
52-53	Adjustment Reply Code
54-57	Accounting Date (numeric year and month in which processed at SAAC)
58	Transportation Bill Code (second position of original code)
59-60	Delivery Source Code
61-64	Date Shipped
65-73	Extended Value ^{3,4}
74-80	Unit Price ⁴
81-83	Record Serial Number (Line)
84	Cost Identification Code
85	In-Country Service

¹ The majority of data in the Transaction is perpetuated from the delivery transaction (see Section 804 of this Volume).

² Document identifier code will be FKA for debits, FKB for credits, and FKG for reply to customer requests for adjustments (see Section 803). FKG Transactions may contain either debit or credit values.

³ A credit value is indicated by an X-11 zone punch in position 29 and position 73.

⁴ For items which the unit price exceeds \$99,999.99 or which does not calculate to an even number with no remainder, the unit price field will be blank, with a hyphen in positions 78 and 80. When the extended value is greater than \$9,999,999.99, the unit price field will be blank with a hyphen in position 80 and the extended value field will contain whole dollars only.

TABLE 802-7 TRAINING TRANSACTION

<u>Transaction Position</u>	<u>Field Contents</u>
1-3	Document Identifier Code (FKA, FKB)
4-6	Routing Identifier Code
7	Price Code (normally "A")
8-22	Course Number or Brief Description
23-24	Unit of Issue (normally "XX")
25-29	Quantity (normally absolute value of 1)
30-43	Document Number (normally contains zeros in positions 33-35 and ITO date and/or number in positions 36-43)
44	Suffix Code or Blank
45-50	Supplemental Address (normally contains zeros in positions 46-47)
51-53	Blank or Zero
54-57	Accounting Date
58	Normally Blank
59-60	Delivery Source Code
61-64	Course Commencement Date or Blank
65-73	Extended Value (cost involved with training)
74-80	Unit Price (normally same as extended value)
81-83	Record Serial Number (Line)
84	Cost Identification Code
85	In-Country Service

Special Instructions

In positions 8-22 enter the training course number; for example, WCN0270AB123456. For associated costs (for example, Medical), enter the description of the service (abbreviated, as necessary) in positions 16-22 (illustration: WCN0270AMEDICAL).

0803 FMS CUSTOMER REQUESTS FOR BILLING AND SUPPLY ADJUSTMENTS

080301. General. In the event customer review of the DD Form 645 and/or the supporting FMS Delivery Lists identifies the necessity for an adjustment, the customer shall be advised to submit a formal request. Requests for billing and supply adjustments for materiel/service performance and accessorial charges should be submitted to the implementing agency. Requests for adjustments pertaining exclusively to administrative charges should be submitted to DFAS-DE(SAAC). FMS customers shall be advised to submit all requests for billing and supply adjustments on a Standard Form (SF) 364, "Report of Discrepancy (ROD)," clearly indicating the specific adjustment or billing action requested. The form, instructions for completion, and definitions are prescribed in Joint Regulation DLAR 4140.60, AR 795-8, NAVSUPINST 4920.9A, AFR 67-7, and MCO 4140.1C [reference (w)]. DoD Components shall process eligible RODS in accordance with the joint regulation. After resolution of RODs applicable to materiel and services, DoD Components shall report the action which is being taken to the SAAC through use of the delivery transaction (see Section 804 of this Volume). The appropriate adjustment response codes to RODs are to be punched into positions 52-53 of the transaction.

080302. ROD Response Codes. The ROD response codes set forth in this paragraph have been developed to cover most replies to customer requests for billing or adjustments. When a situation arises not covered by these codes, reply by letter. Request for codes to cover additional transactions should be submitted to DFAS-HQ/A, Room 409, Crystal Mall #3, Arlington, VA 22240-2000.

A. Codes to identify the reason a request is being denied:

1. AA - Duplicate billing and/or shipment resulted from receipt of duplicate requisition and duplicate supply action.

2. AB - Bill reflected correct unit or extended price of materiel shipped.

3. AE - Supplier adjusted to unit pack since requisition did not prohibit this action; or shipment made in accordance with instructions in requisitions.

4. AF - Authorized substitute in latest supply manual. Requisitions did not prohibit substitutions.

5. AG - Claims prior to June 1, 1992, less than \$100 and claims after June 1, 1992, less than \$800, loss or gain to be absorbed by customer.

6. AI - Local records indicate prior reversal of duplicate credit or charge in bill number cited.

7. AJ - Credit was granted as a result of prior request and processing in billing.

8. AK - Shipment made via commercial bill of lading; U.S. Government not responsible for damaged shipments.

9. AL - Copies of shipping document evidencing proof of shipment/acceptance are attached.

10. AN - Claim less than \$25 loss or gain to be absorbed by customer.

11. AO - Request cannot be granted because discrepancy report was not received within allowable time-frame.

12. AP - Request cannot be granted because item was procured specifically for FMS customer. Section 6, Warranties, of the standard terms and conditions of the LOA, applies (see SAMM, reference e).

B. Codes to identify reason request granted and instructions for disposition of any materiel shipped in error:

1. BA - Materiel to be disposed of locally.

2. BB - Materiel to be returned to activity designated in positions 4-6 for subsequent credit.

3. BC - Hold unacceptable shipment quantity pending disposition instructions to be submitted via separate communication.

4. CA - Requested debit adjustment will be made and bill issued. No supply action required.

5. CB - Requested credit adjustment will be made and amended bill issued. No supply action required.

6. CF - Request granted for financial adjustment not directly related to materiel shipments, i.e., repair costs.

7. CW - Credit adjustment granted on accessorial charges--FKF transactions only.

8. CX - Credit adjustment granted on administrative charges--FKD transactions only.

9. CY - Debit adjustment granted on administrative charges--FKC transactions only.

10. CZ - Debit adjustment granted on accessorial charges--FKE transactions only.

C. Codes which are advisory and do not require billing or supply actions:

1. DA - Request previously processed and credit granted.

2. DB - Request previously processed and credit not granted.

3. DD - Billing previously rendered.

4. DG - Duplicate billing will be furnished.

5. DI - Letter of explanation follows.

6. DJ - No record of previous request. Resubmit.

7. DK - Copies of shipping documents evidencing proof of shipment and acceptance are attached.

8. DM - Reply delayed 30 days. Matter being investigated.

9. DX - Request for ROD cancellation approved.

D. Codes for requesting additional data from country:

1. EB - Document number incomplete. Resubmit.

2. EC - Bill number incomplete/missing.

3. EF - Records do not indicate duplicate shipment and/or billing on bill number cited. If duplication occurred on another bill, resubmit citing both bill numbers.

4. EI - Claim should be supported by appropriate documentation. Please resubmit.

5. EJ - Claim should be supported by confirmation of cancellation. Please resubmit.

080303. Reply Listing. The SAAC provides a consolidated listing of the actions taken in response to RODs. The listing titled, "Reply Listing to Customer Requests for Adjustments" is illustrated at Table 803-1. This listing shall be mailed with the DD Form 645 to the country involved. All FKG (response to RODs) shall be listed separately for each country and case. The FKG transaction contains the same data elements as the FKA/FKB transaction shown on the FMS Delivery Listing. The Reply Listing is prepared in the same basic sequence as the billing statement and FMS Delivery Listing. If the customer requests magnetic tapes to support the FMS Delivery Listing, the format for FKG transactions shall be the same as the Materiel/Service transaction at Table 802-6.

0804 IMPLEMENTING AGENCY PERFORMANCE REPORTS OR REQUESTS FOR REIMBURSEMENT

080401. Reporting Deliveries. Implementing agencies shall report the cost of DoD services, inventory items, and new procurement to the SAAC using the delivery transaction, unless the provisions of paragraph 080403 are applicable. Earned reimbursements included in such reports shall be paid within 20 working days from the date of receipt at SAAC. In the event a cash flow problem precludes payment, SAAC shall issue immediate notification to the Director, DSAA. The Director, DSAA, shall notify implementing agencies to suspend further deliveries of DoD stocks or performance of DoD services unless a determination has been made that it is in the national interest for billings to be dated and issued upon delivery or performance, with payment due in 60 days.

080402. Delivery Reporting Codes. The original version of the delivery transaction is illustrated at Table 804-1. It is an 80 position transaction utilized by field activities to report to the implementing agencies' FICS focal points. Section 809 of this Volume describes the current FICS "NA" and "ND" transactions. Instructions for completion of the various fields follow in the sequence of the original transaction:

A. Transaction Position 1, This field is comprised of one position containing the constant alpha character "N."

B. Transaction Position 2, "Transaction Code." This field is comprised of one position, containing an alpha or numeric character identifying the type of transaction. If blank, it is a report of articles, services, or progress payments. If it is X, it is below the line actual or estimated actual accessorial costs. If it is "Z," it is a ROD reply.

C. Transaction Position 3, "Monitor." This field is comprised of one position containing an alpha or numeric data code identifying the activity to which the case is assigned for action and which is to be reimbursed, if appropriate, for the extended value reflected in posi-

tions 65-73. The alpha or numeric codes that are assigned to the various activities are:

1. U.S. Army Activities (Implementing Agency "B"):

		Code
a.	U.S. Army Aviation Systems Command (AVSCOM)	E
b.	U.S. Army Forces Command	F
c.	U.S. Army Tank-Automotive Command (TACOM)	K
d.	U.S. Army Missile Command (MICOM)	R
e.	U.S. Army Armament Munitions & Chemical Command (AMCCOM)	M
f.	U.S. Army Training and Doctrine Command (TRADOC)	T
g.	U.S. Army Communications-Electronics Command (CECOM)	U
h.	U.S. Army Information Systems Command (ISC)	C
i.	U.S. Army Security Affairs Command (USASAC)	Y
	USASAC is the central reporting activity for all Army activities not listed.	
j.	U.S. Army, Print and Publishing Agency	P
k.	U.S. Army Troop Support Command (TROSCOM)	B
l.	U.S. Army Simulation, Training, and Instrumentation Command (STRICOM)	S

2. U.S. Air Force Activities (Implementing Agency "D"):

a.	Air Mobility Command	A
b.	1100 Resource Management Group (RMG)	C
c.	Air Force Communications Command	E
d.	McClellan AFB, CA	F
e.	Hill AFB, UT	G
f.	Tinker AFB, OK	H
g.	Air Force Security Assistance Training Group (AFSAT/RMC)	J
h.	Newark Air Force Base	K
i.	Robins AFB, GA	L
j.	Air Force Material Command	N
k.	Kelly AFB, TX	P
l.	Air Combat Command	T
m.	Pacific Air Force	V
n.	Air Force Systems Command (AFSC)	X
o.	U.S. Air Force Europe	

3. U.S. Navy (Implementing Agency "P"):

a.	U.S. Navy International Logistics Control Office (NAVILCO)	V
b.	Naval Education Training Security Assistance Field Activity (NETSFA)	C

4. Other Activities:

	IA	Code
a.	U.S. Defense Audio Visual Agency (Transactions prior to 1 Oct 85)	L
b.	U.S. Defense Mapping Agency:	
	(1) DMA Aerospace Center (DMAAC)	U
	(2) DMA Topographic Center (DMATC)	J

(3) DMA Inter-American Geodetic Survey (IAGC)	U	X
c. Defense Security Assistance Agency (DSAA)	Q	Q
d. Defense Nuclear Agency (DNA)	Z	Z
e. Defense Advanced Research Projects Agency (DARPA)	W	W
f. Defense Contract Audit Agency (DCAA)	V	2
g. Defense Logistics Agency (DLA):		
(1) Defense Reutilization Marketing Service (DRMS)	R	3
(2) Defense Logistics Supply Center (DLSC)	R	4
(3) New York Central Control Point (NYCCP)	R	5
h. U.S. Army Corps of Engineers (COE)	E	A
i. U.S. Army-SELPO (Army-G)	M	M
j. Defense Information Systems Agency (DISA)	C	C
k. Defense Finance and Accounting Service - Denver Center	D	B

D. Transaction Positions 4-6, "Shipping Depot." The field is comprised of three positions containing alpha or numeric routing identifier codes for the shipping depot or activity performing services as established in MILSTRIP [reference (x)].

E. Transaction Position 7, "Price Code." This field is comprised of one position containing an alpha code which identifies the report as a charge to work in process or a physical delivery or performance of requested DoD services. Three codes are authorized:

1. Code "N" is used to report incremental billings (such as progress payments to contractors, provision of Government-furnished materiel to a contractor, etc.). Code "N" may also be considered to be a Contract Administration Service (CAS) computing code under the following rules:

a. Contractor progress payment must be reported with DE or DK delivery source codes only using price code "N" in position 7 if CAS is applicable. Reimbursement code must be a code other than "N." This rule applies to all services.

b. All IAs will report physical deliveries with any "delivery" DSC, a "N" reimbursement code and price code "E" or "A."

c. When no progress payment reports are involved for contractor effort, such as might be the case on small contracts, use a DSC DA through DD, BB or ED, and if CAS is to be computed, use an "N" price code. The "N" price code will not be reflected in the delivery listing.

d. An "N" price code reported in any transaction with an "N" reimbursement code will reject.

2. Code "E" is used to report physical delivery of items at an estimated price.

3. Code "A" is used to report physical delivery of items or performance of DoD services at actual costs. Use "A" or "E" with credit value to reverse previously submitted estimated "E" and incremental "N" reports.

F. Transaction Positions 8-22, "Stock or Part Number or ROD Response." This field is comprised of 15 alpha or numeric characters which identify the hardware or services provided to the FMS customer being reported. Show stock or part number, training course number, film number, publication number, and phrase "service," "progress payment," etc. The use of the word "other" by itself, is not acceptable. The purpose of this field is to provide foreign customers and DoD managers with information. For ROD responses, insert code "R" or "W" in position 8, insert SF 364 "Report of Discrepancy" control number in positions 9-13, and leave position 14-22 blank. If the SF 364 control number is less than 5 characters, right justify with leading zeros. Code "R" applies if ROD reply is not processed as an administrative fee ROD adjustment; "W" applies if ROD reply is processed as an administrative fee ROD adjustment. When reporting training, put worksheet control number (WCN) and Military Articles and Service List Identification Number (MASL IIN) in this field (see note and illustration in Table 802-7). In reporting the cost of DoD services, provide either a clear narrative description in positions 6-22 or use the following cost codes in the last two positions of the stock number field;

11 Civilian Personnel Services and Benefits

17 Military Personnel Services and Benefits
 21 Travel and Transportation of Personnel
 22 Transportation of things
 23 Rent, Communications, and Utilities
 24 Printing and Reproduction
 25 Other Services
 26 Supplies and Materials
 31 Equipment

G. Transaction Positions 23-24, "Unit of Issue." This field is comprised of two alpha characters. Applicable Unit of Issue (Unit of Measure) abbreviations are set forth in the schedule shown below:

AM Ampoule

*Items reported or billed as “dollars only,” when no unit cost applies.

H. Transaction Positions 25-29, “Quantity Shipped.” This field is comprised of five numeric characters which identify the quantity of units delivered. Right justify, leading zeros. Quantity shipped must be credit if extended value (positions 65-73) is credit: X-11 punch over position 29 and position 73 for credit.

I. Transaction Positions 30-43, “Document Number.” This field is comprised of 14 alpha or numeric characters identifying the transaction.

1. Transaction Position 30 contains the U.S. implementing agency code

<u>Code</u>	<u>Implementing Agency</u>
B	U.S. Army
C	Defense Information Systems Agency
D	U.S. Air Force
E	U.S. Army Corps of Engineers
L	Defense Audiovisual Agency (DAVA)(Transactions prior to 1 Oct 85)
M	Army-G (SELPO)
P/K	U.S. Navy/U.S. Marine Corps
Q	Defense Security Assistance Agency (DSAA)
R	Defense Logistics Agency (DLA)
U	Defense Mapping Agency (DMA)
V	Defense Contract Audit Agency (DCAA)
W	Defense Advanced Research Projects Agency (DARPA)
X	Security Assistance Accounting Center
Z	Defense Nuclear Agency (DNA)

2. Transaction Positions 31-32 contain the applicable FMS country code as prescribed in the SAMM [reference (e)].

3. Transaction Position 33 contains the customer in-country code as prescribed in the SAMM [reference (e)].

4. Transaction Position 34 is comprised of one alpha or numeric character identifying the delivery term code established in

the LOA. Numeric codes are used when items are sold, and alpha codes are used when customer-owned equipment is returned for overhaul services.

a. Codes used for other than “Repair and Return” transactions:

Delivery

Term

Code Explanation

2 FOB destination--inland origin to inland destination within CONUS/Canada (except Newfoundland and Labrador) or inland origin to inland destination within the same overseas geographical area. U.S./DoD is responsible for inland transportation to named inland point. Recipient country is responsible for unloading at named point and subsequent arrangements and costs.

3 FAS (free alongside) vessel CONUS/Canada (except Newfoundland and Labrador) port of exit. U.S. DoD is responsible for transportation to point alongside vessel. Recipient country is responsible for loading aboard the vessel and subsequent arrangements and costs.

4 Collect commercial bill of lading (CCBL) for movement within CONUS/Canada (except Newfoundland and Labrador) or Contractor delivery of materiel procured offshore to designated Freight Forwarder or Country Representative.

5 FOB port of exit. U.S./DoD is responsible for inland transportation to the CONUS/Canada (except Newfoundland and Labrador) port of exit. Recipient country is responsible for unloading from inland carrier at port of exit and subsequent arrangements and costs.

6 FOB overseas port of discharge. U.S./

		Delivery Term <u>Code</u>	<u>Explanation</u>
	DoD is responsible for transportation from CONUS/Canada (except Newfoundland and Labrador) point of origin to and including ocean transportation to the overseas port of discharge. Recipient country is responsible for vessel discharge, port handling and subsequent arrangements and costs.		
7	FOB destination (named inland point in recipient country). U.S. DoD is responsible for transportation from CONUS/Canada (except Newfoundland and Labrador) point of origin to and including overseas inland carrier delivery to named inland point. Recipient country is responsible for unloading at named point and subsequent arrangements and costs.	A	U.S. DoD is responsible for transportation from a designated overseas port of embarkation (POE) to a CONUS destination and return to a designated overseas port of debarkation (POD). Customer country is responsible for overseas inland transportation of materiel to or from the overseas POE or POD and overseas port handling.
8	FOB vessel-CONUS/Canada (except Newfoundland and Labrador) port of exit. U.S./DoD is responsible for transportation from CONUS/Canada (except Newfoundland and Labrador) point of origin to and including unloading, handling, and storage aboard vessel at port of exit. Recipient country is responsible for ocean transportation and subsequent arrangements and costs.	B	U.S. DoD is responsible for transportation from a designated overseas POE to a CONUS destination, return to a CONUS POE and CONUS port handling. Customer country is responsible for overseas inland transportation to the overseas POE, overseas port loading, and over-ocean transportation from the CONUS POE to ultimate destination.
9	FOB port of discharge (Landed). U.S./DoD is responsible for transportation from CONUS/Canada (except Newfoundland and Labrador) point of origin to and including vessel discharge and port handling at overseas port of discharge. Recipient country is responsible for loading on inland overseas carrier equipment and for subsequent arrangements and costs.	C	U.S. DoD is responsible for CONUS port unloading of country-arranged carrier, transportation to and from a designated CONUS destination, and CONUS port loading of country-arranged carrier. Customer country is responsible for movement of materiel to and from the CONUS POD or POE.
0	services performed (e.g., training and special assignment airlift mission).	D	U.S. DoD is responsible for CONUS port unloading of country-arranged carrier, transportation to a CONUS destination and return to an overseas designated POD. Customer country is responsible for over-ocean transportation to a CONUS POD, overseas port unloading and overseas inland transportation to ultimate destination of returned materiel.
	b. Codes used in connection with "Repair and Return" transactions: Normally the return of repaired materiel will be reported through the use of Transportation Bill Code "L."	E	Customer country is responsible for all transportation from overseas point of origin to CONUS activity and return to an overseas destination.

F	U.S. DoD is responsible for transportation from an overseas inland location to an overseas POE, overseas port handling, overseas transportation to a CONUS POD, CONUS port handling, inland transportation to a designated CONUS destination, and return to an overseas destination.	5	Cash sale from procurement. Cash to be deposited by customer in advance to meet contract payment requirements.
G	U.S. DoD is responsible for overseas port handling through an overseas POE, overseas transportation to a CONUS POD, CONUS port handling, inland transportation to a CONUS destination, and return to an overseas POD and overseas port handling. Customer country is responsible for overseas inland transportation to and from the overseas port.	6	Sale of DoD inventory or services. Cash to be deposited by customer upon delivery. Requires a written statutory determination by the Director, DSAA. Reimbursement to DoD Components is made after customer payment received.
H	Customer country is responsible for all transportation from overseas point of origin to CONUS activity. U.S. DoD is responsible for return transportation from CONUS activity to CONUS POE. Customer country is responsible for return CONUS port handling and all transportation to overseas destination.	7	Cash sale from procurement. Payment from customer due 120 days after delivery. Payments to contractors financed by special emergency appropriation.
J	Customer country is responsible for all transportation from overseas point of origin to CONUS activity. U.S. DoD is responsible for all transportation from CONUS activity to overseas destination.	8	Sale of DoD inventory or services. Payment from customer due 120 days after delivery. Payments to DoD Components financed by special emergency appropriation.
		M	Foreign Military Sales funded by Military Assistance Program.
		N	Source of supply not determined; FMS nonrepayable credit, AECA Sections 23 and 24.
		U	FMSO I - customer purchase of equity in DoD inventory. Cash to be deposited by customer in advance of inventory augmentation.
		V	FMSO II - Shipment of customer equity with automatic replenishment action to maintain original dollar equity in inventory. Cash to be deposited by customer in advance of equity drawdown.
		Z	Source of supply not predetermined. Cash to be deposited by credit appropriations or lending institution in advance of delivery from inventory, performance of DoD services, or payments to contractors.
3	Sale of DoD inventory or services. Cash to be deposited by customer in advance of delivery or performance.		
4	Source of supply not determined. Cash to be deposited by customer in advance of delivery or performance.		

5. Transaction position 35 contains the "type of assistance code" established in the SAMM [reference (e)]. Applicable codes are set forth in the following schedule.

Code Summary Description

6. Transaction Positions 36-39 contain the requisition date (YDDD).

7. Transaction Positions 40-43 contain the serial number of the document.

J. Transaction Position 44. Suffix Code. This field is comprised of one alpha or numeric character. The code shows partial action by supplier without losing the identity of the original requisition. The codes must be considered in combination with dates and quantities shipped when accounting for split transactions. Block assignment of the suffix codes is accomplished essentially as follows:

<u>Processing Source</u>	<u>Assigned Suffix Codes</u>
Initial Source	A through E
First Secondary Source	F through H, J, and K
Second Secondary Source	L, M, Q, T, and U
Third Secondary Source	V through X
Fourth Secondary Source	Z through 9

K. Transaction Positions 45-50. Supplemental Address. This field is comprised of six alpha or numeric characters identifying where to ship an FMS case.

1. Transaction position 45 contains customer country military service code.

2. Transaction positions 46-47 contain the offer release/option and freight forwarder codes.

3. Transaction positions 48-50 contain the FMS case designator.

4. Transaction positions 45-47 are blank when reporting actual accessorial costs.

L. Transaction position 51. Mode of Shipment. This field is comprised of one alpha or numeric character to show the mode of shipment provided for in the LOA. This position is left blank when reporting actual accessorial costs

Mode of Shipment Codes

Mode of Shipment	Initial Method of Movement
------------------	----------------------------

Code by the Shipper

A	Motor, truckload
B	Motor, less truckload
C	Van (unpacked, or uncrated personal or government property)
D	Drive-away, truck-away, tow-away
E	Bus
F	Military Airlift Command (Channel and Special Assignment Airlift Mission)
G	Surface, parcel post
H	Air, parcel post
I	Government truck for shipments outside local delivery area
J	Air, small package carrier
K	Rail, carload includes trailer or container-on-flatcar (including SEAVAN)
L	Rail, less than carload includes trailer or container-on-flatcar (including SEAVAN)
M	Surface, Freight Forwarder
O	Organic military air (includes aircraft of foreign governments)
P	Through government bill of lading (TGBL)
Q	Commercial air freight; includes regular and expedited service (provided by major airlines), also includes charters and air taxi.
R	[Reserved for future use]
S	Scheduled truck service (applies to contract carriage, guaranteed traffic routings, or scheduled services)
T	Air freight forwarder
U	QUICKTRANS
V	Sea-van service
W	Water, river, lake, or coastal (commercial)
X	Bearer walk through (customer pickup of materials)
Y	Military intra-theater airlift services
Z	MSC (controlled/contract/arranged space)
2	Government watercraft barge/lighter
3	Roll-on or roll-off service
4	Defense Courier Service (DCS)
5	Surface, small package carrier
6	Military official mail (MOM)
7	Express mail
8	Pipeline

9 Local delivery, including deliveries between air or water terminals and adjacent activities.

M. Transaction Positions 52-53. Adjustment Reply Code. This field is comprised of two alpha characters and is used only when a ROD is being reported. Authorized adjustment reply codes are set forth in paragraph 080302. This field is left blank for normal delivery reporting of articles and services.

N. Transaction Position 54. Program Year. This field is comprised of one numeric character. The character is the last digit of the fiscal year in which an earned reimbursement shall be realized.

O. Transaction Positions 55-56. Delivery Source Code. This field is comprised of two alpha characters. Codes in the field provide an audit trail between performance and the pricing requirements of Chapter 7. The code is used by SAAC to recognize earnings for surcharges. Therefore, is it imperative that the correct codes be used. An incorrect code could result in the FMS customer being over or under-charged. The surcharges applied in Table 804-2 are based on funding source, stock fund/Defense Business Operations Fund or appropriation, and section of the AECA (21 or 22)[reference (a)].

<u>Code</u>	<u>Definitions</u>
-------------	--------------------

Sale of DoD Articles Under Section 21

Stock fund/Defense Business Operations Fund nonexcess items, including technical data packages and publications, from inventory.

AA	1. Matured FMSO
AB	2. Other than matured FMSO

Stock fund/Defense Business Operations Fund nonexcess items diverted from procurement initiated to maintain stock fund inventory.

AC	1. Matured FMSO
AD	2. Other than matured FMSO

AE	Procurement funded item, including technical data packages and publications from inventory, that requires replacement.
----	--

AG	Procurement funded item (including technical data packages and publications) from inventory that does not require replacement.
----	--

	Excess Stock Fund/Defense Business Operations Fund Item
AH	1. Matured FMSO
AJ	2. Other than Matured FMSO

	Excess Procurement Funded Item from Inventory
AK	PC&H computed on original acquisition cost of item and submitted by IA

	Any Item Other Than Defense Business Operations Fund Items
AL	Items sold from inventory that are not subject to normal PC&H charge. This code shall only be used when the case contains a transportation line or a packing, crating, and handling line, or a pricing exception has been granted by the Office of the Comptroller, DoD.

Performance of DoD Services Under Section 21 or 22

	Training Course
BA	1. DoD
BB	2. Contractor

BC	Repair or replace customer equipment. IAs shall include actual PC&H and transportation for materiel consumed in overhaul in reported costs.
----	---

BD	Other DoD services. Does not include "above-the-line" transportation or "above-the-line" PCH&T associated with the repair or modification of customer-owned equipment that is included in repair cost reported using Code "BC."
----	---

BE	Storage charge (for other than FMSO cases).
----	---

	Leases		FMS customer. These charges shall be liquidated by one of the contract delivery codes DA through DD in combination with reimbursement code "N."
BF	1. Depreciation		
BG	2. LOA sales of articles and services in connection with lease, prior to, during, or after lease period (includes transportation PC&H refurbishment).	DA	1. Contractor services (other than training)
BH	Actual PC&H charge. This report must accompany delivery transactions for items sold from inventory with DSCs AK and AL.	DB	2. Stock fund/Defense Business Operations Fund item, TDP, or publications from contractor
BT	"Above-the-line" transportation to FMS customers that is included in management line. Code includes "high-flight" or special airlift. Code does not include "above-the-line" transportation cost that is included in the selling price of an item or service.	DC	3. Procurement appropriation funded secondary item from contractor
		DD	4. Procurement funded principal or major item from contractor
		DE	5. Progress payment to contractor
		DF	6. DoD services in support of procurement (this code was applied to actual CAS hours prior to establishment of the surcharge. It now applies to other than CAS services.)
	<u>Unique FMSO Charges</u>	DG	7. Nonrecurring Cost Recoupment Charges (R&D and Production)
CA	FMSO I materiel used to support system obsolete to DoD use (buy out of unique repair parts to support obsolete end-items).		8. Government-furnished materiel (GFM)
		DJ	a. Shipped from inventory
CB	Annual inventory maintenance and storage cost. Charge annually on current FMSO II case. The FMSO I case manager shall input the FMS detail delivery transaction. There is no annual charge for stock fund/Defense Business Operations Fund items for CLSSAs as the stock fund/Defense Business Operations Fund standard price recoups all costs.	DK	b. Shipped from another contractor
		DL	c. PCH&T applicable to procurement appropriation funded GFM
		DX	9. Contractor effort in overseas locations which is supported by an FMS management line rather than through normal CAS effort.
			<u>Miscellaneous Charges</u>
		EE	1. Royalty charge (USG TDP)
CC	Normal inventory loss on procurement appropriation funded secondary items (physical inventory gain or loss, expiring shelf life, and damage of stored parts). Charge assessed annually on current FMSO II case. The FMSO I case manager shall input the delivery transactions.	EF	2. Other federal agency shipment
		EG	a. From stock
		EH	b. From contractor
		EJ	3. NATO POL
		EK	4. Redistributable MAP property
CD	Cash advances for on-hand portion of FMSO I.		5. Collection on nonrecurring production charge or license fee on behalf of a third country
		EL	6. Prepositioning costs
		EM	7. Interest on arrearage computed in accordance with Volume 6, Chapter 12 of this Regulation. Collecting and Reporting of Foreign Indebtedness Within the Department of Defense. Restricted to use by SAAC.
	<u>Procurement for FMS Customers Under Section 22</u>		8. Nonrecurring cost recoupment charges
	Codes DE through DL represent Work-in-Process (WIP) transactions. The break-down of these charges provides audit trail visibility for pricing purposes. The SAAC shall treat them as progress payments and report them as such to the	EN	

Special Defense Acquisition Fund

The SDAF shall use delivery source codes as follows:

- SA This code shall be used for SDAF sales of items originally purchased from DoD stock fund/Defense Business Operations Fund inventories.
- SB This code shall be used for SDAF sales of items originally purchased from DoD inventories other than stock fund/Defense Business Operations Fund.
- SD This code shall be used for SDAF sales of items procured from contractors for the fund.
- SE This code shall be used for SDAF sales items procured from contractors and shipped directly from the contractor to the FMS customer, providing there is no requirement for any special packing, crating, or handling.

P. Transaction Position 57, Port of Embarkation. This field is comprised of one alpha character. Use "A" when materiel is moved through an aerial port. A blank or "W" in the position indicates a water port, if applicable.

Q. Transaction Position 58, Reimbursable Code. This field is comprised of one alpha character. This code is used by SAAC to determine the reimbursable status of the report.

Code	Definition
A	Reimbursable to SDAF (sale of SDAF inventory or equity in a contract)
I	Interfund
R	Reimbursable
S	Self-reimbursed (nonreimbursable)
D	Direct cite (nonreimbursable)
M	Miscellaneous Receipts (nonreimbursable) (This code shall be used to report transactions applicable to the Miscellaneous Receipt Account when SAAC has been chartered to transfer funds from 9711X8242 to the U.S. Treasury. This transaction shall be nonreimbursable to the reporting activity.)
N	Delivery of articles and services for which a progress payment or WIP has been reported (nonreimbursable). (This code shall be used to report physical delivery of

items when applicable costs have been previously reported to the FMS customer as a progress payment, WIP, or when an FMS customer's equity in inventory is physically delivered (delivery source code "CA"). This code shall liquidate progress payments or WIP transactions previously reported. When the code is reported to SAAC, computer programs shall increase or decrease progress payments disbursed undelivered amount. The increase or decrease depends upon the size of the extended value. If the extended value is a debit, the delivered articles and services amount shall increase and progress payment disbursed unliquidated amount shall decrease. If the extended value is a credit the delivered articles and services amount shall decrease and the progress payment disbursed undelivered amount shall increase.

R. Transaction Position 59, Transportation Bill Code. This field is comprised of one alpha character. Use "L" when the Defense Transportation System is approved and used. Actual transportation costs will be reported by the DoD Component in the price of the item or repaired materiel. The code is used by SAAC to recognize earnings for "below-the-line" transportation of inventory items shipped from activities other than Defense Business Operations Funds or Stock Funds to freight forwarders or to other locations directed by the foreign customers. Transportation Bill codes are used to bill FMS customers for "below-the-line" transportation costs. The codes are mandatory if the actual method of transportation is different than that identified by the delivery term code (transaction position 34). Normally the return of repaired materiel will be reported through the use of Transportation Bill Code "L." Applicable codes follow.

Code	Description
A	Materiel moved by parcel post to an inland CONUS/Canada (except Newfoundland and Labrador) destination or freight forwarder, or to an overseas destination through the Army/AF postal system (APO or international mail). All subsequent arrangements are made by the FMS customer.

- B** Materiel moved by commercial package carrier to an inland CONUS/Canada (except Newfoundland and Labrador) destination or freight forwarder, when all subsequent arrangements are made by the FMS customer. However, see TBC "Z" below.
- C** Materiel moved by GBL, MAC channel airlift, USAF organizational airlift, MSC sealift, and combinations thereof, to an overseas POD in rate area one or two, including overseas carrier discharge. All subsequent arrangements are made by the FMS customer.
- D** Any form of materiel for which the FMS customer is totally responsible, such as materiel moved by a collect commercial bill of lading to an inland CONUS destination, free alongside (FAS), an overseas carrier at a CONUS POE, freight forwarder, a CONUS POE, or an inland overseas destination. Also used if transportation costs are not applicable.
- E** Materiel moved by GBL, MAC channel airlift, USAF organizational airlift, MSC sealift, and combinations thereof, to an inlandWONUS destination, FAS an overseas carrier at a CONUS POE, a freight forwarder, or a CONUS POE when all subsequent arrangements are made by the FMS customer.
- F** Materiel moved by GBL, MAC channel airlift, USAF organizational airlift, MSC sealift, and combinations thereof, to an overseas POD in rate area one or two, when overseas carrier discharge and all subsequent arrangements are made by the FMS customer.
- G** Materiel moved by GBL, MAC channel airlift, USAF organizational airlift, MSC sealift, DCS, MOM, Weapons System Pouch Service and combinations thereof, to the ultimate FMS consignee at an overseas inland destination in rate area one or two.
- H** Materiel moved by GBL, MAC channel airlift, USAF organizational airlift, MSC sealift, and combinations thereof, to a CONUS POE when all arrangements subsequent to loading the vessel are made by the FMS customer.
- J** Materiel moved by MAC channel airlift to an overseas APOD in rate area one or two when the use of inland CONUS transportation is not required in effecting delivery to the CONUS POE. All arrangements subsequent to earner discharge are made by the FMS customer.
- K** Materiel moved by MAC special assignment airlift mission (SAAM) within the CONUS to an overseas APOD or inland FMS consignee base within an overseas area or between overseas areas. Any arrangements subsequent to carrier discharge are made by the FMS customer.
- L** Substitute for any of the other standard codes whenever actual transportation costs will be reported in accordance with Chapter 7.
- M** Materiel moved by FMS country-owned aircraft from a U.S. DoD staging area.
- N** Materiel moved by GBL or other CONUS inland mode to a CONUS staging or aggregation area, staging or aggregation of the materiel; and onward movement of the materiel to a freight forwarder by a collect commercial bill of lading (CBL) or by country-owned or provided aircraft, or by MAC or by commercial SAMM.
- P** Materiel moved by GBL or other CONUS inland mode to a CONUS staging or aggregation area, staging or aggregation of the materiel; and onward movement of materiel by GBL or other prepaid (reimbursable) CONUS transportation to an aerial or water POE, FAS an overseas carrier at a CONUS POE, or arrangements are made by the FMS customer.
- Q** Materiel moved by GBL or other CONUS inland mode to a CONUS staging

- or aggregation area, staging or aggregation of the materiel; out movement of the materiel from the staging area by GBL, or other prepaid (reimbursable) CONUS transportation to an aerial or water POE; port handling of the materiel, and onward movement by GBL, MAC channel airlift, USAF organizational aircraft, MSC sealift, and combinations thereof, to an overseas POD in rate area one or two, when overseas carrier discharge and all subsequent arrangements are made by the FMS customer.
- R Materiel moved by GBL or other CONUS inland mode to a CONUS staging or aggregation area, staging or aggregation of the materiel; out movement of the materiel from the staging area by GBL or other prepaid (reimbursable) CONUS transportation to an aerial or water POE; port handling of the materiel, and onward movement by GBL, MAC channel airlift, USAF organizational aircraft, MSC sealift, and combinations thereof, to an overseas POD in rate area one or two; overseas port handling of the materiel; and onward overseas inland movement to the ultimate FMS consignee at an overseas, inland destination in rate area one or two.
- S Materiel moved by GBL or other CONUS inland mode to a CONUS staging or aggregation area, staging or aggregation of the materiel; out movement of the materiel from the staging area by GBL or other prepaid (reimbursable) CONUS transportation to an aerial or water POE; and loading of the materiel aboard a country-owned or provided aircraft or vessel, when all arrangements subsequent to loading the aircraft or vessel are made by the FMS customer.
- U Materiel moved by parcel post or commercial package carrier to CONUS POD when all arrangements subsequent to loading the vessel are made by the FMS customer. (Mode of shipment determines whether parcel post or commercial package carrier is used.)
- V Materiel moved by parcel post or commercial package carrier to an overseas POD in rate area one or two, including overseas carrier discharge, when arrangements subsequent to loading the vessel are made by the FMS customer. (Mode of shipment determines whether parcel post or commercial package carrier is used.)
- W Materiel movement charged according to rates listed in the transportation cost look-up table (see paragraph 080501).
- X Materiel moved by parcel post or commercial package carrier to an overseas POD in rate areas one or two, when overseas carrier discharge and subsequent arrangements are made by the FMS customer. (Mode of shipment determines whether parcel post or commercial package carrier is used.)
- Y Materiel moved by parcel post or commercial package carrier to the ultimate FMS consignee at an overseas inland destination in rate areas one or two. (Mode of shipment determines whether parcel post or commercial package carrier is used.)
- Z Materiel moved within the CONUS by commercial carrier with a published maximum rate of \$25.00 (for example, as published by United Parcel Service).
- S. Transaction Position 60, Stock Fund or Non-Stock Fund (Defense Business Operations Fund). This field is reserved for future use.
- T. Transaction Positions 61-64, Date Shipped/Services Performed. This field is comprised of four numeric characters and represents the Julian date of performance in format YDDD. The date is used by SAAC to monitor compliance with the requirement to submit delivery transactions within 30 days of performance.
- U. Transaction Positions 65-73, Extended Value. This field is comprised of nine numeric characters. It represents the dollar value of the report. Right justify with leading

zeros. X-11 punch over position 29 and position 73 to represent credit value.

V. Transaction Positions 74-76, Record Serial Number (RSN). This field is comprised of three alpha or numeric characters. It identifies the LOA line item to which the report is applicable.

W. Transaction Positions 77-79, Appropriation/Fund Budget Code. This field is comprised of three alpha or numeric characters. The reporting activity may use the field to identify the appropriation or fund to be reimbursed, if applicable.

X. Transaction Position 80, Rounded Dollar Indicator. This field is comprised of one alpha character. An "X" is used to indicate when extended value is reported in dollars only. When physical delivery is being reported, and extended value exceeds \$9,999,999.99, enter dollars only (rounded) in positions 65-73 and an alphabetic "X" in position 80. If physical delivery does not apply (such as progress payments, services, etc.), submit two or more transactions to equal total value (and quantity, if applicable).

080403. Interfund Transactions. Stock fund/Defense Business Operations Fund items are normally billed under interfund procedures and use the detailed billing cards prescribed in DoD 4000.25-7-M, MILSBILLS [reference (x)]. In order to minimize the impact, the special requirements of the FMS program have on the normal MILSBILLS billing procedures and still provide implementing agencies or the SAAC with the data necessary to assure proper FMS billing, a modified MILSBILLS detailed billing transaction may be used to report FMS shipments. This modified MILSBILLS detailed billing transaction is in lieu of the FICS delivery transaction. The required modification is to substitute information which normally appears in the unit price field (positions 74-80) of the MILSBILLS detailed billing transaction. The information required on billings applicable to the FMS program follows.

A. Positions 74-76, Record Serial Number. This field of the modified MILSBILLS billing transaction is composed of three numeric

or alpha characters showing the FMS case line number (left justify). The information is obtained from positions 54-56 of the FMS requisitions submitted by the Army, 48-50 of FMS requisitions submitted by the Air Force, and 57-59 of FMS requisitions submitted by the Navy and Marine Corps.

B. Position 77, Transportation Bill Code. This field of the modified MILSBILLS detailed billing transaction is comprised of one alpha character. The applicable transportation bill codes prescribed in section 080402.R. shall be reflected in this field.

C. Positions 78-79, Delivery Source Code. This field of the modified MILSBILLS detailed billing transaction is comprised of two alpha characters. The applicable Delivery Source Code as prescribed in 080402.O. shall be reflected in this field.

D. Position 80, Stock Fund or Non-Stock Fund (Defense Business Operations Fund) Code. This field of the modified MILSBILLS detailed billing transaction is comprised of one alpha/numeric character. The applicable code prescribed in section 080402.R. shall be reflected in this field.

080404. SAAC Computations. Based on data contained in delivery transactions or the modified MILSBILLS detailed bill transaction, SAAC computes and bills FMS customers for accrued expenditures resulting from the application of various surcharges. This paragraph describes these surcharge calculations. Table 804-2 contains a surcharge matrix for each Delivery Source Code (DSC) defined in para. 080402.O. An "N" in the matrix means that SAAC does not apply a percentage surcharge. A "Y" in the matrix means that SAAC applies a percentage surcharge.

A. Contract Administration Surcharge. This surcharge is applied based upon Delivery Source Codes (see paragraph 080402.O. and Table 804-2). SAAC maintains a "look-up table" which identifies those FMS cases on which all or part of contract administration charges have been waived pursuant to statute. The contract administration surcharge percentages

prescribed in Chapter 7 are applied to all other FMS cases as a percentage of reported payments to contractors. SAAC performance and delivery reporting feedback reports (see Section 809) provide the amount of CAS computed based upon delivery transactions. When physical delivery is reported, either at estimated or actual price, the delivered value shall include the SAAC-calculated CAS charges.

<u>Condition</u>	<u>Percentage Applied to Contract Payments</u>
All contract administration costs recoupment waived	0%
Contract audit cost recoupment waived	1.0%
Quality assurance, inspection and contract audit cost recoupment waived	.5%
Quality assurance, inspection cost recoupment waived	1.0%
No waiver	1.5%

B. Packing, Crating, and Handling Surcharge.

1. Shipments from DoD Procurement Funded Item Inventory. This surcharge is applied based upon Delivery Source Codes (see paragraph 080402.O. and Table 804-2). The surcharge is applied on all shipments of procurement appropriation funded secondary items that are made from DoD depots, unless an exception for the use of the actual cost has been provided by the Comptroller, DoD.

2. Shipments from GSA Inventory. This packing, crating, and handling surcharge prescribed by GSA is recouped and reimbursed to GSA by SAAC on all shipments from inventory made by GSA.

C. Transportation Surcharge. This below-the-line surcharge is applied based upon Transportation Bill Codes (see paragraph 080402.R.), unless an item is included in the transportation cost look-up table (see paragraph 080501) or an exception for the use of actual transportation costs has been approved by the Office of the DoD Comptroller. In the event the transportation bill code has been omitted, the

transportation surcharges are applied based upon delivery term codes (see subparagraph 080402.I.4.). Calculations based upon delivery term codes are shown at Tables 804-3A and B. Calculations based upon transportation bill codes are shown at Tables 804-4A and B. Transportation of items shipped from Defense Business Operations Funds (Stock Funds) to FMS customer freight forwarders is included in the item price. Transportation rates reflected in these tables have been adjusted to reflect this.

D. One Percent Asset Use Charge Surcharge. This surcharge was canceled with the "Fair Pricing" Legislation (Section 9104 of Public Law 101-165) effective November 30, 1989.

E. FMS Administrative Surcharge. The FMS Administrative Surcharge in effect at the time the LOA or amendment was accepted by the FMS customer is applied by SAAC, based upon delivery source codes (see section 080402.O.). The surcharge is applied on all "above-the-line" accrued expenditures unless a statutory waiver of cost recoupment has been made.

TABLE 804-2 SURCHARGE MATRIX (CONTINUED)**Notes:**

¹ SAAC will compute CAS (unless statutory waiver of contact administration has been made) if price code is "N" and reimbursement code is other than "N." See paragraphs 080402.E. and 080402.Q.

² PC&H does not apply to stockfund/Defense Business Operations Fund items with ship-dates from October 1, 1990.

³ Included in actual or estimated actual repair cost.

⁴ Computed standard PCH unless RIC begins with "G" then compute at rate provided by GSA.

⁵ Administrative costs will be computed unless administrative costs have been waived pursuant to statute.

⁶ The Inland CONUS transportation charge of 3.75% does not apply to stock fund/Defense Business Operations Fund shipments with shipping dates subsequent to October 1, 1990. Computation for generic codes L1D and L1E for stock fund/Defense Business Operations Fund items was discontinued on items with shipping dates from October 1, 1991.

⁷ In this column, A refers to Tables 804-3A and 804-4A; B refers to Tables 804-3B and 804-4B. Transportation for inventory items furnished from Defense Business Operations Funds to freight forwarders or Canada (except Newfoundland and Labrador) is included in the Defense Business Operations Fund price. Shipments beyond that point are computed according to Table 804-3A and Table 804-4A. Costs for items that are not furnished from Defense Business Operations Funds are computed according to Table 804-3B and Table 804-4B.

⁸ Transportation costs are computed using the transportation bill code in position 59 of the transaction. However, if this position is blank, transportation costs are computed using the delivery term code (position 34).

⁹ For DSC "EF" and "EG" when transportation is by GSA (RIC equals "G") and the TBC is not blank or where the TBC is blank and the DTC is other than "4", the CONUS transportation add-on (generic codes L1A, L1D, and L1E) is not computed. GSA includes CONUS transportation in the price of the item.

**TABLE 804-3A TRANSPORTATION CHARGES BASED ON DELIVERY TERM CODES
FOR INVENTORY ITEMS SHIPPED BY DEFENSE BUSINESS OPERATIONS FUNDS**

(Position 34 of the delivery transaction)

If the report does not contain a transportation bill code, SAAC will compute transportation for cases with transportation recorded in Block 11 of the LOA as follows:

If delivery term code, 5th
position of document no.,
is equal to: _____

Computation^{1,2}

2	CONUS/Canada (except Newfoundland and Labrador) at 0.00%.
3	CONUS/Canada (except Newfoundland and Labrador) at 0.00% for all countries.
4	
5	CONUS/Canada (except Newfoundland and Labrador) at 0.00% for all countries.
6	L2B at 2.50% for all countries. L1B at 6% for rate area 2 and 4% for rate area 1.
7	L2B at 2.50%, and L2C at 1% for all countries. L1B at 6% for rate area 2 and 4% for rate area 1, L1F at 3% (Overseas).
8	L2B at 2.50% for all countries.
9	L2B at 2.50%, and L2C at 1% for all countries. L1B at 6% for rate area 2 and 4% for rate area 1.
0	No Computation performed.

Alpha Codes

Transportation charges are to be included as part of overhaul charges (see section 070802.F. for method of computation).

NOTES:

¹ Above rates are applied in full up to a unit cost of \$10,000. For that portion of the unit cost in excess of \$10,000, 25 percent of the rate is applied.

² The 3.75 percent Inland Transportation charge does not apply to inventory items shipped by the Defense Business Operations Funds or Stock Funds October 1, 1990, and subsequent.

**TABLE 804-3B TRANSPORTATION CHARGES BASED ON DELIVERY TERM CODES
FOR INVENTORY ITEMS NOT SHIPPED BY DEFENSE BUSINESS OPERATIONS FUNDS**

(Position 34 of the delivery transaction)

If the report does not contain a transportation bill code, SAAC will compute transportation for cases with transportation recorded in Block 11 of the LOA as follows:

If delivery term code, 5th
position of document no.,
is equal to: _____

Computation¹

2	L1A CONUS/Canada (except Newfoundland and Labrador) at 3.75%.
3	L1A CONUS/Canada (except Newfoundland and Labrador) at 3.75% for all countries.
4	
5	L1A CONUS/Canada (except Newfoundland and Labrador) at 3.75% for all countries.
6	L1A at 3.75% and L2B at 2.50% for all countries. L1B at 6% for rate area 2 and 4% for rate area 1.
7	L1A CONUS at 3.75%, L2B at 2.50%, and L2C at 1% for all countries. L1B at 6% for rate area 2 and 4% for rate area 1, L1F at 3% (Overseas).
8	L1A CONUS at 3.75% and L2B at 2.50% for all countries.
9	L1A at 3.75%, L2B at 2.50%, and L2C at 1% for all countries. L1B at 6% for rate area 2 and 4% for rate area 1.
0	No Computation performed.

0805 TRANSPORTATION COST LOOK-UP TABLE

080501. Procedures for Transportation Cost Look-Up. Procedures for development of estimated actual transportation charges for use in the transportation cost look-up table are contained in the SAMM [reference (e)]. The purpose of the table is to provide to applicable DOD Components estimated actual transportation costs for items normally shipped in the Defense Transportation System (DTS) (e.g., sensitive/hazardous end items) when costs using standard transportation percentages are significantly different from estimated actual charges.

A. DSAA is responsible for recommending to DoD(C) those items which should be included in a transportation cost look-up table. Upon DoD(C) approval, DSAA shall disseminate the look-up table to the DOD Components. SAAC is responsible for application of the look-up table rates, when applicable to delivery transactions processed by the DOD components for specific items on the look-up table. DOD components are responsible for:

1. Making recommendations to DSAA relative to items and rates to be included in the look-up table.

2. Using approved rates in LOAs prepared for items cited on the look-up table.

3. Updating look-up table rates to assure estimated actual DOD costs are reflected.

4. Providing information to the SAAC relative to the applicable delivery term code for each delivery transaction processed to SAAC for items on the look-up table.

B. Each DOD component is responsible for providing recommendations to DSAA regarding items and charges for the look-up table. The formats at Tables 805-1 and 805-2 will be utilized in forwarding such recommendations to DSAA. The estimate of actual transportation cost must be documented and dem-

onstrate that all cost elements have been considered. Necessary cost elements include:

1. Estimated Security Cost.

Shipments which involve sensitive conventional arms, ammunition and explosives in transit are to be processed in accordance with DOD 5100.76-M [reference (y)]. DOD civilian and military personnel involved in providing personnel services in connection with these types of shipments are to be costed in accordance with the provisions of paragraphs 070202 and 70203 of this Volume.

2. Estimated Payments to Contractors. The estimated amounts to be paid to contractors shall be calculated at full commercial tariff rates plus any additional costs incurred to provide the required security.

3. Payments to DOD Transportation Activities. The estimated costs shall be calculated at the non-federal rate. In other words, full cost.

4. Cost of processing billings for transportation costs and the overhead of DOD transportation activities. Include in the cost elements the full cost associated with routing, control of shipments and the cost of processing payments of vendor bills.

C. Special transportation requirements, e.g., SAAM flights, will continue to be identified above the line on the LOA and applicable actual charges billed to the customer.

TABLE 805-1 CONUS TRANSPORTATION COSTS

<u>NSN/ NOMEN¹</u>	<u>Weight Item</u>	<u>M/Ton/Item</u>	<u>Standard Price</u>	<u>FMS Proc.² Cost</u>	<u>Port of³ Embark- ation</u>	<u>Est. Actual CONUS⁴ Inland</u>	<u>Est Port Costs</u>
-----------------------------------	------------------------	-------------------	---------------------------	---	--	---	-------------------------------

¹Items are those which appear to qualify based on previous data; NSNs must be added. Additional major items should be added as appropriate.

²Based on most current FMS offers.

³Data should be provided for East Coast, West Coast, and Gulf port, if applicable.

⁴Special factors such as security costs must be identified separately.

TABLE 805-2 OVERSEAS TRANSPORTATION COSTS

<u>NSN/ NOMEN¹</u>	<u>Weight Item</u>	<u>M/Ton/Item</u>	<u>Standard Price</u>	<u>FMS Proc.² Cost</u>	<u>Est Actual Overseas Ship- ment^{3,4} (Surface)</u>	<u>Est. Actual Overseas Shipment (AMC)^{3,4}</u>	<u>Est. Actual Over- seas Port Loading</u>
-----------------------------------	------------------------	-------------------	---------------------------	---	---	--	--

¹Items are those which appear to qualify based on previous data; NSNs must be added. Additional major items should be added as appropriate.

²Based on most current FMS offers.

³For each item two figures must be cited:

- Shipments to Europe, Latin America, and Mediterranean Ports.
- Shipments to Newfoundland, Labrador, Thule, Iceland, South America, Far East, African Ports (other than Mediterranean) and Near East.

⁴Special factors such as security, demurrage, etc., must be identified separately.

0806 BILLING ACTUAL COST FOR CHARGES APPLIED BY SAAC

080601. Charges Applied by SAAC

A. Actual Administrative and Logistics support Costs. Actual administrative cost is funded by an allotment that is provided based on an approved FMS administrative budget. Obligations and outlays against the allotment must be supported by documentation that demonstrates the propriety of the obligation. The allotment holder shall retain these basic source documents for audit and report the use of allotment through the required Status-of-Allotment reports.

B. Actual Contract Administration Services Costs. DoD Components performing contract administration services or audit shall:

1. Submit monthly SF 1080 billing to SAAC for the FMS and SDAF proportionate share of contract administration and audit costs. Billings shall identify separately FMS and SDAF workload statistics. Organizations authorized to bill for contract administration services are as follows:

a. Army Ammunition Plants. Allocate contract management cost on the basis of the ratio of the FMS dollar value of procurement work directives to the total dollar value of procurement work directives. Allocate quality assurance costs on the basis of the ratio of FMS items produced to total items produced.

b. Navy Supervisors of Shipbuilding, Conversion, and Repair (SUPSHIP) Activities. Allocate contract management and quality assurance effort on the basis of the ratio of FMS billings to total billings.

c. DLA, Defense Contract Management Command. Allocate contract management and quality assurance effort on the basis of the ratio of FMS and SDAF contract disbursements to total contract disbursements.

(1) DCMC-I, Defense Contract Management Command - International. Allocation based on actual cost incurred.

d. DCAA, All Offices except HQ, DCAA. Allocate contract audit based on actual hours expended on FMS requirements.

e. Any other activity performing CAS as approved by the Office of the Comptroller, DoD. When Office of the Comptroller grants this exception, a copy of the exception, which identifies the allocation method, will be provided to the Defense Security Assistance Agency, Comptroller and to the Security Assistance Accounting Center.

2. The SF 1080 bills for actual cost shall be supported with a columnar schedule containing the following data:

a. Organization.

b. Type of CAS effort incurred.

(1) Contract audit.

(2) Quality assurance and inspection.

(3) Other CAS efforts.

c. Allocation basis applicable to the CAS effort (see above paragraph).

d. Current month workload statistics.

(1) Total workload.

(2) FMS cases on which CAS recoupments have been waived.

(3) FMS workload not subject to cost Recoupment waiver.

(4) FMS percentage [d.(3) divided by d.(1)x100].

e. Allocation of funded monthly costs.

(1) Total cost incurred.

(2) Amount allocated to FMS program [e(l). multiplied by d(4)]. July 19, 1996.

f. Unfunded cost applied. Unfunded civilian retirement cost .

g. Total amount billed (e.2., and f.1.). Amounts in the column, for all organizations, shall agree with the SF 1080 billing.

h. The following special instruction applies when the allocation basis reported in column C is actual hours. Do not complete columns d(l), d(2), d(3), d(4), or e(l). Complete columns e(2), and f(1) using annual hourly rates prescribed by the Office of the Comptroller, DoD for use in pricing CAS support to foreign country commercial contracts.

3 . Maintain in DoD Component records the supporting detail (to include total dollar value of waivers excluded) for each SF 1080 submitted to SAAC for costs identified in subparagraph 2, above. This detail should not accompany the SF 1080, but the SF 1080 should be annotated to indicate supporting detail is available upon request.

C. Actual Transportation Cost. Transportation costs to customer freight forwarders from the Defense Business Operations Fund/Stock fund will be included in the cost of the article reported to SAAC. This applies to costs now reimbursed as a result of delivery transactions and to costs now reimbursed in response to SF 1080s and GBLs charged to the transportation surcharge account. Inventory shipments from Defense Business Operations Funds beyond the freight forwarders will be billed as a below-the-line charge in accordance with Tables 804-3A and 804-4A. All other shipments are billed according to tables 804-3B and 804-4B. Costs for transportation and billed as a "below-the-line" cost will be reimbursed to transportation activities in response to SF 1080 bills supported by a valid case identifier comprised of country code, implementing agency code, case designator, date of shipment date, and certifica-

tion that the bill amount was not included in the article's cost.

1. Carrier Costs.

a. Commercial and Industrially Funded/Defense Business Operations Fund Organizations. Billings for other than inland CONUS stock fund/Defense Business Operations Fund materiel, shall be supported by electronic media, listing, and /or computer tapes detailing the transportation control numbers (TCNs) and case designators or articles transported to/for Security Assistance customers. "Carrier" means commercial carriers and/or the industrially funded/Defense Business Operations Fund portion of the Military Airlift Command and the Military Sealift Command. The following exceptions apply:

(1) The cost of transporting GFM to a contractor's plant is to be included in the price of the GFM, reported in the delivery transactions and not included in the SF 1080 billings.

(2) The cost of transportation for repair and return cases, is to be included in the cost of the repair service reported via the delivery transaction, and not included in the SF 1080 billings.

(3) "Above-the-line" discrete transportation costs such as "high flight" or special airlift are to be reported as a case charge via the delivery transaction, and not included in the SF 1080 billings.

(4) The inland CONUS transportation cost for stock fund/Defense Business Operations Fund materiel from point of origin to point of customer pickup (freight forwarder, customer, or customer designated CONUS delivery point) is borne by the stock fund/Defense Business Operations Fund (DoD 7420.13-R), and is not to be included in the SF 1080 billings.

b. On or after October 1, 1991, the FMS Trust Fund shall not be cited on Government Bills of Lading for transportation of stock fund/Defense Business Operations Fund

materiel. The cost of such transportation is included in the standard price of stock fund/Defense Business Operations Fund materiel [DoD 7420.13-R, reference (u)]. On or after October 1, 1991, GBL processing activities shall not accept GBLs citing the FMS Trust Fund for transporting stock fund /Defense Business Operations Fund materiel that has a ship date of on or after October 1, 1991.

c. The U.S. Postal Service. All postal service cost collected by the SAAC as surcharge cost on FMS customer billings are directly reimbursed (pushed) to the applicable Implementing Agency's designated administrative headquarters organizations.

d. The Defense Courier Service. The SF 1080 billings to recoup the cost of support provided by the Defense Courier Service shall be based on a pro-rata of FMS shipments to total shipments. The resulting percentage shall be applied to payments to the Defense Courier Service to determine FMS billings.

e. Air/Army Postal Office (APO), Fleet Postal Office (FPO). The SF 1080 billings to recoup the cost of support provided by APOs and FPOs shall be based on a pro rata of FMS shipments to total shipments. The resulting percentage shall be applied to payments to the armed services operating these offices.

f. Commercial Package Carriers. All costs collected by the SAAC as surcharges on FMS customer billings for commercial package carriers are directly reimbursed (pushed) back to the reporting DoD Components and not reimbursed from the FMS Transportation Account as a direct cite disbursement.

2. Recoupment of the Cost of DoD Organizations Which Support Carrier Movement

a. Air Mobility Command [formerly Military Airlift Command (MAC) Headquarters]. Allocate non-industrially funded/Defense Business Operations Fund headquarters cost on the basis of the ratio of FMS billings to the total dollar value of industrial fund /Defense Business Operations Fund billings.

The billing for headquarters cost shall include a proportionate share of all costs funded by the O&M appropriation, military pay appropriation, and those unfunded costs identified in paragraph 080601 .B.2.f.

b. Military Sealift Command (MSC) Headquarters. Allocate non-industrially funded headquarters cost on the basis of the ratio of FMS billings to the total dollar value of industrial fund/Defense Business Operations Fund billings. The billing for headquarters cost shall include a proportionate share of all costs funded by the O&M appropriation, military pay appropriation, and those unfunded costs identified in paragraph 080601 .B.2.f.

c. Installation Support of AMC Airlift Operations. A charge of 5 percent of MAC Industrial fund/Defense Business Operations Fund billings shall be charged to recover the cost of DoD airport operations, (e.g., tower operations and runway use, etc). The charge shall be reimbursed to the Air Force operations and maintenance appropriations.

d. Organizations Responsible for Routing of Materiel, Preparation of GBLs and Carrier Selection. These organizations include the Military Traffic Management Command (MTMC) and subsidiary organizations, the Navy Materiel Transportation Office, and installation transportation offices. Billings shall be based on the level of effort estimates of FMS tonnage as a percentage of total tonnage moved. For the purpose of this calculation, FMS tonnage shall include both movement of materiel through the Defense Transportation System (DTS) and through commercial bills paid directly by foreign countries. The resulting percentage shall be applied to the total actual obligations incurred by routing organizations to determine the base charge. The billing shall include the base charge, military labor, and unfunded costs determined in accordance with 080601 .B.2.f.

e. Organizations Responsible for Accounting, Audit and Payment of Transportation Bills. (See paragraph 080601 .C.1. for GBL exception). These organizations are the Defense Finance and Accounting Service - Indianapolis Center, for Army, Air Force and Defense

agency shipments; the U.S. Navy Materiel Transportation Office, Norfolk, VA, for Navy shipments; and the Marine Corps Logistics Base, Albany, GA, for Marine Corps shipments. These billings shall be based on the use of level of effort estimates of the number of FMS GBLs processed as a percentage of the total number of GBLs processed. The percentage shall then be applied to obligation incurred by cost centers responsible for processing GBLs, and those unfunded costs identified in paragraph 080601 .B.2.f,

f. Organizations Providing Physical Security. Shipments which involve sensitive conventional arms, ammunition and explosives in transit are to be processed in accordance with DoD 5100.76-M [reference (y)]. DoD civilian and military personnel involved in providing personnel services in connection with these types of shipments are to be costed in accordance with the provisions of paragraphs 070202 and 070203 of this Volume.

3. Billings for Organic Transportation and Troop Labor. This type of support is typically provided when delivery term codes "2" through "9" (except "4") are used.

a. Troop Labor. Activities utilizing troop labor for the loading or unloading of vessels, trains, vans, etc. are responsible for billing applicable costs. FMS cost may be based on a pro rata share of the total cargo manifest, or a similar document.

b. Use of Organic Vehicles. These billings will be based upon a review of motorpool records. When records disclose DoD vehicles were used to move FMS materiel then the number of miles shall be determined and billed at the rate of \$4.00 per mile. The billing includes labor cost of driver assigned by the motor pool. Motor pool billing will be consolidated by major commands.

D. Packing, Crating and Handling. SF 1080 Billings for actual packing, crating and handling costs are normally not submitted. Instead, earned reimbursements are "pushed" to the shipping depot when SAAC applies the applicable surcharge. (Note: Stock fund/ De-

fense Business Operations Fund items are not reimbursed for PC&H as that charge is included in the standard price).

0807 SAAC MANAGEMENT CONTROL PROGRAM

080701. General

A. As the central site for Security Assistance accounting within the DoD, SAAC is responsible for the development of an annual Management Control Program (MCP) to test internal controls and measure the quality of DoD Security Assistance accounting systems, operations of DoD Components performing Security Assistance functions. Topics for review may be suggested by implementing agencies, DSAA, or other DoD Components. Suggestions should be submitted to DFAS-DE/IQ and include a narrative describing the suggested area of review and any apparent problems or concerns to be considered.

B. DoD Components shall fully support the SAAC MCP. Tests or reviews involving IAs or other DoD Components shall be jointly accomplished by SAAC and the activities involved. SAAC shall be responsible for the overall review plan, the general conduct of the review, and publishing the final report of resolution or agency points of contact and assist SAAC by providing data or documentation in support of the review. During specified reviews, the DoD Components may be responsible for day-to-day conduct of the review with SAAC responsible for designing a joint review plan, monitoring the conduct of the plan, and publishing a consolidated report..

C. SAAC will provide DFAS, the Office of DoD Comptroller, the Comptroller, DSAA, and the heads of involved DoD Components a copy of the annual External Network Operations Review Plan at the beginning of each fiscal year and copies of External Network Operations review reports as they are completed.

D. SAAC will recommend additional Defense Institute of Security Assistance Management (DISAM) training or the expansion of existing DISAM training courses for specific DoD

Security Assistance functional areas. Normally, such supplemental training recommendations will result from observations made during external DoD Network Operations reviews of areas demonstrating an adequate policy and internal control structure, but weak due to a general lack of expertise. The intention is that the effectiveness and efficiency of the Security Assistance community will benefit from the additional knowledge and information gained through exposure to the DISAM curriculum.

0808 SUPPORTING DOD COMPONENT PERFORMANCE REPORTS/ REQUEST FOR REIMBURSEMENTS

080801. General. DoD Components shall support FMS cases at the request of the applicable implementing agency. Such requests shall be in the form of requisitions or formal orders which place a dollar value on the support to be provided, the appropriation/ fund that will pay resulting billings, the appropriation/fund that will bill and record earned reimbursements and the address (symbol) of the implementing agency organization that is to receive and pay applicable bills. The formal orders shall be a Military Interdepartmental Purchase Request (MIPR) or equivalent. Billings by the supporting DoD Component to the implementing agency pursuant to a formal order shall be submitted on an SF 1080 supported by delivery transactions to the paying office identified in the order. The paying office shall include the delivery transactions in a consolidated submission to SAAC and reimburse any amounts due for inventory items or services when reimbursement is received from SAAC. Payments to contractors shall be made only subject to expenditure authorities issued by SAAC. A nonreimbursable delivery transaction applicable to such costs should be included in the submission.

080802. Processing Requisitions. In the event requisitions are received from the implementing agency with a fund and signal code signifying direct citation of the FMS Trust Fund (not an allotment of direct cite authority), the delivery transaction or modified MILSBILLS detailed billing transaction shall be submitted to the requisitioning activity. Requisitions containing such fund and signal codes shall be processed on

a prompt delivery basis (within 30 days). SAAC shall record obligations and disbursements upon receipt of the FMS detail delivery transactions or the modified MILSBILLS detailed billing cards. The concept is that obligations and disbursements will generally be reported to SAAC in the same month. Therefore, the process of separately reporting original obligations, adjustments or cancellations of original obligations and related disbursements is not necessary. DoD Components shall not submit interfund requisitions to non-DoD supplying activities unless expenditure authority has been approved by SAAC. Within DoD the interfund billing activity must obtain necessary self-reimbursement authority for interfund requisitions. If stocked items are not available for prompt delivery and new procurement is necessary, MIPR procedures will be followed. In the event the requisition is submitted to a non-DoD organization, the summary billing transaction and the supporting unmodified MILSBILLS detailed billed transactions shall be submitted to the implementing agency. The implementing agency shall convert MILSBILLS detailed delivery transactions to a FMS detail delivery transaction and forward the billing information to SAAC within 5 working days. SAAC shall use the FMS detail delivery transactions to prepare delivery reports to the FMS customers and provide a copy of the report or FK document identified equivalent to the implementing DoD Components for use in posting to supply performance files.

0809 PERFORMANCE AND DELIVERY REPORTING

080901. Reports

A. FMS Command Pay List. The SAAC provides reporting activities with a monthly FMS Command Pay List that identifies the total amount of work in process or deliveries charged to FMS cases in the current reporting period, excluding accounts payable (see Section D., below). The amount includes the delivery transactions submitted by the reporting activity less accounts payable and rejected items (see Section C., below) and additional charges mechanically computed by the SAAC. The last line of the Command Pay List, Total Reimbursable to This Payee" should equal the amount the

payee received by check (a By-Others transaction for AFLC). SAAC computed charges may or may not be reimbursable to the reporting activity. SAAC computed charges include:

1. Administrative Fee and Logistics Support Cost (LSC) Charges - Non-reimbursable.

2. Packing, Crating, and Handling Charges (PC&H) - Reimbursable. (Not applicable to stock fund/Defense Business Operations Fund items).

3. "Below-the-line" transportation charges. Transportation generic codes (See Table 804-4) L1D, L1E, and L40 are reimbursable. Other transportation generic codes are nonreimbursable. (L1D and L1E are not applicable to stock fund /Defense Business Operations Fund items if ship date is October 1, 1991 or later. L1A (Inland CONUS) rate of 3.75% not applicable to stock fund items effective October 1, 1990).

4. Contract Administration Surcharge (CAS) - Nonreimbursable.

B. FMS Detail Delivery Feedback list. The FMS Detail Delivery Feedback List or magnetic tape is attached to the Command Pay List and identifies the delivery transactions submitted by reporting activities and processed by SAAC for reimbursement or reporting to the FMS customer. In addition, it identifies add-on amounts mechanically computed by SAAC for each processed delivery transaction. When reconciling reimbursement received from SAAC to reporting activity records, the following columns of the FMS Detailed Delivery Feedback list should be used.

1. Voucher Amount Paid (VOU AMT PD). This column identifies the amount of reimbursement to the reporting activity.

2. Extended Value (EXT VAL). This column identifies the total amount reported to SAAC.

3. Stock Fund Add-On (STK FUND ADD-ON). Through accounting date 87-03, this column identifies the surcharge ap-

plied to stock fund/Defense Business Operations Fund items with a delivery date in FY 1980 and 1981. After accounting date 87-03, this field identifies the logistics support charge (LSC).

4. Contract Administrative Surcharge Add-On (CAS ADD-ON). This column identifies CAS computed by SAAC. Items and associated costs charged may include stock fund/Defense Business Operations Fund listed items, government-furnished materiel (GFM), and nonrecurring charges. CAS is applied to procurement Delivery Source Codes (DSC) (nonreimbursable to the reporting activity).

5. Defense Transportation System (DT TRAN). This column identifies transportation charges applied when the U.S. Government provides the transportation as a "below-the-line" service. (Nonreimbursable to the reporting activity).

6. Accessorial Administrative Costs (ACSRL ADM COST). This column identifies administrative charges, and those packing, crating and handling (PC&H) charges applied against the FMS case. These charges are applied against total deliveries reported for each case during the month and not identified to the individual deliveries. (PC&H charges for procurement appropriation funded items are reimbursable to the reporting activity.)

7. All charges are applied to the Extended Value (EXT VAL) column.

8. This listing does not provide summary totals of deliveries reported. It is used to compare deliveries reported with deliveries processed when reconciling amounts reimbursed to the reporting activity.

C. FMS IA Performance Report Transaction Register. The FMS IA Performance Report Transaction Register contains five parts. These parts include:

1. IA Initiated Performance Reports Rejected Not Processed. This part contains all delivery transactions that could not be processed by the SAAC. The reasons for not processing are listed immediately under each

transaction. A corrected transaction should be resubmitted to the SAAC. This part shall be used in reconciling reported deliveries to deliveries processed by SAAC. Rejected transactions should be corrected and resubmitted within 30 days.

2. IA Initiated Performance Reports Processed with Management Alerts. This part contains all delivery transactions that have been processed and on which possible problem areas were identified by SAAC processing. These transactions should be reviewed to determine if the transaction was properly prepared. If the transaction was properly prepared, no further transaction should be submitted to the SAAC.

3. SAAC Initiated Performance Reports Processed. This part contains those transactions computed by SAAC and applied for the IA by the SAAC. They are provided for posting to IA records.

4. SAAC Initiated Corrections to Initial IA Performance Reports. This part provides information on delivery transaction subsequently modified by the SAAC. Data shall appear with the IA delivery transaction first, followed by the corrective action taken by the SAAC.

5. SAAC Deletions From IA Initiated Performance Reports. This part provides the delivery transactions that have been subsequently deleted by the SAAC.

D. FMS Accounts Payable List

1. The FMS Accounts Payable List indicates reimbursable delivery transactions for which payment is not being made. Reasons for nonpayment include:

- a. The country's funds are frozen (not available to disburse).
- b. The country does not have enough cash available.
- c. The case provides for payment 60 days after delivery.

2. The list contains a total of all transactions that are reimbursable and have not been paid to the reporting activity.

E. FMS Voucher Backup for Payment for Accounts Payable. The FMS Voucher Backup for Payment of Accounts Payable listing represents the amount paid to the reporting activity [re: Command Pay List (see section A., above)] by country, implementing agency, and reporting activity.

080902. Reject Codes

A. The delivery transactions listed on FMS Implementing Agency Performance Report Transaction Register (see paragraph 080901.C., above) that contain reject codes did not process to the FMS Command Pay List. Reports with reject codes shall be researched and reinput within 30 days. SAAC will maintain a control file of outstanding rejected transactions, which shall be cleared once corrected transactions are resubmitted and processed. The implementing agencies will be provided copies of the control file.

B. Reports coded with management alerts have processed and are on the FMS Command Pay List. Those transactions which contain a management alert code shall also be researched. If corrective action is required following this research, reinput these transactions by reversing the previous input and submitting the corrected data within 30 days.

080903. Reconciling Reports

A. In reconciling reimbursable delivery transactions to the amounts reimbursed, the following steps shall be taken:

1. Verify that the voucher backup equals the amount on the check and the FMS Command Pay List. All amounts should equal. If amounts are not equal, contact SAAC to reconcile differences.

2. Determine:

- a. Total Reimbursable Deliveries Reported (Transaction Input) \$_____

- b. Total Amount Reimbursed
 (Command Pay List /Check) \$ _____
 Less Add-Ons (Command Pay List)
 Less SAAC Inputs (IA Register),
 Subtotal reported deliveries
 processed \$ _____
 Plus Accounts Payable (A/P List)
 Plus Rejected Items (IA Register) \$ _____
 Reconciling Total \$ _____

B. If in using the computation above, subparagraphs A.2.a and A.2.b. do not agree, further reconciliation of deliveries reported to deliveries processed is required. Match reported deliveries to deliveries processed on the Feedback Listing to identify dropped or duplicate transactions (mechanically or manually). Reinput dropped transactions and reverse duplication transactions.

080904. Reporting Examples

A. Table 809-1 illustrates the expansion of the delivery report for physical deliveries of articles and performance of services. This expansion occurs within the FMS Integrated Control System wherein additional information is added for accounting control. A transaction control number, action code, and intefund bill number are added to the delivery transaction to provide additional control. The document identifier is expanded to differentiate between input and feedback. The expanded report of delivery submitted through the FMS Integrated Control System (FICS) to the Defense Integrated Financial System (DIFS) will have a document identifier of NAI. Every NAI transaction received in DIFS is fed back to the FICS with a document identifier of NAF. Rejected transactions include transaction reply codes that identify error conditions. Rejects are suspended and controlled by transaction control number. The delivery transaction combines financial information with logistics information and is reflected in column 9 of the DD 645 Billing Statement and itemized as a FKA/B transaction on the customer's Delivery Listing. The information added in the expanded version is not included in the report to the customer. This information is internal and its only use is to assure accounting control of the transactions.

B. Table 809-2 illustrates the expansion of the delivery transaction of a progress payment to the contractor. This version of the delivery transaction is similar to the one described in subparagraph A above with the exception that port of embarkation code, transportation bill code, stock fund code, date of shipment, and mode of shipment are not included. The document identifier for the report submitted to DIFS is NDI and the feedback is NDF. This is a financial transaction and recorded as work-in-process on the DD 645 Billing Statement. It is not itemized in the Delivery Listing.

C. Other expanded formats, not illustrated here, correspond to other delivery transaction formats such as the Report of Discrepancy actions and the Report of Actual Costs. Detailed procedures concerning these various formats are contained in the FICS Interface Document.

**TABLE 809-1 EXAMPLE OF PHYSICAL DELIVERY OF MATERIEL/
PERFORMANCE OF SERVICE**

Data Element Description and Element Abbreviation	Format/ No. of Position	FICS TRC	Edit/Validation
Document Identifier Code	'1-3	'002	Must be NAI
Transaction Control No. Format (YYMMDDNNNNNV)	'4-16	'152	Must be numeric
		'152	Date must be equal to or less than current date
		'249	Version Number (V) must be "0" if Action Code is "A" (add)
		'248	Version Number (V) must be 1 thru 9 if Action Code is "C" (change) and must be one greater than suspense version No.
		---	Version number is edited if the Action Code is "D" or invalid.
Action Code	17	'003	Must be "A", "C", or "D" A=Add; C=Change; D=Delete
		'341	If Action Code = "A" then the Site Code/ DIC/TCN combination cited in trans- action cannot be duplicated in same update
		'251	If Action Code = "C" or "D" the Site Code/ DIC/TCN (excluding V) combination cited in transaction must match a record resident on PTC suspense file.
Document Number Implementing Agency (IA) Country Code (CC)	'18-31		
	'18	'038	IA code invalid (Table 03)
	'19-20	'037	Country Code Invalid (Table 02)
	'21-31	'342	If any position is not Alpha (A-Z) or Numeric (0-9) DIFS will overlay position with zero. (Spaces are not valid)
Note: TRC will be management alert--transaction will process with this TRC			
CUST-IN-CNTRY (1)	21	'---	NO EDIT
DTC (1)	22	'---	Validated if TBC is invalid . See TBC validation

APPENDIX A - TRUST FUND ACCOUNTS**Account 1000****Assets**

Debit Balance. This account represents the total FMS Trust Fund Assets. It is a summary account equal to the sum of accounts 1010, 1100, and 1310.

This is a summary account.
Do not post to this account.

Account 1010
Fund Balance with Treasury

Debit Balance. This account represents the net funds available to the DoD from FMS customer advances. The funds are deposited in account 11X8242. It is a summary account equal to the sum of accounts 1011 and 1012

DebitCredit

This account is a summary account.
Do not post to this account.

Account 1011
Funds Collected

Debit Balance. This account represents the funds received and on deposit in the Treasury due to payments from FMS customers. Account is subsidiary to Fund Balance with Treasury. Subsidiary ledgers shall be maintained for each FMS country program and include the amount identified as termination liability.

DebitCredit

1. Payments accepted from non-Federal Government activities

Contra: 2312

2. Collection of receivables.

Contra: 1310

Source of Entry: Cash collection vouchers, journal vouchers, or automated equivalents.

APPENDIX A - TRUST FUND ACCOUNTS**Account 1012
Funds Disbursed**

Credit Balance. This account represents amount of payments made (net of refunds, erroneous payments, and returns of advances), from the FMS Trust Fund. The account is subsidiary to Fund Balance with Treasury. Subsidiary ledgers shall be maintained for each FMS program.

Debit

1. Refunds received as overpayments.

Contra: 1315, 1316

Credit

1. Payments made in execution of the FMS program.

Contra: 2312

Source of Entry: Cash disbursement vouchers, journal vouchers, or automated equivalents.

**Account 1100
Cash**

Debit Balance. This account represents funds available to the FMS Trust Fund that are not yet deposited in the U.S. Treasury. It is a summary account equal to the amount recorded in account 1110.

DebitCredit

This account is a summary account.
Do not post to this account.

**Account 1110
Undeposited Collections**

Debit Balance. This account represents the cash held in the Federal Reserve Bank investment and existing commercial bank accounts at the request of the FMS customers. (New commercial bank accounts are not authorized.) Applicable Federal Reserve Bank investment accounts are blocked and cash cannot be withdrawn by the customer. The SAAC can withdraw against the account for deposit to 11X8242 as required to meet Trust Fund requirements; no other payee is authorized. Funds in the account bear interest and the FMS customer is self-insured for any losses. Subaccounts shall be maintained for each FMS Program account.

Debit

1. Collection.

Contra: 1313,2312

Credit

1. Deposition of undeposited collection, collections, deposit in Trust Fund.

Contra: 2312

Source of Entry: Collection records, certificates of deposit.

APPENDIX A - TRUST FUND ACCOUNTS

Account 1313.2
Accounts Receivable-Public-Arrearages

Debit Balance. The account represents the amount by which a country's total accrued costs exceed the country's total cash deposits. Amounts recorded equal the amount of the arrearage plus interest accrued from the date of the arrearage. Countries will be reported as having a "total amount outstanding" (arrearage) in column 3 of the TFS Form 4503 based on accrued expenditures recorded in column 10 exceeding the total of column 13 of the DD Form 645 on a net country basis (adjusted for over-collected cases) plus the country's cash resources (including holding accounts, interest bearing accounts, and undisbursed FMF) or the amount paid on the DSAA supplementary bill as adjusted by the preceding. The account is debited when the arrearage occurs and credited when the arrearage is settled. Subaccounts shall be maintained for FMS country programs with arrearages.

Debit

1. Amounts earned and billed for goods and services furnished.
Contra: 1313.1
2. Interest applied to arrearage amounts.
Contra: 2190

Credit

1. Amounts of collections received.
Contra: 1011

Source of Entry: Cash collection vouchers or DD Form 645 Billing Process.

Account 1313.3
Accounts Receivable-Public-Current-Uncollectible

Debit Balance. The account represents the amount due and unpaid by customers which has been officially declared uncollectible. It is credited when resolved and funding identified. Termination cost and interest applied to delinquent accounts will be debited to this account. Subaccounts shall be maintained for each FMS country program in this category. Within 90 days of a determination that a country program is uncollectible, DSAA will request a decision for disposition of the amount recorded from the DoD Comptroller.

Debit

1. Unpaid amounts of goods and services furnished.
Contra: 1313.1, 1313.2
2. Interest applied to unpaid amounts.
Contra: 2190
3. Termination Costs
Contra: 2400

Credit

1. Amounts of collections received.
Contra: 1011

Source of Entry: Official correspondence conveying a determination that the debt is uncollectible, documents from the DD Form 645 Billing Process, documents supporting interest calculations, and cash collection vouchers.

APPENDIX A - TRUST FUND ACCOUNTS

Account 2312
Unearned Revenue-Advances from Public

Credit Balance. This account represents cash advances received from FMS customers.

Debit

1. Payments made on behalf of FMS customers.

Contra: 1012

2. Identification of payables.

Contra 2112, 2113

Credit

1. Amounts received from FMS customers either as initial deposits or collections

Contra 1011

Source of Entry: Cash collection vouchers, journal vouchers, or automated equivalents.

Account 2400
Liability for Deposit Funds/Suspense Accounts

Credit Balance. This suspense account represents anticipated FMS cash requirements. It is credited when a customer is billed and debited when payment is made.

Debit

1. Payment received for deposit in the Trust Fund.

Contra: 1313

Credit

1. Account Receivable recorded for amount billed.

Contra: 1313

Source of Entry: DD 645 Billing Process

Account 3000
Trust Fund Equity

Credit Balance. Represents the difference between the assets and liabilities of the FMS Trust Fund. No balance is authorized to be reflected in this account.

DebitCredit

This account is a summary account.
Do not post to this account.

APPENDIX A - TRUST FUND ACCOUNTS**Account 4000
Budgetary**

Debit Balance. Summary account to reflect budgetary operations and conditions from the time FMS Trust Fund revenues are realized until they are expended.

Debit**Credit**

This is a summary account.
Do not post to this account.

**Account 4130
Contract Authority**

Debit Balance. Represents the amount of authority under which contracts may be executed in advance of the receipt of an appropriation, or in excess of amounts otherwise available in a revolving fund.

Debit**Credit**

This is a summary account.
Do not post to this account.

**Account 4131
Contract Authority-Without Liquidating Appropriation**

Debit Balance. Represents the amount of contract authority authorized by FMS orders, less the amount of contract liquidating authority that has been realized (paid) by FMS customers.

Debit**Credit**

1. Amount of contract authority
received in the form of FMS orders.

1. Amount of contract
liquidating authority
paid by FMS customers.

Contra: 4450

Contra: 4132

Source of Entry: FMS Letters of Offer and Acceptance and DD Forms 2060, (Part A Columns 10 plus 11) or automated equivalent "RB". Collection vouchers or automated equivalents.

APPENDIX-A - TRUST FUND ACCOUNTS

Account 4132
Contract Authority-With Liquidating Appropriation

Debit Balance. Represents the amount of contract liquidating authority that has been realized as the result of payments made on FMS cases (orders) by foreign purchasers.

DebitCredit

1. Amount of contract authority realized.

1. Amount of collections.

Contra: 4131

Contra: 4543

Source of Entry: Collection vouchers or automated equivalents.

Account 4150
Other New Budget Authority
(Uncommitted Acceptances)

Debit Balance. Amounts recorded in this account represent uncommitted acceptances pending requests for obligational authority from Implementing Activities. Budget authority is recognized in Treasury Account 97-11X8242, "Advances, Foreign Military Sales, Executive," only to the extent that orders will be executed during the current year.

DebitCredit

1. Amount of new budget authority enacted but not required in the current fiscal year.

1. Amount of request for obligational authority via a DD Form 2060.

Contra: 4131

Contra: 4450

Source of Entry: FMS Letters of Offer and Acceptance and DD Forms 2060, or automated equivalents.

APPENDIX A - TRUST FUND ACCOUNTS

Account 4450
Authority Available (for Apportionment)

Credit Balance. Represents the amount of new budget authority available as a result of SAAC's receipt of a signed Letter of Offer and an initial deposit from a foreign military sales customer Trust Funds are exempted from apportionment on DD Form 1105 in accordance with paragraph 412.2.B.5. of DoD 7110.1-M.

Debit

1. Amount of funds transferred to implementing Agencies in the current year.

Contra: 4516

Credit

1. Amount of contract authority (total case value) received.

Contra: 4131

Source of Entry: FMS Letters of Offer and Acceptance and DD Forms 2060 or automated equivalents.

Account 4516
Unallocated Unfunded Contract Authority

Credit Balance. Represents the amount of unfunded contract authority (authorized by accepted customer orders).

Debit

1. Contract Authority

Contra: 4541

Credit

1. Receipt of unfunded allocations. contract authority.

Contra: 4450

Source of Entry: Total of part A of DD Form 2060, or automated equivalent (RBI).

APPENDIX A - TRUST FUND ACCOUNTS

Account 4541
Allocations Issued Direct Program-Current Year

Credit Balance. Represents the amount of current period, direct program, obligational authority allocated from departmental level to intermediate levels.

Debit

1. Amounts of reductions in allocations issued.

Contra: 4516

2. Completion of the FMS case.

Contra: 4132

Source of Entry: Total of DD Form 2060, columns 10 and or 11 or automated equivalent.

Credit

1. Amounts of allocations issued.

Contra: 4516

Account 4580
Allotments Received (Issued to the Implementing Activities)

Debit Balance. Represents the amount of direct program, allotments issued to Implementing Activities. At Trust Fund level it is the amount of budget authority requested by Implementing Activities that has been approved by the SAAC.

Debit

1. Amounts of reductions in allocations issued.

Contra: 4516

2. Completion of the FMS case.

Contra: 4132

Source of Entry: Total of DD Form 2060, columns 10 and or 11 or automated equivalent.

Credit

1. Amounts of allocations issued.

Contra: 4516

APPENDIX A - TRUST FUND ACCOUNTS

Account 4611
Uncommitted/Unobligated Allotments-Direct (FMS) Program
-Current Period

Credit Balance. Represents the amount of direct program authority received by the Implementing Activities for the current period, but for which they have not yet reported as committed or obligated.

Debit

1. Amounts committed.

Contra: 4710

2. Amounts obligated
without a prior commitment.

Contra: 4810
 4910
 4931

Credit

1. The amount of direct
program obligational authority
received by the IAs.

Contra: 4580

Source of Entry: DD Form 2060, Status of Allotment Report, cash disbursements, or automated equivalent (REI).

Account 4710
Outstanding Commitments-Direct (FMS) Program

Credit Balance. Represents the amount of direct (FMS) program unobligated commitments.

Debit

1. Amounts of other valid
obligating documents for
which a commitment was made.

Contra: 4811

Credit

1. Amount of commitments
reported by the Implementing
Agencies.

Contra: 4611

Source of Entry: DD Form 2060, Status of Allotment Report or automated equivalent (REI).

CATEGORY XIII - AUXILIARY MILITARY EQUIPMENT

No items in this category are defined in the U.S. Munitions List as significant military equipment.

- NOTES:** (a) If there has been an investment in nonrecurring cost and the calculation of the charge has not been completed and a sale is pending, contact DSAA to obtain the required charge.
- (b) For older ships designed, a percentage charge (3.5%) for recoupment of nonrecurring cost will be established at a time of actual demand for FMS or commercial sales proposals.
- (c) For a new sale use the most recent charge.
- (d) The effective date of 28 Mar 89 has been assigned to items where one charge exists without an effective date identified.
- (e) NRC in staffing.

PLZT/TFPD (EEU-2P) Goggles	552.00	1 Jun 79

Notes: a. A special recoupment to SDAF of \$5,622.00 must be added to each AIM-9P-4 sale. This portion, once charged to the FMS customer, is sent to SAAC for deposit back to the SDAF. The remaining \$214.00 is deposited to Miscellaneous Receipts for USG investment in the GCS and rocket motor.

b. Includes the PAR (AN/TPN-25, AN/GPN-22, and AN/FPN-62), the ASR (AN/TPN-24 and ASR-910), and the Operation Centers (AN/TPN-23). The recoupment applies for each model series.

(1) Health benefits combined with life insurance in FY 85.

(2) Effective October 1, 1984, payments for retired pay were from the new DoD Military Retirement Fund. With the result that retirement is included in the annual composite standard rate.

(3) Effective October 1, 1988 (see the next page of this appendix).

CHAPTER 01 GENERAL INFORMATION

0101 INTRODUCTION

- 010101. Purpose
- 010102. Authority
- 010103. Applicability
- 010104. Objectives
- 010105. Volume Organization and Maintenance
- 010106. Interpretations, Recommendations, and Deviations
- 010107. Effective Date and Implementation

0102 LEGAL BACKGROUND

0103 TREASURY ACCOUNTS

- 010301. Treasury Accounts Applicable to FMS Trust Fund Operations
- 010302. Treasury Accounts Applicable to Appropriations Made Available to Finance Credit Sales and Guaranties Under Sections 23 and 24 of the AECA
- 010303. Treasury Accounts Applicable to Foreign Assistance Act of 1961 Credit Sales

0104 TYPES OF FINANCING

- 010401. General
- 010402. Reimbursable Financing
- 010403. Direct Cite Financing
- 010404. Accounting Classification Codes of the FMS Trust Fund

0105 CREDITING OF EARNED REIMBURSEMENTS

CHAPTER 02 FINANCE

0201 INTRODUCTION

- 020101. Objectives

020102. Responsibilities

020103. Source Documents

020104. Recognition of Budget Authority by the FMS Trust Fund

020105. Recognition of FMS Reimbursable Budget Authority in DoD Appropriation/Fund Accounts

020106. FMS Integrated Control System Documents

0202 PREPARATION AND PROCESSING OF DD FORMS 2061 AND 2060 FOR OTHER THAN COOPERATIVE LOGISTICS SUPPLY SUPPORT ARRANGEMENTS (CLSSAs)

020201. General

020202. Preparation of DD Forms 2061 and 2060

020203. Prior Versions of DD Form 1513

0203 PREPARATION AND PROCESSING OF DD FORMS 2061 AND 2060 FOR COOPERA-TIVE LOGISTICS SUPPLY SUPPORT ARRANGEMENT

020301. General

020302. Preparation

0204 PREPARATION AND PROCESSING OF DD FORMS 2060 FOR FMS ADMINISTRATIVE BUDGET AND LOGISTICS EXPENSE

020401. General

020402. Preparation

020403. Year-End Report

0205 PREPARATION AND PROCESSING OF DD FORMS 2060 FOR CONTRACT ADMIN-ISTRATIVE SERVICES (CAS) PROVIDED BY DOD ON COMMERCIAL CON-TRACT

020501. General

0206 PREPARATION AND PROCESSING OF DD FORMS 2060 FOR CONTRACT ADMIN-ISTRATIVE COSTS INCURRED IN SUPPORT OF FMS CONTRACTS

020601. DD Form 2060 Processing

0207 BUDGET EXECUTION

020701. Objectives

020702. Responsibilities

0208 FMS TRUST FUND BUDGET EXECUTION REPORTS

020801. Execution Reports

0209 FINANCIAL STATEMENTS

020901. Background

020902. Statements

0210 REPORT ON FMS REIMBURSEMENTS

021001. Execution Reports

021002. Instructions for ACCT-RPT(M)1002 Report

021003. Instructions for ACCT-RPT(M)725 Report

021004. Instructions for ACCT-RPT(M)1176 Report

0211 CASE EXECUTION

021101. Fiscal Year-end

021102. Reimbursement of DoD Appropriations

021103. DD Form 2061

021104. FMS Case Closure Procedures

0212 ADVERSE FINANCIAL CONDITION REPORTS

021201. General

021202. Exception

021203. Reporting Requirements

CHAPTER 03 ACCOUNTING

0301 INTRODUCTION

030101. Objectives

030102. Accounting Characteristics

030103. Responsibilities

030104. Source Documents

0302 FMS TRUST FUND ACCOUNTING REQUIREMENTS

030201. FMS Trust Fund

030202. FMS Chart of Accounts

030203. Contract Authority

030204. Accounting for Obligations

030205. Accounting for Receivables

030206. Accounting for Inventory

030207. Accounting for Trust Fund Equity

030208. General Procedures for Processing Accounting Transactions

030209. SAAC Analysis of FMS Case Accounting Data

030210. SAAC Postings to Surcharge Account Subsidiary Ledgers

0303 IMPLEMENTING AGENCY ACCOUNTING REQUIREMENTS

030301. Reimbursable Orders

030302. Allotments for Direct Citation

030303. Supporting DoD Components

030304. Fiscal Year-End Reporting Requirements

0304 ACTUAL ADMINISTRATIVE EXPENSE ACCOUNTING REQUIREMENTS

030401. Reimbursement for FMS Administrative Expenses

0305 INTERNAL CONTROL

030501. Objectives

030502. Internal Control Standards

030503. Annual Statement of Assurance

030504. Memorandums of Agreement

CHAPTER 04 CASH MANAGEMENT

0401 INTRODUCTION

040101. Objectives

040102. Cash Management Characteristics

040103. Responsibilities

0402 ESTIMATING CASH ADVANCE REQUIREMENTS

040201. Method for Calculating Requirements

0403 PAYMENT SCHEDULES

040301. Policy

040302. General

040303. LOA Payments

040304. Preparation

040305. Forecasting Procedures.

040306. Committed Values

040307. Accurate Payment Schedules

040308. Delivery Status

040309. Revising Case Payment Schedules

0404 CONTRACTOR REQUEST FOR PROGRESS PAYMENTS AND REIMBURSEMENT OF COSTS UNDER CONTRACTS INCLUDING FMS REQUIREMENTS

040401. General

040402. Contractor Allocations.

040403. Administrative Contracting Officer Allocations

0405 DEPOSIT OF CUSTOMER CASH INTO TREASURY ACCOUNTS

040501. General

040502. Receipt of Checks

040503. Wire Transfers.

0406 EXPENDITURE AUTHORITY

040601. General

040602. Self-Reimbursement Expenditure Authorizations

040603. Direct Cite Expenditure Authorizations

040604. Procedures.

040605. Cash Advances

040606. Cash Flow Problems

040607. Automated Formats

CHAPTER 05 COLLECTING AND REPORTING FMS INDEBTEDNESS AND ARREARAGES

0501 INTRODUCTION

050101. Objective

050102. Responsibilities

0502 COLLECTION PROCEDURES

- 050201. Initial and Follow-Up Actions
- 050202. Referral of Unpaid Bills.
- 050203. Collection of Unpaid Bills
- 050204. Identification of Arrearages

0503 REPORTING OF FMS ACCOUNTS RECEIVABLE

- 050301. General
- 050302. Basis for Reporting Arrearages on Accounts Receivable
- 050303. Reports Required
- 050304. Interest Charges on FMS Accounts Receivable Arrearages
- 050305. Information Requirements

CHAPTER 06 CASE FILES

0601 INTRODUCTION

- 060101. Objective
- 060102. Concepts and Requirements
- 060103. Responsibilities

0602 UNIFORM FMS CASE DOCUMENTATION

- 060201. Documentation Requirements
- 060202. Documentation Maintenance and Disposition

CHAPTER 07 PRICING

0701 INTRODUCTION

- 070101. Objectives
- 070102. Responsibilities
- 070103. Estimating Prices for a Letter of Offer and Acceptance
- 070104. Legal Background
- 070105. Crediting of Earned Reimbursements

0702 PRICING OF PERSONNEL SERVICES

- 070201. General
- 070202. Civilian Personnel.
- 070203. Military Personnel
- 070204. Indigenous Personnel
- 070205. Travel and Living Allowances
- 070206. Special Instructions Applicable to Industrial Funds (Defense Business Operations Funds)

0703 CASH SALES OF DEFENSE ARTICLES ISSUED FROM STOCK

- 070301. General
- 070302. Sale Price of Nonexcess Materiel
- 070303. Quotation of Firm Prices
- 070304. Excess Materiel

070305. Charges for Nonrecurring Cost

0704 CASH SALES OF DEFENSE ARTICLES FROM NEW PROCUREMENT FOR DIRECT DELIVERY AND PARTICIPATION IN NEW PRODUCTION

070401. General

070402. Items to be Replaced by Later Production (Diversions)

070403. Cost Principles

070404. Recovery of Nonrecurring RDT&E and Nonrecurring Production Costs

070405. Recovery of Contract Administration Services Costs Incurred in Support of New Procurements for FMS

070406. Recovery of Contract Administration Services Costs Incurred in Support of Foreign Country Commercial Contracts

070407. Recovery of Costs for Government-Furnished Materiel (GFM)
